**TITANIC ACID**, n. Ti<sup>2</sup>t-a<sup>2</sup>n/i<sup>2</sup>k. Ger., *Titansäure*. A white powder of uncertain composition, probably TiH<sub>2</sub>O<sub>3</sub> = TiO(OH)<sub>2</sub>, obtained by precipitating titanium dioxide from an acid solution by means of an alkali. [B. 3; B. 93 (a, 14).]—**Liquid t. a.**, Soluble t. a. A form of t. a. obtained in solution by dialysis after the fashions of soluble stannic acid. [B. 6.]

**TITANIC ANHYDRIDE**, n. Ti<sup>2</sup>t-a<sup>2</sup>n/i<sup>2</sup>k. See **TITANIUM DIOXIDE**.

**TITANIUM** (Lat.), n. n. Ti<sup>2</sup>t(tet)-an(a<sup>2</sup>n)/i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). From Τίταν, a Titan. Fr., *titane, ménachin*. Ger., *Titan*. A metallic element discovered by Gregor in 1789. It occurs in several rare minerals, chiefly in combination with oxygen, and is often associated with iron. It is obtained in the form of an iron-gray, amorphous powder of metallic lustre. It is distinguished by the readiness with which it combines with nitrogen at a high temperature. In composition it acts as a dyad or tetrad, and occasionally as a hexad, replacing two, four, or six atoms of hydrogen. Symbol, Ti; atomic weight, 48; sp. gr., 5.3. [B. 3.]—**Basic t. sulphate**. A white mass, TiO(SO<sub>4</sub>). [B. 3.]—**T. bromide**. See **T. tetrabromide**.—**T. chloride**. See **T. dichloride**, **T. trichloride**, **T. tetrachloride**, and **T. oxychloride**.—**T. dichloride**. A brownish powder, TiCl<sub>2</sub>, which has a strong affinity for moisture and decomposes water. [B. 3.]—**T. dioxide**. A substance, TiO<sub>2</sub>, occurring in nature in the form of several minerals, and obtainable artificially both as an amorphous white powder and in crystalline forms corresponding to those observed in the natural dioxide. It is insoluble in water, hydrochloric acid, or dilute sulphuric acid. It unites with alkaline carbonates to form titanates. [B. 3.]—**T. fluoride**. See **T. tetrafluoride**.—**T. hydroxide**. A dark-brown substance corresponding to t. sesquioxide, precipitated by ammonia from a solution of titanic acid and copper or hydrochloric acid. The titanic hydroxides are titanic and metatitanic acids. [B. 3.]—**T. iodide**. See **T. tetraiodide**.—**T. nitride**. Any one of a number of compounds of t. and nitrogen, formed by the action of nitrogen or ammonia on t. or its salts. [B. 3.]—**T. oxide**. See **T. dioxide** and **T. sesquioxide**.—**T. oxychloride**. A substance, Ti<sub>2</sub>O<sub>3</sub>Cl<sub>2</sub>, forming reddish-brown crystals. [B. 3.]—**T. sesquichloride**. See **T. trichloride**.—**T. sesquioxide**. A crystalline substance, Ti<sub>2</sub>O<sub>3</sub>. [B. 3.]—**T. sesquisulphate**. A crystalline body, Ti<sub>2</sub>(SO<sub>4</sub>)<sub>3</sub> + 8H<sub>2</sub>O. [B. 3.]—**T. sulphate**. A compound of t. and sulphuric acid. *Titanic sulphate*, Ti(SO<sub>4</sub>)<sub>2</sub> + 3H<sub>2</sub>O, is a yellow, deliquescent, amorphous substance. [B. 3.] See also **Basic t. sulphate** and **T. sesquisulphate**.—**T. sulphide**. A body, TiS<sub>2</sub>, forming shining, yellow scales. [B. 3.]—**T. tetrabromide**. A yellow crystalline mass, TiBr<sub>4</sub>. [B. 3.]—**T. tetrachloride**. A colorless, mobile, fuming liquid, TiCl<sub>4</sub>, of peculiar odor, boiling at 135° C. Combined with water, it solidifies like tin tetrachloride. It unites with the chlorides of other metals and radicles to form double salts. [B. 3.]—**T. tetrafluoride**. A colorless liquid, TiF<sub>4</sub>, fuming on exposure to the air. It combines with the fluorides of other metals, forming the titanofluorides. [B. 3.]—**T. tetraiodide**. A reddish-brown substance, TiI<sub>4</sub>, of metallic lustre. [B. 3.]—**T. trichloride**. A substance, Ti<sub>2</sub>O<sub>3</sub>, forming dark, violet-colored deliquescent scales. It has a strong affinity for oxygen, and so acts as an energetic reducing agent. [B. 3. 16.]

**TITANOFLUORIDE**, n. Ti<sup>2</sup>t/a<sup>2</sup>n-o-flu<sup>2</sup>/o<sup>2</sup>r-i<sup>2</sup>d(i<sup>2</sup>d). A compound of titanium tetrafluoride with the fluoride of another metal or radicle. [B. 3.]

**TITHONIC**, adj. Ti<sup>2</sup>th-o<sup>2</sup>n/i<sup>2</sup>k. From Τιθωνός, Tithonus, a brother of Priam. See **ACTINIC**.

**TITHYMALUS** (Lat.), n. m. Ti<sup>2</sup>th-i<sup>2</sup>m(u<sup>2</sup>m)-al(a<sup>2</sup>l)/u<sup>2</sup>s(u<sup>2</sup>s). Gr., τithυμαλος. 1. Of Hippocrates, the *Euphorbia characias*. 2. The genus *Euphorbia*. The *Tithymaleae*, the *Tithymali*, and the *Tithymaloideae* correspond essentially to the *Euphorbiaceae*. [a. 35.]—**Radix tithymali**. The root of *Euphorbia cyparissias*. [a. 35.]—**T. cyparissias**. 1. Of Dioscorides, perhaps the *Euphorbia alcyon*. 2. The *Euphorbia cyparissias*. [a. 35.]—**T. magnus**. See *Euphorbia dendroidea*.—**T. maritimus**. See *APOCYNUM venetum*.—**T. myrtifolius**. See *PEDALANTHUS tithymaloides*.—**T. nummularis**. See *Euphorbia characias*.

**TITILLAMENTUM** (Lat.), n. n. Ti<sup>2</sup>t(tet)-i<sup>2</sup>l-i<sup>2</sup>l<sup>3</sup>-me<sup>2</sup>nt/u<sup>2</sup>m(u<sup>2</sup>m). A means of titillation. [B.]

**TITILLATION**, n. Ti<sup>2</sup>t-i<sup>2</sup>l-a<sup>2</sup>shu<sup>2</sup>n. Lat., *titillatio, titillatus* (from *titillare*, to tickle). Fr., *t.* Ger., *Kitzel, Kitzeln*. The act of tickling, or the condition of being tickled. [D.]

**TITILLATUS** (Lat.), n. m. Ti<sup>2</sup>t(tet)-i<sup>2</sup>l-at-la<sup>2</sup>t/u<sup>2</sup>s(u<sup>2</sup>s). Gen., -at-us. From *titillare*, to tickle. Tickling in the throat. [L. 57 (a, 14).]

**TITRATED**, adj. Ti<sup>2</sup>t/rat-e<sup>2</sup>d. Fr., *titré*. Ger., *titriert*. Subjected to titration.

**TITRATION**, n. Ti<sup>2</sup>t-ra<sup>2</sup>shu<sup>2</sup>n. From Fr., *titre*. Volumetric analysis by means of standard solutions. [A. 1.]

**TITTHE** (Lat.), n. Ti<sup>2</sup>t/the<sup>2</sup>(tha). Gen., *tit/thes*. Gr., τίθη. 1. The nipple. 2. A wet-nurse. [L. 50 (a, 14).]

**TITTHOZOEA** (Lat.), n. n. pl. Ti<sup>2</sup>t-tho<sup>2</sup>(tho<sup>2</sup>)-zo<sup>2</sup>a<sup>2</sup>. From τίθης, the nipple, and ζῷον, an animal. See **MAMMALIA**.

**TITTHUS** (Lat.), n. m. Ti<sup>2</sup>t/thu<sup>2</sup>s(thu<sup>2</sup>s). Gr., τίθης. See **TITTHE** (1st def.).

**TITUBATION**, n. Ti<sup>2</sup>t-u<sup>2</sup>-ba<sup>2</sup>/shu<sup>2</sup>n. Lat., *titubatio* (from *titubare*, to stagger). Fr., *titubation*. Ger., *Taumeln, Wanken*. A stumbling, staggering gait. [a. 34.]

**TLALPOLOTL** [Mex. Ph.], n. See **FLOURENSIA thurifera**.

**TLANEAQUELITE** [Mex. Ph.], n. See **PIPER sanctum**.

**TLATLANCUAYA**, n. See **ACHYRANTHES calea** (in Supplement).

**TMETICUS** (Lat.), adj. Me<sup>2</sup>t(tmat)/i<sup>2</sup>k-u<sup>2</sup>s(u<sup>2</sup>s). Gr., τμητικός (from τμήναι, to cut). Fr., *tmétique*. See **RESOLVENT**.

**TOAD-FLAX**, n. To<sup>2</sup>d/fla<sup>2</sup>x. 1. The genus *Linaria*, especially *Linaria vulgaris*. 2. The *Spergula arvensis*. [a. 35.]—**Bastard t.-f.** The *Thesium linophyllum* and (in America) the genus *Comandra*. [a. 35.]

**TOADROOT**, n. To<sup>2</sup>d/ru<sup>2</sup>t. See **ACTEA alba** and **ACTEA rubra**.

**TOAD-SPIT, TOAD-SPITTLE**, n's. To<sup>2</sup>d/spi<sup>2</sup>t, -spi<sup>2</sup>t'l. See **LEMNA minor** and **CUCKOO-SPIRIT**.

**TOADSTONE**, n. To<sup>2</sup>d/sto<sup>2</sup>n. See **BUFONITES**.

**TOADSTOOLS**, n. pl. To<sup>2</sup>d/stulz. Species of *Agaricus*, especially *Agaricus muscarius* and other poisonous species; also *Polyporus* and *Boletus*. [a. 35.]

**TOBACCO**, n. To<sup>2</sup>-ba<sup>2</sup>k'o. The leaves of various species of *Nicotiana*, especially *Nicotiana tabacum*. [a. 35.]—**English t.** An old name for the genus *Hyoscyamus*. [a. 35.]—**Extract of t.** See **EXTRACTUM NICOTIANÆ**.—**Havana t.** See *NICOTIANA repanda*.—**Indian t.** See *LOBELIA inflata* and *CANNABIS indica*.—**Latakia t.** See *NICOTIANA rustica*.—**Oil of t.** 1. See under *NICOTIANA tabacum*. 2. See *Oleum NICOTIANÆ*.—**Poison-t.** See *HYOSCYAMUS niger*.—**T.-bush**. See *HEDYSMUM nultans*.—**T.-root**. The root of *Levisia rediviva*. [a. 35.]—**Turkish t.** See under *NICOTIANA rustica*.—**Vinegar of t.** See *Acetum NICOTIANÆ*.—**Virginian t.** See *NICOTIANA tabacum*.—**Wild t.** See *NICOTIANA rustica* and *LOBELIA inflata*.

**TOBELBAD** (Ger.), n. To<sup>2</sup>b'e<sup>2</sup>l-ba<sup>2</sup>d. A place in Styria, Austria, where there are warm sulphurous springs. [L. 30, 37, 57 (a, 14).]

**TOBEN** (Ger.), n. To<sup>2</sup>b'e<sup>2</sup>n. See **FUROR**.

**TOC** (Fr.), n. Tok. See **DANDO**.

**TOCADOMYCODORITIS** (Lat.), n. f. To<sup>2</sup>k-a<sup>2</sup>d(a<sup>2</sup>d)-o(o<sup>2</sup>)-mi(mu<sup>2</sup>)-ko(ko<sup>2</sup>)-do<sup>2</sup>r-i(e<sup>2</sup>/i<sup>2</sup>s). Gen., -i<sup>2</sup>idos (-idis). From τώκος, having just brought forth, μύκος, mucus, and δόπα, a hide. Fr., *tocadomycodorite*. Puerperal inflammation of a mucous membrane.

**TOCAREXIS** (Lat.), n. f. To<sup>2</sup>k-a<sup>2</sup>r(a<sup>2</sup>r)-e<sup>2</sup>x(ax)/i<sup>2</sup>s. Gen., -e<sup>2</sup>r-eos (-ia). From τόκος, childbirth, and ἀργεῖς, assistance. See **OBSTETRICS**.

**TOCHTERKNÄUEL** (Ger.), n. To<sup>2</sup>ch<sup>2</sup>t'e<sup>2</sup>r-kno<sup>2</sup>l-e<sup>2</sup>l. See **DISPIREME**.

**TOCHTERSTERN** (Ger.), n. To<sup>2</sup>ch<sup>2</sup>t'e<sup>2</sup>r-ste<sup>2</sup>rn. See **AMPHI-ASTER**.

**TOCO-DYNAMOMETER**, n. Tok-o-di<sup>2</sup>n-a<sup>2</sup>m-o<sup>2</sup>m'e<sup>2</sup>t-u<sup>2</sup>r. From τόκος, childbirth, δύναμις, power, and μέτρον, a measure. Of Schatz, an apparatus for measuring the force of the uterine contractions during labor. [A. 24.]

**TOCOMYCODORITIS** (Lat.), n. f. Tok(to<sup>2</sup>k)-o(o<sup>2</sup>)-mi(mu<sup>2</sup>)-ko(ko<sup>2</sup>)-do<sup>2</sup>r-i(e<sup>2</sup>/i<sup>2</sup>s). Gen., -i<sup>2</sup>idos (-is). See **TOCADOMYCODORITIS**.

**TOCOLGY**, n. Tok-o<sup>2</sup>/o<sup>2</sup>-ji<sup>2</sup>. From τόκος, childbirth, and λόγος, understanding. Fr., *tocolgie*. See **OBSTETRICS**.

**TOCOPHELIA** (Lat.), n. f. Tok(to<sup>2</sup>k)-o(o<sup>2</sup>)-fel(fel<sup>2</sup>)/i<sup>2</sup>-a<sup>2</sup>. From τόκος, childbirth, and φέλος, help. An apparatus for mitigating the suffering of a woman in labor; consisting of an abdominal and a sacral pad with which she can make pressure by pulling on ropes connected with them and passing over pulleys. ["Med. Times and Gaz.," 1875, i, p. 188 (a, 34).]

**TOCOTHERMOMETRIE** (Ger.), n. Tok-o-te<sup>2</sup>rm-o-mat-re'. Thermometry as applied to obstetrics. [A. 24.]

**TOD** (Ger.), n. Tod. See **DEATH**.—**Herztod**. Death from heart failure. [a. 34.]—**Schwarzer Tod**. See **BLACK DEATH**.

**TODDALIA** (Lat.), n. f. To<sup>2</sup>d-dak<sup>2</sup>(d<sup>2</sup>)/i<sup>2</sup>-a<sup>2</sup>. Fr., *toddali, toddalie*. A genus of the *Toddalieceae*, which are a tribe of the *Rutaceae*. [a. 35.]—**T. aculeata**, **T. asiatica**. A tropical Asiatic shrub containing an aromatic, bitter, acrid principle which makes it stimulant, carminative, and tonic. The bark, especially the root bark, is used as a stomachic and febrifuge. The leaves are used in baths and fomentations and are eaten raw in intestinal complaints. The green fruits, together with the root, are used externally in rheumatism. The ripe fruits have the pungency of black pepper and are pickled. [a. 35.] See also **RADIX LOPEZ**.

**TODDY**, n. To<sup>2</sup>d/i<sup>2</sup>. 1. Sap from a wine palm. It yields arrack on fermentation. [a. 48.] 2. See **PUNCH**.

**TODGEBOREN** (Ger.), adj. Tod'ge<sup>2</sup>-bor-e<sup>2</sup>n. See **STILL-BORN**.

**TODT** (Ger.), adj. Tod. See **DEAD**.—**T'enblume**. See *CALENDULA officinalis*.—**T'enblumenkraut**. See *HYOSCYAMUS niger*.—**T'enflecke**. See *LIVOR emortualis*.—**T'enkrampf**. See

**RIGOR mortis.**—**T'enkranz.** Lit., a wreath for the dead; an anomaly of the obturator artery in which it is found on Gimbernat's ligament. [L, 57 (a, 34).]—**T'enschau.** See *Post-mortem EXAMINATION.*—**T'enschlummer.** See *TRANCE.*—**T'enschweiss.** The sweating that often precedes death. [a, 34.]—**T'faul.** Fr., *mort et macéré.* Dead and macerated (said of a foetus which, having been retained for a length of time after its death, is not putrid, but macerated and flattened at those parts on which it has rested for a long time). [A, 24.]—**T'geboren.** See *STILL-BORN.*

**TÖDTUNG** (Ger.), n. Tu<sup>t</sup>un<sup>2</sup>. See *DEATH.*—**Kindst'.** Infanticide. [a, 34.]

**TOE**, n. To. Gr., δάκτυλος (τοῦ ποδός). Lat., *digitus (pedis)*. Fr., *doigt du pied, orteil.* Ger., *Zehe.* A digit of the foot.—**Flexed t's.** Fr., *orteils en marteau* (ou en Z, ou en griffe, ou en cou de cygne). Ger., *verkrümmte Zehe.* A permanent distortion of the t's in which they are unduly flexed at the last joint, so that the tips or even the nails rest on the ground, while the first joints are drawn up above the proper level. [A, 53.]—**Glossy t's.** See *Glossy SKIN.*—**Great t.** Lat., *hallux.* Fr., *gros orteil.* Ger., *grosse Zehe.* The innermost and largest of the t's. [L.]—**Hammer t's.** See *Flexed t's.*—**Lazy-t.** See *OVER-T.*—**Morton's t.** A peculiar and painful disorder pertaining to the metatarsophalangeal joint of the fourth t. ["N. Y. Med. Jour.," Oct. 8, 1892, p. 410 (a, 34).]—**Talon t's.** See *Flexed t's.*

**TOFU** (Jap.), n. A jelly prepared from the *Soja hispida*. [a, 35.]

**TOILE** (Fr.), n. Twa<sup>2</sup>. See *CLOTH.*—**T. chorioïdienne** (supérieure). See *SEPTEM LUCIDUM.*—**T. d'arnignée.** See *COBWEB.*—**T. de nuit.** See *SPARADRAP DE CIRE.*—**T. d'hôpital.** Rubber cloth, used to protect ulcers or cutaneous affections from the air. [L, 49 (a, 14).]—**T. Dieu.** See *SPARADRAP DE CIRE* and *SPARADRAP DIAPALME.*—**T. farciniale.** The allantoids. [A, 45.]—**T. médicamenteuse.** T. *sparadrap.* See *SPARADRAP.*

**TOILET**, n. Toi<sup>l</sup>et. 1. The methodical cleansing of a part or region after a surgical operation. [a, 48.] 2. Clearing the axilla of diseased lymphatic glands in cases of mammary tumor. [A, 94.]—**T. of the peritonæum.** Ger., *Bauchfelltoilette.* The aseptic measures tending to remove all extraneous substances from the peritonæum after laparotomy. [a, 34.]

**TOIT** (Fr.), n. Twa<sup>2</sup>. A roof. [a, 30.]—**T. des pédoncles cérébraux.** See *TEGMENTUM* (1st def.).

**TOKAY** (Hung.), n. To<sup>3</sup>k'oi. A Hungarian white wine.

**TOLA** (Lat.), n. f. Tol(toi<sup>2</sup>)a<sup>2</sup>. See *TONSIL.*

**TOLANE**, n. Tol'an. Fr., *t.* Ger., *Tolan.* Diphenylacetylene, C<sub>14</sub>H<sub>10</sub> = C<sub>6</sub>H<sub>5</sub>.C : C.C<sub>6</sub>H<sub>5</sub>. [B, 3, 4, 270 (a, 38).]

**TOLENAS SPRINGS**, n. Tol'an'a's. A place in Solano County, California, where there are gaseous mineral springs. [Anderson (a, 14).]

**TOLENE**, n. Tol'en. Fr., *tolène.* Ger., *Tolen.* A terpene, C<sub>10</sub>H<sub>16</sub>, obtained from balsam of Tolu. [B, 270 (a, 38).]

**TOLERANCE**, n. Toi<sup>2</sup>et'ns. Gr., *εὐδοκία.* Lat., *tolerantia* (from *tolerare*, to bear). The quality of being able to endure the action of a deleterious agent, especially when acquired by the habitual use of the agent. Cf. *ACCOUTUMANCE.*

**TOLES** (Lat.), n. m. pl. Tol(toi<sup>2</sup>)ez(as). Gen., *tol'ium.* 1. The tonsils. 2. Goitre. [A, 312, 325 (a, 48).]

**TOLIDINE**, n. Toi<sup>2</sup>i<sup>2</sup>d-en. A substance,  $\begin{matrix} \text{C}_6\text{H}_5(\text{CH}_2)_2\text{NH}_2 \\ | \\ \text{C}_6\text{H}_5(\text{CH}_2)_2\text{NH}_2 \end{matrix}$  known in three isomeric forms; used extensively in the manufacture of the dyes made from coal-tar. [B, 270 (a, 38).]

**TOLL** (Ger.), adj. Toi<sup>2</sup>. See *INSANE.*

**TOLLBEERE** (Ger.), n. Tol'bar-e<sup>2</sup>. The *Atropa belladonna*.

**TOLLES** (Lat.), n. m. pl. Tol'lez(las). Gen., *tol'lium.* See *TOLES.*

**TOLLEIT** (Ger.), n. Toi<sup>2</sup>hit. See *INSANITY.*—**Mannt'.** See *NYMPHOMANIA.*—**Weint'.** See *DIPSOMANIA.*

**TOLLKIRSCH** (Ger.), n. Toi<sup>2</sup>k'ersh-e<sup>2</sup>. See *ATROPA* and *BELLADONNA.*—**T'npflaster.** See *Emplastrum cum extracto BELLADONNÆ.*

**TOLLSUCHT** (Ger.), n. Toi<sup>2</sup>l'zuch<sup>2</sup>t. See *RABIES.*

**TOLLWURM** (Ger.), n. Toi<sup>2</sup>l'wurm. See *CYNOLYSSA* (2d def.) and *SEPTEM LINGUE.*

**TOLLWUTH** (Ger.), n. Toi<sup>2</sup>l'vut. See *RABIES.*

**TÖPPELKRANKHEIT** (Ger.), n. Tu<sup>2</sup>ip<sup>2</sup>i<sup>2</sup>l-kra<sup>2</sup>n<sup>2</sup>k-hit. See *MUMPS.*

**TOLU**, n. To-lu'. See *BALSAM OF T.*—**Syrup of t.** See *SYRUPUS toluatus.*—**Tincture of t.** See *TINCTURA toluana.*

**TOLUENE**, n. Toi<sup>2</sup>u<sup>2</sup>en. Fr., *toluène.* Ger., *Toluen.* *Toluol.* Methylbenzene, dracyl; a colorless liquid, C<sub>7</sub>H<sub>8</sub> = C<sub>6</sub>H<sub>5</sub>(CH<sub>3</sub>), occurring in light coal-tar oils, having a benzene-like odor; used in the manufacture of dyes. [B, 3 (a, 38); B, 4.]—**T'disulphonic acid.** An acid, C<sub>7</sub>H<sub>5</sub>S<sub>2</sub>O<sub>6</sub> = C<sub>6</sub>H<sub>3</sub>(CH<sub>3</sub>)(SO<sub>3</sub>H)<sub>2</sub>, known in three isomeric forms, one of which, *a-t' acid*, C<sub>6</sub>(CH<sub>3</sub>)(SO<sub>3</sub>H)<sub>2</sub>.H<sub>2</sub>SO<sub>3</sub>.H.H.H., is a thick liquid. [B, 3 (a, 38).]—**T'sulphonic acid.** An acid, C<sub>7</sub>H<sub>5</sub>SO<sub>3</sub> = C<sub>6</sub>H<sub>4</sub>(SO<sub>3</sub>H).CH<sub>3</sub>, known in three isomeric forms: *T'orthosulphonic acid*, thin deliquescent tabular crystals containing 2 molecules of water; *T'metasulphonic acid*, very deliquescent crystalline crusts; and *T'parasulphonic acid*, thick deliquescent tabular or flat prismatic crystals. The meta-compounds and para-compounds contain each 1 molecule of water. [B, 3 (a, 38); B, 4.] See also *T'disulphonic acid* and *T'risulphonic acid.*—**T'trisulphonic acid.** An acid, C<sub>7</sub>H<sub>3</sub>S<sub>3</sub>O<sub>6</sub> = C<sub>6</sub>H<sub>2</sub>(CH<sub>3</sub>)(SO<sub>3</sub>H)<sub>3</sub>, occurring as long acicular crystals containing six molecules of water. [B, 3 (a, 38).]

**TOLUENYL ALCOHOL**, n. Toi<sup>2</sup>u<sup>2</sup>e'n-i<sup>2</sup>l. Paraxylyl alcohol. [a, 38.] See *XYLYL alcohol.*

**TOLUHYDROQUINONE**, n. Toi<sup>2</sup>u<sup>2</sup>i<sup>2</sup>h-id-ro-kwi<sup>2</sup>n'on. See *METHYLHYDROQUINONE.*

**TOLUIC ACID**, n. Toi<sup>2</sup>u<sup>2</sup>i<sup>2</sup>3k. Fr., *acide toluïque* (ou *toluylque*). Ger., *Toluylsäure.* An acid, C<sub>8</sub>H<sub>8</sub>O<sub>2</sub> = C<sub>6</sub>H<sub>5</sub>(CH<sub>3</sub>)CO.OH, known in three isomeric forms: *Ortho'* a., long shining acicular crystals melting at 102° C.; *meta'* a., forming long acicular crystals from a quickly cooled solution, prismatic crystals if evaporated slowly, melting at about 100° C.; and *para'* a., acicular crystals melting at 180° and boiling at about 275° C. An isomeric acid, *a-t' a.*, or *phenylacetic acid*, C<sub>8</sub>H<sub>8</sub>.CH<sub>2</sub>.COOH, forms shining laminar crystals, melting at 76.5° C. and boiling at 205.5° C. with a vapor which produces coughing. [B, 3 (a, 38); B, 4.]

**TOLUIC ALDEHYDE**, n. Toi<sup>2</sup>u<sup>2</sup>i<sup>2</sup>2k. A substance, C<sub>8</sub>H<sub>8</sub>O = C<sub>6</sub>H<sub>5</sub>.CH<sub>2</sub>.CHO, known in three isomeric forms: *Ortho'* a., C<sub>6</sub>(CH<sub>3</sub>).CHO.H.H.H.H., a yellowish, very refractive liquid having an odor like that of benzoic aldehyde; *meta'* a., C<sub>6</sub>(CH<sub>3</sub>).H.CHO.H.H.H.H., a liquid of like odor; and *para'* a., C<sub>6</sub>(CH<sub>3</sub>).H.H.CHO.H.H.H., a liquid having a peppermint-like odor. [B, 3 (a, 38); B, 4.]

**TOLUIDINE**, n. Toi<sup>2</sup>u<sup>2</sup>i<sup>2</sup>2d-en. Fr., *t.* Ger., *Toluidin.* Amidotoluene; a substance, C<sub>7</sub>H<sub>7</sub>N = C<sub>6</sub>H<sub>5</sub>(CH<sub>2</sub>)NH<sub>2</sub>, known in three isomeric forms: *Ortho'* a., a colorless liquid which quickly turns brown in the light or the air; *meta'* a., a colorless oily liquid, turning to a brown resinous mass in the air; and *para'* a., large colorless tabular crystals having an aromatic, aniline-like odor. [B, 3 (a, 38).]

**TOLUIFERA** (Lat.), n. f. Tol-u<sup>2</sup>i<sup>2</sup>2'e<sup>2</sup>r-a<sup>2</sup>. From *tolu* (q. v.), and *ferre*, to bear. Fr., *toluifère.* The genus *Myroxylon*. [a, 35.]—**T. balsamum**, **T. Pereiræ.** See *MYROXYLON toluiferum*.

**TOLUIFEROUS**, adj. Tol-u<sup>2</sup>i<sup>2</sup>2'e<sup>2</sup>r-u<sup>2</sup>s. Lat., *toluiferus* (from *tolu* [q. v.], and *ferre*, to bear). Fr., *toluifère.* Producing balsam of Tolu. [a, 35.]

**TOLUNITRIL**, n. Toi<sup>2</sup>u<sup>2</sup>i<sup>2</sup>nit'ri<sup>2</sup>l. Fr., *tolunitrile.* A substance, C<sub>8</sub>H<sub>7</sub>N = CH<sub>3</sub>.C<sub>6</sub>H<sub>4</sub>.CN, known in three isomeric forms: *Ortho'* a., a very refractive colorless liquid boiling at about 204° C.; *meta'* a., a liquid having an odor of benzonitril; and *para'* a., a very refractive liquid having an odor of benzonitril and boiling at 217.8° C. [B, 3 (a, 38).]

**TOLUOL** (Ger.), n. Tol-u-o<sup>2</sup>l'. See *TOLUENE.*

**TOLUQUINOL**, n. Toi<sup>2</sup>u<sup>2</sup>i<sup>2</sup>2-kwi<sup>2</sup>n'o<sup>2</sup>l. See *METHYLHYDROQUINONE.*

**TOLUQUINONE**, n. Toi<sup>2</sup>u<sup>2</sup>i<sup>2</sup>2-kwi<sup>2</sup>n'on. See *METHYLQUINONE.*

**TOLURHETIN**, n. Toi<sup>2</sup>u<sup>2</sup>i<sup>2</sup>2-ret'i<sup>2</sup>n. From *tolu* (q. v.), and *rhétin*, resin. Fr., *tolurétine.* Of Gerhardt, a resin extracted from balsam of Tolu. [B, 93 (a, 14).]

**TOLURIC ACID**, n. Toi<sup>2</sup>u<sup>2</sup>i<sup>2</sup>2'r'i<sup>2</sup>2k. Fr., *acide tolurique.* Paratoluylamidoacetic acid; an acid, CH<sub>3</sub>.C<sub>6</sub>H<sub>4</sub>.CO.NH.CH<sub>2</sub>.CO.OH = C<sub>10</sub>H<sub>11</sub>NO<sub>3</sub>, occurring as pearly tabular crystals. [B, 3 (a, 38).]

**TOLUYL**, n. Toi<sup>2</sup>u<sup>2</sup>i<sup>2</sup>2'i<sup>2</sup>l. Fr., *toluyle.* 1. The hypothetical radicle, C<sub>6</sub>H<sub>5</sub>, of toluylic acid. 2. An improper term for cresyl. [B, 93 (a, 14).]—**T'saure.** See *TOLUIC ACID.*

**TOLUYLENE**, n. Toi<sup>2</sup>u<sup>2</sup>i<sup>2</sup>2'i<sup>2</sup>2en. Fr., *toluylène.* Ger., *Toluylen.* Stilbene; a bivalent radicle, C<sub>6</sub>H<sub>5</sub>(CH<sub>3</sub>)<sup>2</sup>, contained in some of the derivatives of toluene.—**T'blue.** A substance, C<sub>17</sub>H<sub>16</sub>N<sub>4</sub>.HCl + H<sub>2</sub>O (or C<sub>15</sub>H<sub>14</sub>N<sub>4</sub>), occurring as a resinous mass which acquires a coppery lustre when exposed to the air. [B, 3, 270 (a, 38).]—**T'diamine.** A substance, C<sub>7</sub>H<sub>10</sub>N<sub>2</sub> = C<sub>6</sub>H<sub>5</sub>(CH<sub>3</sub>)(NH<sub>2</sub>), known in several isomeric forms, such as *ortho'* diamine, or *β-diamidotoluene*, C<sub>6</sub>(CH<sub>3</sub>).H.NH<sub>2</sub>.NH<sub>2</sub>.H.H., shining white scales; *meta'* diamine, or *α-diamidotoluene*, C<sub>6</sub>(CH<sub>3</sub>).NH<sub>2</sub>.H.NH<sub>2</sub>.H.H., long acicular crystals; *para'* diamine, or *γ-diamidotoluene*, C<sub>6</sub>(CH<sub>3</sub>).H.NH<sub>2</sub>.H.NH<sub>2</sub>.H.H., masses of tabular crystals; and *δ-diamidotoluene*, C<sub>6</sub>(CH<sub>3</sub>).NH<sub>2</sub>.NH<sub>2</sub>.H.H.H., red crystals having an odor of acetamide. [B, 3 (a, 38).]—**T. hydrate.** A substance, C<sub>14</sub>H<sub>14</sub>O = C<sub>6</sub>H<sub>5</sub>.CH<sub>2</sub>.CH(OH).C<sub>6</sub>H<sub>5</sub>, occurring as brittle acicular crystals. [B, 4 (a, 38).]—**T' red.** A substance, C<sub>15</sub>H<sub>16</sub>N<sub>4</sub>, occurring as orange-colored acicular crystals containing 4 molecules of water but becoming anhydrous and blood-red at about 160° C. According to some, the dye is the hydrochloride of this, C<sub>15</sub>H<sub>15</sub>N<sub>4</sub>Cl. [B, 3, 270 (a, 38).]—**T'violet.** A substance, C<sub>14</sub>H<sub>14</sub>N<sub>4</sub>, occurring as red crystals having a green reflection. [B, 3 (a, 38).]

**TOLYL**, n. Toi<sup>2</sup>u<sup>2</sup>i<sup>2</sup>2'l. Fr., *tolyl.* Ger., *T.* 1. Methyl-benzyl, or *para'* a., a univalent radicle, C<sub>6</sub>H<sub>5</sub>(CH<sub>3</sub>).CH<sub>2</sub>. 2. The group C<sub>6</sub>H<sub>5</sub>. [B, 3 (a, 38).]—**T'acetamide.** The compound C<sub>6</sub>H<sub>5</sub>(CH<sub>3</sub>).NH<sub>2</sub>.C<sub>6</sub>H<sub>5</sub>O. [B, 2.]—**T' alcohol.** A substance, C<sub>7</sub>H<sub>10</sub>O = C<sub>6</sub>H<sub>5</sub>.CH<sub>2</sub>.CH<sub>2</sub>OH, known in two isomeric forms, one of which forms acicular crystals. [B, 4; B, 270 (a, 38).]—**T'chloracetamide.** The compound C<sub>6</sub>H<sub>5</sub>.ClNO = CH<sub>3</sub>.ClCONH.C<sub>6</sub>H<sub>5</sub>.CH<sub>2</sub>. [B, 2.]—**T'turethane.** A substance, C<sub>10</sub>H<sub>12</sub>NO<sub>2</sub> = NH(C<sub>6</sub>H<sub>5</sub>).CO.OC<sub>6</sub>H<sub>5</sub>, known in three isomeric forms: *ortho'* urethane, crystals; *meta'* urethane, a liquid; and *para'* urethane, or *ethylt' carbamate*, long prismatic crystals. [B, 3 (a, 38).]

**TOLYLENE**, n. Toi<sup>2</sup>u<sup>2</sup>i<sup>2</sup>2-en. Fr., *tolylène.* The radicle, C<sub>6</sub>H<sub>4</sub>.CH<sub>2</sub>, of t. alcohol. [B.]—**T. alcohol.** **T. glycol.** Fr., *glycol tolylénique.* A substance, C<sub>6</sub>H<sub>4</sub>:(CH<sub>2</sub>.OH)<sub>2</sub>, resulting from the substitution of a molecule of hydroxyl for one atom of hydrogen in the methyl group of tolyl alcohol. [B, 270 (a, 38).]

**TOMATO**, n. Tom-a<sup>2</sup>t'o. Fr., *tomate.* Ger., *Liebesapfel.* Sp., *jitomate* (Mex. Ph.), *tomate.* The *Lycopersicon esculentum*, also its fruit, which is used in Mexico as an anodyne. [a, 35.]—**Strawberry-t.** See *PHYSALIS alkekengi*.

**TOMBA**, n. In Brazil, the *Perianthopodus espalina* and other purgative species. [B, 121 (a, 35).]

**TOMBAC**, n. To<sup>2</sup>m'ba<sup>2</sup>k. Fr., *t.* Ger., *Tombak.* An alloy of 97 parts of copper and 3 of zinc, having a gold-like appearance. [B, 270 (a, 38).]

**TOMBÉ** (Fr.), adj. To<sup>2</sup>n<sup>2</sup>2-ba. Prolapsed. [A, 44.]

**TOME** (Lat.), n. f. Tom(<sup>2</sup>m)/e(a). Gen., tom'es. Gr., τομή (from τέμνω, to cut). Ger., Schnitt. Section, a cutting; of Galen, venesection. [A, 325 (a, 48).]

**TOMELLINE** (Fr.), n. To-me<sup>2</sup>-len. See GLOBULIN.

**TOMENTOSE**, adj. Tom-e<sup>2</sup>nt-os. Lat., tomentosus (from tomentum [q. v.]). Fr., tomenteux. cottonneux, drapé. Ger., filzig. Covered with tomentum, densely pubescent. [a, 35.]

**TOMENTOSULUS** (Lat.), adj. Tom-e<sup>2</sup>nt-o<sup>2</sup>s(os)/u<sup>2</sup>l(u<sup>2</sup>l)-u<sup>2</sup>s-(u<sup>2</sup>s). Covered with a short delicate tomentum. [a, 35.]

**TOMENTUM** (Lat.), n. n. Tom-e<sup>2</sup>nt/u<sup>2</sup>m(u<sup>2</sup>m). Fr., t. Ger., Filz, Filzüberzug (1st def.). 1. In botany, a dense, more or less matted pubescence. [a, 35.] 2. The shaggy mass constituted by the villi of the chorion. [A, 45.]—**T. cerebri**. The inner surface of the pia. [L.]

**TOMIPAROUS**, adj. To<sup>2</sup>m-i<sup>2</sup>p/a<sup>2</sup>r-u<sup>2</sup>s. From τóμος, a cut, and parere, to bring forth. Fr., tomipare. Of plants, reproducing by the separation of parts. [a, 35.]

**TOMIS** (Lat.), n. f. Tom(<sup>2</sup>m)/i's. Gen., tom'idōs (-idis). Gr., τομῖς (from τέμνω, to cut). See SCISSORS.

**TOMIUM** (Lat.), n. n. Tom(<sup>2</sup>m)/i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). From τóμος, cutting. The cutting edge of either mandible of a bird. [L, 221.]

**TOMOGYNIA** (Lat.), n. n. Tom(<sup>2</sup>m)-o(o<sup>2</sup>)-ji<sup>2</sup>n(gu<sup>2</sup>n)/i<sup>2</sup>a<sup>2</sup>. From τóμος, cutting, and γυνή, a woman. Of Richard, the gymnospers. [a, 35.]

**TOMOMANIA** (Lat.), n. f. Tom(<sup>2</sup>m)-o(o<sup>2</sup>)-man(ma<sup>2</sup>n)/i<sup>2</sup>a<sup>2</sup>. From τóμος, a cutting, and mania, madness. Fr., tomomanie, bi-tourmanie (1st def.). Ger., Schneidesucht. 1. A mania for performing surgical operations. [L, 50 (a, 14).] 2. A mania for being operated on for purely imaginary ailments. ["Rev. de laryng. et d'otol.," Dec., 1892.]

**TOMOTOCIA** (Lat.), n. f. Tom(<sup>2</sup>m)-o(o<sup>2</sup>)-tos(<sup>2</sup>k)/i<sup>2</sup>a<sup>2</sup>. From τóμος, a cutting, and τόκος, childbirth. Fr., tomatocie. See Cæsar-ean OPERATION.

**TON** (Ger.), n. Ton. See TONE and SOUND.—**Eigent'**. The timbre peculiar to each individual voice. [K, 16.]—**Herztöne**. See Heart-sounds.—**Pulmonalt'**. See Vesicular MURMUR and Respiratory MURMUR.—**T'aubheit**. Inability to hear particular sounds. [L, 57 (a, 14).]

**TONALITÉ** (Fr.), n. To-na<sup>2</sup>-le-ta. Pitch in percussion.

**TONCA**, n. To<sup>2</sup>n<sup>2</sup>k'a<sup>2</sup>. See Tonka BEAN.

**TONCIC ACID**, n. To<sup>2</sup>n<sup>2</sup>/si<sup>2</sup>k. See COUMARIN.

**TONCO**, n. To<sup>2</sup>n<sup>2</sup>k'o. See Tonka BEAN.

**TONE**, n. Ton. Gr., τόνος, (from τείνω, to stretch). Lat., tonus. Fr., ton. Ger., Ton, Spannung (1st def.). 1. A distinct definite sound; also the character or quality of a sound. 2. The normal state of tension in healthy tissues: in physiology, the normal contraction of the arteries.—**Harmonic t.** See HARMONIC, n.—**Reflex t.** See Reflex TONUS.

**TÖNEND** (Ger.), adj. Tu<sup>2</sup>n<sup>2</sup>e<sup>2</sup>nd. See SONOROUS.

**TONGA**, n. To<sup>2</sup>n<sup>2</sup>ga<sup>2</sup>. 1. A drug prepared in the Fiji Islands from the bark, leaves, and fibres of *Rhaphidophora vitensis*, *Premna taitensis*, etc. It has been recommended in neuralgia. [A, 35.] 2. See under DATURA stramonium.

**TONGINE**, n. To<sup>2</sup>n<sup>2</sup>g'en. A volatile alkaloid contained in tonga (1st def.). [A, 270 (a, 48).]

**TONG-PANG-CHONG** (Chin.), n. The *Rhinacanthus cornutus*, also a drug prepared from its root and leaves. [B, 270 (a, 48); a, 35.]

**TONGRES** (Fr.), n. To<sup>2</sup>n<sup>2</sup>-gr'. A place in the province of Limburg, Belgium, where there is a gaseous chalybeate spring. [a, 14.]

**TONGUE**, n. Tu<sup>2</sup>n<sup>2</sup>. Gr., γλῶσσα. Lat., lingua. Fr., langue. Ger., Zunge. A muscular mass attached to the floor of the mouth and susceptible of protrusion from that cavity. It takes part in sucking, mastication, and articulation, and the mucous membrane covering its upper surface is the seat of the organs of taste.—**Adherent t.** A t. pathologically attached by folds of mucous membrane to the floor and sides of the mouth. [a, 34.]—**Blind t.** A t. having a longitudinal fissure that divides the fore part into two equal parts. [a, 34.]—**Black t.** 1. See GLOSSOPHYTIA (1st def.). 2. See Epidemic erysipelatous FEVER.—**Dotted t.** See Stippled t.—**Earthy t.** A t. on which there are white, dry, and rough deposits of calcareous matter. [a, 34.]—**Fish-t.** In dentistry, an instrument resembling the t. of a fish, formerly used in extracting the wisdom teeth. [a, 34.]—**Geographical t.** A t. affected with a serpiginous epithelial affection (e. g., leukoplakia) that makes it look like a map. [a, 34.]—**Hairy t.** See TRICHOGLOSSIA.—**Parrot t.** A black, shrunken t. that can not be protruded, because it catches behind the lower teeth, observed in typhus fever. [a, 34.]—**Plastered t.** A coated t. in which the coat is recent and superabundant. [a, 34.]—**Shaggy t.** A furred t. having the papillæ elongated by horny epithelium. [a, 34.]—**Split t.** See BIRD.—**Stippled t.** Of W. H. Dickinson, a t. in which the papillæ are separately capped each with a minute white patch of epithelium. [a, 34.]—**Strawberry t.** A t. that is hyperemic and shows fungiform papillæ, as in scarlet fever. [a, 34.]—**T. holder**. See T. DEPRESSOR.—**Wooden t.** See ACTINOMYCOSIS.

**TONGUE-TIE**, n. Tu<sup>2</sup>n<sup>2</sup>t'i. Fr., soubrelangue. See ANKYLOGLOSSUM (1st def.).

**TONGUE-TIED**, adj. Tu<sup>2</sup>n<sup>2</sup>t'id. Ger., mundfaul. Affected with ankyloglossum. [a, 48.]

**TONIC**, adj. To<sup>2</sup>n<sup>2</sup>/i<sup>2</sup>k. Gr., τόνικός (from τείνω, to stretch). Lat., tonicus. Fr., tonique. Ger., tonisch. 1. Possessing the property of maintaining or promoting the tone of the system; as a n., a drug possessing that property. 2. Characterized by continuous contraction (said of muscular spasm). [D; a, 48.]

**TONICITY**, n. To<sup>2</sup>n<sup>2</sup>-i<sup>2</sup>s/i<sup>2</sup>t-i<sup>2</sup>. Fr., tonicité. Ger., Tonicität. The condition of a tissue, organ, etc., in relation to tone, especially its normal elasticity. [a, 48.]

**TONKA**, n. To<sup>2</sup>n<sup>2</sup>k'a<sup>2</sup>. Fr., t. Ger., T'bohnen. See Tonka BEAN.—**T'stearoptene**. See COUMARIN.

**TÖNNISSTEIN** (Ger.), n. Tu<sup>2</sup>n<sup>2</sup>/ni<sup>2</sup>s-stin. A place in the Rhine province, Prussia, where there is a gaseous, alkaline, and saline spring. [L, 49, 57 (a, 14).]

**TONOMETER**, n. To<sup>2</sup>n<sup>2</sup>-o<sup>2</sup>m/e<sup>2</sup>t-u<sup>2</sup>r. From τόνος, tension, and μέτρον, a measure. Fr., tonomètre. Ger., T. An instrument for estimating tension, especially the tension of the eyeball or the pressure of the ventricles. [K.]—**Dors and Lecoultré's t.** A t. constructed on the same principle as Hamer's t., but having the position of the peg regulated by a screw. The spiral spring is replaced by a straight steel spring, which is not very long, so that the tension rapidly increases with the deep pushing of the peg. [F.]—**Graefe's t.** A t. consisting of a small rod which is pressed against the eye by means of a loaded lever. A scale shows the degree to which the peg or style can overcome the tension of the eye with various degrees of loading. [F.]—**Hamer's t.** A t. consisting of a metallic tube out of which a peg or style projects. The latter is connected with a wound-up watch spring, so that by pressing upon the eye it has to overcome the constantly increasing tension. [F.]—**Monnik's t.** A modification of Hamer's t. in which the immovable tube is replaced by two pegs, which can be pushed in with the slightest possible friction. The two pegs act together upon an index which shows on a dial-plate the change in position of the two pegs. A second index moves with the middle peg, which is under the increasing pressure of a short spring. [F.]—**Roy's t.** A t. for estimating the varying pressure of the ventricles during contraction and dilatation. It consists essentially of an air-tight tube containing oil, in which works a cylinder carrying a registering index. [K, 19.]—**Verlaan's t.** A t. consisting of a tube in which three isolated pegs can be pushed in or out. The middle peg is connected with a spiral spring the tension-power of which increases with the pressure. The two outer pegs may be moved with the slightest possible friction, and carry scales which run on a vernier connected with the middle peg. [F.]—**Weber's t.** A t. consisting of a peg which acts with increasing spring power on the sclerotic until its curvature to a certain extent is flattened to a plane. [F.]

**TONOPSYCHAGOGIA** (Lat.), n. f. Ton(<sup>2</sup>n<sup>2</sup>)-o<sup>2</sup>ps-ik(u<sup>2</sup>ch<sup>2</sup>)-a<sup>2</sup>g(a<sup>2</sup>g)-o<sup>2</sup>j(og)/i<sup>2</sup>a<sup>2</sup>. From τόνος, a tone, ψυχή, the mind, and ἀγωγή, a leading. Fr., tonopsychagogie. The characteristic action of certain sounds on the mind. [L, 50 (a, 14).]

**TONSIL**, n. To<sup>2</sup>n<sup>2</sup>/i<sup>2</sup>l. Gr., ἀμυγδαλή, ἡπαρίδιον. Lat., tonsilla, tonsillum, amygdala. Fr., tonsille, amygdale. Ger., Tonsille, Halsdrüse, Mandel. A prominent body situated (one on each side) between the pillars of the fauces, about half an inch long and a third of an inch wide and thick. On its free surface are numerous openings leading into lymphoid crypts, between which are a number of lymph follicles together with lymphoid tissue. [L, 31, 332.]—**Cerebellar t's.** See AMYGDALÆ cerebelli.—**Luschka's t.** See Pharyngeal t.—**Palatine t.** See T.—**Pharyngeal t.** Lymphoid tissue on the posterior superior wall of the pharynx, limited on each side by the Eustachian tube. [L, 31.]

**TONSILLA** (Lat.), n. f. To<sup>2</sup>n<sup>2</sup>-i<sup>2</sup>l/a<sup>2</sup>. See TONSIL.—**Tonsillæ cerebelli.** See AMYGDALÆ cerebelli.—**T. palatina.** See TONSIL.—**T. pendula.** A pedunculated tonsil.—**Tonsillæ pestilentes.** See Malignant ANGINA.—**T. tubalis Gerlachii.** See Pharyngeal TONSIL.—**T. tubaria.** Ger., Tubexmandel. Lymph follicles in the cartilaginous portion of the Eustachian tube. [L, 332.]

**TONSILLAR, TONSILLARY**, adj's. To<sup>2</sup>n<sup>2</sup>/i<sup>2</sup>l-a<sup>2</sup>r, -ar-i<sup>2</sup>. Lat., tonsillaris (from tonsilla, a tonsil). Fr., tonsillaire. Ger., tonsillar. Pertaining to the tonsils. [C.]

**TONSILLE** (Fr., Ger.), n. To<sup>2</sup>n<sup>2</sup>-sel-y', ton-z'i<sup>2</sup>/le<sup>2</sup>. See TONSIL.

**TONSILLITIC**, adj. To<sup>2</sup>n<sup>2</sup>-i<sup>2</sup>l-i<sup>2</sup>t/i<sup>2</sup>k. Pertaining to amygdalitis.

**TONSILLITIS** (Lat.), n. f. To<sup>2</sup>n<sup>2</sup>-i<sup>2</sup>l-i<sup>2</sup>(le)/ti<sup>2</sup>s. Gen., -it'idōs (-idis). Fr., tonsillite. See AMYGDALITIS.

**TONSILLOTOME**, n. To<sup>2</sup>n<sup>2</sup>/i<sup>2</sup>l-o<sup>2</sup>-tom. From tonsilla, a tonsil, and τέμνω, to cut. Ger., Tonsillotom. See AMYGDALOTOME.—**Billings's t.** A t. with a guillotine blade and a sharp vulsella which slides along the shaft for holding the piece amputated. [E.] See cut under AMYGDALOTOME.—**Hamilton's t.** A t. provided with a sharp forceps for holding the part, which does not slide along the shaft but is simply attached to it. [E.]—**Mackenzie's t.** A t. in which the knife-edge is pushed against the tonsil by the thumb of the hand holding the instrument. [E.]—**Mathieu's t.** A t. provided with a two-pronged spear sliding along the shaft. [E.]—**Tiemann's t.** A t. in which both blade and forceps are worked simultaneously by closing or opening the handles of the instrument. [E.]

**TONSILLOTOMY**, n. To<sup>2</sup>n<sup>2</sup>-si<sup>2</sup>l-o<sup>2</sup>t'o<sup>2</sup>-mi<sup>2</sup>. See AMYGDALOTOMY.

**TONSILLUM** (Lat.), n. n. To<sup>2</sup>n<sup>2</sup>-i<sup>2</sup>l/i<sup>2</sup>u<sup>2</sup>m(u<sup>2</sup>m). See TONSIL.

**TONSURANS** (Lat.), adj. To<sup>2</sup>n<sup>2</sup>-u<sup>2</sup>r(ur)/a<sup>2</sup>nza<sup>2</sup>ns. Gen., -ant'ia. From tondere, to shear. Fr., tonsurant. 1. Causing baldness (used chiefly in terms relating to parasitic skin diseases). [G.] 2. In botany, glabrous from loss of pubescence. [a, 35.]

**TONUS** (Lat.), n. m. Ton(<sup>2</sup>m)/u<sup>2</sup>s(u<sup>2</sup>s). Gr., τόνος (from τείνω, to stretch). Ger., T. See TONE.—**Reflex t.** Of Brondgeest, a slight contraction observed in the muscles of one leg of a decapitated frog when the sciatic nerve is divided on the opposite side; due to the reflex irritation conducted through the intact sensory nerves of the wounded limb. [K, 16.]—**Schliessungst'** (Ger.). See GALVANOTONUS.—**T. trismus.** See TRISMUS.

**TOOTHUTIA**, n. See DENGUE.

**TOOTH**, n. Tu<sup>2</sup>th. Pl., teeth. Gr., δὲνς. Lat., dens. Fr., dent. Ger., Zahn. 1. A hard bone-like organ implanted in man and most

mammals, in the inferior and superior maxillae, which serves for the mastication of food. It consists of a central cavity containing t.-pulp, dentin, enamel, and cement. In many lower vertebrates they are fixed in the bones surrounding the mouth. [L.] Cf. *Dental formula*. 2. In botany, any small marginal lobe. [a, 35.]—**Anterior molar teeth.** See *Bicuspid teeth*.—**Auditory teeth (of HUSCHKE).** Cylindrical horizontal processes on the labium vestibulare. [a, 34.]—**Back teeth.** See *Molar teeth*.—**Barred t.** See *Dent barree*.—**Bicuspid teeth.** The teeth in each jaw that are placed next the canine teeth. Their crowns are compressed in front and behind, and are convex on the outer and inner sides. They have two points, or cusps, whence the name. [C.]—**Butter-teeth.** See *Incisor teeth*.—**Canine teeth, Carnassial teeth.** Fr., *dents angulaires* (ou *concides*). Ger., *Eckzähne, Spitzzähne*. Four teeth, one above and one below on each side, next to the lateral incisors. They are long and strong, with a thick conical crown, convex in front and concave behind, with one single central point. [C.]—**Chisel teeth.** The incisor teeth of rodents. [L.]—**Celliform teeth.** See *Setiform teeth*.—**Complicated teeth.** Fr., *dents compliqués*. Teeth in which the crown consists of alternate layers of cement and enamel. [L.]—**Compound t.** See *DENTS agrégées* and *DENTS composées*.—**Conical teeth.** Teeth that are modifications of a cone in shape. [Owen (L.)]—**Convulsion t.** See *Tidal-mark t.*—**Craggy teeth.** Irregular projections of dentin on the t. giving them a crag-like appearance. They are not necessarily significant of any diathesis. [a, 34.]—**Cuticular teeth.** Teeth formed from the ecderyon. [A, 12.]—**Deciduous teeth.** Teeth which are shed, especially those of the first dentition. [L.]—**Dentinal teeth.** Teeth, such as those in man and most vertebrates, in which the main part is composed of dentin; distinguished from t.-like structures composed mostly of a horny substance. [J, 35.]—**Eighteen-year molar t.** The molar (or wisdom t.) which makes its eruption between the seventeenth and the twenty-fifth year. [L.]—**Elephant's t.** See *DENS elephantis*.—**Eye teeth.** Fr., *œillets*. Ger., *Kronzähne*. The two upper canine teeth. [C.]—**False molar teeth.** See *Bicuspid teeth*.—**Fore-teeth, Front teeth.** See *Incisor teeth*.—**Gastric teeth.** Calcareous nodules in the stomach of crustaceans. [L.]—**Greater molar teeth.** See *Molar teeth*.—**Gymnosomatous teeth.** See *DENTS gymnosomes*.—**Honeycombed teeth.** Teeth in which there are circumscribed areas of decay and deficient dentin development, causing a honeycombed appearance. [a, 34.]—**Horny teeth.** See under *Dentinal teeth*.—**Huschke's teeth.** See *Auditory teeth*.—**Hutchinsonian (or Hutchinson's) teeth.** A malformation of the teeth, especially the upper central incisors, supposed to be peculiar to children having hereditary syphilis, in which the teeth are short, narrow from side to side at their edges, very thin, and displaying a central cleft on their free edge. [a, 34.]—**Incisor teeth.** Lat., *dentes sectorii*. Ger., *Schneidezähne*. The four median teeth of each jaw, having single roots and wide, thin, chisel-like cutting edges. [L.]—**Laniary teeth.** See *Canine teeth*.—**Lesser molar teeth.** See *Bicuspid teeth*.—**Milk molar teeth.** The molar teeth of the first dentition.

HUTCHINSON'S TEETH.

[L.]—**Maxillary teeth.** The teeth that are implanted in the inferior or superior maxillae. [L.]—**Milk teeth.** Lat., *dentes infantiles*. Ger., *Milchzähne*. Those teeth which appear in early childhood, to be replaced at various ages by the permanent teeth. They are twenty in number, five in the forward part of each side of each maxilla, as follows: Two molars, one canine, and two incisors. [C.]—**Molar t., Multicuspidate t., Multicuspid t.** Lat., *mylodus*. Ger., *Mahlzahn, Kauzahn, Backenzahn*. A t. having more than one root and a rounded quadrangular crown with several cusps. In adult dentition there are (including the bicuspid) ten molar teeth in each jaw. [L.]—**Palatine teeth.** Teeth attached to the palate bones. [L.]—**Pectinate teeth.** Teeth with the edges notched so as to resemble a comb. [L.]—**Pegged (or Peg-shaped, or Peg-tooth) teeth.** Teeth, observed in various diatheses, in which the loss of enamel and exposure of the dentin present a series of small peg-like excrescences. [a, 34.]—**Permanent molar teeth.** The six-year, twelve-year, and eighteen-year molar teeth. [L.]—**Permanent teeth.** See *Second teeth*.—**Pharyngeal teeth.** Teeth situated in the pharynx or attached to its osseous framework. [L.]—**Pitted teeth.** Teeth in which, owing to deficient development of dentin or enamel, pits occur on the surface. [a, 34.]—**Posterior molar teeth.** See *Molar teeth*.—**Prehensile teeth.** In certain animals, teeth that grasp and retain objects, but are of secondary importance in mastication. [L.]—**Premolar teeth.** See *Bicuspid teeth*.—**Principal teeth.** The first molar teeth of man, whose homologues De Blainville assumed to trace through lower animals. [L, 14.]—**Pug teeth.** See *Canine teeth*.—**Rasp teeth.** Sharp, conical teeth closely set so as to resemble the surface of a rasp or file. [L.]—**Scleriform teeth.** See *Chisel teeth*.—**Screw-driver teeth.** See *Hutchinson's teeth*.—**Second teeth.** The teeth of the second dentition, normally thirty-two in number. [L.] Cf. *Dental formula*.—**Sectorial teeth.** The bicuspid teeth of the *Carnivora*.

[L, 34] (a, 27).—**Serrated teeth.** Teeth with notched edges, like a saw. [L.]—**Setiform teeth.** Teeth shaped like fine bristles. [L.]—**Simple teeth.** Of Cuvier, teeth forming a cone of nearly even or only slightly curved surface, and having cement or enamel only on the outer peripheral portion, as in man and dogs. [L, 158 (a, 14).]—**Six-year molar t.** The molar t. which makes its eruption about the seventh year. [L.]—**Stomach teeth.** See *Canine teeth*.—**Superadded teeth.** The six back teeth on either jaw. [C.]—**Syphilitic teeth.** See *Hutchinson's teeth*.—**Teeth of succession.** The teeth which take the places of the milk teeth. [L.]—**Temporary molar teeth.** The molar teeth of the first dentition. [L.]—**Temporary teeth.** See *Milk teeth*.—**Tidal-mark t.** A malformed t., observed in epileptics, in which the dentin projects beyond the enamel edge, resembling tide-marks on the sand. [N. Y. Med. Jour., Aug. 13, 1887, p. 185 (a, 34).]—**T-bone.** An old term for dentin. [J.]—**True molar teeth.** See *Molar teeth*.—**Twelve-year molar t.** The molar t. which makes its eruption during the thirteenth year. [L.]—**Vertebral teeth.** In certain snakes, inferior spinous processes of several cervical vertebrae, covered with cement. [Owen (L.)]—**Villiform teeth.** Fr., *dents en velour*. See *Pegged teeth*.—**Vomerine teeth.** Teeth attached to the vomer. [L.]—**Warty teeth.** Teeth in which the tissues are hypertrophied and folded into an irregular mass. [E, 12.]—**Wisdom teeth.** Lat., *dentes serotini*. The most posterior of the molar teeth, which appear about the eighteenth year. [L.]

**TOOTHACHE**, n. Tuth'ak. See ODONTALGIA.—**T-root.** See DENTARIA *diphylla*.—**T-tree.** 1. See *ARALIA spinosa*. 2. The *Xanthoxylum fraxineum*. [a, 35.]

**TOOTHED**, adj. Tuth'd. See DENTATE.

**TOOTHEDGE**, n. Tuth'ej. See HÆMODIA (1st def.).

**TOOTHWORT**, n. Tuth'wurt. See LATHRÆA, DENTARIA, CAPSELLA *bursa pastoris*, and PLUMBAGO *scandens*.

**TOOT-PLANT, TOOT-POISON**, n's. Tut'pla'nt, -poiz'n. See *CORIARIA ruscifolia*.

**TOPÆSTHESIA** (Lat.), n. f. To'p-ēs(a'ē-s)-thēz(thas)'iā-s. From *τόπος*, a place, and *αἴσθησις*, sensation. The capacity for discerning locality by the touch. [a, 48.]

**TOPHACEOUS**, adj. To'f-a'shu's. Lat., *tophaceus*. Fr., *topacé*. Consisting of, pertaining to, or resembling tophi. [D, 1.]

**TOPHUS** (Lat.), n. m. To'f(to'f)'u's(u's). Fr., *tophe*. Ger., *Tuff, Kalkbeule*. 1. A nodular quoy deposit of sodium urate, most common in the knuckles. [D, 1.] 2. See CHALAZION.—**Syphilitic t.** See SYPHILOMA.

**TOPHYPERIDROSIS** (Lat.), n. f. To'f(to'f)-ip(u'p)-u'r(e'r)-iā'd(ed)-ros'i's. Gen., -ros'eos (-is). From *τόπος*, a place, *ὑῑδρ*, in excess, and *ἰδρῶς*, perspiration. Local hyperidrosis. [L, 50 (a, 14).]

**TOPICAL**, adj. To'p'i'k'l. Gr., *τοπικός* (from *τόπος*, a place). Lat., *topicus*. Fr., *topique*. Ger., *topisch*. Local. [E.]

**TOPICUS** (Lat.), adj. To'p'i'k-u's(u's). See TOPICAL; as a n., in the n., *topicum*, a remedy directly applied locally. [A, 326 (a, 21).]

**TOPINAMBOUR** (Fr.), n. To-pe-na'nt-bur. See HELIANTHUS *tuberosus*.

**TOPIOS** (Lat.), n. m. To'p(o'p)'i'ō-s. From *τόπος*, a place, and *ίός*, a poison. Of Ritgen, miasm. [L, 50 (a, 14).]

**TOPIQUE** (Fr.), adj. To-pek. See TOPICAL; as a n., a local application.

**TOPLITZ** (Ger.), n. Tu'p'litzs. See TEPLITZ-SCHÖNAU.

**TOPOALGIA** (Lat.), n. f. To'p(o'p)-o(o'p)-a'lj(a'lg)'i'ā-s. From *τόπος*, a place, and *ἀλγος*, a pain. Of P. Blocq, a local pain due to general disease. [a, 34.]

**TOPOGRAPHICAL**, adj. To'p-o-gra'f'i'k'l. Lat., *topographicus*. Fr., *topographique*. Pertaining to topography. [a, 48.] See T. ANATOMY.

**TOPOGRAPHY**, n. To'p-o'g'ra'f'i'z. Lat., *topographia* (from *τόπος*, a place, and *γράφειν*, to write). Fr., *topographie*. Ger., *Topographie, Ortsbeschreibung*. See Topographical ANATOMY.

**TOPOLOGY**, n. To'p-o'lj'o'j-i'z. From *τόπος*, a place, and *λόγος*, understanding. Fr., *topologie*. Ger., *Topologie*. 1. See Topographical ANATOMY. 2. Of Kūneke, the relative position of the presenting part of the foetus in regard to the pelvic canal. [A, 91.]

**TOPONARCOSIS** (Lat.), n. f. To'p-o(o'p)-na'r'k-os'i's. Gen., -cos'eos (-is). From *τόπος*, a place, and *νάρκωσις*, a benumbing. See LOCAL ANÆSTHESIA.

**TOPONEUROSIS** (Lat.), n. f. To'p-o(o'p)-nu'r'os-i's. Gen., -ros'eos (-is). From *τόπος*, a place, and *νεῖρον*, a nerve. Fr., *toponévrose*. Ger., *topisches Nervenleiden*. A topical neurosis. [L, 50.]

**TOPONYMY**, n. To'p-o'nj'm-i'z. From *τόπος*, a place, and *ὄνομα*, a name. The terminology of the local relations of bodily organs. [a, 48.]

**TOPOPHOBIA** (Lat.), n. f. To'p-o(o'p)-fob(f'o'b)'i'ā-s. From *τόπος*, a place, and *φόβος*, fear. Fr., *topophobie*. Ger., *Topophobie*. A morbid fear of particular places. [D.]

**TOPUSZKO**, n. A place in Croatia where there are hot gaseous mineral springs. [L, 30, 49, 57 (a, 14).]

**TOQUE** (Fr.), n. Tok. The genus *Scutellaria*. [a, 35.]

**TORCULAR** (Lat.), n. n. To'r'k'u'l(u'l)-a'r. Gen., -ar'is. From *torquere*, to twist. 1. A press for making oil or wine, also an oil-cellar. [A, 312 (a, 48).] 2. See TOURNIQUET.—**T. Herophilii.** Fr., *pressoir d'Hérophile*. Ger., *Kelter*. An irregularly shaped venous sinus over the internal occipital protuberance to which the longitudinal, straight, posterior occipital, and lateral sinuses converge. [L.]

**TORCULUM** (Lat.), n. n. To'r'k'u'l(u'l)-u'm(u'm). From *torquere*, to turn. See TOURNIQUET.—**T. volvens.** Of Rhazes, see COCHLEA (4th def.).

**TORDA**, n. A place in Hungary where there is a saline spring.

**TORDYLUM** (Lat.), n. n. To<sup>2</sup>rd-i<sup>2</sup>(u<sup>1</sup>)/i<sup>2</sup>-u<sup>2</sup>m(u<sup>4</sup>m). Gr., τὸρδύλιον, τὸρδύλιον. Fr., *tordyle*. Ger., *Zirmet*. A genus of the *Peucedaneae*. [a, 35.]—**T. minus**, **T. officinale**. Fr., *séséli de Candie* (ou de Crète). Ger., *gebrüchlicher Zirmet, Drekkrut, kretischer Sesel, Bergkümmel, Rosenkümmel*. Heartwort; a species indigenous to southern Europe, England, and the Orient. The long, thin fibrous root and the yellowish-white fruits were formerly official as *radix et semen tordylit* (seu *tordylit minoris*, seu *séseli* [seu *séselos*] *cretici*, seu *montani*). The fruits are mildly aromatic and were used especially in urinary diseases and amenorrhoea. [a, 35.]

**TORENIA** (Lat.), n. f. Tor-en(an)/i<sup>2</sup>-a<sup>2</sup>. Fr., *torène, torénie*. An East Indian and Chinese genus of scrophulaceous herbs. [a, 35.]—**T. asiatica**. A species the sap of the leaves of which is used in gonorrhoea, and the entire plant as an application in skin diseases. [a, 35.]—**T. crustacea**. A species used externally in ulcers, skin diseases, etc. [a, 35.]—**T. hirsuta**. A species used in gonorrhoea and externally in abscesses. [a, 35.]—**T. minuta**. A species the sap of which is emetic and purgative. [a, 35.]

**TORF** (Ger.), n. To<sup>2</sup>rf. See PEAT.—**T'mull**. Powdered peat, used as a dressing. [L, 57 (a, 14).]

**TORFMOS** (Ger.), n. To<sup>2</sup>rf'mos. See SPHAGNUM.

**TORMEN** (Lat.), n. n., sing. of *tormina* (q. v.). To<sup>2</sup>rm'e<sup>2</sup>n. Gen., *tor'minis*.

**TORMENTILLA**, n. To<sup>2</sup>rm'e<sup>2</sup>nt-i<sup>2</sup>l. The *Potentilla tormentilla*, *Geranium maculatum*, and *Lamium purpureum*. [a, 35.]

**TORMENTILLA** (Lat.), n. f. To<sup>2</sup>rm'e<sup>2</sup>nt-i<sup>2</sup>l/a<sup>2</sup>. 1. The *Potentilla* t. 2. A section of the genus *Potentilla*. [a, 35.]—**Decoctum tormentillae** [Belg. Ph.]. A preparation made by macerating 1 part of t.-root for an hour with water enough to make 20 parts after boiling a quarter of an hour and straining. [B, 95 (a, 38).]—**Extractum tormentillae** [Belg. Ph.]. A thick extract prepared with cold water from the rhizome of t. [B, 95 (a, 38).]—**Radix tormentillae**. The root of *Potentilla* t. [a, 35.]—**Radix tormentillae pulverata**. T.-root crushed, dried at 40° C., powdered and sifted through a No. 120 silk sieve [Fr. Cod.] (through a 1,000-mesh sieve, leaving no residue [Swed. Ph.]). [B, 95 (a, 38).]—**T. erecta**, **T. officinalis**. See *Potentilla* t.

**TORMENTILLA** (Fr.), n. Tor-ma<sup>2</sup>n<sup>2</sup>-tel-y'. See *Potentilla tormentilla*.—**Poudre de t. (racine)**. See *Radix tormentillae pulverata*.

**TORMENTUM** (Lat.), n. n. To<sup>2</sup>rm'e<sup>2</sup>nt/u<sup>2</sup>m(u<sup>4</sup>m). From *torquere*, to twist. A violent pain. [L, 50 (a, 14).]—**T. acutum**. Stercoraceous vomiting. [L, 50 (a, 14).]—**Tormenta intestinorum**. See *TORMINA alvi*.

**TORMINA** (Lat.), n. n., pl. of *tormen*. To<sup>2</sup>rm/i<sup>2</sup>n-a<sup>2</sup>. Gen., *torminum*. From *torquere*, to twist. Gripping pain. [D.]—**T. alvi**. Colic. [L, 50 (a, 14).]—**T. Celsi**. Dysentery. [L, 50 (a, 14).]—**T. hysterica**. Hysterical pain. [L, 50 (a, 14).]—**T. parturientium**. False labor pains. [L, 50 (a, 14).]—**T. post partum**. The after-pains of parturition. [L, 50 (a, 14).]—**T. ventriculi nervosa**. Of Kussmaul, a gastroenterous causing symptoms like those of gastræctasia. [A, 319 (a, 34).]

**TORNACULUM** (Lat.), n. n. To<sup>2</sup>rn-a<sup>2</sup>k(a<sup>2</sup>k)/u<sup>2</sup>l(u<sup>4</sup>l)-u<sup>2</sup>m(u<sup>4</sup>m). From *torquere*, to twist. See TOURNETUK.

**TORNELIA** (Lat.), n. f. To<sup>2</sup>rn-el(e<sup>2</sup>l)/i<sup>2</sup>-a<sup>2</sup>. The genus *MONSTERA*. [a, 35.]

**TOROSE**, adj. Tor'os. Lat., *torosus* (from *torus*, a protuberance). Ger., *wulstig, torös*. 1. Bulging. [a, 48.] 2. Cylindrical with swellings at intervals. [a, 35.]

**TORPA**, n. A place in the province of Göteborg, Sweden, where there is a strong saline spring. [L, 57 (a, 14).]

**TORPEDO** (Lat.), n. f. To<sup>2</sup>rp-ed(ad)/o. Gen., *-ped'inis*. From *torpere*, to be stiff. A genus of the *Torpedinidae*, or electric rays, which are a family of the *Batoidei*. These fishes have an electric organ composed of hexagonal prisms situated on each side between the pectoral fins and the head. [L, 30 (a, 14); L, 207.]

**TORPID**, adj. To<sup>2</sup>rp/i<sup>2</sup>d. Gr., *ὑπώδην*. Lat., *torpidus*. Fr., *torpide*. Ger., *erstarrt*. Sluggish, inactive, numb. [D, 20.]

**TORPIDITY, TORPOR**, n's. To<sup>2</sup>rp-i<sup>2</sup>d/i<sup>2</sup>t-i<sup>2</sup>, to<sup>2</sup>rp'o<sup>2</sup>r. Gr., *ὑπώδην*, Lat., *torpor* (from *torpere*, to be stiff or numb). Fr., *torpeur, engourdissement*. Ger., *Erstarrung*. 1. Numbness, drowsiness, sluggishness; insensibility to stimuli; functional inactivity. 2. Deficient susceptibility to the various influences and irritants that act more or less continuously on the organism. [D, 3.]

**TORQUAY**, n. To<sup>2</sup>r-ke'. A sea-bathing and climatic resort in Devonshire, England. [L, 30, 37, 49, 57 (a, 14).]

**TORRE DE SAN-MIGUEL** (Sp.), n. To<sup>2</sup>r'a da sa<sup>2</sup>n-meg-u<sup>2</sup>e<sup>2</sup>l'. A place in Saragossa, Spain, where there is a saline and sulphurous spring. [L, 49 (a, 14).]

**TORREFACTION**, n. To<sup>2</sup>r-e<sup>2</sup>-fa<sup>2</sup>k'shu<sup>2</sup>n. From *torrefacere*, to dry by heat. Fr., *torrefaction*. Ger., *Dörrung, Röstung*. Roasting, drying by artificial heat. [L, 30, 41, 49, 50 (a, 14).]

**TORRES** (Sp.), n. To<sup>2</sup>r'e<sup>2</sup>sa. A place in the province of Madrid, Spain, where there is a sulphurous spring. [L, 57 (a, 14).]

**TORREYA** (Lat.), n. f. To<sup>2</sup>r/i<sup>2</sup>-a<sup>2</sup>. From *Torrey*, an American botanist. Fr., *t. Stinking-yew*; a genus of evergreen trees of the *Taxaceae*. [a, 35.]—**T. californica**. Wild (or stinking, or Californian) nutmeg (tree). The leaves emit an unpleasant odor if burned or bruised. The nutmeg-like fruit tastes like turpentine. [a, 35.]—**T. grandis**. Large stinking-yew, the *kaya* of China. The nuts yield a nutritious oil. [a, 35.]—**T. nucifera**. A Japanese species. The kernels are astringent. [a, 35.]

**TORRICELLIAN**, adj. To<sup>2</sup>r-i<sup>2</sup>-che<sup>2</sup>l'i<sup>2</sup>-n. Investigated by or named from E. Torricelli, an Italian mathematician. [a, 48.]

**TORRUBIA** (Lat.), n. f. To<sup>2</sup>r-rub/i<sup>2</sup>-a<sup>2</sup>. A genus of *Fungi*, of the *Sphaeriaceae*. [B, 61.]—**T. sinensis**. A species developed on dead caterpillars; highly valued as a tonic in China, and recommended in constipation, impotence, coryza, etc. [a, 35.]

**TORSION**, n. To<sup>2</sup>r'shu<sup>2</sup>n. Gr., *στρέψις*. Lat., *torsio* (from *torquere*, to twist). Fr., *t.* Ger., *Drehung, Umdrehen*. The act or process of twisting. [E.]—**Free t.** T. of the free end of a divided artery. [a, 34.]—**Limited t.** T. in which the artery is held, some distance from its end, with a forceps that limits the extension of the twisting. [a, 34.]—**T. of the umbilical cord**. A twisting of the cord to such a degree as to interfere with the flow of blood through its vessels.

**TORSOCLUSION**, n. To<sup>2</sup>rs-o-kluz'h<sup>2</sup>n. From *torquere*, to twist, and *cludere*, to close. Acupressure (q. v.) by the second variety of the fifth method. [E.]

**TORTELE** (Fr.), n. To<sup>2</sup>rt-e<sup>2</sup>l. Of the Fr. Cod., the leaves or the flowering plant of *Sisymbrium officinale*. [B, 95 (a, 38).]

**TORTICOLLIS** (Lat.), n. m. To<sup>2</sup>rt-i<sup>2</sup>-ko<sup>2</sup>l'i<sup>2</sup>s. From *tortus*, twisted, and *collum*, the neck. Fr., *torticolis*. Ger., *Schiefhals, Halsstarre, Krummhals, Halsverkrümmung*. Wry neck, a distortion of the neck which causes the head to be held awry. [a, 18, 29.]—**Intermittent t.** See *Spasmodic t.*—**Ocipito-atloidian t.** Of Dally, a subluxation of the atlas on the occipital bone in such a way that the lateral masses are transverse to the vertical plane. [A, 520 (a, 29).]—**Ocular t.** Of Quignot, t. developed from inequality in the sight of the two eyes. [A, 520 (a, 29).]—**Spasmodic t.** T. due to a lesion of the spinal accessory nerve and characterized by recurrent transient contractions of the muscles of the neck and especially of the sterno-cleido-mastoid. [D, 70; L, 87 (a, 50).]

**TORTILIS** (Lat.), adj. To<sup>2</sup>rt/i<sup>2</sup>-i<sup>2</sup>s. From *torquere*, to twist. Fr., *tortile*. Twisted like a rope; also susceptible of twisting. [a, 35.]

**TORTUE** (Fr.), n. To<sup>2</sup>r-tu<sup>2</sup>. See ATHEROMA.

**TORTULA** (Lat.), n. f. To<sup>2</sup>rt/u<sup>2</sup>l(u<sup>4</sup>l)-a<sup>2</sup>. A genus of mosses. [a, 35.]—**T. muralis**. A European species considered astringent and used as a hæmostatic. *T. aestiva*, *T. ambigua* (*T. goettingensis*), and *T. pilosa* (*T. vernalis*) are varieties. [a, 35.]

**TORTUOUS**, adj. To<sup>2</sup>rt/u<sup>2</sup>-u<sup>2</sup>s. Lat., *tortuosus* (from *tortus*, twisted). Fr., *tortueux*. Irregularly twisted, bent or twisted in different directions. [a, 35.]

**TORULA** (Lat.), n. f. To<sup>2</sup>r/u<sup>2</sup>l(u<sup>4</sup>l)-a<sup>2</sup>. Fr., *torule*. A genus of *Fungi* typical of a division (the *Torulaceae* or *Torulacei*) of the *Coniomycetes* in which the entire plant is reduced to a chain of spores without a definite stroma. [a, 35.]—**T. cerevisiae**. See *SACCHAROMYCES cerevisiae*.—**T. fusoides**. See *CHALARA fusidioides*.

**TORULOSE**, adj. To<sup>2</sup>r/u<sup>2</sup>-o<sup>2</sup>s. Lat., *torulosus*. Fr., *toruleux*. Ger., *knorrig*. Torose; also slightly torose. [a, 35.]

**TORULUS** (Lat.), n. m. To<sup>2</sup>r/u<sup>2</sup>l(u<sup>4</sup>l)-u<sup>2</sup>s(u<sup>4</sup>s). Dim. of *torus* (q. v.). Fr., *torule*. A slight swelling or prominence.—**T. glandis**. See *CORONA glandis*.

**TORUS** (Lat.), n. m. To<sup>2</sup>rt(u<sup>2</sup>r)/u<sup>2</sup>s(u<sup>4</sup>s). Fr., *t.* Ger., *Wulst* (1st def.), *Blumenboden* (2d def.). 1. A swelling or prominence. [L, 50 (a, 48).] 2. In botany, the shortened stem on which the floral leaves are inserted. [a, 35.]—**T. manus**. See *METACARPUS*.—**T. marginalis**. Ger., *Randwulst*. A cerebral convolution. [L, 3 (K).]—**T. palatinus**. A protuberance found on the surface of the hard palate at the point of union of the intermaxillary and palatomaxillary sutures. ["Jahresbericht der gesammten Medicin" 1891, Bd. i, p. 7 (a, 50).]—**T. uteri**. A slight upward projecting elevation of the posterior wall of the uterus where the peritonæum is reflected upward. [L.]

**TOTUM CARNOSUM** (Lat.), n. n. Tot/u<sup>2</sup>m(u<sup>4</sup>m) ka<sup>2</sup>rn-os'-u<sup>2</sup>m(u<sup>4</sup>m). See PANCREAS.

**TOUCH**, n. Tu<sup>2</sup>ch. Gr., *ἅψις*. Lat., *tactus*. Fr., *tact* (1st def.), *toucher* (2d def.). Ger., *Tastsinn* (1st def.), *Gefühlsinn* (1st def.), *Touchiren* (2d def.). 1. The act, sense, or function of judging of the presence or character of external objects by means of direct contact. [K.] 2. A digital examination by the vagina.—**After-t.** A sensation which remains for a short time after the cessation of contact with an object. [K.]—**Double t.** Combined vaginal and rectal digital exploration. [a, 34.] **Royal t.** Lat., *manus regalis*. The t. of a king, formerly in repute as a cure for scrofula (the "king's evil"). [a, 48.]

**TOUCHING**, n. Tu<sup>2</sup>ch/i<sup>2</sup>n<sup>2</sup>. See *TOUCH* (2d def.).

**TOUCH-ME-NOT**, n. Tu<sup>2</sup>ch'me-no<sup>2</sup>t. The genus *Impatiens*. [a, 35.]

**TOUCHWOOD**, n. Tu<sup>2</sup>ch'wu<sup>2</sup>d. See AMADOU.

**TOUFFE** (Fr.), n. Tuf. See CÆSPES and FLOCCULUS (2d def.).

**TOULEMA**, n. See CANNA starch.

**TOULOUOUNIN**, n. Tu-lu-kun/i<sup>2</sup>n. Fr., *toulouounine*. A bitter principle contained in the bark of *Carapa guineensis*; a non-nitrogenous, amorphous, resinous mass. [B, 93 (a, 14).]

**TOUMBOUTAY**, n. See TETV.

**TOUR** (Fr.), n. Tur. A turn: a circular movement. [L, 41, 49 (a, 14).]—**T. de lune**. See *Periodic OPHTHALMIA* (2d def.).—**T. de maître**. Catheterism in which the instrument is introduced with the shaft between the legs until its point is arrested at the bulb of the urethra, when the handle is turned in a semicircle until it reaches a vertical position and is then at once depressed between the thighs, causing the point to pass through the prostatic urethra. [a, 34.]—**T. de reins**. A lumbar sprain. [a, 34.]—**T. de White**. White's dental drill. [a, 34.]

**TOURBETTE** (Fr.), n. Tur-be<sup>2</sup>t. See SPHAGNUM.

**TOURBILLON** (Fr.), n. Tur-bel-yo<sup>2</sup>n<sup>2</sup>. A vortex. [a, 48.]—**T. vasculaire**. See *VASA vorticosa*.—**T. vital**. Of Cuvier, the con-

stant interchange of nutritious and waste materials which occurs in the tissues. [K, 31.] Cf. METABOLISM.

**TOURLOUROU-OIL**, n. Tur-lu-ru'. Ger., *Tourlourouöl*. A fixed animal oil used as an embrocation in rheumatism (see under *BIRGUS latro*). [a, 35.]

**TOURNANTÖL** (Ger.), n. Turn-a²nt'ü¹. See *HUILLE tournante*.

**TOURNEFORTIA** (Lat.), n. f. Turn-fort'iz-a². From J. P. de Tournefort, a French botanist. Fr., *pittone* (2d def.), *tournefortie* (2d def.). 1. See *ANTHOSPERMUM*. 2. Of Linnaeus, a genus of the *Heliotropiaceae*. The *Tournefortieae* are a division of the *Boraginaceae*. [a, 35.]—**T. hirsutissima**. Fr., *herbe à chiques* (ou *à malingres*), *pittone très velue*. A tropical American species of T. (2d def.). The leaves are used as a cataplasm to kill chigoes. The roots are diuretic. [a, 35.]—**T. umbellata**. A Mexican shrub used in fevers and as an application to tumors, ulcers, and skin lesions. [a, 35.]

**TOURNESOL** (Fr.), n. Tur-n¹-sol¹. 1. See *HELIOTROPISM europæum* and *CHROZOPHORA tinctoria*. 2. See *LITMUS*.—**Dutch t.** The *Lecanora tartarea* and *Rocella tinctoria*. [a, 35.]—**T. en drapau**. The dye (litmus) obtained from *Chrozophora tinctoria*. [a, 35.]

**TOURNESOLIA** (Lat.), n. f. Tur-n¹-sol'iz-a². The genus *Chrozophora*. [a, 35.]

**TOURNIOLE** (Fr.), n. Tur-ne-ol. Paronychia affecting the base and sides of the nail and the neighboring skin.

**TOURNIQUET**, n. Tu-rn'iz-ke²t. Fr., t. Ger., *T. Aderpresse*, *Schraubwinde*. An instrument for making continuous pressure upon a part, usually consisting of two metal plates which may be approximated or separated by a thumb screw, and of a strap connecting them and long enough to be buckled around the limb, together with a pad. The pad is placed over the vessel to be occluded, and fastened in place by the strap, which is then tightened by separating the metal plates with the thumb-screw. [E, 4.]—**Dupuytren's t.** A t. for making pressure on the abdominal aorta, consisting of a semicircle of metal with a pad on one end, which fits upon the spine, and a screw working vertically through the other end so as to press down another pad upon the aorta. [E.]—**Field t.** A t. consisting merely of a strap and buckle with a pad to go over the artery. [E, 4.]—**Hoyer's clamp t.** A semicircular t. with a pad at one extremity and another pad at the end of a screw working vertically through the other extremity. [E, 4.]—**Lip t.** An instrument consisting of a piece of hard and polished steel, bent like the letter U, one arm having a vulcanite-covered oval steel plate attached to it, and a similar plate steadied by steel rods and moved by a central screw being connected with the other arm. ["Brit. Med. Jour.," 1865, i, 232 (a, 34).]—**Lister's t.** See *Hoyer's clamp t.*—**Pancoast's abdominal t.** See *Skey's t.*—**Petit's screw-t.** An instrument consisting of a metal plate having on each lateral border two pivoted rollers, a similar plate having but one roller being superposed over the lower plate and separated from it by means of a screw; a band of webbing passes over the rollers that is fastened by means of a buckle and has a pad on it to place over the artery. [a, 34.]—**Signoroni's t.** A t. shaped like a horse-shoe with a pad at each end and a hand-screw at the joint on the centre of the bar. [E, 4.]—**Skey's t.** A t. shaped like a stirrup, with one pad on the foot-piece and the other on the end of a vertical hand-screw working through the top. [E, 4.]—**Tiemann's t.** A modification of Petit's t. by which a greater amount of pressure is concentrated upon the artery, while the circulation in the vein is not embarrassed. The pad is placed either horizontally or crosswise upon the vessel, and the strap, carried around the limb, is passed through two side-apertures in a metallic plate, after which the ends are drawn very tight and fastened upon protruding hooks. [E.]

**TOURNIS** (Fr.), n. Tour-ne. See *GID*.

**TOURNOIEMENT** (Fr.), n. Tur-nwa²-ma²n². See *VERTIGO*.

**TOUS-LES-MOIS** (Fr.), n. Tu-la-mwa². See *CANNA starch*.

**TOUTE-ÉPICE** (Fr.), n. Tut-a-pes. 1. The *Nigella sativa* or its seed. 2. The *Pimenta officinalis* or its berries. [a, 35.]

**TOUX** (Fr.), n. Tu. See *COUGH* and *TUSSIS*.—**T. auriculaire**. See *Ear cough*.—**T. cardiaque**, **T. cardiopathique**. A reflex cough due to heart disease. [a, 34.]—**T. convulsive**. See *PER-TUSSIS*.—**T. d'oreille**. See *Ear cough*.—**T. érucante**. Cough with eructative paroxysms. [a, 34.]—**T. éteinte**. Cough without perceptible noise. [L, 87 (a, 50).]—**T. féline**. See *TUSSIS felina*.—**T. grasse**, **T. humide**. See *Mucous cough*.—**T. intestinale**. Reflex cough due to intestinal trouble. [a, 34.]—**T. ovarique**. Reflex cough associated with ovarian disease. [a, 34.]—**T. pleurale**. Reflex cough due to pleural irritation. [a, 34.]—**T. qui houpe**. A provincial name for whooping-cough. [D.]—**T. sèche**. See *Dry cough*.—**T. splénique**. Reflex cough due to disease of the spleen. [a, 34.]—**T. sympathique**. Cough caused by reflex irritation of the pneumogastric nerve. [a, 34.]—**T. trachéale**. Cough due to tracheal irritation. [a, 34.]—**T. vermineuse**. Reflex cough due to intestinal worms. [a, 34.]

**TOVOMITA** (Lat.), n. f. To-vo(wo)-mit(met)'a². Ger., *Gelb-frucht*. A genus of tropical American clusiaceae plants. The

*Tovomitæ* are a section of the *Clusiæe*. [a, 35.]—**T. fructipendula**. A species found in the Peruvian Andes. The bark is used in medicine. [a, 35.]

**TOW**, n. To. Gr., *στύπη*. Lat., *stupa*. Fr., *étoupe*. Ger., *Werg*. The coarser part of flax or hemp. [a, 48.]

**TOXA** (Lat.), n. n. pl. Tox'a². From *τοξικόν*, poison. Of Eisenmann, diseases produced by poisons. [L, 50 (a, 14).]

**TOXÆMIA** (Lat.), n. f. Tox²-em'/(a²'e²m)-iz-a². From *τοξικόν*, poison, and *αἷμα*, blood. Fr., *toxémie*. See *Blood-poisoning*.

**TOXÆMIC**, adj. Tox²-em'izk. Fr., *toxémique*. Ger., *toxämisch*. Pertaining to or affected with toxæmia. [D.]

**TOXALBUMIN**, n. Tox²-a²-bu²-mi²n. Of Brieger and Fraenkel, any one of the toxic substances resulting from the action of the various bacilli on the albumins of the tissues, and resembling either serum-albumin or globulin. [a, 27.] Cf. *Toxic albumin*.

**TOXIC**, adj. Tox²'izk. From *τοξικόν* (see *TOXICON*). Fr., *toxique*. Ger., *toxisch*. 1. Pertaining to poisons. 2. Poisonous. [a, 48.]

**TOXICÆMIA** (Lat.), n. f. Tox²-is²/(izk)-em'/(a²'e²m)-iz-a². Ger., *Toxicämie*. See *Blood-poisoning*.

**TOXICANT**, adj. Tox²'iz-k'nt. From *toxicare*, to poison. Poisonous. [a, 48.]

**TOXICATMUSICUS** (Lat.), adj. Tox²-izk-a²t(a²t)/mi²k-u²s(u²s). From *τοξικόν*, poison, and *ἀρμός*, vapor. Fr., *toxicatmique*. Containing or yielding poisonous vapors. [L, 50 (a, 14).]

**TOXICATION**, n. Tox²-izk-a²shu²n. Lat., *toxicatio* (from *toxicare*, to poison). Fr., t. See *POISONING*.

**TOXICHÆMATOSIS** (Lat.), **TOXICHÆMIA** (Lat.), n's f. Tox²-izk'(izk)²-e²m(a²'e²m)-a²t(a²t)-os'/(is), -em'/(a²'e²m)-iz-a². Gen., -os'eos (-is), -æm'ia. Fr., *toxicohématose*. See *Blood-poisoning*.

**TOXICITY**, n. Tox²-is²/(izk)-iz². From *τοξικόν*, poison. Fr., *toxicité*. Ger., *Giftigkeit*. The property of being poisonous. [a, 48.]

**TOXICODENDRIC ACID**, n. Tox²-izk-o-de²nd'ri²k. A volatile acid forming, according to Maisch, the active principle of the juice of *Rhus toxicodendron*, acting as a vesicant. [B, 92, 93 (a, 14).]

**TOXICODENDRON** (Lat.), **TOXICODENDRUM** (Lat.), n's n. Tox²-izk-o(izk)-de²nd'ro²n, -ru²m(u²m). From *τοξικόν*, poison, and *δένδρον*, a tree. 1. See *Rhus t.* 2. The genus *Schmidelia*. 3. A genus of the *Euphorbiaceae*. [a, 35.]—**Infusum toxicodendri** [Russ. Ph.]. A preparation made by pouring over 18 centigrammes of leaves of *Rhus t.* enough boiling water to make 30 grammes of strained infusion after 5 minutes' steaming. [B, 95 (a, 38).]—**Tinctura toxicodendri**. A tincture made by macerating 5 parts of the fresh leaves of *Rhus t.* with 6 of alcohol of sp. gr. 0.832 for eight days [Ger. Ph., 1st ed.] (5 parts of dried leaves with 50 of 70-per-cent. alcohol for five days [Russ. Ph.]), or by digesting the dry leaves with 5 times as much dilute alcohol for a week [Swiss Ph.]. [B, 95, 119 (a, 38).]—**T. capense**. See *HYENANCHE globosa*.

**TOXICODERMATITIS** (Lat.), n. f. Tox²-izk-o(izk)-du²rm(de²rm)-de²rm)-a²t(a²t)-it²s. Gen., -it²idos (-idis). From *τοξικόν*, poison, and *δέρμα*, the skin. Fr., *toxicodermite*. Ger., *Gifthauteentzündung*. Cutaneous inflammation caused by a poison. [L, 50 (a, 14).]

**TOXICODERMIE** (Fr.), n. Tox²-ek-o-de²r-me. A skin disease due to the action of a poison.

**TOXICODERMITIS** (Lat.), n. f. Tox²-izk-o(izk)-du²rm(de²rm)-it²s. Gen., -it²idos (-idis). See *TOXICODERMATITIS*.

**TOXICOHÆMIA** (Lat.), n. f. Tox²-izk-o(izk)-hem'/(ha²'e²m)-iz-a². Fr., *toxicohémie*. See *Blood-poisoning*.

**TOXICOLOGY**, n. Tox²-izk-o²l'o²-jiz². Lat., *toxicologia* (from *τοξικόν*, poison, and *λόγος*, understanding). Fr., *toxicologie*. Ger., *Giftkunde*, *Giftlehre*. The science of the nature and action of poisons and of the detection and treatment of poisoning. [a, 48.]

**TOXICOMANIA** (Lat.), n. f. Tox²-izk-o(izk)-man'(ma²n)/iz-a². From *τοξικόν*, poison, and *μανία*, madness. See *TOXIPHOBIA*.

**TOXICON** (Lat.), n. n. Tox²'izk-o²n. Gr., *τοξικόν*, poison, originally poison for smearing arrows (from *τόξον*, a bow). Arrow poison; hence, any poison. [a, 34.]

**TOXICOPHLEA** (Lat.), n. f. Tox²-izk-o(izk)-fle'/(flo²'e²)-a². From *τοξικόν*, poison, and *φλοιόν*, bark. See *ACCANTHERA*.

**TOXICOPHTHISIS** (Lat.), n. f. Tox²-izk-o²t(o²t)/iz²s(thi²s)-iz²s. From *τοξικόν*, poison, and *φθίσις*, consumption. Fr., *toxicophthisie*. Phthisis induced by poison. [L, 50 (a, 14).]

**TOXICORRHEUMATISMUS** (Lat.), n. m. Tox²-izk-o²r-ru²r-m-a²t(a²t)-iz²s/(iz²s)/mu²s(mu²s). From *τοξικόν*, poison, and *ρheumatismus*, rheumatism. Rheumatism caused by poison. [L, 50 (a, 14).]

**TOXICOSIS** (Lat.), n. f. Tox²-izk-os'iz²s. Gen., -os'eos (-is). From *τοξικόν*, poison. Poisoning.—**Autot.** Of von Jaksch, t. caused by toxic substances formed in the system. [a, 34].—**Exogenic t.** T. induced by substances taken into the system. [a, 34].—**Nosot.** T. referable to the presence of basic products that are formed in the system in disease and eliminated with the urine. [a, 34].—**Retention t.** T. depending upon the retention of a substance that should be excreted. [a, 34.]

**TOXICUM** (Lat.), n. n. Tox²'izk-u²m(u²m). See *TOXICON*.

**TOXIFERUS** (Lat.), adj. Tox²-izf'e²r-u²s(u²s). From *toxicum*, poison, and *ferre*, to bear. Fr., *toxifère*. Bearing or producing poison. [L, 41 (a, 14).]

**TOXIHÆMIA** (Lat.), n. f. Tox²-x²-hem'/(ha²'e²m)-iz-a². See *Blood-poisoning*.

**TOXINE**, n. Tox²'x'en. From *τοξικόν*, poison. Ger., *T.* Any poisonous ptomaine. [Brieger (B, 270).]

**TOXINICIDE**, n.  $To^2x-i^2n/i^2$ -sid. From *toxicum*, poison, and *cedere*, to slay. Of E. Mosny, a substance that destroys a toxine. [a, 34.]

**TOXIPHOBIA** (Lat.), n. f.  $To^2x-i^2-fob(fo^2b)/i^2$ -a<sup>3</sup>. From *τοξίφον*, poison, and *φόβος*, fear. Of Cameron, monomania characterized by fear of being poisoned. [a, 34.]

**TOXIPHOBIA**, n.  $To^2x-i^2-fob/i^2$ -a<sup>3</sup>k. Of Cameron, a person affected with toxiphobia. [a, 34.]

**TOXIRESIN**, n.  $To^2x-i-re^2z/i^2$ n. Fr., *toxirésine*. An uncrystallizable, yellowish, poisonous resin produced by decomposing graptolite with dilute acids or by heating it to 240° C. [B, 93 (a, 14).]

**TOXONOSE** (Ger.), n. pl.  $Tox-o-noz/e^2$ n. Diseases caused by poison. [L, 57 (a, 14).]

**TOXOPHYLAXIN**, n.  $To^2x-o-fi^2l-a^2x/i^2$ n. Of Hankin, a defensive proteid produced in the body of an animal which has an acquired immunity, and acting by neutralizing the toxic products of the pathogenic bacteria to which the disease is due. [Boston Med. and Surg. Jour., Jan. 12, 1893, p. 31 (a, 50).]

**TO-YAK**, n. A bitter Japanese drug obtained from *Pleurogyne rotata*; used as a tonic. [B, 108 (a, 14).]

**TRABECULA** (Lat.), n. f.  $Trab^2b(trab^2b)-e^2k/u^2l(u^4l)-a^2$ . Dim. of *trabs*, a beam. Fr., *trabécule*. Ger., *Trabekel*, *Balken*, *Balkchen*, *Querbalkchen*. Any one of various beam-like or string-like masses of tissue arranged in bands or cross-bars. [K.]—**Cell-**(or **Cortical**) **trabecule**. See *Cell-trabeculae*.—**Lateral trabecule** of the embryonic cranium. See *Trabeculae cranii*.—**Trabeculae carneae** (cordis). See *COLUMNAE carneae* (1st def.).—**Trabeculae corporeum cavernosorum**. Prolongations inward of the fibrous tissue covering the corpora cavernosa of the penis, dividing them into a large number of small cavities. [L.]—**Trabeculae cranii**. The axial part of the basi-facial axis of the embryo; or of Rathke, certain cartilaginous rudiments which stretch forward, in the development of the basis cranii, from the region of the sella turcica to that of the olfactory pits, in the form of two bars more or less united. [A, 5.]—**T. magna cerebri**. See *CORPUS CALLOSUM*.—**T. medullaris cerebelli**. See *INCREMENTA fibrosa*.—**Trabeculae of the spleen**. The reticular framework of connective tissue which runs in the substance of the spleen. [C.]—**Trabeculae of the testis**. Processes of the albuginea testis extending into the testicle and joining similar processes given off from the front and sides of the corpus Highmori. They inclose the separate lobules of the testis. [C; L.]

**TRABECULAR**, adj.  $Trab^2b-e^2k/u^2l-a^2r$ . Fr., *trabéculaire*. Pertaining to or constituting trabeculae. [J.]

**TRABECULATE**, **TRABECULATED**, adj's.  $Trab^2b-e^2k/u^2l$ -at.-at-e<sup>2</sup>d. Lat., *trabeculatus*. Ger., *querbalkig*. Cross-barred, having trabeculae. [a, 35.]

**TRABERKRANKHEIT** (Ger.), n.  $Trab^2b-e^2r-kra^2n^2k$ -hit. See *DREHRKRANKHEIT*.

**TRABES** (Lat.), n. f.  $Trab(trab^2b)/ez(as)$ . Gen., *trab'is*. See *TRABECULA*.

**TRABS** (Lat.), n. f.  $Trab^2bz(trab^2bs)$ . Gen., *trab'is*. See *PENIS*.—**T. cerebri**, **T. medullaris**. See *CORPUS CALLOSUM*.

**TRACE**, n.  $Tras$ . Fr., *tracé*. A track, mark, or impression. [a, 48.]—**Primitive t.** See *PRIMITIVE STREAK*.

**TRACHEA** (Lat.), n. f.  $Trach^2k(trach^2h^2)-e(a)/a^2$ . Gr., *τραχεία*, for *τραχεία άσπρία* (*arteria aspera*), the rough artery (from *τραχύς*, rough). Fr., *trachée*. Ger., *T. Trachee*, *Lufttröhre* (1st def.). 1. The windpipe; a tube 4 to 4½ in. long, ½ to 1 in. in diameter, in man, continuous with the larynx above and dividing about opposite the intervertebral fibro-cartilage between the fourth and fifth dorsal vertebrae into the two bronchi. It consists of cartilaginous rings incomplete behind, united by fibrous tissue, and is lined with mucous membrane. [L, 31, 142, 332.] 2. The respiratory tube in vertebrates; the air-tube of tracheate insects. [L, 100; L, 206 (a, 27).] 3. In botany, a duct. [a, 35.]

**TRACHEAECTASY**, n.  $Trach^2k-e^2a-e^2kt/a^2s-i^2$ . From *τραχεία*, the trachea, and *έκτασις*, extension. Tracheal dilatation. [a, 34.]

**TRACHEAL**, adj.  $Trach^2k/e^2a-a^2l$ . Pertaining to the trachea or to tracheae. [a, 48.]

**TRACHEALIA** (Lat.), n. f.  $Trach^2k(trach^2h^2)-e^2(a)-al(a^2l)/i^2a^2$ . From *τραχεία*, the trachea. Of Farr, croup. [D.]

**TRACHEARY**, adj.  $Trach^2k/e^2a-r-i^2$ . Pertaining to or resembling tracheae (cf. *T. CELLES*). [a, 35.]

**TRACHEIDE**, n.  $Trach^2k/e^2a-id$ . Fr., *trachéide*. An elongated cell with markings resembling those of a duct. [a, 35.]

**TRACHEITIS** (Lat.), n. f.  $Trach^2k(trach^2h^2)-e^2(a)-ie/ti^2s$ . From *τραχεία*, the trachea. Fr., *trachéite*. Inflammation of the trachea. [a, 17.]—**T. maligna**. See *CROUP* (1st and 2d def's).

**TRACHÉLÉMATOME** (Fr.), n.  $Trach^2k-al-am-a^2$ -tom. A hæmatoma of the neck.—**T. des nouveau-nés**. Of E. Tordeus, a hæmatoma of the sheath of the sterno-cleido-mastoid muscle sometimes observed in the new-born infant after difficult labor. [Progr. méd., Mar. 8, 1884, p. 199.]

**TRACHELAGRA** (Lat.), n. f.  $Trach^2k(trach^2h^2)-e^2(al)/a^2g(a^2g)-ra^2$ . From *τραχέλος*, the neck, and *άγρα*, a seizure. Fr., *trachélagre*. Rheumatic pain in the neck. [L, 50 (a, 14).]

**TRACHELALIS** (Lat.), n. m.  $Trach^2k(trach^2h^2)-e^2(al)-al(a^2l)/i^2s$ . From *τραχέλος*, the neck. Of Coles, see *TRACHELOMASTOIDEUS* (1st def.).

**TRACHELECTOMOPEXIA** (Lat.), n. f.  $Trach^2k(trach^2h^2)-e^2(al)-e^2kt^2m-o^2p^2e^2x(pax)/i^2a^2$ . From *τραχέλος*, the neck, *έκτομή*, a cutting out, and *πήξις*, a fixing. Trachelopexia with partial excision of the cervix uteri. [a, 34.]

**TRACHELECTOMY**, n.  $Trach^2k-e^2l-e^2kt^2om-i^2$ . From *τραχέλος*, the neck, and *έκτομή*, a cutting out. Excision of the cervix uteri. [a, 34.]

**TRACHELIAN**, adj.  $Trach^2k-el/i^2$ -n. From *τραχέλος*, the neck. Fr., *trachelien*. Pertaining to the neck, especially to its back part. [L, 41, 49 (a, 14).]

**TRACHÉLI-ATLOÏDO-BASILARE** (Fr.), n.  $Trach^2k-sha-le-a^2l-o-e^2d-o-ba^2s-e-la^2r$ . See *RECTUS CAPITIS LATERALIS*.

**TRACHELISM**, n.  $Trach^2k-el-i^2zm$ . Gr., *τραχελισμός* (from *τραχέλος*, the neck). Lat., *trachelismus*. Fr., *trachelisme*. Of M. Hall, spasmodic contraction of the muscles of the neck. [K, 3.]

**TRACHELITIS** (Lat.), n. f.  $Trach^2k(trach^2h^2)-e^2(al)-i(e)/ti^2s$ . Gen., *-itidos (-idis)*. From *τραχέλος*, the neck. Inflammation of the neck or of the cervix uteri.

**TRACHELO-ACROMIALIS** (Lat.), n. m.  $Trach^2k(trach^2h^2)-el(al)/o^2(o^2)-a^2k(a^2k)-rom-i^2-al(a^2l)/i^2s$ . From *τραχέλος*, the neck, and *ακρόμιον*, the acromion. In solipeds, the posterior portion of the mastoido-humeralis. It arises from the transverse processes of the first four cervical vertebrae. [L, 13.]

**TRACHÉLO-ANGULI-SCAPULAIRE** (Fr.), n.  $Trach^2k-a-lo-a^2n-gu^2l-le-ska^2-pu^2-la^2r$ . See *LEVATOR anguli scapulae*.

**TRACHÉLO-ATLOÏDO-OCCIPITAL** (Fr.), n.  $Trach^2k-a-lo-a^2l-o-e^2d-o-o^2k-se-pe-ta^2l$ . See *OBLIQUUS CAPITIS MINOR*.

**TRACHÉLO-BASILARE** (Fr.), n.  $Trach^2k-a-lo-ba^2s-e-la^2r$ . See *RECTUS CAPITIS ANTIUS MAJOR*.

**TRACHELOCAMPYLUS** (Lat.), n. m.  $Trach^2k(trach^2h^2)-el(al)-o^2(o^2)-ka^2mp(ka^2mp)/i^2l(u^4l)-u^2s(u^4s)$ . From *τραχέλος*, the neck, and *καμπύλος*, crooked. A cysticercus found once in the human brain; probably a degenerated cysticercus of some known species. [L, 17.]

**TRACHELOCLAVICULARIS** (Lat.), adj. and n.  $Trach^2k(trach^2h^2)-el(al)/o^2(o^2)-kla^2(kla^2)-vi^2k(wi^2k)-u^2l(u^4l)-ar(a^2r)/i^2s$ . From *trachelus*, the neck, and *clavicula*, the clavicle. See *CLEIDOCERVICALIS*.—**T. imus**. See *CLEIDOCERVICALIS imus*.—**T. superior**. See *LEVATOR claviculae*.

**TRACHELOCOSTALIS** (Lat.), n. m.  $Trach^2k(trach^2h^2)-el(al)/o^2(o^2)-ko^2st-al(a^2l)/i^2s$ . From *trachelus*, the neck, and *costa*, a rib. The analogue of the sacrolumbalis of man found in nearly all the lower mammals. [L, 13.]

**TRACHELOCOSTO-SCAPULARIS** (Lat.), n. m.  $Trach^2k(trach^2h^2)-el(al)/o^2(o^2)-ko^2st^2p(ka^2p)-u^2l(u^4l)-ar(a^2r)/i^2s$ . From *τραχέλος*, the neck, *costa*, a rib, and *scapula* (q. v.). The serratus magnus and the levator anguli scapulae considered as a single muscle. [a, 34.]

**TRACHELOCYLOSIS** (Lat.), n. f.  $Trach^2k(trach^2h^2)-el(al)-o^2(o^2)-si^2l(ku^2l)-los/i^2s$ . Gen., *-los'eos (-ie)*. From *τραχέλος*, the neck, and *κύλλωσις*, a crooking. See *TORTICOLLIS*.

**TRACHELOCYPHOSIS** (Lat.), **TRACHELOCYRTOSIS** (Lat.), n's f.  $Trach^2k(trach^2h^2)-el(al)-o^2(o^2)-sit(ku^2f)-os/i^2s$ , *-su^2rt(ku^2f)-os/i^2s*. Gen., *-os'eos (-ie)*. From *τραχέλος*, the neck, and *κύφωσις*, or *κύρτωσις*, kyphosis. Fr., *trachelocypnose*, *trachelocyrtose*. Ger., *Halsbuckel*. An abnormal curvature of the cervical portion of the vertebral column. [L, 50 (a, 14).]

**TRACHELO-DIAPHRAGMATIC**, adj.  $Trach^2k-el/o^2-di-a^2s-fra^2g-ma^2t/i^2k$ . From *τραχέλος*, the neck, and *διάφραγμα*, the diaphragm. Pertaining to the neck and the diaphragm. [L.]

**TRACHÉLO-DORSAL** (Fr.), adj.  $Trach^2k-a-lo-dor-sa^2l$ . Cervico-dorsal. [L.]

**TRACHELODYNIA** (Lat.), n. f.  $Trach^2k(trach^2h^2)-e^2(al)-o^2(o^2)-di^2n(du^2n)/i^2a^2$ . From *τραχέλος*, the neck, and *δύσιν*, pain. Fr., *trachéodynie*. Ger., *Halschmerz*. Pain in the neck.

**TRACHELOMASTOIDEUS** (Lat.), n. m.  $Trach^2k(trach^2h^2)-el(al)/o^2(o^2)-ma^2st(ma^2st)-o^2(o^2)-i^2d(ed)/e^2-u^2s(u^4s)$ . From *τραχέλος*, the neck, and *μαστοειδής*, mastoid. Fr., *trachélo-mastoiéen*. Ger., *Halszitzenmuskel*. 1. The upward continuation of the longissimus dorsi which arises from the transverse processes of a varying number of the upper dorsal vertebrae and the articular processes of the three or four lower cervical vertebrae, and is inserted into the posterior border of the mastoid process of the temporal bone. [L, 31, 142, 332.] 2. In solipeds, see *DORSOMASTOIDEUS*.—**T. accessorius**, **T. minor**. An anomalous muscle arising from the transverse processes of the upper two dorsal and the lower two or three cervical vertebrae, and inserted into the mastoid process of the temporal bone or the transverse process of the atlas. [L, 332.]

**TRACHELOMYITIS** (Lat.), n. f.  $Trach^2k(trach^2h^2)-e^2(al)-o^2(o^2)-mi^2(mu^2)-iey/ti^2s$ . Gen., *-itidos (-idis)*. From *τραχέλος*, the neck, and *μύς*, a muscle. Fr., *trachelomyélite*. Inflammation of the muscles of the neck. [L, 50 (a, 14).]

**TRACHÉLO-OCCIPITAL** (Fr.), n.  $Trach^2k-a-lo-o^2k/se-pe-ta^2l$ . See *COMPLEXUS*.

**TRACHELO-OCCIPITALIS** (Lat.), n. m.  $Trach^2k(trach^2h^2)-el(al)/o^2(o^2)-o^2k-si^2p(ki^2p)-i^2l-al(a^2l)/i^2s$ . From *τραχέλος*, the neck, and *occiput* (q. v.). A muscle of solipeds corresponding to the rectus capitis anticus major of man. It arises from the transverse processes of the third, fourth, and fifth cervical vertebrae, and is attached to the body of the sphenoid bone and the basilar process of the occipital bone. It flexes the head and carries it to one side. [L, 13.]

**TRACHELOPANUS** (Lat.), n. m.  $Trach^2k(trach^2h^2)-e^2(al)-o^2(o^2)-pan(pañ)/i^2n(u^4s)$ . From *τραχέλος*, the neck, and *πανος*, a swelling. Fr., *trachélopape*. Ger., *Halsdrüsen geschwulst*. Inflammation of the cervical glands. [L, 50 (a, 14).]

**TRACHELOPEXIA** (Lat.), n. f.  $Trach^2k(trach^2h^2)-e^2(al)-o^2(o^2)-pe^2x(pax)/i^2a^2$ . From *τραχέλος*, the neck, and *πήξις*, a fixing. Fixation of the cervix uteri. [a, 34.]

**TRACHELOPHYMA** (Lat.), n. n. Tra<sup>2</sup>k(trach<sup>2</sup>)-e<sup>2</sup>(al)-o(o<sup>2</sup>)-fim(fu<sup>2</sup>m)/a<sup>3</sup>. Gen., -*phym'atos* (-atis). From τραχύλος, the neck, and φύμα, a growth. Fr., *trachelophymie*. A swelling of the neck. [L, 50 (a, 14).] See also GOITRE and TRACHELOPANUS.

**TRACHELOPLASTY**, n. Tra<sup>2</sup>k-el'o-pla<sup>2</sup>st-i<sup>2</sup>. From τραχύλος, the neck, and πλασσειν, to mold. The plastic surgery of the cervix uteri.

**TRACHELORRHAPHY**, n. Tra<sup>2</sup>k-el'o-rh'a<sup>2</sup>f-i<sup>2</sup>. From τραχύλος, the neck, and ράφη, a stitching. Fr., *trachelorrhaphie*. See HYSTERO-TRACHELORRHAPHY.

**TRACHELOS** (Lat.), n. m. Tra<sup>2</sup>k(trach<sup>2</sup>)-el(al)/o<sup>2</sup>s. Gr., τραχύλος. See NECK.

**TRACHÉLO-SCAPULAIRE** (Fr.), n. Tra<sup>2</sup>-ka-lo-ska<sup>2</sup>-pu<sup>2</sup>-la<sup>2</sup>r. See ANGULARIS scapulae.

**TRACHÉLO-SOUS-OCCIPITAL** (Fr.), adj. Tra<sup>2</sup>-ka-lo-suz-o<sup>2</sup>k-se-pe-ta<sup>2</sup>l. Cervico basilar; as a n., a muscle of the neck connected with the suboccipital region. [L.]—**T.-s.-o. grand.** See RECTUS capitis anticus major.—**T.-s.-o. petit.** See RECTUS capitis anticus minor.

**TRACHELOSTROPHOSIS** (Lat.), n. f. Tra<sup>2</sup>k(trach<sup>2</sup>)-e<sup>2</sup>l(al)-o(o<sup>2</sup>)-stro<sup>2</sup>f-os'i<sup>2</sup>s. Gen., -*phos'eos* (-is). From τραχύλος, the neck, and στρέφω, a twisting. Fr., *trachelostrophose*. Torsion of the neck. [L, 50 (a, 14).]

**TRACHELOSUBOCCIPITALIS** (Lat.), n. m. Tra<sup>2</sup>k(trach<sup>2</sup>)-el(al)/o(o<sup>2</sup>)-su<sup>2</sup>b(su<sup>2</sup>b)-o<sup>2</sup>k-si<sup>2</sup>p(ki<sup>2</sup>p)-i<sup>2</sup>t-al(a<sup>2</sup>l)/i<sup>2</sup>s. From τραχύλος, the neck, sub, under, and occiput (q. v.). See TRACHELO-OCIPITALIS.

**TRACHELOSUBSCAPULARIS** (Lat.), n. m. Tra<sup>2</sup>k(trach<sup>2</sup>)-el(al)/o(o<sup>2</sup>)-su<sup>2</sup>b(su<sup>2</sup>b)-ska<sup>2</sup>p(ska<sup>2</sup>p)-u<sup>2</sup>(u<sup>2</sup>l)-ar(a<sup>2</sup>r)/i<sup>2</sup>s. From τραχύλος, the neck, sub, under, and scapula (q. v.). Fr., *trachelo-sous-scapulaire*. See ANGULARIS scapulae.

**TRACHELOTOMY**, n. Tra<sup>2</sup>k-e<sup>2</sup>l-o<sup>2</sup>t-om-i<sup>2</sup>. From τραχύλος, the neck, and τομή, a cutting. 1. Decapitation. 2. The operation of enlarging the canal of the cervix uteri by incision.—**Uterine t.** See T. (2d def.).

**TRACHELUS** (Lat.), n. m. Tra<sup>2</sup>k(trach<sup>2</sup>)-el(al)/u<sup>2</sup>s(u<sup>2</sup>s). Gr., τραχύλος. See NECK.

**TRACHENCHYMA** (Lat.), n. n. Tra<sup>2</sup>k(trach<sup>2</sup>)-e<sup>2</sup>n<sup>2</sup>/ki<sup>2</sup>m-(ch<sup>2</sup>u<sup>2</sup>m)/a<sup>3</sup>. Gen., -*ym'atos* (-atis). From τραχύς, rough, and ένχυμα, an infusion. Tissue composed of tracheal cells. [a, 35.]

**TRACHEOAEROCELE** (Lat.), n. f. Tra<sup>2</sup>k(trach<sup>2</sup>)-e<sup>2</sup>(a)-o(o<sup>2</sup>)-a(a<sup>2</sup>)-e<sup>2</sup>r-o(o<sup>2</sup>)-se(k'a)/le(l'a); in Eng., tra<sup>2</sup>k-e<sup>2</sup>-o-a-e<sup>2</sup>r-o-sel. Gen., -*cel'es*. From τραχεία, the trachea, αήρ, air, and κύλη, a tumor. A tracheal diverticulum. [L, 50 (a, 14).]

**TRACHEOBLENNORRHEA** (Lat.), n. f. Tra<sup>2</sup>k(trach<sup>2</sup>)-e<sup>2</sup>(a)-o(o<sup>2</sup>)-ble<sup>2</sup>n-no<sup>2</sup>r-re(ro<sup>2</sup>e<sup>2</sup>)-a<sup>3</sup>. For deriv., see TRACHEA and BLENNORRHEA. Fr., *trachéoblenorrhée*. Ger., *Luftröhrenschleimfluss*. Blennorrhoea of the trachea. [L, 50 (a, 14).]

**TRACHEO-BRONCHIAL**, adj. Tra<sup>2</sup>k-e<sup>2</sup>'o-bro<sup>2</sup>n<sup>2</sup>/ki<sup>2</sup>-l. From τραχεία, the trachea, and βρόγχος, a bronchus. Pertaining to the trachea and a bronchus. [L.]

**TRACHEOBRONCHITIS** (Lat.), n. f. Tra<sup>2</sup>k(trach<sup>2</sup>)-e<sup>2</sup>(a)-o(o<sup>2</sup>)-bro<sup>2</sup>n<sup>2</sup>-ki(ch<sup>2</sup>e<sup>2</sup>)/ti<sup>2</sup>s. Gen., -*it'idis* (-idis). Fr., *trachéobronchite*. Inflammation of the trachea and bronchil. [a, 34.]

**TRACHEOCELE** (Lat.), n. f. Tra<sup>2</sup>k(trach<sup>2</sup>)-e<sup>2</sup>(a)-o(o<sup>2</sup>)-33(k'a)/le(l'a); in Eng., tra<sup>2</sup>k-e<sup>2</sup>-o-sel. Gen., -*cel'es*. From τραχεία, the trachea, and κύλη, a tumor. Fr., *trachéocèle*. 1. A hernial protrusion of the mucous membrane of the trachea through the cartilaginous structure, either between two of the rings or through a branchial fistula. 2. Goitre.

**TRACHEOCHOLOSIS** (Lat.), n. f. Tra<sup>2</sup>k(trach<sup>2</sup>)-e<sup>2</sup>(a)/o(o<sup>2</sup>)-ko<sup>2</sup>l(ch<sup>2</sup>o<sup>2</sup>l)-os'i<sup>2</sup>s. Gen., -*os'eos* (-is). From τραχεία, the trachea, and χολός, bile. Fr., *trachéocholose*. Catarrh of the trachea, attributed to biliary derangement. [L, 50 (a, 14).]

**TRACHEOCYNANCHE** (Lat.), n. f. Tra<sup>2</sup>k(trach<sup>2</sup>)-e<sup>2</sup>(a)/o(o<sup>2</sup>)-si<sup>2</sup>n(ku<sup>2</sup>n)-a<sup>2</sup>n<sup>2</sup>k(a<sup>2</sup>n<sup>2</sup>ch<sup>2</sup>)/e(a). Gen., -*anch'es*. From τραχεία, the trachea, and κυνάχη, cynanche. Fr., *trachéocynanche*. See TRACHEITIS.

**TRACHEO-LARYNGEAL**, adj. Tra<sup>2</sup>k'e<sup>2</sup>-o-la<sup>2</sup>r-i<sup>2</sup>n<sup>2</sup>/je<sup>2</sup>-l. Fr., *trachéo-laryngien*. Pertaining to or involving the trachea and the larynx.

**TRACHEOLARYNGOTOMY**, n. Tra<sup>2</sup>k-e<sup>2</sup>'o-la<sup>2</sup>r-i<sup>2</sup>n<sup>2</sup>-go<sup>2</sup>t-om-i<sup>2</sup>. See LARYNGOTRACHEOTOMY.

**TRACHEO-OESOPHAGEUS** (Lat.), n. m. Tra<sup>2</sup>k(trach<sup>2</sup>)-e<sup>2</sup>(a)/o(o<sup>2</sup>)-e<sup>2</sup>s(o<sup>2</sup>-e<sup>2</sup>s)-o<sup>2</sup>f-a<sup>2</sup>j(a<sup>2</sup>g)/e<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). From τραχεία, the trachea, and οισοφάγος, the gullet. A bundle of anomalous muscular fibres extending between the oesophagus and the trachea. [L, 332.]

**TRACHEO-PHARYNGEUS** (Lat.), n. m. Tra<sup>2</sup>k(trach<sup>2</sup>)-e<sup>2</sup>(a)/o(o<sup>2</sup>)-fa<sup>2</sup>r(fa<sup>2</sup>r)-i<sup>2</sup>n(u<sup>2</sup>n<sup>2</sup>)/je<sup>2</sup>(ge<sup>2</sup>)-u<sup>2</sup>s(u<sup>2</sup>s). From τραχεία, the trachea, and φάρυγξ, the pharynx. An anomalous offshoot of the inferior constrictor of the pharynx inserted into the trachea. [L, 332.]

**TRACHEOPHONY**, n. Tra<sup>2</sup>k-e<sup>2</sup>-o<sup>2</sup>f-on-i<sup>2</sup>. From τραχεία, the trachea, and φωνή, the voice. The sound heard on auscultation over the trachea (cf. LARYNGOPHONY). [D, 1.]

**TRACHEOPHYMA** (Lat.), n. n. Tra<sup>2</sup>k(trach<sup>2</sup>)-e<sup>2</sup>(a)-o(o<sup>2</sup>)-fim(fu<sup>2</sup>m)/a<sup>3</sup>. Gen., -*phym'atos* (-atis). From τραχεία, the trachea, and φύμα, a growth. See GOITRE.

**TRACHEOPLASTIK** (Ger.), n. Tra<sup>2</sup>ch<sup>2</sup>-a-o-pla<sup>2</sup>st-ek. The plastic surgery of the trachea. [L, 197.]

**TRACHEOPYOSIS** (Lat.), n. f. Tra<sup>2</sup>k(trach<sup>2</sup>)-e<sup>2</sup>(a)-o(o<sup>2</sup>)-pi(pu<sup>2</sup>)/os'i<sup>2</sup>s. Gen., -*os'eos* (-is). From τραχεία, the trachea, and πύωσις, suppuration. Fr., *trachéopyose*. Purulent tracheitis. [L, 50 (a, 14).]

**TRACHEOPYRA** (Lat.), n. f. Tra<sup>2</sup>k(trach<sup>2</sup>)-e<sup>2</sup>(a)-o<sup>2</sup>p-i<sup>2</sup>r-(u<sup>2</sup>r)-a<sup>3</sup>. From τραχεία, the trachea, and πυρ, fever. See CYNANCHE trachealis.

**TRACHEORRHAGIA** (Lat.), n. f. Tra<sup>2</sup>k(trach<sup>2</sup>)-e<sup>2</sup>(a)-o<sup>2</sup>r-raj(r'a<sup>2</sup>j)/i<sup>2</sup>-a<sup>3</sup>. From τραχεία, the trachea, and ρήγνυσις, to burst forth. Fr., *trachéorrhagie*. Ger., *Luftröhrenblutfluss*. Hæmorrhage from the trachea. [L, 50 (a, 14).]

**TRACHEOSCOPY**, n. Tra<sup>2</sup>k-e<sup>2</sup>-o<sup>2</sup>sk-op-i<sup>2</sup>. From τραχεία, the trachea, and σκοπεῖν, to examine. Fr., *trachéoscopie*. Inspection of the trachea. [L, 87 (a, 50).]

**TRACHEOSTENOSIS** (Lat.), n. f. Tra<sup>2</sup>k(trach<sup>2</sup>)-e<sup>2</sup>(a)-o(o<sup>2</sup>)-ste<sup>2</sup>n-os'i<sup>2</sup>s. Gen., -*os'eos* (-is). From τραχεία, the trachea, and στένωσις, stenosis. Fr., *trachéosténose*, *trachéosténosie*. Ger., *Tracheostenose*. Morbid constriction of the trachea. [E.]

**TRACHEOTOME**, n. Tra<sup>2</sup>k-e<sup>2</sup>-o-tom. From τραχεία, the trachea, and τέμνειν, to cut. Fr., *trachéotome*. Ger., *Halsanzette*. An instrument for opening the trachea in tracheotomy. Langenbeck's t. is a double hook with a cutting edge, separating by the pressure of the thumb on one handle, and closing with a wire spring. Pitha's t. and dilator is an instrument shaped like a forceps, with cutting surfaces on the back of the points. Hanks's t. is a sharp trocar working in an ordinary tracheotomy tube for a cannula. [E.]—**Mandrin t.** An instrument invented by Philippeaux, consisting of a steel shaft having the length and curve of the ordinary tracheal cannula, into which it passes. At each end the shaft is much thicker and accurately fits the cannula, having three or four longitudinal grooves for the passage of air. The distal end of the shaft projects beyond the end of the tube and is wedge-shaped, with a cutting edge. [Philippeaux, "Ann. de gyn.," Apr., 1888 (E).]

**TRACHEOTOMY**, n. Tra<sup>2</sup>k-e<sup>2</sup>-o<sup>2</sup>t-om-i<sup>2</sup>. From τραχεία, the trachea, and τομή, a cutting. Lat., *tracheotomia*. Fr., *trachéotomie*. Ger., *Luftröhrenschnitt*, *Tracheotomie*. The operation of making an opening into the trachea. [E.]—**Inferior t.** Lat., *tracheotomia inferior*. T. in which the incision is made below the thyroid gland. [a, 34.]—**Superior t.** Lat., *tracheotomia superior*. T. in which the incision is made above the isthmus of the thyroid gland. [a, 34.]

**TRACHEOTYPHUS** (Lat.), n. m. Tra<sup>2</sup>k(trach<sup>2</sup>)-e<sup>2</sup>(a)-o(o<sup>2</sup>)-tif-(tu<sup>2</sup>f)/u<sup>2</sup>s(u<sup>2</sup>s). From τραχεία, the trachea, and τύφος, typhus. Of Eisenmann, malignant angina. [L, 50 (a, 14).]

**TRACHOMA** (Lat.), n. n. Tra<sup>2</sup>k(trach<sup>2</sup>)-om/a<sup>3</sup>. Gen., -*om'atos* (-atis). Gr., *τράχωμα* (from τραχύς, rough). Fr., t., *trachome*. Ger., *Trachom*, *Trakom*, *Augenliderkrätze*. An old name for granular conjunctivitis. It is characterized by slowly progressive changes in the conjunctiva of the eyelids, which becomes thickened, vascular, and roughened by firm elevations. The change begins in the follicular structure of the conjunctiva, extending to the papillæ and submucous tissue of both lids, and giving rise here to the growth of much new tissue. The disease is first shown by the presence of round, pale, semi-transparent bodies like grains of boiled sago, sometimes looking like vesicles. The conjunctiva does not ulcerate, and the prominences are not real granulations. [F.]—**Follicular t.** T. chiefly affecting the Meibomian glands, and associated with the presence of *Neisseria (q. v.)*. [a, 17.]—**T. carunculolum.** Ger., *warzige Augentiderrauhigkeit*. An old term for a so-called variety of t. in which fleshy excrescences are met with in the conjunctiva. [F.]—**T. diffusum.** An affection of the conjunctiva in which the submucous tarsal regions of the conjunctiva, especially near the canthi, are changed into gray or grayish-yellow brawny masses from infiltration of the tissue with lymphoid cells and proliferation of the connective-tissue elements. [F.]—**T. herpeticum.** An old term for an affection of the conjunctiva in which pustules or vesicles are found on the inner surface of the eyelids. [F.]—**T. mixtum.** Granular conjunctivitis with secondary inflammation of the surrounding tissue. [F.]—**T. pudentorum.** Of Farnowsky, a chronic granular inflammation of the vulva. ["Ctbl. f. Gyn.," May 28, 1887, p. 360 (a, 34).]—**T. sabulosum.** An old term for t., so called from being characterized by a sensation as of sand beneath the lids. [F.]

**TRACHOMATICON** (Lat.), n. n. Tra<sup>2</sup>k(trach<sup>2</sup>)-o<sup>2</sup>m(om)-a<sup>2</sup>t-(a<sup>2</sup>t)/i<sup>2</sup>k-o<sup>2</sup>n. Gr., *τραχωματικόν* (from τράχωμα, roughness). Of Galen, a collyrium. [L, 50 (a, 14).]

**TRÄCHTIG** (Ger.), adj. Tra<sup>2</sup>ch<sup>2</sup>/i<sup>2</sup>g. See PREGNANT.—**T'keit.** See GESTATION.

**TRACHYLOBIUM** (Lat.), n. n. Tra<sup>2</sup>k(trach<sup>2</sup>)-i<sup>2</sup>(u<sup>2</sup>l)-lob(lo<sup>2</sup>b)/i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). From τραχύς, rough, and λοβός, a pod. Fr., *trachylobe*. Ger., *Rauhhuile*. A genus of leguminous trees. [a, 35.]—**T. courbaril.** See HYMENÆA courbaril.

**TRACHYSMA** (Lat.), n. n. Tra<sup>2</sup>k(trach<sup>2</sup>)-i<sup>2</sup>z(u<sup>2</sup>s)/ma<sup>3</sup>. Gen., -*ys'matos* (-atis). Gr., *τράχυσμα* (from τραχύς, rough). See TRACHOMA.

**TRACT**, n. Tra<sup>2</sup>kt. Lat., *tractus*. Fr., *tractus*, *cordon*. Ger., *Tractus*, *Bahn*, *Strang*. An extent of surface, usually of considerable length as compared with its breadth. [a, 48.]—**Aberrant t. of the lateral column.** Of Monakow, a t. originating in the peripheral portion of the lateral column, lying against the corpus trapezoides, between the facial nucleus and the ascending root of the fifth nerve, and finally passing over into the fillet. [a, 34.]—**Anterior cerebro-pontine t.** A t. of internal (mesial) fibres of the crus cerebri extending from the anterior part of the frontal lobe to the pons. [a, 34.]—**Anterior cortical t.** Bundles of fibres from the cortex of the frontal lobe running to the ganglion cells of the pons varolii. [a, 34.]—**Anterior fundamental t.** The anterior fundamental fasciculi of the anterior column of the spinal cord. [a, 34.]—**Anterior pyramidal t.** The longitudinal bundles of nerve-fibres in the ventral half of the pons which represent the prolongation of the anterior pyramids of the medulla oblongata. [I, 29 (K).]—**Anterolateral descending t.** A few long fibres, scattered in the anterior and lateral ground bundles of

the spinal cord. [a. 34.]—**Ascending antero-lateral t.** See *Gowers's t.*—**Basal longitudinal t.** A t. of fibres extending along the outer wall of the posterior and inferior horns of the lateral ventricle, apparently connecting the occipital and temporal lobes. [a. 34.]—**Basirrhinal t.** The olfactory t. in the marsupials. [I. 14 (K).]—**Bechterew's t.** See *Tegmental t.*—**Bulbar t.** Ger., *Nervenerkertractus*. One of the t's of fibres occupying the bulb. [a. 34.]—**Central medullary t.** The gray matter in the spinal cord which immediately surrounds the central canal. [I. 14 (K).]—**Central vagus t.** A t. of fibres passing from the layer of the fillet to the nucleus of the vagus of the opposite side. [a. 34.]—**Cerebellar t.** See *Kleinhirnsseitenstrangbahn*.—**Cerebello-olivary t.** A t. supposed by Meynert to be a continuation of the fibres of the posterior column of the spinal cord, passing through the olivary body and reaching the cerebellum through the restiform body. Edinger thinks it arises from the outer side of the floculus. [a. 34.]—**Cerebro-pontine t.** A t. of fibres starting from the brain cortex and passing through the internal capsule and the upper part of the cerebral peduncles to the pons. [a. 34.]—**Comma-shaped t.** A t. shaped like a comma, observed in descending degeneration in the middle of the anterior third of the dorsal spinal cord. [a. 34.]—**Commissural t.** Of Owen, the cerebellar peduncles. [I. 14 (K).]—**Communicating quintus t.** Ger., *Quintusstrang*. A t. of fibres derived from the motor nucleus of the fifth nerve which at first surrounds the upper part of the Sylvian aqueduct, and then widens, the fibres radiating through the tegmentum, and a portion of them curving around the lower border of the red nucleus as the *fibræ arcuatae*. This t. is brought into connection with the motor t's of fibres through the agency of intervening multipolar ganglion cells. [I. 31 (K).]—**Conario-hypophysial t.** Of Owen, the embryonic passage through the pituitary diverticulum, the infundibulum, the third ventricle, and the epiphysis cerebri. [A. 5.]—**Crossed thalamo-tegmental t.** A t. of fibres connecting the thalamus with the spinal cord by way of the tegmentum. [E. C. Spitzka, "Boston Med. and Surg. Jour." Apr. 16, 1885, p. 665 (a. 34).]—**Dendritic t's.** T's of fibres that arise from all parts of the cerebral cortex, diverging from each other like the limbs of a tree, and pass into the white substance. [a. 34.]—**Digestive t.** Ger., *Digestionstractus*. The alimentary canal. [I.]—**Direct cerebellar t.** See *Kleinhirnsseitenstrangbahn*.—**Direct lateral cerebellar t.** A t. of nerve-fibres situated in the lateral column of the spinal cord, between the lateral pyramidal t. and the external surface. It appears at the level of the second or third lumbar nerve as a narrow area, which extends as it ascends. It may be traced through the medulla oblongata and restiform body into the cerebellum. [I. 15 (K).]—**Direct myelo-cerebellar t.** See *Kleinhirnsseitenstrangbahn*.—**Direct t.** A bundle of nerve-fibres in the antero-medial column of the spinal cord which may be traced upward in the crura as far as the point where the crus cerebri is crossed by the optic t. [I. 1 (K).]—**Fillet t.** A t. that emerges from the fillet and may be found on the upper and outer side of the nucleus ruber in its course to the cortex of the upper part of the parietal lobe by way of the internal capsule. [a. 34.]—**First projection t.** Of Meynert, the corona radiata. [a. 34.]—**Formative t.** Of Owen, the formative and commissural t's of the cerebellum described as two different bundles of nerve-fibres which unite to form the peduncles. [I. 14.]—**Frontal pontine t.** See *Anterior cerebro pontine t.*—**Frontal t.** Of Owen, the frontal lobe of the brain. [I. 14 (K).]—**Fronto-cerebellar t.** The t. of white fibres connecting the frontal lobe of the cerebrum with the cerebellum. [a. 34.]—**Funicular t's.** See *Funiculi graciles cerebelli*.—**Ganglionic association t.** Association fibres connecting different cerebral ganglia. [a. 34.]—**Genal t.** See *GNA THOGRAMMA*.—**Geniculate t.** See *FASCICULUS GENICULÉ*.—**Genito-urinary t.** The genito-urinary apparatus. [a. 34.]—**Goll's t.** A t. in the posterior white column of the spinal cord, corresponding with the posterior median column. It can be traced only as far as the middle of the dorsal region. [I. 15 (K).]—**Gowers's t.** A t. formed of fibres derived from the posterior roots that, having crossed in the posterior commissure and been interrupted in nerve-cells, collect in the lateral column to pursue a cerebral course. One portion of the fibres, it is stated, disappears in the upper cervical cord, and another portion ends in the nucleus lateralis of the medulla oblongata. [a. 34.]—**Habenula t.** A t. leaving the habenula and passing toward the base of the brain, running between the central gray lining and the substance of the thalamus and appearing to end on the mesial side of the red nucleus. [a. 34.]—**Indirect t.** A bundle of nerve-fibres in the lateral column of the spinal cord which joins the direct t. near the posterior edge of the pons Varolii, above which point the two t's are united. [I. 1 (K).]—**Of Direct t.**—**Intellectual t.** See *Fronto-cerebellar t.*—**Intermediary lateral t.**—**Intermedio-lateral t.** Fr., *colonne intermédiaire*. A pyramidal t. of nerve-fibres in the posterior portion of the spinal cord, midway between the anterior and posterior gray columns and in front of the reticular process. [I. 1, 6 (K).]—**Internidal t's.** Of Spitzka, the t's of fibres extending from the nidi of the third, fourth, and sixth cranial nerves. [a. 34.]—**Interoivary t.** A t. of arcuate fibres extending from the nuclei of the posterior columns ventrally toward the middle line; it terminates on the dorsal side of the pyramids in the opposite interoivary region or fillet layer. [a. 34.]—**Intestinal t.** The large and small intestine. [a. 34.]—**Lateral cerebellar t.**—**Lateral longitudinal t.** See *Lateral t. of the cerebellum*.—**Lateral t.** See *Lateral column*.—**Lateral t. of the cerebellum.** A t. receiving its fibres from the direction of Clarke's vesicular column, at the medulla inclining obliquely toward the dorsal surface, across the ascending root of the fifth nerve, the other fibres of the inferior cerebellar peduncle gradually applying themselves to it, and the t. terminating in the vermis. It is a centripetal conducting system connecting the posterior roots and the cerebellum. [a. 34.]—**Lateral t. of the medulla oblongata.** The continuation in the medulla oblongata of the lateral t. of the spinal cord. [a. 34.]—**Lemniscus t.** Ger., *Schleifenbündel*. A

bundle of nerve-fibres which begins in the upper part of the pons Varolii, below the reticular formation, and separates into three portions (the superior, median, and inferior lemnisci). [I. 15 (K).]—**Lissauer's t.** A small t. of fibres at the junction of the tip of the posterior horn and lateral column; the fibres come from the posterior roots, course upward for a short distance, and then enter the posterior horn. [a. 34.]—**Lymphangial t's.** See *Lymphatic nodules*.—**Medial t.** A portion of the cerebral hemisphere in *Carnivora* adjoining the great longitudinal fissure, marked off by the posterior limb of the Sylvian fissure and other sulci which are continuous with or parallel to it. [I. 14 (K).]—**Motor t.** Ger., *motorisches Feld*. The motor path from the cortex of the brain to a muscle. It consists of an upper (cerebro-spinal) and a lower (spino-muscular) segment. The former consists of the t. of fibres from the brain cortex that end in the gray substance of the spinal cord, and the lower of the spinal motor cell and the fibres proceeding from this through the anterior root and nerve trunk to the muscle. [a. 34.]—**Myelo-cerebellar t.** See *Kleinhirnsseitenstrangbahn*.—**Myelonal t.** Of Owen, one of the separate columns of the spinal cord. [I. 14 (K).]—**Nuclear t. of the spinal cord.** Ger., *Kernstrang*. See *Goll's t.*—**Olfactory t.** The bundle of fibres forming the olfactory nerve. [a. 34.]—**Olivary t.** See *Olivary body*.—**Ophthalmic t.**—**Optic t.** The continuation of the optic nerves from the commissure backward to the brain. At its connection with the brain each optic t. divides into two bands, which are continued into the optic thalami, the corpora geniculata, and the corpora quadrigemina. The fibres of origin from the thalamus arise partly from its surface and partly from its interior. Thence the t. winds obliquely across the lower surface of the crus cerebri, in the form of a flattened band destitute of neurilemma, and is attached to the crus by its anterior margin. As it passes forward it receives fibres from the tuber cinereum and lamina cinerea. It is also connected with the tænia semicircularis and the anterior termination of the gyrus fornicatus. It finally joins with the t. of the opposite side to form the commissure. [F.]—**Peduncular t.** A t. of nerve-fibres in the crus cerebri. ["Science," Jan. 15, 1881, p. 14 (K).]—**Posterior cortical t.** Of Edinger, bundles of fibres running from the cortex of the occipital and temporal lobes to the ganglion cells of the pons varolii. [a. 34.]—**Postfrontal t.** The region of the frontal lobe, in *Carnivora*, immediately behind the frontal fissure. [I. 14 (K).]—**Postpyramidal t.** See *Posterior PYRAMID*.—**Postrestiform t.** See *Lateral column*.—**Prefrontal t.** The portion of the frontal lobe, in *Carnivora*, lying in front of the frontal fissure. [I. 14 (K).]—**Prepyramidal t.** See *Anterior PYRAMIDS*.—**Principal t. of the anterior column.** Ger., *vordere Hauptbahn*. Of Flechsig, that portion of the anterior column of the spinal cord which does not belong to the anterior pyramidal t. Quain suggests that it may serve to "connect the gray matter of different segments of the cord." [I. 15 (K).]—**Pyramidal t.** A collection of nerve-fibres in the spinal cord which may be traced from the point of origin of the lower sacral nerves upward in the posterior part of the lateral column to the lower part of the medulla oblongata, where they cross to the opposite side, enter the pyramid, and may be followed through it and the pons to the corresponding crus cerebri. Many of the fibres do not decussate, but run throughout their course in the anterior pyramidal t. [I. 15 (K).]—**Quintus t.** Of Meynert, a t. of fibres that crosses in the dorsal segment of the raphé, comes from the roof of the aqueduct, sweeps in fine curves around the outer side of the descending root of the fifth nerve, curls in beneath the posterior longitudinal bundle, and so traverses the tegmentum toward the middle line. It was formerly supposed that the t. originated in the cells of the descending root of the fifth nerve. [a. 34.]—**Respiratory t.** The respiratory organs. [J.] See also *AIR-PASSAGES*.—**Restiform t.** See *Restiform body*.—**Sagittal medullary t.** A t. that comes from the posterior third of the posterior limb of the internal capsule, skirts the outer side of the posterior horn of the lateral ventricle, and runs to the cortex of the hinder portion of the cerebrum. [a. 34.]—**Second projection t.** Of Meynert, the t. of fibres extending from the basal ganglia to the gray matter surrounding the central cavities in the peduncular system. [a. 34.]—**Semilunar t.** A crescentic t. of fibres in the external portion of the cerebellar hemisphere. [a. 34.]—**Sensory t.** Fr., *portion sensitive*. A t. of fibres that conducts sensations from without to the brain. Those portions of the cord conducting different varieties of sensation, as well as those portions of the brain that are the centres for these varieties, have not yet been positively determined. [a. 34.]—**Speech t.** A t. of fibres passing from the cortex of the third frontal convolution through the white substance outside the tail of the nucleus caudatus and terminating in the nuclei of the nerves in the oblongata that are associated in producing speech. [a. 34.]—**Spiral t.** See *LAMINA CRIBROSA ANTERIOR INFERIOR*.—**Sylvian t.** The region of the brain around the fissure of Sylvius. [I. 14 (K).]—**Tegmental t.** A medullary t. occupying a position in the midst of the tegmentum dorsal of the olivary body and in the vicinity of the posterior accessory olivary nucleus. It probably connects the olivary body with the mid-brain. [a. 34.]—**Temporo-occipital t. of the crura.** A t. of fibres on the outer side of the crura that pass under the lenticular nucleus, or between the latter and the external geniculate body, to the temporal and occipital lobes. [a. 34.]—**Tertiary projection t's.** Of Meynert, the peripheral nerves that have their origin in the gray matter bordering the cavities from the aqueduct of Sylvius down to the end of the spinal cord. [a. 34.]—**T's of the spinal cord.** Certain bundles of nerve-fibres which pursue a similar course in the cord, and appear to have similar functions. [I. 15 (K).]—**Terebral t's.** See *FASCICULI TERETES*.—**Transverse peduncular t.** Of Gudden, a delicate lamina of gray matter extending on each side laterally from the anterior pair of corpora quadrigemina, crossing over the internal geniculate body, and passing around the corresponding crus cerebri to unite with the tænia pontis or to enter the crus. It is found only exceptionally in man. [I. 6 (K).]—**Uro-genital t.** See *Genito-urinary t.*

**Uveal t.** See **UVEA**.—**Voluntary motor t.** The entire t. of fibres from the cortex cerebri to the anterior horns. [a, 34.]

**TRACTION**, n. Tra<sup>2</sup>k'shu<sup>2</sup>n. From *trahere*, to draw. Fr., *t.* Ger., *Zug*, *T.* The act or process of drawing. [a, 48.]—**Axis-t.** Ger., *Axentraktion*. T. in a line with the direction of the channel through which a body (e. g., the foetus) is to be drawn.—**Elastic t.** T. by an elastic force.—**Elastic t. of the lung.** See **Elastic TENSION of the lung**.

**TRACTOR**, n. Tra<sup>2</sup>k't'r. From *trahere*, to draw. 1. An apparatus for making traction, especially a vectis. 2. See under **PERKINISM**.—**Air-t.** Ger., *Luftzieher*. A suction t. devised by Sir J. Y. Simpson for extracting the foetus; used by him also for elevating depressed bones of the new-born infant's skull. Its construction was like that of a breast-pump, and its cup was covered with wire gauze and thin sponge or flannel, to prevent injury of the scalp. Simpson applied it to the breech also. [A, 69.]—**Lever-t.** An instrument devised by Levis for reducing dislocations of the phalanges. It consists of a piece of board perforated at one end so that the dislocated finger may be laid upon it and strapped to it. When firmly fastened, the board gives increased power both in leverage and in traction. [E.]—**Metallic t.'s.** Perkins's t.'s. See under **PERKINISM**.—**Pouliet's t.** A traction apparatus to be used either with the obstetrical forceps or with the sericeps (q. v.). [A, 15.]

**TRACTUS** (Lat.), n. m. Tra<sup>2</sup>kt(tras<sup>2</sup>kt)/u<sup>2</sup>s(u<sup>2</sup>s). See **TRACT**.—**T. alimentarius.** See **Alimentary CANAL**.—**T. arteriosus anterior.** The tract of the anterior median artery of the spinal cord. [a, 34.]—**T. arteriosi postero-laterales.** The tract of the postero-lateral arterioles of the spinal cord. [a, 34.]—**T. ethmoidaeus.** See **GYRUS rectus**.—**T. genalis.** See **GNATHOGRAMMA**.—**T. grilis** (Fr.). See **FASCICULI teretes**.—**T. longitudinalis.** See **STRÆ longitudinalinales mediales**.—**T. longitudinaux de Lancisi.** See **STRÆ longitudinalinales Lancisi**.—**T. lymphaticus jugularis.** The system of lymphatic vessels accompanying the jugular vein from the brain to the cervical ganglia. [a, 34.]—**T. medullaris glandulae pinealis.** The peduncle of the pineal gland. [I, 3 (K).]—**T. medullaris transversus.** See **INCREMENTA fibrosa**.—**T. motorius.** See **MOTOR TRACT**.—**T. nervi optici.** See **OPTIC TRACT**.—**T. olfactorius.** See **OLFACTORY TRACT**.—**T. parietalis anterior.** See **Ascending frontal CONVOLUTION**.—**T. parietalis medius.** See **Ascending parietal CONVOLUTION**.—**T. peduncularis.** See **PEDUNCULAR TRACT**.—**T. peduncularis transversus.** See **Transverse peduncular TRACT**.—**T. rhinalis** [Wilden]. See **OLFACTORY TRACT**.—**T. semicircularis.** See **Semicircular TRACT**.—**T. solitarius.** The descending fibres of a posterior spinal nerve-root. [a, 34.]—**T. spiralis foraminulentus.** A spot in the fossa cochleæ of the internal auditory meatus, at the base of the cochlea, in which may be seen the spirally arranged orifices (for the entrance of the fibres of the cochlear nerve) which open into the fossula inferior. [F, 32, 46 (a, 29).]—**T. supracallosus.** See **Marginal CONVOLUTION**.—**T. supracallosus inferior.** See **GYRUS fornicatus**.—**T. supracallosus superior.** See **Marginal CONVOLUTION**.

**TRADESCANTIA** (Lat.), n. f. Tra<sup>2</sup>d(tras<sup>2</sup>d)-e<sup>2</sup>s-ka<sup>2</sup>n(ka<sup>2</sup>n)-shi<sup>2</sup>(ti<sup>2</sup>)a<sup>2</sup>. From *Tradescant*, gardener to Charles I of England. Fr., *tradescantie*. Spiderwort; a genus of the *Tradescantieæ* (a tribe of the *Commelinaceæ*). [a, 35.]—**T. axillaris.** A Malabar species, used externally in ascites. [a, 35.]—**T. diuretica.** A diuretic and emollient Brazilian species. [a, 35.]—**T. malabarica.** Grass-leaved spiderwort. In India its herbage, cooked in oil, is used in leprosy, ringworm, etc. [a, 35.]—**T. virginica.** Fr., *tradescantie de Virginie*, *éphémère*, *éphémérine*, *fleur d'un jour*, *moly de Virginie*. Flower-of-a-day, Virginian spiderwort; used in Jamaica for the bites of venomous spiders. [a, 35.]

**TRAGACANTH**, n. Tra<sup>2</sup>g'a<sup>2</sup>-ka<sup>2</sup>nth. From *τραγάκανθα*, a plant producing t. Lat., *tragacantha*, *tragacanthum*, *gummi tragacantha* (seu *tragacanthæ* [Belg. Ph.]), *tragacanthæ gummi* [Gr. Ph.]. Ger., *Tragant*, *Traganth*. The concrete exuded juice of various species of *Astragalus*, occurring in whitish, reddish, or yellowish pieces of various shapes, brittle and hard, odorless and almost tasteless. It swells up in water without dissolving, forming a viscous mass. It contains two principal constituents, tragacanthin (q. v.) and a substance resembling arabin and soluble in water. T. is demulcent, but is chiefly used for imparting firmness to troches, etc., and for suspending heavy powders in mixtures. [B, 10; a, 35.]—**Black t.** The inferior varieties of t., containing bark, earth, etc. [B, 15; a, 35.]—**False t.** A gum probably identical with Caramania gum. [B, 5 (a, 21).]—**Flake t.** The most valuable variety of t., occurring in thin, whitish, foliate pieces or flakes, from 1 to 4 inches long. [B, 15.]—**Gum t.** See **T. Hog-gum t.** See **Bassora GUM**.—**Senegal t.** The gum of *Sterculia tragacantha*. [a, 35.]—**Smyrna t.** Ger., *Smyrnatraganth*, *Blättertraganth*. T. imported from Smyrna. It is whitish, and consists of somewhat large, thin, flat or (rarely) vermiform pieces. [a, 35.]—**Syrian t.** A fine variety of t. obtained from Persia and Kurdistan. [B, 15.]—**Vermicelli t.** T. occurring in more or less contorted, vermiform pieces. [a, 35.]

**TRAGACANTHA** (Lat.), n. f. Tra<sup>2</sup>g(tras<sup>2</sup>g)-a<sup>2</sup>k(a<sup>2</sup>k)-a<sup>2</sup>nth-(a<sup>2</sup>nth)/a<sup>2</sup>. See **TRAGACANTH**.—**Glycerinum tragacanthæ** [Br. Ph.]. A preparation made by triturating to a transparent, homogeneous jelly 3 parts of powdered tragacanth, 15 of glycerin, and 2 of water. The Ger. Ph., Finn. Ph., and Hung. Ph. (2d ed.) have a similar preparation made of 1 part of tragacanth, 5 parts of alcohol, and 50 (49 [Hung. Ph.]) of glycerin. [B, 95 (a, 38).]—**Gummi t.** (seu *tragacanthæ*). See **TRAGACANTH**.—**Mucilago cum gummi t.** [Fr. Cod.]. **Mucilago (gummi)** [Belg. Ph., Gr. Ph.]. **Tragacanthæ** [U. S. Ph., Br. Ph., Netherl. Ph., Russ. Ph.]. **Tragacanthæ de gomme adragante** [Fr. Cod.]. Ger., *Traganthschleim*. A tenacious, viscous mass formed by mixing tragacanth with water. The U. S. Preparation contains 6 parts of tragacanth, 18 of glycerin, and water up to 100. The Br. Ph. directs that 12 parts of tragacanth be triturated with 22 fluid parts of alcohol, and 875 parts of water

stirred in. The Fr. preparation contains 9, the Netherl. 12, the Gr. 60, and the Belg. 82; parts of water to 1 part of tragacanth. The Russ. Ph. orders 48 parts of boiling water to 1 part of tragacanth if the mucilage is to be used for troches, otherwise 480 parts of water to 4 of tragacanth and 1 part of gum arabic. The Belg. Ph. has also a *mucilago spissa*, containing 66 parts of tragacanth with water up to 1,000. [B, 95 (a, 38).]—**Pulvis tragacanthæ compositus** [Br. Ph.]. Fr., *poudre mucilagineuse* (ou *de gomme adragante composée*). A preparation consisting of 1 part each of tragacanth, gum arabic, and starch, and 3 parts of sugar. Various old ph's had similar preparations, sometimes containing other substances, such as licorice, marsh-mallow, poppy-seeds, oil of anise, etc. [B, 95, 119 (a, 38).]—**Tragacanthæ gummi.** See **TRAGACANTH**.—**T. electa.** Selected tragacanth. [a, 35.]—**T. in sortis.** Common tragacanth, containing brownish and whitish pieces and flake and vermicelli t. [a, 35.]—**T. massiliensis.** See **ASTRAGALUS massiliensis**.—**T. media.** See *T. in sortis*.—**T. pulverata.** Selected and purified tragacanth, crushed, dried at 40° C., reduced to a white powder, and sifted through a No. 100 silk sieve [Fr. Cod.] (a 1,000-mesh sieve [Russ. Ph.]). [B, 95 (a, 38).]

**TRAGACANTHIN**, n. Tra<sup>2</sup>g-a<sup>2</sup>k-a<sup>2</sup>nth/i<sup>2</sup>n. Ger., *T.*, *Tragacanthstoff*. A proximate principle existing in tragacanth; a vegetable mucilage insoluble in water, thought to be identical with basorin, but regarded by some as distinct. [B, 5, 10.]

**TRAGACANTHUM** (Lat.), n. n. Tra<sup>2</sup>g(tras<sup>2</sup>g)-a<sup>2</sup>k(a<sup>2</sup>k)-a<sup>2</sup>nth-(a<sup>2</sup>nth)/u<sup>2</sup>m(u<sup>2</sup>m). See **TRAGACANTH**.

**TRAGANT** (Ger.), **TRAGANTH** (Ger.), n's. Tra<sup>2</sup>g-a<sup>2</sup>nth'. See **TRAGACANTH** and **ASTRAGALUS** (6th def.).—**Blättert'**. See *Smyrna TRAGACANTH*.—**T'schleim.** See *Mucilago TRAGACANTHÆ*.—**T'stoff.** See **TRAGACANTHIN**.—**T'wurzel.** The root of *Astragalus exscapus*. [a, 35.]

**TRAGANTHIN**, n. Tra<sup>2</sup>g-a<sup>2</sup>nth/i<sup>2</sup>n. See **TRAGACANTHIN**.

**TRAGBAHRE** (Ger.), n. Tra<sup>2</sup>g'ba<sup>2</sup>r e<sup>2</sup>. See **Hand-LITTER**.

**TRAGBAND** (Ger.), n. Tra<sup>2</sup>g'ba<sup>2</sup>nd. A sling, a truss. [a, 48.]

**TRAGBAR** (Ger.), adj. Tra<sup>2</sup>g'ba<sup>2</sup>r. 1. Portable. 2. Fertile, also pregnant. [A, 315 (a, 48).]

**TRAGBEUTEL** (Ger.), n. Tra<sup>2</sup>g'boit-e<sup>2</sup>l. A suspensory bandage for the scrotum. [A, 14.]

**TRAGBINDE** (Ger.), n. Tra<sup>2</sup>g'bi<sup>2</sup>nd-e<sup>2</sup>. See **Suspensory BANDAGE**.

**TRAGEA** (Lat.), n. f. Traj(tras<sup>2</sup>g)-e<sup>2</sup>a-a<sup>2</sup>. Gr., *τραγεία* (from *τρώγειν*, to eat). A stomachic powder. [L, 50 (a, 14).]—**T. aromatica Gabelcheverli.** A powder of 40 parts of cinnamon, 20 each of red and white sandal-wood and ginger, 9 each of cloves, smaller galangal, mace, nutmeg, and grana Paradisi, and 2,400 of white sugar. [B, 119 (a, 34).]—**T. aromatica officinalis.** A powder of 30 parts of cinnamon, 11 each of cloves, ginger, and nutmeg, 7 of mace, 15 of red sandal-wood, and 900 of sugar. [B, 119 (a, 38).]

**TRAGEMA** (Lat.), n. n. Tra<sup>2</sup>j(tras<sup>2</sup>g)-e<sup>2</sup>m(am)-a<sup>2</sup>. Gen., -em'-atos (-atis). Gr., *τραγέμα* (from *τρώγειν*, to eat). A sweetmeat (cf. *DRAGÉE*). [A, 311 (a, 48).]

**TRÄGER** (Ger.), n. Trag'e<sup>2</sup>r. A bearer or holder; of Selenka, the trophodisc or trophoblast; in compos., the atlas.

**TRÄGERIN** (Ger.), n. Trag'e<sup>2</sup>r-i<sup>2</sup>n. A pregnant woman.

**TRÄGHEIT** (Ger.), n. Trag'hit. See **INERTIA**.—**Herzt'**. See **LENTOR cordis**.—**T. der Gebärmutter.** See **Uterine INERTIA**.—**T. der Muskeln.** See **MYONARCOSIS**.

**TRAGIA** (Lat.), n. f. Traj(tras<sup>2</sup>g)/i<sup>2</sup>a-a<sup>2</sup>. From *Tragus*, the Latinized name of H. Bock, a German botanist. Fr., *t.*, *tragie*. A genus of the *Euphorbiaceæ*. [a, 35.]—**T. cannabina.** Fr., *t. à feuilles de chanvre*. An Indian shrub. The root is diaphoretic, diuretic, febrifuge, and alterative. [a, 35.]—**T. chamælea.** Fr., *t. chamêlée*. A species used in various cachexie. The juice is diuretic, and, mixed with wine or oil, is used as an astringent and tonic. [a, 35.]—**T. involucrata.** A species the root of which is used as an alterative and diuretic, and its juice in fever and itch. [a, 35.]—**T. mercurialis.** A species the root of which is used in chronic syphilis, etc. [a, 35.]—**T. urens.** Fr., *liane brûlante*. A variety of *T. cannabina*. [a, 35.]—**T. volubilis.** Twining cowitch; a West Indian species. The root is laxative and diuretic, and the juice, mixed with sea-salt, is used in frambesia. [a, 35.]

**TRAGICUS** (Lat.), adj. Tra<sup>2</sup>j(tras<sup>2</sup>g)/i<sup>2</sup>k-u<sup>2</sup>s(u<sup>2</sup>s). From *tragus* (q. v.). Pertaining to the tragus; as a n. m., a short, flattened muscle on the outer surface of the tragus. [F, 31.]

**TRÄGIG** (Ger.), adj. Trag'i<sup>2</sup>g. See **PREGNANT**.

**TRAGOMASCHALIA** (Lat.), n. Traj(tras<sup>2</sup>g)-o(o<sup>2</sup>)-ma<sup>2</sup>sch-(ma<sup>2</sup>sch<sup>2</sup>-al(a<sup>2</sup>l)/i<sup>2</sup>a-a<sup>2</sup>). From *τράγος*, a goat, and *μασχάλη*, the arm-pit. See **Hincus alarum**.

**TRAGOPHONIA** (Lat.), n. f. Tra<sup>2</sup>g(tras<sup>2</sup>g)-o(o<sup>2</sup>)-fon/i<sup>2</sup>a-a<sup>2</sup>. From *τράγος*, a goat, and *φωνή*, the voice. See **ÆGOPHONY**.

**TRAGOPODIA** (Lat.), n. f. Tra<sup>2</sup>g(tras<sup>2</sup>g)-o(o<sup>2</sup>)-pod(po<sup>2</sup>d)/i<sup>2</sup>a-a<sup>2</sup>. From *τράγος*, a goat, and *πούς*, the foot. See **GENU valgum**.

**TRAGOPOGON** (Lat.), n. m. and n. Tra<sup>2</sup>g(tras<sup>2</sup>g)-o(o<sup>2</sup>)-pog/-o<sup>2</sup>n(on). Gen., -on/-os (-is), -oy/i. From *τράγος*, a goat, and *πωγων*, a beard. Fr., *salsifis*. Ger., *Bocksbart*, *Geissbart*. A genus of the *Tragopogoneæ*, which are a subtribe of the *Cichoraceæ*. [a, 35.]—**T. major.** Ger., *großer Bocksbart*. The larger goat's-beard of Europe. The root contains a bitter juice, and is perhaps more active than those of other species of T. [a, 35.]—**T. porrifolium**, *T. porrifolius*. Fr., *cerisif à feuilles de poireau*, *barbebon*, *salsifis blanc* (ou *des jardins*). Ger., *lauchblättriger Bocksbart*. Star of Jerusalem, vegetable oyster, salsify, purple goat's-beard, the *τραγονώγων* of Dioscorides; a species found in Europe and Asia, cultivated for its edible root, *radix tragopogonis* (seu *tragopogi*, seu *barba hirci*, seu *barbula hirci*), which is mucilaginous and bitter, and is used like that of *T. pratensis*. [a, 35.]—**T. pratense**, and

**T. pratensis.** Fr., *cercifis des prés* (ou sauvage), *thalibeu, rata-bout, cochet, barbe de bouc.* Ger., *Wiesenbocksbart, wilde Haferwurz* (oder *Scorzonere*), *Josephblume, Habermerkwurz.* Goat-bed-at-noon, noon-tide, shepherd's-clock, yellow (or meadow) goat's-beard of Europe. The bitter, mucilaginous, mildly aperient root, *radix tragopogonis* (seu *tragopogi*, seu *barbe hirci*, seu *barbula hirci*, seu *scorzonera silvestris*), is used like that of *Taraxacum officinale*. [a, 35.]

**TRAGOPUS** (Lat.), adj. Tra<sup>2</sup>g(trag<sup>2</sup>)/o<sup>2</sup>p-u<sup>2</sup>s(u<sup>2</sup>s). Gr., *τραγόπους* (from *tragos*, a goat, and *πους*, the foot). Fr., *tragopoe*. Ger., *bocksfüssig*. Knock-kneed. [L, 50 (a, 14).]

**TRAGOSELINUM** (Lat.), n. n. Trag(trag<sup>2</sup>)/o(o<sup>2</sup>)-se<sup>2</sup>l-in(en)<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). From *tragos*, a goat, and *selavon*, parsley. Fr., *trago-sélin*. 1. A genus of the *Umbelliferae*. [a, 35.] 2. See **PIMPINELLA saxifraga**.—**T. angelica.** See *Ægopodium podagraria*.—**T. magnum**, **T. majus.** See *Pimpinella magna*.—**T. saxifraga.** See *Pimpinella saxifraga*.

**TRAG-SITZ** (Ger.), n. Tra<sup>2</sup>g<sup>2</sup>/zi<sup>2</sup>s. See **BEARING-SEAT**.

**TRAGULINA** (Lat.), n. n. pl. Trag(trag<sup>2</sup>)/u<sup>2</sup>l(u<sup>2</sup>l)-in(en)<sup>2</sup>a<sup>2</sup>. From *tragulus*, a goat. A family of deer-like ruminants, the chevrotains. [a, 48.]

**TRAGUS** (Lat.), n. m. Trag(trag<sup>2</sup>)/u<sup>2</sup>s(u<sup>2</sup>s). Gr., *τράγος*. Fr., *t. Ger.*, *Bock* (1st def.), *Ohrbock* (1st def.). 1. A nipple-like projection of the cartilage of the auricle, directed backward and in front of the orifice of the external auditory canal. [F.] 2. See **HINCUS** (2d def.). 3. See **ESTRUATION**. 4. A genus of grasses; of *Dioscorides*, the *Ephedra distachya*; of *Hippocrates*, a species of astringent *Fucus*; also the *Salsola t.*, *Salsola kali*, and *Sedum album*. [a, 35.]—**Herba tragi.** See *Salsola kali* and *Salsola t.*—**T. auriculae.** See *T.* (1st def.).

**TRAHENS** (Lat.), adj. Tra(trah<sup>2</sup>)/he<sup>2</sup>nz(hans). Gen., *-hent'is*. Pres. part. of *trahere*, to draw. Drawing; used of a muscle that has a drawing action. [a, 48.]—**T. urethram.** See **BULBO-CAVERNOSUS**, n.

**TRAILING**, adj. Tra<sup>2</sup>/i<sup>2</sup>n<sup>2</sup>. See **PROCUMBENT**.

**TRAINING SCHOOL**, n. Tra<sup>2</sup>n<sup>2</sup>/i<sup>2</sup>n<sup>2</sup>-skul. Fr., *école d'infirmières*. An institution in which nursing is taught. [a, 34.]

**TRAIT** (Fr.), n. Tre<sup>2</sup>. See **LINE** (3d def.).—**T. général.** See **GNATHOGRAMMA**.

**TRAITEMENT** (Fr.), n. Tre<sup>2</sup>t-ma<sup>2</sup>n<sup>2</sup>. See **TREATMENT**.—**T. marin.** The treatment of disease by residence at the sea-shore, sea baths, etc.

**TRAJECTUS** (Lat.), n. m. Tra<sup>2</sup>(tra<sup>2</sup>)-je<sup>2</sup>kt(ye<sup>2</sup>kt)/u<sup>2</sup>s(u<sup>2</sup>s). Gen., *-ject'us*. From *trajicere*, to throw across. Fr., *trajet*. See **TRACT**.—**T. abdominalis**, **T. inguinalis.** See **INGUINAL CANAL**.

**TRAJET** (Fr.), n. Tra<sup>2</sup>-zhe<sup>2</sup>. See **TRACT**.—**T. des fibres dans l'écorce** [Eugénin]. The white fibres of the cerebral cortex, described by Gerlach. [I, 28 (K).]—**T. inguinal.** See **INGUINAL CANAL**.

**TRAMA** (Lat.), **TRAME** (Lat.), n's f. Tram(tram<sup>2</sup>)/a<sup>2</sup>, -e(a). Gr., *τράμη* (3d def.), *τράμης* (3d def.). Fr., *trame*. 1. The tissue separating the two surfaces of the gills of the *Hymenomyces*. [a, 35.] 2. Tissue, usually some form of connective tissue, forming the framework of an organ or part. [J, 33.] 3. See **RHAPHE**.

**TRAMESAIGUES** (Fr.), n. Fra<sup>2</sup>m<sup>2</sup>-se<sup>2</sup>g. A place in the department of the Hautes-Pyrénées, France, where there is a hot sulphurous spring. [L, 40 (a, 14).]

**TRAMIS** (Lat.), n. f. Tram(tram<sup>2</sup>)/i<sup>2</sup>s. Gr., *τράμης*. See **RHAPHE**.

**TRANCE**, n. Tra<sup>2</sup>ns. Gr., *ἵκτορας*. From *transitus*, a passing over. Fr., *trance*. Ger., *Entzückung* (3d def.). 1. A protracted syncope. [A, 42.] 2. A state of insensibility to ordinary external surroundings, together with suspension of volitional power and to a great extent of the vital functions. It is often associated with intense mental exaltation and preoccupation, and may simulate death. [D, 20.] Cf. **ECSTASY**.—**Hysterical t.** The t.-like condition sometimes occurring in hysteria. [D, 35.]

**TRANCHÉES** (Fr.), n. pl. Tra<sup>2</sup>n<sup>2</sup>-sha. See **COLIC** and **AFTER-PAINS**.—**T. utérines.** See **AFTER-PAINS**.

**TRANK** (Ger.), n. Tra<sup>2</sup>n<sup>2</sup>k. See **BEVERAGE** and **PROPOMA**.—**Wiener T.** [Ger. Ph.]. See *Infusum SENNÆ compositum*.

**TRANSDUCTOR** [Coudes] (Lat.), n. m. Tra<sup>2</sup>ns(tran<sup>2</sup>s)-du<sup>2</sup>kt-du<sup>2</sup>kt(u<sup>2</sup>o<sup>2</sup>r. Gen., *-or'is*. From *transducere*, to lead across. See **TRANSVERSUS pedis**.—**T. hallucis.** See *T.*

**TRANSFER**, **TRANSFERENCE**, n's. Tra<sup>2</sup>ns/fu<sup>2</sup>r, tra<sup>2</sup>ns'-fu<sup>2</sup>r-e<sup>2</sup>ns. From *transferre*, to bear across. See **TRANSFER**.—**Thought-t.** A supposed overmastering influence exerted by one person over the thoughts of another through the instrumentality of the so-called psychic force. [a, 48.]

**TRANSFERT** (Fr.), n. Tra<sup>2</sup>n<sup>2</sup>-fe<sup>2</sup>r. A phenomenon observed in experiments in metalloscopy and analogous investigations, consisting in the transfer of abnormalities of sensation and motility (of hysterical origin or induced artificially) from a given region of one lateral half of the body to the same region on the opposite side.

**TRANSFIXION**, n. Tra<sup>2</sup>ns-fi<sup>2</sup>x/shu<sup>2</sup>n. From *transfigere*, to pierce through. See under **AMPUTATION** by *t.*

**TRANSFORATEUR** (Fr.), n. Tra<sup>2</sup>n<sup>2</sup>-for-a<sup>2</sup>-tu<sup>2</sup>r. An instrument devised by Hubert for boring through the sphenoid bone in the operation of craniotomy. It consists of a perforator (*trepan*, *perce-crâne perforateur*) and a guard, the former ending in an olive-shaped piece of steel with screw-threads cut on it, tipped with a trocar point. [A, 15, 23.]

**TRANSFORMATION**, n. Tra<sup>2</sup>ns-fô<sup>2</sup>r-a<sup>2</sup>-shu<sup>2</sup>n. From *transformare*, to pierce through. Lat., *sphenotroica*. Fr., *t. sphenotroïque*. Of Hubert, a procedure for breaking up the base of the frontal skull by repeated perforation with the transforateur. [A, 23, 24.]

**TRANSFORMATION**, n. Tra<sup>2</sup>ns-fô<sup>2</sup>r-m-a<sup>2</sup>-shu<sup>2</sup>n. Gr., *μεταμόρφωσις*. Lat., *transformatio* (from *transformare*, to change in shape). Fr., *t. Ger.*, *T. Verwandlung*. Change of form, condition, or character; especially morbid change, degeneration. [a, 48.]—**Cheesy t.** See **CASEATION**.—**Hæmatic t.** Of Burdach, the t. into pus-cells of blood-cells that have passed into the ordinary secretions. [a, 34.]—**T. colloïde** (Fr.). See **Colloid DEGENERATION**.—**T. graisseuse** (Fr.). See **Fatty DEGENERATION**.

**TRANSFORMISM**, n. Tra<sup>2</sup>ns-fô<sup>2</sup>r-m'i<sup>2</sup>z'm. From *transformare*, to change. See **DARWINISM**.

**TRANSFUSION**, n. Tra<sup>2</sup>ns-fu<sup>2</sup>zhu<sup>2</sup>n. Gr., *διάχυσις*. Lat., *transfusio* (from *transfundere*, to pour out). Fr., *t. Ger.*, *T. Ueberleitung*. The act of pouring from one vessel to another; the introduction into the vessels of the body of fluid material, especially of blood taken from another body; also the act of causing a fluid to pass through the skin into the body.—**Autof.** See the major list.—**Direct t.** The t. of blood from vessel to vessel without its exposure to the air. [E.] Cf. *Aveling's APPARATUS*.—**Galvanic t.** See **CATAPHORESIS**.—**Hypodermic t.** The t. of blood, milk, or a saline solution by hypodermic injection. [a, 34.]—**Indirect t.** **Mediate t.** The process of injecting blood which has first been drawn into an open vessel and sometimes defibrinated. [E.]—**Nervous t.** The hypodermic injection of an extract made from the brain or spinal cord. [a, 34.]—**Peritoneal t.** Fr., *t. péritonéale*. T. into the peritoneal cavity. [a, 34.]—**Reciprocal t.** Of Brünle, a proposed exchange of equal volumes of blood between a fever patient and a healthy person who has recovered from the fever and is therefore proof against it, and whose blood is likely to contain an element (antitoxine) destructive to the micro-organisms in the blood of the patient. ["N. Y. Med. Jour.," Aug. 17, 1889, p. 184 (a, 17).]—**T. by Aveling's method.** See **Direct t.** and **Aveling's APPARATUS**.—**T. infusoire** (Fr.). See **INFUSION** (1st def.).—**Venous t.** The t. of blood by injecting it into a vein. [a, 34.]

**TRANSITUS** (Lat.), n. m. Tra<sup>2</sup>ns(tran<sup>2</sup>s)/i<sup>2</sup>t-u<sup>2</sup>s(u<sup>2</sup>s). Gen., *transitus*. From *transire*, to go over. Gr., *μετάβασις*. See **PASSAGE** (1st def.).—**T. ad ventriculum quartum.** See **AQUEDUCT of Sylvius**.

**TRANSLUCENT, TRANSLUCID**, adj's. Tra<sup>2</sup>ns-lu<sup>2</sup>s'e<sup>2</sup>nt, -i<sup>2</sup>d. From *trans*, through, and *lucere*, to shine. Transmitting light, but not transparent. [a, 48.]

**TRANSLUMINATION**, n. Tra<sup>2</sup>ns-lu<sup>2</sup>m-i<sup>2</sup>n-a<sup>2</sup>-shu<sup>2</sup>n. From *trans*, through, and *luminare*, to light up. See **DURCHLEUCHTUNG**.

**TRANSMISSIBILITY**, n. Tra<sup>2</sup>ns-mi<sup>2</sup>s-i<sup>2</sup>b-i<sup>2</sup>/i<sup>2</sup>t-i<sup>2</sup>. From *transmittere*, to send across. Capability of being communicated or passed on from one to another. [a, 48.]

**TRANSMISSION**, n. Tra<sup>2</sup>ns-mi<sup>2</sup>sh'u<sup>2</sup>n. Gr., *διαπομπή, παραπομπή*. Lat., *transmissio*. Fr., *t.* The act or process of sending over or through. [a, 48.]—**Duplex t.** The power possessed by nerves of transmitting impulses in two directions. [K, 35.]

**TRANSMUTATION**, n. Tra<sup>2</sup>ns-mu<sup>2</sup>t-a<sup>2</sup>-shu<sup>2</sup>n. Gr., *μεταβολή, μεταλλαγή, μεταμόρφωσις*. Lat., *transmutatio* (from *transmutare*, to change). Ger., *T.* 1. Conversion into another substance or form. [a, 48.] 2. In botany, constructive metabolism. [a, 85.]—**Doctrine (or Theory) of t.** Ger., *T'schre*. See **DARWINISM**.

**TRANSOCULAR**, adj. Tra<sup>2</sup>ns-o<sup>2</sup>k'u<sup>2</sup>l-a<sup>2</sup>r. From *trans*, across, and *oculus*, the eye. Extending across the eye (said of a line on a bird's head). [L, 221.]

**TRANSPALMARIS** [Coudes] (Lat.), n. m. Tra<sup>2</sup>ns(tran<sup>2</sup>s)-pa<sup>2</sup>l-(pa<sup>2</sup>l)-mar(ma<sup>2</sup>r)/i<sup>2</sup>s. From *trans*, across, and *palma*, the palm. See **PALMARIS brevis**.

**TRANSPARENT**, adj. Tra<sup>2</sup>ns-pa<sup>2</sup>r'e<sup>2</sup>nt. Gr., *διαφανής*. Lat., *transparens* (from *trans*, through, and *parere*, to appear). Ger., *durchsichtig*. That can be seen through; transmitting light so as to render objects visible that are beyond the t. medium. [a, 48.]

**TRANSPERINEUS** [Coudes] (Lat.), n. m. Tra<sup>2</sup>ns(tran<sup>2</sup>s)-pe<sup>2</sup>r-i<sup>2</sup>n-e'(e'a<sup>2</sup>)/u<sup>2</sup>s(u<sup>2</sup>s). From *trans*, across, and *perineum* (q. v.). See **TRANSVERSUS perinei**.

**TRANSPINALES** [Coudes] (Lat.), n. m. pl. Tra<sup>2</sup>ns(tran<sup>2</sup>s)-pin-(pen) al(a<sup>2</sup>l)/e<sup>2</sup>ze(e<sup>2</sup>s). From *trans*, across, and *spina*, the spine. The intertransversarii muscles. [a, 50.]

**TRANSPIRATIO** (Lat.), n. f. Tra<sup>2</sup>ns(tran<sup>2</sup>s)-pi<sup>2</sup>r(per)-a(a<sup>2</sup>)/shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *-on'is*. Transpiration.—**T. unilatera.** Unilateral sweating.

**TRANSPIRATION**, n. Tra<sup>2</sup>ns-pi<sup>2</sup>r-a<sup>2</sup>-shu<sup>2</sup>n. Lat., *transpiratio* (from *trans*, through, and *spirare*, to breathe). Fr., *t. Ger.*, *Ausdünstung*. 1. The act of passing off, or the matter passed off, through an investing or lining membrane, especially through the skin: cutaneous exhalation; perspiration. 2. The exhalation or evaporation of water from vegetable tissues, especially the leaves.—**Cutaneous t.** See **PERSPIRATION**.—**Insensible t.** See **INSENSIBLE PERSPIRATION**.—**Pulmonary t.** The exhalation of watery vapor by the lungs. [J, 17, 18.]

**TRANSPIRATORY**, adj. Tra<sup>2</sup>ns-pi<sup>2</sup>r-a<sup>2</sup>-t-or-i<sup>2</sup>. Lat., *transpiratorius*. Fr., *transpiratoire*. See **PERSPIRATORY**.

**TRANSPLANTATION**, n. Tra<sup>2</sup>ns-pla<sup>2</sup>nt-a<sup>2</sup>-shu<sup>2</sup>n. Gr., *μεταφύτεσις*. Lat., *transplantatio* (from *transplantare*, to transplant). Ger., *Ueberpflanzen*. The absolute removal of a portion from one part of the body and its implantation into another part or upon another organism. [E.]—**Corneal t.** An operation, introduced by Wolfe, in which flaps, broad at the base and converging toward the cornea, are taken from the ocular conjunctiva on each side and dissected up to the cul-de-sac. They are turned over on the cornea and secured in the usual way. A stop-lance knife is introduced into the limbus, so as not to injure the conjunctival flap, as far as the stop. The director is passed through one of the openings and pushed in front of iris and lens out through the opposite side. The double-bladed knife is placed in the grooves and the corneal

flap separated and placed in tepid water. A similar conjunctival and corneal flap is then removed from a second patient, but here the lance-knife must be used so as not to interfere with the pillars of the iris, and it must be rapidly withdrawn, so as to prevent, as much as possible, the escape of the aqueous humor and consequent prolapse of the iris. The transparent graft is then placed in position and secured by sutures in the corners of the conjunctival flaps. ["Med. Times and Gaz.," Nov. 22, 1879 (F).]—**T. of pterygium.** An operation, introduced by Desmarres, in which the pterygium is carefully detached from the cornea and for a distance of 5 to 6 mm. from the sclera also. Then from the lower margin of the wound surface an incision is made through the conjunctiva for several millimetres, and in this triangular gaping space the detached pterygium is inserted and fastened by sutures. Knapp's operation (for broad pterygia) consists in dissecting the pterygium completely from head to base, cutting off the hard, cartilaginous head, and then dividing the growth longitudinally into a lower and an upper half. Then incisions are made in the conjunctiva above and below, parallel to the corneal margin (the conjunctiva being dissected up) and their edges brought down and approximated by sutures so as to close in the vacant space originally occupied by the pterygium. The divided halves are then transplanted upward and downward into the conjunctival incisions and fastened by sutures. ["Arch. f. Ophth.," xiv, p. 267 (F).]—**T. of skin.** Ger., *Hautimplantation*. The t. of large thin shavings of skin from a healthy portion of the body to an exposed wound or a granulating surface. [a, 34.]—**T. of teeth.** See ALLOTRIODONTIA (1st def.).

**TRANSPOSITIO** (Lat.), n. f. Tra<sup>2</sup>ns(trā<sup>2</sup>ns)-po<sup>2</sup>z-i<sup>2</sup>shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., -on<sup>2</sup>is. See TRANSPOSITION.—**T. cordis.** See DEXIOCARDIA.

**TRANSPOSITION**, n. Tra<sup>2</sup>ns(po<sup>2</sup>z-i<sup>2</sup>shu<sup>2</sup>n. Gr., *μετάθεσις*. Lat., *transpositio* (from *transponere*, to remove). An interchange of situation.—**T. of the viscera.** Visceral t. T. of the viscera so that those normally situated in the right are placed in the left half of the body and *vice versa*. [a, 34.]

**TRANSSUBSTANTIATION**, n. Tra<sup>2</sup>ns-su<sup>2</sup>b-sta<sup>2</sup>n-shi<sup>2</sup>-a'-shu<sup>2</sup>n. From *trans*, through, and *substantia*, substance. Of Vetter and Burdach, the absorption of a tissue and its replacement by another. It is said to be *regressive* when a special tissue is replaced by a more general one, and *progressive* when a general is replaced by a special tissue. [J, 33.]

**TRANSUDATE**, n. Tra<sup>2</sup>ns-u<sup>2</sup>d-at. From *trans*, through, and *sudare*, to perspire. Ger., *Transsudat*. The product of transudation. [D.]

**TRANSUDATION**, n. Tra<sup>2</sup>ns-u<sup>2</sup>d-a'-shu<sup>2</sup>n. From *trans*, through, and *sudare*, to perspire. Fr., *transsudation*. Ger., *Durchschwitzen*. 1. The passage of a liquid through a membrane or tissue, especially the filtration of blood-serum through the capillaries; also a transudate. [D, 3.] Cf. EXUDATION and DIAPEDESIS. 2. The irrigation of cells by the nutritive plasma exuded from blood capillaries. [J.]—**Engorgement t.** Ger., *Stauungst.* A t. due to engorgement. In Auspitz's classification of skin diseases, the engorgement t's are a family of "engorgement dermatoses," in which there is serous effusion into the tissues of the skin, with the consequent production of either simple oedema, or, from excess of nutritive supply, induration and hypertrophy of the connective tissue of the skin (see ELEPHANTIASIS *Arabum*), or, from pressure, atrophy of the connective tissue (see SCLEREMA *cutis*). [G, 4.]—**Oedematous t.** T. that results in oedema; the transudate of oedema. [D.]

**TRANSVERSA** (Lat.), n. f. Tra<sup>2</sup>ns(trā<sup>2</sup>ns)-vu<sup>2</sup>rs(we<sup>2</sup>rs)/a<sup>2</sup>. The transverse diameter of the pelvis.

**TRANSVERSAIRE** (Fr.), n. Tra<sup>2</sup>ns<sup>2</sup>s-ve<sup>2</sup>r-sa<sup>2</sup>r. See TRANSVERSALIS.—**T. cervical.** See TRACHELOMASTOIDEUS.—**T. de la nuque.** See OCCIPITALIS *minor*.—**T. du cou.** See TRANSVERSUS *colli*.—**T. épineux.** 1. See TRANSVERSOSPINALIS. 2. See MULTIFIDUS *spinae*, SEMISPINALIS *colli*, and SEMISPINALIS *dorsi*.—**T. épineux antérieur.** See RECTUS *capitis anticus major*.

**TRANSVERSAL**, adj. and n. Tra<sup>2</sup>ns-vu<sup>2</sup>r's'l. Fr., *t.* See TRANSVERSALIS.—**Short t.** See ILIO-SPINAL (2d def.).—**T. du nez** (Fr.). See COMPRESSOR *naris*.

**TRANSVERSALIS** (Lat.), adj. Tra<sup>2</sup>ns(trā<sup>2</sup>ns)-vu<sup>2</sup>rs(we<sup>2</sup>rs)-al(a<sup>2</sup>l)/i<sup>2</sup>s. Lying crosswise; as a n. m., a muscle lying transversely. [C.]—**T. abdominis.** See TRANSVERSUS *abdominis* and LUMBO-ABDOMINALIS.—**T. capitis.** See TRACHELOMASTOIDEUS (1st def.).—**T. cervicis.** See TRACHELOMASTOIDEUS.—**T. cervicis anticus.** 1. The longus *colli accessorius*. [L.] 2. An anomalous muscle arising from the oblique processes of the sixth to the fourth cervical vertebrae and inserted into the third to the first. [L, 332.]—**T. cervicis medius.** An anomalous muscle extending between the transverse processes of the second and sixth or seventh cervical vertebrae. [L, 332.]—**T. cervicis posterior major.** See TRACHELOMASTOIDEUS (1st def.).—**T. cervicis posticus minor.** See TRACHELOMASTOIDEUS *accessorius*.—**T. colli.** See TRACHELOMASTOIDEUS.—**T. costarum.** See TRACHELOCOSTALIS.—**T. digitorum.** See TRANSVERSUS *pedis*.—**T. dorsi.** See LONGISSIMUS *dorsi*.—**Transversales hyoides.** A short band of muscular fibres, found in some of the lower mammals, uniting the superior extremities of the styloid cornua, and in its contraction approximating them. [Bourgelat (L, 13).]—**T. lumborum.** The portion of the quadratus *lumborum* arising from the transverse processes of certain of the lumbar vertebrae. [L, 332.]—**T. nasi.** 1. See COMPRESSOR *naris*. 2. A small single muscle of most of the lower mammals, which passes from one nasal cartilage to the other. It is a dilator of the nostrils. [L, 13.]—**T. pedis.** **T. plantae.** See TRANSVERSUS *pedis*.

**TRANSVERSE**, adj. Tra<sup>2</sup>ns-vu<sup>2</sup>r's'. Lat., *transversus*, *transversalis* (from *transvertere*, to turn athwart) Fr., *t.*, *transversal*. Ger., *quer*, *querlaufend*, *querliegend*. Crosswise, in a direction at right angles to the length of a body. [a, 35.]

**TRANSVERSE** (Fr.), adj. and n. Tra<sup>2</sup>n's-ve<sup>2</sup>rs. See TRANSVERSALIS.—**T. cervical.** See TRACHELOMASTOIDEUS.—**T. de l'abdomen.** See TRANSVERSUS *abdominis*.—**T. de la langue.** See TRANSVERSUS *linguae*.—**T. de la mâchoire inférieure.** See MYLOHYOIDEUS (2d def.).—**T. de l'auricule.** **T. de l'oreille.** See TRANSVERSUS *auricular*.—**T. du menton.** See TRANSVERSUS *menti*.—**T. du nez.** See COMPRESSOR *naris*.—**T. du périnée.** See TRANSVERSUS *perinaei*.—**T. profond du périnée.** See TRANSVERSUS *perinaei profundus*.—**T. superficiel du périnée.** See TRANSVERSUS *perinaei superficialis*.

**TRANSVERSO-ANALIS** (Lat.), n. m. Tra<sup>2</sup>ns(trā<sup>2</sup>ns)-vu<sup>2</sup>rs(we<sup>2</sup>rs)/o(o<sup>2</sup>)-a<sup>2</sup>n(a<sup>2</sup>n)-a<sup>2</sup>l(a<sup>2</sup>l)/i<sup>2</sup>s. See TRANSVERSUS *perinaei superficialis*.

**TRANSVERSOCOSTALES** (Lat.), n. m. pl. Tra<sup>2</sup>ns(trā<sup>2</sup>ns)-vu<sup>2</sup>rs(we<sup>2</sup>rs)/o(o<sup>2</sup>)-ko<sup>2</sup>st-al(a<sup>2</sup>l)/ez(e<sup>2</sup>s). From *transversus* (q. v.), and *costa*, a rib. Ger., *Querkmuskeln der Rippen*. Analogues of the levatores costarum of man found in the lower mammals. [L.] Cf. COSTOSTERNALIS.

**TRANSVERSO-ILIAQUE** (Fr.), n. Tra<sup>2</sup>n's-ve<sup>2</sup>r-so-e-le-a<sup>2</sup>l. See QUADRATUS *lumborum*.

**TRANSVERSOSPINALIS** (Lat.), n. m. Tra<sup>2</sup>ns(trā<sup>2</sup>ns)-vu<sup>2</sup>rs(we<sup>2</sup>rs)/o(o<sup>2</sup>)-spin(spen)-al(a<sup>2</sup>l)/i<sup>2</sup>s. From *transversus* (q. v.), and *spina*, the spine. 1. A muscle extending between the transverse and spinous processes of a vertebra. [L, 332.] 2. All of the muscles so attached regarded as one. [L, 31.]—**T. breves.** The obliquus *capiti minor*, *rotatores dorsi breves*, and *rotatores dorsi longi*. [L, 332.]—**T. longi.** The semispinalis *capitis*, semispinalis *cervicis*, semispinalis *dorsi*, and the multifidus *spinae*. [L, 332.]—**T. lumborum.** See MULTIFIDUS *spinae*.

**TRANSVERSO-URETHRALIS** (Lat.), n. m. Tra<sup>2</sup>ns(trā<sup>2</sup>ns)-vu<sup>2</sup>rs(we<sup>2</sup>rs)/o(o<sup>2</sup>)-u<sup>2</sup>r(ur)-e<sup>2</sup>th(ath)-ra<sup>2</sup>l(rā<sup>2</sup>l)/i<sup>2</sup>s. From *transversus* (q. v.), and *urethra* (q. v.). See GUTHRIE'S MUSCLE.

**TRANSVERSUS** (Lat.), adj. Tra<sup>2</sup>ns(trā<sup>2</sup>ns)-vu<sup>2</sup>rs(we<sup>2</sup>rs)/u<sup>2</sup>s(u<sup>2</sup>s). From *transvertere*, to turn athwart. See TRANSVERSE; as a n., see *T. perinaei superficialis*, *T. abdominis*. Ger., *querer Bauchmuskel*, *Breitmuskel des Abdomens*. A muscle lying beneath the obliquus *abdominis internus* which arises from the inner surfaces of the six lower ribs, the lumbodorsal fascia, the inner lip of the anterior two thirds of the crest of the ilium, and the outer portion of Poupart's ligament, and is inserted into the transversalis fascia and the front of the os pubis and the pectineal line. [L, 31, 141, 332.]—**T. auricular.** **T. auris.** A muscle which lies on the convex or posterior surface of the pinna. It consists of radiating fibres, partly tendinous and partly muscular, extending from the convexity of the concha to the prominence corresponding with the groove of the helix. [F, 31.]—**T. bulbi.** Transverse fibres of the t. *perinaei profundus* behind the urethra above the bulb. [L, 31.]—**T. colli.** An anomalous muscle behind the manubrium *sterni* which arises from the first costal cartilage and unites in the middle line with its fellow and the deep layer of the cervical fascia. [L, 332.]—**T. costarum.** See COSTOSTERNALIS.—**T. linguae.** Transverse muscular fibres between the linguales inferior and superior which are attached in the median line to a vertical fibrous septum and pass outward to the borders and dorsum of the tongue. [L, 31, 332.]—**T. mandibulae.** See MYLOHYOIDEUS (2d def.).—**T. manus.** The outer portion (often separated from the rest of the muscle) of the adductor *pollicis*. [L, 332.]—**T. menti.** Ger., *Doppelkinnmuskel*. Muscular fibres uniting in front the depressor *anguli oris* of one side with that of the other. [L, 332.]—**T. nasi.** See COMPRESSOR *naris*.—**T. orbitae.** An anomalous muscle arising from the os *planum* which passes across the orbit either above or below the levator *palpebrae* and is inserted into the outer margin of the orbit. [L, 332.]—**T. pectoris.** Of Arnold, see TRIANGULARIS *sterni*.—**T. pedis.** Fr., *couvreur*. A muscle arising from the lateral metatarsophalangeal ligaments, and inserted into the first phalanx of the great toe in common with the adductor *pollicis pedis*, of which some consider it a part. [L.]—**T. perinaei.** Ger., *querer Darmmuskel*. The t. *perinaei profundus* and the t. *perinaei superficialis*. [L.]—**T. perinaei anterior.** **T. perinaei medius.** **T. perinaei posterior inferior.** See *T. perinaei superficialis*.—**T. perinaei profundus.** 1. All the muscular fibres between the two layers of the deep perineal fascia arranged transversely, obliquely, and perpendicularly, arising on each side from the inferior ramus of the ischium and its tuberosity and the fascia, and meeting in the middle line of the perinaeum. 2. The transverse fibres of the same arising from the tuberosities of the ischia. [L, 31, 142, 332.] 3. In woman, the most posterior and most clearly defined bundle of t. *perinaei profundus* (2d def.). [L.]—**T. perinaei superficialis.** A bundle of fibres which arises from the tuberosity of the ischium or the adjacent fascia and meets its fellow of the opposite side in the middle line, blending with the sphincter *ani externus*, the bulbo-cavernosus, or one or another of the perineal muscles. [L, 31, 332.]—**T. plantae (pedis).** See *T. pedis*.—**T. prostaticae.** 1. See COMPRESSOR *prostaticae*. 2. Fibres of the lateral and anterior surface of the prostate, attached to the anterior surface of the ischium. [L, 173 (a, 50).]—**T. Sancto-rini.** See *T. menti*.—**T. thoracis anterior.** See TRIANGULARIS *sterni*.—**T. thoracis posterior.** The infracostales taken as a whole. [L, 332.]—**T. urethrae.** Perpendicular fibres of the t. *perinaei profundus* (1st def.) which surround the urethra close to the bulb. [L, 31.]—**T. vaginae.** The t. *perinaei profundus* (2d def.) in woman. [L.]

**TRAP**, n. Tra<sup>2</sup>p. An apparatus, usually consisting of one or more bent pipes, with or without valves, filled with water, used to prevent the escape of gases from soil-pipes into dwellings. [a, 48.]

**TRAPA** (Lat.), n. f. Tra<sup>2</sup>p(trā<sup>2</sup>p)/a<sup>2</sup>. Fr., *macre*. Ger., *Wassernuss*, *Stachelnuss*. Water-caltrops (or nut): a genus of floating herbs, forming the *Trapaceae* (a family of the *Onagraceae*) or *Trapa* (a series of the *Haloragaceae*). [a, 35.]—**T. bispinosa.** The water-chestnut of middle and southern Asia, Ceylon, Japan, etc.;

cultivated for its farinaceous seed. [a, 35].—**T. natans**. Fr. *corniche*, *corniole*, *cornuelle*, *galarin*, *noix aquatique* (ou d'eau), *truffe d'eau*, *macre flottante*. Ger. *gemeine Wassernuss* (oder *Stachelnuss*), *Wasserkastanie*, *Jesuitennuss*. Jesuit's nut of Venice, water-caltrops, water-chestnut, the *πρῖβοκος* *ἐνδοπος* of Dioscorides, a species found in southern and middle Europe, middle Asia, and northern and central Africa. The fruits, *nucis* (seu *castaneae*) *aquaticae* (seu *palustres*, seu *cornute*), and their edible seed, *semina nucis aquaticae* (seu *tribuli aquatici*), were formerly official. The upper, leafy portion of the stem was used in poultices as a discutient, and the expressed juice in eye diseases. [a, 35].

**TRAPEZE** (Fr.), n. Tra<sup>2</sup>p-e<sup>2</sup>z. See **TRAPEZIUM** and **TRAPEZIUS**.—**T. dorsal**. See **DORSO-ACROMIALIS**.—**T. du cou**. See **CERVICO-ACROMIALIS**.

**TRAPEZIA** (Lat.), n. f. Tra<sup>2</sup>p(trap<sup>2</sup>p)-ez(e<sup>2</sup>z)/i<sup>2</sup>-a<sup>2</sup>. Of Galen, the superior portion of the trapezius muscle. [L, 2.]

**TRAPEZIUM** (Lat.), n. n. Tra<sup>2</sup>p(trap<sup>2</sup>p)-ez(e<sup>2</sup>z)/i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). From *τράπεζα*, a table. Fr. *trapeze*, *corps rhomboïdal* (ou *rhombôide*, ou *trapezoïde*) [2d def.]. Ger. *Trapez*, *Trapezbein* (1st def.), *vielwinkliger Knochen* (1st def.), *grosses vieleckiges Bein* (1st def.), *trapezoider Körper* (2d def.). 1. The outermost of the second row of the carpal bones. It is irregularly six-sided and grooved on its anterior surface for the tendon of the flexor carpi radialis, and articulates with the scaphoid, the trapezoid, and the first and second metacarpal bones. [L, 37, 142, 332.] 2. A tract of nerve-fibres at the lower part of the pons Varolii below the prolongations of the anterior pyramids. It comes below the superior olivary nucleus and extends upward to be continuous with the middle cerebellar peduncle. [I, 15 (K).]—**T. minus**. See **TRAPEZOID BONE**.—**T. pontis**. See **T.** [2d def.].

**TRAPEZIUS** (Lat.), n. m. Tra<sup>2</sup>p(trap<sup>2</sup>p)-ez(e<sup>2</sup>z)/i<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). From *τράπεζα*, a table. Fr. *trapeze*, *capuchon*. Ger. *Kappenmuskel*. 1. A muscle arising from the external protuberance of the occipital bone, the ligamentum nuchæ, the spinous processes of the last cervical and all the dorsal vertebrae, and the supraspinous ligaments, and inserted into the posterior border of the outer third of the clavicle and the inner border of the acromion process and the upper edge of the spine of the scapula. 2. In solipeds, a muscle which arises from the cervical column and the transverse processes of the first dorsal vertebra and is attached to the acromial spine of the scapula. It raises the shoulder and carries it forward and backward. [L, 13.]

**TRAPEZOID**, adj. Tra<sup>2</sup>p-e<sup>2</sup>z-oid. Lat., *trapezoides* (from *τράπεζα*, a table, and *εἶδος*, resemblance). Fr., *trapezoïde*. Table-shaped; as a n., the t. bone. [a, 48.]

**TRAPÉZO-MÉTACARPIEN** (Fr.), n. Tra<sup>2</sup>-pa-zo-ma-ta<sup>2</sup>-ka<sup>2</sup>r-pe-a<sup>2</sup>n<sup>2</sup>. See **OPONENS POLICIS**.

**TRÄUBCHEN** (Ger.), n. Troib/ch<sup>2</sup>e<sup>2</sup>n. See **RACEMULUS**.—**Fett<sup>2</sup>**. See **FAT LOBULES**.

**TRAUBE** (Ger.), n. Tra<sup>2</sup>u<sup>2</sup>b-e<sup>2</sup>. See **RACEME** and **GRAPE**.—**T<sup>2</sup>ncur**. See **GRUPE-CURE**.—**T<sup>2</sup>ngeschwulst**. See **STAPHYLOMA**.—**T<sup>2</sup>nsäure**. See **RACEMIC ACID**.—**T<sup>2</sup>nschimmel**. See **BOTRYTIS**.

**TRAUBENBAUM** (Ger.), n. Tra<sup>2</sup>u<sup>2</sup>b-e<sup>2</sup>n-ba<sup>2</sup>-u<sup>2</sup>m. The genus *Ucaria*. [a, 35.]

**TRAULISMUS** (Lat.), n. m. Tra<sup>2</sup>l(trap<sup>2</sup>-u<sup>2</sup>l)-i<sup>2</sup>z(i<sup>2</sup>s)/mu<sup>2</sup>s(mu<sup>2</sup>s). Gr. *τραυλισμός*. See **BLÆSITAS**.

**TRAUM** (Ger.), n. Tra<sup>2</sup>u<sup>2</sup>m. See **DREAM**.

**TRAUMA** (Lat.), n. n. Tra<sup>2</sup>m(trap<sup>2</sup>-u<sup>2</sup>m)-a<sup>2</sup>. Gen., *traum/atos* (-atis). Gr., *τράυμα* (from *τρίπτω*, to wound). A wound. [E.]

**TRAUMATIC**, adj. Tra<sup>2</sup>m-a<sup>2</sup>t<sup>2</sup>/ik. Gr., *τραυματικός*. Lat., *traumaticus*. Fr., *traumatique*. Ger., *traumatisch*. Pertaining to or due to mechanical injury. [E.]

**TRAUMATICIN**, **TRAUMATICINE**, n's. Tra<sup>2</sup>m-a<sup>2</sup>t<sup>2</sup>/i<sup>2</sup>s-i<sup>2</sup>n, -en. Lat., *traumaticinum* (Hung. Ph., 1st ed.). A fanciful name applied to a 10-per-cent. solution of gutta-percha in chloroform; used like collodion. Cf. *Liquor GUTTA-PERCHÆ*.

**TRAUMATISM**, n. Tra<sup>2</sup>m-a<sup>2</sup>t<sup>2</sup>-i<sup>2</sup>z'm. Fr., *traumatisme*. Ger., *Traumatismus*. 1. The infliction of an injury. 2. The state or condition of the system produced by a serious injury; it may include the symptoms of shock and of septicæmia. [a, 34.]

**TRAUMATOCACE** (Lat.), n. f. Tra<sup>2</sup>m(trap<sup>2</sup>-u<sup>2</sup>m)-a<sup>2</sup>t(a<sup>2</sup>t)-o<sup>2</sup>k'-a<sup>2</sup>s(a<sup>2</sup>k'-o<sup>2</sup>a). Gen., -o<sup>2</sup>caces. From *τράυμα*, a wound, and *κακός*, bad. See **HOSPITAL GANGRENE**.

**TRAUMATOLOGY**, n. Tra<sup>2</sup>m-a<sup>2</sup>t<sup>2</sup>-o<sup>2</sup>l'i<sup>2</sup>. From *τράυμα*, a wound, and *λόγος*, understanding. Fr., *traumatologie*. The pathology, etc., of wounds. [a, 48.]

**TRAUMATONESIS** (Lat.), n. f. Tra<sup>2</sup>m(trap<sup>2</sup>-u<sup>2</sup>m)-a<sup>2</sup>t(a<sup>2</sup>t)-o<sup>2</sup>(a<sup>2</sup>)-ne<sup>2</sup>a<sup>2</sup>i<sup>2</sup>s<sup>2</sup>a. Gen., -o<sup>2</sup>e<sup>2</sup>os (-is). From *τράυμα*, a wound, and *νῆσις*, a suture. Suture of a wound. [a, 48.]

**TRAUMATOPNOEA** (Lat.), n. f. Tra<sup>2</sup>m(trap<sup>2</sup>-u<sup>2</sup>m)-a<sup>2</sup>t(a<sup>2</sup>t)-o<sup>2</sup>(a<sup>2</sup>)-pne<sup>2</sup>(pno<sup>2</sup>e<sup>2</sup>)-a<sup>2</sup>. From *τράυμα*, a wound, and *πνέειν*, to breathe. The passage of air through a perforating chest-wound in consequence of respiratory movements. [a, 34.]

**TRAUMATOPYRA** (Lat.), n. f. Tra<sup>2</sup>m(trap<sup>2</sup>-u<sup>2</sup>m)-a<sup>2</sup>t(a<sup>2</sup>t)-o<sup>2</sup>p'-i<sup>2</sup>ru<sup>2</sup>r<sup>2</sup>a<sup>2</sup>. From *τράυμα*, a wound, and *πύρ*, fever. See **TRAUMATIC FEVER**.

**TRAUMATOSAPROSIS** (Lat.), **TRAUMATOSEPSIS** (Lat.), n's. Tra<sup>2</sup>m(trap<sup>2</sup>-u<sup>2</sup>m)-a<sup>2</sup>t(a<sup>2</sup>t)-o<sup>2</sup>(a<sup>2</sup>)-sa<sup>2</sup>p-ro<sup>2</sup>-si<sup>2</sup>s<sup>2</sup>/i<sup>2</sup>s, -se<sup>2</sup>p-sa<sup>2</sup>/i<sup>2</sup>s. Gen., -ro<sup>2</sup>se<sup>2</sup>os (-is), -se<sup>2</sup>p-se<sup>2</sup>os (-is). From *τράυμα*, a wound, and *σάπρος*, putrid, or *σῆψις*, putrefaction. See **HOSPITAL GANGRENE**.

**TRAUMATOSIS** (Lat.), n. f. Tra<sup>2</sup>m(trap<sup>2</sup>-u<sup>2</sup>m)-a<sup>2</sup>t(a<sup>2</sup>t)-o<sup>2</sup>s-i<sup>2</sup>s. Gen., -o<sup>2</sup>se<sup>2</sup>os (-is). From *τράυμα*, a wound. Traumatism. The *Traumatones* are, in Fuchs's classification of skin diseases, a family of the *Morphonosi* including excoeriation and dermatotrauma. [G.]

**TRAUMOTYPHUS** (Lat.), n. m. Tra<sup>2</sup>m(trap<sup>2</sup>-u<sup>2</sup>m)-o<sup>2</sup>(a<sup>2</sup>)-tif-(tu<sup>2</sup>sf)/u<sup>2</sup>s(u<sup>2</sup>s). From *τράυμα*, a wound, and *τύφος*, typhus. Of Eisenmann, hospital gangrene. [L, 50 (a, 14).]

**TRAVAIL** (Fr.), n. Tra<sup>2</sup>-va<sup>2</sup>-y'. See **LABOR**.—**Petit t.** A term applied by some authors to manipulations intended to hasten or facilitate the expulsion of the child's head when it is resting upon the perineum, such as pressing back the pelvic floor. [A, 15].—**T. insensible**. The premonitory stage of labor. [A, 88].—**T. manqué**. See **Missed LABOR**.—**T. trop prompt**. See **Precipitate LABOR**.—**T. vesiculaire**. See **DEHISCENCE** [2d def.].

**TRAVEMÜNDE** (Ger.), n. Tra<sup>2</sup>f'e<sup>2</sup>-mu<sup>2</sup>-nd-e<sup>2</sup>. A sea-bathing resort on the Baltic in the vicinity of Lubeck, Germany. [a, 14.]

**TREACLE**, n. Tre<sup>2</sup>-a<sup>2</sup>-k'l. 1. An antidote to venomous bites (cf. *Theriaca*, whence the word is derived); a panacea. [a, 48.] 2. See **MOLASSES**.—**Countryman's t.** See **ALLIUM SATIVUM** and *RUTA graveolens*.—**Venice t.** See **TREAK FAROUK**.

**TREAD**, n. Tre<sup>2</sup>-d. A vulgar term for the cicatricula of an egg. See **ARCHBLAST**.

**TREAK FAROUK**, n. "Venice treacle"; a Japanese secret remedy said to be identical with the *theriaca Andromachi* of the Lond. Ph. of 1746. [Gordon, "Brit. Med. Jour.," Apr. 5, 1884.]

**TREATMENT**, n. Tre<sup>2</sup>m'mt. Gr., *θεραπεία* (1st def.). Lat., *medela* (1st def.). Fr., *traitement*. Ger., *Behandlung*. 1. Means employed for the relief of the sick or injured. 2. The subjection of anything to the action of certain agencies. [D.]—**Antiphlogistic t.** T. intended to prevent or limit inflammation. [a, 34].—**Antiseptic t.** T. tending to prevent sepsis. [a, 34].—**Banting t.** See **BANTINGISM**.—**Colony t.** See **COLONIZATION** [2d def.].—**Dietetic t.** The t. of disease by special diet. [a, 34].—**Earth t.** The t. of wounds and certain skin diseases by the application of finely powdered sterilized clay. [a, 34].—**Empirical t.** Routine t. founded on experience. [a, 34].—**Expectant t.** T. directed against symptoms as they arise, not based on any fixed plan of therapeutics. [a, 34].—**Hueter's t. for knock-knee**. Retention of the knee in a flexed position by means of a plaster-of-Paris bandage. [A, 520 (a, 29)].—**Hygienic t.** The t. of disease by the application of hygienic principles, involving environment, clothing, food, and exercise. [a, 34].—**Lowering t.** T. intended to depress the chief characteristics of a sthenic inflammation. [a, 34].—**Mechanical t.** 1. T. by mechanical appliances. 2. See **MASSAGE**.—**Mitchell's t.** The t. of certain neuroses by absolute and complete rest in bed, isolation except for the presence of the nurse and the physician, massage, hydrotherapy, electricity, and full diet. [a, 34].—**Mixed t.** A phrase used in reference to the t. of syphilis by the contemporary administration of potassium iodide and mercury. [a, 34].—**Palliative t.** T. intended to modify or limit the severer manifestations of a disease, but not to cure. [a, 34].—**Pneumatic t.** See **PNEUMATOTHERAPY**.—**Rest t.** See **MASTUR.**—**Scarceniz's t.** The t. of syphilis by the hypodermic injection of mercury. [a, 35].—**Symptomatic t.** T. of disease by attention to the symptoms as they arise. [D.]—**Valsalva's t. for aneurysm**. T. which consists in rest, low diet, venesection, and other general means of reducing the force of the circulation. [E.]

**TREBAS** (Fr.), n. Tra<sup>2</sup>-ba<sup>2</sup>. A place in the department of the Tarn, France, where there is a gaseous, alkaline, and ferruginous spring. [L, 49, 88, 185 (a, 14).]

**TREBIZOND**, n. Tre<sup>2</sup>b/i<sup>2</sup>z-o<sup>2</sup>nd. A place in Asia Minor where there are hot mineral springs. [L, 49 (a, 14).]

**TRECHOMA** (Lat.), **TRECHYSMA** (Lat.), n's n. Tre<sup>2</sup>k-(trach<sup>2</sup>)-om'a<sup>2</sup>, -i<sup>2</sup>z(u<sup>2</sup>s)/ma<sup>2</sup>. Gen., -om'atos (-atis), -ys'matos (-atis). See **TRACHOMA**.

**TREE**, n. Tre. Gr., *δένδρον*. Lat., *arbor*. Fr., *arbre*. Ger., *Baum*. A plant with a woody, single stem rising to the height of 30 feet or more. [a, 35].—**Vascular t.** Fr., *arbre vasculaire*. Ger., *Gefässbaum*. The arborescent appearance of the blood-vessels when isolated in entirety from the body. [a, 34.]

**TRÈFLE** (Fr.), n. Tre<sup>2</sup>-fl'. See **TRIFOLIUM**.—**T. d'eau**. 1. The *Menyanthes trifoliata*. 2. See *Folia trifolii fibrini*.—**Extrait de t. d'eau**. See *Extractum trifolii fibrini*.—**T. tendineux du diaphragma**. The central tendon of the diaphragm. [L.]

**TREFOIL**, adj. Tre<sup>2</sup>-foi<sup>2</sup>. From *tres*, three, and *folium*, a leaf. Having three segments or leaves: as a n., the genus *Trifolium*, also the *Medicago lupulina*, *Stylosanthes procumbens*, *Anemone hepatica*, *Menyanthes trifoliata*, etc. [a, 35.]

**TREHALA**, n. Tre<sup>2</sup>-ha<sup>2</sup>-l'a<sup>2</sup>. See **TURKISH MANNA**.

**TREHALOSE**, n. Tre<sup>2</sup>-ha<sup>2</sup>-l-os. Fr., *tréhalose*. A sugar, C<sub>12</sub>H<sub>22</sub>O<sub>11</sub> + 2H<sub>2</sub>O, obtained from trehala manna and found also in various fungi; identical with the mycose contained in ergot of rye. [B, 3 (a, 38).]

**TREIBEISEN** (Ger.), n. Trib<sup>2</sup>-i-ze<sup>2</sup>n. See **REPOUSOIR** (1st def.).

**TREIBEND** (Ger.), adj. Trib<sup>2</sup>-e<sup>2</sup>nd. See **EVACUANT**.

**TREIBMITTEL** (Ger.), n. Trib<sup>2</sup>-mi<sup>2</sup>t-te<sup>2</sup>l. See **PURGATIVE**, n.

**TREIBMUSKEL** (Ger.), n. Trib<sup>2</sup>-musk-e<sup>2</sup>l. See **ACCELERATOR** [2d def.].—**T. des Harns**. See **BULBOCAVERNOSUS**, n.

**TREMA** (Lat.), n. n. Trem(tram)-a. Gen., trem'atos (-is). Gr., *τρήμα* (from *τρίπτω*, to bore). See **FORAMEN**.

**TREMA** (Lat.), n. f. Trem(tram)-a<sup>2</sup>. A genus of the *Ulmaceæ*. [a, 35].—**T. orientale**. Indian nettle-tree; a species found in southern Asia, yielding a gum like that of the cherry-tree. The aromatic bark, leaves, and root are said to be remedial in epilepsy. [a, 35.]

**TREMATODA** (Lat.), n. n. pl. Tre<sup>2</sup>m(tram)-a<sup>2</sup>t(a<sup>2</sup>t)-o<sup>2</sup>d'a<sup>2</sup>. From *τρεματώδης*, porous. Fr., *trematodes*. Ger., *Saugwürmer*, *Trematoden*. The flukes; a suborder of the *Sterelmintha*. They are hermaphrodite, and have a soft, round or flat body, and an indistinct head with suckorial foramina. [L, 1.]

**TREMBLEMENT** (Fr.), n. Tra<sup>3n2</sup>bl<sup>1</sup>ma<sup>3n2</sup>. See TREMOR.

**TREMBS**, n. Tre<sup>2m</sup>b<sup>1</sup>z. Fr., *maladie tremblante*. See PARALYSIS agitans.

**TREMBLING**, n. Tre<sup>2m</sup>b<sup>1</sup>li<sup>2n2</sup>. See TREMOR.

**TREMBLOTEMENT** (Fr.), n. Tra<sup>3n2</sup>blot<sup>1</sup>ma<sup>3n2</sup>. A trembling, a vibration; of Barth, the sound heard in true croup when a stethoscope is placed over the larynx, caused by the vibration of the false membrane in the larynx. [D. 1.]

**TREMELLA** (Lat.), n. f. Tre<sup>2m</sup>e<sup>3l</sup>la<sup>2</sup>. Fr., *tremelle*. 1. The genus *Nostoc*. The *Tremellinae* are a section of *Algae*. 2. The typical genus of a division (*Tremellaceae*, *Tremellideae*, *Tremellineae*, *Tremellineae*, *Tremellineae*, or *Tremellini* [Ger., *Zitterpilze*, *Gallertpilze*]) of basidiomycetous *Fungi*. [a. 35.]—**T. mesenterica**. A species of *T.* (2d def.) forming orange tints on dead hedges, etc. Distilled water poured over it was formerly used in eye diseases and the palsy of gout. [a. 35.]—**T. verticalis**, *T. violacea*. Fr., *tremelle verticale*. An edible species of *T.* (2d def.) yielding a blue dye. [a. 35.]

**TREMENTINA** (Sp.), n. Tra<sup>2m</sup>me<sup>3n</sup>ten<sup>1</sup>a<sup>3</sup>. At Bogotá, the resin of *Espeletia grandiflora*; used medicinally. [a. 35.]—**T. común** [Mex. Ph.]. A thick, granular turpentine, obtained from *Pinus tecote*; used as a balsamic stimulant. [B. 224 (a. 14); J. M. Maisch, "Am. Jour. of Pharm.," Mar., 1886, p. 122 (a. 50).]

**TREMOR** (Lat.), n. m. Trem<sup>2m</sup>(tre<sup>2m</sup>)o<sup>2r</sup>. Gen., -or<sup>is</sup>. From *tremere*, to tremble. Fr., *tremblement*. Ger., *Zittern*. A quivering or trembling, especially a more or less continuous quivering of a convulsive character. [D.]—**Arsenical t.** T. caused by arsenical neuritis. [a. 34.]—**Continuous t.** A form of t. that resembles that of paralysis agitans, but may be remittent. Muscular tension is not exaggerated, as in intermittent t., and the t. may be diminished or arrested by a voluntary effort. [D. 35.]—**Convulsive t.** 1. Of Hammond, a paroxysmal affection characterized by frequent attacks of violent trembling, lasting fifteen or twenty minutes, and leaving the subject in a profuse perspiration. There are also headache, vertigo, anxiety, hyperaesthesia of the skin of the face, arms, and trunk (the parts usually involved in the paroxysms), and sometimes unconsciousness. 2. Any short shaking of the body, such as occurs occasionally after urination. Hammond includes all cases of non-rhythmical t., or clonic convulsive movements which are paroxysmal in character, but are not attended with loss of consciousness. [D. 25, 34.]—**Epileptoid t.** Intermittent clonus with t.—**Fibrillary t.** T. caused by the consecutive contractions of separate muscular fibrillae, rather than of a muscle or the muscles as a whole. [D. 36.]—**Forced t.** See *T. coactus*.—**Hysterical t.** T. due to the instability of nervous influence existing in hysteria. [a. 34.]—**Intermittent t.** T. common to paralyzed muscles in hemiplegia. It is induced when the muscles are put upon the stretch by attempts at voluntary movement. [D. 35.]—**Mercurial t.**, **Metallic t.** A volitional t. due to mercurialism. [D. 25.]—**Muscular t.** Slight oscillating muscular contractions following each other in rhythmical order. [L. 20 (a. 34).]—**Purring t.** See *Purring THRILL*.—**T. capitis**. T. affecting the muscles of the neck and head. [a. 34.]—**T. coactus**. Forced t.; of Van Swieten, the convulsive movements which persist during repose after voluntary exercise; attributed to an intermittent and rhythmical irritation of the nervous centres. [D. 35.]—**T. saturninus**. T. due to lead poisoning. [L. 57 (a. 14).]—**T. tendinum**. See *SUBSULTUS tendinum*.—**Vibratile t.** See *FREMITUS*.—**Volitional t.** Trembling of the limbs or of the entire body when a voluntary effort is made. It occurs in connection with multiple sclerosis and other nervous diseases. [D. 68.]

**TREMULATION** (Fr.), n. Tra<sup>2m</sup>mu<sup>3</sup>la<sup>3</sup>se<sup>3o</sup>n<sup>2</sup>. The tremor of paralysis agitans. [A. 385 (a. 48).]

**TREMULENCE** (Fr.), n. Tra<sup>2m</sup>mu<sup>3</sup>la<sup>3</sup>n<sup>2</sup>s. See TREMOR.—**T. paralytique**. See PARALYSIS agitans.

**TREMULIN**, n. Tre<sup>2m</sup>u<sup>3l</sup>i<sup>2n</sup>. Fr., *trémuline*. See POPULIN.

**TRENCIN**, n. A place in T. County, Hungary, where there are saline and sulphurous springs. [L. 37, 49, 57 (a. 14).]

**TREPAN**, n. Tre<sup>2</sup>pa<sup>2n</sup>. See TREPHINE.—**Schiefer T.** (Ger.). See ECLEPSITREPANON.

**TREPANATIO** (Lat.), n. f. Tre<sup>2</sup>pa<sup>2n</sup>(a<sup>3n</sup>)a<sup>3</sup>(a<sup>3</sup>)shi<sup>2</sup>(ti<sup>2</sup>)o. Gen., -on<sup>is</sup>. See TREPHINE. **T. corneae**. An operation for the relief of conical cornea. It consists in removing a small circular piece from the centre of the cornea by means of a corneal trephine. Bowman employs small trephines, penetrating only as far as the membrane of Descemet. The cut disc is removed, and the membrane of Descemet immediately presents as a hernia. This is punctured, and the puncture must be repeated every day or two for several weeks, until the cicatricial process is complete. In De Wecker's operation his corneal trephine is used to cut a round disc out of the entire thickness of the cornea, the object being to maintain a permanent fistula in cases of partial staphyloma and total leucoma. ["Ann. d'ocul.," xlviii, p. 137 (F.).]

**TREPANATION**, **TREPANNING**, n's. Tre<sup>2</sup>pa<sup>2n</sup>a<sup>3</sup>shu<sup>2n</sup>, -a<sup>3n</sup>i<sup>2n</sup>. Lat., *trepantatio*. See TREPHINING.

**TREPHINE**, n. Tre<sup>2</sup>fi<sup>2n</sup>. Gr., *τροπήνη, τροπανον* (from *τροπήναι*, to bore). Lat., *trepantum, tripantum*. Fr., *tréphine, trépan*. Ger., *Schädelbohrer, Drillbohrer, Drehbohrer, Trephina, Trepan*. An instrument for cutting or sawing a circular opening, generally for sawing such an opening in the skull; consisting of a crown (a steel tube with saw-teeth at its free end), a shaft, and a handle. [E.]—**Brace t.** A t. fitted into an ordinary carpenter's brace. [E.]—**Conical t.** A t. the crown of which has the shape of a truncated cone, and is provided with oblique ridges on its outer surface, so that its progress ceases as soon as the bone has been cut through. [a. 34.]—**Corneal t.** Of Bowman, a small cutting drill or t. designed to excise a defined circular portion of the apex of a conical cornea. The instrument is rotated by the finger and thumb. De Wecker's

corneal t. is constructed on the principle of Heurteloup's artificial leech. The tubular cutting blade is inclosed in a solid tube, and protrudes by pressure on a spring. [F.]—**Galt's t.** See *CONICAL t.*—**Nasal t.** An instrument consisting of a steel shaft terminating in a small fenestrated tube having a knife-edge or saw-edge. ["N. Y. Med. Jour.," May 28, 1887, p. 596 (a. 34).]—**Tympanic t.** An instrument consisting of a steel shaft terminating in a small, polished tube 2 mm. in diameter, having a cutting edge. [Burnett, "Trans. of the Am. Ot. Assoc.," 1873, p. 109 (a. 34).]

CONICAL TREPHINE.

**TREPHINING**, n. Tre<sup>2</sup>fi<sup>2n</sup>. Gr., *τροπήνισ*. Lat., *trepantatio*. Fr., *trepantation*. Ger., *Trepanirung*. The operation of using the trephine. [E.]

**TREPIDATIO** (Lat.), n. f. Tre<sup>3</sup>p<sup>3</sup>id<sup>3</sup>a<sup>3</sup>(a<sup>3</sup>)shi<sup>2</sup>(ti<sup>2</sup>)o. Gen., -on<sup>is</sup>. From *trepidae*, to be agitated. Fr., *trépidation*. A condition of agitation, a violent trembling. [a. 48.]—**T. cordis**. See PALPITATION of the heart.

**TREPIDATION** (Fr.), n. Tra<sup>2</sup>pe<sup>3</sup>da<sup>3</sup>se<sup>3o</sup>n<sup>2</sup>. See TREPIDATIO.—**T. épileptoïde**. An epileptoid paroxysm of violent tremulous movements occurring in the lower extremities in certain affections of the spinal cord. ["Cribl. f. klin. Med.," Dec. 8, 1886, p. 899 (a. 34).]—**T. provoquée**. T. produced by bringing certain muscles into action. [A. 319 (a. 34).]

**TREPIED** (Fr.), n. Tra<sup>2</sup>pe<sup>3</sup>a. A tripod.—**T. cœliaque**. See TRIPUS *Halleri*.—**T. vital**. Of Bichat, the combined functions of circulation, respiration, and brain-action. [A. 385 (a. 48).]

**TREPOT** (Fr.), n. Tra<sup>2</sup>por. See LE TREPOT.

**TREPPE** (Ger.), n. Tre<sup>2</sup>p<sup>2</sup>pe<sup>2</sup>. See SCALA and *Staircase PULSATION*.—**Bowditch'sche T.** The contractions, gradually increasing in intensity until they reach a certain maximum, from which they as gradually decrease, observed when a bundle of smooth muscle-fibres is stimulated by an induced current. [K.]—**Pauken', Trommelhöhlent'**. See SCALA *tympani*.

**TRESCIÉOUX** (Fr.), n. Tre<sup>2</sup>s<sup>3</sup>cia<sup>3</sup>u. A place in the department of the Hautes-Alpes, France, where there is a sulphurous spring. [L. 49, 88 (a. 14).]

**TRESCORE** (It.), n. Tre<sup>2</sup>s<sup>3</sup>ko<sup>3</sup>ra. A place in Bergamo, Italy, where there is an alkaline, saline, and sulphurous spring. [a. 14.]

**TRESIS** (Lat.), n. f. Tre<sup>2</sup>(tra<sup>3</sup>)si<sup>2s</sup>. Gen., *tresis* (is). Gr., *τρῆσις* (from *trepsivai*, to pierce). See WOUND.—**T. causis**. See BURN.—**T. punctura**. A puncture. [E.]—**T. vulnus**. A wound. [E.]

**TRESSAILLEMENT** (Fr.), n. Tre<sup>2</sup>s<sup>3</sup>sa<sup>3</sup>ely<sup>3</sup>ma<sup>3n2</sup>. See SUBSULTUS.

**TRESTER** (Ger.), n. Tre<sup>2</sup>st<sup>2</sup>e<sup>2r</sup>. See MARE (3d def.).

**TREVOA** (Lat.), n. f. Tra<sup>2</sup>vo<sup>2</sup>a<sup>3</sup>. A genus of the *Rhamnaceae*. [a. 35.]—**T. trinervis**. A shrub found from Bolivia to Chile. In Chile it is reputed vulnerary. [a. 35.]

**TREWIA** (Lat.), n. f. Tra<sup>2</sup>wi<sup>2</sup>a<sup>3</sup>. Fr., *trévier*. A genus of the *Euphorbiaceae*. [a. 35.]—**T. macrophylla**, *T. macrosiachya*, *T. nudiflora*. An East Indian tree. The root-bark is used as a diuretic and externally in podagra. [a. 35.]

**TRIACANTHIN**, n. Tri<sup>2</sup>a<sup>3</sup>k<sup>3</sup>a<sup>3</sup>nth<sup>2</sup>i<sup>2n</sup>. Of A. L. Metz, an alkaloid obtained from *Gleditschia triacanthos*; probably identical with gleditschine (q. v., 2d def.). [B. 270 (a. 38).]

**TRIACETALDANE**, n. Tri<sup>2</sup>a<sup>3</sup>se<sup>3</sup>e<sup>3t</sup>ald<sup>2</sup>n. See under ALDANE.

**TRIACETAMIDE**, n. Tri<sup>2</sup>a<sup>3</sup>se<sup>3</sup>e<sup>3t</sup>a<sup>3</sup>m<sup>3</sup>id<sup>2</sup>(id). Fr., *triacétamide*. A substance, (C<sub>6</sub>H<sub>5</sub>O)<sub>2</sub>N, obtained by heating acetonitril with acetic anhydride. [B. 3, 4, 270 (a. 38).]

**TRIACETIN**, n. Tri<sup>2</sup>a<sup>3</sup>se<sup>3</sup>e<sup>3t</sup>i<sup>2n</sup>. Fr., *triacétine*. Ger., *T. 1*. An oily liquid, C<sub>6</sub>H<sub>5</sub>(C<sub>2</sub>H<sub>5</sub>O)<sub>2</sub>, found in the oil of *Euonymus europæus*, in cod-liver oil, and in some of the fats, and obtainable from a mixture of glycerin and glacial acetic acid. It has a slightly bitter and pungent taste. 2. A rather thick liquid, C<sub>6</sub>H<sub>7</sub>(C<sub>2</sub>H<sub>5</sub>O)<sub>2</sub>, obtained by heating butenyl alcohol with acetic anhydride. It has an agreeable odor. [B. 4; B. 3 (a. 38).]

**TRIACETOGLALLIC ACID**, n. Tri<sup>2</sup>a<sup>3</sup>se<sup>3</sup>e<sup>3t</sup>o<sup>3</sup>ga<sup>3</sup>l<sup>2</sup>i<sup>2k</sup>. Ger., *Triacetatgallussäure*. An acid, C<sub>6</sub>H<sub>5</sub>(O.C<sub>2</sub>H<sub>5</sub>O)<sub>2</sub>.COOH, forming colorless acicular crystals. [B. 4.]

**TRIACETONALKAMINE**, n. Tri<sup>2</sup>a<sup>3</sup>se<sup>3</sup>e<sup>3t</sup>o<sup>3</sup>n<sup>3</sup>a<sup>3</sup>l<sup>2</sup>ka<sup>3</sup>m<sup>3</sup>en. A base, C<sub>6</sub>H<sub>11</sub>ON, representing a molecule of triacetoneam to which two atoms of hydrogen have been added. It has an isomeric form, pseudot. [B. 2.]

**TRIACETONAMINE**, **TRIACETONHYDRAMINE**, n's. Tri<sup>2</sup>a<sup>3</sup>se<sup>3</sup>e<sup>3t</sup>o<sup>3</sup>n<sup>3</sup>a<sup>3</sup>m<sup>3</sup>en, -hid<sup>2</sup>ra<sup>3</sup>m<sup>3</sup>en. See under ACETONAMINES.

**TRIACETYL**, n. Tri<sup>2</sup>a<sup>3</sup>se<sup>3</sup>e<sup>3t</sup>i<sup>2l</sup>. The compound C<sub>6</sub>H<sub>5</sub>O. [B.]—**T'asculetin**. A substitution product, C<sub>6</sub>H<sub>5</sub>(C<sub>2</sub>H<sub>5</sub>O)<sub>2</sub>.O<sub>4</sub>, formed by the action of acetic anhydride on asculetin. [B. 2.]—**T'amine**. See TRIACETAMIDE.

**TRIACETYLENE**, n. Tri<sup>2</sup>a<sup>3</sup>se<sup>3</sup>e<sup>3t</sup>i<sup>2l</sup>en. See BENZENE.

**TRIACHENUM** (Lat.), n. n. Tri<sup>2</sup>(tri<sup>2</sup>)a<sup>3</sup>ch<sup>3</sup>(a<sup>3</sup>)ch<sup>3</sup>en<sup>2</sup>(a<sup>3</sup>)e<sup>3n</sup>i<sup>2</sup>u<sup>3</sup>m<sup>3</sup>(u<sup>3</sup>m). From *tres*, three, and *achenium* (q. v.). A fruit resembling a cremocarp except that it is composed of three carpels. [a. 35.]

**TRIACID**, adj. Tri<sup>2</sup>a<sup>3</sup>s<sup>3</sup>i<sup>2d</sup>. Having an acidity of three; of an acid or an acid salt, containing three atoms of replaceable hydrogen; capable of replacing three atoms of hydrogen in an acid.

**TRIAD**, n.  $\text{Tri}/a^2d$ . 1. A combination of three. 2. A trivalent element or radicle. [a. 48.]—**Hutchinson's t.** The conjunction of notched teeth, interstitial keratitis, and otitis; observed in hereditary syphilis. [Ann. méd. et sci. du Nord-Est; "Province Méd.", Oct. 6, 1888, p. 77.]

**TRIADÉLPHOUS**, adj.  $\text{Tri-}a^2d-e^2lf/u^2s$ . Lat., *triadelphus* (from *três*, three, and *ἀδελφός*, a brother). Fr., *triadelphe*. Ger., *dreibruderig*, *triadelphisch*. Having the stamens united by their filaments into three sets. [a. 35.]

**TRIÉNE** (Lat.), n. f.  $\text{Tri}(tri^2)-en/(a^3e^2n)-e(a)$ . Gr., *τρίαῖνα*. A trident, a three-pronged structure, especially a three-pronged sponge-spicule. [a. 48.]

**TRIAKAIDEKAPHOBIA** (Lat.), n. f.  $\text{Tri}(tre)-a^3-ka^3-i^2-de^2k-a^3-fob(fo^2b)/i^2-a^3$ . From *três*, three, *καί*, and *δέκα*, ten, and *φόβος*, fear. A morbid or superstitious dread of the number thirteen. [a. 34.]

**TRIAKALAMIDE**, n.  $\text{Tri-}a^2l-ka^3l/a^2m-i^2d(id)$ . See under **ALKALAMIDE**.

**TRIAKYL**, n.  $\text{Tri-}a^2l/ki^2l$ . Ger., *T*. A triple molecule of an alkyl; a compound consisting of 3 alkyl molecules united together. [B. 4.]

**TRIAKYLAMINE**, n.  $\text{Tri-}a^2l-ki^2l/a^2m-i^2n$ . Ger., *Triakylamin*. See under **ALKYLAMINE**.

**TRIAKYLIC**, adj.  $\text{Tri-}a^2l-ki^2l/i^2k$ . Pertaining to a trialkyl; containing 3 molecules of an alkyl. [B. 4.]

**TRIALLYLAMINE**, n.  $\text{Tri-}a^2l-i^2l/a^2m-en$ . The compound  $(C_3H_5)_3N$ . [B. 3 (a. 38).]

**TRIALLYLIN**, n.  $\text{Tri-}a^2l/i^2l-i^2n$ . Oxide of allyl and glyceryl,  $C_{12}H_{20}O_3 = \frac{C_3H_5}{(C_3H_5)_2} \cdot O_3$ . [B. 2.]

**TRIAMIDAZOBENZENE**, n.  $\text{Tri-}a^2m/i^2d-o-a^2z-o-be^2nz/-en$ . A substance,  $C_{12}H_{13}N_5 = (NH_2)_2C_6H_3-N : N-C_6H_4(NH_2)$ , constituting the dye known as Bismarck-brown, occurring as tabular crystals. [B. 3 (a. 88); B. 4.]—**T. hydrochloride**. Manchester-brown, vesuvium; a dyestuff,  $C_{12}H_{13}N_5(ClH)$ , occurring as a brown crystalline mass. [B. 3 (a. 88).]

**TRIAMIDOBENZENE**, n.  $\text{Tri-}a^2m/i^2d-o-be^2nz/-en$ . A substance,  $C_6H_3(NH_2)_3$ , known in two isomeric forms:  $\alpha$ -t.,  $C_6(NH_2)_3$ , occurring as a red or brown crystalline mass; and  $\beta$ -t.,  $C_6(NH_2)_3$ , occurring as a red or brown crystalline mass turning red in the air. [B. 3 (a. 38).]

**TRIAMIDOBENZOIC ACID**, n.  $\text{Tri-}a^2m/i^2d-o-be^2nz-o/i^2k$ . A monobasic crystalline acid,  $C_8H_5(NH_2)_3CO_2H$ , produced by the action of reducing agents on dinitramidobenzoic acid. [B. 2.]

**TRIAMIDOPHENOL**, n.  $\text{Tri-}a^2m-i^2d-o-fe^2n/o^2l$ . Fr., *triamidophénol*. Ger., *T*. A very unstable triacid base,  $C_6H_3(NH_2)_3OH$ . [B. 3 (a. 38); B. 4.]—**T. hydrochloride**. A substance,  $C_6H_3(NH_2)_3 \cdot OH \cdot 3HCl = C_6H_3N_3Cl_3$ , forming colorless acicular crystals. [B. 4.]

**TRIAMINE**, n.  $\text{Tri-}a^2m/en$ . See under **AMINE**.

**TRIAMMONIC**, adj.  $\text{Tri-}a^2m-mo^2n/i^2k$ . Fr., *triammoniacal*. Containing three molecules of ammonium. [B.]

**TRIAMYLAMINE**, n.  $\text{Tri-}a^2m-i^2l/a^2m-en$ . Tertiary amine of amyl,  $N(C_5H_{11})_3$ . [B.]

**TRIAMYLENE**, n.  $\text{Tri-}a^2m/i^2l-en$ . Fr., *triamylène*. Ger., *Triamylen*. A liquid,  $C_{15}H_{30}$ , of terebinthine odor, a polyamide of the amylene derived from fermentation amyl alcohol. [B. 2, 4.]

**TRIAMYLIN**, n.  $\text{Tri-}a^2m/i^2l-i^2n$ . A substance,  $C_5H_5(C_6H_{11})_2O_2$ , produced by heating amyl alcohol and acrolein with a little acetic acid. [B. 2.]

**TRIAMYLPHOSPHINE**, n.  $\text{Tri-}a^2m-i^2l-fo^2s/en$ . The compound  $(C_5H_{11})_3P$ . [B. 3 (a. 38).]

**TRIAMYLSTIBINE**, n.  $\text{Tri-}a^2m-i^2l-sti^2b/en$ . Ger., *Triamylstibin*. The compound  $Sb(C_5H_{11})_3$ . [B. 3.]

**TRIANDROUS**, adj.  $\text{Tri-}a^2nd/ru^2s$ . Lat., *triandrus*, *triandrus* (from *três*, three, and *άνδρ*, a man). Fr., *triandre*. Ger., *dreimännig*, *triandrisch*. Having three stamens. The *Triandria* (Fr., *triandrie*) are a Linnaean class of plants with t. flowers. [a. 35.]

**TRIANGLE**, n.  $\text{Tri-}a^2n^2-g$ . Gr., *τρίγωνον*. Lat., *trigonum*, *triangulum*, *triangulus* (from *tres*, three, and *angulus*, an angle). Fr., *t*. Ger., *Dreieck*. A three-cornered and three-sided figure, an area or space of three-cornered shape. [a. 48.]—**Anterior t. of the neck**. The space bounded by the middle line of the neck, the anterior border of the sterno-cleido-mastoid, and a line running along the lower border of the inferior maxilla and continued to the mastoid process of the occipital bone. [L.]—**Assézat's t.** A t. bounded by lines uniting the projection of the nasion on the alveolo-condylar plane and the alveolar and nasal points and one uniting the two latter. [a. 34.]—**Cephalic t.** A t. on the antero-posterior plane of the skull formed by lines joining the occiput and forehead and chin, and one uniting the two latter. [Ann. de gynec., Mar., 1892, p. 165 (a. 34).]—**Cervical t.** Ger., *Halsdreieck*. See **TRIGONUM CERVICALE**.—**Facial t.** A t. bounded by lines uniting the nasion and the alveolar and nasal points and one uniting the two latter. [a. 34.]—**Frontal t.** A t. bounded by the maximum frontal diameter and lines joining its extremities and the glabella. [a. 34.]—**Hesselbach's t.** The space on the posterior surface of the anterior wall of the abdomen bounded by Poupart's ligament, the epigastric artery, and the margin of the rectus abdominis. [L.]—**Inferior carotid t.** Lat., *trigonum caroticum inferius*. The space bounded by the middle line of the neck, the anterior border of the sterno-cleido-mastoid, and the inferior belly of the omohyoid. [L.]—**Inferior occipital t.** Of Welcker, a t. having the bimastoid diameter for its base and theinion for its apex. [a. 34.]—**Inguinal t.** See *Scarpa's t.*—**Lumbo-costo-abdominal t.** The space bounded in front by the obliquus abdominis externus, above by the lower

border of the serratus posticus inferior and the point of the twelfth rib, behind by the outer edge of the erector spinae, and below by the obliquus abdominis internus. [Ctbl. f. Chir., Sept. 15, 1888, p. 686 (L.).]—**Mento-condylar t.** Of A. v. Török, a t. having its base extending between the condyles of the inferior maxilla and its apex at the gnathion. —**Mento-gonial t.** Of T. v. Török, a t. having the bigonial diameter as its base and the gnathion as the apex. [a. 34.]—**Mento-mastoid t.** Of A. v. Török, a t. having the bimastoid diameter as its base and the gnathion as its apex. [a. 34.]—**Mylo-hyoid t.** The triangular space formed by the mylo-hyoid muscle and the two bellies of the digastric muscle. [a. 34.]—**Occipital t. of the neck**. The space bounded by the sterno-cleido-mastoid, the trapezius, and the omohyoid. [L.]—**Omo-clavicular t.** See *Subclavian t.*—**Omo-hyoid t.** See *Superior carotid t.*—**Palatal t.** Lat., *trigonum palatinum*. Ger., *Gaumendreieck*. Of A. v. Török, a t. having the width of the palate for its base and the alveolar point for its apex. [a. 34.]—**Petit's t.** See **TRIANGULUS PETITI**.—**Posterior cervical t.** **Posterior t. of the neck**. See *Superior carotid t.*—**Pubo-urethral t.** A triangular space in the perineum bounded by the ischio-cavernosus muscle externally, the bulbo-cavernosus muscle internally, and the transversus perinei muscle posteriorly. [a. 34.]—**Scarpa's t.** A t. with its apex below, bounded by Poupart's ligament, the adductor longus, and the sartorius. [L.]—**Subclavian t.** A space bounded by the posterior belly of the omohyoid, the upper border of the clavicle, and the posterior margin of the sterno-cleido-mastoid. [L.]—**Submaxillary t.** The space between the lower border of the inferior maxilla, the parotid gland, and the mastoid process of the temporal bone above, the posterior belly of the digastric and the stylohyoid below, and the middle line of the neck in front. [L.]—**Superior carotid t.** Lat., *trigonum caroticum superius*. Ger., *oberes Halsdreieck*. The space bounded by the sterno-cleido-mastoid, the posterior belly of the digastric, and the anterior belly of the omohyoid. [L.]—**Superior occipital t.** Of Welcker, a t. having the biparietal diameter for its base and theinion for its apex. [a. 34.]—**Superior t. of the neck**. See *Superior carotid t.*—**T. de lumière** (Fr.), **T. lumineux** (Fr.). See *Light spot on the membrana tympani*.—**T. médullaire** (Fr.). See *Fornix cerebri*.—**T. omo-trachéal** (Fr.). See *Inferior carotid t.*—**Upper cervical t.** See *Superior carotid t.*

**TRIANGULAIRE** (Fr.), adj.  $\text{Tre-}a^2n^2-gu^2-la^2r$ . See **TRIANGULAR**: as a n., see **TRIANGULARIS**.—**T. des lèvres**. See **RISORIS** and **DEPRESSOR anguli oris**.—**T. du coccyx**. See **COCCYGEUS** (2d def.).—**T. du nez**. See **COMPRESSOR naris**.—**T. du menton**. See **DEPRESSOR anguli oris**.—**T. interne**. See **CORRUGATOR labii inferioris**.

**TRIANGULAR**, adj.  $\text{Tri-}a^2n^2-g/u^2l-a^2r$ . Gr., *τρίγωνος*. Lat., *triangularis*, *triangulatus*. Fr., *triangulaire*, *triangulé*. Ger., *dreieckig*, *dreikantig*, *dreieitig*. Having three angles; having a three-cornered shape. [a. 35, 48.]

**TRIANGULARE** (Lat.), n. n.  $\text{Tri}(tri^2)-a^2n^2-g(a^2n^2-g)-u^2l(u^4l)-ar(a^2r)/e(a)$ . Gen., *ar'is*. See **Pyramidal bone**.

**TRIANGULARIS** (Lat.), adj.  $\text{Tri}(tri^2)-a^2n^2-g(a^2n^2-g)-u^2l(u^4l)-ar(a^2r)/is$ . See **TRIANGULAR**: as a n. m., see **DEPRESSOR anguli oris**.—**T. cerebri**. See **FORNIX cerebri**.—**T. coccygis**. See **COCCYGEUS** (2d def.).—**T. inferior**. See **DEPRESSOR anguli oris**.—**T. labii superioris**. See **LEVATOR anguli oris**.—**T. menti**. See **T. n.**—**T. nasi**. See **COMPRESSOR naris**.—**T. oris**. See **T. n.**—**T. sterni**. Ger., *dreieckiger* (oder *innerer*) *Brustmuskel*. A thin, flat muscle arising by fleshy digitations from the inner surfaces of the cartilages of the second to the sixth ribs, and inserted into the posterior surface of the sternum, its xiphoid process, and the cartilages of the lower one or two true ribs. [L. 31, 142, 332.]

**TRIANGULUS** (Lat.), n. m.  $\text{Tri}(tri^2)-a^2n^2-g(a^2n^2-g)-u^2l(u^4l)-u^2s-(n^4s)$ . See **TRIANGLE**.—**T. inguinalis**. See *Scarpa's triangle*.—**T. Petitii**. A triangular space between the anterior border of the latissimus dorsi, the posterior border of the obliquus abdominis externus, and the crest of the ilium. [a. 17.]—**T. subinguinalis**. See *Scarpa's triangle*.

**TRIANILÆSCULETIN**, n.  $\text{Tri-}a^2n-i^2l-e^2s-ku^2le^2t-i^2n$ . A 3-molecule aniline substitution compound,  $C_6H_5O(C_6H_5N)_3$ , of resacetin. [B. 2.]

**TRIANSOPERMA** (Lat.), n. f.  $\text{Tri}(tri^2)-a^2n(a^2n)-o(o^3)-spu^2rm-(spe^2rm)/a^2s$ . See **ABOBORA** (2d def.).—**T. ficifolia**. See **BRONYA ficifolia**.

**TRIANTHEMA** (Lat.), n. f.  $\text{Tri}(tri^2)-a^2nth(a^2nth)-em(am)/a^2s$ . From *três*, three, and *άνθος*, a flower. Fr., *trianthème*. Ger., *Dreiblume*. A genus of the *Azoidae*. [a. 35.]—**T. decandra**. A common weed in India. The root is used in hepatitis and asthma, and its bark as an aperient. [a. 35.]—**T. monogyna**. Fr., *trianthème à un seul pistil*. Ger., *portulakblütige Dreiblume*. Horse-purslane; a West Indian and tropical South American species. The entire plant has an unpleasant bitter taste, and is used as a stimulant to the mucous membranes and in disturbances of digestion and respiration. [a. 35.]—**T. obcordata**. A plant official in the Ph. of India, used as an astringent. The nauseous roots are cathartic. The herb is eaten, but is said to produce diarrhea and paralysis. [a. 35.]

**TRIANTHOUS**, adj.  $\text{Tri-}a^2nth/u^2s$ . Three-flowered. [a. 35.]

**TRIARACHIN**, n.  $\text{Tri-}a^2r/a^2k-i^2n$ . A substitution compound,  $C_5H_5(C_{20}H_{35}O_3)_2$ , of glycerin. [B. 2.]

**TRIARSENATE**, n.  $\text{Tri-}a^2rs/e^2n-at$ . See under **ARSENATE**.

**TRIATHLODYME** (Fr.), n.  $\text{Tre-}a^2l-lo-dem$ . A monster similar to an atlodidymus, but having three heads. [a. 48.]

**TRIATOMIC**, adj.  $\text{Tri-}a^2l-e^2m/i^2k$ . Lat., *triatomicus* (from *três*, three, and *άτομος*, an atom). Fr., *triatomique*. Ger., *dreitödig*. 1. Of molecules of elementary bodies, containing three atoms. 2. Of compounds, containing three atoms of replaceable hydrogen. 3. Of radicles, having a combining capacity that is saturated by union with three hydrogen atoms. [B.]

**TRIBADE** (Fr.), n. Tre-ba'd. See TRIBAS.

**TRIBADISM**, n. Tri'ba'd-i-z'm. Lat. *tribadismus* (from *tribās* [see TRIBAS]). Fr., *tribadisme*. Ger., *Tribadie*, *Tribadismus*. Unnatural sexual indulgence between two women, in which an abnormally large clitoris takes the part of a penis. [D.]

**TRIBARYTIC**, adj. Tri-ba'r-i'ti'k. Containing three atoms of barium. [B.]

**TRIBAS** (Lat.), n. f. Trib(treb)/a's(a's). Gen., *trib'ados* (-adis). Gr., *τρίβας* (from *τρίβειν*, to rub). Fr., *tribade*. A woman who practises tribadism.

**TRIBASIC**, adj. Tri-bas'i'k. Fr., *tribasique*. Ger., *dreibasisch*. 1. Of acids and alcohols, containing in the molecule three atoms of hydrogen replaceable by bases. See T. acid and Tri-atomic alcohol. As regards alcohols, the term is superseded by trihydric. 2. Of salts, formed from a t. acid by the replacement of three atoms of hydrogen by bases. [a, 38.]

**TRIBE**, n. Trib. Lat., *tribus*. Fr., *tribu*. Ger., *Gruppe*. In botany, a division of an order (or suborder); a group superior to a genus and subordinate to a family. [a, 35.]

**TRIBENZOYCIN**, n. Tri-be'nz-o'i'z-i'n. Fr., *tribenzoycine*, *tribenzoïcine*. A glyceride of benzoic acid,  $C_2H_5O_6 = C_5H_5(C_6H_5COO)_3$ . [B, 93 (a, 14).]

**TRIBROMACETIC ACID**, n. Tri-brom-a's-et(e't)/i'k. A monobasic acid,  $C_3Br_3HO_2 = CBr_2 - CO.OH$ , derived from acetic acid, forming transparent prismatic crystals. [B, 3 (a, 38); B, 4.]

**TRIBROMACETOXYL**, **TRIBROMACETYL**, n's. Tri-brom-a's-e't-o'x'i'l, -a's'e't-i'l. Ger., *Tribromacetoxy*. A radicle,  $CB_2CO = C_2Br_2O$ , derived from acetyl (acetoxy). [B, 4.]

**TRIBROMALDEHYDE**, n. Tri-brom-a'l'de'hid. Ger., *Tribromaldehyd*. See BROMAL.

**TRIBROMAMIDOBENZENE**, **TRIBROMANILINE**, n's. Tri-brom-a'm-i'd-o-be'nz'en, -a'n'i'l-i'n. A substitution compound of aniline,  $C_6H_3Br_3NH_2$ . Two isomeric varieties are known, both forming crystalline solids. [B, 4.]

**TRIBROMBENZENE**, n. Tri-brom-be'nz'en. Ger., *Tribrombenzol*. A triatomic bromine substitution-product of benzene,  $C_6H_3Br_3$ . There are three isomeric modifications, all crystalline. [B, 4.]

**TRIBROMETHYLENE**, n. Tri-brom-e'th'i'l-en. Ger., *Tribromäthylen*. See ETHYNYL tribromide.—T. dibromide. See ETHYNYL pentabromide.

**TRIBROMHYDRIN**, n. Tri-brom-hid'i'ri'n. Fr., *tribromhydrine*. Ger., T. A body,  $C_3H_5Br_3 = CH_2Br - CH_2Br - CH_2Br$ , isomeric with brompropylene dibromide. [B, 3 (a, 38); B, 4.]

**TRIBROMHYDROQUINONE**, n. Tri-brom-hid-ro-kwi'n'on. A substitution-product,  $C_6HBr_3(OH)_2$ , of hydroquinone. [B, 4.]

**TRIBROMIDE**, n. Tri-brom'i'd(d). Fr., *tribromure*. Ger., *Tribromür*. A bromine compound analogous to a trichloride (q. v.). [B.]

**TRIBROMORCIN**, **TRIBROMORCINOL**, n's. Tri-brom-o'rs'i'n, -o'rs'i'n-o'l. Fr., *tribromorcine*. Ger., T. The compound  $C_7H_3Br_3(OH)_2$ . [B, 3 (a, 38); B, 4.]

**TRIBROMOXALIN**, n. Tri-brom-o'x'a'l-i'n. An acid,  $C_8Br_3N(NH)$ ; the only acid, except hydrocyanic acid, which contains carbon without either sulphur or oxygen. [B, 3 (a, 38).]

**TRIBROMPHENOL**, n. Tri-brom-fe'n'o'l. Ger., T. The compound  $C_6H_2Br_3(OH)$ . [B, 3 (a, 38); B, 4.]

**TRIBROMSALICYLIC ACID**, n. Tri-brom-sa'l-i's-i'l'i'k. The compound  $C_7H_2Br_3O_2$ . [B.]

**TRIBROMTOLUENE**, n. Tri-brom-to'l-u'e'n. Ger., *Tribromtoluol*. A substitution compound,  $C_6H_2Br_3CH_3$ , of toluene, of which six isomeric varieties are known, all crystalline solids. [B, 3 (a, 38); B, 4.]

**TRIBULUS** (Lat.), n. m. Tri'b'u'l(i'u'l)-u's(u's). Gr., *τρίβυλος*. Fr., *herse*, *tribule*. Ger., *Burzelborn*. Caltrop; a genus of the Zygophyllaceae. The *Tribulex* are a subdivision of the Zygophyllaceae. [a, 35.]—T. *cistoides*. Fr., *herse cistöide*. Turkey-blossom; a West Indian species. The roots are used as an aperient, and the bruised leaves as a maturant. [B, 35.]—T. *lanuginosus*. An East Indian species. The leaves and root are used as a diuretic, the seeds in gonorrhoea and dropsy, and the herb as an astringent and anthelmintic. [a, 35.]—T. *maximus*. Ger., *grosser Burzelborn*. A West Indian species. The root is used in laxative ptisans, and the leaves in emollient poultices or in salves in skin diseases. [a, 35.]—T. *terrestris*. Fr., *herse (hérissé)*, *croix de chevalier* (ou de Malte), *herbe (ou saligot, ou tribule) terrestre*, *tribule commun*. Ger., *gemeiner Burzelborn*, *Erdstachelnuss*. Land-caltrops, the *tribulos* of Dioscorides; found in southern Europe, Asia Minor, and northern Africa. It was formerly used as an astringent tonic in dysentery, hæmorrhages, etc. [a, 35.]

**TRIBUTUM** (Lat.), n. n. Tri'b'u-t(u't)/u's(u'm). From *tribuere*, to render. A tribute.—T. *lunare*. See MENSTRUATION.

**TRIBUTYLAMINE**, n. Tri-bu't-i'l'i'a'm-en. Fr., t. Ger., *Tributylamin*. An oily liquid,  $N(C_4H_9)_3$ , boiling at 208° C. [B.]

**TRIBUTYRIN**, n. Tri-bu't'i'r-i'n. Fr., *tributyryne*. Ger., T. A substance,  $C_9H_{16}(C_4H_7O_2)_3$ , forming one of the constituents of butter, and occurring as a liquid of sharp and bitter taste. [B, 3 (a, 38); B, 4.]

**TRICE** (Lat.), n. f. pl. Tris(trek)/e(a'e-a'). From *tri*, hair. See PLICA (2d def.).

**TRICAPHIN**, **TRICAPRININ**, n's. Tri-ka'p'i'ri'n, -ri'n-i'n. See under GLYCERYL caprate.

**TRICAPROIN**, **TRICAPRONIN**, n's. Tri-ka'p'ro-i'n, -ka'p'i'-ron-i'n. Ger., T. See under GLYCERYL caproate.

**TRICAPRYLIN**, n. Tri-ka'p-ri'i'l-i'n. See under GLYCERYL caprylate.

**TRICARBON**, n. Tri-ka'rb'o'n. A radicle composed of three atoms of carbon. [B.]

**TRICARPELLARY**, adj. Tri-ka'rp'e'l-a-ri'. Lat., *tricarpellaris*. Having three carpels. [a, 35.]

**TRICARPOUS**, adj. Tri-ka'rp'u's. Lat., *tricarplus* (from *tri*, three, and *καρπός*, fruit). Composed of three united fruits. [a, 35.]

**TRICAUDALIS** (Lat.), n. m. Tri(tri'i)-ka'd(ka'u'd)-al(a'l)/i's. From *tres*, three, and *cauda*, the tail. See RETRAHENS aurem.

**TRICEPHALOUS**, adj. Tri-se'f'a'l-u's. Lat., *tricephalus* (from *tri*, three, and *κεφαλή*, the head). Fr., *tricéphale*. Ger., *dreiköpfig*. Having three heads; of a fruit, having three beaks. [a, 35.] The *Tricephalus* (Fr., *tricéphale*; Ger., *Dreikopf*) of Veit is that form of double monster in which there is only one body below the umbilicus, two chests and necks with separate lungs, hearts, and tracheæ, but three heads with three distinct larynges. [L, 49 (a, 14).]

**TRICEPS** (Lat.), adj. Tri(tri'i)/se'ps(ke'ps). Gen., *tricip'itis*. From *tres*, three, and *caput*, the head. Fr., t. Three-headed; as a n. m., a muscle that has three heads. [a, 48.]—T. *aureus*. See RETRAHENS aurem.—T. *biceps brachii*. A muscle in solipeds formed by the union of the scapulo-olecranius, scapulo-olecranius major, humero-olecranius internus, and humero-olecranius externus. [L.]—T. *brachialis* (Cuvier), T. *brachii*. Fr., t. *brachial*. See T. *EXTENSOR cubiti*.—T. *cruris*. 1. See *EXTENSOR cruris quadriceps*. 2. In solipeds, the rectus, vastus internus, and vastus externus muscles regarded as one. [L.]—T. *femoris*. Fr., t. *fémoral*. See *EXTENSOR cruris quadriceps*.—T. *magnus*. See *ADDUCTOR femoris magnus*.—T. *minor*, T. *primus*. See *ADDUCTOR femoris longus*.—T. *secundus*. See *ADDUCTOR femoris brevis*.—T. *saræ*. The combined gastrocnemius and soleus muscles. [L, 31.]

**TRICERASTES** (Lat.), n. f. Tri(tri'i)-se'r(ke'r)-a'st(a'st)/ez(as). Fr., *triceraste*. The genus *Datisca*. [a, 35.]—T. *glomerata*. Durango plant; a California species; a stomachic and cardiac stimulant. ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 608 (a, 14).]

**TRICHADENIA** (Lat.), n. f. Tri'k(tri'ch)-a'd(a'd)-en(an)/i'a-a'. From *tri*, a hair, and *ἀδην*, a gland. A genus of the *Bixineæ*. [a, 35.]—T. *zeylanica*. The *tettigaha* of Ceylon; a large tree the seeds of which yield an oil used for burning and in the skin diseases of children. [a, 35.]

**TRICHAMOMILLOL**, n. Tri-ka'm-o-mi'l'o'l. A deep-blue, viscid substance,  $C_{30}H_{48}O_3$ , of slight odor. It is one of the constituents of oil of chamomile, ethereal oil of wormwood, oil of picurium beans, and the oil obtained from galbanum by dry distillation. [B, 3 (a, 38).]

**TRICHANGIECTASIA** (Lat.), n. f. Tri'k(tri'ch)-a'z(a'z)-en(an)/i'a-a'. From *tri*, a hair, and *ἀγγειον*, a vessel, and *ἐκτασις*, extension. See TELANGIECTASIS.

**TRICHANGIUM** (Lat.), n. n. Tri'k(tri'ch)-a'z(a'z)-en(an)/i'a-a'. From *tri*, a hair, and *ἀγγειον*, a vessel. See CAPILLARY (3d def.).

**TRICHASMUUS** (Lat.), n. m. Tri'k(tri'ch)-a'z(a'z)-mu's(mu's). From *tri*, a hair. See HYPERTRICHOSIS.

**TRICHATROPHIA** (Lat.), n. f. Tri'k(tri'ch)-a't(a't)-ro(ro')/fi'a-a'. From *tri*, a hair, and *ἀτροφία*, atrophy. Atrophy of the hair. [a, 34.]

**TRICHAUXE** (Lat.), **TRICHAUXIS** (Lat.), n. f. Tri'k(tri'ch)-a'x(x)/e(a), -i's. Gen., *-aux'es*, *-aux'eos* (-is). From *tri*, a hair, and *αἰξ*, growth. See HYPERTRICHOSIS.

**TRICHIA** (Lat.), n. f. Tri'k(tri'ch)-i'a-a'. From *tri*, a hair. 1. An old term for entropion. [F.] 2. See TRICHIASIS.

**TRICHIASIS** (Lat.), n. f. Tri'k(tri'ch)-i'a-a'(-a's)/si's. Gen., *-as'eos* (-is). Gr., *τρίχιασις* (from *tri*, a hair). Fr., t. Ger., T. *trichiasis*. Sp., *triquiasis*. 1. See TRICHOSIS. 2. That condition of the eyelids in which, owing to long-continued marginal blepharitis or to chronic trachoma, some of the eyelashes are inverted and rub over and irritate the eyeball. It is frequently complicated by spasm of the orbicularis muscle. T. passes into entropion by imperceptible degrees. [F.] 3. Of Hippocrates, a voiding of hair with the urine. 4. An abscess of the mamma. [L, 50 (a, 14).]—T. *caruncule*. The development of long, stout hairs in the caruncle of the inner canthus of the eye. [F.]—T. *of the anus*. Inversion of the hairs which grow about the anus. [D.]

**TRICHILIA** (Lat.), n. f. Tri'k-tri'l(i'ch'e'l)/i'a-a'. From *τρίχελος*, three-lipped. Fr., *trichilie*. A genus of tropical African and American trees. The *Trichilieæ* are a tribe of the *Meliaceæ*. [a, 35.]—T. *cathartica*. A Brazilian tree. The bark is purgative and emetic and is used in dropsy. [a, 35.]—T. *emetica*. The roka-tree of Arabia. The bark and fruits are emetic; a decoction of the fruits is used as a hair-wash, and an ointment made from the seeds is used in itch. [a, 35.]—T. *havanensis*. A Cuban and Mexican species with a purgative bark. [a, 35.]—T. *moschata*. Muskwood; a Jamaica species; according to Hancock, found also in Guiana, and a source of jurubali-bark. [a, 35.]—T. *trifoliata*. A West Indian and South American shrub, all parts of which have an offensive odor. The bark, which is a drastic purgative and uterine stimulant, is used in amenorrhoea, intestinal catarrh, and asthma, and as an abortifacient. [a, 35.]

**TRICHINA** (Lat.), n. f. Tri'k(tri'ch)-in(en)/a-a'. From *tri*, a hair. Fr., *trichine*. Ger., *Haarwurm*, *Trichine*. A genus of parasitic worms, of the *Nematodea*. [a, 48.]—T. *cystica*. See *FILARIA medinensis*.—T. *spiralis*. Fr., *trichine*. Ger., *Trichine*. A small viviparous species from  $\frac{1}{16}$  to  $\frac{1}{8}$  inch in length (the female

being somewhat the larger), having a pointed, narrow, and unarmed head with a small oral aperture. The larvæ are very tenacious of life, having been kept alive for a month. They present the form of spirally coiled worms, in the interior of small globular or oval cysts, about  $\frac{1}{16}$  inch long, and are usually found in the voluntary muscles. In some cases they are found free. The flesh containing the larvæ having been eaten, they are set free during digestion and attain maturity rapidly, sometimes within forty-eight hours, and after a week the young are discharged from the uterus of the female, and, piercing the intestines, burrow into the tissues, producing trichiniasis. [L.]

**TRICHINATOUS**, adj. Tri<sup>2</sup>-ki<sup>2</sup>n'a<sup>3</sup>t-u<sup>3</sup>s. See TRICHINOSIS.

**TRICHINIASIS** (Lat.), n. f. Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-i<sup>2</sup>n(en)-i<sup>2</sup>-a(a<sup>3</sup>)si<sup>3</sup>s. Gen., -as'eos (-i'asis). From *trichina* (q. v.). The disease produced by the entrance of trichinæ into the organism. The initial symptoms are those of gastro-intestinal disturbance (a sense of pressure in the epigastrium, nausea, and vomiting), followed usually by violent diarrhoea, followed in a week or two by excessive pain and soreness of the muscles to which the trichinæ may have gained access. [A, 446.]

**TRICHINOPHOBIST**, n. Tri<sup>2</sup>k-i<sup>2</sup>n-o<sup>2</sup>f'o<sup>2</sup>a<sup>3</sup>b-i<sup>2</sup>st. From *trichina* (q. v.), and φοβίς, to fear. One who has a morbid dread of trichiniasis in himself or in others. [Shoemaker, "N. Y. Med. Jour.," May 10, 1884, p. 528 (D.).]

**TRICHINOSIS** (Lat.), n. f. Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-i<sup>2</sup>n(en)-os'i<sup>2</sup>ts. Gen., -os'eos (-is). See TRICHINIASIS.

**TRICHINOUS**, adj. Tri<sup>2</sup>k-in'u<sup>3</sup>s. Infested with trichinæ, due to the presence of trichinæ.

**TRICHIOSIS** (Lat.), n. f. Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-i<sup>2</sup>-os'i<sup>2</sup>ts. Gen., -os'eos (-is). From θρίξ, a hair. See TRICHOSIS and TRICHIASIS (2d def.).—**T. distrix**. See DISTRIX and cf. FRAGILITAS crinium and TRICHORRHESIS nodosa.

**TRICHISMUS** (Lat.), n. m. Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-i<sup>2</sup>z'i<sup>2</sup>s/mu<sup>3</sup>s(mu<sup>3</sup>s). Gr., τριχισμός (from θρίξ, a hair). Fr., trichisme. Ger., Haarspalt, Haarbruch. See LINEAR FRACTURE.

**TRICHTIS** (Lat.), n. f. Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-i<sup>2</sup>e(i)<sup>2</sup>ts. Gen., -it'idos (-idis). From θρίξ, a hair. Ger., Haarentzündung. Inflammation of the hair. [A, 34.]

**TRICHLORACETAL**, n. Tri-klor-a<sup>2</sup>s'e<sup>2</sup>t-l. A colorless liquid, CCl<sub>3</sub>-CH(O.C<sub>2</sub>H<sub>5</sub>)<sub>2</sub>, formed by the action of chlorine on alcohol. An isomeric variety, CHCl<sub>2</sub>.CCl(O.C<sub>2</sub>H<sub>5</sub>)<sub>2</sub>, is a crystalline solid obtained by the action of alcohol on tetrachlorethyl oxide. [B, 2.]

**TRICHLORACETAMIDE**, n. Tri-klor-a<sup>2</sup>s'e<sup>2</sup>t-a<sup>2</sup>m-i<sup>2</sup>d(id). A body, CCl<sub>3</sub>.CO(NH<sub>2</sub>) = C<sub>2</sub>Cl<sub>5</sub>H<sub>2</sub>NO, forming shiny laminar or prismatic crystals, of sweetish taste and aromatic odor. [B, 3 (a, 38); B, 4.]

**TRICHLORACETIC**, adj. Tri-klor-a<sup>2</sup>s'e<sup>2</sup>t'i<sup>2</sup>k. Acetic and containing three substituted atoms of chlorine. [B.]—**T. acid**. A monobasic acid, CCl<sub>3</sub>.COOH = C<sub>2</sub>Cl<sub>3</sub>HO<sub>2</sub>, forming colorless rhomboedral crystals. Used as a caustic. [B, 4 (a, 38).]—**T. phosphide**. A colorless substance, C<sub>2</sub>Cl<sub>3</sub>(O.PH<sub>2</sub>) = CCl<sub>3</sub>-CO.PH<sub>2</sub>, analogous in structure to trichloroacetamide. [B, 2.]

**TRICHLORACETONITRIL**, n. Tri-klor-a<sup>2</sup>s'e<sup>2</sup>t-o-nit'ri<sup>2</sup>l. An oily liquid, C<sub>2</sub>Cl<sub>3</sub>.N = CCl<sub>3</sub>.CN, of penetrating odor. [B, 4.]

**TRICHLORACETOPHOSPHAMIDE**, n. Tri-klor-a<sup>2</sup>s'e<sup>2</sup>t-o-f'o<sup>2</sup>s'a<sup>2</sup>m-i<sup>2</sup>d(id). See TRICHLORACETIC phosphide.

**TRICHLORACETYL**, n. Tri-klor-a<sup>2</sup>s'e<sup>2</sup>t-i<sup>2</sup>l. Syn.: *trichloroacetyl*. A radicle, CCl<sub>3</sub>.CO' = C<sub>2</sub>Cl<sub>3</sub>O'.—**T. bromide**. A yellowish fuming liquid, C<sub>2</sub>Cl<sub>3</sub>O.Br. [B, 4 (a, 38).]—**T. carbamide**. See *T. urea*.—**T. chloride**. An oily liquid, CCl<sub>3</sub>.COCl = C<sub>2</sub>Cl<sub>3</sub>O, of powerful odor. [B, 4.]—**T. hydrate**. Trichloroacetic acid. [B.]—**T. hydride**. See CHLORAL.—**T. nitride**. See TRICHLORACETAMIDE.—**T. phosphide**. See TRICHLORACETIC phosphide.—**T. urea**. A substance, CCl<sub>3</sub>.CO = NH.CO.NH<sub>2</sub> = C<sub>2</sub>H<sub>3</sub>Cl<sub>3</sub>N<sub>2</sub>O<sub>2</sub>, formed by the substitution of t. for hydrogen in urea. [B, 2.]

**TRICHLORACETYPHIDE**, n. Tri-klor-a<sup>2</sup>s'e<sup>2</sup>t-i<sup>2</sup>f-i<sup>2</sup>d(id). See TRICHLORACETIC phosphide.

**TRICHLORALDEHYDE**, n. Tri-klor-a<sup>2</sup>l'd'e<sup>3</sup>-h'id. See CHLORAL.

**TRICHLORANILINE**, n. Tri-klor-a<sup>2</sup>n'i<sup>2</sup>-en. A substitution product of aniline, C<sub>6</sub>H<sub>3</sub>Cl<sub>3</sub>NH<sub>2</sub>. Three isomeric crystalline varieties are known. [B, 3 (a, 38); B, 4.]

**TRICHLORBENZENE**, n. Tri-klor-be<sup>2</sup>nz'en. A substitution product of benzene, C<sub>6</sub>H<sub>3</sub>Cl<sub>3</sub>. There are three isomeric modifications, all crystalline substances, differing in appearance and in their fusing points. [B, 4.]

**TRICHLORBENZOIC ACID**, n. Tri-klor-be<sup>2</sup>nz-o'i<sup>2</sup>k. A crystalline acid, C<sub>6</sub>H<sub>3</sub>Cl<sub>3</sub>.CO.OH, known in three isomeric forms. [B, 3 (a, 38).]

**TRICHLORBENZOIC ALDEHYDE**, n. Tri-klor-be<sup>2</sup>nz-o'i<sup>2</sup>k. A solid substance, C<sub>6</sub>H<sub>3</sub>Cl<sub>3</sub>.CHO, known in two isomeric forms. [B, 3 (a, 38); B, 4.]

TRICHINA SPIRALIS.  
[A, 327.]

**TRICHLORBUTIDENE**, **TRICHLORBUTYLIDENE**, n's. Tri-klor-bu<sup>2</sup>t'i<sup>2</sup>d-en, -bu<sup>2</sup>t-i<sup>2</sup>l'i<sup>2</sup>d-en. A bivalent radicle, C<sub>4</sub>H<sub>5</sub>Cl<sub>3</sub>. [B, 3.]—**T. alcohol**. **T. glycol**. See BUTYLCHLORAL hydrate.—**T. oxide**. See BUTYLCHLORAL.

**TRICHLORBUTYRIC ACID**, n. Tri-klor-bu<sup>2</sup>t-i<sup>2</sup>r'i<sup>2</sup>k. A monobasic crystalline acid, C<sub>4</sub>H<sub>3</sub>Cl<sub>3</sub>O<sub>2</sub> = CH<sub>2</sub>.CHCl.CCl<sub>2</sub>.CO.OH, occurring as acicular crystals. [B, 3.]

**TRICHLORCROTONIC ACID**, n. Tri-klor-kro-to<sup>2</sup>n'i<sup>2</sup>k. A monobasic crystalline acid, C<sub>4</sub>H<sub>3</sub>Cl<sub>3</sub>O<sub>2</sub>. [B, 4, 158.]

**TRICHLORETHANE**, n. Tri-klor-e<sup>2</sup>th'an. Fr., *trichloréthane*. Ger., *Trichloräthan*. Acetyl trichloride; a colorless liquid, C<sub>2</sub>H<sub>3</sub>Cl<sub>3</sub>, of an odor like that of chloroform. [B, 3 (a, 38); B, 4.]

**TRICHLORETHYL**, n. Tri-klor-eth'u<sup>3</sup>r. The compound C<sub>2</sub>H<sub>3</sub>Cl<sub>3</sub>O = CHCl<sub>2</sub>.CHCl.O.C<sub>2</sub>H<sub>5</sub>. [B, 4 (a, 38).]

**TRICHLORETHIDENE**, n. Tri-klor-e<sup>2</sup>th'i<sup>2</sup>d-en. Fr., *trichloréthidène*. Ger., *Trichloräthiden*. See TRICHLORETHYLIDENE.

**TRICHLORETHYL**, n. Tri-klor-e<sup>2</sup>th'i<sup>2</sup>l. The chemical group C<sub>2</sub>H<sub>3</sub>Cl<sub>3</sub>. [a, 38.]

**TRICHLORETHYLENE**, n. Tri-klor-e<sup>2</sup>th'i<sup>2</sup>l-en. See ETHINYL trichloride.—**T. dichloride**. See ETHINYL pentachloride.

**TRICHLORETHYLIDENE**, n. Tri-klor-e<sup>2</sup>th'i<sup>2</sup>l'i<sup>2</sup>d-en. A bivalent radicle, C<sub>2</sub>HCl<sub>2</sub>. [B.]—**T. alcohol**. See CHLORAL hydrate.—**T. diacetamide**. A substance, CCl<sub>3</sub>.CH(N.C<sub>2</sub>H<sub>3</sub>O.H)<sub>2</sub>, produced by heating chloral with acetonitril. It occurs as shining acicular crystals. [B, 3 (a, 38).]—**T. diacetate**. An oily liquid, CCl<sub>3</sub>.CH(O-C<sub>2</sub>H<sub>3</sub>O)<sub>2</sub> = C<sub>2</sub>H<sub>3</sub>Cl<sub>3</sub>O<sub>4</sub>, of peculiar odor. [B, 3 (a, 38); B, 4.]—**T. diethylate**, **T. diethyl ether**. See TRICHLORACETAL.—**T. ethylacetin**. A liquid, CCl<sub>3</sub>.CH(OC<sub>2</sub>H<sub>5</sub>)(OC<sub>2</sub>H<sub>5</sub>) = C<sub>6</sub>H<sub>3</sub>Cl<sub>3</sub>O<sub>3</sub>, of agreeable odor. [B, 3 (a, 38).]—**T. ethyl ether**. See CHLORAL alcoholate.—**T. hydramine**, **T. hydrate amide**. Chloralammonia; a body, CCl<sub>3</sub>.CH<OH/NH<sub>2</sub> = C<sub>2</sub>H<sub>3</sub>Cl<sub>3</sub>NO, forming white

acicular crystals, produced by the action of ammonia on cooled chloral. [B, 3.]—**T. hydrate ethylate**. See CHLORAL alcoholate.—**T. oxide**. See CHLORAL.—**T. thiohydrin**. A substance, (CCl<sub>3</sub>.CH.OH)<sub>2</sub>S, occurring as rhomboedral crystals, having an odor like that of mercaptan; produced by treating an ethereal solution of chloral or an aqueous solution of chloral hydrate with sulphureted hydrogen. [B, 3 (a, 38).]—**T. urea**. A substance, CO.NH<sub>2</sub>(NH.CH.OH.CCl<sub>3</sub>), produced by treating urea solution with chloral, and occurring as rhombic crystals. [B, 3 (a, 38).]

**TRICHLORHYDRIN**, n. Tri-klor-hid'ri<sup>2</sup>n. Glyceryl or propenyl trichloride; a colorless, oily liquid, C<sub>3</sub>H<sub>3</sub>Cl<sub>3</sub> = CH<sub>2</sub>.CHCl.CCl<sub>2</sub>, isomeric with propylene trichloride and chloropropylene dichloride. It smells like alcohol. [B, 3 (a, 38); B, 4.]

**TRICHLORHYDROXPENTOIC ACID**, n. Tri-klor-hid-ro<sup>2</sup>x-i<sup>2</sup>-pe<sup>2</sup>nt-o'i<sup>2</sup>k. An acid, CH<sub>2</sub>.CCl<sub>3</sub>.CHCl.CH(OH).CO.OH, occurring as tabular crystals resembling gypsum. [B, 3 (a, 38).]

**TRICHLORIDE**, n. Tri-klor'i<sup>2</sup>d(id). A compound consisting of an element or radicle united directly with chlorine in the proportion of three atoms of the latter to a definite amount of the former assumed as the unit of comparison. [B.]

**TRICHLORINATED**, adj. Tri-klor'i<sup>2</sup>n-at-e<sup>2</sup>d. Lat., *trichloratus*. Fr., *trichloriné*. Ger., *trichlorinirt*. Combined with three atoms of chlorine. [B, 2.]

**TRICHLORLACTIC ACID**, n. Tri-klor-la<sup>2</sup>k'ti<sup>2</sup>k. An acid, CCl<sub>3</sub>.CH(OH).CO.OH, forming prismatic crystals, and readily decomposable by weak bases into chloral and formic acid, and by the strong alkalies into chloroform. [B, 3.]

**TRICHLORLACTONITRIL**, n. Tri-klor-la<sup>2</sup>kt-o-nit'ri<sup>2</sup>l. A crystalline substance, CCl<sub>3</sub>.CH(OH).CN, formed by the direct union of chloral and hydrocyanic acid. [B, 3.]

**TRICHLORNAPHTHALENE**, n. Tri-klor-na<sup>2</sup>p(na<sup>2</sup>f)'tha<sup>2</sup>l-en. The compound C<sub>10</sub>H<sub>3</sub>Cl<sub>3</sub>. [B, 4 (a, 38).]

**TRICHLORODIMETHYLANILINAMIDOPHENOL**, n. Tri-klor-o-di-me<sup>2</sup>th-i<sup>2</sup>l-a<sup>2</sup>n-i<sup>2</sup>l-i<sup>2</sup>p-a<sup>2</sup>m-i<sup>2</sup>d-o-fe<sup>2</sup>n-o'i<sup>2</sup>l. See INDOPHENOL.

**TRICHLOROPHENATE**, n. Tri-klor-o-fe<sup>2</sup>n'at. A compound of trichlorophenol with a metallic radicle. The t's are said to have the same antiseptic properties as trichlorophenol. [B, 4.]

**TRICHLOROCIN**, **TRICHLOROCINOL**, n's. Tri-klor-o<sup>2</sup>r'si<sup>2</sup>n, -o<sup>2</sup>r'i<sup>2</sup>si<sup>2</sup>n-o'i<sup>2</sup>l. A chlorine substitution product, C<sub>6</sub>Cl<sub>3</sub>(CH<sub>2</sub>)(OH)<sub>3</sub>, of orcin. [B, 3 (a, 38); B, 4.]

**TRICHLOROSTRYCHNINE**, n. Tri-klor-o-stri<sup>2</sup>k'n'en. Fr., *t*. A substance, C<sub>21</sub>H<sub>19</sub>Cl<sub>3</sub>N<sub>2</sub>O<sub>2</sub>, obtained by treating a diluted solution of strychnine with a current of chlorine; it is neutral, crystallizable, and very bitter. [B, 93 (a, 14).]

**TRICHLOROPHENOL**, n. Tri-klor-fe<sup>2</sup>n-o'i<sup>2</sup>l. A solid substance, C<sub>6</sub>H<sub>3</sub>Cl<sub>3</sub>.OH, prepared by the action of chlorinated lime on carbolic acid, aniline, and other aromatic substances. It has a peculiar odor, and in substance exerts a feeble caustic action, but in solution is not irritant. It is said to act as a very energetic disinfectant, deodorizer, and antiseptic. It occurs as acicular crystals, and forms salts called *trichlorophenates* [Dianin, "St. Petersb. med. Wehnschr.," No. 38, 1882 (B).]—**T. blue**. A coloring matter, C<sub>12</sub>H<sub>11</sub>Cl<sub>3</sub>N<sub>2</sub>O<sub>2</sub>, occurring as acicular crystals which appear green by reflected light if the beam falls in the plane of the longer axis, but deep red if the beam is perpendicular to this axis. In solution it colors animal fibres a fast greenish blue. [B, 3 (a, 38).]

**TRICHLORPYROGALLOL**, n. Tri-klor-pir-o-ga<sup>2</sup>l'o'i<sup>2</sup>l. A substance, C<sub>6</sub>Cl<sub>3</sub>(OH)<sub>3</sub>, produced when dry chlorine is passed through a cold mixture of pyrogallol and acetic acids, and occurring as acicular crystals containing three molecules of water. [B, 3 (a, 38).]

**TRICHLORQUINOL**, n. Tri-klor-kwi<sup>2</sup>n-o'i<sup>2</sup>l. A crystalline substance, C<sub>6</sub>HCl<sub>3</sub>(OH)<sub>3</sub>. [B, 3.]

**TRICHLORQUINONE**, n. Tri-klor-kwīn'ōn. A substance,  $C_6HCl_3O_2$ , occurring as large yellow tabular crystals. [B, 3 (a, 38); B, 4.]—**T**dimethylanilienimide. See **TRICHLORPHENOL blue**.

**TRICHLORRESORCIN**, **TRICHLORRESORCINOL**, n's. Tri-klor-rez-o-rs'īzn, -o-rs'īzn-o-l. A substance,  $C_6HCl_3(OH)_2$ , occurring as acicular crystals. An isomeric form, *isotrichlorresorcin*, is also known. [B, 3.]

**TRICHLORSALICIN**, n. Tri-klor-sa-lī's'īzn. Fr., *trichlorosalicin*. Ger., *T*. A substance,  $C_{12}H_5Cl_3O_2$ , forming yellowish acicular crystals of very bitter taste. [B, 93 (a, 14).]

**TRICHLORSALIGENIN**, n. Tri-klor-sa-lī'jē'n'īzn. Fr., *trichloro-saligénine*. A substance produced by decomposing trichlorosalicin with synaptase. [B, 93 (a, 14).]

**TRICHLORSILICOMETHANE**, n. Tri-klor-si-lī'k-o-me'th'-an. See **SILICOCHLOROFORM**.

**TRICHLORTOLUENE**, n. Tri-klor-to-lī-uē'n. Ger., *Trichlortoluol*. A substitution product,  $C_6H_2Cl_3CH_3 = C_7H_5Cl_3$ , of toluene, known in two isomeric forms. [B, 3 (a, 38); B, 4.]

**TRICHOBLAST**, n. Tri'k-o-bla'st. From *thpīē*, a hair, and *βλαστός*, a sprout. A hair occurring in the interior tissues of a plant. [a, 35.]

**TRICHOCARDIA** (Lat.), n. f. Tri'k(tri'ch²)-o(o²)-ka'srd'ī²-a. From *thpīē*, a hair, and *καρδία*, the heart. Fr., *trichocardie*. See *Cor hirsutum*.

**TRICHOCAERPOUS**, adj. Tri'k-o-ka'srp'u's. Lat., *trichocarpus* (from *thpīē*, a hair, and *καρπός*, a fruit). Having the fruit hairy. [a, 35.]

**TRICHOCEPHALE** (Fr.), n. Tre-ko-sa-fa'². See **TRICHOCEPHALUS**.—**T**. de l'homme. See **TRICHOCEPHALUS dispar**.—**T**. des ruminants. See **TRICHOCEPHALUS affinis**.—**T**. sans pareil. See **TRICHOCEPHALUS dispar**.—**T**. voisin. See **TRICHOCEPHALUS affinis**.

**TRICHOCEPHALUS** (Lat.), n. m. Tri'k(tri'ch²)-o(o²)-se'f-(ke'f)'a²(l'a²)-u's(u's). From *thpīē*, a hair, and *κεφαλή*, the head. Fr., *trichocéphale*. Ger., *Haarkopf-wurm*. A genus of nematoid worms, of the *Filaridae*. [L, 18.]—**T**. affinis. Fr., *trichocéphale voisin* (ou *des ruminants*). A worm found in the caecum of sheep and other ruminants. It closely resembles *T. dispar*. [L, 15.]—**T**. apri. *T. castoris*. A species found in the beaver. [L, 87 (a, 50).]—**T**. crenatus. Fr., *trichocéphale crénelé*. A species found in the large intestine of the hog; possibly *T. dispar*. [L, 17.]—**T**. depressusculus. Fr., *trichocéphale déprimé*. A species found in the caecum of the dog and fox. [Rudolphi (L, 17).]—**T**. dispar. Fr., *trichure*, *trichuride*. Ger., *Peitschenwurm*. Long thread-worm, whip-worm; a species 1 to 2 inches in length (the female being somewhat longer) and having a long filiform neck. The surface has transverse striae and a longitudinal band of small wart-like papillae. For a peculiar appendage of the male, see **APPENDIX copulatoria**. The worm, introduced into the human body by drinking water, is an irritant parasite of the small intestine. In its larval stage some consider it identical with the *Trichina spiralis*. [L.]—**T**. equi. See **OXYURIS curvula**.—**T**. hominis, **T**. lemuris, **T**. palaeformis. See *T. dispar*.

**TRICHOCEKISUS** (Lat.), n. m. Tri'k(tri'ch²)-o(o²)-su'sr(ki'rs)'u's(u's). From *thpīē*, a hair, and *κεκός*, a varix. Of Dzondi, an abnormal dilatation of capillary vessels. [L, 50 (a, 14).]

**TRICHOCLASIS** (Lat.), n. f. Tri'k(tri'ch²)-o²-k(o²ch²)'la²s-(la²s)-ī²s. Gen., -as'eos (-is). From *thpīē*, a hair, and *κλάσις*, a breaking. Of Wilson, pathological brittleness of the hair. [a, 34.]

**TRICHOCTRYPOSES** (Lat.), n. f. pl. Tri'k(tri'ch²)-o(o²)-kri'pt(kru'p)-os'e²z(e²s). From *thpīē*, a hair, and *κρυπτός*, hidden. Diseases of the hair follicles. [a, 34.]

**TRICHOCTYST**, n. Tri'k'o-si²st. From *thpīē*, a hair, and *κύστις*, a cyst. Fr., *trichocyste*. One of the peculiar cells found in certain *Infusoria*, very nearly identical with the nematocysts of the *Ctenophora*. [B, 28 (a, 27).]

**TRICHODANGEIA** (Lat.), n. n. pl. Tri'k(tri'ch²)-od-a²n-(a²n²)-jē²(ge²-i²)-a². From *τριχώδης*, hair-like, and *αγγείον*, a vessel. The capillaries. [L, 50 (a, 14).]

**TRICHODANGIITIS** (Lat.), n. f. Tri'k(tri'ch²)-od-a²n-(a²n²)-jē²(ge²-i²)-i(e)²tī²s. Gen., -it'idos (-idis). Fr., *trichodangite*. Inflammation of the capillaries. [L, 50 (a, 14).]

**TRICHODARTERIA** (Lat.), n. f. Tri'k(tri'ch²)-od-a²rt-er-(ar)'ī²-a². From *τριχώδης*, hair-like, and *αρτηρία*, an artery. Ger., *Haarschlagader*. An arteriole. [L, 50 (a, 14).]

**TRICHODARTERITIS** (Lat.), n. f. Tri'k(tri'ch²)-od-a²rt-er-(ar)'ī²-i(e)²tī²s. Gen., -it'idos (-idis). Fr., *trichodartérite*. Inflammation of the arterioles. [L, 50 (a, 14).]

**TRICHODESMA** (Lat.), n. n. Tri'k(tri'ch²)-o(o²)-de²z(de²s)'ma². Gen., -des'matos (-atis). From *thpīē*, a hair, and *δέσµα*, a bond. A genus of the *Botryaceae*. [a, 35.]—**T**. indicum. An East Indian species used as an alterative and diuretic and in snake-bites. The leaves are employed as an emollient poultice. [a, 35.]

**TRICHODOPHLEBITIS** (Lat.), n. f. Tri'k(tri'ch²)-od-o(o²)-fle²b-i(e)²tī²s. Gen., -it'idos (-idis). From *τριχώδης*, hair-like, and *φλέψ*, a vein. Inflammation of the venules. [L, 50 (a, 14).]

**TRICHOGENOUS**, adj. Tri'k-o²jē²n-u's. From *thpīē*, a hair, and *γεννώ*, to engender. Hair-forming; promoting the growth of hair. [G.]

**TRICHOGLOSSIA** (Lat.), n. f. Tri'k(tri'ch²)-o(o²)-glo²s(glo²s)'sī²-a². From *thpīē*, a hair, and *γλῶσσα*, the tongue. Fr., *trichoglossie*. A hyperplastic condition of the epithelium of the tongue in which hair-like processes project from the tips of the lingual papillae. [D.]

**TRICHOGYNE**, n. Tri'k'o²jē²n. From *thpīē*, a hair, and *γυνή*, a woman. The receptive portion of a procarp; a thread-like appendage to the carpogonium of certain *Carpophyta*. [a, 35.]

**TRICHOID**, adj. Tri'k'oīd. Gr., *τριχώδης* (from *thpīē*, a hair, and *εἶδος*, resemblance). Fr., *trichoidé*. Resembling a hair. [L, 41, 50 (a, 14).]

**TRICHOLEPIS** (Lat.), n. f. Tri'k(tri'ch²)-o²-le²p-i²s. From *thpīē*, a hair, and *λεπίς*, a husk. Fr., *tricholépidé*. A genus of the *Compositae*. [a, 35.]—**T**. procumbens. An East Indian herb, referred by Bentham and Hooker to the genus *Volatarella*. According to some, it is used medicinally in Persia. [a, 35.]

**TRICHOLEUCOSIS** (Lat.), n. f. Tri'k(tri'ch²)-o(o²)-lu²k-os'ī²s. Gen., -os'eos (-is). From *thpīē*, a hair, and *λευκός*, whiteness. Fr., *tricholeucose*. See **CANTITIES**.

**TRICHOLOITHUS** (Lat.), n. m. Tri'k(tri'ch²)-o²-lī²th-u's(u's). From *thpīē*, a hair, and *λίθος*, a stone. Fr., *tricholithe*. A hairy concretion. [L, 50 (a, 14).]

**TRICHOLOGIA** (Lat.), n. f. Tri'k(tri'ch²)-o(o²)-loj(lo²g)'ī²-a². From *thpīē*, a hair, and *λόγος*, to pick out (1st def.), or *λόγος*, understanding (2d def.). 1. See **CARPOLOGY**. 2. See **TRICHOLOGY**.

**TRICHOLOGY**, n. Tri'k-o²lī'o-jī. Lat., *trichologia*. The anatomy, etc., of the hair.

**TRICHOMA** (Lat.), n. n. Tri'k(tri'ch²)-om'a². Gen., -om'atos (-atis). Gr., *τρίχωμα* (from *thpīē*, hair). Fr., *trichome*. Ger., *Trichom*. 1. See **PLICA polonica**. 2. See **TRICHOME**.—**T**. evolutum. Plica that develops normally. [G.]—**T**. latens, **T**. occultum. Latent plica; a term for various general symptoms supposed to be due to the diathesis that causes plica polonica. [G.]—**T**. spurium. Plica due to accidental causes, such as filth and pediculi. [G, 7.]

**TRICHOMAPHYTE**, n. Tri'k-om'a²-fit. From *τρίχωμα*, a trichoma, and *φύτον*, a plant. A vegetable parasite formerly supposed to be the cause of plica polonica. [G.]

**TRICHOME**, n. Tri'k'om. Lat., *trichoma* (from *thpīē*, hair). A hair, scale, or other outgrowth of the epidermis of a plant. [a, 35.]

**TRICHOMONAS** (Lat.), n. f. Tri'k(tri'ch²)-o²m'o²n-a²s(a²s). Gen., -mon'ados (-adis). From *thpīē*, a hair, and *μονάς*, a unit. Ger., *Haarmonade*. A genus of infusorians. [L, 17.]—**T**. vaginalis. An infusorian, about 0.03 mm. long, found in the vagina of women affected with gonorrhoea or an abundant vaginal secretion, and in the lochia discharge. It resembles the mucous corpuscles, but has a long filament (flagellum) or tail. It is provided with cilia. [L, 15.]

**TRICHOMYCES** (Lat.), n. m. Tri'k(tri'ch²)-o²m'ī²(u²)-sez(kas). Gen., -et'os (-etis). From *thpīē*, a hair, and *μύκης*, a mushroom. See **TRICHOPHYTON**.

**TRICHOMYCOSIS** (Lat.), n. f. Tri'k(tri'ch²)-o(o²)-mi²(mu²)-kos'ī²s. Gen., -os'eos (-is). Fr., *trichomycose*. Ger., *Trichomykosis*. Any disease of the hair due to a vegetable parasite. [G.]—**T**. barbae. See **SCYOSIS parasitaria**.—**T**. capillitii. 1. See **KERION**. 2. See *T. circinata*.—**T**. capillitii sycosiformis. See **KERION**.—**T**. circinata. Fr., *teigne tondante*, *trichophyite tonsurante*, *porrigine tondante*. Ger., *scherende Flechte*. Ringworm of the hairy scalp; the disease produced by invasion of the epidermis and hair of the scalp by *Trichophyton tonsurans*. It is characterized by round, slightly reddened, scaly patches of skin upon which the hairs are usually broken off at a little distance from the cutaneous surface, leaving stumps the extremities of which appear more or less split and ragged. [G, 4.]—**T**. favosa. See **FAVUS**.—**T**. nodosa, **T**. nodularis. Fr., *t. nodulaire*. Sp., *pedra*. A disease of the hair occurring in the province of Cauca in Colombia. It is characterized by the formation of hard (stone-like), black, nodular concretions upon the hairs of the scalp, which are distributed at regular intervals along the shafts and produce a rattling noise when the hair is combed or shaken. It is usually met with in women. It is due to a fungous growth said to be caused by the use of a mucilaginous oil resembling linseed oil. [G.]—**T**. pustulosa. A pustular parasitic disease affecting hairy regions, such as the scalp or bearded portions of the face; in Auspitz's classification of skin diseases, a subdivision of *Mycosis pustulosa*. It includes the varieties *T. barbae* and *T. capillitii*. [G, 4.]—**T**. pustulosa barbae, **T**. trichophytina. See **SCYOSIS parasitaria**.

**TRICHONOSIS** (Lat.), **TRICHONOSUS** (Lat.), n's f. Tri'k(tri'ch²)-o²n'o²s'ī²s, -u's(u's). Gen., -nos'eos (-is), -on'osi. From *thpīē*, a hair, and *νόσος*, disease. See **TRICHOSIS**.—**T**. cana [Wilson], **T**. discolor. See **CANTITIES**.—**T**. furfuracea. See **TRICHOMYCOSIS circinata**.—**T**. plica. See **PLICA polonica**.

**TRICHOPATHY**, n. Tri'k-o²p'a²th'ī². Lat., *trichopathia* (from *thpīē*, a hair, and *πάθος*, disease). Fr., *trichopathie*. Ger., *Trichopathie*, *Haarkrankheit*. See **TRICHOSIS**.

**TRICHOPORE**, n. Tri'k'o-for. From *thpīē*, a hair, and *πόρος*, bearing. A row of cells of the procarp on which the trichogyne is borne in certain *Algae*. [a, 35.]

**TRICHOPHYTIASIS** (Lat.), n. f. Tri'k(tri'ch²)-o(o²)-fit(fu²t)-ī(ī²)a²s(a²s)-ī²s. Gen., -as'eos (-is). From *thpīē*, a hair, and *φύτον*, a plant. See **TRICHOPHYTOSIS**.

**TRICHOPHYTIE** (Fr.), n. Tre-ko-fe-te. See **TRICHOPHYTOSIS**.—**T**. circinée. See **DERMATOMYCOSIS maculo-vesiculosa**.—**T**. cutanée. See **DERMATOMYCOSIS trichophytina**.—**T**. sycosique. See **SCYOSIS parasitaria**.—**T**. tonsurante. See **TRICHOMYCOSIS circinata**.—**T**. unguéale. See **ONYCHOMYCOSIS trichophytina**.

**TRICHOPHYTINUS** (Lat.), adj. Tri'k(tri'ch²)-o(o²)-fit(fu²t)-in(en)'u's(u's). Pertaining to or due to the presence of *Trichophyton tonsurans*. [G.]

**TRICHOPHYTON** (Lat.), n. n. Tri'k(tri'ch²)-o²f'ī²k(u²t)-o²n. From *thpīē*, a hair, and *φύτον*, a plant. Fr., *T*. A genus of *Fungi* of uncertain botanical affinities; considered by some as only stages in the development of a more highly organized fungus. [B, 54.]—

**T. decalvans**, **T. sporuloides**, **T. tonsurans**, **T. ulcerum**. The fungus of ringworm (*tinea sycosis*); a species closely allied to, if not identical with, *Achorion Schoenleini*. It consists of very long, slender, pale-grayish, branching, and ribbon-like threads (mycelium), containing small, round, refractive, grayish or pale-greenish spores, which are sometimes single and sometimes disposed in rows. Reproduction by sexual processes has not been observed. Some authors consider it identical with *Microsporon furfur*. [B, 54; a, 35.]

**TRICHOPHYTOSIS** (Lat.), n. f. Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-o(o<sup>2</sup>)-fi<sup>2</sup>t(fu<sup>2</sup>)-os<sup>2</sup>i<sup>2</sup>s. Gen., -os<sup>2</sup>eos (-is). From *thripē*, a hair, and *phytón*, a plant. Fr., *trichophytie*. Syn.: *tinea trichophytina*. Ringworm; a group of skin diseases due to the presence of *Trichophyton tonsurans*. Cf. *Mycosis trichophytina*.—**T. barbæ**. See *Sycosis parasitaria*.—**T. capitis**. T. of the hairy scalp.—**T. corporis**. See *DERMATOMYCOSIS maculo-vesiculosa*.—**T. cruris**. See *ECZEMA marginatum*.

**TRICHOPOLIOSIS** (Lat.), n. f. Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-o(o<sup>2</sup>)-pol(po<sup>2</sup>)-i<sup>2</sup>s<sup>2</sup>i<sup>2</sup>s. Gen., -os<sup>2</sup>eos (-is). From *thripē*, a hair, and *πολιόσθας*, to become gray. Fr., *trichopoliose*. See *CANTITIES*.

**TRICHOPTILOSI** (Lat.), n. f. Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-o<sup>2</sup>pt-i<sup>2</sup>s<sup>2</sup>i<sup>2</sup>s. Gen., -os<sup>2</sup>eos (-is). From *thripē*, a hair, and *πτίλον*, a feather. 1. Of Devergie, *trichorrhexis nodosa*; so called from the feathered condition of the hairs owing to splitting of the shafts. ["Ann. de derm. et de syph." i, 1871; "Am. Jour. of Syph. and Derm." iii, p. 254 (G.).] 2. A disease of the hair, especially of that of the axillæ and pubes, in which the cortex of the hair is stripped up in places, forming feather-like projections about which at certain points masses of yellowish material become attached. The affection is regarded as the result of maceration of the hairs from excessive sweating. [Michelson (G, 82).]

**TRICHORRHEXIS** (Lat.), n. f. Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-o<sup>2</sup>r-re<sup>2</sup>x(rax<sup>2</sup>)-i<sup>2</sup>s. Gen., -rhe<sup>2</sup>x(eos<sup>2</sup>)-is). From *thripē*, a hair, and *ρήγνυσθαι*, to burst forth. Fr., *trichorrhexie*. See *T. nodosa*.—**T. nodosa**. Fr., *trichorrhexie noueue*. Ger., *Auftreibungen und Spaltungen der Haare*. A disease of the hairs (most commonly of the beard and mustache, but also of the scalp, etc.) in which little spindle-shaped bulbous swellings occur along the hair-shaft, and afterward split up into numerous longitudinal divisions, weakening the hair at these points, so that it easily breaks, leaving at the point of fracture a brush-like stump composed of jagged filaments. [G, 47.] Cf. *FRAGILITAS crinium*, *TRICHOPTILOSIS*, *MONILETHRIX*, and *DISTRIX*.

**TRICHORRHÆA** (Lat.), **TRICHOORRHÆSIS** (Lat.), n's f. Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-o<sup>2</sup>r-re<sup>2</sup>(ro<sup>2</sup>e<sup>2</sup>)-a<sup>2</sup>, Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-o<sup>2</sup>r-r<sup>2</sup>i<sup>2</sup>s(ru<sup>2</sup>e<sup>2</sup>s)-i<sup>2</sup>s. Gen., -rhe<sup>2</sup>x(e<sup>2</sup>)-r<sup>2</sup>hys(eos<sup>2</sup>)-o<sup>2</sup>r(rh<sup>2</sup>is). From *thripē*, a hair, and *ρῆα* or *ρῆσις*, a flowing. See *ALOPECIA*.

**TRICHOSANTHES** (Lat.), n. f. Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-o<sup>2</sup>s-a<sup>2</sup>nth-(a<sup>2</sup>nth'e<sup>2</sup>z-as). From *thripē*, a hair, and *άνθος*, a flower. Fr., *t. Ger.*, *Haarblume*. A genus of the *Cucurbitaceæ*. [a, 35.]—**T. amara**. Fr., *t. amer*, *anguine amère*. Ger., *bittere Haarblume*. A West Indian species. The bitter fruit is used like colocynth and as a rat poison. [a, 35.]—**T. anguina**. Fr., *t. contourné, anguine*. Ger., *schlangenfrüchtige Haarblume*. Snake-gourd; a species indigenous to China and cultivated in southern Asia and elsewhere for its fruits, which are eaten, cooked, when green, but become purgative when ripe, and are then used especially as a tœniacide. [a, 35.]—**T. cucurmerina**. Fr., *t. du Malabar*. Ger., *gurkenartige Haarblume*. A species found in southern Asia, having a strong, unpleasant odor. The stalk is used as an expectorant, the root as a purgative and tonic, an infusion of the tender shoots and dried capsules as an aperient, the expressed juice of the leaves as an emetic, and the seeds as an anthelmintic and antiperiodic. [a, 35.]—**T. cuspidata**. An East Indian species. The expressed juice is emetic and is used as an expectorant and digestive. The root is a powerful purgative. [a, 35.]—**T. dioica**. A species growing wild in Bengal and cultivated in India as an article of food. It was formerly used by the Hindus in leprosy, and is considered tonic and febrifuge. An alcoholic extract of the unripe fruit is said to be a powerful purgative. [a, 35.]—**T. incisa**. An East Indian species. The root, powdered and mixed with oil of azadirachta, is used in painful ulcers. [a, 35.]—**T. laciniosa**. Fr., *t. lacinie*. Ger., *handtheilige Haarblume*. An East Indian species. The young shoots and the fruits are used as a laxative and stomachic. [a, 35.]—**T. nervifolia**. An East Indian species. The fruits are used externally in epilepsy and mental troubles. [a, 35.]—**T. palmata**. An East Indian species. The fruit, mixed with coconut oil, is used in earache, and the pulp is purgative. The root is considered poisonous; it is used in diseases of cattle, especially in pneumonia. [a, 35.]—**T. trifoliata**. A species found in Java and the Moluccas. The leaves are eaten and the juice is used in swellings. [a, 35.]—**T. villosa**. An East Indian and Javanese species. The fruits are used as a drastic purgative. [a, 35.]

**TRICHOSCHINIS** (Lat.), n. f. Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-o<sup>2</sup>sk(o<sup>2</sup>sch<sup>2</sup>)-i<sup>2</sup>s<sup>2</sup>i<sup>2</sup>s. Gen., -sch<sup>2</sup>i<sup>2</sup>s(eos<sup>2</sup>)-i<sup>2</sup>sis). From *thripē*, a hair, and *σχίσις*, a cleaving. See *DISTRIX* and cf. *FRAGILITAS crinium*.

**TRICHOSCOPY**, n. Tri<sup>2</sup>k-o<sup>2</sup>s<sup>2</sup>k'o<sup>2</sup>p<sup>2</sup>i<sup>2</sup>. From *thripē*, a hair, and *σκοπέω*, to examine. The examination of the hair. [a, 34.]

**TRICHOSIS** (Lat.), n. f. Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-o<sup>2</sup>s<sup>2</sup>i<sup>2</sup>s. Gen., -os<sup>2</sup>eos (-is). From *thripē*, a hair, *trichone*. Any disease of the hair, either in the form of morbid growth or of deficiency; of Auspitz, a suborder

TRICOPHYTON  
TONSURANS.  
[A, 327.]

of the *Keratonosi*, including *Hypertrichoses*, *Paratrichoses*, and *Atrichoses*. [G, 4.]—**T. atrix**. See *ALOPECIA*.—**T. decolor**. Morbid discoloration of the hair. [G, 33, 52.]—**T. deformis**. A morbid change in the quality or structure of the hair. [G, 33.]—**T. distrix**. See *TRICHOPTILOSIS*.—**T. plica**. See *PLICA polonica*.—**T. poliosis**. See *CANTITIES*.—**T. sensitiva**. A condition in which the scalp is so abnormally sensitive that cutting the hair causes pain. [G.]—**T. setosa**. A condition in which the hair becomes thick, rigid, and bristly. [G, 52.]

**TRICHOSPORE**, n. Tri<sup>2</sup>k'o-spor. From *thripē*, a hair, and *σπόρος*, seed. A spore produced on a thread, as in the *Hyphomycetes*. The *Trichosporei* (Fr., *trichosporés*) are: Of Lévillé, a division of *Fungi*, consisting of the *Aleurinet*, *Phycoladei*, and *Sclerochaetæ*; of Fries, a division of the *Mucedines*. [a, 35.]

**TRICHOSTEMA** (Lat.), n. n. Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-o(o<sup>2</sup>)-stem(stam)<sup>2</sup>a<sup>2</sup>. Gen., -stem<sup>2</sup>atos (-atis). From *thripē*, a hair, and *στῆμα*, a stamen. A genus of the *Labiata*. [a, 35.]—**T. lanatum**. Black sage; used by the Mexicans and Indians of southern California to promote the growth of the hair and to give it a dark color. [a, 35.]

**TRICHOSTERETICUS** (Lat.), adj. Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-o(o<sup>2</sup>)-ste<sup>2</sup>r-et(at<sup>2</sup>)/i<sup>2</sup>k-u<sup>2</sup>s(u<sup>2</sup>s). From *thripē*, a hair, *στερητικός*, depriving. Ger., *haarraubend*. Causing loss of hair. [L, 50 (a, 48).]

**TRICHOSYPHILIS** (Lat.), n. f. Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-o(o<sup>2</sup>)-si<sup>2</sup>f(su<sup>2</sup>f)-i<sup>2</sup>s<sup>2</sup>i<sup>2</sup>s. Gen., -il<sup>2</sup>idis. From *thripē*, a hair, and *syphilis* (q. v.). Of Wilson, *trichorrhexis nodosa* affecting the hairs of the beard, following syphilitic alopecia. [G.]

**TRICHOSYPHILOSI** (Lat.), n. f. Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-o(o<sup>2</sup>)-si<sup>2</sup>f(su<sup>2</sup>f)-i<sup>2</sup>s<sup>2</sup>i<sup>2</sup>s. Gen., -os<sup>2</sup>eos (-is). A syphilitic disease of the hair. [G.]

**TRICHOETECUM** (Lat.), n. n. Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-o(o<sup>2</sup>)-thes-(thak<sup>2</sup>)/i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). From *thripē*, a hair, and *θηκη*, a chest. Fr., *trichotécie*. A vegetable parasite of the hair; of Link, a genus of hyphomycetous *Fungi*. [G; a, 35.]—**T. roseum**. A fungous growth found in the ear. ["Arch. f. Ohrenheilk." v, p. 163.]

**TRICHOTOMOUS**, adj. Tri<sup>2</sup>k-o<sup>2</sup>t'o<sup>2</sup>m-u<sup>2</sup>s. Lat., *trichotomus* (from *τρίχων*, in three parts, and *τομή*, cutting). Fr., *trichotome*. Ger., *wiederholt-dreitheilig*. Three-forked, dividing continuously into three equal or nearly equal branches. [a, 35.]

**TRICHOTON** (Lat.), n. n. Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-ot'o<sup>2</sup>n. From *τρίχων*, hairy. See *CAPILLITUM* (2d def.).

**TRICHROMATE**, n. Tri-krom'at. A compound of a basic oxide united with three molecules of chromium trioxide. [B.]

**TRICHROMYL**, n. Tri-krom'i<sup>2</sup>. A radicle, (CrO<sub>2</sub>)<sub>3</sub>. [B, 3.]—**T. chloride**. A black deliquescent powder, (CrO<sub>2</sub>)<sub>3</sub>Cl<sub>2</sub>. [B, 3.]

**TRICHTER** (Ger.), n. Tri<sup>2</sup>ch<sup>2</sup>t'e<sup>2</sup>r. See *INFUNDIBULUM* and *FUNNEL*.—**Gebärmuttert.** See *INFUNDIBULUM tubæ*.—**Gehört.** See *INFUNDIBULUM* (2d def.).—**Gehört.** See *EAR-trumpet* and *INFUNDIBULUM cochleæ*.—**Hautt.**, **Nabelhautt.** The conical portion of the integument of the navel that encroaches upon the umbilical cord. [A, 19.]—**Pialt.** Of Schwalbe, the sheath of pia which surrounds the small blood-vessels in the spinal cord. [I, 17 (K).] Cf. *Pial FUNNELS*.—**T. drainage**. Of Straub, drainage of oedematous subcutaneous tissue by means of a small glass funnel inserted through an incision in the skin. [A, 319 (a, 34).]—**T. für-mig.** See *INFUNDIBULIFORM*.—**Wimpert.** See *Nephridial FUNNEL*.

**TRICHTERBRUST** (Ger.), n. Tri<sup>2</sup>ch<sup>2</sup>t'e<sup>2</sup>r-brust. Of Ebstein, a deformity characterized by a funnel-shaped depression of the lower part of the anterior wall of the thorax and the upper part of the anterior abdominal wall, sometimes accompanied by a lower dorsal scoliosis. [L, 57 (a, 14).]

**TRICHTERSCHNITT** (Ger.), n. Tri<sup>2</sup>ch<sup>2</sup>t'e<sup>2</sup>r-shni<sup>2</sup>t. An infundibuliform incision. [E.]

**TRICHTERWINDE** (Ger.), n. Tri<sup>2</sup>ch<sup>2</sup>t'e<sup>2</sup>r-vi<sup>2</sup>nd-e<sup>2</sup>. The genus *Ipomœa*. [a, 35.]

**TRICHURIS** (Lat.), n. f. Tri<sup>2</sup>k-(tri<sup>2</sup>ch<sup>2</sup>)-u<sup>2</sup>r(ur)<sup>2</sup>i<sup>2</sup>s. From *thripē*, a hair, and *ούρᾶ*, the tail. Fr., *trichuride*. Ger., *Haarwurm*, *Haarschwanzchen*. 1. Of Roederer, a genus of the *Filaridae*. 2. Of Buttner, the *Trichocephalus dispar*. [a, 16.]

**TRICIPITAL**, adj. Tri-kli<sup>2</sup>p'i<sup>2</sup>t'l. From *tres*, three, and *caput*, the head. Three-headed. [a, 48.]

**TRICLINIC**, adj. Tri-kli<sup>2</sup>n'i<sup>2</sup>k. From *τρεῖς*, three, and *κλίνειν*, to bend. Triply inclined; exhibiting inclination in three different planes. [B.]

**TRICOBALTOUS**, adj. Tri-ko-ba<sup>2</sup>lt'u<sup>2</sup>s. Containing three atoms of cobalt. [B.]

**TRICOCOCCUS**, adj. Tri-ko<sup>2</sup>k'u<sup>2</sup>s. Lat., *tricoecus* (from *τρεῖς*, three, and *κόκκος*, a kernel). Fr., *tricoque*. Ger., *dreikörnig*, *dreikörnig*. Having or consisting of three cocci. The *Tricoeca*, or *Tricoecæ* (Fr., *tricoecées*, are the *Euphorbiaceæ*. [a, 35.]

**TRICOCEPHALUS** (Lat.), n. m. Tri<sup>2</sup>k-o(o<sup>2</sup>)-se<sup>2</sup>f(ke<sup>2</sup>f)/a<sup>2</sup>i(a<sup>2</sup>)-u<sup>2</sup>s(u<sup>2</sup>s). See *TRICHOCEPHALUS*.

**TRICODEINE**, n. Tri-kod'e<sup>2</sup>n. Fr., *tricodéine*. Ger., *Tricodén*. A polymeride, C<sub>108</sub>H<sub>122</sub>N<sub>4</sub>O<sub>12</sub>, formed by the action of sulphuric acid on codeine. Administered to animals, it produces vomiting, pyalism, and catharsis. [B, 2.]

**TRICOLOR**, adj. Tri-ku<sup>2</sup>l-u<sup>2</sup>r. From *tres*, three, and *color*, color. Of three colors. As an, the *Amarantus t.* [a, 35.]

**TRICORNATE**, adj. Tri-ko<sup>2</sup>rn'at. Lat., *tricornis* (from *tres*, three, and *cornu*, a horn). Ger., *dreihörnig*. Having three horns or horn-like appendages. [a, 35.]

**TRICROTIC**, adj. Tri-krō<sup>2</sup>t'i<sup>2</sup>k. From *τρεῖς*, three, and *κροτέω*, to beat. Having a triple beat (cf. *DICROTIC*). [a, 48.]

**TRICUSPID**, adj. Tri-ku<sup>2</sup>sp'id. From *tres*, three, and *cuspid*, a point. Fr., *tricuspid*. Ger., *tricuspidal*, *dreizipfelig*. 1. Having three cusps. 2. Pertaining to the t. valve. [L, 41 (a, 14).]

**TRICUSPIS** (Lat.), n. f. Tri(tri<sup>2</sup>)-ku<sup>2</sup>sp(ku<sup>2</sup>sp)<sup>1</sup>/i<sup>2</sup>s. Gen., -cusp/-idis. 1. The tricuspid valve of the right auriculo-ventricular ostium. 2. Of Harvey, one of the semilunar valves of the pulmonary artery. [H, 12.]

**TRICYANATE**, n. Tri-si<sup>2</sup>a<sup>2</sup>n-at. A salt of tricyanic acid. [B.]

**TRICYANHYDRIN**, n. Tri-si<sup>2</sup>a<sup>2</sup>n-hid<sup>1</sup>ri<sup>2</sup>n. A polymere, C<sub>3</sub>H<sub>3</sub>N<sub>3</sub>, of hydrocyanic acid. [B, 93 (a, 14).]

**TRICYANIC ACID**, n. Tri-si<sup>2</sup>a<sup>2</sup>n-i<sup>2</sup>qk. Ger., *Tricyansaure*. A polymere form of cyanic acid, H<sub>3</sub>C<sub>3</sub>N<sub>3</sub>O<sub>3</sub> = (C<sub>3</sub>N<sub>3</sub>)(OH)<sub>3</sub>. [B.]

**TRICYANODIAMIDE**, n. Tri-si<sup>2</sup>a<sup>2</sup>n-o-di<sup>1</sup>a<sup>2</sup>m-i<sup>2</sup>d(id). A univalent radicle, (C<sub>3</sub>N<sub>3</sub>)<sub>3</sub> $\begin{matrix} \text{NH}_2 \\ | \\ \text{H} \end{matrix}$ . [B.]—**T. hydrate**. See AMMELINE.

**TRICYANOGEN**, n. Tri-si<sup>2</sup>a<sup>2</sup>n/o-je<sup>2</sup>n. Ger., *Tricyan*. A hypothetical polymeric form, C<sub>3</sub>N<sub>3</sub> =  $\begin{matrix} \text{CN} \\ | \\ \text{NC} - \\ | \\ \text{CN} \end{matrix}$ , of cyanogen. [B.]—**T.**

**diamide-imide**. See MELAM.—**T. tribromide**. Ger., *Tricyantribromür*. A polymeric form, C<sub>3</sub>N<sub>3</sub>Br<sub>3</sub>, of cyanogen bromide. [B.]—**T. trichloride**. Ger., *Tricyantrichlorür*, *festes Chlorcyan*. A polymeric form, C<sub>3</sub>N<sub>3</sub>Cl<sub>3</sub>, of ordinary cyanogen chloride. [B.]

**TRICYANOTRIAMIDE**, n. Tri-si<sup>2</sup>a<sup>2</sup>n-o-tri<sup>1</sup>a<sup>2</sup>m-i<sup>2</sup>d(id). Ger., *Tricyanotriamid*. Melamine; a polymer, C<sub>3</sub>H<sub>3</sub>N<sub>6</sub> = (C<sub>3</sub>N<sub>3</sub>)(NH<sub>2</sub>)<sub>3</sub>, of cyanamide. [B.]

**TRIDECATOIC ACID**, **TRIDECYLIC ACID**, n's. Tri-de<sup>2</sup>k-a<sup>2</sup>t-o<sup>1</sup>i<sup>2</sup>k, -de<sup>2</sup>s-i<sup>2</sup>l<sup>1</sup>i<sup>2</sup>k. A crystalline monobasic acid, C<sub>13</sub>H<sub>26</sub>O<sub>2</sub>. [B, 4.]

**TRIDENTATE**, adj. Tri-de<sup>2</sup>nt-at. From *tres*, three, and *dens*, a tooth. Three-toothed. [a, 35.]

**TRIDÉROATLODYME** (Fr.), n. Tre-da-ro-a<sup>2</sup>t-lo-dem. Of Geoffroy Saint-Hilaire, a rare variety of triple monster presenting features of the derodidymus and of the atlodymus. [a, 34.]

**TRIDESMIS** (Lat.), n. f. Tri(tri<sup>2</sup>)-de<sup>2</sup>z(de<sup>2</sup>s)/mi<sup>2</sup>s. Fr., *t.* 1. A genus of the *Euphorbiaceae*, referred by some to *Croton*. 2. The genus *Cratogeomys*. The *Tridesmeae*, or *tridesmineae*, are a section of the *Desmostomaceae*. [a, 35.]—**T. hispida**. A species of *T.* (1st def.) found in southern China; a low shrub the root of which is used as a tonic. [a, 35.]

**TRIDIGITATE**, adj. Tri-di<sup>2</sup>g<sup>1</sup>/t-at. Lat., *tridigitatus* (from *tres*, three, and *digitus*, a finger). Fr., *tridigité*. Ger., *dreifingrig*, *dreifingfingert*. 1. Having three fingers. 2. Thrice digitate; digitately trifoliate, as in the common clover-leaf. [a, 35.]

**TRIDYMUS** (Lat.), n. m. Tri<sup>2</sup>d<sup>1</sup>/i<sup>2</sup>m(u<sup>6</sup>m)-u<sup>3</sup>s(u<sup>4</sup>s). Gr., *τρίδυμος*. See TRIPLET.

**TRIEB** (Ger.), n. Treb. See NISUS and TURION.—**Gipfelt's**, **Jahrest's**. See INNOVATIONS.—**T'lager**. Of Link, the thallus of lichens and *Algæ*. [a, 35.]

**TRIEFAUGE** (Ger.), n. Tref/a<sup>2</sup>-u<sup>4</sup>g-e<sup>2</sup>. Blear-eye. See BLEPHARITIS intermarginalis.

**TRIEFÄUGIG** (Ger.), adj. Tref/oig-i<sup>2</sup>g. See BLEAR-EYED.

**TRIEFÄUGIGKEIT** (Ger.), n. Tref/oig-i<sup>2</sup>g-kit. See BLEARED-NESS.

**TRIELCON** (Lat.), n. n. Tri(tri<sup>2</sup>)-elk/o<sup>2</sup>n. From *tripes*, three, and *lanceo*, to draw. In old surgery, a forceps with three branches, for extracting balls, etc. [L, 49, 50 (a, 14).]

**TRIECEPHALUS** (Lat.), n. m. Tri(tri<sup>2</sup>)-e<sup>2</sup>n(e<sup>2</sup>n<sup>2</sup>)-se<sup>2</sup>f(ke<sup>2</sup>f<sup>1</sup>)-a<sup>2</sup>l(a<sup>2</sup>l)-u<sup>3</sup>s(u<sup>4</sup>s). From *tripes*, three, and *ἐγκέφαλος*, the brain. Of Geoffroy St.-Hilaire, a genus of otocephalic monsters devoid of three of the principal cephalic parts, the buccal, nasal, and ocular. [a, 34.]

**TRIENNIAL**, adj. Tri-e<sup>2</sup>n/i<sup>2</sup>-l. Lat., *triennus* (from *tres*, three, and *annus*, a year). Fr., *triennal*, *triennuel*. Lasting three years. [a, 35.]

**TRIENTALIS** (Lat.), n. f. Tri(tri<sup>2</sup>)-e<sup>2</sup>nt-al(a<sup>2</sup>l)/i<sup>2</sup>s. From *triens*, a third part, Fr., *trientale*. Ger., *Trientale*. Chickweed-wintergreen; a genus of the *Primulaceae*. [a, 35.]—**T. americana**. Black wintergreen-chickweed, star-flower; common in rocky woods in North America. [a, 35.]—**T. europæa**. Fr., *trientale d'Europe*, *pirolle*. European chickweed-wintergreen. The herb is astringent and the root emetic. [a, 35.]

**TRIETHYL**, n. Tri-e<sup>2</sup>th/i<sup>2</sup>l. The chemical group (C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>. [a, 38.]—**T'azonium**. A univalent radicle, (C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>N<sub>3</sub>H<sub>3</sub> = NH<sub>2</sub><sup>+</sup>:N<sup>+</sup>(C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>, containing three molecules of ethyl substituted in hydrazine. [B.]—**T'benzene**. A 3-molecule ethyl substitution compound, C<sub>6</sub>H<sub>5</sub>(C<sub>2</sub>H<sub>5</sub>)<sub>3</sub> = C<sub>6</sub>H<sub>5</sub>H<sub>15</sub>, of benzene. [B, 4.]—**T'bismuthine**. See BISMUTH.—**T'borsine**. A liquid, B(C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>, having a penetrating and highly irritant odor and taking fire spontaneously in the air.—**T'carbinol**. See under HEPTYL ALCOHOL.—**T. hydrin**. See TRIETHYLIN.—**T'methane**. See under HEPTANE.—**T'methyl**. See under HEPTYL.—**T'methylphosphonium**. A radicle, P(C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>CH<sub>3</sub><sup>+</sup>. [B.]—**T'phosphine**. See Tertiary ETHYLPHOSPHINE.—**T. phosphosinamine**. A substance, SCN(C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>P(C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>, occurring as tabular crystals. It is isomorphous with thiosinamine. [B, 3 (a, 38).]—**T. propenyl ether**. See TRIETHYLIN.—**T. pseudocyanurate**. See ETHYL isocyanurate.—**T'siliccol**. See SILICOHEPTYL alcohol.—**T'siliccolate**. A salt or substitution compound of silicoheptyl alcohol. [B, 4.]—**T'silicomethane hydride**. See SILICOHEPTANE.—**T'silicyl**. See SILICOHEPTYL.—**T'stibine**. A colorless, spontaneously inflammable liquid, Sb(C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>, of garlicky odor. [B, 4.]—**T'sulphine**. A univalent radicle, (C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>S<sup>−</sup>. [B.]—**T'urea**. See under ETHYLEUREA.—**T'vinylammonium**. A univalent radicle, (C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>N = CH.CH<sub>2</sub>. [B, 4.]

**TRIETHYLAMINE**, n. Tri-e<sup>2</sup>th-i<sup>2</sup>l/a<sup>2</sup>m-en. A substance, N(C<sub>2</sub>H<sub>5</sub>)<sub>3</sub> = NC<sub>6</sub>H<sub>15</sub>, isomeric with hexylamine; alkaline, of an oily consistence, and of an agreeable odor. [B.]—**T. hydrochloride**.

A substance, N(C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>.HCl, forming feathery laminar crystals. [B.]—**T. sulphate**. The compound [N(C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>]<sub>2</sub>H<sub>2</sub>SO<sub>4</sub>. [B.]

**TRIETHYLARSINE**, n. Tri-e<sup>2</sup>th-i<sup>2</sup>l-a<sup>2</sup>rs'en. A colorless liquid, As(C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>. [B.]—**T. bromide**, **T. dibromide**. A deliquescent crystalline body, As(C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>Br<sub>2</sub>. [B.]—**T. diiodide**, **T. iodide**. A yellow solid, As(C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>I<sub>2</sub>. [B.]—**T. oxide**. A yellowish, oily liquid, As(C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>O, of a disagreeable odor. [B.]—**T. sulphide**. A body, As(C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>S, occurring as prismatic crystals. [B.]

**TRIETHYLENE**, n. Tri-e<sup>2</sup>th-i<sup>2</sup>l-en. A radicle, (C<sub>2</sub>H<sub>4</sub>)<sub>3</sub> = C<sub>6</sub>H<sub>12</sub>. [B.]—**T. alcohol**. A liquid, C<sub>6</sub>H<sub>4</sub>:O<sub>2</sub>:C<sub>2</sub>H<sub>4</sub>OH<sub>2</sub> = C<sub>6</sub>H<sub>14</sub>O<sub>4</sub>. [B; B, 3 (a, 38).]—**T. diamine**. An oily liquid, (C<sub>2</sub>H<sub>4</sub>)<sub>3</sub>N<sub>2</sub> = B:(C<sub>2</sub>H<sub>4</sub>)<sub>3</sub>:N. [B, 4.]—**T. dioxydihydrate**. See *T. alcohol*.

**TRIETHYLIC**, adj. Tri-e<sup>2</sup>th-i<sup>2</sup>l/i<sup>2</sup>k. Containing or derived from three molecules of ethyl. [B.]

**TRIETHYLIDENE**, n. Tri-e<sup>2</sup>th-i<sup>2</sup>l/i<sup>2</sup>-den. A polymeric form, (C<sub>6</sub>H<sub>12</sub>)<sub>n</sub>, of ethylidene. [B.]—**T. oxide**, **T. trioxide**. See PARALDEHYDE.

**TRIETHYLIN**, n. Tri-e<sup>2</sup>th-i<sup>2</sup>l/i<sup>2</sup>n. Ger., *Triäthylin*. A liquid, C<sub>3</sub>H<sub>5</sub>(OC<sub>2</sub>H<sub>5</sub>)<sub>3</sub> = C<sub>6</sub>H<sub>20</sub>O<sub>3</sub>, of pleasant smell. [B, 3 (a, 38); B, 4.]

**TRIETHYLOSANILINE**, n. Tri-e<sup>2</sup>th-i<sup>2</sup>l-roz-a<sup>2</sup>n/i<sup>2</sup>l-en. A substance, C<sub>20</sub>H<sub>18</sub>(C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>N<sub>3</sub>, obtained by heating rosaniline or its salts with ethyl iodide and alcohol. [B, 93 (a, 14).]—**T. hydrochloride**. The salt of t. commonly known in commerce; it occurs as a semicrystalline, golden-yellow mass. [B, 93 (a, 14).]—**T. diiodide**. A salt, C<sub>20</sub>H<sub>16</sub>(C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>N<sub>3</sub>2HI, forming one of the colors known as Hofmann's violet. [B, 49.]

**TRIFACIAL**, adj. Tri-fa/si<sup>2</sup>-l. From *tres*, three, and *facies*, the face. Fr., *f.* 1. Triple and pertaining to the face. 2. Pertaining to or affecting the t. nerve. [a, 48.]

**TRIFARIOUS**, adj. Tri-fa/ri<sup>2</sup>-u<sup>3</sup>s. Gr., *τρίφασιος*. In three vertical rows. [a, 35.]

**TRIFÉMORO-ROTULIEN** (Fr.), n. Tre-fa-mo-ro-to<sup>2</sup>-le-a<sup>2</sup>n<sup>2</sup>. See TRICEPS cruris.

**TRIFID**, adj. Tri/fi<sup>2</sup>d. Lat., *trifidus* (from *tres*, three, and *findere*, to cleave). Ger., *dreispaltig*. Three-cleft. [a, 35.]

**TRIFLUORIDE**, n. Tri-flu<sup>2</sup>/o<sup>2</sup>r-i<sup>2</sup>d(id). A fluorine compound analogous to a trichloride (q. v.). [B.]

**TRIFOLIATE**, adj. Tri-fol/i<sup>2</sup>-at. Lat., *trifoliatum* (from *tres*, three, and *folium*, a leaf). Fr., *trifolié*. Ger., *dreiblättrig*. 1. Possessing three leaves. 2. Trifoliate. The *Trifoliata* are a section of the *Leguminosæ*. [a, 35.]

**TRIFOLIOLATE**, adj. Tri-fol/i<sup>2</sup>-ol-at. Lat., *trifoliolatum* (from *tres*, three, and *folium*, a leaf). Fr., *trifoliolé*. Ger., *dreitheiblättrig*. Of a compound leaf, having three leaflets. [a, 35.]

**TRIFOLIUM** (Lat.), n. n. Tri(tri<sup>2</sup>)-fol(fol<sup>2</sup>)/i<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m). Gr., *τρίφυλλον*, *τρίφυλλον*. Fr., *trèfle*, *tremaine*, *triole* (1st def.). Ger., *Klee* (1st def.). 1. Clover; trefoil; a genus of leguminous herbs. The *Trifolietæ* (Fr., *trifolies*) are a tribe of the *Papilionaceæ*. [a, 35.] 2. Of the Netherl. Ph., see *Folia trifolii fibrini*.—**Essentia trifolii fibrini**. See *Tinctura trifolii fibrini*.—**Extractum trifolii aquatilis** [Belg. Ph. 1854, Finn. Ph.] (see *fibrini*) [Ger. Ph., Austr. Ph., Gr. Ph., Swiss Ph., Hung. Ph., Netherl. Ph.], Fr., *extrait de trèfle d'eau* [Fr. Cod.], Ger., *Bitterkleeextract*. A thick (soft [Fr. Cod.]) aqueous extract made from the leaves of *Menyanthes trifoliata*. Most of the ph's direct the use of warm or boiling water to extract the drug. [B, 95 (a, 38).]—**Folia trifolii fibrini** [Ger. Ph., Swiss Ph.], Fr., *ményanthe (ou trèfle d'eau)* [Fr. Cod.], Sp., *trébol acutido* [Sp. Ph.], The leaves of *Ményanthes trifoliata*. [B, 95 (a, 38).]—**Tinctura trifolii fibrini**. A tincture made by treating *Ményanthes trifoliata* with four or six times as much alcohol for six days, and filtering. [B, 119 (a, 38).]—**T. acetosum**. See OXALIS acetosella.—**T. agrarium**. Fr., *trèfle houblon (ou jaune)*, *minette dorée*, France. Ger., *Hopfenklee*. Hop- (or yellow, or golden) clover of Europe, western Asia, and New England; a fodder herb. [a, 35.]—**T. alpestre**, **T. alpinum**. Fr., *trèfle des Alpes*, *reglisse de montagne (ou des Alpes)*. Ger., *Alpenklee*. Mountain-licorice; found in Europe and western Asia. The sweet-juiced root is used like licorice. [a, 35.]—**T. amarum**, **T. anticorbuticum**, **T. aquaticum**. See MENTHANTHES trifoliata.—**T. arvense**. Fr., *trèfle des champs*, *herbe à vache*, *patte de lièvre*, *minots*, *mignonnet (blanc)*, *piéd de lièvre (ou de lion)*. Ger., *Ackerklee*, *Hasenpfüeten*. Hare's-foot clover (or trefoil) of Europe, rabbit-foot of North America, stone-clover, the *Λαγυραίου* of Dioscorides. The entire plant, formerly official as *herba et flores lagopi* (see *lagopodia*), is now used as a domestic remedy for diarrhoea and dysentery. It was formerly recommended in Asiatic cholera. [a, 35.]—**T. bituminosum**. See *Poaalea bituminosa*.—**T. cæruleum**. See MELLILLOTUS caerulea.—**T. cervinum**. See EUPATORIUM cannabinum.—**T. corniculatum**. See LOTUS corniculatus.—**T. creticum**. See TAGONELLA fenugræcum.—**T. dentatum**. See MELLILLOTUS dentata.—**T. fibrinum**. 1. See MENTHANTHES trifoliata. 2. Of the Austr. Ph. and Hung. Ph., see *Folia trifolii fibrini*.—**T. fragiferum**. Fr., *trèfle capiton (ou fraise)* [2d def.]. Ger., *Blasenklee*, *Erbsenbäume* (2d def.). 1. See FRAGARIA vesca. 2. Strawberry (or strawberry-headed) clover; a perennial clover of Europe, northern Africa, and middle and northern Asia. [a, 35.]—**T. hepaticum**. See ANEMONE hepatica.—**T. hydropticum**. See MENTHANTHES trifoliata.—**T. incarnatum**. Fr., *farouche*, *lupinette*, *trèfle incarnat*, *fleur de chair*. Ger., *Blutklee*, *Incarnatklee*. Carnation clover, crimson (or Italian) clover (or trefoil); a European species recommended as a valuable plant for hay. [a, 35.]—**T. medium**. Cow-grass, red zigzag clover of Europe and northern and middle Asia; a perennial species. [a, 35.]—**T. mellilotum**, **T. odoratum**. See MELLILLOTUS officinalis.—**T. minus**. 1. See OXALIS acetosella. 2. A variety of *T. procumbens*. [a, 35.]—**T. ochroleucum**. Sulphur-clover, pale-yellow clover; a native of middle and southern Europe and western Asia, much cultivated in upper Italy. [a, 35.]—**T. odoratum**. See MELI-

**LOTUS officinalis**.—**T. paludosus**, **T. palustre**. See **MENYANTHES trifoliata**.—**T. pratense**. Fr., *trèfle des prés* (ou *commun*, ou *rouge de Hollande*), *grand trèfle rouge* (ou *de Hollande*, ou *d'Espagne*). Ger., *Wiesenklee*, *Futterklee*. Common clover, bread, cow-grass, purple (or red) clover, of Europe, northern Africa, Asia, and North America. The herb, flowers, and seed, formerly official as *herba, flores, et semen trifolii purpurei*, have been used in whooping-cough and chronic coughs. [a, 35].—**T. procumbens**. Lesser (or yellow, or low hop) clover of Europe and North America; a fodder herb. [a, 35].—**T. purpureum**. See **T. pratense**.—**T. repens**. Fr., *petit trèfle de Hollande*, *trèfle blanc* (ou *rampant*), *trifollet*. Ger., *kriechender Klee*, *Honigklee*. Ordinary white clover, honeysuckle-grass. The flowers and herb were formerly official and were used like those of **T. pratense**. The flowers are sometimes used as tea. [a, 35].—**T. sativum**. See **T. pratense**.

**TRIFURCATE**, adj. Tri-fur'k'at. Lat., *trifurcatus* (from *tres*, three, and *furca*, a fork). Fr., *trifurqué*, *trifourchu*. Ger., *dreigabelig*. Three-forked; dividing into three branches. [a, 35.]

**TRIGAMOUS**, adj. Tri-ga'm-u's. From *τρεῖς*, three, and *γάμος*, marriage. Having three kinds of flowers borne on the same species. [a, 34.]

**TRIGASTRIC**, adj. Tri-ga'st'ri'k. From *τρεῖς*, three, and *γαστήρ*, the stomach. Fr., *trigastrique*. Having three bellies (said of a muscle). [a, 48.]

**TRIGEMINAL**, adj. Tri-je'm/i'2-n'l. Lat., *trigeminus* (from *tres*, three, and *geminus*, twin-born). Ger., *dreigetheilt*. 1. Tripartite. 2. Threefold (three at a birth). [C.]

**TRIGEMINUS** (Lat.), n. m. Tri(tri)'2-je'm'(ge'm)/i'2-n-u's(u's). See **Trigeminal**; as a n., see **Trigeminal NERVE**.

**TRIGEMINUSHUSTEN** (Ger.), n. Tre-gam/i'2-n-u's-hust-e'n. Of Schadevald, a cough due to irritation of the trigeminus nerve, e. g., occasioned by disease of the nasal passages. [Wille, "Dtsch. med. Woch." 1885, 15, 17.]

**TRIGEMINUSKERN** [Stieda] (Ger.), n. Tre-gam/i'2-n-u's-ke'trn. See **Trigeminal NUCLEUS**.—**Motorischer T.**, **Oberer T.** The nucleus of origin of the motor fibres of the trigeminus. [I, 17 (K).]—**Sensibler T.** The sensory nucleus of the trigeminus. [I, 6 (K).]—**Unterer T.** See **Inferior trigeminus NUCLEUS**.

**TRIGEMINUSWURZEL** (Ger.), n. Tre-gam/i'2-n-u's-wurts-e'2l. The root of the trigeminal nerve. [I, 6 (K).]—**Unbeständige T.** See **CONDUCTOR SONORUS**.

**TRIGENIC ACID**, n. Tri-je'2n/i'2k. The compound C<sub>4</sub>H<sub>7</sub>N<sub>3</sub>O<sub>4</sub>. [B, 3 (a, 38).]

**TRIGLA** (Lat.), n. f. Tri-g'l'a'3. Ger., *τρίγλα*. A genus of acanthopterygian fishes. [a, 48].—**T. cuculus**. The red gurnard; a species common on European coasts. [L, 207 (a, 39).]

**TRIGLYCERYL ALCOHOL**, n. Tri-gli'2'e'r/i'2l. A derivative, (C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>(OH).O<sub>3</sub> = C<sub>9</sub>H<sub>19</sub>O<sub>7</sub>, of glyceryl alcohol (glycerin), not yet isolated in the pure state. [B, 4.]

**TRIGLYCOLLAMIC ACID**, n. Tri-gli'2k-o-2l-a'2m/i'2k. A crystalline solid, N(CH<sub>2</sub>.COOH)<sub>3</sub> = C<sub>6</sub>H<sub>9</sub>NO<sub>6</sub>, or more probably C<sub>12</sub>H<sub>18</sub>N<sub>2</sub>O<sub>12</sub>, having the properties of a dibasic or tribasic acid, and formed by substituting three molecules of the glycolic acid radicle, (CH<sub>2</sub>.COOH), for three atoms of hydrogen in ammonia. [B, 4.]

**TRIGONAL**, adj. Tri-g'o'n'l. See **TRIGONOUS**.

**TRIGONE**, n. Tri'gon. See **TRIGONUM**.—**Olfactory t.** See **TRIGONUM NERVI OLFACTORII**.—**T. cérébral** (Fr.). See **FORNIX CEREBRI**.—**T. dur** (Fr.). See **TRIGONUM DURUM**.—**T. intercrural** (Fr.). See **INTERPEDUNCULAR SPACE**.—**T. mou** (Fr.). The posterior cerebral commissure. [I, 39 (K).]—**T. of the bladder**. Lat., *trigonum vesicale*. A triangular smooth surface with its apex directed forward upon the fundus of the bladder to a point just posterior to the urethra and limited by two ridges which pass back to the apertures of the ureters and a line uniting these points. [L.]

**TRIGONELLA** (Lat.), n. f. Tri(tri)'2-go'n'(gon)-e'2l'i'a'3. From *τρίγωνος*, three-cornered. Fr., *trigonelle*. Ger., *Kuhhornklee*, *Hornklee*. A genus of the *Leguminosae*. The *Trigonella* are a section of the *Trifoliceae*. [a, 35].—**T. cerulea**. The *Melilotus caerulea*. [a, 35].—**T. elatior**. The *Λωρὸς ἄγριος* of Dioscorides, a species found in Asia Minor and in Cyprus. The seeds were formerly used in affections of the bladder, and externally in skin diseases and as an emollient poultice. [a, 35].—**T. fenum græcum**. Fr., *trigonelle fenum-græc*, *foin grec*, *saine-grain*, *sénegré*, *sennegrain*, *sénegré*, *sénegrain*. Ger., *gemeiner Kuhhornklee*, *Ziegenhornklee*, *Bockhornklee*, *Siebenzeit*, *Pönngrük*, *griechisches Heu*, *Fenugreek*; a native of southern Europe, Asia Minor, and northern Africa, cultivated for its bitter aromatic seeds, *semen feni* (see *fœni græci*, see *folioli eretici*), which are used as an emollient, in plasters and salves, and as a stimulant in veterinary medicine. [a, 35].—**T. monspeliaca**. A species found in southern Europe. In Italy a decoction of the seed is used in diarrhoea and externally as an emollient. [a, 35.]

**TRIGONELLINE**, n. Tri-g'o-n-e'2l'i'en. A hygroscopic alkaloid, C<sub>8</sub>H<sub>12</sub>N<sub>2</sub>O<sub>4</sub> + H<sub>2</sub>O, found in fenugreek-seeds and obtainable synthetically from nicotinic acid. [B, 270 (a, 38).]

**TRIGONOCEPHALISM**, n. Tri-go'n-o-se'2f'a'2l-i'2z'm. From *τρίγωνος*, three-cornered, and *κεφαλή*, the head. Ger., *Trigonoképhalie*. Of Welcher, a triangular cephalic malformation caused by compression of the anterior part of the skull; often associated with microphthalmia and cleft palate. [A, 37 (a, 34).]

**TRIGONOUS**, adj. Tri-g'o'n-u's. Lat., *trigonus*. Fr., *trigone*. Ger., *dreieckig*. Triangular. [a, 35.]

**TRIGONUM** (Lat.), n. n. Tri(tri)'2-gon'u'sm(u'm). Gr., *τρίγωνον* (from *τρίγωνος*, three-cornered). Fr., *trigone*. A triangle; in the brain, the interpeduncular space. [I, 17 (K).]—**T. acustic**. A tri-

angular space on the dorsal surface of the medulla, bounded superiorly by the auditory nerve, internally by the t. hypoglossi, and externally by the corpus restiforme. [Obersteiner (a, 34).]—**T. caroticum superius**. See **Superior carotid TRIANGLE**.—**T. cerebrale**. See **FORNIX CEREBRI**.—**T. cervicale**. 1. See **Superior carotid TRIANGLE**. 2. Of Goll, the base of the posterior gray cornu of the spinal cord. [I, 31 (K).]—**T. cervicale inferius**. See **Inferior carotid TRIANGLE** and **Supraclavicular FOSSA**.—**T. clavipectoral**. A triangular space bounded by the clavicle, the pectoralis minor, and the thorax. [a, 34].—**T. colli laterale**. See **Posterior TRIANGLE of the neck**.—**T. colli medianum**. The space occupied by the two anterior cervical triangles. [L].—**T. colli superius**. See **Upper cervical TRIANGLE**.—**T. coraco-acromiale**. The t. formed by the coracoid process, the apex of the acromion, and the concave border of the clavicle. [Luschka (a, 34).]—**T. cubitale**. See **FOSSA CUBITI**.—**T. deltoideopectoral**. See **Infraclavicular FOSSA**.—**T. durum**. The triangular interval between the anterior pair of the corpora quadrigemina. [I, 6 (K).]—**T. fluctuans**. See **Posterior cerebral COMMISSURE**.—**T. habenulae**. A small triangular area at the posterior portion of the upper surface of the optic thalamus, in front of the lamina quadrigemina and between the sulcus habenulae and the sulcus subpinealis. [I, 17 (K).]—**T. hypoglossi**. A triangular area on the dorsal surface of the medulla oblongata, bounded superiorly by the strie medullares acusticae, internally by the posterior longitudinal fissure, and externally by the ala cinerea. [Obersteiner (a, 34).]—**T. inferius commissurae posterioris**. The lower triangular half of the posterior commissure of the brain. [Krause (a, 18).]—**T. infraclavicular**. See **Infraclavicular FOSSA**.—**T. inguinale**. See **Scarpa's TRIANGLE**.—**T. intercrural**. Ger., *graue Bodencommissur* (1st def.). 1. See **SUBSTANTIA INTERMEDIA**. 2. See **LAMINA CINEREA**. 3. See **INTERPEDUNCULAR SPACE**.—**T. interpeduncular**. See **INTERPEDUNCULAR SPACE**.—**T. Lieutaudii**. See **TRIGONE of the bladder**.—**T. lumbale inferius**. See **TRIANGULUS PETITII**.—**T. lumbale superius**. See **Lumbocosto-abdominal TRIANGLE**.—**T. molle**. See **Posterior cerebral COMMISSURE**.—**T. nervi olfactorii**. **T. olfactorium**. See **CARUNCULA MAMILLARIS** (1st def.).—**T. omoclavicular**. See **Subclavian TRIANGLE**.—**T. omotrapezium**. See **Occipital TRIANGLE of the neck**.—**T. palatinum**. See **Palatal TRIANGLE**.—**T. pensile**. See **Posterior cerebral COMMISSURE**.—**T. Petiti**. See **TRIANGULUS PETITII**.—**T. Scarpæ**. **T. subinguinale**. See **Scarpa's TRIANGLE**.—**T. submaxillare**. See **Submaxillary TRIANGLE**.—**T. subpineale**. A triangular fossa anterior quadrigemina, formed by the median fissure, that rises abruptly from the velum medullare. It lodges the pineal gland. [a, 34].—**T. superius commissurae posterioris**. Ger., *unteres Markblatt der Zirbeldrüse*. The portion of the posterior commissure of the brain connected with the anterior portion of the pineal gland. [L, 332].—**T. vagi**. The narrow triangular area on the medulla oblongata, from which the vagus nerve arises. [a, 34].—**T. ventriculi lateralis**. A triangular projection between the entrances to the posterior and descending cornua of the lateral ventricle. [I, 17 (K).]—**T. vesicae**, **T. vesicale**. See **TRIGONE of the bladder**.

**TRIGUERA** (Lat.), n. f. Tre-gar'a'3. Fr., *triguère*. 1. A genus of the *Malvaceae*. 2. A genus of the *Solanaceae*. [a, 35].—**T. ambrosiaca**, **T. baccata**. Fr., *triguère odorante*. A species of *T.* (2d def.), an emollient, antispasmodic, and narcotic herb of Spain. A fragrant narcotic oil is prepared from it. [a, 35.]

**TRIGYNOUS**, adj. Tri-g'i'2-n-u's. Lat., *trigynus* (from *τρεῖς*, three, and *γυνή*, a woman). Fr., *trigyne*. Ger., *trigynisch*, *dreiweibig*. Having three pistils or styles. The *Trigynia* (Fr., *trigynie*) of Linnæus are a class of plants so characterized. [a, 35.]

**TRIHALOID**, n. Tri-ha'2l'oid. A compound of a radicle with three atoms of a halogen. [B, 4.]

**TRIHILATUS** (Lat.), adj. Tri(tri)'2-hi'2(hel)-at(a't)/u's(u's). From *tres*, three, and *hilum* (q. v.). Of some pollen grains (e. g., those of *Geraniaceae*), having three perforations in the extine. [a, 35.]

**TRIHYDRIC**, adj. Tri-hid'ri'2k. Containing three atoms of hydrogen in the molecule (said especially of acid salts). [B.]

**TRIHYDROXYBENZENE**, n. Tri-hid-ro'2x-i'2-be'2nz'en. See **HYDROXYQUINOL**, **PYRGAOLLOL**, and **PHLOROGUCCOL**.

**TRIHYDROXYBENZOLIC ACID**, n. Tri-hid-ro'2x-i'2-be'2nz-o'i'2k. An acid, C<sub>6</sub>H<sub>3</sub>O<sub>6</sub>, known in four of its six possible isomeric forms; namely, gallic acid (q. v.), pyrogallolcarboxylic acid, phloroglucinolcarboxylic acid, and a hydroxyquinolcarboxylic acid. [B, 3 (a, 38).]

**TRIHYDROXYDIHYDRANTHROQUINONE**, n. Tri-hid-ro'2x-i'2-di-hid-ra'2n'thro-kwi'2n'on. Purpuroxanthin, C<sub>14</sub>H<sub>4</sub>(OH)<sub>3</sub>O<sub>2</sub>H<sub>2</sub>. [B, 4, 270 (a, 38).]

**TRIHYDROXYNAPHTHALENE**, n. Tri-hid-ro'2x-i'2-na'2f'th'a'2l'en. See **OXYNAPHTHOL**.

**TRIHYDROXYQUINONE**, n. Tri-hid-ro'2x-i'2-kwi'2n'on. The compound C<sub>6</sub>H<sub>2</sub>(OH)<sub>3</sub>O<sub>2</sub>. [B, 3 (a, 38).]

**TRI-INYDYMUS** (Lat.), n. m. Tri(tri)'2-in(en)-i'2-o'd'i'2m(u'm)/u's(u's). From *τρεῖς*, three, *ἵνυς*, the nape of the neck, and *διδυμος*, double. A monster with a single body, but three distinct heads united by their posterior parts. [L, 49 (a, 14).]

**TRIIODACETIC ACID**, n. Tri-i'o'd-a'2s-et(e't)/i'2k. See under **IODACETIC ACID**.

**TRI-IODACETYL**, n. Tri-i'o'd-a'2s-e't'i'2l. A substitution product, C<sub>2</sub>I<sub>3</sub>O, of acetyl, in which all the hydrogen is replaced by iodine. [B.]—**T. hydride**. See **IODAL**.

**TRIIODIDE**, n. Tri-i'o'd-i'2d(i'd). An iodine compound analogous to a trichloride (q. v.). [B.]

**TRIODOBENZENE**, n. Tri-i'o'd-o-b'e'2nz'en. Ger., *Trijodbenzol*. A crystalline solid, C<sub>6</sub>H<sub>3</sub>I<sub>3</sub>. [B, 4.]

**TRIIODOPHENOL**, n. Tri-*i*'<sup>o</sup>d-o-fe<sup>2</sup>n<sup>o</sup>2l. Ger., *Trijodphenol*. The compound C<sub>6</sub>H<sub>2</sub>I<sub>3</sub>.OH. [B, 3 (a, 38); B, 4.]

**TRIIODOSALICYLIC ACID**, n. Tri-*i*'<sup>o</sup>d-o-sa<sup>2</sup>i-i<sup>2</sup>-si<sup>2</sup>/i<sup>2</sup>k. Fr., *acide triiodosalicylique* (ou *salicylique triiodé*). Ger., *Trijodsalicylsäure*. The compound C<sub>7</sub>H<sub>3</sub>I<sub>3</sub>O<sub>5</sub>. [B, 3 (a, 38).]

**TRISOBUTYLENE**, n. Tri-*i*2s-o-bu<sup>2</sup>i<sup>2</sup>i-en. The compound C<sub>12</sub>H<sub>24</sub>. [B, 3 (a, 38).]

**TRIUGATE, TRIJUGOUS**, adj's. Tri-*ju*2g-at, -u3s. Lat., *trijugatus*, *trijugus* (from *tres*, three, and *jugum*, a yoke). Fr., *trijugué*. Ger., *dreipaarig* (2d def.). 1. Of a fruit, having three jugs or ridges. 2. Having three pairs of leaflets. [a, 35.]

**TRIJUMEAU** (Fr.), n. Tre-zhu<sup>2</sup>-mo. See TRIPLET and *Trigenial nerve*.

**TRILAURIN**, n. Tri-la<sup>2</sup>r/i<sup>2</sup>n. See LAURIN.

**TRILLIUM** (Lat.), n. n. Tri<sup>2</sup>/i<sup>2</sup>i-u3m(u4m). From *tres*, three. Fr., *trillie*. American wood-lily, three-leaved nightshade, wake-robin; a genus of the *Liliaceae*. The *Trilliaceae*, or trillids (of Lindley, an order of the *Dictyogenae*), include genera (*T.*, *Paris*, etc.) referred by Bentham and Hooker to the *Medeoleae*. [a, 35.]—**T. cernuum**. 1. Drooping wake-robin (or wood-lily); a North American species. The root is emetic. 2. Of Torrey and Gray, see *T. pendulum*. [a, 35.]—**T. erectum**. Bath-flower, birthroot, bethroot, Indian balm, lamb's-quarters. The astringent and emetic root is considered tonic, expectorant, emmenagogue, and alterative, and has been used in diarrhoea, hemorrhages, and skin diseases and externally in chronic ulcers. [a, 35.]—**T. erythrocarpum**. Smiling wake-robin, painted t. (or wood-lily); found from Canada to Georgia. The root is used like that of *T. erectum*. [a, 35.]—**T. pendulum**. Indian balm; said to be used in menorrhagia. Some identify it with *T. erectum*. [a, 35.]—**T. stylosum**. A species growing in North Carolina and Georgia. Its root has probably the properties of that of *T. erectum*. [a, 35.]

**TRILO** (Sp.), n. Trei/yo. A place in Guadalajara, Spain, where there are hot chalybeate, saline, and sulphurous springs. [a, 14.]

**TRIOBATE, TRIOBED**, adj's. Tri-lob/at, tri/lobd. Lat., *trilobatus* (from *tripes*, three, and *lobos*, lobe). Fr., *trilobé*. Ger., *dreilappig*. Having three lobes. [a, 35.]

**TRIOCLAR, TRIOCLATE**, adj's. Tri-lo<sup>2</sup>k'u2l-a<sup>2</sup>r, -at. Three-celled. [a, 35.]

**TRIMARGARIN**, n. Tri-ma<sup>2</sup>rg/a<sup>2</sup>r-i<sup>2</sup>n. Fr., *trimargarine*. Ger., *T.* See under MARGARIN.

**TRIMELLITIC ACID**, n. Tri-me<sup>2</sup>l-i2t/i<sup>2</sup>k. Fr., *acide trimellitique* (ou *trimellique*). Ger., *Trimellithsäure*. An acid, C<sub>8</sub>H<sub>6</sub>O<sub>6</sub> = C<sub>6</sub>[CO.OH.CO.OH.H.CO.OH.H.H.], isomeric with hemimellitic acid and trimelic acid. [B, 3 (a, 38).]

**TRIMERCURIC**, adj. Tri-mu<sup>2</sup>r-ku<sup>2</sup>r/i<sup>2</sup>k. Containing three atoms of bivalent mercury. [B.]—**T.-diamine**. Written, also, *trimercuro-diamine*. Mercury nitride. [B.]

**TRIMEROUS**, adj. Tri<sup>2</sup>m'e<sup>2</sup>r-u3s. Lat., *trimerus* (from *tripes*, three, and *meros*, a part). Fr., *trimère*. Consisting of three parts; of a flower, having three members in each circle. [a, 35.]

**TRIMESIC ACID**, n. Tri-mes/i<sup>2</sup>k. Ger., *trimesinsäure*. Fr., *acide trimésique*. An acid, C<sub>8</sub>H<sub>6</sub>O<sub>6</sub> = C<sub>6</sub>[CO.OH.H.CO.OH.H.CO.OH.H.], isomeric with trimellitic acid and hemimellitic acid. [B, 3 (a, 38).]

**TRIMESTRIS** (Lat.), adj. Tri(tri<sup>2</sup>)-me<sup>2</sup>st/ri<sup>2</sup>s. From *tres*, three, and *mensis*, a month. Ripening in or lasting for three months. [a, 35.]

**TRIMETALLIC**, adj. Tri-me<sup>2</sup>t-a<sup>2</sup>i/i<sup>2</sup>k. From *tres*, three, and *metallum*, a metal. Containing in the molecule three atoms of a metallic element. [B.]

**TRIMETAPHOSPHATE**, n. Tri-me<sup>2</sup>t-a<sup>2</sup>-fo<sup>2</sup>s'fat. A polymeric derivative of a metaphosphate, having the general formulae R'''(PO<sub>3</sub>)<sub>3</sub>, R'/R'(P'O<sub>3</sub>)<sub>3</sub>, and R<sub>3</sub>(PO<sub>3</sub>)<sub>3</sub>. [B, 3.]

**TRIMETHACETIC ACID**, n. Tri-me<sup>2</sup>t-a<sup>2</sup>s-et(e<sup>2</sup>t)/i<sup>2</sup>k. Pseudovaleric acid. [B.] See under VALERIC ACID.

**TRIMETHENE**, n. Tri-me<sup>2</sup>th'en. Fr., *triméthène*. Ger., *Trimethen*. A radicle, C<sub>3</sub>H<sub>6</sub>, consisting of three molecules of methene. [B, 4.]

**TRIMETHYL**, n. Tri-me<sup>2</sup>th/i<sup>2</sup>l. The chemical group (CH<sub>3</sub>)<sub>3</sub>.

**TRIMETHYLAMINE**, n. Tri-me<sup>2</sup>th-i2l/a<sup>2</sup>m-en. A tertiary amine of methyl, N:(CH<sub>3</sub>)<sub>3</sub> = NC<sub>3</sub>H<sub>9</sub>, metamerie with propylamine; a mobile liquid having a peculiar fishy odor, boiling at about 10° C., and readily inflaming. It occurs naturally in *Arenopodium vulvaria*, *Mercurialis annua*, *Arnica montana*, etc., and in ergot. It is also found in cadavers, rotten fish, and animal liquids (e. g., hering brine), and may be prepared by distillation from various alkalis and other organic matters. [B.]

**TRIMETHYLAMINUM** (Lat.), n. n. Tri(tri<sup>2</sup>)-me<sup>2</sup>th-i2l(u<sup>2</sup>l). a<sup>2</sup>m(a<sup>2</sup>m)-in(en)/u<sup>2</sup>m(u<sup>2</sup>m). A 20-per-cent. aqueous solution of trimethylamine [Russ. Ph.]; an 8- or 9-per-cent. solution [Swiss Ph.] of the anhydrous substance. [B, 95 (a, 38).]

**TRIMETHYLAMMONIUM**, n. Tri-me<sup>2</sup>th-i2l-a<sup>2</sup>m-mon/i<sup>2</sup>2-u<sup>2</sup>m. A univalent radicle, (CH<sub>3</sub>)<sub>3</sub>≡N'-H = NC<sub>3</sub>H<sub>10</sub>. [B.]

**TRIMETHYLARSINE**, n. Tri-me<sup>2</sup>th-i2l-a<sup>2</sup>rs'en. A colorless liquid, As.(CH<sub>3</sub>)<sub>3</sub>. [B.]

**TRIMETHYLATED**, adj. Tri-me<sup>2</sup>th/i<sup>2</sup>l-at-ed. Fr., *triméthylé*. Combined with three molecules of methyl. [a, 38.]

**TRIMETHYLENE**, n. Tri-me<sup>2</sup>th/i<sup>2</sup>l-en. Fr., *triméthylène*. A substance, C<sub>3</sub>H<sub>6</sub>, isomeric with propylene, known only in the form of *t. bromide*, C<sub>3</sub>H<sub>5</sub>Br<sub>2</sub>, and *t. chloride*, C<sub>3</sub>H<sub>5</sub>Cl<sub>2</sub>, both liquids. [B, 93 (a, 14).]—**T. alcohol**. Primary propylene glycol; a thick liquid, C<sub>3</sub>H<sub>8</sub>(OH)<sub>2</sub>, having a sweet taste. [B, 3 (a, 38).]—

**T'disulphonic acid**. A dibasic acid. C<sub>3</sub>H<sub>4</sub>S<sub>2</sub>O<sub>4</sub> = CH<sub>2</sub>(SO<sub>2</sub>H) — CH<sub>2</sub> — CH<sub>2</sub>(SO<sub>2</sub>H), isomeric with propylene-disulphonic acid; a yellowish syrupy liquid of strongly acid reaction, which upon dehydration solidifies to form amber-colored acicular crystals; deliquescent in the air and soluble in alcohol and in ether. [A. Monari, "Ann. di chim. medico-farm. e di farmacol.," April-May, 1885, p. 253 (B).]

**TRIMETHYLIC**, adj. Tri-me<sup>2</sup>th-i2l/i<sup>2</sup>k. Containing three molecules of methyl, or derived by substitution from a body consisting of a triple molecule of methyl. [B.]

**TRIMETHYLIN**, n. Tri-me<sup>2</sup>th/i<sup>2</sup>i<sup>2</sup>n. A substance, C<sub>3</sub>H<sub>8</sub>-(CH<sub>3</sub>)<sub>3</sub>O<sub>3</sub>, produced by heating methyl alcohol and acrolein with a little acetic acid. [B, 2.]

**TRIMETHYLPHOSPHINE**, n. Tri-me<sup>2</sup>th-i2l-fo<sup>2</sup>s'fen. See under METHYLPHOSPHINE.

**TRIMETHYLOSANILINE**, n. Tri-me<sup>2</sup>th-i2l-roz-a<sup>2</sup>n/i<sup>2</sup>l-en. A substitution product of rosaniline, C<sub>20</sub>H<sub>16</sub>(CH<sub>3</sub>)<sub>3</sub>.N<sub>3</sub>. [B, 2.]—**T. hydride**. The compound C<sub>20</sub>H<sub>16</sub>(CH<sub>3</sub>)<sub>3</sub>.N<sub>3</sub>.2Hl. [B.]

**TRIMETHYLSTIBINE**, n. Tri-me<sup>2</sup>th-i2l-sti<sup>2</sup>b'en. A stibine, Sb.(CH<sub>3</sub>)<sub>3</sub>, which occurs both in the free state and in combination as a bivalent radicle. In the former case it is found as a heavy colorless liquid of very unpleasant odor, and taking fire spontaneously on exposure to the air. [B, 4.]

**TRIMETHYLXANTHIN**, n. Tri-me<sup>2</sup>th/i<sup>2</sup>i<sup>2</sup>-za<sup>2</sup>nth/i<sup>2</sup>n. A compound of three molecules of methyl and one of xanthin. [A, 319 (a, 34).]

**TRIMEZIA** (Lat.), n. f. Tre-me<sup>2</sup>z/i<sup>2</sup>a<sup>2</sup>. A genus of the *Iridaceae*. [a, 35.]—**T. lurida**, **T. martinicensis**. Fr., *triméezie de la Martinique*. A species of tropical America. The root is said to be tonic, astringent, and emmenagogue and the juice sternutatory. [a, 35.]

**TRIMOLYBDATE**, adj. Tri-mo<sup>2</sup>l-i2b'dat. A molybdate containing three atoms of molybdenum. [B.]

**TRIMORPHINE**, n. Tri-mo<sup>2</sup>rf'en. A polymer, C<sub>102</sub>H<sub>114</sub>N<sub>6</sub>O<sub>18</sub>, of morphine. [B, 2.]

**TRIMORPHISM**, n. Tri-mo<sup>2</sup>rf/i<sup>2</sup>z'm. From *tripes*, three, and *μορφή*, form. A threefold heterogonism, such as the production, on the same species of plant, of three different kinds (long-styled, mid-styled, and short-styled) of flowers. [a, 35.]

**TRIMORPHOUS**, adj. Tri-mo<sup>2</sup>rf/u<sup>2</sup>s. Lat., *trimorphus*. Occurring under three forms, exhibiting trimorphism. [a, 35.]

**TRIMYRISTIN**, n. Tri-mi<sup>2</sup>r-i2st/i<sup>2</sup>n. A crystalline substance, C<sub>3</sub>H<sub>5</sub>(C<sub>14</sub>H<sub>27</sub>O<sub>2</sub>)<sub>3</sub>, found in butter. [B, 3 (a, 38); B, 4.]

**TRINERVATE, TRINERVED**, adj's. Tri-nu<sup>2</sup>rv'v'at, tri-nu<sup>2</sup>rv'd. Lat., *trinervatus*, *trinervis*, *trinervius* (from *tres*, three, and *nervus*, a nerve). Fr., *trinervé*. Ger., *dreinervig*. In botany, having three nerves or ribs. [a, 35.]

**TRINITRANILINE**, n. Tri-nit-ra<sup>2</sup>n/i<sup>2</sup>l-en. Picramide, C<sub>6</sub>H<sub>2</sub>-(NO<sub>2</sub>)<sub>3</sub>NH<sub>2</sub> = C<sub>6</sub>[H.NO<sub>2</sub>.H.NO<sub>2</sub>.NH<sub>2</sub>.NO<sub>2</sub>]. [B, 3 (a, 38); B, 4.]

**TRINITRANISIC ACID**, n. Tri-nit-ra<sup>2</sup>n-i2s/i<sup>2</sup>2k. A substitution derivative, C<sub>6</sub>H<sub>5</sub>(NO<sub>2</sub>)<sub>3</sub>O<sub>3</sub>, of anisic acid.

**TRINITRANISOL**, n. Tri-nit-ra<sup>2</sup>n/i<sup>2</sup>s-o<sup>2</sup>l. Methyl picrate; a substitution derivative, C<sub>6</sub>H<sub>5</sub>(NO<sub>2</sub>)<sub>3</sub>OCH<sub>3</sub>, of anisol, occurring as yellow tabular crystals. [B, 2; B, 3 (a, 38).]

**TRINITRATE**, n. Tri-nit/rat. A nitrate containing three molecules of nitryl. [B, 3.]

**TRINITRIN**, n. Tri-nit/ri<sup>2</sup>n. Fr., *trinitrine*. Ger., *T.* See NITROGLYCERIN.

**TRINITROACETONITRILE**, n. Tri-nit/'ro-a<sup>2</sup>s-e<sup>2</sup>t-o-nit/ri<sup>2</sup>l. A camphor-like crystalline mass, C<sub>3</sub>H<sub>4</sub>O<sub>6</sub> = C(NO<sub>2</sub>)<sub>3</sub>.CN. [B, 4.]

**TRINITROAMIDOBENZENE**, n. Tri-nit/'ro-a<sup>2</sup>m-i2d-o-be<sup>2</sup>nz'en. See TRINITRANILINE.

**TRINITROAZOBENZENE**, n. Tri-nit/'ro-a<sup>2</sup>z-o-be<sup>2</sup>nz'en. A substance, C<sub>12</sub>H<sub>7</sub>N<sub>3</sub>O<sub>6</sub>, known in three isomeric forms: *α-t.*, C<sub>12</sub>H<sub>7</sub>(NO<sub>2</sub>)<sub>3</sub>N<sub>2</sub>, buff or sulphur-colored acicular crystals; *β-t.*, crystals melting at 180° C.; and *γ-t.*, C<sub>6</sub>H<sub>5</sub>.N<sub>2</sub>.C<sub>6</sub>H<sub>5</sub>(NO<sub>2</sub>)<sub>3</sub>, deep-red prismatic crystals. [B, 3 (a, 38).]

**TRINITROBENZOIC ACID**, n. Tri-nit/'ro-be<sup>2</sup>nz-o<sup>2</sup>i<sup>2</sup>k. A monobasic acid, C<sub>7</sub>H<sub>5</sub>N<sub>3</sub>O<sub>8</sub> = C<sub>6</sub>H<sub>4</sub>(NO<sub>2</sub>)<sub>3</sub>.CO.OH. [B, 2.]

**TRINITROCARBOLIC ACID**, n. Tri-nit/'ro-ka<sup>2</sup>rb-o<sup>2</sup>i<sup>2</sup>k. See TRINITROPHENOL.

**TRINITROCELLULIN, TRINITROCELLULOSE**, n's. Tri-nit-ro-se<sup>2</sup>l/u<sup>2</sup>l-i<sup>2</sup>n, -os. Gun-cotton; a substitution compound, C<sub>6</sub>H<sub>7</sub>O<sub>6</sub>(NO<sub>2</sub>)<sub>3</sub>, of cellulose, produced by the prolonged action of concentrated nitric acid with a little sulphuric acid on cotton-wool. It resembles ordinary cotton-wool, is insoluble in alcohol, but soluble in ether, and is inflammable and highly explosive. [B, 3, 4, 5, 8, 9.] Cf. PYROXYLIN.

**TRINITROCHLOROBENZENE**, n. Tri-nit/'ro-klor-be<sup>2</sup>nz'en. A derivative, C<sub>6</sub>H<sub>4</sub>(NO<sub>2</sub>)<sub>3</sub>.Cl, of picric acid. [B, 3.]

**TRINITROCRESOL, TRINITROCESYLIC ACID**, n's. Tri-nit/'ro-kre<sup>2</sup>s'o<sup>2</sup>l, -i2l/i<sup>2</sup>k. The compound C<sub>7</sub>H<sub>4</sub>(NO<sub>2</sub>)<sub>3</sub>.OH. [B.]

**TRINITROMESITYLENE**, n. Tri-nit/'ro-me<sup>2</sup>s-i2t/i<sup>2</sup>l-en. The compound C<sub>6</sub>(NO<sub>2</sub>)<sub>3</sub>(CH<sub>3</sub>)<sub>3</sub> = C<sub>6</sub>H<sub>3</sub>N<sub>3</sub>O<sub>6</sub>. [B, 3 (a, 38); B, 4.]

**TRINITROMETHANE**, n. Tri-nit/'ro-me<sup>2</sup>th'an. See NITROFORM.

**TRINITRONAPHTHALENE**, n. Tri-nit/'ro-na<sup>2</sup>f'tha<sup>2</sup>l-en. A substance, C<sub>10</sub>H<sub>6</sub>(NO<sub>2</sub>)<sub>3</sub>, existing in three isomeric forms. [B, 93 (a, 14).]

**TRINITRO-ORCIN**, n. Tri-nit/'ro-o<sup>2</sup>rs/i<sup>2</sup>n. A substance, C<sub>7</sub>H<sub>3</sub>(NO<sub>2</sub>)<sub>3</sub>(OH)<sub>2</sub> = C<sub>7</sub>H<sub>3</sub>N<sub>3</sub>O<sub>6</sub>, acting as a dibasic acid, and forming large yellow prismatic crystals. [B, 4.]

**TRINITRO-ORCINIC ACID**, n. Tri-nit/ro-o<sup>2</sup>rs-i<sup>2</sup>n/i<sup>2</sup>k. A dibasic crystalline acid, C<sub>7</sub>H<sub>5</sub>N<sub>3</sub>O<sub>8</sub> = C<sub>7</sub>H<sub>5</sub>(NO<sub>2</sub>)<sub>3</sub>O<sub>2</sub>, formed by the action of nitric acid on orcin at a temperature of -10° C. [B, 2.]

**TRINITROPHENATE**, n. Tri-nit/ro-fe<sup>2</sup>n/at. See PICRATE.

**TRINITROPHENOLIC ACID**, **TRINITROPHENOL**, n's. Tri-nit/ro-fe<sup>2</sup>n/i<sup>2</sup>k, -fe<sup>2</sup>n/o<sup>2</sup>l. A substance, C<sub>6</sub>H<sub>3</sub>N<sub>3</sub>O<sub>7</sub>, known in three isomeric forms: α-t, or picric acid (q. v.); β-t, C<sub>6</sub>[H<sub>2</sub>(NO<sub>2</sub>)<sub>3</sub>OH, NO<sub>2</sub>], white acicular or laminar crystals; and γ-t, C<sub>6</sub>[H<sub>2</sub>(NO<sub>2</sub>)<sub>3</sub>OH, NO<sub>2</sub>], white acicular crystals. [B, 3 (a, 38).]

**TRINITROPHLOROGLUCOL**, n. Tri-nit/ro-flor-o-gluc/i<sup>2</sup>ko<sup>2</sup>l. A derivative, C<sub>6</sub>(NO<sub>2</sub>)<sub>3</sub>(OH)<sub>2</sub> = C<sub>6</sub>H<sub>3</sub>N<sub>3</sub>O<sub>8</sub>, of phloroglucol, crystallizing from hot water as yellow prismatic crystals containing a molecule of water, becoming anhydrous at 100°, beginning to sublime at 130°, melting at 158° C., and exploding at a higher temperature. [B, 3 (a, 38); B, 4.]

**TRINITRORESORCIN**, **TRINITRORESORCINOL**, n's. Tri-nit/ro-re<sup>2</sup>z-o<sup>2</sup>r/si<sup>2</sup>n, -o<sup>2</sup>r/si<sup>2</sup>n-o<sup>2</sup>l. See STYPHNIC ACID.

**TRINITROTOLUENE**, n. Tri-nit/ro-to<sup>2</sup>l-u<sup>2</sup>e<sup>2</sup>n. A substance, C<sub>7</sub>H<sub>5</sub>(NO<sub>2</sub>)<sub>3</sub>CH<sub>3</sub>, known in three isomeric forms: α-t, C<sub>6</sub>(NO<sub>2</sub>)<sub>3</sub>CH<sub>2</sub>CH<sub>3</sub>, H, NO<sub>2</sub>, H, CH<sub>3</sub>], tabular or acicular crystals of a golden color; β-t, transparent prismatic or white tabular or acicular crystals; and γ-t, yellowish crystals. [B, 3 (a, 38); B, 4.]

**TRINITY SPRINGS**, n. Tri<sup>2</sup>n/i<sup>2</sup>t-i<sup>2</sup>. A place in Martin County, Indiana, where there are sulphurous springs. [a, 14.]

**TRINKUR** (Ger.), n. Tri<sup>2</sup>n<sup>2</sup>k/kur. A course of treatment by drinking mineral waters.

**TRINKEN** (Ger.), n. Tri<sup>2</sup>n<sup>2</sup>k'e<sup>2</sup>n. See DRINK.—Heisst'. See THERMOPESIA.

**TRIOCEPHALUS** (Lat.), n. m. Tri(tri<sup>2</sup>-o(o<sup>2</sup>)-se<sup>2</sup>f(ke<sup>2</sup>f/a<sup>2</sup>l-(n<sup>2</sup>)-u<sup>2</sup>s(u<sup>2</sup>s)). From *tripes*, three, and *κεφαλή*, the head. Of I. Geoffroy St.-Hilaire, *triocephalus*. [a, 34.]

**TRIOCIUS**, **TRIOCIUS**, adj's. Tri-esh/u<sup>2</sup>s, -olk/u<sup>2</sup>s. Lat., *trioicius*, *trioicius* (from *tripes*, three, and *okos*, a house). Fr., *trioïque*. Ger., *dreihäusig*. Having staminate, pistillate, and perfect flowers on three distinct individuals. The *Triœcia* of Linnæus are an order of the class *Polygamia* so characterized. [a, 35.]

**TRIOLEIN**, n. Tri-o/e<sup>2</sup>i<sup>2</sup>n. See OLEIN.

**TRIONAL**, n. Tri-o<sup>2</sup>n'l. A substance,  $\text{C}_6\text{H}_5 > \text{C} < \text{SO}_2 \cdot \text{C}_6\text{H}_5 = \text{C}_6\text{H}_5 \cdot \text{SO}_2 \cdot \text{C}_6\text{H}_5$ , occurring as shining tabular or foliate crystals; a hypnotic. [B, 270 (a, 38).]

**TRIOPODYMUS** (Lat.), n. m. Tri(tri<sup>2</sup>-op-o<sup>2</sup>d/i<sup>2</sup>m(u<sup>2</sup>m)-u<sup>2</sup>s(u<sup>2</sup>s)). From *tripes*, three, *ῥῶψ*, the face, and *δίδυμος*, double. A monster with a single head, but three faces. [L, 49 (a, 14).]

**TRIORCHIS** (Lat.), n. m. Tri(tri<sup>2</sup>-o<sup>2</sup>rk(o<sup>2</sup>rch<sup>2</sup>/i<sup>2</sup>s. Gen., -orch'ios, -orch'eos. From *tripes*, three, and *ὄρχις*, a testicle. Ger., *Dreihodiger*. An individual having three testicles. [L, 50 (a, 14).]—*T. alba odorata*. The *Spiranthes autumnalis*. [a, 35.]

**TRIOSTEUM** (Lat.), n. n. Tri(tri<sup>2</sup>-o<sup>2</sup>st-e<sup>2</sup>u<sup>2</sup>m(u<sup>2</sup>m)). From *tripes*, three, and *ὄστέον*, a bone. Fr., *triostée*. Ger., *Dreikern*. A genus of the *Caprifoliaceæ*. The *Triosteæ* are a subtribe of the *Lonicereæ*. [a, 35.]—*T. angustifolium*. Horse-gentian; found in the southern United States. The root is used like that of *T. perfoliatum*. [a, 35.]—*T. perfoliatum*. Fr., *ipécacuanha de Virginie*. Ger., *durchwachsenblättriger Dreikern*. Wild ipecac, horse-gentian, fever-root, feverwort; a North American herb. The yellowish or brownish root, *radix triosteæ*, has a bitter, nauseous taste and a sickening odor, and is cathartic and emetic. [a, 35.]

**TRIOVULATE**, adj. Tri-o<sup>2</sup>v/u<sup>2</sup>l-at. Lat., *triovulvatus* (from *tres*, three, and *ovulum*, an ovule). Having three ovules. [a, 35.]

**TRIOXIDE**, n. Tri-o<sup>2</sup>x/i<sup>2</sup>d(id). An oxygen compound analogous to a trichloride (q. v.). [B.]

**TRIOXINDOL**, n. Tri-o<sup>2</sup>x-i<sup>2</sup>nd'o<sup>2</sup>l. See ISATIC ACID.

**TRIOXYADIPIC ACID**, n. Tri-o<sup>2</sup>x-i<sup>2</sup>a<sup>2</sup>d-i<sup>2</sup>p/i<sup>2</sup>k. See under HYDROXYADIPIC ACID.

**TRIOXYBENZENE**, n. Tri-o<sup>2</sup>x-i<sup>2</sup>-be<sup>2</sup>nz/en. See TRIBYDROXYBENZENE.

**TRIOXYBENZOIC ACID**, n. Tri-o<sup>2</sup>x-i<sup>2</sup>-be<sup>2</sup>nz-o/i<sup>2</sup>k. See TRIBYDROXYBENZOIC ACID.

**TRIOXYCHLORIC ACID**, n. Tri-o<sup>2</sup>x-i<sup>2</sup>-klor/i<sup>2</sup>k. Of Kämmerer, chloric acid. [B, 2.]

**TRIOXYNAPHTHALENE**, n. Tri-o<sup>2</sup>x-i<sup>2</sup>-na<sup>2</sup>f'tha<sup>2</sup>l-en. See under OXYNAPHTHOL.

**TRIPALMITIN**, n. Tri-pa<sup>2</sup>l'mi<sup>2</sup>t-i<sup>2</sup>n. Fr., *tripalmitine*. Ger., *T. Palmitin*. C<sub>51</sub>H<sub>98</sub>(C<sub>17</sub>H<sub>35</sub>)<sub>3</sub>, occurring as pearly laminar crystals; a constituent of nearly all the animal and vegetable fats. [B, 4.]

**TRIPARTITE**, adj. Tri-pa<sup>2</sup>rt/i<sup>2</sup>t. Lat., *tripartitus* (from *tres*, three, and *partiri*, to divide). Fr., *triparti*. Ger., *dreitheilig*. Divided to (or nearly to) the base into three divisions. [a, 35.]

**TRIEPE DE ROCHE** (Fr.), n. Trep d'rosh. Rock-tripe; a name given by Arctic navigators to mucilaginous lichens of the genera *Gyrophora* and *Umbilicaria*, especially the latter. They are much used as food, but contain a bitter principle which often causes diarrhoea. [a, 35.]

**TRIPES** (Lat.), adj. Tri(tri<sup>2</sup>/pez(pas). Gen., *trip'edis*. Fr., *trippé*. Ger., *dreifüssig*. Three-footed. [A, 312 (a, 48).]

**TRIPETALOID**, adj. Tri-pe<sup>2</sup>t'a<sup>2</sup>l-oid. From *tripes*, three, *πέταλον*, a leaf, and *είδος*, resemblance. Consisting of or containing three petaloid parts. The *Tripetaloidea* of Linnæus are an order of plants, comprising *Calamagrostis*, *Alisma*, *Sagittaria*, etc. [a, 35.]

**TRIPETALOUS**, adj. Tri-pe<sup>2</sup>t'a<sup>2</sup>l-u<sup>2</sup>s. Having three petals.

**TRIPHARMACUM** (Lat.), n. n. Tri(tri<sup>2</sup>-fa<sup>2</sup>rm'a<sup>2</sup>ka<sup>2</sup>m(u<sup>2</sup>m)-i<sup>2</sup>m(u<sup>2</sup>m)). From *tripes*, three, and *φάρμακον*, a drug. Fr., *tripharmaque*. A medicine composed of three ingredients. [L, 41, 50 (a, 14).]

**TRIPHENOL**, n. Tri-fe<sup>2</sup>n/o<sup>2</sup>l. See TRIHYDROXYBENZENE.

**TRIPHENYL**, n. Tri-fe<sup>2</sup>n/i<sup>2</sup>l. The chemical group (C<sub>6</sub>H<sub>5</sub>)<sub>3</sub>. [a, 38.]—*T'rosaniline*. The compound C<sub>18</sub>H<sub>15</sub>N<sub>3</sub> = C<sub>20</sub>H<sub>16</sub>(C<sub>6</sub>H<sub>5</sub>)<sub>3</sub>N<sub>3</sub>. It constitutes *bleu de Lyon*, and probably also diphenylamine blue. [B, 2.]

**TRIPHYLLOUS**, adj. Tri-fi<sup>2</sup>l/u<sup>2</sup>s. Three-leaved; of a corolla, tripetalous; of a calyx, trisepalous. [a, 35.]

**TRIPINNATE**, adj. Tri-pi<sup>2</sup>n/at. Lat., *tripinnatus* (from *tres*, three, and *pinna*, a feather). Fr., *tripenné*. Thrice pinnate (said of compound leaves in which the secondary pinnae are themselves pinnate). [a, 35.]

**TRIPINNATIFID**, adj. Tri-pi<sup>2</sup>n-a<sup>2</sup>t/i<sup>2</sup>-f'id. Lat., *tripinnatifidus* (from *tres*, three, *pinna*, a feather, and *findere*, to split). Fr., *tripennatifide*. Ger., *dreifederspaltig*. Thrice pinnatifid. [a, 35.]

**TRIPINNATISECT**, adj. Tri-pi<sup>2</sup>n-a<sup>2</sup>t/i<sup>2</sup>-se<sup>2</sup>kt. Lat., *tripinnatisectus* (from *tres*, three, *pinna*, a feather, and *secare*, to cut). 1. Divided to the base in a tripinnate manner. 2. Tripinnate. [a, 35.]

**TRIPLET**, n. Tri-pi<sup>2</sup>l'e<sup>2</sup>t. Lat., *tergeminus*, *trigeminus*. Fr., *trijumeau*. Ger., *Drilling*, *Drillingsfrucht*. One of three born as the result of one gestation. [a, 48.]

**TRIPLOIDES INSTRUMENTUM** (Lat.), n. n. Tri<sup>2</sup>p-lo(i<sup>2</sup>o<sup>2</sup>)-i<sup>2</sup>d(ed)/ez(as) i<sup>2</sup>n-stru<sup>2</sup>(stru)-me<sup>2</sup>nt'u<sup>2</sup>m(u<sup>2</sup>m)). From *τρίπλος*, triple, and *είδος*, resemblance. Fr., *triploïde*. A three-pronged instrument formerly used for raising depressed fragments of the skull in trephining. [L, 41, 50 (a, 14).]

**TRIPLOPIA** (Lat.), n. f. Tri<sup>2</sup>p-lop/i<sup>2</sup>a<sup>2</sup>. From *τρίπλος*, triple, and *ὥψ*, the eye. Fr., *triplopie*. The simultaneous formation of three visual images of an object. [a, 18.]

**TRIPLUMBIC**, adj. Tri-plu<sup>2</sup>mb/i<sup>2</sup>k. Containing three atoms of lead in the molecule. [B.]

**TRIPMADAM**, n. Tri<sup>2</sup>p/ma<sup>2</sup>d-m. Ger., *T*. See *SEDUM reflexum*.

**TRIPOD**, n. Tri-po<sup>2</sup>d. Gr., *τρίπους* (from *tripes*, three, and *πούς*, the foot). Lat., *tripus*. Fr., *trépied*. Ger., *Dreifuß*. A support having three legs. [L.—Vital i. The brain, heart, and lungs, so called as being the main supports of vitality. [a, 48.]

**TRIPOLITH**, n. Tri<sup>2</sup>p-o/i<sup>2</sup>th. From *tripes*, three, and *λίθος*, a stone. An artificial mixture of gypsum, magnesium sulphate, and powdered cork, used as a material for splints. [“Lancet,” 1881, li, p. 120 (a, 34).]

**TRIPPER** (Ger.), n. Tri<sup>2</sup>p/pe<sup>2</sup>r. See GONORRHEA.—*Fuhrmannst.* See CHORDEE.—*Nacht.* See GLEET.—*Syphilitischer T.* See GONORRHOUSYPHILIS.—*T'hode*. See EPIDIDYMITIS.—*T'hodenentzündung*. See GONORRHOECITIS.—*T'nebenhodenentzündung*. Gonorrhoeal epididymitis.

**TRIPROPYLAMINE**, n. Tri-pro-pi<sup>2</sup>l/a<sup>2</sup>m-en. A tertiary amine of propyl, N(C<sub>3</sub>H<sub>7</sub>)<sub>3</sub>, not yet obtained in the pure state. [B.]

**TRIPROPYLARSINE**, n. Tri-pro-pi<sup>2</sup>l-a<sup>2</sup>rs/en. A body, As(C<sub>3</sub>H<sub>7</sub>)<sub>3</sub>, having a very disagreeable odor. [B, 3.]

**TRIPSINE** (Fr.), n. Trep-sen. See TRYPAIN.

**TRIPSIS** (Lat.), n. f. Tri<sup>2</sup>ps(traps)/i<sup>2</sup>s. Gen., *trips'eos* (-is). Gr., *τρίψις* (from *τρίβω*, to rub). See COMMINATION.

**TRIPTEROUS**, adj. Tri-p'te<sup>2</sup>r-u<sup>2</sup>s. From *tripes*, three, and *πτερόν*, a wing. Having three wings or alæ. [a, 35.]

**TRIPYOKORIA** (Lat.), n. f. Tri<sup>2</sup>pt-o(o<sup>2</sup>)-kor(ko<sup>2</sup>r)/i<sup>2</sup>a<sup>2</sup>. From *tripes*, three, *πίπτειν*, to fall, and *κόρη*, the pupil. That condition of the iris in which there are three distinct and separate pupils. [F.]

**TRIPUDIATIO** (Lat.), n. f. Tri(tri<sup>2</sup>-pu<sup>2</sup>d(pu<sup>2</sup>d)-i<sup>2</sup>a(a<sup>2</sup>)/shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., -on'is. From *tripudiare*, to dance. Ger., *Tanzwuth*. See CHOREA (2d def.).—*T. spastica*. See *Epidemic CHOREA*.

**TRIPUS** (Lat.), n. m. Tri(tri<sup>2</sup>/pu<sup>2</sup>s(pus). Gen., *trip'odis*. Gr., *τρίπους* (from *tripes*, three, and *πούς*, the foot). See TRIPOD.—*T. celiacus*, *T. Halleri*. The three branches of the celiac artery. [L, 31.]

**TRIQUE-MADAME** (Fr.), n. Trek-ma<sup>2</sup>-da<sup>2</sup>m. The *Sedum album* and *Sedum acre*. [a, 35.]

**TRIQUETROUS**, adj. Tri-kwe<sup>2</sup>t-ru<sup>2</sup>s. Lat., *triquetus*, *triquetrus* (from *tres*, three). Fr., *triquètre*. Ger., *dreiseitig*, *dreischneidig*, *dreikantig*. Having three salient angles; triangular-prismatic. [a, 35.]

**TRIQUETRUM** (Lat.), n. n. Tri(tri<sup>2</sup>-kwe<sup>2</sup>t/ru<sup>2</sup>m(ru<sup>2</sup>m)). The cuneiform bone of the hand. [L.]

**TRIQUNOYL**, n. Tri-kwi<sup>2</sup>n'o-i<sup>2</sup>l. See BENZOTRIQUINONE.

**TRICINOLEIN**, n. Tri-tri<sup>2</sup>s i<sup>2</sup>n-o<sup>2</sup>l/e<sup>2</sup>i<sup>2</sup>n. See RICINOLEIN.

**TRISALT**, n. Tri-sa<sup>2</sup>lt. Fr., *trisel*. A salt containing three times as much base as acid. [L, 41, 49 (a, 14).]

**TRISCAPULO-HUMERO-OLÉCRANIEN** (Fr.), n. Tre-ska<sup>2</sup>-pu<sup>2</sup>-lo-u<sup>2</sup>-ma-ro-o-la-kra<sup>2</sup>-ne-a<sup>2</sup>n<sup>2</sup>. See *Triceps EXTENSOR cubiti*.

**TRISECTED**, adj. Tri-se<sup>2</sup>kt/a<sup>2</sup>d. Lat., *trisectus* (from *tres*, three, and *secare*, to cut). Ger., *dreischneittig*. Of a leaf, divided into three portions by incisions reaching to the midrib or base. [a, 35.]

**TRISELENIDE**, n. Tri-se<sup>2</sup>l'e<sup>2</sup>n-i<sup>2</sup>d(id). Fr., *trisélénure*. A selenium compound analogous to a trichloride (q. v.). [B.]

**TRISERIAL**, **TRISERIAL**, adj's. Tri-ser/i<sup>2</sup>-l, -at. Lat., *triserialis*, *triserialis* (from *tres*, three, and *series*, a row). Arranged in three horizontal rows. [a, 35.]

**TRISEPALOUS**, adj. Tri-se<sup>2</sup>p'l-u<sup>2</sup>s. From *tres*, three, and *sepalum*, a sepal. Composed of three sepals. [a, 35.]

**TRISSETUM** (Lat.), n. n. Tri(tri<sup>2</sup>-set<sup>2</sup>sa<sup>2</sup>t'u<sup>2</sup>m(u<sup>2</sup>m)). From *tres*, three, and *setum*, a bristle. Fr., *triséte*. A genus of grasses closely related to *Avena*. [a, 35.]—*T. flavescens*. Fr., *avenette blonde*.

*petit fromental, avoine blonde*. Ger., *Goldhafer, gelber Weisenhafer*. Yellow oat (-grass), having small yellow flowers, found in Europe, northern Asia, and North America. [B, 19, 173; a, 35.]

**TRISILICIC ACID**, n. Tri-si<sup>2</sup>i<sup>2</sup>s<sup>2</sup>i<sup>2</sup>2k. An acid containing three atoms of silicon. Although the salts (called *trisilicates*) of several of these acids exist, the acids themselves, 3SiO<sub>2</sub>·2H<sub>2</sub>O = H<sub>4</sub>Si<sub>3</sub>O<sub>10</sub>, 3SiO<sub>2</sub>·5H<sub>2</sub>O = H<sub>4</sub>Si<sub>3</sub>O<sub>11</sub>, and 3SiO<sub>2</sub>·7HO = H<sub>4</sub>Si<sub>3</sub>O<sub>13</sub>, have not been isolated. [B, 3.]

**TRISMOID**, n. Tri-s<sup>2</sup>m<sup>2</sup>oid. From *τρισμός*, trismus, and *είδος*, resemblance. Of Sims, a chronic form of trismus nascentium attributed to depression of the occipital bone during labor. [Hartigan, "N. Y. Med. Jour.," Jan. 3, 1885, p. 16.] Cf. *White Lock-Jaw*.

**TRISMUS** (Lat.), n. m. Tri<sup>2</sup>s<sup>2</sup>(tri<sup>2</sup>s<sup>2</sup>/mu<sup>2</sup>s(mu<sup>2</sup>s)). Gr., *τρισμός* (from *τρις*, to gnash). Fr., *trisme, mal de mâchoire*. Ger., *T., Klemme, Kieferklemme, Maulklemme, Mundklemme, Zäbnerknirschen*. Locked jaw, lock-jaw; tonic spasm of the muscles that close the jaws. [E.]—**T. capistratus**. Fr., *brédissure*. An impossibility of separating the jaws, in consequence of adhesion of the internal surface of the cheeks to the gums, following ulceration of those parts. [a, 34.]—**T. catarrhalis maxillaris**. See GNATHALGIA.—**T. cynicus**. See *RISUS sardonius*.—**T. dolorificus**. Tic douloureux. [L, 128.]—**T. maxillaris**. See GNATHALGIA.—**T. nascentium**, **T. neonatorum**. Fr., *sarrête, mal de sept jours*. Nine-day fits; tetanus affecting infants, usually within the first two weeks of life. It begins with t., and that remains one of the most prominent symptoms. [a, 34.]—**T. of cerebral origin** [Lépine]. See *Masticatory MONOSPASM*.—**T. sardonius**. See *RISUS sardonius*.—**T. uteri**. See *TETANUS uteri*.

**TRISPLANCHNIA** (Lat.), n. f. Tri(tri<sup>2</sup>)-spla<sup>2</sup>n<sup>2</sup>k(spla<sup>2</sup>n<sup>2</sup>ch<sup>2</sup>)/ni<sup>2</sup>-a<sup>2</sup>. From *τρεις*, three, and *σπλάχνα*, the viscera. Fr., *trispplanchnie*. Of Pinel, see *Asiatic CHOLERA*.

**TRISPLANCHNIC**, adj. Tri-spla<sup>2</sup>n<sup>2</sup>k/ni<sup>2</sup>k. Pertaining to the contents of the three great body-cavities. The t. nerve is the sympathetic. [L, 50 (a, 48).]

**TRISTACHYOUS**, adj. Tri-sta<sup>2</sup>k/i<sup>2</sup>-u<sup>2</sup>s. From *τρεις*, three, and *σάχυς*, an ear of corn. Having three spikes. [a, 35.]

**TRISTEARIN**, n. Tri-ste<sup>2</sup>a<sup>2</sup>r-i<sup>2</sup>n. Ger., *T. Stearin*, C<sub>18</sub>H<sub>36</sub>-(C<sub>18</sub>H<sub>36</sub>O<sub>2</sub>), occurring as scaly crystals of pearly lustre; a constituent of most of the animal fats. [B, 3 (a, 38); B, 4.]

**TRISTICHIASIS** (Lat.), n. f. Tri(tri<sup>2</sup>)-sti<sup>2</sup>k(sti<sup>2</sup>ch<sup>2</sup>)-i<sup>2</sup>-a<sup>2</sup>(a<sup>2</sup>)/si<sup>2</sup>s. Gen., -as<sup>2</sup>eos(-is). From *τρίστιχία*, a triple row. Of Cornaz, a form of congenital distichiasis in which there are three rows of cilia. ["Ann. d'ocul.," xxvii (F).]

**TRISTICHOUS**, adj. Tri-s<sup>2</sup>t<sup>2</sup>i<sup>2</sup>k-u<sup>2</sup>s. Arranged in three vertical rows. [a, 35.]

**TRISTIGMATIC**, adj. Tri-sti<sup>2</sup>g-ma<sup>2</sup>t/i<sup>2</sup>2k. From *τρεις*, three, and *στίγμα* (see *STIGMA*). Having three stigmata. [a, 35.]

**TRISTIMANIA** (Lat.), n. f. Tri<sup>2</sup>st-i<sup>2</sup>-man(ma<sup>2</sup>n)/i<sup>2</sup>-a<sup>2</sup>. From *tristis*, sad, and *mania*, madness. Of Rush, melancholia. [D, 36.]

**TRISTIS** (Lat.), adj. Tri<sup>2</sup>st/i<sup>2</sup>s. In botany, of a dull color. [a, 35.]

**TRISUBSTITUTED**, adj. Tri-su<sup>2</sup>b<sup>2</sup>/sti<sup>2</sup>2k-u<sup>2</sup>t-e<sup>2</sup>d. Having three elements replaced by equivalent elements. [B.]

**TRISULCATE**, adj. Tri-su<sup>2</sup>l<sup>2</sup>k/at. From *tres*, three, and *sulcus*, a furrow. Having three grooves. [a, 35.]

**TRISULFURETUM** (Lat.), n. n. Tri(tri<sup>2</sup>)-su<sup>2</sup>l<sup>2</sup>f(su<sup>2</sup>l<sup>2</sup>f)-u<sup>2</sup>2r(u<sup>2</sup>r)-et(at)/u<sup>2</sup>2m(u<sup>2</sup>m). See *TRISULPHIDE*.—**T. potassicum**. See *POTASSA sulfurata* (1st def.).—**T. sodicum**. See *SODIUM trisulphide*.

**TRISULPHATE**, n. Tri-su<sup>2</sup>l<sup>2</sup>f/at. See *TERSULPHATE*.

**TRISULPHIDE**, n. Tri-su<sup>2</sup>l<sup>2</sup>f/i<sup>2</sup>d(id). A sulphur compound analogous to a trichloride (q. v.). [B.]

**TRISULPHURETUM** (Lat.), n. n. Tri(tri<sup>2</sup>)-su<sup>2</sup>l<sup>2</sup>f(su<sup>2</sup>l<sup>2</sup>f)-u<sup>2</sup>2r(u<sup>2</sup>r)-et(at)/u<sup>2</sup>2m(u<sup>2</sup>m). See *TRISULPHIDE*.—**T. kalicum**. See *POTASSA sulphurata* (1st def.).—**T. kalicum ad usum externum**. See *POTASSA sulphurata* (2d def.).

**TRITOEPIHYA** (Lat.), n. f. Tri<sup>2</sup>-t<sup>2</sup>e<sup>2</sup>(a<sup>2</sup>-e<sup>2</sup>)-o<sup>2</sup>2f/i<sup>2</sup>2(u<sup>2</sup>)-a<sup>2</sup>. From *τρίτοπος*, of the third day, and *φύειν*, to produce. Written also *tritoeophya* and *tritoeophia*. Fr., *tritoeophye*. See *Tertian FEVER*.—**T. americana**. Of Sauvages, the pernicious malarial fever of immigrants to Spanish America. [a, 34.]—**T. carotica**. See *FEBRIS tertiana lethargica*.—**T. caesus**. See *Ardent FEVER*.—**T. deceptiva**. See *Intermittent FEVER*.—**T. hepatalgia**. See *FEBRIS quartana hepatica*.—**T. humerosa**. See *AMPEMERINA syncopealis*.—**T. elodes**. See *Sweating FEVER* (1st def.).—**T. lactea**. See *FEBRIS lactea*.—**T. leipylia**. See *AMPEMERINA phricodes*.—**T. maligna**. Of Lautser, see *Pernicious malarial FEVER*.—**T. semitertiana**. See *AMPEMERINA semiquartana*.—**T. simplex**. See *T. splenalgia*. See *FEBRIS quartana splenetica*.—**T. syncopealis**. See *AMPEMERINA syncopealis*.—**T. typhodes**. Of Mangetus, see *Typhus FEVER*.—**T. vratilaviensis**. See *Breslau FEVER*.

**TRITAEUS** (Lat.), n. m. Tri<sup>2</sup>t-e<sup>2</sup>(a<sup>2</sup>e<sup>2</sup>)-u<sup>2</sup>2s(u<sup>2</sup>s). Gr., *τρίταιος*. See *Tertian FEVER*.

**TRITELLURIDE**, n. Tri-te<sup>2</sup>l<sup>2</sup>/u<sup>2</sup>2r-i<sup>2</sup>2d(id). A tellurium compound analogous to a trichloride (q. v.). [B.]

**TRITERNATE**, adj. Tri-tu<sup>2</sup>r<sup>2</sup>n-at. Lat., *triteratus* (from *ter*, three, and *terni*, three each). Fr., *tritérné*. Ger., *dreifach-dreizählig*. Thrice ternate, ternate with each of the divisions itself triply divided. [a, 35.]

**TRITHIONIC ACID**, n. Tri-thi<sup>2</sup>i<sup>2</sup>-o<sup>2</sup>2n/i<sup>2</sup>2k. An unstable dibasic acid, H<sub>2</sub>S<sub>2</sub>O<sub>6</sub>, known only in aqueous solution. [B.]

**TRITICEO-GLOSSUS** (Lat.), n. m. Tri<sup>2</sup>t<sup>2</sup>(tret)-i<sup>2</sup>2s(i<sup>2</sup>2k)/e<sup>2</sup>-o<sup>2</sup>(o<sup>2</sup>)-glo<sup>2</sup>s(glos)/su<sup>2</sup>2s(su<sup>2</sup>s). From *triticeum*, wheat, and *γλῶσσα*, the tongue. An anomalous muscle arising from the arytenoid cartilage and inserted into the side of the tongue. [L, 332.]

**TRITICEUS** (Lat.), adj. Tri<sup>2</sup>t<sup>2</sup>(tret)-i<sup>2</sup>2s(i<sup>2</sup>2k)/e<sup>2</sup>-u<sup>2</sup>2s(u<sup>2</sup>s). From *triticeum*, wheat. Fr., *triticé*. Pertaining to wheat, resembling a grain of wheat. [B, 38 (a, 14).]

**TRITICIN**, n. Tri<sup>2</sup>t<sup>2</sup>/i<sup>2</sup>2s-i<sup>2</sup>2n. Fr., *triticine*. Ger., *T. 1*. An amorphous and tasteless substance, C<sub>12</sub>H<sub>22</sub>O<sub>11</sub> (or C<sub>12</sub>H<sub>22</sub>O<sub>22</sub>), found in *Triticum repens*. [B, 3; B, 270 (a, 38).] 2. See *GLUTEN*.

**TRITICINA** (Lat.), n. f. Tri<sup>2</sup>t<sup>2</sup>(ret)-i<sup>2</sup>2s(i<sup>2</sup>2k)-in(en)/a<sup>2</sup>. From *triticeum*, wheat. See *Boiled FLOUR*.

**TRITICUM** (Lat.), n. n. Tri<sup>2</sup>t<sup>2</sup>(tret)/i<sup>2</sup>2k-u<sup>2</sup>2m(u<sup>2</sup>m). From *terere*, to rub. Fr., *froment* (1st def.), *blé* (1st def.), (*rhizome* de) *chientend official* [Fr. Cod.] (2d def.), *petit chientend (rhizome)* [Fr. Cod.] (2d def.). Ger., *Weizen* (1st def.), *Queckenwurz* (2d def.). 1. Wheat; a genus of gramineous herbs of the *Hordeae*. 2. Of the U. S. Ph., the rhizome of *T. repens*. [a, 35.]—**Amylum tritici**. See *Wheat STARCH*.—**Decoctum furfuris tritici**. A preparation made by boiling 1 part of wheat bran in 36 parts of water till reduced to 28 parts, and, after it has cooled and settled, straining the liquid. [B, 119 (a, 14).]—**Extractum tritici fluidum** [U. S. Ph.]. Fr., *extrait liquide de chientend*. Ger., *flüssiges Queckenextrakt*. A preparation made by exhausting t. (2d def.) in a percolator with boiling water, evaporating to 80 c. c., shaking up with 20 c. c. of alcohol of sp. gr. 0.820, filtering after forty-eight hours, and bringing up to 100 c. c. with alcohol of sp. gr. 0.974. [B, 95 (a, 38).]—**Farina tritici** [Br. Ph.]. Fr., *farine de froment*. Ger., *Weizenmehl*. Wheat flour; the grain of *T. sativum* ground and sifted. [a, 35.]—**Farina tritici tosta**. See *Baked FLOUR*.—**Ptisana de radice tritici**. See *Tisane de CHIENDENT*.—**Saccharum tritici**. Ger., *Queckenwurzelsucker*. A sweetish crystalline substance obtained from the extract of *T. repens*, differing from other sugars in its greater solubility in alcohol. If dissolved in 120 parts of hot alcohol and cooled, it forms a solid mass. [B, 48 (a, 14).]—**T. acutum**. A European species. The root-stock is used like that of *T. repens*. [a, 35.]—**T. amyllum**, **T. atratum**. Fr., *épeautre*. Ger., *Emmerkorn, Emmerweizen, Reiskind*. Amel corn, starch wheat, the *ῥεία δικοκκος* (or two-grained wheat) of Dioscorides; a species (by Haecel considered a variety of *T. vulgare*) still cultivated in southern Europe as a summer wheat. It is suitable for starch-making. [a, 35.]—**T. caninum**. Awned wheat-grass, dog's-tooth (or couch)-grass. It probably has the same properties as *T. repens*. Dogs eat the blades to induce vomiting. [a, 35.]—**T. durum**. Fr., *froment corné*. Ger., *hartfruchtiger Weizen, Bartweizen*. Hard-grained wheat, cultivated especially in southern Europe. The seeds are richer in nitrogen than the soft wheats. [a, 35.]—**T. glaucum**. Ger., *seegrüner (oder blaugrüner) Weizen*. 1. A European species closely related to *T. repens*. The root-stock is used like that of the latter. [a, 35.] 2. See *T. polonicum*.—**T. monococcum**. Fr., *froment monococque*, *blé (ou épeautre) locular*, *petit épeautre, riz sec*. Ger., *einkörniger Weizen, Einkorn, Peterskorn*. St. Peter's corn, single-grained wheat, with respect to the quality and quantity of flour yielded by the grain. It is found wild in Greece and Mesopotamia. [a, 35.]—**T. polonicum**. Fr., *froment (ou seigle) de Pologne*. Ger., *polnischer Weizen, Gommer*. Polish wheat; a species of unknown origin, cultivated in parts of Europe. The elongated, glassy seeds furnish a fine white flour having the properties of that of *T. vulgare*. [a, 35.]—**T. repens**. Fr., *froment rampant, agram, auge, laitue de chien, chientend des boutiques, petit chientend, sainte neige*. Ger., *kriechender Weizen, Quecken, Päden, Queckweizen, Weizenquecken, Queckengras, Hundegras, Reckgras*. Couch-grass (or wheat), dog-(or quack-, or scutch-, or shelly-, or skally-, or squitch-) grass; a weed widely dispersed in Europe, northern Asia, and North and South America. Its sweetish rhizome, occurring in straw-colored fragments from 5 to 10 mm. long and 2 to 3 mm. thick, is used in cystitis and irritable bladder and as a diluent and a slightly nutritious drink. It contains acid malates, sugar, triticein, and another gummy substance containing nitrogen. [a, 35.]—**T. sativum**. See *T. vulgare*.—**T. spelta**. Fr., *froment rouge, engrain, engrain, épautre, spautre, grand épeautre*. Ger., *Dinkelweizen, Spelzdinkel, Spelz, Vesen, Zweikorn*. Dinkel (or spelt) wheat, the *ῥεία* of Dioscorides; indigenous to the Persian mountains, and cultivated in Europe. The seeds yield an excellent flour, used especially for pastry. [a, 35.]—**T. vulgare**. Fr., *froment (cultivé)*, *blé, bled*. Ger., *gemeiner Weizen*. Common wheat; according to Frédéric Houssay, found wild in the mountains to the east of Kurdistan, though generally believed to have arisen through culture from some species of *Égilops*. Its seeds, ground and sifted, constitute flour, official in the ph's as *farina tritici*. Wheat flour chiefly contains starch (see *Wheat STARCH*), gluten, albumin, sugar, and a gummy substance which differs from ordinary gum in containing nitrogen and in not yielding mucic acid when treated with nitric acid. Flour is sometimes sprinkled on inflamed surfaces; boiled with milk, it forms an excellent emollient poultice. Wheat bread, toasted, infused, and flavored, is used as a nutritive drink in fevers. The husk of the seed (see *BRAN*) is also used medicinally. [a, 35.]—**T. zea**. See *T. spelta*.

**TRITOPINE**, n. Tri<sup>2</sup>t-op/en. An alkaloid, C<sub>12</sub>H<sub>15</sub>N<sub>2</sub>O<sub>7</sub>, obtained from opium and forming transparent prismatic crystals. Its tendency to cause convulsions contra-indicates its use as a narcotic. [B, 270 (a, 38).]

**TRITOVUM** (Lat.), n. n. Tri<sup>2</sup>t-o<sup>2</sup>/vu<sup>2</sup>2m(wu<sup>2</sup>m). From *τρίτος*, the third, and *φῶρ*, an egg. In certain spiders, the innermost of three membranes covering the embryo. [L, 196.]

**TRITUBERCULISM**, n. Tri-tu<sup>2</sup>b-u<sup>2</sup>2r(u<sup>2</sup>2)/i<sup>2</sup>2z<sup>2</sup>m. From *tres*, three, and *tuberculum*, a tubercle. The condition of having or consisting of three cusps or cones (said of molar teeth). ["Nature," March 20, 1890, p. 467 (a, 48).]

**TRITURATE**, n. Tri<sup>2</sup>t-u<sup>2</sup>2r-at. A substance or combination of substances reduced to a fine powder, especially by rubbing up in a mortar. [a, 38.]

**TRITURATED**, adj.  $\text{Tri}^2\text{t}^2\text{u}^2\text{r}$ -at-e<sup>2</sup>d. Finely powdered, especially by being rubbed up in a mortar. [a, 38.]

**TRITURATION**, n.  $\text{Tri}^2\text{t}^2\text{u}^2\text{r}$ -a'shu'n. Lat., *trituration* (from *tritura*, a rubbing). Fr., t. Ger., *Zerreibung*. In pharmacy, the act or process of rubbing up in a mortar or otherwise, so as to reduce to a fine powder; also the resulting powder; of the U. S. Ph., a preparation in which a medicinal substance is rubbed up with nine times as much powdered sugar of milk into a homogeneous powder. [B, 95 (a, 38).]

**TRITUS** (Lat.), n. m.  $\text{Trit}^2(\text{t}^2\text{r}^2)\text{u}^2\text{s}^2(\text{u}^2\text{s})$ . Gen., *trit'us*. From *terere*, to rub. See **TRITURATION** and **FRICTION**.

**TRITYL**, n.  $\text{Tri}^2\text{t}^2\text{yl}$ . Fr., *trityle*. Propyl; so called as containing three atoms of carbon. [B.]—**Hydrated t. oxide**, **T'-alcohol**, **T. hydrate**. See **PROPYL alcohol**.

**TRITYLATE**, n.  $\text{Tri}^2\text{t}^2\text{yl}$ -at. A salt of trityl.

**TRITYLIC**, adj.  $\text{Tri}^2\text{t}^2\text{-il}^2\text{ik}$ . Containing trityl.

**TRIUMFETTA** (Lat.), n. f.  $\text{Tre-um-fe}^2\text{t}^2\text{a}^2$ . From *Trionfetti*, an Italian botanist. Fr., *cousin*, *lappulier*. West Indian burweed, parrot-bur of Jamaica; a genus of tillaceous plants. [a, 35.]—**T. elliptica**. A species with a mucilaginous root. The inner bark and the juice are used in the Antilles as detergents. [a, 35.]—**T. lappula**, **T. Plumieri**. Fr., *grand cousin*, *herbe à cousin*, *pou de moine*. Great-wort of the West Indies; a mucilaginous shrub. The root and inner bark are used in mucous discharges, hæmorrhages, etc. [a, 35.]—**T. rhomboidea**, **T. semitriloba**. Two species (the first West Indian, the second [bur-bark-tree] distributed over the tropics of both hemispheres) used like *T. lappula*. [a, 35.]

**TRIVALENCE**, n.  $\text{Tri}^2\text{v}^2\text{a}^2\text{l-e}^2\text{ns}$ . Ger., *Dreierwerthigkeit*. The condition or property of being trivalent. [B.]

**TRIVALENT**, adj.  $\text{Tri}^2\text{v}^2\text{a}^2\text{l-nt}$ . From *tres*, three, and *valere*, to be worth. Fr., t. Ger., *dreierwerthig*. Having an atomicity of three; i. e., being capable of replacing three atoms of hydrogen in a compound.

**TRIVALERIN**, n.  $\text{Tri-va}^2\text{l}^2\text{'e}^2\text{r-i}^2\text{n}$ . Fr., *trivalérine*. A substance,  $\text{C}_3\text{H}_5(\text{C}_5\text{H}_7\text{O}_2)_2$ , of disagreeable odor, found in the oil of certain marine mammals. [B, 3 (a, 38).]

**TRIVIA** (Lat.), n. f.  $\text{Tri}^2\text{v}^2\text{i}^2(\text{wi}^2)\text{a}^2$ . From *tres*, three, and *via*, a way. The point where the three semicircular canals of the cochlea cross each other. [L, 321.]

**TRIVIAL**, adj.  $\text{Tri}^2\text{v}^2\text{i}^2\text{-l}$ . Lat., *trivialis* (from *trivium*, the meeting of three roads). Fr., t. Ger., *schlicht*. Of the name of an animal or plant, common or vulgar; also specific, as opposed to generic. [a, 35.]

**TRIXIS** (Lat.), n. f.  $\text{Tri}^2\text{x}^2\text{i}^2\text{s}$ . Gen., *trix'eos* (-is). Fr., *trixide*. 1. Of Gärtner, the genus *Proserpinaca*. 2. Of Browne, a genus of composite herbs or shrubs. The *Trixideæ* are a division of the *Nassauviææ*. [a, 35.]—**T. antimenorrhœa**. A tonic and emmenagogue species found in tropical America. [a, 35.]—**T. brasiliensis**. A species used as an emmenagogue. [a, 35.]—**T. frutescens**. The *palo de Santa-Maria* of Panama; used as a vulnerary. [a, 35.]—**T. fruticosa**, **T. plitizahuac**. A Mexican species used as a drastic purgative and recommended in cholera and dysentery. It contains plitizaholic acid (q. v.). [a, 35.]

**TRIZINCIC**, adj.  $\text{Tri-zi}^2\text{n}^2\text{s}^2\text{-ik}$ . Containing three atoms of zinc in the molecule. [B.]

**TROCAR**, n.  $\text{Tro}^2\text{ka}^2\text{r}$ . Fr., t., *trocarr*, *trois-quarts*. Ger., *T. Troicar*, *Trokar*, *Abzapper*, *Bauchstecher*. An instrument for drawing off liquid from a cavity, consisting of a perforator and a cannula. [E.]—**Lancet-t.** A t. having a lancet-shaped point. [a, 34.]—**Piloting t.** A t. devised by Durham for introducing the articulated tracheotomy tube.—**Rectum t.** A t. with a large curve for the operation of tapping the bladder through the rectum. [E.]

**TROCHAL**, adj.  $\text{Tro}^2\text{k}^2\text{l}$ . From *τροχός*, a wheel. Wheel-shaped. [a, 27.]

**TROCHANTER** (Lat.), n. m.  $\text{Trok}^2(\text{tro}^2\text{ch}^2)\text{-a}^2\text{nt}^2(\text{a}^2\text{nt})^2\text{u}^2\text{r}^2(\text{ar})$ . Gen., -er'os (-is). Gr., *τροχαιτήρ* (from *τρέχειν*, to run). Fr., t. Ger., *Rollhügel*. 1. Of Galen, the ball on which the hip bone turns in its socket. 2. One of two processes upon the upper end of the shaft of the femur. 3. In arthropods, the segment of a leg that is second from the body. [L.]—**Great t.** See *T. major*.—**Lesser t.** See *T. minor*.—**Third t.** See *T. tertius*.—**T. major**. A thick process at the upper end of the femur which projects upward externally to the union of the neck and shaft. [L.]—**T. minor**. A conical tuberosity upon the inner and posterior surface of the upper end of the femur, at the junction of the shaft and neck. [L.]—**T. tertius**. An anomalous process upon the upper end of the planum popliteum of the femur. [L, 332.]

**TROCHANTERIAN**, **TROCHANTERIC**, adj'a.  $\text{Trok-a}^2\text{nt-er}^2\text{i}^2\text{a}^2\text{n}$ , -er'ik. Fr., *trochantérien*, *trochantérique*. Ger., *trochant-erisch*. Pertaining to or resembling a trochanter.

**TROCHANTINE**, n.  $\text{Trok-a}^2\text{nt-en}$ . In certain insects, a small segment interposed between the coxa and the trochanter. [L, 196.]

**TROCHANTINIANUS** (Lat.), adj.  $\text{Trok}^2(\text{tro}^2\text{ch}^2)\text{-a}^2\text{nt}^2(\text{a}^2\text{nt})^2\text{-ian}^2(\text{u}^2\text{s})$ . Fr., *trochantinien*. Pertaining to the trochanter minor. [L, 50 (a, 14).]

**TROCHANTINUS** (Lat.), n. m.  $\text{Trok}^2(\text{tro}^2\text{ch}^2)\text{-a}^2\text{nt}^2(\text{a}^2\text{nt})^2\text{-in}^2(\text{en})^2\text{-u}^2\text{s}^2(\text{u}^2\text{s})$ . Fr., *trochantin*. See **TROCHANTER minor**.

**TROCHE**, n.  $\text{Trok}^2\text{e}$ . From *τροχός*, a round cake. Lat., *trochiscus*. Fr., *trochisque*. Ger., *Küchlechen*. A round lozenge. [D, 6.] See also **TRICHISCUS** and cf. **TABLET** and **PASTILLE**.

**TROCHIA** (Lat.), n. f.  $\text{Trok}^2(\text{tro}^2\text{ch}^2)\text{-i}^2\text{a}^2$ . From *τροχός*, a wheel. An old term for the orbit. [E.]

**TROCHILIA** (Lat.), n. f.  $\text{Trok}^2(\text{tro}^2\text{ch}^2)\text{-il}^2\text{i}^2\text{-a}^2$ . See **TROCHLEA**.

**TROCHINUS** (Lat.), n. m.  $\text{Trok}^2(\text{tro}^2\text{ch}^2)\text{-in}^2(\text{en})^2\text{u}^2\text{s}^2(\text{u}^2\text{s})$ . From *τροχός*, a wheel. Fr., *trochin*. The lesser tuberosity of the humerus. [L, 49, 50 (a, 14).]

**TROCHISCANTHES** (Lat.), n. m.  $\text{Trok}^2(\text{tro}^2\text{ch}^2)\text{-i}^2\text{sk}^2\text{a}^2\text{nth-}$  ( $\text{a}^2\text{nth}^2\text{ez}^2(\text{as})$ ). From *τροχίσκος*, a small wheel, and *ἄνθος*, a flower. Fr., *trochiscanthe*. A genus of the *Umbelliferae*. [a, 35.] **T. nodiflorus**. An herb sometimes confounded with *Levisticum officinale*. The roots are sold in southern France for those of *Archangelica officinalis*. [a, 35.]

**TROCHISCUS** (Lat.), n. m.  $\text{Trok}^2(\text{tro}^2\text{ch}^2)\text{-i}^2\text{sk}^2\text{u}^2\text{s}^2(\text{u}^2\text{s})$ . Gr., *τροχίσκος* (from *τροχός*, a wheel). Fr., *trochisque*. See **TROCHE**.—**Trochisci albi**. See *Pulvis CERUSSÆ compositus*.—**Trochisci alexiterii nostri**. Cordial troches; a mixture of 1 part of Armenian bole, 2 parts each of dry citron-peel and angelica-seeds, 3 parts each of Virginia snake-root and crabs' claws, and 11 parts of white sugar, all finely powdered, and worked with a sufficient quantity of tragacanth mucilage into a paste for troches. [B, 200 (a, 14).]

—**Trochisci bechii** (Gr. Ph.). Lozenges consisting of 12 parts of purified licorice-juice, 36 of sugar, 1 part of fennel-seeds, and enough tragacanth mucilage. [B, 95 (a, 38).]—**Trochisci bechii albi**. Lozenges consisting of 45 parts of starch made into a paste with rose water and either 187 parts of gum arabic and 589 of sugar or 90 of gum arabic, 540 of sugar, and 8 of benzoic acid; or with tragacanth mucilage and either 45 parts of Florentine iris-root and 600 of sugar, or 33 of licorice, 66 of iris, and 720 of sugar, or 240 of licorice, 120 of iris, and 180 of sugar. See also *Tablettes de gomme* and *Trochisci ALTHÆÆ*.—**Trochisci bechii citrini**. Fr., *trochisques d'amidon safranés*. Lozenges consisting of 15 parts of starch, 12 of Florentine iris, 11 of licorice, 24 of saffron, and 240 of sugar, made into a paste with tragacanth mucilage. [B, 119 (a, 38).]—**Trochisci contra vermes**, **Trochisci hermetici**. Fr., *pustilles vermifuges purgatives*. Thirty-five-centigramme lozenges consisting of 5 parts each of calomel and jalap, 14 of santonica, and 240 of sugar, made into a paste with tragacanth mucilage. [B, 119 (a, 38).]—**Trochisci imperatoris**. See *MORSULI imperatoris*.—**Trochisci pectorales**. Ger., *Brustkuchen*. See *Tablettes de gomme*.—**Trochisci pectorales Danorum**. Fr., *trochisques de réglisse opiacées*. Lozenges consisting of 150 parts each of licorice-juice and gum arabic, 7 of opium, 15 of tincture of balsam of Tolu, and 240 of syrup. [B, 119 (a, 38).]—**Trochisci peptici** (Gr. Ph.). A preparation consisting of 1 drachm each of magnesium lactate and sodium lactate, 4 drachms of sugar, and enough tragacanth mucilage, divided into 60 lozenges. [B, 95 (a, 38).]—**T. scillitici**. See *T. SCILLÆ Damocratis*.—**Trochisci stibiatii**. Fr., *tablettes antimoniales* (ou de sulfure d'antimoine). Ger., *Antimonmorsellen*. Troches containing antimony trisulphide in quantities varying from 1 grain [Fr. Cod. (1837)] to 15 grains [Hamb. Ph. (1835), Hess. Ph. (1827)], and even to 75 grains [Bruns. Ph. (1777)], mixed with different ingredients, among which were sugar, cinnamon, lesser cardamom, almonds, orange-peel, and gum arabic or tragacanth. [B, 119.]

**TROCHISQUE** (Fr.), n. *Tro-she-sk*. See **TROCHE**.—**T's escarotiques**, **T's mercuriels au minium**. See *Trochisci de MINIO*.

**TROCHITER** (Lat.), n. m.  $\text{Trok}^2(\text{tro}^2\text{ch}^2)\text{-it}^2\text{u}^2\text{s}^2(\text{u}^2\text{s})$ . Fr., t. From *τροχός*, a wheel. The greater tuberosity of the humerus. [L, 49, 50 (a, 14).]

**TROCHLEA** (Lat.), n. f.  $\text{Trok}^2(\text{tro}^2\text{ch}^2)\text{-le}^2\text{-a}^2$ . From *τροχλία*, a pulley. Fr., *trouée*, *poulie*. Ger., *T. Rolle*. A hook or ring over or through which a muscle or tendon slips. [L.]—**T. labyriinthi**. See *COCHLEA* (2d def.).—**T. of the astragalus**. The tibial articular surface of the astragalus. [L.]—**T. of the femur**. Fr., *trouée fémorale*. See *Fossa intercondyloidea (femoris) anterior*.—**T. of the obliquus oculi superior**, **T. of the orbit**. The ligamentous ring or pulley attached by fibrous tissue to a depression beneath the internal angular process of the frontal bone. It transmits the tendon of the obliquus oculi superior. [F.]

**TROCHLEAR**, adj.  $\text{Trok}^2\text{-le}^2\text{-a}^2\text{r}$ . Lat., *troucléaire*. Fr., *troucléaire*. Ger., *rollenförmig*. Pulley-shaped, circular and contracted in the centre; pertaining to a trochlea; as a n., see **OBLIQUUS oculi superior**. [a, 35.]

**TROCHLEARIS** (Lat.), adj.  $\text{Trok}^2(\text{tro}^2\text{ch}^2)\text{-le}^2\text{-a}^2\text{ria}^2\text{r}^2\text{i}^2\text{s}$ . From *τροχλία*, a pulley. Trochlear; as a n., see **OBLIQUUS oculi superior**.

**TROCHOCARDIA** (Lat.), n. f.  $\text{Trok}^2(\text{tro}^2\text{ch}^2)\text{-o}^2(\text{o}^2)\text{-ka}^2\text{rd}^2\text{-i}^2\text{a}^2$ . From *τροχός*, a wheel, and *καρδία*, the heart. Of Alvarenga, a cardiac displacement with a turning of the heart on its axis. [L, 57 (a, 34).]

**TROCHOCEPHALIA** (Lat.), n. f.  $\text{Trok}^2(\text{tro}^2\text{ch}^2)\text{-o}^2(\text{o}^2)\text{-se}^2\text{ph-}$  ( $\text{ke}^2\text{ph}^2\text{-al}^2\text{-i}^2\text{-a}^2$ ). From *τροχός*, a wheel, and *κεφαλή*, the head. Fr., *trochocephalie*. Ger., *Trochocephalie*. A malformation of the skull caused by partial synostosis of the parietal and frontal bones in the middle of the coronal suture. [L, 57 (a, 14).]

**TROCHOID**, adj.  $\text{Trok}^2\text{-oid}$ . Lat., *trochoides* (from *τροχός*, a wheel, and *εἶδος*, resemblance). Fr., *trouchoïde*. Ger., *cykloïdisch*. Wheel-like; like the turning of a wheel on its axle; of shells, conical with a flat base. [B, 28 (a, 27).]

**TROCHOIDES** (Lat.), adj.  $\text{Trok}^2(\text{tro}^2\text{ch}^2)\text{-o}^2(\text{o}^2)\text{-id}^2\text{-ed}^2\text{-ez}^2(\text{as})$ . See **TROCHOID**; as a n., see **TROCHOID ARTICULATION**.

**TROCHORIZOCARDIA** (Lat.), n. f.  $\text{Trok}^2(\text{tro}^2\text{ch}^2)\text{-o}^2\text{-r}^2\text{-i}^2\text{-z}^2\text{-o}^2\text{-ka}^2\text{rd}^2\text{-i}^2\text{-a}^2$ . From *τροχός*, a wheel, *ὀρίζειν*, to divide, and *καρδία*, the heart. See **TROCHOCARDIA**.

**TROCKENAMME** (Ger.), n.  $\text{Trok}^2\text{-e}^2\text{n-a}^2\text{m-me}^2$ . See **DRY-NITRE**.

**TROCKENCUR** (Ger.), n.  $\text{Trok}^2\text{-e}^2\text{n-kur}$ . Treatment by the reduction of fluid elements in the diet. [L, 57 (a, 14).]

**TROCKENHÄUTIG** (Ger.), adj.  $\text{Trok}^2\text{-e}^2\text{n-hoit}^2\text{-ig}$ . See **SCARIFORM**.

**TROCKENÖLSÄURE** (Ger.), n. Tro<sup>k</sup>e<sup>n</sup>-u<sup>1</sup>-zoi<sup>r</sup>-e<sup>2</sup>. See LINOLEIC ACID.

**TROCKNEN** (Ger.), n. Tro<sup>k</sup>-ne<sup>2</sup>n. See SCLEROSIS and SCLERODERMA.

**TROICAR** (Ger.), **TROIS-QUARTS** (Fr.), **TROKAR** (Ger.), n's. Tro<sup>i</sup>k-a<sup>r</sup>, trwa<sup>3</sup>-ka<sup>2</sup>r, trok<sup>a</sup>r. See TROCAR.

**TROLIUS** (Lat.), n. m. Tro<sup>1</sup>/i<sup>2</sup>-u<sup>3</sup>s(u<sup>4</sup>s). Fr., *trolle*, *trollière*. Ger., *Trollblume*. Globe ranunculus; a genus of the Helleboreae. [a, 35.]—**T. asiaticus**. Fr., *trolle d'Asie*. Asiatic globe-flower. The root is a drastic purgative. [a, 35.]—**T. europæus**. Fr., *trolle* (ou *trollière*) d'Europe, boule d'or, renoncule de montagne. Ger., *europäische Trollblume*, Kugelblume, Kugelranunkel, Knollenblume, Engelblume. 1. Common globe-flower (or troll-flower), golden ball, bolts, lapper, lopper, luckin-gowan; found throughout Europe. The somewhat acrid root, *radix hellebori nigri*, occurs in commerce. The root-leaves were formerly used as an antiscorbutic. [a, 35.] 2. See *T. asiaticus*.

**TROMA** (Lat., n. n. Trom'a<sup>3</sup>. Gen., *trom'atos* (-atis). Gr., τρώμα, τραύμα. See TRAUMA.

**TROMMEL** (Ger.), n. Trom<sup>3</sup>m'e<sup>2</sup>l. See DRUM.—**Gehört'**. See TYMPANUM.—**Luftt'**. See TAMBOUR (2d def.).—**T'bauch**. Tympanites. [a, 34.]—**T'höhle**. See TYMPANIC CAVITY.—**T'saite**, T'sehne. See CHORDA tympani.

**TROMMELFELL** (Ger.), n. Trom<sup>3</sup>m'e<sup>2</sup>l-fe<sup>2</sup>l. See MEMBRANA tympani.—**Nebent'**. See MEMBRANA tympani secundaria.—**T'beutel**. See POUCHES of the membrana tympani.—**T'entzündung**. See MYRINGITIS.

**TROMMELSUCHT** (Ger.), n. Trom<sup>3</sup>m'e<sup>2</sup>l-zuch<sup>2</sup>t. See PERITONÉAL TYMPANITES.—**Magent'**. See GASTROTYMPANITES.—**T. der Gebärmutter**. See PHYSOMETRA.

**TROMOMANIA** (Lat.), n. f. Trom(tro<sup>3</sup>m)-o(o<sup>2</sup>)-man(ma<sup>3</sup>n)/i<sup>2</sup>a<sup>3</sup>. Fr., from *trómos*, a trembling, and *μανία*, madness. See DELIRIUM tremens.

**TROMPE** (Fr.), n. Tro<sup>3</sup>n<sup>2</sup>p. A trumpet-shaped tube.—**T. de Fallopie**. See OVIDUCT.—**T. de Eustache**. The Eustachian tube.—**T. utérine**. See OVIDUCT.

**TROMPETE** (Ger.), n. Tromp-at'e<sup>2</sup>. A trumpet, also a trumpet-shaped tube.—**Muttert'**. See OVIDUCT.—**Ohrt'**. See EUSTACHIAN TUBE and EAR-TROMPET.

**TROMYLES** (Fr.), n. pl. Tro-mel. See CILIA (2d def.).

**TROMUS** (Lat.), n. m. Trom(tro<sup>3</sup>m)/u<sup>3</sup>s(u<sup>4</sup>s). Gr., τρώμος (from τρέμειν, to tremble). See TREMOR.

**TRONÁ**, n. Tro<sup>3</sup>na<sup>3</sup>. See under SODIUM sesquicarbonate.

**TRONC** (Fr.), n. Tro<sup>3</sup>n<sup>2</sup>. See TRUNK.

**TRONQUÉ** (Fr.), adj. Tro<sup>3</sup>n<sup>2</sup>-ka. See TRUNCATE.

**TROPEOLIN**, n. Trop-e-o<sup>2</sup>l-i<sup>2</sup>n. A name given to certain azo-dyes on account of the resemblance of their colors to those of the flowers of *Tropeolum majus*. [B, 3 (a, 38).]

**TROPEOLUM** (Lat.), n. n. Tro<sup>3</sup>p-e(a<sup>3</sup>e<sup>2</sup>)-o<sup>2</sup>l-u<sup>3</sup>m(u<sup>4</sup>m). From *trōpaion*, of a turning. Fr., *capucine*. Ger., *Kapuzinerkresse*. Indian cress, yellow larkspur, garden nasturtium; a genus of the *Pelargoniceae*. The *Tropaeolaceae*, or trophyworts, of Lindley an order of the *Malvales*, are included by Bentham and Hooker in the *Geraniaceae*. The *Tropaeoleae* (Fr., *tropaeolées*; Ger., *Tropaeoleen*) are: Of Lindley, a tribe of the *Tropaeolaceae*; of Baillon and others, a tribe or series of *Geraniaceae*. [a, 35.]—**T. majus**. Fr., *capucine cultivée*, *cresson du Mexique*, *grand cresson d'Inde* (ou du Pérou), *fleur sanguine* (ou de sang). Ger., *grosse Kapuzinerkresse*, *indische Kresse*, *falsche Kapper*. Indian cress, tall nasturtium; a Peruvian species. The buds and young fruits are used as a condiment. It is said to contain phosphorus, and is excitant, stomachic, and antiscorbutic. The leaves and flowers, *herba et flores nasturtii indicis* (seu *nasturtii hispanici*, seu *cardami majoris*, seu *tropaeoli*), were formerly official. The ripe, dried fruit is recommended as a purgative. An acrid volatile oil may be obtained from the foliage. [a, 35.]—**T. minus**. Fr., *petite capucine*, *petit cresson d'Inde*. Ger., *kleine Kapuzinerkresse*. The dwarf nasturtium of Peru, having properties like those of *T. majus*. The herb and flowers, *herba et flores nasturtii indicis minoris* (seu *cardami minoris*), were formerly official. [a, 35.]—**T. tuberosum**. Peruvian (or tuberous-rooted) nasturtium. The farinaceous tubers are eaten. [a, 35.]

**TROPFEN** (Ger.), n. Tro<sup>3</sup>pf'e<sup>2</sup>n. See DROP (1st def.).—**Blett's arsenikalische T.** See LIQUOR AMMONII ARSENICI.—**Bittere Magent'**, **Bittere T.** See TINCTURA amara (1st def.) and cf. *Bitter drops*.—**Donovan'sche T.** Donovan's solution. See LIQUOR ARKENII et *hydrargyri iodidi*.—**Fiebert'**. See MIXTURA simplex *Lulowici*.—**Hoffmann's T.** See SPIRITUS ÆTHERIS.—**Schwarze Fiebert'**. See TINCTURA CHINIDIOINI.

**TROPHE** (Lat.), n. f. Trof(tro<sup>3</sup>f)/e(a). Gen., *troph'ea*. Gr., τροφή (from τρέφειν, to nourish). See ALIMENT.

**TROPHESY**, n. Tro<sup>3</sup>f'e<sup>3</sup>s-i<sup>2</sup>. From τροφή, nourishment. Defective nutrition of a part, resulting from withdrawal of the nervous supply. [K.]

**TROPHIC, TROPHICAL**, adj's. Trof'i<sup>2</sup>k, -i<sup>2</sup>-k'l. Gr., τροφικός. Fr., *trophique*. Pertaining to nutrition. [D.]

**TROPHICITÉ** (Fr.), n. Tro-fe-se-ta. From τρώφος, a turn. A reversal of the proportion of phosphates to various other urinary constituents, said to be observed constantly in hysteria. [<sup>1</sup> Gaz. des hôp., Jan. 23, 1892, p. 90 (a, 50).]

**TROPHIS** (Lat.), n. f. Trof(tro<sup>3</sup>f)/i<sup>2</sup>s. From τρώφης, well-fed. Fr., *trophée*, *t.* The ramoon-tree, a genus forming a tribe (*Trophidæ*) of the *Moraceae*. [a, 35.]—**T. americana**. A West Indian shrub or tree, used as a mild astringent and as an alternative. [a, 35.]—**T. aspera**. Fr., *t. rude*. Paper-tree of Siam and India. The

juice of the leaves and young shoots is used in ulcers and skin diseases, and the berries as an astringent and antiseptic. [a, 35.]

**TROPHOBLAST**, n. Tro<sup>3</sup>f'o-bla<sup>2</sup>st. From τροφή, nourishment, and βλαστός, a sprout. The epiblast of the blastocyst, in contradistinction to the epiblast of the germinal area, or the formative epiblast. [Hubrecht, "Quart. Jour. of Micr. Sci.," xxx, p. 298 (J.).]

**TROPHODISC**, n. Tro<sup>3</sup>f'o-di<sup>2</sup>sk. From τροφή, nourishment, and δίσκος, a disc. See TROPHOSPHERE.

**TROPHOLOGY**, n. Tro<sup>3</sup>f-o<sup>2</sup>l-o<sup>2</sup>-ji<sup>2</sup>. From τροφή, nourishment, and λόγος, understanding. Fr., *trophologie*. Ger., *Ernährungslehre*. The physiology, etc., of nutrition. [a, 48.]

**TROPHONEUROSIS** (Lat.), n. f. Tro<sup>3</sup>f-o(o<sup>2</sup>)-nu<sup>3</sup>r-os/i<sup>2</sup>s. Gen., -os'eos (-is). From τροφή, nourishment, and νεῦρον, a nerve. Fr., *trophonévrose*. Ger., *Trophoneurose*. 1. A neurosis dependent on nutritive changes. [D.] 2. Failure in nutrition, due to impairment of the nervous action; in dermatology, a cutaneous disease characterized by nutritive changes in the skin depending on morbid conditions of the nerves. [G, 54; K.;]—**Facial t.** (Romberg). See *Progressive facial atrophy*.—**Muscular t.** A t. in which the muscles suffer nutritive changes in connection with certain diseases of the nervous system. [D, 35.]—**Romberg's t.** Unilateral atrophy of the face.—**T. disseminata**. See SCLERODERMA.

**TROPHONEUROTIC**, adj. Tro<sup>3</sup>f-o-nu<sup>3</sup>r-o<sup>2</sup>t'i<sup>2</sup>k. Fr., *trophonévrotique*. Ger., *trophoneurotisch*. Pertaining to or affected with a trophoneurosis. [D.]

**TROPHONOSUS** (Lat.), n. f. Tro<sup>3</sup>f-o<sup>2</sup>n/o<sup>2</sup>s-u<sup>3</sup>s(u<sup>4</sup>s). From τροφή, nourishment, and νόσος, disease. Fr., *trophonose*. See TROPHOPATHY.

**TROPHOPATHY**, n. Tro<sup>3</sup>f-o<sup>2</sup>p'a<sup>3</sup>th-i<sup>2</sup>. Lat., *trophopathia* (from τροφή, nourishment, and πάθος, disease). Fr., *trophopathie*. Any disease of nutrition.

**TROPHOPLAST**, n. Tro<sup>3</sup>f'o-pla<sup>2</sup>st. From τροφός, a feeder, and πλάσσειν, to form. Of Meyer, a plastid or leucite. [a, 35.]

**TROPHOPYLE** (Fr.), n. Tro-fo-pel. See HÉTÉROPYLE.

**TROPHOSOME**, n. Tro<sup>3</sup>f'o-som. From τροφή, nourishment, and σῶμα, the body. A collective term for the assemblage of the nutritive zooids of a hydrozoan. [B, 28 (a, 27).] Cf. GONOSOME.

**TROPHOSPERM**, n. Tro<sup>3</sup>f'o-spu<sup>3</sup>rm. Lat., *trophosperma*, *trophospermium* (from τροφή, nourishment, and σπέρμα, seed). Fr., *trophosperme*. See PLACENTA (4th def.).

**TROPHOSPHERE**, n. Tro<sup>3</sup>f'o-sfer. From τροφή, nourishment, and σφαῖρα, a sphere. A zone of modified cellular tissue interposed between the decidua stroma and the blastocyst. [Hubrecht, "Quart. Jour. of Micr. Sci.," xxx, p. 332 (J.).]

**TROPHOTROPISM**, n. Tro<sup>3</sup>f-o<sup>2</sup>t/tro<sup>3</sup>p-i<sup>2</sup>z'm. From τροφή, nourishment, and τρέπειν, to turn. Fr., *trophotropisme*. A tendency to motion induced in the particles of protoplasm by the presence of nutritive material near it. [Stahl, "Bot. Ztg.," 1884, pp. 145, 161, 187; "Proc. of the Roy. Micr. Soc.," 1884, p. 603 (B).]

**TROPIC ACID**, n. Trop/i<sup>2</sup>k. Fr., *acide tropique*. Ger., *Tropasäure*. An acid, C<sub>6</sub>H<sub>10</sub>O<sub>5</sub> = C<sub>6</sub>H<sub>5</sub>.CH(CH<sub>2</sub>.OH).CO.OH, obtained by decomposing atropine or hyoscyamine with baryta water or in other ways; colorless acicular or tabular crystals. [B, 3, 270 (a, 38).]

**TROPIDIN**, n. Tro<sup>3</sup>p-i<sup>2</sup>d-i<sup>2</sup>n. Fr., *tropidine*. Ger., *T.* A substance, C<sub>8</sub>H<sub>9</sub>N, obtained by heating atropine to 180° C. with hydrochloric and glacial acetic acids; an oily liquid of intoxicating odor similar to that of coniin. [B, 93 (a, 14).]

**TROPIDONOTUS** (Lat.), n. m. Tro<sup>3</sup>p-i<sup>2</sup>d-o<sup>2</sup>not'u<sup>3</sup>s(u<sup>4</sup>s). From τρώπις, a keel, and νῶτος, the back. Fr., *tropidonote*. Ger., *Wassernatter*. A genus of fresh-water Colubrina. [a, 35.]—**T. natrix**. Ger., *gemeine Natter*, *Ringelnatter*. Commoning snake; a non-venomous European serpent. Its fat, *axungia serpentum*, which resembles fish-oil, was formerly official. The entire animal, dried, has been used in place of vipers. [a, 35.]

**TROPIN**, n. Trop/i<sup>2</sup>n. Fr., *tropine*. Ger., *T.* A body, C<sub>8</sub>H<sub>15</sub>NO = C<sub>8</sub>H<sub>7</sub>(C<sub>2</sub>H<sub>4</sub>.OH.N(CH<sub>3</sub>)), of peculiar tobacco-like odor, obtained by decomposing atropine with baryta water, occurring as tabular crystals. [B, 270 (a, 38).]

**TROPOMÈTRE** (Fr.), n. Tro-po-me<sup>2</sup>tr'. From τρέπειν, to turn, and μέτρον, a measure. An instrument devised by Broca for measuring the degree of torsion of the shaft of the humerus. See ANGLE of torsion.

**TROU** (Fr.), n. Tru. See FORAMEN and HOLE.—**T. anonyme**. See *Stylo-mastoid FORAMEN*.—**T's auditifs**. See *Auditory CANALS*.—**T. borgne**. See *FORAMEN cæcum*.—**T. carotidien**. See *Carotic FORAMEN*.—**T. central**. See *FOVEA centralis*.—**T's condyliens**. See *Anterior condylar FORAMEN* and *Posterior condylar FORAMINA*.—**T. de Botal**. See *FORAMEN of Botallo*.—**T. déchiré**. See *FORAMEN lacerum*.—**T. déchiré antérieur**. See *Sphenoidal fissure*.—**T. déchiré postérieur**. See *FORAMEN lacerum posterius*.—**T's de conjugation**. See *Intervertebral FORAMINA*.—**T. de Ferrein**. See *Stylo-mastoid FORAMEN*.—**T's de l'oreille**. See *Auditory CANALS*.—**T. de Magendie**. See *FORAMEN of Magendie*.—**T. de Monro**. See *FORAMEN of Monro*.—**T. du milieu**. In Normandy, the habit of taking alcoholic drinks at the middle of a meal, to renew the appetite. [Dujardin-Beaumetz, "Gaz. hebdom. de méd. et de chir.," Nov. 6, 1885, p. 733.]—**T. du nerf maxillaire**. See *FORAMEN ovale* (2d def.).—**T. du nerf sus maxillaire**. See *FORAMEN rotundum*.—**T. épineux**. See *FORAMEN spinosum*.—**T. ethmoidal**, **T. fronto-ethmoidal**. See *Fronto-ethmoidal FORAMEN*.—**T. grand rond**. See *FORAMEN rotundum*.—**T. ischio-pubien** (Verneau). See *Obturator FORAMEN*.—**T. jugulaire**. See *FORAMEN lacerum posterius*.—**T. labyrinthique**. See *Internal auditory CANAL*.—**T. mastoïdien**. See *Mastoid FORAMEN*.—**T. maxillaire inférieur**. See *FORAMEN ovale* (1st def.).—**T. maxillaire supérieur**. See *FORAMEN rotundum*.—**T. mentonnier**. See *Inferior dental FORAMEN*.—**T. nourricier**. See *Nu-*

**trient FORAMEN.**—**T. obturator.** See *Obturator FORAMEN.*—**T. occipital.** See *FORAMEN magnum.*—**T. optique.** See *Optic FORAMEN.*—**T. orbitaire inférieur.** See *Infra-orbital FORAMEN.*—**T. orbitaire interne.** See *Anterior ethmoidal CANAL.*—**T. orbitaire supérieur.** See *Supra-orbital FORAMEN.*—**T. ovalaire, T. oval.** See *FORAMEN ovale* (1st def.) and *Obturator FORAMEN.*—**T. ovale de Pacchioni.** The opening in the tentorium through which the crura centri pass. [L. 31.]—**T. pariétal.** See *Parietal FORAMEN.*—**T. petit rond.** See *FORAMEN spinosum.*—**T. rachidien.** See *Vertebral FORAMEN.*—**T. rond.** See *FORAMEN rotundum.*—**T's sacrés antérieurs.** See *Anterior sacral FORAMINA.*—**T's sacrés postérieurs.** See *Posterior sacral FORAMINA.*—**T's sciatiques.** See *Great sacro-sciatic FORAMEN* and *Small sacro-sciatic FORAMEN.*—**T. sourcilier.** See *Supra-orbital FORAMEN.*—**T. sous-orbitaire.** See *Suborbital FORAMEN.*—**T. sous-pubien.** See *Obturator FORAMEN.*—**T. sous-temporal.** **T. sphéno-épineux.** See *FORAMEN spinosum.*—**T. sphéno-palatin.** See *Spheno-palatin FORAMEN.*—**T. stylo-mastoidien.** See *Stylo-mastoid FORAMEN.*—**T. sus-orbitaire.** See *Supra-orbital FORAMEN.*—**T. vitellaire.** See *Vitellar HOLE.*

**TROUGH,** n. Tro<sup>2</sup>f. A receptacle, usually oblong in shape, for water and other liquids. [a. 48.]—**Hydrargyropneumatic t.** See *CUVE hydrargyropneumatique.*—**Pneumatic t.** Fr., *cuve hydropneumatique.* A t. by means of which gases can be collected and isolated over water or mercury in inverted vessels. [a. 48.]

**TROUSSE** (Fr.), n. Trus. A pocket case of surgical instruments. [E.]

**TROUSSE-GALANT** (Fr.), n. Trus-ga<sup>3</sup>-la<sup>2</sup>n<sup>2</sup>. See *CHOLERA morbus.*

**TROUSSEAU** (Fr.), n. Tru-so. See *FASCICULUS.*—**T. musculéux.** A thin muscular layer. [L. 41 (a. 14).]

**TROUTS,** n. Tru<sup>2</sup>u<sup>2</sup>tz. In Ireland, a form of chloasma occurring among the poor who use turf fires. [G.] Cf. *Ephelis ab igne.*

**TRÜBE** (Ger.), adj. Tru<sup>2</sup>b<sup>2</sup>e<sup>2</sup>. See *CLOUDY.*

**TRÜBSINN** (Ger.), n. Tru<sup>2</sup>b<sup>2</sup>/zi<sup>2</sup>n<sup>2</sup>. See *MELANCHOLIA.*

**TRÜBUNG** (Ger.), n. Tru<sup>2</sup>b<sup>2</sup>/un<sup>2</sup>. Cloudiness. [D. 4.]

**TRUFFE** (Fr.), n. Tru<sup>2</sup>f. See *TUBER.*—**T. à l'ail.** See *TUBER griseum.*—**T. blanche.** See *TUBER griseum* and *CHOIROMYCES magnus.*—**T. d'eau.** See *TRAPA natans.*—**T. de cerf.** See *ELAPHOMYCES cervinus.*—**T. d'hiver.** See *TUBER cibarium.*—**T. douce.** See *IPOMEA batatas.*—**T. jaune.** See *ELAPHOMYCES cervinus.*—**T. noire.** See *TUBER cibarium.*

**TRÜFFEL** (Ger.), n. Tru<sup>2</sup>f<sup>2</sup>/fe<sup>2</sup>l. See *TUBER.*—**Aechte T., Essbare T.** See *TUBER cibarium.*—**Graue T.** See *TUBER griseum.*—**Hirscht.** See *ELAPHOMYCES cervinus.*—**Schwarze T., Schweinet.** See *TUBER cibarium.*

**TRUFFLE,** n. Tru<sup>2</sup>f. See *TUBER.*—**English t.** See *TUBER aestivum.*—**False t's.** The *Hypogaei* (see under *HYPOGÆOUS*). [a. 35.]—**French t.** See *TUBER melanosporum.*—**Red t.** See *TUBER rufum* and *MELANOGASTER variegatus.*

**TRUGDOLDE** (Ger.), n. Trug<sup>2</sup>/do<sup>2</sup>ld-e<sup>2</sup>. See *CYME.*

**TRUGBILD** (Ger.), n. Trug<sup>2</sup>/ge<sup>2</sup>-bi<sup>2</sup>ld. See *PHANTOM.*

**TRUGSTIEL** (Ger.), n. Trug<sup>2</sup>/stel. See *PSEUDOPODIUM* (1st def.).

**TRUGWAHRNEHMUNG** (Ger.), n. Trug<sup>2</sup>/va<sup>2</sup>r-nam-un<sup>2</sup>. See *HALLUCINATION.*

**TRUMBUS** (Lat.), n. m. Tru<sup>2</sup>mb(tru<sup>2</sup>mb)/u<sup>2</sup>s(u<sup>2</sup>s). See *THROMBUS.*

**TRUMPET,** n. Tru<sup>2</sup>mp<sup>2</sup>/e<sup>2</sup>t. Gr., *σαλπίγξ*. Lat., *salpinx, tuba, cornu*. Fr., *trompette*. Ger., *Trompete*. A musical wind-instrument in which the sound issues through a flaring opening; also any t.-like instrument or apparatus. [a. 48.]—**Ear-t.** An instrument, usually of metal or of vulcanite, having a flaring mouth-piece or a paraboloid hearing-cup. The latter is a parabolic cup from the focal point of which the sound-waves are collected by a second sound-collector projecting into the cup and connected with the ear-piece. [F.]—**Fallopian t.** See *OVIDUCT.*

**TRUNCATE, TRUNCATED,** adj's. Tru<sup>2</sup>n<sup>2</sup>k<sup>2</sup>/at, -at-e<sup>2</sup>d. Lat., *truncatus* (from *truncare*, to mutilate). Fr., *tronqué*. Ger., *gestutzt, abgestutzt, abgeschnitten, abgestumpft*. Lopped, ending abruptly as if cut off. [a. 35.]

**TRUNCUS** (Lat.), n. m. Tru<sup>2</sup>n<sup>2</sup>k<sup>2</sup>(tru<sup>2</sup>n<sup>2</sup>k<sup>2</sup>/u<sup>2</sup>s(u<sup>2</sup>s)). See *TRUNK.*—**T. anonymus.** 1. See *Innominate ARTERY.* 2. In the pl., *trunci anonymi*, see *Innominate VEINS.*—**T. anonymus iliacus.** See *Common iliac ARTERY.*—**T. arteriosus.** See *Cardiac AORTA.*—**T. bicarotenus.** An anomalous branch of the arch of the aorta from which the common carotid arteries spring. [L. 332.]—**T. brachialis.** See *BRACHIAL ARTERY.*—**T. brachialis primarius inferior.** The cord formed by the union of the anterior branches of the eighth cervical or first dorsal nerve. [L.]—**T. brachialis primarius medius.** The anterior branch of the seventh cervical nerve. [L.] Cf. *BRACHIAL PLEXUS.*—**T. brachialis primarius superior.** The cord formed by the union of the anterior branches of the fifth and sixth cervical nerves. [L.] Cf. *BRACHIAL PLEXUS.*—**T. brachiocephalicus, T. brachiocephalicus.** See *Innominate ARTERY.*—**T. bronchomediastinalis dexter.** A branch of the right lymphatic duct into which the vasa efferentia of the bronchial and mediastinal glands and the internal mammary lymphatics empty. [L. 332.]—**T. cervicalis (posterior) profundus nervi sympathici.** See *Vertebral PLEXUS.*—**T. celliacus.** See *Cardiac ARTERY.*—**T. communis pedunculorum cerebelli.** See *CORPUS denticulatum.*—**T. corpora callosi.** See *CORPUS corpora callosi.*—**T. costocervicalis.** See *Costo-cervical ARTERY.*—**Trunci encephali.** See *CRURA cerebri.*—**T. facialis efferens.** A loop of communication between the adducens nucleus and the roots of the facial nerve near their exit from the medulla. [L. 31.]—**T. innominatus.** See *Innominate ARTERY.*—**T. intestinalis.** See *Celiac*

**ARTERY.**—**T. lumbosacralis.** See *Lumbo-sacral CORD.*—**T. lumbalis.** See *Lumbar lymphatic TRUNK.*—**T. lymphaticus abdominalis.** A large abdominal branch of the thoracic duct. [L.]—**T. lymphaticus (communis) dexter.** See *Right lymphatic DUCT.*—**T. lymphaticus communis sinister.** See *Thoracic DUCT.*—**T. lymphaticus jugularis dexter.** A lymphatic receiving the vasa efferentia of the right side of the head and neck, and emptying into the right lymphatic duct. [L. 332.]—**T. lymphaticus jugularis sinister.** A lymphatic receiving the vasa efferentia of the left side of the head and neck, and emptying into the thoracic duct. [L. 332.]—**T. lymphaticus lumbalis.** See *Lumbar lymphatic TRUNK.*—**T. lymphaticus major.** See *Thoracic DUCT.*—**T. lymphaticus minor.** See *Right lymphatic DUCT.*—**T. lymphaticus sinister.** See *Thoracic DUCT.*—**T. medullæ spinalis.** See *CAUDEX cerebri.*—**T. medullaris cerebelli.** See *CORPUS denticulatum.*—**T. subclavius.** See *Axillary lymphatic TRUNK.*—**T. tibio-peroneus.** The posterior tibial artery above the peroneal artery. [L.]—**T. venosus alveolaris.** See *Deep facial VEIN.*

**TRUNK,** n. Tru<sup>2</sup>n<sup>2</sup>k. Gr., *στέλεχος*. Lat., *truncus*. Fr., *tronc*. Ger., *Stamm*. The stem of a tree; the main body or stem of any branched structure; the body as distinguished from the limbs and head. [a. 17; a. 48.]—**Axillary lymphatic t.** The exterior branch of the right lymphatic duct, formed by the vasa efferentia of the axillary glands. [L.]—**Intestinal lymphatic t.** A lymphatic receiving the vasa efferentia of the mesenteric glands. [L.]—**Lumbar lymphatic t.** A large vessel which is formed by the union of the efferent vessels from the lumbar lymphatic glands, and empties into the thoracic duct or one of its branches. [L.]—**Lymphatic t's.** Large lymphatics formed by the union of the vasa efferentia of the lymphatic glands. [L.]—**Primary t's of the brachial plexus.** The primary cords which make up the brachial plexus. [L.]

**TRUNKENHEIT** (Ger.), n. Tru<sup>2</sup>nk<sup>2</sup>/e<sup>2</sup>n-hit. See *DRUNKENNESS* and *INTOXICATION* (3d def.).

**TRUNKSUCHT** (Ger.), n. Tru<sup>2</sup>nk<sup>2</sup>/zuch<sup>2</sup>t. See *CHRONIC ALCOHOLISM* and *DIPSOMANIA.*

**TRUSKAWICE,** n. A place in Galicia, Austria, where there are saline and chalybeate springs and a sulphurous spring. [a. 14.]

**TRUSS,** n. Tru<sup>2</sup>s. Lat., *subligaculum, subligatura*. Fr., *brayer*. Ger., *Bruchband, Bauchcomprese*. A pad and bandage or spring for keeping parts in place, especially a hernia. [E.]—**Carotid t.** A t. for compressing the carotid artery. [J. L. Corning, "Med. Record," Feb. 18, 1882.]—**French t.** A single or double t. for inguinal hernia which exerts pressure by the elasticity of the steel band that supports the pad. [E.]—**Hainsby's t.** A t. used for approximating the edges of the wound after the operation for harelip. [E.]—**Suspensory t.** Ger., *Heberband*. A suspensory bandage. [a. 34.]

**TRUXILLIC ACID,** n. Tru<sup>2</sup>x-i<sup>2</sup>/i<sup>2</sup>lk. From *Truxillo*, the commercial source of coca. An acid, C<sub>2</sub>H<sub>3</sub>O<sub>2</sub>, derived from cocaine. Three isomeric varieties are known, α-, β-, and γ-t. α., formerly known as γ-, δ-, and ε-isotropic acid. ["Ann. di chim. e di farmacol.," July, 1890, p. 39 (B).]

**TRYMA** (Lat.), n. n. Trim<sup>2</sup>(tru<sup>2</sup>m)/a<sup>2</sup>. Gen., *trym<sup>2</sup>atos (-atis)*. From *τρυμα*, a hole. A drupeaceous fruit with a thick epicarp which at length separates from a bony nucleus, as in the walnut. [a. 35.]

**TRYPANON** (Lat.), n. n. Tri<sup>2</sup>p(tru<sup>2</sup>p)/a<sup>2</sup>n(a<sup>2</sup>n)/o<sup>2</sup>n. Gr., *τρυπάνον* (from *τρύπαιν*, to bore). See *TREPHINE.*

**TRYPEPIS** (Lat.), n. f. Tri<sup>2</sup>p(tru<sup>2</sup>p)-e(a<sup>2</sup>/si<sup>2</sup>s. Gen., *-es/eos (-is)*. Gr., *τρυπησις* (from *τρύπειν*, to bore). Fr., *trypèse*. See *TREPHINING.*

**TRYPETA** (Lat.), n. f. Tri<sup>2</sup>p(tru<sup>2</sup>p)-et(at)/a<sup>2</sup>. From *τρυπητής*, a borer. A genus of flies the larvae of various species of which are very destructive to fruit. [a. 48.]

**TRYPETHELUM** (Lat.), n. n. Tri<sup>2</sup>p(tru<sup>2</sup>p)-e<sup>2</sup>thel(thal)/i<sup>2</sup>s. u<sup>2</sup>m(u<sup>2</sup>m). From *τρυπαιν*, to bore, and *θηλή*, a nipple. Fr., *trypéthelle*. Ger., *Löcherwarzenflechte*. A genus of the *Trypetheliaceæ* (or *Trypethelidæ*), which are a cohort of lichens. [a. 35.]—**T. ocellatum, T. olivaceo-fuscum.** Species found on Angustura-bark. [a. 35.]—**T. Sprengelii.** A species occurring on cascarrilla-bark. [a. 35.]—**T. verrucosum.** A species found on ordinary Loxa-bark. [a. 35.]

**TRYPERA** (Lat.), n. f. Tri<sup>2</sup>p(tru<sup>2</sup>p)-er(ar)/a<sup>2</sup>. From *τρυφερός*, dainty. Fr., *tryphère*. A certain old cosmetic electuary. [L. 50.]

**TRYPSIN,** n. Tri<sup>2</sup>p<sup>2</sup>/si<sup>2</sup>n. Fr., *trypsine*. Ger., *T*. A soluble proteolytic ferment which may be separated from the pancreatic juice and which acts in many respects like pepsin, but differs from it in being most potent in a neutral or slightly alkaline medium. The physiological difference between the two is not well understood, but it is now supposed that t. is even more powerful in digesting proteins than pepsin. The products of peptic and tryptic digestion differ, leucine and tyrosine being much the more prominent in tryptic digestion. [J.]

**TRYPSINOGEN,** n. Tri<sup>2</sup>p-si<sup>2</sup>n'o-je<sup>2</sup>n. The zymogen of the pancreas, from which trypsin is formed. [L.]

**TRYPTIC,** adj. Tri<sup>2</sup>pt<sup>2</sup>/i<sup>2</sup>k. Pertaining to trypsin. [a. 48.]

**TRYPTONE,** n. Tri<sup>2</sup>p<sup>2</sup>/ton. Of Kühne, a peptone produced by the action of trypsin upon albuminates. [B. 279 (a. 38).]

**TSCHIELTIK** (Jav.), n. The *Strychnos tieute* or the poison (*upas tieute*) prepared from it. [a. 35.]

**TSETSE,** n. Tse<sup>2</sup>t<sup>2</sup>/se<sup>2</sup>. Fr., *tsé-tsé*. See *GLOSSINA morsitans*.

**TSIN,** n. See *ARRACK*.

**TSUCHIAKABI** (Jap.), n. The fruit capsule of an orchid indigenous to Japan, used in affections of the urinary tract. ["Therap. Gaz.," Mar., 1886, p. 212.]

**TUBA** (Lat.), n. f. *Tu<sup>2</sup>b(tu<sup>2</sup>b/a<sup>2</sup>)*. Ger., *T*. See **TUBE** (1st and 2d def's).—**T. aristotelica**, *T. Eustachii*. See **EUSTACHIAN TUBE**.—**T. fallopiana**. See **OVIDUCT**.—**T-mündung** (Ger.). The orifice of a tube (e. g., the Falloppian tube).—**T. uteri** [Falloppius], **T. uterina**. See **OVIDUCT**.

**TUBAGE** (Fr.), n. *Tu<sup>2</sup>b-a<sup>2</sup>zh*. From *tuba*, a tube. The introduction of a tube (e. g., a catheter). [A, 48].—**T. du larynx**, **T. of the glottis**. See **INTUBATION of the larynx**.

**TUBAL**, adj. *Tu<sup>2</sup>b'l*. Pertaining to a tube (e. g., the oviduct).

**TUBE**, n. *Tu<sup>2</sup>b*. Gr., *τύπη* (1st and 3d def's), *σάλπιγξ* (2d def.). Lat., *tubus* (1st and 3d def's), *tuba* (1st and 2d def's). Fr., *t*, (1st def.), *trompe* (2d def.), *tuyau* (2d def.). Ger., *Rohr* (1st def.), *Röhre* (3d def.). **T. 1.** A tubular canal. **2.** A trumpet-shaped canal (e. g., the Falloppian t.). **3.** In botany, any hollow elongated part. [A, 35].—**Absorption t.** A graduated glass t., about 250 mm. long and 20 mm. in diameter, closed at one end and furnished with a lip at its open end; used in Bunsen's method of volumetric analysis of gases, for collecting gas and transferring it to the eudiometer. [A, 1].—**Air-t.** Ger., *Lufttröhre*. **1.** The entire length of the larynx, trachea, bronchi, and bronchioles. **2.** The abdominal trachea in the aquatic larvae of certain insects. **3.** A bronchial t. [D, 90].—**Alimentary t.** See **ALIMENTARY CANAL**.—**Alisphenoid t.** See **ALISPHENOID CANAL**.—**Ambulacral t's.** Short lateral t's, protrusible at will, which pierce the ambulacral pores of certain *Annuloida* and communicate internally with the circular canal. [L, 147].—**Auscultation t.** A t. for testing the hearing power. It consists of three arms, two of which are to be placed in the patient's auditory canals, the third in the observer's ear. If then a vibrating tuning fork is placed on the patient's vertex, the auscultator can perceive the sound of the fork streaming from the patient's ears. [F, 1].—**Bellocq's t.** See **BELLOQC'S CANNULA**.—**Binocular t.** The t. of a binocular microscope. [A, 34].—**Bronchial t's.** The branches into which the bronchi divide and from which the smaller t's (bronchioles) spring which communicate with the pulmonary alveoli. [L].—**Calicigerous t's.** See **DENTAL CANALS**.—**Capillary t.** Ger., *Haarröhren*. See **CAPILLARY** (3d def.).—**Chaussier's t. for insufflation** (catheterism of the larynx). A tapering metallic t., 18 to 20 cm. long, as large as a urethral catheter, slightly flattened at the sides. The large end is trumpet-shaped, to facilitate blowing into it. The other end is flattened and pierced with a hole at each side. This end is curved to facilitate its introduction into the larynx, and at the proper point in the curve there is a collar, also pierced with holes, for attaching some soft material for the purpose of closing the opening of the larynx. [A, 15].—**Chloride-of-calcium t.** A t. containing chloride of calcium; used in chemical manipulation for absorbing aqueous vapor.—**Collecting t.** See **COLLECTING TUBE**.—**Communicating t.** See **SECOND CONVOLUTED TUBE**.—**Dental t's.** See **DENTAL CANALS**.—**Depaul's t. for insufflation** (catheterism of the larynx). The same as **CHAUSSEIER'S**, except that it has a terminal opening, but no holes at the sides. [A, 15].—**Drainage t.** Fr., *t. à drainage*. A t. of soft rubber or other material perforated at one end with small holes, to be introduced into a wound or suppurating cavity to allow of the escape of fluids. [E].—**Draw t.** A t. sliding within the main t. of a microscope, used to increase or diminish the t. length. [A, 34].—**Dropping t., Drop t.** Cf. **DROP BOTTLE** and **PIPETTE**.—**Egg t's.** See **OVARIAN T'S**.—**Emmett's fistula t.** A slightly conical, horn-shaped t. for draining a fistula. [A, 34].—**Esbach's t.** See **ALBUMINIMETER**.—**Endothelial t.** See **CELLULAR COAT**.—**Esmarch's elastic t.** A round or flattened gum elastic t. with a hook at one end and a chain at the other; used for making a limb bloodless. [E; A, 34].—**Eudiometer t.** See **EUDIOMETER** (2d def.).—**Eustachian t.** The canal which connects the pharynx and the tympanic cavity and by which an exchange of air takes place between the atmosphere and that cavity. Its position is oblique, almost exactly midway between the horizontal and the vertical. It is partly osseous and partly cartilaginous, its entire length being from 34 to 36 mm., of which the cartilaginous portion forms two thirds. The osseous portion, bounded above by the canal of the tensor tympani and below by the carotid canal, is a prolongation of the anterior portion of the tympanic cavity, directed inward. Its lumen is about 2 mm. wide. The cartilaginous portion is attached to the rough, irregular, and oblique margin of the anterior extremity of the osseous portion. This portion is not cartilaginous throughout, the groove-like cartilage being formed into a canal by a membranous plate. [F, 32].—**Excretory t's.** See **EXCRETORY TUBULES**.—**Falloppian t.** See **OVIDUCT**.—**Geissler's t.** An apparatus by means of which the various striae are shown which are produced by an electric discharge through highly rarefied gases. [A, 48].—**Germ t.** A t. produced by the distention of the endospore in the germination of a spore. [A, 35].—**Hæmal t.** See **HÆMAL CANAL**.—**Hearing t.** Fr., *t. (ou tuyau) acoustique*. Ger., *Hörrohr*. An instrument for the use of deaf persons in conversation. It consists of a t., two to three feet long, made of a closely pressed spiral wire incased in a layer of leather and covered with a closely-spun woolen or silk tissue. Its olive-shaped ear-piece, for insertion into the external auditory meatus, is either straight or angularly curved. Its mouth-piece has the form of a cup or of a common speculum. [F, 32].—**Henle's loop t.** Fr., *anse de Henle*. Ger., *schleifenförmige Harnkanälchen*, *Henle'sche Schleife*. The part of a uriniferous tubule extending from the renal cortex a short distance into the papillary portion of the kidney and then forming a U-shaped loop and returning to the cortical portion. The proximal part of the loop t. (descending loop-t.) is continuous with the spiral tubule at the level of the boundary layer of the kidney. Its course is straight and its lumen distinct and lined with a layer of flattened nucleated cells. After extending for a short distance into the papillary portion of the kidney, the tubule becomes looped, forming **Henle's** loop, and returns to the renal cortex as the ascending loop-t., parallel with the descending loop-t. After reaching the cortex its course becomes irregular, and it finally passes into the second or

distal convoluted tubule. The ascending loop-t. is larger than the descending, and its lining cells are polyhedral and fibrillated. [J, 30, 32, 35].—**Intestinal t.** See **INTESTINAL CANAL**.—**Kobelt's t's.** In the parophoron, vestiges of the ducts in the Wolffian bodies. [L, 142, 201].—**Lieberkühn's t's.** See **CRYPTS of Lieberkühn**.—**Lobular bronchial t's.** See **BRONCHIOLES**.—**Loop-t.** See **Henle's loop-t.**—**Lymph t's.** The lymphatic vessels. [A, 34].—**Medullary t.** In embryology, the medullary or neural canal, the primary form of the brain and spinal marrow, formed by the union of the medullary ridges over the medullary groove. [A, 5].—**Medullary t's.** See **LYMPHOID CORDS**.—**Microscopic t.** The cylindrical metal t., blackened on its internal surface, that contains the objective, eye-piece, and draw-t., if there is one, of a microscope. [A, 34].—**Milk t's.** Lactiferous ducts. [L].—**Muscle t.** See **MUSCULAR FIBRE**.—**Nerve t.** An elementary nerve-filament. [I, 64 (K)].—**Neural t.** See **MEDULLARY T.**—**O'Beirne's t.** A long rubber t. for irrigation of the colon. [A, 34].—**Oesophageal t.** A long t., made of rubber or other material, used for lavage. [A, 34].—**Ovarian t's, Ovarian t's.** Fr., *cordons glanduleux*. Ger., *Eiketten*. Ovarian (or egg-) chains; germinal epithelium in a developing ovary; divided into t's or chain-like masses by vascular ingrowths from the ovarian stroma. [J, 1, 30, 35].—**Peptic t's.** See **GASTRIC GLANDS**.—**Perforating t's.** Of **TOMES** and **DE MORGAN**, structures in bone which appear to be uncalcified Sharpey's fibres. [J, 35].—**Perithelial t.** [Auerbach]. See **CELLULAR COAT**.—**Pfütter's salivary t's.** Ducts within the lobules of a salivary gland. [L].—**Pfütter's t's.** See **OVARIAN T'S**.—**Pituitary t.** See **HYPOPHYSIS CEREBRI**.—**Pollen t.** A slender t. formed by a protrusion of the inner wall of a pollen cell, extending into the tissues of the style (or, in gymnosperms, directly into the tissue of the nucellus), and eventually fertilizing the ovule. [B, 229, 291 (A, 35)].—**Principal t's.** See **EXCRETORY TUBULES**.—**Prolapsus t.** A t. devised by Whitehead for patients to introduce into the vagina for the purpose of inserting medicinal substances, mainly in cases of prolapse of the uterus. [A, 37].—**Pulp t's.** T-like masses of the proper substance of an organ (e. g., of the spleen). [J, 21].—**Receiving t. of the kidney.** See **COLLECTING TUBE**.—**Respiratory bronchial t's.** See **BRONCHIOLES**.—**Rectal t.** An elastic gum t. to be passed into the rectum. [E].—**Ribemont's laryngeal t.** A hook t. for laryngeal insufflation in asphyxia neonatorum. [A, 34].—**Safety-t.** A small part of the upper portion of the Eustachian t. which lies in the curve formed by the cartilage as it turns forward under the cartilaginous hook. It is always sufficiently open to allow a recoil of air to occur from the drum cavity if the drumhead is suddenly driven in, as in explosions, and also to permit of a slow equalization of pressure in the tympanic cavity from the pharynx. [F].—**Segmental t's.** The t's which lead to the segmental duct.—**Sieve-t.** See **SIEVE-CELL**.—**Speaking t.** Ger., *Sprachrohr*. See **HEARING T.**—**Spray t.** A combination of two t's with fine nozzles placed at right angles so that a current of air or steam through one will cause a spray of fluid to issue from the other. [A, 34].—**Stomach t.** See **ESOPHAGEAL T.**—**Straight t.** See **COLLECTING TUBE**.—**Toynbee's auscultation t.** See **TOYNEBEE'S OTOSCOPE**.—**Toynbee's conical metal t.** A small t., slightly bent at the point, used for washing out the mastoid antrum or the cavity of the middle ear. [F].—**Toynbee's diagnostic t.** See **TOYNEBEE'S OTOSCOPE**.—**Trachea t.** See **TRACHEA CANNULA**.—**T. à dégagement** (Fr.). See **SEMINIFEROUS TUBULES**.—**Uriniferous t's, Uriniferous t's.** See **URINIFEROUS TUBULES**.—**Uterine t.** Ger., *Mutterrohr* (1st def.). **1.** A t. for injecting the uterus. **2.** A uterine pouch, or diverticulum, in the lower animals. **3.** See **OVIDUCT**.—**Valentin's t's.** See **OVARIAN T'S**.—**Voltolini's aluminium t.** A small t. of aluminium for insertion in an aperture of the tympanic membrane to keep it open. It is maintained in place by clasping the handle of the malleus with a horseshoe-shaped gold cannula provided with a canal at its greatest convexity. [F, 32].

**TUBER** (Lat.), n. n. *Tu<sup>2</sup>b(tu<sup>2</sup>b)/u<sup>2</sup>r(e<sup>2</sup>r)*. Gen., *tub'eris*. Fr., *tubercule* (1st def.), *truffe* (1st def.). Ger., *Trüffel* (2d def.). **1.** A swelling, tumor, or protuberance; in botany (Ger., *Knolle*) a short, thickened underground branch bearing leaf-buds. [G; A, 35]. **2.** The typical genus of a division (the *Tubercaceæ* [Fr., *tubéracées*; Ger., *Trüffelpilze*, or *TubercaceæFungi* in which the mycelium penetrates the soil and produces tuberous fructifications. Many of them are eaten under the name of truffles. [A, 35].—**Olfactory t.** See **OLFACTORY BULB**.—**T. aestivum**. English truffle; an esculent species. [A, 35].—**T. album**. Ger., *weisse Trüffel*. White (or false) truffle; an esculent species. [A, 35].—**T. annulare**. See **POXVS VAROLII**.—**T. antierius**. See **T. cinereum**.—**T. brumale**. See **T. cibarium**.—**T. calcanei**. The tuberosity of the calcaneum. [L, 57 (A, 14)].—**Tubera candidantia**. See **CORPUS ALBICANS** (2d def.).—**T. cervinum**. See **ELAPHOMYCES cervi-**

**nus.**—**T. cibarium.** Fr., truffle (tubéreuse, on d'hiver, ou noire). Ger., *esbare* (oder ächte, oder schwarze) Trüffel. Earth-ball, true (or black) truffle; an esculent species found in middle and southern Europe, said to be aphrodisiac. [a, 35.]—**T. cinereum.** A tract of gray matter which extends from the corpora albicantia to the optic commissure, forming a portion of the floor of the third ventricle. [I, 15 (K).]—**T. corporis callosi.** See SPLENIUM (3d def.).—**T. Eustachii.** See PROMONTORY (2d def.).—**T. exterius.** See EMINENTIA collateralis.—**T. frontale.** See Frontal EMINENCE.—**Tubera geniculata.** The external and internal geniculate bodies. [I, 30 (K).]—**T. griseum.** Fr., truffle grise (ou à vil, ou blanche). An esculent species, of alliacious odor, found in Italy and France; said to be aphrodisiac. [a, 35.]—**T. gulosorum.** See **T. cibarium.**—**T. gutturosum.** See GOTTRE.—**T. ischii.** See TUBEROSITY of the ischium.—**T. magnatum.** Piedmontese (or gray) truffle; an esculent species. [a, 35.]—**T. magnum.** See CHOIROMYCES magnus.—**T. maxillæ.** **T. maxillare.** See TUBEROSITY of the superior maxilla.—**T. melanosperrum.** A French species, much eaten. [B, 61.]—**T. moschatum.** Fr., truffle musqué. Ger., *Bismatrüffel*. A French species with a musk-like odor; sometimes eaten. [a, 35.]—**T. nigrum.** See **T. cibarium.**—**T. niveum.** Fr., truffle blanc-de-neige. Ger., *schneeweisse Trüffel*. An edible species found in northern Africa. [a, 35.]—**T. omentale hepatis.** An elevation on the left lobe of the liver corresponding to the lesser curvature of the stomach. [L, 332.]—**T. omentale pancreatis.** An elevation of the middle portion (corpus) of the pancreas corresponding to the lesser omentum. [L, 332.]—**T. parietale.** See Parietal EMINENCE.—**T. rufum.** Fr., truffle rousse. Red truffle; found especially in vineyards in Italy, where it is used as food. [a, 35.]—**T. supracondyloideum.** A tuberosity on the fibula opposite the inferior end of the internal border of the linea aspera. [L, 115 (a, 34).]—**T. supraorbitale.** See SUPERCILIARY RIDGE.—**T. syphiliticum.** See SYPHILOMA.—**T. tympani.** See PROMONTORY (2d def.).—**T. valvulæ (cerebelli).** See NODULE (2d def.).—**T. verrucosum.** Fr., *ognon, oignon*. A callosity, usually developed about the metatarsophalangeal joint of the great toe.—**T. zygomaticum.** A protuberance on the lower border of the zygoma near the junction of the superior maxilla and the zygomatic projection. [L, 31 (a, 34).]

**TUBERCLE.** n. Tuβ'ur'-k'l. Lat., *tuberculum* (from *tuber* [q. v.]). Fr., *tubercule*. Ger., *Tuberkel, Höcker, Höckerchen, Hügel, Knolle, Knötchen*. 1. In anatomy, a blunt and rounded end of a bone; also a small rounded eminence on a bone or other part. [C.] See also TUBEROSITY. 2. In dermatology, a little nodule in the skin produced by a morbid deposit or growth in the corium or subcutaneous tissue. [G.] 3. In pathology, a small granular body, varying in diameter from  $\frac{1}{16}$  mm. to 3 mm. Its consistency is hard, and when fresh it is transparent, but it quickly becomes opaque, and yellowish at the centre. It is usually surrounded by a reddish vascular zone. These characteristics are commonly evident to the naked eye, but may not appear, especially if the granulations are confluent. In the latter case yellowish masses appear which can not be differentiated from a mass of caseous exudate, excepting with the aid of the microscope. When t's are developed in a mass of inflammatory tissue, as often occurs in the pleura and peritoneum, it is not always possible to distinguish them in the embryonal tissue in which they are imbedded. Thus they appear under two forms, the isolated and the confluent. [D, 24.] 4. In botany, (1) a wart or swelling on the surface of a part; (2) a small tuber or tumefied root; (3) of Acharius, see APOTHECIUM verruciforme. [a, 35.]—**Adductor t. of the femur.** A small sharp projection at the lower termination of the internal supracondylar line of the femur, to which is attached the tendon of the adductor magnus. [C, 3.]—**Amygdaloid t.** A projection in the roof of the descending cornu of the lateral ventricle at its anterior extremity. [I, 15 (K).]—**Anatomical t.** See VERRUCA necrogenica.—**Anterior pair of t's.** See NATES (2d def.).—**Anterior t. (of a vertebra).** A t. at the anterior portion of the extremity of the transverse process of certain vertebrae. [L, 142.]—**Anterior t. of the atlas.** A prominence in the middle line upon the anterior arch of the atlas. [L, 332.]—**Anterior t. of the calcaneum.** A rough projection on the inferior anterior surface of the os calcis. [C, 3.]—**Anterior t. of the optic thalamus.** A rounded projection at the anterior extremity of the optic thalamus. [I, 23 (K).]—**Anterior t. of the vagina.** Lat., *tuberculum vaginae*. A rugose, rounded prominence of the soft parts at the upper part of the orifice of the vagina, behind the meatus urinarius.—**Carotid t.** The anterior t. of the transverse process of the sixth cervical vertebra. [L.]—**Conoid t.** A broad t. on the posterior border of the clavicle at the junction of its middle and outer thirds to which the conoid ligament is attached. [C, 3; L.]—**Cuneate t.** Ger., *dreieckiger Kern des Keilstranges*. Of Schwabbe, a slight projection on the cuneate fasciculus. [I, 15 (K).]—**Cuneiform t.** See Painful t.—**Deltoid t.** A prominence upon the anterior border of the clavicle where the deltoidens arises in part. [L, 172.]—**External supracondyloid t.** Lat., *tuberculum supracondyloideum laterale*. A prominence on the outer portion of the posterior surface of the lower end of the femur, from which the plantaris muscle arises. [L, 31.]—**External t.** The most external of three t's at the extremity of the transverse process of several of the dorsal vertebrae. [L, 142.]—**Fibrous t.** T. which has undergone modification chiefly by the formation of connective tissue within the (tuberculous) nodule. [D, 4.]—**Foot-t.** Lat., *parapodium*. A small lateral process, placed one on each side of a segment of an annelid, serving for locomotion. [L, 147.]—**Genital t's.** Double pairs of t's on the inner surface of the inferior maxilla (one pair on each side of the middle line), to which are attached the genio-hyoidei and the genio-hyoidei muscles. [L, 31, 142, 332.]—**Genital t.** A protuberance of the urino-genital region of the embryo, in front of the cloaca, being the rudiment of the penis or the clitoris. [A, 16.]—**Gray t.** See MILIARY t.—**Gray t. of Rolando.** An eminence situated between the postero-lateral groove and the prolongation of the column of Burdach. [J, 15 (K).]—**Greater t. of the hu-**

**merus.** Its greater tuberosity. [G.]—**Hyaline t.** A milary t. with hyaline degeneration of the reticulum. [“Lancet,” 1882, i, p. 283 (a, 34).]—**Ilio-pubic t.** 1. See Ilio-pectineal EMINENCE. 2. See SPINE of the pubis.—**Inferior obturator t.** A prominence opposite to the superior obturator t. on the pubic margin of the obturator foramen. [L, 31.]—**Inferior t.** The lowermost of the three t's on the extremity of the transverse process of several dorsal vertebrae. [L, 142.]—**Infraglenoid t.** An eminence below the glenoid cavity of the scapula, from which the long head of the triceps arises. [L, 31, 332.]—**Internal supracondyloid t.** Lat., *tuberculum supracondyloideum mediale*. A prominence on the inner and posterior surface of the lower end of the femur from which the internal head of the gastrocnemius arises. [L, 31.]—**Internal t.** The innermost of the three t's at the extremity of several of the dorsal vertebrae. [L.]—**Intravascular t.** A t. developed in the intima of a blood-vessel. [a, 34.]—**Jugular t.** A ridge on the inner surface of the occipital bone close to the outer wall of the anterior condylar foramen. [L, 31, 332.]—**Lacrimal t.** The little papillary elevation in the inner or nasal third of the margin of the eyelid. In its centre is the opening of the punctum lacrimale. [F.]—**Laminated t.** See NODULE (2d def.).—**Leprous t's.** The t. of tubercular leprosy. [L, 49 (a, 14).]—**Lesser t. of the humerus.** Its lesser tuberosity. [L.]—**Lymphoid t.** Of Chiari, a milary t. that consists of large and small round lymphatic cells. [a, 34.]—**Mamillary t's.** See CORPUS albicans (2d def.).—**Mental t.** A prominence on the lower border of the inferior maxilla at the point where it changes from the transverse to the more or less antero-posterior direction. [L, 31.]—**Miliary t.** A minute, nearly globular t. occupying the stroma of an organ, and microscopically presenting at its peripheral parts a number of round cells like leucocytes, larger cells near its centre, and giant cells at its centre. [Coats (a, 34).]—**Mucous t.** See MUCOUS PATCH.—**Nuchal t.** The spinous process of the seventh cervical vertebra. [L.]—**Olfactory t.** See Olfactory BULB and cf. TUBERCULUM olfactorium.—**Painful t.** Lat., *tuberculum dolorosum*. Fr., *angione sous-cutané douloureux*. Of Wood, an isolated t. of a painful character slowly developed in the subcutaneous tissue, usually in the region of the joints. The precise nature of the disease is uncertain. [“Edinburgh Med. and Surg. Jour.,” 1812 (G.).] Cf. NEUROMA.—**Papillary t. (of the liver).** An overhanging projection of the Spiegelian lobe of the liver into the portal fissure. [L, 332.]—**Pathological t.** See VERRUCA necrogenica.—**Pearly t's.** See MILIUM (1st def.).—**Pharyngeal t.** See PHARYNGEAL SPINE.—**Pisiform t's.** The corpora albicantia. [J, 6 (K).]—**Plantar t.** A prominence on the metatarsal bone of the great toe to which the tendon of the peroneus longus is attached. [L, 332.]—**Posterior pair of t's.** See TESTES (2d def.).—**Posterior t. (of a vertebra).** A t. at the posterior portion of the extremity of the transverse process of certain vertebrae. [L, 142.]—**Posterior t. of the atlas.** Lat., *tuberculum atlantis posterius*. An elevation or a depression with raised margins on the outer surface in the median line of the posterior arch of the atlas. [L, 31.]—**Posterior t. of the optic thalamus.** An elevation on the postero-lateral ventricular surface of the optic thalamus. [L, 31.]—**Pterygoid t.** A small t. on the internal surface of the inferior maxilla, for the attachment of the internal pterygoid muscle. [a, 34.]—**Quadrigenital t's.** See CORPORA quadrigemina.—**Retrograde t.** A calcified t. [a, 34.]—**Scalene t.** A t. on the first rib for the attachment of the scalenus anticus. [C.]—**Secondary t.** Of Hamilton, a t. that has followed the softening of a caseous mass, such as occurs in the lung in catarrhal pneumonia. [a, 34.]—**Subcutaneous t.** See Painful t.—**Superior obturator t.** A flat prominence on the margin of the obturator foramen near the acetabular notch. [L, 31.]—**Supraglenoid t.** A prominence above the glenoid fossa of the scapula from which the long head of the biceps arises. [L, 31.]—**Syphilitic t's.** See TUBERCULAR SYPHILODERM.—**T. of a rib.** Lat., *tuberculum costæ*. A prominence on a rib adjoining the neck, directed backward, and articulating with the transverse process of the lower of the two vertebrae which the bone joins. [L, 31, 304.]—**T. of Darwin.** See SPINE of Darwin.—**T. of Lower.** A small projection on the wall of the right auricle, between the orifices of the superior and inferior venæ cavae, only slightly marked in man. [I, 15 (K).]—**T's of Montgomery.** The prominences formed on the surface of the areola of the nipple by the sebaceous glands.—**T. of Rolando.** See Gray t. of Rolando.—**T. of Santorini.** An elevation of the mucous membrane of the larynx caused by the cartilage of Santorini. [L, 332.]—**T. of the calcaneum.** See TUBEROSITY of the calcaneum.—**T. of the cuboid.** See TUBEROSITY of the cuboid bone.—**T. of the epiglottis.** See TUBERCULUM epiglottidis.—**T. of the femur.** A prominence on the front part of the neck of the femur where it joins the greater trochanter. [L, 172.]—**T's of the mesencephalon.** See CORPORA quadrigemina.—**T. of the quadratus femoris.** See LINEA quadrati.—**T. of the radius.** See BICIPITAL TUBEROSITY of the radius.—**T. of the scaphoid bone.** A stout conical projection on the outer end of the scaphoid bone, which gives attachment to the annular ligament. [C.]—**T. of the thyroid cartilage.** A t. at the back part of the upper border of the outer surface of the ala of the thyroid cartilage. [L, 31.]—**T. of the tibia.** The anterior tuberosity of the tibia. [L.]—**T. of the ulna.** An elevation at the base of the coronoid process of the ulna upon which the brachialis anticus is inserted. [L, 31.]—**T. of the zygoma.** A prominence at the beginning of the zygoma to which the external lateral ligament of the temporo-maxillary articulation is attached. [L, 172.]

**TUBERCULAR.** adj. Tuβ'ur'-k'l'u-ā'r. Having the appearance of a tubercle; also tuberculate, tuberculous. [D; a, 35.]

**TUBERCULATED.** TUBERCULATED, adj's. Tuβ'ur'-k'l'u-ā't-at-ā'r. Lat., *tuberculatus*. Fr., *tuberculé*. Ger., *klein-höckerig*. Provided with tubercles; also tuberculous. [D; a, 35.]

**TUBERCULE** (Fr.). n. Tuβ'ur'-k'l'u-ā'l. See TUBERCLE.—**T's bljameaux.** See CORPORA quadrigemina.—**T. cendré.** See Gray TUBERCLE of Rolando.—**T. coracoidien** [Cuvier]. The

coracoid bone (1st def.) in mammals. [L. 14.]—**T's d'Aranzi.** See **Corpora Arantii**.—**T. de guérison** [Cruveilhier]. See **Fibrous TUBERCLE**.—**T. de l'apophyse.** See **TUBERCLE of the zygoma**.—**T. de la valvule.** See **NOULE (2d def.)**.—**T. du pubis.** See **SPINE of the pubes**.—**T. ischio-pubien interne** [Verneau]. A tubercle situated on the inner surface of the pelvis, at the junction of the descending ramus of the pubic bone and the ascending ramus of the ischium. [A. 50.]—**T. moyen.** A small eminence on the upper surface of the optic thalamus near its middle. [I. 28 (K).]—**T. muqueux.** See **CONDYLOMA latum**.—**T. postérieur.** See **PULVINAR (1st def.)**.—**T's quadrijumeaux.** See **CORPORA quadrigemina**.—**T'ssus-sphénoidaux.** See **Clinoid PROCESSES**.—**T. tardif à évolution rapide.** See **Tuberculous OSTEITIS**.—**T's vésiculaires.** See **Marginal BODIES**.

**TUBERCULIN**, n.  $Tu^2b-u^2rk-u^2l-i^2n$ . A preparation invented by R. Koch and considered by him to be a means of diagnosing and curing tuberculosis. Said by Koch to be an extract made with glycerin of cultures of the tubercle bacilli. It is injected subcutaneously, and is thought to cause destructive inflammation of the tissue surrounding the tuberculous deposit, whereby the deposit is eliminated, with the production of fever. [B. 270 (a, 38); a, 34.]—**Crude t.** A glycerin extract of the toxic substances present in cultures of the tubercle bacillus in veal broth containing 1 per cent. of peptone and 4 or 5 per cent. of glycerin. The culture liquid is evaporated and filtered. [a, 34.]—**Modified t.** Crude t. that has undergone various changes by the precipitation of certain constituents or filtration, or in which the mode of preparation is changed, as in Koch's first modification, in which a precipitate was obtained by adding alcohol to crude t. [a, 34.]

**TUBERCULITIS** (Lat.), n. f.  $Tu^2b(tub)-u^2rk(e^2rk)-u^2l(u^4l)-i(e)^2t's$ . Gen., *-it'idis (-idis)*. Inflammation around a tubercular deposit. [a, 34.]

**TUBERCULIZATION**, n.  $Tu^2b-u^2rk-u^2l-i^2z-a'shu^2n$ . Lat., *tuberculizatio* (from *tuberculum*, a tubercle). Fr., *tuberculisation*. 1. The process of conversion into tubercle (3d def.). [D. 3.] 2. The treatment of a patient with tuberculin.

**TUBERCULOCIDIN**, n.  $Tu^2b-u^2rk-u^2l-o-sid'i^2n$ . A substance remaining in solution in crude tuberculin after the noxious bodies in the latter have been precipitated by platinum chloride. It may be precipitated from the solution by alcohol; used in treating tuberculosis. [a, 34.]

**TUBERCULOSE** (Fr., Ger.), n.  $Tu^2b-e^2r-ku^2-loz, tub-e^2rk-ul-oz'e^2$ . See **TUBERCULOSIS**.—**Impft'** (Ger.). See **Inoculated TUBERCULOSIS**.—**Inhalations'** (Ger.). Tuberculosis induced by the inhalation of tuberculous matter. [Bertheau, "Dtsch. Arch. f. klin. Med.," xxvi, 5, 6; "Rev. des sci. méd.," Apr., 1882.]—**Knochen-t'** (Ger.). See **Tuberculous OSTEITIS**.—**Larynx'** (Ger.). See **Tuberculous LARYNGITIS**.—**Spitzent'** (Ger.). Tuberculosis of a pulmonary apex. [a, 34.]—**T. articulaire** (Fr.). See **Tuberculous OSTEITIS**.—**T. aviaire** (Fr.). See **Avian TUBERCULOSIS**.—**T. calcifié** (Fr.). Tuberculosis in which the final pathological condition is a calcification of the deposit. [Déjérine, "Rev. de méd.," Dec., 1884, p. 921.]—**T. caséo-calcifié** (Fr.). The termination of a tubercular deposit partly by caseification and partly by calcification. [Déjérine, l. c.]—**T. entéro-mésentérique** (Fr.). Tuberculosis involving the intestine and mesenteric glands. [a, 34.]—**T. pulmonaire anthracosique** (Fr.). See **ANTHRACOSIS (4th def.)**.

**TUBERCULOSIS** (Lat.), n. f.  $Tu^2b(tub)-u^2rk(e^2rk)-u^2l(u^4l)-os'i^2s$ . Gen., *-os'eos (-is)*. From *tuberculum*, a tubercle. Fr., *tuberculose*. Ger., *Tuberculose*. The condition of being affected with tubercle (3d def.).—**Acute miliary t.** A sudden and violent general or local eruption of miliary tubercles in various parts of the body. It may simulate typhoid fever when the infection is general, or acute hydrocephalus when the infection is meningeal, or the pulmonary symptoms are most marked when the lungs are principally affected. [a, 34.]—**Anatomical t.** See **VERRUCA necrogenica**.—**Anthracotic t.** See **PNEUMONOCOITIS**.—**Avian t.** Affecting birds. [a, 34.]—**Bovine t.** Fr., *pommelière*. Ger., *Perl-sucht, Franzosenkrankheit der Rinder*. Pearl disease, t. as it occurs in cattle. The lesion appears in nodes consisting largely of giant cells in a coarse reticulum. The nodes are usually much larger than in man, and show less inclination to cheesy degeneration or calcification. [D. 4.]—**Cerebral t.** See **Tubercular MENINGITIS** and **Acute tuberculous HYDROCEPHALUS**.—**Inoculated t.** T. produced by inoculation of tuberculous material. [a, 34.]—**Intestinal t.** Affecting a part or all of the intestinal tract. [a, 34.]—**Laryngeal t.** See **Tubercular LARYNGITIS**.—**Meningeal t.** See **Cerebral t.**—**Miliary t.** An acute or chronic disease caused by infiltration of one or more parts of the body with miliary tubercles. [a, 34.]—**Pseudo-t. cladothrica.** Of Eppinger, a multiple lesion, resembling tubercle, produced by a cladothrix-like organism. [a, 34.]—**Pulmonary t.** T. of the lungs, the ordinary form of t.—**Rapid t.** See **Acute miliary t.**—**Renal t.** Tubercular disease of the kidney. It is marked by a sediment of tuberculous matter in the urine, which is supposed to come from the ureters and pelvis of the kidneys, also by paroxysms of severe pain which resemble renal colic, by frequent and scanty urination, by hæmaturia, and by progressive emaciation. [D. 25.]—**Surgical t.** T. affecting a part that is susceptible to surgical interference. [a, 34.]—**T. cerebri.** See **Cerebral t.**—**T. cutis.** 1. A tubercular affection of the skin (commonly associated with general t. and usually in its later stages), attended with the formation of superficial, irregular, often seriginous ulcers with soft, slightly infiltrated, and usually jagged edges and reddish-yellow granular bases often covered by crusts. They are almost invariably situated in the immediate vicinity of one of the mucous orifices. 2. Any disease of the skin due to the presence of tubercle bacilli. In this sense the term is used to include, besides the disease mentioned in the 1st def., lupus t., verrucosa cutis, and scrofuloderma. [G.]—**T. of the joints.** Fr., *tuberculose articulaire*. Ger., *Gelenktuberculose*. See **Tuberculous OSTEITIS**.—**T. of the skin.** See **T. cutis**.—**T. pan-**

**zootica contagiosa.** Of Lydtin, bovine t.—**T. pulmonum.** See **Pulmonary t.**—**T. verrucosa cutis.** A chronic cutaneous disease occurring usually upon the hands of those who work about cattle or handle raw meat. It forms circumscribed patches containing pustules and warty outgrowths, surrounded by an erythematous border and due to the presence of tubercle bacilli. Verruca necrogenica is probably but one form of it. [Riehl and Palttauf, "Vierteljahrsschr. f. Dermat. u. Syph.," 1886, p. 19 (G).]—**Zoogileic t.** See **Pseudo-t. cladothrica**.

**TUBERCULOTIC**, adj.  $Tu^2b-u^2rk-u^2l-o^2t'i^2k$ . Pertaining to or affected with tuberculosis. [D.]

**TUBERCULOUS**, adj.  $Tu^2b-u^2rk-u^2l-u^2s$ . Lat., *tuberculosus* (from *tuberculum*, a tubercle). Fr., *tuberculeux*. Ger., *tuberkulös, hockerig*. 1. Affected with, pertaining to, or after the manner of tubercle. [D.] 2. In botany, covered with tubercles. [a, 35.]

**TUBERCULUM** (Lat.), n. n.  $Tu^2b(tub)-u^2rk(e^2rk)-u^2l(u^4l)-u^2m(u^4m)$ . Dim. of *tuber* (q. v.). See **TUBERCLE**. In the pl., *tubercula*, of Bateman, an order of skin diseases including phyma, molluscum, vitiligo, acne, syphilis, lupus, elephantiasis, and frambesia. [G. 12.] See also **GEMMULÆ Hobokenii**.—**T. acusticum.** Of Schwalbe, a projection on the lateral wall of the fourth ventricle crossed by the auditory striæ. [I. 17 (K).]—**T. adinosum.** See **MOLLUSCUM contagiosum**.—**T. annulare.** See **PONS Varolii**.—**Tubercula anteriora.** The anterior corpora quadrigemina. [I. 23 (K).]—**T. antierius atlantis.** See **Anterior TUBERCLE of the atlas**.—**T. anterius thalami optici.** See **Anterior TUBERCLE of the optic thalamus**.—**T. anticum humeri.** The lesser tuberosity of the humerus. [L.]—**Tubercula Arantii.** See **CORPORA Arantii**.—**Tubercula areolæ.** See **TUBERCLES of Montgomery**.—**T. articulare ossis temporis.** See **Articular EMINENCE of the temporal bone**.—**T. atlantis anterius** (seu *anticum*). See **Anterior TUBERCLE of the atlas**.—**T. atlantis posterius** (seu *posticum*). See **Posterior TUBERCLE of the atlas**.—**T. basales cartilagineæ arytenoideæ.** The muscular process of the arytenoid cartilage. [L.]—**Tubercula bigemina.** See **CORPORA quadrigemina**.—**T. calcanæum.** See **TUBEROSITY of the calcaneum**.—**T. capituli fibulæ laterale.** A not uncommon prominence on the upper end of the fibula from which the anterior head of the peroneus longus arises. [L. 332.]—**T. capituli fibulæ mediale.** An ill-defined anomalous prominence on the upper end of the fibula from which a portion of the soleus arises. [L. 332.]—**T. caroticum.** See **Carotid TUBERCLE**.—**T. cartilaginæ thyreoideæ.** See **TUBERCLE of the thyroid cartilage**.—**T. caudatum.** See **EMINENTIA caudata**.—**T. cerebelli minimum.** Of Tarini, see **FLOCCULUS (2d def.)**.—**T. cerebri majus.** Of Scarpa, the corpora quadrigemina, especially in the lower animals. [I. 3 (K).]—**T. cerebri olivare.** See **CORPORA quadrigemina**.—**T. cervicale inferius.** See **T. colli femoris inferius**.—**T. cervicale superius.** See **TUBERCLE of the femur**.—**T. chalazium.** Ger., *Nabelhöckerchen*. A name given to the chalazæ (2d def.) when it appears on the perfected ovule (the seed) in the form of a tubercle. [a, 35.]—**T. cinereum** (Rolandi). See **Gray TUBERCLE of Rolando**.—**T. colli femoris.** See **TUBERCLE of the femur**.—**T. colli femoris inferius.** A prominence at about the middle of the anterior intertrochanteric line. [L. 332.]—**T. colli femoris superius.** See **TUBERCLE of the femur**.—**T. costæ.** See **TUBERCLE of a rib**.—**T. cuboidel.** See **EMINENTIA ossis cuboidel.**—**T. cuneatum.** See **Cuneate TUBERCLE**.—**T. Darwinii.** See **SPINE of Darwin**.—**T. deltoideum.** See **Deltoid TUBERCLE**.—**T. dolorosum.** See **Painful TUBERCLE**.—**T. ephippii.** See **T. sellæ**.—**T. epiglotticum.** **T. epiglottidis.** Ger., *Kehldeckelpolster*. The projection of the convex posterior surface of the epiglottis into the larynx. [L.]—**T. externum humeri.** The greater tuberosity of the humerus. [L.]—**T. externum processus condyloidei mandibulæ.** A prominence below the condyle of the inferior maxilla to which the ligamentum accessorium laterale is attached. [L.]—**T. fibulæ.** The styloid process of the fibula. [a, 34.]—**T. ganglii postici posterius.** See **PULVINAR (1st def.)**.—**T. gummatum.** See **SYPHILOMA**.—**T. hemisphericum.** See **FORNIX cerebri**.—**T. iliopectineum.** See **Ilio-pectineal EMINENCE**.—**T. impar** [His]. In the embryo, a prominence in the middle line of the mouth from which the tongue is in part derived. [L. 294.]—**Tubercula intercondyloidea.** The anterior and posterior extremities of the tibial spine. [a, 34.]—**T. internum humeri.** The lesser tuberosity of the humerus. [L.]—**T. jugulare.** See **Jugular TUBERCLE**.—**T. labii superioris.** A prominence in the middle line of the inner surface of the upper lip of nurslings. [L. 332.]—**T. laminosum.** See **NOULE (2d def.)**.—**T. laterale.** See **T. acusticum**.—**T. laterale posterius.** See **External geniculate BODY**.—**T. lineareum.** An anomalous protuberance below the external occipital crest. [L. 332.]—**T. Lisfranci.** See **Scalene TUBERCLE**.—**T. majus humeri.** The greater tuberosity of the humerus. [L.]—**T. mamillæ.** See **CORPUS albicans (2d def.)**.—**T. mandibulæ.** The articular eminence of the temporal bone. [L.]—**T. medium.** The middle projection of the thalamus opticus. [L. 57 (a, 14).]—**Tubercula mentalia interna.** See **Genial TUBERCLES**.—**Tubercula mesencephali.** See **CORPORA quadrigemina**.—**Tubercula miliaria.** See **MILIUM (1st def.)**.—**T. minus humeri.** The lesser tuberosity of the humerus. [L.]—**T. nuchæ.** The t. on the occipital bone for the attachment of the ligamentum nuchæ. [a, 34.]—**T. obturatorium inferius.** See **Inferior obturator TUBERCLE**.—**T. obturatorium superius.** See **Superior obturator TUBERCLE**.—**T. olfactorium.** A small projection of gray matter in front of the anterior perforated space from which arise the roots of the olfactory nerve. [I. 6 (K).]—**T. opticum.** See **CORPORA quadrigemina**.—**T. ossis cuboidel.** See **EMINENTIA ossis cuboidel.**—**T. ossis hyoidel.** A slight elevation in the middle line of the anterior aspect of the body of the hyoid bone. [L.]—**T. ossis multanguli majoris.** The prominence on the plantar surface of the trapezium. [L.]—**T. ossis navicularis.** The tuberosity of the scaphoid bone. [L.]—**T. ossis pubis.** See **SPINE of the pubes**.—**T. ovale.** See **Olivary BODY**.—**T. papillare.** See **Papillary**

**TUBERCLE**.—**T. pharyngeum**. See *Pharyngeal spine*.—**T. plantare**. See *Plantar tubercle*.—**Tubercula posteriora**. See *Testes* (2d def.).—**T. posterior thalami optici**. See *Pulvinar* (1st def.).—**T. posterior vertebrae**. See *Posterior tubercle of a vertebra*.—**T. prostatica**. The middle lobe of the prostate gland. [L.]—**T. pterygoideum**. See *Pterygoid tubercle*.—**T. pubicum**. See *Spine of the pubes*.—**Tubercula quadrigenina**. See *Corpora quadrigenina*.—**T. Rolandi**. See *Gray tubercle of Rolandi*.—**T. santorinianum**. See *Tubercle of Santorini*.—**T. scaleni**. See *Scalene tubercle*.—**Tubercula sebacea**. See *Milium* (1st def.).—**T. sellae (equinae)**. An olive-shaped elevation between the optic groove and the sella turcica of the sphenoid bone. [L. 31.]—**T. spinosum ossis sphenoidalis**. The infratemporal crest or a prominence at its anterior extremity. [L. 332.]—**T. superius (anterior)**. The anterior tubercle of the optic thalamus. [L. 6 (K).]—**T. superius posterius thalami optici**. See *Pulvinar* (1st def.).—**T. supracondyloideum externum (seu laterale)**. See *External supracondyloid tubercle*.—**T. supracondyloideum mediale**. See *Internal supracondyloid tubercle*.—**T. supracotyloideum**. An anomalous eminence upon the lip of the acetabulum beneath the anterior inferior spine of the ilium. [L. 332.]—**T. supraglenoidale**. See *Supraglenoid tubercle*.—**Tubercula syphilitica**. See *Tubercular syphiloderma*.—**T. tali laterale**. An elevation upon the outer margin of the incisura astragali. [L. 332.]—**T. tali mediale**. A prominence upon the inner side of the incisura astragali. [L. 332.]—**T. thalami anterioris**. See *Anterior tubercle of the optic thalamus*.—**T. thalami inferioris (seu internum, seu magnum rotundum, seu posterius)**. See *Pulvinar* (1st def.).—**T. tibiae**. See *Spine of the tibia and Anterior tuberosity of the tibia*.—**T. trochleare**. See *Trochlea*.—**T. tympanicum anticum**. A protuberance on the upper anterior part of the annulus tympanicus. [L. 57 (a. 14).]—**T. tympanicum posticum**. A protuberance on the middle and posterior part of the annulus tympanicus. [L. 57 (a. 14).]—**T. vaginae**. See *Anterior tubercle of the vagina*.—**T. Wisbergianum**. An elevation of the mucous membrane of the larynx caused by the cartilage of Wisberg. [L. 332.]

**TUBER-ISCIO-TROCHANTERIEN** (Fr.), n.  $Tu^a-be^2r-cs-o-tro-ka^2n^2-ta-re-a^2n^2$ . See *QUADRATUS femoris*.

**TUBERIVOROUS**, adj.  $Tu^2b-e^2r-i^2v-o^2r-u^2s$ . Lat., *tuberivorus* (from *tuber*, a tuber, and *vorare*, to devour). Fr., *tuberivore*. Ger., *knollenfressend*. Living on tubers, especially truffles. [L.]

**TUBERKEL** (Ger.), n.  $Tub-e^2rk'e^2l$ . See *TUBERCLE*.—**Aderhaut'n**. See *CHORIOIDITIS tuberculosa*.—**Darmit'n**. See *ENTEROPHONGIOMA*.—**Gekerbte T'n des Scheldeneinganges**. See *CARUNCULAE myrtiformes*.—**Lepröse T. der Regenbogenhaut**. See *LEPRA iridis*.—**Muttert'**. See *METROSPHONGIOMA*.—**Rückenmarkst'**. Tuberculosis of the spinal cord. [a. 34.]—**T'krankheit**. See *TUBERCULOSIS*.

**TUBERKULOSE** (Ger.), n.  $Tub-e^2rk-ul-o^2z'e^2$ . See *TUBERCULOSIS*.—**Impft'**. See *Inoculated tuberculosus*.—**Lymphdrüsent'**. See *Tuberculous LYMPHADENITIS*.

**TUBEROSITAS** (Lat.), n. f.  $Tu^2b(tu^2b)-e^2r-o^2s(os)^2t-a^2s(a^2s)$ . Gen., *-at'is*. See *TUBEROSITY*.—**T. atlantis lateralis**. An eminence at the inner margin of that surface of the atlas which articulates with the occipital bone, to which the transverse ligament is attached. [L. 31, 142.]—**T. calcanei, T. calcis**. See *TUBEROSITY of the calcaneum*.—**T. clavicular**. A rounded eminence on the lower surface of the clavicle, near its sternal end, for the attachment of the costoclavicular ligament. [L.]—**T. coracoidea**. See *CONOID TUBERCLE*.—**T. costalis**. See *T. clavicular*.—**T. deltoidea**. See *DELTOID TUBERCLE*.—**T. ephippii**. See *TUBERCU UM sellae*.—**T. glutaealis**. The tubercle on the upper end of the femur for the attachment of the glutæus maximus. [a. 34.]—**T. iliaca, T. IIII**. A rough eminence behind that surface of the ilium which articulates with the sacrum, for the attachment of the sacro-iliac ligaments. [L. 31.]—**T. ischii**. See *TUBEROSITY of the ischium*.—**T. malaris**. A small tuberosity near the maxillary process of the zygomatic bone. [a. 34.]—**T. maxillae, T. maxillaris**. See *TUBEROSITY of the superior maxilla*.—**T. metacarpi quinti**. A prominent tuberosity on the ulnar side of the fifth metacarpal bone, near its base. [L. 142.]—**T. metatarsi hallucis**. See *Plantar tubercle*.—**T. metatarsi quinti**. A rough prominence upon the external surface of the tarsal end of the fifth metatarsal bone. [L.]—**T. olecrani**. A prominence on the olecranon process into which is inserted the extensor triceps brachii. [L. 31.]—**T. ossis cuboidel**. See *TUBEROSITY of the cuboid bone*.—**T. ossis IIII**. See *T. iliaca*.—**T. ossis navicularis**. See *TUBEROSITY of the scaphoid bone*.—**T. ossis multanguli majoris**. See *T. ossis trapezii*.—**T. ossis palatini**. See *Pyramidal process of the palate bone*.—**T. ossis trapezii**. An oblique ridge on the volar surface of the trapezium. [L.]—**T. palatinus**. A tuberosity formed on the internal surface of the palatine bone, at the angle of the posterior and horizontal borders. [a. 301 (a. 34).]—**T. patellaris**. See *Anterior tuberosity of the tibia*.—**T. pectoralis**. A tubercle near the sternal end of the clavicle for the attachment of the pectoralis muscle. [a. 34.]—**T. pubo-ischiadica**. A rough eminence at the union of the ramus of the ischium and pubes. [L.]—**T. sacralis**. See *TUBEROSITY of the sacrum*.—**T. scapularis**. See *CONOID TUBERCLE*.—**T. supracondyloidea ossis femoris**. The external or internal supracondyloid tubercle. [L.]—**T. tibiae**. See *Anterior tuberosity of the tibia*.—**T. tympani**. See *PROMONTORY* (2d def.).—**T. ulnae major**. A rough eminence at the base of the coronoid process of the ulna, for the attachment of the brachialis internus. [L. 332.]—**T. ulnae minor**. A small tuberosity occasionally found below the lesser sigmoid cavity of the radius. [L. 332.]—**T. ungularis phalangis**. A broad, horseshoe-shaped expansion of the distal end of a terminal phalanx. [L.]—**T. vertebralis (medialis)**. A rough eminence on the posterior surface of the transverse process (near its apex) of some of the dorsal vertebrae. [L. 31, 332.]—**T. zygomatice**. See *TUBERCLE of the zygoma*.

**TUBÉROSITÉ** (Fr.), n.  $Tu^a-ba-ro-zé-ta$ . See *TUBEROSITY*.—**T's de l'estomac (grande et petite)**. The two extremities of the stomach. [a. 34.]—**T. de l'os palatin**. See *Pyramidal process of the palate bone*.—**T's des condyles**. The internal and external tubercles of the femur. [L.]—**T. du maxillaire**. See *TUBEROSITY of the superior maxilla*.—**T. iliaque**. See *TUBEROSITAS IIII*.—**T. ischiadique, T. sciatique**. See *TUBEROSITY of the ischium*.

**TUBEROSITY**, n.  $Tu^2b-e^2r-o^2s'^2t-i^2$ . Lat., *tuberositas* (from *tuber*, a hump). Fr., *tubérosité*. Ger., *Rauhigkeit*. A rounded or blunt elevation on a bone or other organ. [L.]—**Anterior t. of the tibia**. A t. on the anterior aspect of the tibia, near its upper extremity, for the attachment of the ligamentum patellae. [C. 3.]—**Bicipital t. of the radius**. A t. on the superior part of the internal aspect of the shaft of the radius to the posterior rough portion of which is attached the tendon of the biceps flexor cubiti. [C. 3.]—**External occipital t.** See *External occipital protuberance*.—**External t. of the femur**. A rough eminence above the external t. of the femur to which the external lateral ligament is attached. [L. 142.]—**External t. of the tibia**. A rounded eminence on the external side of the upper end of the tibia which articulates posteriorly with the fibula. [L.]—**Greater t. of the humerus**. Ger., *größerer Oberarmbeinhöcker*. An upward projection of the humerus on its outer side, separated from the head and lesser t. by grooves and serving as a point of attachment for the infraspinatus, supraspinatus, and teres minor muscles. [L. 31, 142, 332.]—**Internal t. of the femur**. A rough t. above the internal condyle of the femur to which the internal lateral ligament of the knee is attached. [L. 142.]—**Internal t. of the tibia**. A massive rounded eminence on the inner side of the upper end of the tibia. [C. 3.]—**Ischio-pubic t.** See *TUBEROSITAS pubo-ischiadica*.—**Lesser t. of the humerus**. A small t. at the proximal end of the humerus, on the inner side of the bicipital groove, for the attachment of the subscapularis muscle. [L. 142.]—**Maxillary t.** See *T. of the superior maxilla*.—**Pyramidal t. (of the palate bone)**. See *Pyramidal process of the palate bone*.—**T. of the calcaneum**. Ger., *Fersenhöcker*. The posterior extremity of the os calcis. [L.]—**T. of the cuboid bone**. A thick, oblique ridge on the inferior surface of the cuboid bone, near its anterior extremity. [L. 31.]—**T. of the ilium**. See *TUBEROSITAS IIII*.—**T. of the ischium**. Ger., *Sitzbeinhöcker, Sitzknorren*. The thick downward projection of the lower portion of the ischium upon which the body rests when sitting. [L.]—**T. of the olecranon**. See *TUBEROSITAS olecrani*.—**T. of the sacrum**. A t. behind and internal to the lateral articular surface of the sacrum. [a. 34.]—**T. of the scaphoid bone**. 1. The prominence of the infero-external portion of the volar surface of the scaphoid bone of the hand. 2. A t. on the lower inner margin of the scaphoid bone of the foot. [L. 31.]—**T. of the superior maxilla**. A rough convexity on the posterior part of the external surface of the superior maxilla. [L.]

**TUBEROUS**, adj.  $Tu^2b'e^2r-u^2s$ . Lat., *tuberosus*. Fr., *tubéreux*. Ger., *knollig*. 1. Resembling a tuber. 2. Bearing tubers.

**TUBICOLA** (Lat.), n. n. pl.  $Tu^2b(tu^2b)-i^2k'o^2l-a^2$ . From *tubus*, a tube, and *colere*, to inhabit. Fr., *enfermes*. An order of the *Annelida*, comprising those that live in tube-like structures. [a. 48.]

**TUBIFEROUS**, adj.  $Tu^2b-i^2f'e^2r-u^2s$ . Lat., *tubifer* (from *tubus*, a tube, and *ferre*, to bear). Fr., *tubifère*. Ger., *röhrentragend*. Bearing a tube. The *Tubifera* of Lindley are a cohort of the *Incomplete*, comprising the *Santales*, *Daphnales*, *Proteales*, *Lamiales*, and *Penaeales*. [a. 35.]

**TUBIFLOUS**, adj.  $Tu^2b-i^2fl-o^2r-u^2s$ . Lat., *tubiflorus* (from *tubus*, a tube, and *flos*, a flower). Fr., *tubiflore*. Ger., *röhrenblüthig*. Having a tubular perianth. The *Tubiflorae* are: Of Batsech, a family of the *Coronales*, containing *Narcissus*, *Pancratium*, etc.; of Agardh, a class of the *Phanerogalphyllales* complete, comprising the *Plantagineae*, *Plumbaginaceae*, *Convolvulaceae*, etc.; of Reichenbach, an order of the *Synpetalae*, consisting of the *Aggregatae* and *Campanaceae*; of Fries, a class of the *Corolliflorae*, including the *Verbenaceae*, *Asclepiadeae*, *Solanaceae*, etc. [a. 35.]

**TUBIPORUS** (Lat.), n. m.  $Tu^2b(tu^2b)-i^2p'o^2r-u^2s(u^2s)$ . From *tubus*, a tube, and *porus*, a pore. See *BOLETUS*.

**TUBO-ABDOMINAL**, adj.  $Tu^2b'o-a^2b-do^2m'i^2n'$ . From *tuba*, a trumpet, and *abdomen* (q. v.). Pertaining to the abdomen and the oviduct. [L.]

**TUBO-OVARIAN**, adj.  $Tu^2b-o-o^2v-a^2r-i^2a^2n$ . From *tuba*, a trumpet, and *ovarium*, the ovary. Fr., *tubo-ovarien, tubo-ovarique*. Ger., *tubo-ovarial*. Pertaining to the oviduct and the ovary. [L.]

**TUBO-UTERINE**, adj.  $Tu^2b-o-u^2t'e^2r-i^2n$ . From *tuba*, a trumpet, and *uterus* (q. v.). Pertaining to the oviduct and the uterus. [L.]

**TUBULAR**, adj.  $Tu^2b'u^2l-a^2r$ . From *tubulus*, a small tube. Fr., *tubulaire*. Ger., *röhrenförmig*. 1. Hollow and nearly cylindrical, tube-shaped. [a. 35.] 2. Of an auscultatory sound, suggestive of one produced by an air-current in a tube (cf. *Tracheal respiration* (1st def.)). [D.]

**TUBULARIA** (Lat.), n. f.  $Tu^2b(tu^2b)-u^2l(u^2l)-a^2r(a^2r)^2t-a^2$ . From *tubulus*, a small tube. A genus of corals. [a. 35.]—**T. acetabulum**. Ger., *Nadelhöcker*. A coral found especially in the Mediterranean Sea on rocks and large crustaceans; formerly used as a diuretic and anthelmintic under the names *umbilicus marinus*, *acetabulum marinum*, *cotyledon marinum*, and *bellericus marinus*. [a. 35.]

**TUBULE**, n.  $Tu^2b'u^2l$ . Lat., *tubulus* (dim. of *tubus*, a tube). Fr., t. Ger., *Röhrenchen*. A small tube or tube-like structure. [a. 48.]—**Collecting t.** Lat., *tubulus rectus*. Fr., *canalicule droit, tube collecteur*. Ger., *Sammelrohr*. The part of a uriferous t into which the functional t's open. It is nearly straight, has a large lumen, is lined with clear, cuboidal cells, and joins with others, as it passes from the cortical to the medullary portion of the kidney,

to form a large excretory t. [J, 30, 32].—**Communicating t.** See **Junctional t.**—**Connecting t.** See **Second convoluted t.**—**Convoluted t.** 1. See **First convoluted t.** 2. Formerly, the entire uriniferous t., from Bowman's capsule to the point where it enters a collecting t. [J, 24].—**Curved collecting t.** See **Junctional t.**—**Dark-bordered nerve-t's.** See **Medullated NERVE-FIBRES.**—**Dental t's.** See **Dental CANALS.**—**Distal convoluted t.** See **Second convoluted t.**—**Efferent t's of the testis.** The vasa efferentia of the testicle. [L.]—**Elementary t's.** See **1's of Stilling.**—**Excretory t's.** Lat., *tubuli belliniani*. Fr., *tubes de Bellini*. Ger., *Hauptrohren*. The comparatively large uriniferous t's in the medullary portion of the kidneys, formed by the union of many straight collecting t's. They are lined with columnar epithelium, and unite with others to form a papillary tube or duct which opens at the apex of a papilla into one of the renal calices or infundibula of the pelvis of the kidney. [J, 30, 32, 35].—**First convoluted t.** Lat., *tubulus contortus*. Fr., *tube contourné*. Ger., *bogig gewundenes Kanalstück, gewundenes Harnkanälchen*. The part of a uriniferous t. that extends in a very tortuous manner for a short distance beyond the capsule of Bowman, to which it is joined by the constricted part or neck of the tubule. The epithelium, according to Heidenhain, is fibrillated. It has been shown by Tuttle to be ciliated in man and in the cat. [J, 30, 32, 35; "Stud. from the Biol. Lab. of Johns Hopkins Univ.," 1883, p. 447 (J).]—**Gastric t's.** See **Gastric GLANDS.**—**Henle's looped t.** See **Henle's loop-TUBE.**—**Intercalary t.** [Schweiger-Seidel]. **Intercalated t.** See **Second convoluted t.**—**Irregular t.** The part of a uriniferous t. between the termination of the ascending limb of Henle's loop-tube and the second convoluted t. It winds between the convoluted t's of the labyrinth, so that its course is irregular. The epithelium is distinctly fibrillated. [J, 30, 32].—**Junctional t.** The relatively short part of a uriniferous t. extending from the second convoluted t. to a straight collecting t. It is narrow, but has a relatively large lumen and is lined with clear, cuboidal cells with a slight admixture of cells like those in the second convoluted t. [J, 30, 32]. See also **Connecting CANAL** and **Second convoluted t.**—**Lactiferous t's.** See **Galactophorous DUCTS.**—**Liver t's.** 1. A tubular ventral outgrowth of the duodenum from which the liver is developed. [L, 201.] 2. In some of the lower animals and perhaps in man, the membrana propria inclosing the tubular network of cells in the liver. 3. In fishes, birds, and reptiles, the tube-like arrangement of the hepatic cells. [J, 2, 35].—**Looped t. of Henle.** See **Henle's loop-TUBE.**—**Proximal convoluted t.** See **First convoluted t.**—**Renal t's.** See **Uriniferous t's.**—**Schachowa's t.** See **Spiral t. of Schachowa.**—**Second convoluted t.** Fr., *canal d'union*. Ger., *Schaltstück, Schaltwindung, Uebergangskanälchen*. The part of a uriniferous t. between the irregular and the junctional t's. It is convoluted, and has an epithelium composed of long cells with large nuclei and processes that fit into depressions of neighboring cells. Some authors make this portion include the junctional t., and therefore terminate in a collecting t. [G, 2, 21, 30, 34, 42].—**Seminal t's, Seminiferous t's.** Lat., *tubuli seminiferi*. Fr., *tubes à ressort, canalicules (ou conduits) séminifères (ou séminaires, ou spermaticques)*. Ger., *Samenkanälchen*. Tubes from  $\frac{1}{16}$  to  $\frac{1}{8}$  inch in diameter, lined with epithelium, from which the spermatozooids develop. They occupy the spaces in the testicle formed by the processes of the tunica albuginea, within which they are highly convoluted, but as they pass toward the surface they become straight and unite with each other to form the vasa efferentia. [L, 31, 142, 332].—**Spiral t. of Schachowa.** The portion of a uriniferous t. just beyond the first convoluted t. It extends to the junction of the cortex and medulla, where it is continued as the descending limb of Henle's loop-tube. Its epithelium is fibrillated. [J, 30, 32].—**T's of Stilling.** Ger., *Horngerüst, Hornspongiosa*. A continuous, intricate, and connected network of similar minute t's or fibrils forming the entire substance of a nerve-fibre (neurilemma, medullary sheath, and axis-cylinder), supposed by Kühne and Ewald to be of a horny nature. Some of the t's also pass between neighboring nerve-fibres. Clarke denies their existence. [J, 10, 30, 32; "Clarke," Quart. Jour. of Micr. Sci., 1860, p. 651 (J).]—**Uriniferous t's, Uriniparous t's.** Ger., *Harnkanälchen, Harnrohren*. Minute canals, consisting of a basement membrane and a lining of epithelium, which form the proper glandular substance of the kidney. They originate in Bowman's capsules, and, after extending in a tortuous manner for a considerable distance, finally join other t's to form a common t., which extends in a nearly straight direction, and, after joining others, empties into the pelvis of the kidney. While the uriniferous t's may be properly said to be continuous from their origin to their termination, various parts of their length differ in size and course and in the character of the lining epithelium, and are named as if they were independent t's, as follows: (1) The capsule of Bowman; (2) the neck or constricted part joining the t. and capsule; (3) the first convoluted t.; (4) the spiral t. of Schachowa; (5) the descending limb of Henle's loop-tube; (6) Henle's loop-tube; (7) the ascending limb of Henle's loop-tube; (8) the irregular t.; (9) the second convoluted t.; (10) the junctional t., the last uniting with other junctional t's to form (11) a collecting t., which unites with others to form (12) an excretory t., which finally opens into one of the calices of the pelvis of the kidney. [J, 30, 32, 35].

**TUBULIFLOROUS**, adj.  $Tu^2b-u^2l-i^2-flor-u^2s$ . Lat., *tubuliflorus* (from *tubulus*, a small tube, and *flos*, a flower). Fr., *tubuliflore*. Ger., *röhrchenblüthig*. Having flower-heads composed of tubular corollas. The *Tubuliflorae* are: Of De Candolle, a suborder of the *Compositae*, consisting of the *Vernoniaeae*, *Eupatoriaceae*, etc.; of Reichenbach, a section of the *Amphigynanthae*, consisting of the *Cotuleae*, *Gnaphalioideae*, and *Cynoseae*. [a, 35.]

**TUBULOSE, TUBULOUS**, adj's.  $Tu^2b-u^2l-ous-u^2s$ . See **TUBULAR** (1st def.).

**TUBULUS** (Lat.), n. m.  $Tu^2b(tu^2b)u^2l(u^2l)-u^2s(u^2s)$ . 1. See **TUBULE**. 2. Of Malpighi, in the pl. *tubuli*, apparently the capillary blood-vessels. [Nock, "Brit. Med. Jour.," June 24, 1882, p. 960.] 3.

See **CANNULA.**—**Dental tubuli.** See **Dental CANALS.**—**Tubuli belliniani, Tubuli Bellini.** See **Excretory TUBULES.**—**T. colligens.** See **Collecting TUBULE.**—**T. conjunctivus.** See **Junctional TUBULE.**—**T. contortus.** See **First convoluted TUBULE.**—**T. corticalis.** See **Convoluted TUBULE** (2d def.).—**T. heuleanus.** See **Henle's loop-TUBE.**—**T. hirsutus.** Hypertrichosis in the external auditory canal. [F.]—**T. intercalaris.** See **Second convoluted TUBULE.**—**T. laqueriformis.** See **Henle's loop-TUBE.**—**T. nervorum.** See **PERINEURIUM.**—**Tubuli pelvis renalis** [Heister]. The calices of the kidney. [L, 349.]—**T. rectus.** See **Collecting TUBULE.**—**Tubuli renales.** See **Uriniferous TUBULES.**—**Tubuli seminales contorti.** Convoluted seminiferous tubules within the compartments of the testicle. [L.]—**Tubuli seminales recti.** See **Vasa recta.**—**T. spiralis modiolii.** See **Spiral CANAL of the modiolus.**

**TUBUS** (Lat.), n. m.  $Tu^2b(tu^2b)u^2s(u^2s)$ . See **TUBE.**—**T. acusticus.** See **Ear-TRUMPET.**—**T. alimentarius.** See **Alimentary CANAL.**—**T. digestivus.** The portion of the alimentary canal below the diaphragm. [L, 332.]—**T. ingestorius.** The portion of the alimentary canal above the diaphragm. [L, 332.]—**T. medullaris.** See **Medullary CANAL** (1st def.).

**TUCH** (Ger.), n.  $Tuch^2$ . Cloth, linen, linen cloth. [L, 46 (a, 21).]—**Kinnt'.** See **JAW-BANDAGE.**

**TUCKAHOE, TUCKAHOO**, n's.  $Tu^2k-a^2-ho', -hu'$ . Indian loaf (or bread); an American Indian name for an underground tuberous production, consisting chiefly of pectic acid, formerly identified with a fungus (*Pachyma cocos*), but now regarded as a peculiar condition of the roots of certain trees on which it is found in North America, China, and Japan. It is used as food by the Indians, and in China as a medicine and in the manufacture of jelly. [a, 35.]

**TUCUM**, n. In Brazil, the *Astrocaryum vulgare*. [a, 35.]

**TUFT**, n.  $Tuft^2$ . A knot or bunch (e. g., of hairs, feathers, etc.). [a, 35].—**Placental t's.** Ger., *Placentarzotten*. The agglomerated chorionic villi which form the fetal placenta.—**Synovial t's.** See **Synovial VILLI.**—**T's of fetal vascular villi.** Individual assemblages of the villi of the chorion separated by decidual septa.—**Vascular t.** Ger., *Gefässbüschel*. A t. made up largely of blood-vessels.

**TUGGING**, n.  $Tu^2g-i^2n^2$ . A pulling or dragging. [a, 34].—**Tracheal t.** A sign of thoracic aneurysm consisting in the sense of downward traction of the larynx with the cardiac systole when the thyroide cartilage is gently raised between the finger and thumb. ["Lancet," Feb. 20, 1892, p. 435 (a, 50).]

**TULBAGHIA** (Lat.), n. f.  $Tul-ba^2g-hi^2a^2$ . Fr., *tulbaghie*. A genus of liliaceous herbs. The *Tulbaghieae* are a subsection of the *Anthericeae*. [a, 35].—**T. alliacea (T. capensis), T. cepacea.** Fr., *tulbaghie alliaceae*. South African species, of alliaceous odor. They are used as an anthelmintic and in phthisis. [a, 35.]

**TULIP**, n.  $Tu^2l-i^2p$ . See **TULIPA.**—**African t.** The genus *Haemanthus*. [a, 35].—**Checkered t., Drooping t.** See **Fritillaria meleagris.**—**T.-tree.** See **LIRIODENDRON tulipifera**.

**TULIPA** (Lat.), n. f.  $Tu^2l(tul)u^2p-a^2$ . Fr., *tulipe*. Ger., *Tulpe, Tulipane*. Tulip; a genus of the *Liliaceae*. The *Tulipaceae* (Fr., *tulipacées*) are a family of the *Campanales*, consisting of *T. Fritillaria*, *Imperialis*, etc. The *Tulipæe* (Fr., *tulipées*) are a series of the *Liliaceae*. [a, 35].—**T. gesneriana.** Fr., *tulipe de Gesner*. Ger., *Gartentulpe*. The common tulip; a native of Armenia and Central Russia. The mucilaginous bulb, edible when cooked, is in its fresh state acid, emetic, and aphrodisiac. It contains tulipine. The *σατρίον* of Dioscorides is perhaps identical with this or some other species of *T.* [a, 35].—**T. silvestris.** Wild tulip; found in England and continental Europe. The bulb is emetic. [a, 35.]

**TULIPIFERA** (Lat.), n. f.  $Tu^2l(tul)-i^2p-i^2f-e^2r-a^2$ . From *tulipa* (q. v.) and *ferre*, to bear. The genus *Liriodendron*. [a, 35.]

**TULIPINE**, n.  $Tu^2l-i^2p-en$ . Ger., *Tulipin*. A poisonous alkaloid obtained from the bulb of *Tulipa gesneriana*. It is an energetic sialagogue. [a, 35.]

**TUMBEKI**, n. A sort of tobacco exported from Persia and Turkey, derived from *Nicotiana persica* or *Nicotiana rustica*. Several varieties are described, named from their place of origin (Shiraz t., Teheran t., etc.), and differing in composition. T. contains from 2 to 5 per cent. of nicotine and 5 to 10 per cent. of saccharine matter. ["Phar. Jour.," xvi (1886), p. 683; "Ann. di chim. e di farmacol.," Apr., 1886, p. 20 (B).]

**TUMEFACATION**, n.  $Tu^2m-e^2-fa^2k-shu^2n$ . From *tumefacere*, to cause to swell. Ger., *Anschwellung*. Swelling, puffiness. Cf. **BOUFFESURE**.

**TUMEFIED**, adj.  $Tu^2m-e^2-fid$ . Fr., *tuméfié*. Ger., *wulstig*. In a state of tumefaction.

**TUMENOL**, n.  $Tu^2m-e^2n-o^2l$ . From *bitumen* (q. v.), and *oleum*, oil. A substance obtained from mineral oils, allied to ichthyol; used externally in eczema, burns, pruritus, ulceration, eczema due to pediculi, and rhagades. ["Brit. Med. Jour.," Nov. 25, 1891, Supp., p. 173 (a, 50).]

**TUMESCENCE**, n.  $Tu^2m-e^2s-e^2ns$ . From *tumescere*, to begin to swell. The condition of swelling or of being swollen. [a, 48.]

**TUMEUR** (Fr.), n.  $Tu^2-mu^2r$ . See **TUMOR.**—**T. adipociriforme.** Of Lepêtre, cholesteatoma. [a, 34].—**T. a myéloplaxes.** Of Nélaton, an osteosarcoma. [a, 34].—**T. angiolithique.** See **CHOLESTEATOMA.**—**T. a ostéoblastes.** A tumor resembling an osteoma. [L, 67 (a, 14).]—**T. ascitique.** See **ASCITES.**—**T. blanche.** See **TUMOR albus.**—**T. ciatricielle.** See **KELOID.**—**T. composée.** A t. containing elements of two or more neoplasms, as in a fibrosarcoma. [a, 34].—**T. cornée.** See **CORNUTANEUM.**—**T. cystique de la conjonctive.** See **Conjunctival**

**CYST.**—**T. cystique de l'iris.** See *Cyst of the iris*.—**T. cystoïde.** See *Cystic tumor*.—**T. dentaire.** See *Odontoma*.—**T. des voies lacrymales.** See *Dacryops*.—**T. encéphaloïde.** See *ENCEPHALOID*.—**T. épithélio.** See *EPITHELIOMA*.—**T. érectile lymphatique.** See *Glansion lymphangiectasis*.—**T. fibreuse.** See *FIBROMA*.—**T. fluxionnaire.** A tumor that gives rise to hemorrhage (like a fibrous tumor of the uterus).—**T's folliculeuses.** See *MOLLUSCUM contagiosum*.—**T. gommeuse.** See *SYPHILOMA*.—**T. graisseuse.** See *LIPOMA*.—**T. hémattique.** See *HEMATOMA*.—**T. hémorrhagique circonscrite.** See *Consecutive ANEURYSM*.—**T. hémorrhagique non circonscrite.** Traumatic aneurysm. [D. 139].—**T. liquide.** A cystic tumor.—**T. lymphatique des articulations.** See *HYDRARTHROS*.—**T. myome.** See *MYOMA*.—**T. névrome.** See *NEUROMA*.—**T. ostéome.** See *OSTEOMA*.—**T. papillaire.** See *PAPILLOMA*.—**T. perlée.** See *CHOLESTEATOMA*.—**T. pulpeuse.** **T. spléniforme.** **T. spongieuse.** See *Medullary SARCOMA*.—**T. tubuleuse.** See *SIPHONOMA*.—**T. variqueuse.** See *Cavernous ANGIOMA*.—**T. verruqueuse des cicatrices.** See *Cicatrical KELOID*.

**TUMID**, adj.  $Tu^m$ /l'd. Lat., *tumidus* (from *tumere*, to swell). Ger., *angeschwellen*, *aufgeschwollen*. Inflated, swollen. [a. 35.]

**TUMOR** (Lat.), n. m.  $Tu^m$ (tu'm)/o'r. Gen., *-or'is*. From *tumere*, to swell. Gr., *κύμα, όγκος*. Fr., *tumeur*. Ger., *Geschwulst*, *Afterbildung*. A swelling, especially a new growth, cystic or solid. [D. 3; E. 1.]—**Adenoid t.** See *ADENOMA*.—**Adipose t.** See *LIPOMA*.—**Aneurysmal t.** See *ANEURYSM*.—**Anthracoïd t.** See *Melanotic t.*—**Benign t.** See *Innocent t.*—**Biliary t.** A t. formed by an enlargement of the gall bladder. [a. 34.]—**Blood t.** See *HEMATOMA*.—**Bony t.** See *OSTEOMA*.—**Butyroid t.** A galactocoele with contents of the consistence of butter.—**Cancerous t.** A t. formed by a cancer (q. v., 3d def.).—**Cartilaginous t.** See *CHONDROMA*.—**Cavernous venous t.** See *Cavernous ANGIOMA* and *Nævus vascularis tuberosus*.—**Connective-tissue t.** See *FIBROMA*.—**Cystic t.** A t. consisting of a sac or of sacs containing liquid.—**Dentigerous t.** See *Dentigerous cyst*.—**Dermoid t.** See *Dermoid cyst*.—**Desmoid t.** A firm fibrous t. [E.]—**Embryoplastic t.** See *Encephaloid sarcoma*.—**Erectile t.** Ger., *Afermilz*. A t. composed chiefly of vascular tissue which may become more or less prominent when the vessels are filled with blood. [E.] Cf. *Cavernous ANGIOMA*.—**Fatty t.** See *LIPOMA*.—**Fibrous t.** See *FIBROMA*.—**Fibro-calcareous t.** A fibrous t. that has undergone calcareous degeneration.—**Fibro-cellular t.** [Paget]. A new growth made up of tissue more or less resembling the normal fibro-cellular or connective tissue of the body. The typical form is firm, with a homogeneous surface on section, and bands of delicate filamentous white fibrous tissue intersecting its substance. [E.]—**Fibro-cystic t.** A fibrous t. containing cysts. [E.]—**Fibro-fatty t.** See *FIBRO-LIPOMA*.—**Fibro-muscular t.** See *FIBRO-MYOMA*.—**Fibro-nucleated t.** See *SARCOMA* (2d def.).—**Fibro-plastic t.** Fr., *tumeur fibro-plastique*. 1. Of Lebert, see *MYELOID*. 2. Of French writers, see *SARCOMA*.—**Fibrous t.** See *FIBROMA*.—**Fibro-vascular t.** See *FIBROMA teleangiectaticum*.—**Floating t.** A t. that is movable in some part of the body, e. g., the abdomen. [a. 34.]—**Follicular t.** See *ATHEROMA* (1st def.).—**Fungating t.** A t. composed of exuberant granulations, generally growing from the inner surface of the wall of a cystic t. [E.]—**Gaseous t.** A t. containing gas. ["Rev. de chir.," Feb., 1889, p. 97 (a. 34).]—**Gefäss't** (Ger.). See *ANGIOMA*.—**Glandular t.** See *ADENOMA*.—**Granulation t.** A t. formed by the proliferation of granulation tissue. [a. 24.]—**Gubler's t.** A t. of the back of the carpus sometimes observed in plumbism. [a. 34.]—**Gummatous t.**, **Gummos t.**, **Gummy t.** Syphiloma; so called from either the softish semi-elastic consistence of the tumor or the peculiar character of its contents after the process of softening. [G.]—**Hair t.**, **Hairy t.** A dermoid cyst containing hair. [a. 34.]—**Heteradenic t.** Fr., *tumeur hétéradénique*. Of Robin, a hyaline cylindroma. [L. 57 (a. 14).]—**Homeomorphous t.** Of Broca, a homologous t. [L. 41, 49 (a. 14).]—**Horny t.** See *CORNUE CYANEUM*.—**Hydatoid t.** A cystic t. resembling a hydatid cyst. [a. 34.]—**Idiopathic splenic t.** The enlargement of the spleen observed in pseudoleucocythæmia. [D. 50.]—**Infectious granulation t's.** Ger., *infectiöse Granulationsgeschwülste*. Acute military tubercles. [Déjérine, "Rev. de méd.," Dec., 1884, p. 921 (a. 34).]—**Infiltrating t.** A t. that spreads by infiltration. [a. 34.]—**Innocent t.** A t. which affects the patient solely through its local influence, which has little disposition to soften or ulcerate, and has no tendency to multiplication in other tissues or to involve the absorbents with which it is connected. [E.]—**Irritable t. of the breast** [Cooper]. An affection of the breast, not necessarily a t., characterized by exquisite pain and tenderness of one or more of its lobes. [A. 42.] Cf. *Hysterial breast* and *Irritable breast*.—**Lacten t.** See *GALACTOCELE*.—**Lymphadenoid t.** See *LYMPHADENOMA*.—**Lymph t.** See *LYMPHADENOMA*.—**Malignant t.** See *CANCER* (3d def.) and *SARCOMA*.—**Melanic t.**, **Melanotic t.** See *Melanotic SARCOMA* and *MELANOMA*.—**Meningeal blood-t.** A hematomia of the meninges. [a. 34.]—**Mesoblastic t.** A t. arising from the mesoblast. [a. 34.]—**Milk-like t.** [Monro]. Medullary sarcoma. [A. 42.]—**Molluscous t.** See *MOLLUSCUM contagiosum*.—**Movable t.** See *Floating t.*—**Mucoid t.**, **Mucous tissue t.**, **Mucous t.** See *MYXOMA*.—**Multiple fungoid papillomatous t.** See *MYCOTIS fungoides*.—**Muscular t.** See *MYOMA* (1st def.).—**Myelogenic t.** See *Giant-celled sarcoma*.—**Myeloid t.** See *MYELOID*.—**Myoid t.** See *LEIOMYOMA*.—**Nerve t.**, **Nervous t.** See *NEUROMA*.—**Neurotic t.** A small t., not persistent, developing in the mamma and due to reflex nervous disturbance. ["N. Y. Med. Jour.," Feb. 8, 1890, p. 102 (a. 34).]—**Osscous t.** A t. containing bone, either cancellous or compact. [E.]—**Osteoid t.** See *OSTEOID CHONDROMA*.—**Painful subcutaneous t.** An encysted fibrous or fibro-cellular t. situated in the subcutaneous tissue and giving rise to pain. [E.]—**Papillary t.** See *PAPILLOMA* (2d def.).—**Pearl t.**, **Pearly t.** See *CHOLESTEATOMA*.—**Pearly t. of the iris.** A small cyst of the iris containing a pultaceous, tallowy substance. [a. 34.]

—**Perineal t.** A term sometimes applied to the bulging of the perineum caused by the pressure of the child's head in the expulsive stage of labor. [A. 43.]—**Phantom t.** Fr., *gonflement (ou ballonnement) hystérique de l'abdomen*. Ger., *Phantomschwulst*. An abdominal tumefaction due to flatulence or to circumscribed hysterical contraction of the abdominal muscles. [a. 34.]—**Pilo-cystic t.** A dermoid cyst containing hair. [a. 34.]—**Proliferation t.** A t. which develops by the process of proliferation. [D. 3.]—**Recurrent fibroid t.** [Paget]. See *Spindle-celled sarcoma*.—**Recurrent fibro-vascular t.** A teleangiectatic fibroma that recurs after excision of a primary t. [a. 34.]—**Recurrent t.** A t. approaching in structure the innocent t. but in habit the cancerous t., and tending to recur after removal. [E.]—**Rotated t.** A pediculated t. that has rotated on the pedicle. [a. 34.]—**Scalp-t.** See *CAPUT succedaneum*.—**Sebaceous t.** 1. See *ATHEROMA* (1st def.). 2. Of Toynebee, see *CHOLESTEATOMA*.—**Semi-malignant t.** See *Recurrent t.*—**Sero-cystic t.** [Brodie]. See *Proliferation cyst*.—**Special t's of the penis.** See *SCLEROSIS of the corpora cavernosa*.—**Stercoral t.** A t. formed by impacted feces. [a. 34.]—**Teratoid t.** See *TERATOMA*.—**T. albus.** See *Fungus ARTERITIS*.—**T. aquosa.** A cystic t. [a. 34.]—**T. capitis sanguineus neonatorum.** See *CAPUT succedaneum*.—**T. carneus.** **T. carnosus.** See *SARCOMA* (2d def.).—**T. cavernosus.** See *Cavernous ANGIOMA*.—**T. fibrinosus.** See *FIBROMA*.—**T. flatulentus.** See *EMPHYSEMA*.—**T. fungosus articuli.** See *SPINA ventosa*.—**T. fungosus sanguineus.** See *Cavernous ANGIOMA*.—**T. gallicus.** See *BUBO*.—**T. gummatous.** See *SYPHILOMA*.—**T. lacrimalis.** The swelling over the site of the lacrimal sac in purulent or phlegmonous dacryocystitis. [F.]—**T. lardosus.** See *Fatty t.*—**T. lymphaticus** [Lassus]. See *CEDEMASARCOMA*.—**T. mucosus.** See *MYXOMA*.—**T. prædurus.** See *Syphilitic chancre*.—**T'es sebipari.** See *MOLLUSCUM contagiosum*.—**T. splenis.** A t. or swelling of the spleen. [a. 34.]—**T. splenoides.** See *LIENULUS*.—**T. squamiformis carnosus.** See *LEPIDOSARCOMA*.—**T. villosus.** See *PAPILLOMA*.—**Uterinet.** Ger., *Uterusgeschwulst*. 1. A t. (neoplasm) of the uterus. 2. A tumidity due to enlargement of the uterus.—**Varicose t.** A t. composed of dilated and hypertrophied veins. [E.] See *Cavernous ANGIOMA*.—**Vascular t.** See *ANGIOMA*.—**Vascular t. of the meatus urinarius** (or of the urethral orifice [Clarke]). See *Urethral PAPILLOMA* and *Urethral CARUNCLE*.—**Villous t.** See *PAPILLOMA*.—**Warty t. of the umbilicus.** See *Fungus EXCRESCENCE of the umbilicus*.

**TUMULTUS SERMONIS** (Lat.), n. m.  $Tu^m$ (tu'm)-u'lt(u'lt)/-u's(u's) su'tm(se'm)-on'is. See *PARAPHRASIA præceps*.

**TUNBRIDGE WELLS**, n.  $Tu^n$ 'bri'j. A place in Kent, England, where there are gaseous and chalybeate springs. [L. 30, 37, 49, 57 (a. 14).]

**TUNDA OCULI** (Lat.), n. f.  $Tu^nd$ (tu'nd)/a' o'k(u'lt)(u'lt)-i(e). An old term for the ocular conjunctiva. [F.]

**TUNDUS CORDIS** (Lat.), n. m.  $Tu^nd$ (tu'nd)/u's(u's) ko'rd'is. The apex of the heart. [L.]

**TUNGSTATE**, n.  $Tu^n$ 'stat. Lat., *tungstas*. A salt of tungstic acid.

**TUNGSTEN**, n.  $Tu^n$ 'ste'n. Fr., *tungstène*. Ger., *Wolfram*. 1. A metallic element discovered in 1783. It occurs, usually as a tungstate, in various minerals. It has been obtained in the form of a light-gray lustrous powder, not readily oxidized except at high temperatures. Its sp. gr. is said to be 19.129, although by some it is put as low as 16.5, and by others is stated to be 18.0. In composition it acts apparently as a dyad, tetrad, pentad, and hexad. Symbol *W* (from *wolfram*), sometimes *Tu*; atomic weight, 183.5. 2. Calcium tungstate. [B. 3, 16.]

**TUNGSTIC ACID**, n.  $Tu^n$ 'sti'k. A dibasic acid,  $H_2WO_4$ . The anhydrous acid is a yellow powder insoluble in water and in most acids.—**Colloidal t. a.** A modification of a t. prepared by acidulating a solution of sodium tungstate with hydrochloric acid, and then removing the sodium chloride by dialysis. The t. a. remains in solution and may be obtained by evaporation as a transparent gummy substance. [B. 3.]—**Hydrated t. a.** A white substance,  $H_2WO_4 + H_2O$ , soluble in water. [B.]—**Liquid t. a.**, **Soluble t. a.** T. a. obtained in a soluble form by dialysis. [B. 6.]

**TUNIC**, n.  $Tu^n$ 'i'k. Gr., *χιτών*. Lat., *tunica*. Fr., *tunique*. Ger., *Haut*, *Hülle*. A coat, an investing membrane; in botany, a skin or covering membrane, such as the testa of a seed, or a thick or thin separable layer (Ger., *Schale*), such as one of the coats of an onion. [a. 35.]—**Chorioid t.** The chorioid membrane. [L.]—**External elastic t.** See *External elastic coat*.—**Inner muscular t. of the epididymis.** Of Kölliker, a layer of muscular tissue at the back of the testis and epididymis, beneath the fascia propria and opposite the lower two thirds of the testis. [C.]—**Internal elastic t.** See *Internal elastic coat*.—**Vaginal t.** See *Tunica vaginalis*.

**TUNICA** (Lat.), n. f.  $Tu^n$ (tu'n)/i'k-a'. 1. See *TUNIC*. 2. A section of the genus *Dianthus*. [a. 35.] 3. Of Jussieu, the perigynium of the *Caricæ*. [B. 121.]—**Acetum tunice.** A preparation made by macerating clove-pink petals with 6 or 12 times as much alcohol for twelve days, and filtering. [B. 119 (a. 34).]—**Conserva florum tunice.** Fr., *conservé d'aillé*. A preparation made by triturating clove-pink petals with twice as much sugar. [B. 119 (a. 38).]—**Syrupus tunice (florum).** A preparation made by infusing clove-pink petals in twice as much boiling water for twelve hours, straining, and dissolving in the product twice its weight of sugar. [B. 119 (a. 38).]—**T. abdominalls.** Fr., *tablier élastique*. A deep layer of the abdominal fascia in animals, analogous to the transversalis fascia in man. It consists of yellow elastic tissue, and contributes to the support of the viscera. [C.]—**T. acinalls.**, **T. aciniformis.**, **T. acinosa.** See *UVEA*.—**T. adiposa (renum).** See *CAPSULA adiposa*.—**T. adnata oculi.** 1. An old term for the ocular conjunctiva. [F.] 2. See *T. albuginea oculi* (2d def.).—**T. adnata testis.** See *T. vaginalis testis*.—**T.**

**adventitia.** Ger., *äussere Gefäßhaut* (1st def.), *äussere Eihaut* (2d def.). 1. See **ADVENTITIA** (1st def.). 2. See **Vitelline MEMBRANE** (2d def.).—**T. agnina.** See **AMNION**.—**T. alba.** An old term for the sclerotic. [F.]—**T. albuginea.** See **ALBUGINEA**, **ALBUGINEA testis**, and **Tenon's CAPSULE**.—**T. albuginea corporis cavernosi.** See **ALBUGINEA penis**.—**T. albuginea epididymidis.** See **ALBUGINEA epididymidis**.—**T. albuginea oculi.** 1. See **SCLEROTICA**. 2. The tendons of the recti of the eye and the connective tissue uniting them. [L. 31.]—**T. arachnoidea.** See **ARACHNOID**.—**T. arachnoidea oculi.** See **ARACHNOID of the eye**.—**T. aranea.** See **ARACHNOID**.—**T. arteriae elastica externa.** See **External elastic coat**.—**T. arteriae externa.** The adventitia of an artery. [L.]—**T. arteriae fenestrata.** See **Internal elastic coat**.—**T. arteriae intima.** The intima of an artery. [L.]—**T. arteriae media.** The middle coat of an artery. [L.]—**T. candida.** An old term for the sclerotic. [F.]—**T. carnea.** See **CREMASTER** and **DARTOS**.—**T. cellularis.** See **ADVENTITIA** (1st def.).—**T. cellulosa.** See **SUBMUCOSA**.—**T. cellulosa of the ovum.** Fr., *couche celluleuse*. See **T. granulosa** (1st def.).—**T. cellulosa Ruyschii.** See **Membrana ruyschiana**.—**T. cerebri pia mater** (seu propria, seu vasculosa). See **Pia**.—**T. choriocapillaris.** See **Membrana ruyschiana**.—**T. chorioidea.** See **CHORIOID**.—**T. conjunctiva.** See **CONJUNCTIVA**.—**T. cornea opaca.** See **SCLEROTICA**.—**T. cornea pellucida.** See **CORNEA**.—**T. dartos.** See **DARTOS**.—**T. demoursiana.** See **Membrane of Descemet**.—**T. dura.** See **SCLEROTICA**.—**T. erythroidea.** See **CREMASTER**.—**T. exterior ovi.** Of Haller, the decidua vera. A membrane insheathing a part. 2. A serous membrane, an offshoot of the peritoneum, which is forced into the scrotum by the descent of the testicle. It lines on each side one half of the inner surface of the scrotum (except posteriorly, where it is reflected on to the epididymis and testicle, which it covers except along the line of reflection), and incloses a varying extent of the spermatic cord. [L.]—**T. vaginalis bulbi.** See **Tenon's CAPSULE**.—**T. vaginalis communis (testis et funiculi spermatici).** See **Infundibuliform fascia** and **T. vaginalis** (2d def.).—**T. vaginalis oculi.** See **Tenon's CAPSULE**.—**T. vaginalis propria (testis).** See **T. vaginalis testis**.—**T. vaginalis reflexa.** The portion of the t. vaginalis that lines the scrotum. [L.]—**T. vaginalis testis** (seu visceralis). The portion of the t. vaginalis which invests the epididymis and the testicle. [L.]—**T. vasculosa chorioidea.** See **UVEA**.—**T. vasculosa Halleri.** The chorioid. [a. 34.]—**T. vasculosa lentis.** A very vascular envelope, made up of the various vascular projections of the embryonic cephalic plate, completely surrounding the crystalline lens in the embryo. [F.]—**T. vasculosa oculi.** See **CHORIOID**.—**T. vasculosa testis.** A vascular network lining the albuginea testis. [L. 142.]—**T. vasorum interna.** See **INTIMA**.—**T. villosa.** The villous surface of the intestines. [a. 34.]—**T. vitrea.** See **Hyaloid MEMBRANE**.

**TUNICATE**, adj.  $Tu^{2n}/i^{2k}$ -at. Lat., *tunicatus* (from *tunica* [q. v.]). Fr., *tuniqué*, *tuniquéux*. Ger., *schalig*. Provided with coats (tunics). [a. 35.] The *Tunicata*, or tunicaries, are a class of the *Mollusca*, or a degenerate branch of the *Chordata*, which

more nearly than any other invertebrates approach the vertebrates. They consist of a double-layered sac inclosing an alimentary canal, with distinct oral and anal apertures at their free extremities, are marine, exist singly or in groups, possess a simple tubular heart open at each end, and are, as a rule, hermaphroditic. [L. 121, 147.]

**TUNICIN**, n.  $Tu^{2n}/i^{2s}$ -i<sup>2n</sup>. Fr., *tunicine*. A substance,  $(C_6H_{10}O_5)_n$ , obtained from the mantles of ascidians, regarded by some as identical with vegetable cellulose, by others as identical with animal cellulose, and by Berthelot as a distinct body, convertible into sugar. [B. 3, 93, 270 (a, 14, 38).]

**TUNICULA** (Lat.), n. f.  $Tu^{2n}(tu^{2n})-i^{2k}u^{2l}(u^{2l})-a^3$ . Dim. of *tunica* (q. v.). See **CLITORIS**.

**TUNIQUE** (Fr.), n.  $Tu^6$ -nek. See **TUNIC**.—**T. adventice.** See **ADVENTITIA**.—**T. commune de Bichat.** See **ENDOTHELIUM**.—**T. érythroïde.** See **CREMASTER** and **DARTOS**.—**T. pourpre.** **T. séminale.** See **SPERMATODERM**.

**TUNNEL**, n.  $Tu^{2n}/e^{2l}$ . The space between the rods of Corti and the membrana basilaris. [L.]—**T. of Corti.** See **T**.

**TUPELO**, n.  $Tu^{2n}/e^{2l}$ -o. Fr., *tupélo*. See **NYSSA**.—**Large t.** **Swamp t.** See **NYSSA tomentosa**.

**TÜPFEL** (Ger.), n.  $Tu^{2n}/p^{2l}$ -e<sup>2l</sup>. See **PUNCTUM**.

**TUPPELFARN** (Ger.), n.  $Tu^{2n}/p^{2l}$ -fa<sup>2n</sup>. See **POLYPODIUM**.

**TUPI-PYA**, n. In Brazil, a form of insanity common among the Indians, characterized by sudden accesses of furious and destructive mania, following short stages of depression. [L. 57 (a, 14).]

**TÜR**, n. A place in Unterweissenburg, Transylvania, where there is a sulphurous spring. [L. 80, 49 (a, 14).]

**TURA**, n. A place in Neutra, Hungary, where there is an alkaline and chalybeate spring. [L. 63.]

**TURACIN**, n.  $Tu^{2n}/a^{2s}$ -i<sup>2n</sup>. Fr., *turacine*. A red pigment obtained from the wing-feathers of the turaco. It contains 5.9 per cent. of copper. [B. 38, 93 (a, 14).]

**TURBINAL**, adj.  $Tu^{2n}/b^{1/2}$ -n<sup>l</sup>. From *turbo*, a top. See **TURBINE**; as a n., see **Turbinal bone**.—**Externe rückläufige T'-bewegung.** See **MOVEMENT of restitution**.—**Interne rückläufige T'-bewegung.** The rotation of the shoulders that follows the expulsion of the head in labor; being that movement of the shoulders which coincides with the movement of restitution of the head. [A. 91.]—**T'-bewegung** (Ger.), **T'drehung** (Ger.). A movement of rotation (as of the fetus in its passage through the pelvis).

**TURBINE**, **TURBINATED**, adj's.  $Tu^{2n}/b^{1/2}$ -n<sup>l</sup>-at, -at-e<sup>2d</sup>. Lat., *turbinatus* (from *turbo*, a spinning-top). Fr., *turbiné*. Top-shaped; scroll-like. [a. 35.]

**TURBITH** (Fr.), n.  $Tu^{2n}$ -bet. See **TURPETH**.—**Poudre de t. végétal** [Fr. Cod.]. A preparation made by drying the crushed root of *Ipomoea turpethum* at 40° C., powdering in a covered mortar, and sifting through a No. 120 silk sieve. [B. 95 (a, 38).]—**Résine-t.** Turpeth. [a. 35.]—**T. blanc.** **T. bleu.** See **GLOBULARIA allypum**.—**T. minéral.** See **MERCURY sub sulphate**.—**T. nitreux.** See **BIBASIC MERCURY nitrate**.—**T. noir.** 1. The *Euphorbia palustris*. [a. 35.] 2. See **MERCURY** and **ammonium nitrate**.—**T. végétal.** See **IPOMOEA turpethum**.

**TURBO** (Lat.), n. m.  $Tu^{2n}/b^{1/2}$ -o. Gen., *turb/inis*. From *turbare*, to disturb. Gr., *στροβίλος*. 1. A spinning-top; any top-shaped or scroll-like formation. [a. 48.] 2. A genus of molluscs. The opercula of several species of the *T. cochlea*, *T. rugosus*, etc.) were once used as an aphrodisiac under the names *faba marina*, *umbilicus marinus* (seu *Veneris*), *bellidulus* (seu *bellericus*) *marinus*, *acetabulum marinum*, and *carcha venera*. [a. 35.]—**T. cerebri.** The pineal gland. [L. 50 (a, 34).]—**Turbines nasi.** The inferior, middle, and superior turbinated bones. [L.]

**TURFOL**, n.  $Tu^{2n}/f^{2l}$ -o<sup>2l</sup>. Of Vohl, peat-oil (see **BRUNNENKOHLENöl**). [B. 93 (a, 14).]

**TURGESENCE**, n.  $Tu^{2n}/rj-e^{2s}$ -e<sup>2n</sup>s. From *turgescere*, to begin to swell. Fr., *t. Ger.*, *Turgescenz, Vollaftigkeit*. The act or process of swelling or enlargement (said especially of very vascular tissues); in botany, the distention of cells with sap. [D. 20; a. 35.]

**TURGID**, adj.  $Tu^{2n}/rj^{2d}$ . Lat., *turgidus* (from *turgere*, to swell). Fr., *turgide*. Ger., *aufgeschwollen*. Swollen, congested, bloated. [D.]

**TURGOR** (Lat.), n. m.  $Tu^{2n}/g^{2n}(tu^{2n})-o^{2n}$ . Gen., -o<sup>2n</sup>-ris. From *turgere*, to swell. Congestion, turgescence. [D. 3.]—**T. vitalis.** That vital property without which the body becomes limp like a corpse.

**TURION**, n.  $Tu^{2n}(tu^{2n})/i^{2o}$ -n<sup>l</sup>. Lat., *turio*. Fr., *t. turiobulbe*. Ger., *Schoss, Schössling, Stocknospe*. 1. A subterranean budding shoot. 2. Of the Fr. Cod., young asparagus shoots. [B. a. 35.]

**TURMERIC**, n.  $Tu^{2n}/m^{2n}$ -i<sup>2k</sup>. 1. The genus *Curcuma*, especially *Curcuma longa* (q. v.) and its rhizome (see **RADIX curcuma**). *Curcuma*-root contains curcumin, a brown pigment, an odorless, very acrid, dark-yellow, volatile oil (t.-oil), and, according to some, an alkaloid forming crystallizable salts. T. is chiefly used in pharmacy as a coloring agent. 2. The *Hydrastis canadensis* and *Sanguinaria canadensis*, also their roots. [a. 35.]—**African t.** The rhizome of *Canna speciosa*. [a. 34.]—**Bengal t.** A variety of t. preferred in dyeing for its deep tint. [a. 35.]—**China t.**, **Chinese t.** The most esteemed variety of t., but rarely met with in European or American commerce. [a. 35.]—**Cochin t.** A short, conical rhizome obtained from an undetermined species of *Curcuma*, grown chiefly at Alwaye. It occurs in slices or segments, and is used in making arrowroot. [a. 35.]—**Indian t.** The *Hydrastis canadensis* or its root. [a. 35.]—**Javat t.** The rhizome of a variety (minor) of *Curcuma longa*. It occurs in pieces dusted with its own powder, and is not highly esteemed. [a. 35.]—**Madras t.** A superior variety of t., occurring in large pieces. [a. 35.]—**T.**

**oil.** Fr., *huile (ou essence) de curcuma*. Ger., *Curcumaöl*. 1. A volatile oil obtained by distilling t. with water. 2. A dark viscid oil, obtained by treating t. with cold ligroin. [B. 81, 270 (a, 14).]—**T. paper.** Lat., *charta curcumae*. Fr., *papier de curcuma*. Filter paper impregnated with that portion of the coloring matter of t. which is insoluble in water but soluble in alcohol; used as a test for alkalies in solution, which change its tint to brown. ["Proc. of the Am. Pharm. Assoc.," xxii, p. 50 (a, 50); a, 17.] Cf. *Litmus paper*.—**Wild t.** See *Curcuma aromatica*.

**TURMEROL**, n.  $\text{Tu}^{\text{r}}\text{m}^{\text{e}}\text{r}^{\text{a}}\text{o}$ . A constituent of turmeric oil: an alcohol,  $\text{C}_{19}\text{H}_{38}\text{O}$  (or, according to some,  $\text{C}_{19}\text{H}_{40}\text{O}$ ), boiling at  $250^{\circ}\text{C}$ . It differs from carvol in not combining with hydrogen sulphide. [B. 81 (a, 14); a, 35.]

**TURNERA** (Lat.), n. f.  $\text{Tu}^{\text{r}}\text{n}^{\text{e}}\text{r}^{\text{a}}\text{a}$ . From Turner, an English physician. Fr., *turnère*. A genus of herbs or undershrubs of the *Turneraceae*, which are an order of the *Passiflorales*, considered by Baillon a series (*Turnereae*) of the *Bixaceae*. [a, 35].—**T. aphrodisiaca**. A Mexican species. The leaves are now considered the genuine damiana. [a, 35].—**T. apifera**. Fr., *turnère excellent*. A Brazilian undershrub. The leaves are astringent and tonic. [a, 35].—**T. microphylla**. A Mexican species considered by some the source of damiana. [a, 35].—**T. ulmifolia**. Holly- (or sage-) rose of the West Indies. The leaves are tonic and expectorant. [a, 35.]

**TURNING**, n.  $\text{Tu}^{\text{r}}\text{n}^{\text{e}}\text{r}^{\text{a}}$ . See **VERSION** (1st def.).—**Head t.** See **Cephalic version**.

**TURNIP**, n.  $\text{Tu}^{\text{r}}\text{n}^{\text{e}}\text{p}$ . The *Brassica rapa*. [a, 35].—**Indian t.** See *ARISEMA atrorubens*.—**Swedish t.** See under *BRASSICA campestris*.—**Wild t.** The *Arum triphyllum* and the *Asarum canadense*. ["Jour. of Am. Med. Assoc.," Oct. 24, 1891, p. 616 (a, 47).]

**TURNKEY**, n.  $\text{Tu}^{\text{r}}\text{n}^{\text{e}}\text{k}$ . See **TOOTH KEY**.

**TURN OF LIFE**, n.  $\text{Tu}^{\text{r}}\text{n}^{\text{e}}\text{o}$  v. lif. See **MENOPAUSE**.

**URNS**, n. pl.  $\text{Tu}^{\text{r}}\text{uz}$ . The menses.

**URNSICK**, n.  $\text{Tu}^{\text{r}}\text{n}^{\text{e}}\text{sk}$ . See **GID**.

**TURNSOLE**, n.  $\text{Tu}^{\text{r}}\text{n}^{\text{e}}\text{sol}$ . Fr., *turnesol*. Ger., *Turnesol*. 1. Litmus, especially ribbon litmus. 2. An old name for *Euphorbia helioscopia*. 3. The genus *Heliotropium*. [a, 35.]

**TURPENAY** (Fr.), n.  $\text{Tu}^{\text{r}}\text{p}^{\text{e}}\text{n}$ . A place in the department of the Indre-et-Loire, France, where there is a gaseous and chalybeate spring. [L, 49 (a, 14).]

**TURPENTINE**, n.  $\text{Tu}^{\text{r}}\text{p}^{\text{e}}\text{nt}$  in. Gr., *πύριον, ῥεπουβήριον*. Lat., *terebinthina*. Fr., *terébenthine* [Fr. Cod.]. Ger., *Terpentin, Terpentin*. An oleoresin, consisting of a mixture of rosin (colophony) and an essential oil (see *Oil of t.*), obtained from various species of pine, larch, and fir. [a, 35.] Cf. **TEREBINTHINA**.—**American t.** Lat., *terebinthina* [U. S. Ph.], *thus americanum* [Br. Ph.]. Fr., *terébenthine de Boston*. White t.; a honey-like fluid of agreeable odor and bitterish taste, obtained from *Pinus australis* (palustris) and *Pinus taeda*. In its fresh state it yields 17 per cent. of volatile oil. When exposed to the air or to a low temperature it hardens. [a, 35].—**Balsam of t.** See **TEREBINTHINA** (1st def.).—**Bordeaux t.** Lat., *terebinthina* [Ger. Ph.], *terebinthina vulgaris* [Lond. Ph.] (see *communis*). Fr., *terébenthine de Bordeaux* (ou *commune*) [Fr. Cod.]. Ger., *gemeiner Terpentin*. Common European t.; obtained from several species of *Pinus*, especially *Pinus maritima*. In its fresh state it is whitish, turbid, and thick, but separates, on standing, into two portions, one transparent and liquid, the other viscid and honey-like. The commercial article often consists entirely of the latter part. It yields large quantities of resin and oil of t. [a, 35].—**Canada t., Canadian t.** Lat., *terebinthina canadensis* [U. S. Ph., Br. Ph.]. Fr., *terébenthine (ou baume) de Canada* [Fr. Cod.]. Ger., *Canada-Balsam, canadischer Terpentin*. Canada balsam, balsam of fir; a yellowish or greenish, viscid, transparent liquid, of bitterish, somewhat acrid taste and terebinthinate odor, obtained from the vesicles which form on the trunk and branches of *Abies balsamea*. According to Flückiger, it contains 24 per cent. of essential oil, with a very small quantity of an oxygenated oil, 60 per cent. of resin soluble in boiling alcohol, and 16 per cent. of resin soluble only in ether. On evaporation of the oil, the resins are left as a transparent elastic mass. [a, 35].—**Chian t., Chio t., Cyprus t.** Fr., *terébenthine de Chio* [Fr. Cod.], *baume de Chio* (ou de *Cypre*). Ger., *cypriischer Terpentin*. T. obtained from *Pistacia terebinthus*; a thick, tenacious liquid of a greenish-yellow color or a soft solid of a dull-brown hue, with little taste, and of a peculiar pleasant, mildly terebinthineous odor. It consists of resin (probably the resin of mastic) and an essential oil which contains a little oxygenated oil. In Greece, Chian t. is used as an agreeable addition to wines and cordials. It has been recommended in the form of emulsion and as a local application in cancer of the uterus. [a, 35].—**Dombeya t.** A thick whitish, glutinous fluid of a strong smell and taste, derived from *Arquaria imbricata*. [a, 35].—**European t.** See **Bordeaux t.**—**Hungarian t.** Lat., *balsamum hungaricum* (see *carpathicum*, see *carpathicum nativum*), *oleum carpathicum*. Ger., *Krummholzbalzom, ungarischer (oder karpathischer) Balsam*. Carpathian or Hungarian, or Riga balsam; a thin, white fluid with a juniper-like smell that exudes from the young twigs of *Pinus cembra* and *Pinus pumilio*. It has the properties of ordinary t. [a, 35].—**Larch t.** Lat., *terebinthina* [Belg. Ph., Netherl. Ph.] (*laricina*). A thick, turbid, pale-yellowish fluid of bitter, aromatic taste, obtained from *Larix europaea*. It has the properties of ordinary t., but a less powerful odor. It is much used by the veterinarians. [a, 35].—**Liniment of t. and acetic acid.** See **LINIMENTUM TEREBINTHINÆ ACETICUM**.—**Oil of t.** Lat., *oleum terebinthinæ* [U. S. Ph., Br. Ph., Ger. Ph.]. Fr., *essence de terébenthine* [Fr. Cod.]. Ger., *Terpentinöl*. Spirit (or spirits) of t.; a volatile colorless liquid,  $\text{C}_{10}\text{H}_{16}$ , of penetrating smell, pungent, bitterish taste, and neutral or faintly acid reaction, obtained by distillation from t. It varies in physical properties according to

its source. Its boiling point ranges from  $152^{\circ}$  to  $172^{\circ}\text{C}$ ., and its sp. gr. from 0.856 to 0.870. American oil of t. is dextrogyrous, while that from Bordeaux t. is laevogyrous. It is soluble in alcohol, especially in boiling alcohol, and in ether, benzol, other essential oils, and the fixed oils, and dissolves resins and caoutchouc. It is used as a stimulant, diuretic, antelmintic, cathartic, rubefacient, germicide, and antiseptic. [a, 35].—**Ointment of t.** See *Unguentum TEREBINTHINÆ*.—**Rectified oil of t.** Lat., *etheroleum terebinthinæ* [Dan. Ph.] (*depuratum* [Swed. Ph.] *vel rectificatum* [Norw. Ph.]), *essentia terebinthinæ rectificata* [Belg. Ph.], *oleum terebinthinæ depuratum* [Netherl. Ph.] (see *rectificatum* [Br. Ph., Ger. Ph., Austr. Ph., Hung. Ph., Finn. Ph., Russ. Ph., Swiss Ph., Gr. Ph.]). Sp., *esencia de trementina* [Sp. Ph.]. Oil of t. rectified by shaking up with water (lime-water [Ger. Ph., Finn. Ph.]), and distilling from about two thirds to three quarters. [B. 95 (a, 38).]—**Russian t.** T. obtained from *Pinus silvestris*. "Sanitas" is produced by passing air through its essential oil in contact with warm water. [a, 35].—**Scio t.** See **Chian t.**—**Spirit (or spirits) of t.** See **Oil of t.**—**Strassburg t.** Lat., *terebinthina abietina* (see *argenteoatensis*). Fr., *terébenthine d'Alsace* (ou *au citron* [Fr. Cod.]). A t. obtained from the vesicles of the bark of *Pinus picea*, closely resembling Canadian balsam, but of a more agreeable odor and without acrid or bitter taste. It has the properties of common t. [a, 35].—**T. clyster.** See *ENEMA TEREBINTHINÆ*.—**T. hydrochlorate.** See **ARTIFICIAL CAMPHOR**.—**T. plant.** See **SILPHIUM laciniatum**.—**T. vapor bath.** Ger., *Terpentin dampfbad*. A bath made by exposing the body to the vapor arising from the distillation of t.; used in rheumatic and pulmonary complaints. [B. 270.]—**Venetian t., Venice t.** See **Larch t.**—**White t.** See **American t.**

**TURPETH**, n.  $\text{Tu}^{\text{r}}\text{p}^{\text{e}}\text{th}$ . Lat., *turpethum*. Fr., *turbith*. Ger., *Turbith*. The *Ipomaea turpethum*, its root (t. root, white t., vegetable t.), or the resin (resin of t.) obtained from the root. T. root contains turpethin, a volatile oil, a yellow pigment, a fatty substance, iron oxide, etc. It acts like jalap, but is less powerful. [a, 35].—**T. mineral.** Mercury sub sulphate, so called from the resemblance of its color to that of the root of *Ipomaea turpethum*. [B. 5.]—**T.-root.** Lat., *radix turpethi* [Belg. Ph.] (*veri*). Fr., *turbith végétal (racine)* [Fr. Cod.]. Ger., *Turpithwurzel*. See under **T.**

**TURPETHIC ACID**, n.  $\text{Tu}^{\text{r}}\text{p}^{\text{e}}\text{th}^{\text{i}}\text{c}$ . Fr., *acide turpéthique*. An amorphous acid,  $\text{C}_{22}\text{H}_{40}\text{O}_{18}$ , obtained by dissolving turpethin in hot baryta water. [B. 92, 93 (a, 14).]

**TURPETHIN**, n.  $\text{Tu}^{\text{r}}\text{p}^{\text{e}}\text{th}^{\text{i}}$ . Fr., *turpéthine*. An amorphous glucoside,  $\text{C}_{22}\text{H}_{40}\text{O}_{18}$ , isomeric with jalapin, obtained from turpeth resin. [B. 92, 93, 270 (a, 14, 38).]

**TURPETHOLIC ACID**, n.  $\text{Tu}^{\text{r}}\text{p}^{\text{e}}\text{th}^{\text{o}}\text{lic}$ . A monobasic microcrystalline acid,  $\text{C}_{18}\text{H}_{32}\text{O}_4$ , obtained from turpethin. [B. 92, 93 (a, 14).]

**TURPETHUM** (Lat.), n. n.  $\text{Tu}^{\text{r}}\text{p}^{\text{e}}(\text{tu}^{\text{r}}\text{p})\text{-eth(ath)}^{\text{u}}\text{m}(\text{u}^{\text{a}}\text{m})$ . See **TURPETH**.—**Extractum turpethi** [Würt. Ph.]. A preparation made by digesting 1 part of turpeth-root in 6 parts of alcohol and expressing, macerating and boiling the residue with 3 parts of water, clarifying with white of egg, mixing the decoction and tincture, distilling off the alcohol, and evaporating the residue to the proper consistence. [B. 97 (a, 14).]—**Radix turpethi** [Belg. Ph.] (*veri*). See **TURPETH**.—**T. minerale.** See **MERCURY sub sulphate**.—**T. nigrum.** See **MERCURY and ammonium nitrate**.—**T. nitratum.** See **BASIC MERCURY nitrate**.

**TURPS**, n.  $\text{Tu}^{\text{r}}\text{ps}$ . See **Oil of TURPENTINE**.

**TURRITIS** (Lat.), n. f.  $\text{Tu}^{\text{r}}(\text{tu}^{\text{r}})\text{-ri(re)}^{\text{t}}\text{is}$ . Gen., *-it'idis* (*-idis*). Fr., *turrite*. The genus *Arabis*. [a, 35.]

**TURTLE-OIL**, n.  $\text{Tu}^{\text{r}}\text{t}^{\text{e}}\text{l-oil}$ . An oil prepared in South America from the eggs and in the Seychelles from the fat of various turtles; said to equal cod-liver oil as a nutrient. [a, 35.]

**TURUNDA** (Lat.), **TURUNDULA** (Lat.), n's f.  $\text{Tu}^{\text{r}}(\text{tu}^{\text{r}})\text{-u}^{\text{nd}}(\text{u}^{\text{nd}})^{\text{a}}$ ,  $\text{-u}^{\text{nd}}(\text{u}^{\text{nd}})^{\text{a}}$ . See **TENT**.

**TUSCAN SPRINGS**, n.  $\text{Tu}^{\text{s}}\text{k'n}$ . A place in Tehama County, California, where there are mineral springs some of which are called also Lick Springs. [Anderson (a, 14).]

**TUSCARORA ACID (SOUR) SPRINGS**, n.  $\text{Tu}^{\text{s}}\text{sk-a}^{\text{r}}\text{-or}^{\text{a}}$ . Cold, astringent mineral springs, situated in Canada, containing a large proportion of alumina and free sulphuric acid and having a styptic taste. [A, 363 (a, 21).]

**TUSNAD**, n.  $\text{Tu}^{\text{s}}\text{na}^{\text{d}}$ . A place in Csik, Transylvania, where there are gaseous, saline, and chalybeate springs. [L, 30, 57 (a, 14).]

**TUSSAL**, adj.  $\text{Tu}^{\text{s}}\text{s'l}$ . Pertaining to or due to a cough or coughing. [a, 48.]

**TUSSICATION**, n.  $\text{Tu}^{\text{s}}\text{-i}^{\text{k}}\text{-u}^{\text{l}}\text{-a}^{\text{shu}}\text{a}$ . From *tussis* (q. v.). See **Hacking cough**.

**TUSSILAGE** (Fr.), n.  $\text{Tu}^{\text{s}}\text{-el-a}^{\text{zh}}$ . See **TUSSILAGO**; of the Fr. Cod., see **TUSSILAGO farfara**.—**Sirop de t.** Sp., *jirabe de tusilago*. A preparation made by infusing 10 parts of dried t. flowers in 150 of boiling water, expressing, adding 9 parts of sugar for each 5 of clarified colature, boiling up quickly, and straining [Fr. Cod.], or by infusing 30 parts of t. leaves in water enough to make 345, clarifying, and adding 620 of sugar [Sp. Ph.]. [B. 95 (a, 38).]—**Tisane de t.** [Fr. Cod.]. A preparation made by infusing 5 parts of the flowers of *Tussilago farfara* in 1,000 of boiling water for half an hour, and filtering. [B. 95 (a, 38).]—**T. (emulsiue)** [Fr. Cod.]. The dried flowers of *Tussilago farfara*. [B. 95 (a, 38).]

**TUSSILAGO** (Lat.), n. f.  $\text{Tu}^{\text{s}}(\text{tu}^{\text{s}})\text{-si}^{\text{d}}\text{-ag(a)}^{\text{g}}\text{o}$ . Gen., *-ag'inis*. From *tussis*, a cough. Fr., *tussilage*. Ger., *Huffaltig*. 1. A genus of the *Compositae*. The *Tussilagines* (Fr., *tussilagines*) are a tribe of the *Synanthérées* (*Compositae*). 2. The *T. farfara*. [a, 35].—**T. farfara**. Fr., *tussilage (farfara)*, *chou de signe, herbe Saint-Quirin, pas d'âne, pied de poulin, racine de peste, larmet*. Ger., *gemeiner Huffaltig, Brustaltig, Fiddaltig, Eselhauf, Quirnkraut*. Colt's-foot, cough-wort, dove-dock, fool-foot, horse-hoofs, clay-weed, cleats, bull's-foot, the *βίχtor* of Dioscori-

des; an herb indigenous to the temperate regions of the northern hemisphere. It is bitter, astringent, and demulcent, and is used as a pectoral. The leaves, which are the most active, were smoked by the ancients in pulmonary affections, and are still so used in asthma; they have also been recommended for scrofula. [a, 35.] —*T. petasites*. See *PETASITES vulgaris*. —*T. vulgaris*. See *T. farfara*.

**TUSSIS** (Lat.), n. f.  $Tu^s(tu^s)/si^s$ . See *COUGH*. —*T. arthritica*. Of Sauvages, a cough associated with and due to gout. [a, 34.] —*T. calcuosa*. Of Schenck, a cough caused by pulmonary calculi. [Sauvages (a, 34).] —*T. catarrhalis*. Of Sauvages, a cough associated with laryngeal or bronchial catarrh. [a, 34.] —*T. clangosa*, *T. convulsiva*. See *PERTUSSIS*. —*T. convulsiva hepatica*. Of Sauvages, a cough consequent upon hepatic disorder. [a, 34.] —*T. ferina*. Of F. Hoffmann, pertussis. [Sauvages (a, 34).] —*T. gravidarum*. Of Sauvages, a reflex cough due to pregnancy. [a, 34.] —*T. gutturalis*. Of Sauvages, a cough dependent upon chronic follicular pharyngitis or amygdalitis. [a, 34.] —*T. hysterica*. T. of hysterical origin. [a, 34.] —*T. metallicularum*. Of Sauvages, a cough affecting workers in metals. [a, 34.] —*T. rheumatica*. Of Sauvages, a cough associated with pulmonary inflammation and pain. [a, 34.] —*T. sicca*. A cough without expectoration. [a, 34.] —*T. spasmodica*. See *PERTUSSIS*. —*T. stomachalis humida*. Of Sauvages, a moist cough following eating and due to gastric derangement. [a, 34.] —*T. stomachalis sicca*. Of Sauvages, a dry cough following eating and due to gastric derangement. [a, 34.] —*T. strangulans*, *T. suffocativa*. See *PERTUSSIS*. —*T. verminosa*. Of Sauvages, a reflex cough caused by larvae in the bronchi. [a, 34.] —*T. xerolaryngosa*. Of Sauvages, a cough caused by dryness of the larynx. [a, 34.]

**TUSSIVE**, adj.  $Tu^s(tu^s)/iv$ . Lat., *tussivus* (from *tussis*, a cough). Pertaining to coughing. [J.]

**TUTAMEN** (Lat.), n. n.  $Tu^t(tu^t)-am(a^m)/e^n$ . From *tueri*, to protect. A protective structure. [a, 48.] —*Tutamina cerebri*. The skull and the meninges of the brain.

**TUTE** (Ger.), n.  $Tu^t/e^2$ . A convoluted structure. [a, 34.] See *OCREA* (1st def.). —*T'n des Keilbeines*. The sphenoidal turbinated bone. [a, 34.] —*T'n förmig*. See *CONVOLUTE*.

**TUTENAG**, n.  $Tu^t/e^2n-a^2g$ . An old name for zinc, especially for that brought to Europe from India and China. [a, 48.]

**TUTIA** (Lat.), n. f.  $Tu^t(tu^t)/shi^2(t)^2-a^2$ . Fr., *tuthie*. Sp., *tucia*. Tutty; an impure zinc oxide gathered from the flues of furnaces used for working lead and zinc ores. Finely powdered or washed, it is used as a desiccant in excoctions. [B, 5, 10; B, 95 (a, 38).]

**TUTY**, n.  $Tu^t/t^2$ . See *TUTIA*.

**TUTU**, n. See *CORIARIA ruscifolia*.

**TVAROSZCZA**, n. A place in Saros, Hungary, where there are saline and chalybeate springs. [L, 63.]

**TVER**, n. A place in the government of T., Russia, where there is an alkaline spring. [L, 30, 49 (a, 14).]

**TWAYBLADE**, n. *Twa'blad*. The *Listera ovata*, *Listera illiifolia*, and other species of *Listera* and *Liparis*.

**TWEENBRAIN**, n. *Twen'bran*. See *MESECEPHALON*.

**TWIN**, adj.  $Twi^n$ . Gr., *δίδυμος*. Lat., *geminus*, *didymus*. Fr., *jumeau*. Ger., *Zwilling* (n.), *Zwillingsfrucht* (n.). Double, paired, geminate; as a n., one of two children that are the product of one gestation. [a, 48.] —*Allantoido-angelopagus t's*. T's of the same sex inclosed within a single chorion, one of them showing more or less grave developmental defects, and communicating with the other by means of the vessels of the umbilical cord in the neighborhood of the placenta. [Edinburgh Med. and Surg. Jour., March, 1893, p. 836 (a, 34).] —*Conjoined t's*. A double monster. [a, 34.] —*Homologous t's*. Of Alhfeld, t's of the same sex inclosed within one chorion and drawing their nourishment from a single placenta. [a, 34.] —*Interlocking of t's*, *Locked t's*. The condition in which the birth of a t. is impeded by some part of it being held above its fellow, as when the first t. presents by the pelvic pole and its head can not pass the presenting head of the other t. —*Uniovular t's*. Fr., *jumeaux uniovulaires*. Ger., *einige Zwillinge*. T's developed from a single ovum containing a double germ, shown by the existence of only one chorion. [a, 34.]

**TWINING**, adj.  $Twin/i^n$ . Climbing by twisting around a support. [a, 35.]

**TWIN-LEAF**, n.  $Twi^2n/lef$ . See *JEFFERSONIA diphylla*.

**TWIN-POLE**, n.  $Twi^2n/pol$ . See *HOLOPOLE*.

**TWIST**, n.  $Twi^2st$ . A spiral turn, a spiral disposition produced by turning; that result of the action of gravity on the foetus in utero which consists in a turning of the latter until its centre of buoyancy and its centre of gravity lie in one vertical line. [Neville, "Dublin Jour. of Med. Sci.", June, 1882, p. 54.]

**TWO-AXED**, adj.  $Tu^2a^2xt$ . See *BIAXIAL*.

**TYLARUS** (Lat.), n. m.  $Ti^2(tu^1)/a^2r(a^2r)-u^2s(u^2s)$ . Gr., *τύλαρος*. Fr., *tylare*. Ger., *Zehenballe*. One of the pads under the toes in certain birds. [L, 343.]

**TYLE** (Lat.), n. f.  $Til(tu^1)/e(a)$ . Gen., *tyl'es*. Gr., *τύλη*. See *CALLOSTY*.

**TYLE-BERRY**, n.  $Til/be^2r-i^2$ . See *JATROPHA multifida*.

**TYLODES** (Lat.), adj.  $Til(tu^1)-od/ez(as)$ . Gr., *τυλώδης* (from *τύλος*, a callus, and *είδος*, resemblance). Fr., *tylexuz*. See *CALLOUS*.

**TYLOMA** (Lat.), n. n.  $Til(tu^1)-om/a^2$ . Gen., *-om'atos (-atis)*. Gr., *τύλωμα* (from *τύλος*, a callus). Fr., *tylome*, *ogmon*. Ger., *Schwiele*. A callosity of the skin, usually appearing on the hands or feet, due to a diffuse thickening of the epidermis, of limited extent, producing a whitish, indurated, and horny elevation of the surface, with more or less obliteration of the natural lines of the

skin and impairment of the sense of touch, and sometimes marked by deep fissures. Usually it is the result of long-continued friction or pressure on the skin, but it sometimes originates spontaneously, and is then often congenital. [Unna (G).] Cf. *CLAVUS* (1st def.).

**TYLOPHORA** (Lat.), n. f.  $Til(tu^1)-o^2t'o^2r-a^2$ . From *τύλος*, a callus, and *φύειν*, to bear. Fr., *tylophore*. A genus of the *Asclepiadeae*. The *Tylophoreae* are a section of the *Hoyae*. [a, 85.] —*T. asthmatica*. Fr., *ipeacacanha d'Inde*, *ipeca du pays* (ou *sauvage*). Country (or East Indian) *ipeacacanha*; a shrub of southern Asia and the adjacent islands. The root, *radix tylophorae*, is emetic in large, and cathartic in small, repeated doses, and is used like *ipeacacanha* in dysentery, and also in moist asthma. The leaves, *folia tylophorae*, official in the Bengal Ph. of 1844 and the Ph. of India of 1868, are also used in dysentery and as a diaphoretic, emetic, and expectorant. [a, 35.]

**TYLOSIS** (Lat.), n. f.  $Til(tu^1)-os/i^2s$ . Gen., *-os'eos (-is)*. Gr., *τύλωσις* (from *τύλος*, a callus). Fr., *t., tylose*. Ger., *Tylose*, *Thyllie* (5th def.). 1. See *TYLOMA*. 2. A laminated corn. [G.] 3. See *LEUCOPOLAKIA buccalis*. 4. A chronic inflammation of the margin of the eyelid, in which the whole substance of the lid along the margin is thickened and hardened. [F.] 5. A protuberance of the wall of a plant-cell into the cavity of an adjacent duct. [a, 35.] —*T. calloux* (Fr.). See *TYLOMA*. —*T. gompheux et bulbeux* (Fr.). Clavus, including the hard conical form (t. gompheux) and a laminated form (t. bulbeux) resembling somewhat the structure of an onion, usually observed on the sole of the foot. [G, 7.] —*T. lingue*. See *LEUCOPOLAKIA buccalis* and *ICHTHYOSIS lingue*. —*T. palme manus plana*. Of Hebra, acquired tyloma. [a, 34.] —*T. palme manus verrucosa*. Of Hebra, tyloma in which there are millet-sized horny nodules imbedded in the epidermis. [a, 34.]

**TYLOSTERESIS** (Lat.), n. f.  $Til(tu^1)-o(o^2)-ste^2r-e(a)/si^2s$ . Gen., *-es'eos (-es'is)*. From *τύλος*, a callus, and *στερείν*, to deprive. The removal of a callosity. [L, 50 (a, 14).]

**TYLOS** (Lat.), n. m.  $Til(tu^1)/u^2s(u^2s)$ . Gr., *τύλος*. See *TYLOMA*.

**TYMMA** (Lat.), n. n.  $Ti^2m(tu^2m)/ma^2$ . Gen., *tym'matos (-atis)*. Gr., *τύμμα* (from *τύπτειν*, to strike). See *WOUND*.

**TYMPAN** (Fr.), n.  $Ta^2n^2-pa^2n^2$ . See *TYMPANUM*. —*T. secondaire*. See *MEMBRANA tympani secundaria*.

**TYMPANAL** (Fr.), n.  $Ta^2n^2-pa^2n^2a^2l$ . The metapterygoid bone in fishes. [L, 14.]

**TYMPANECTOMIA** (Lat.), n. f.  $Ti^2mp(tu^2mp)-a^2n(a^2n)-e^2k-tom(tu^2m)/i^2-a^2$ . From *τύμπανον* (see *TYMPANUM*), and *ἐκτομή*, a cutting out. Of Brunner, excision of the membrana tympani. [a, 34.]

**TYMPANIC**, adj.  $Ti^2m-pa^2n/i^2k$ . Lat., *tympanicus*. Fr., *tympanique*. Ger., *tympanisch*. Pertaining to or connected with the tympanum; as a n., see *T. BONE*.

**TYMPANICOLINGUALIS** (Lat.), adj.  $Ti^2mp(tu^2mp)-a^2n(a^2n)/i^2k-o(o^2)-i^2n^2-gwal(gwa^2l)/i^2s$ . From *tympanum* (q. v.), and *lingua*, the tongue. Pertaining to the tympanic region and the tongue.

**TYMPANISM**, n.  $Ti^2mp/a^2n-i^2zm$ . Gr., *τυμπανισμός*. Lat., *tympanismus*. See *TYMPANITES*.

**TYMPANITES** (Lat.), n. m.  $Ti^2mp(tu^2mp)-a^2n(a^2n)-it(et)/ez(-as)$ . Gen., *-it'u (-it'æ)*. Gr., *τυμπανίτης* (from *τύμπανον*, a kettledrum). Fr., *tympanite*. Ger., *T., Aufblähung, Aufreibung*. A distended condition of the abdomen due to paralysis of the muscular coat of the intestines and their inflation with gas generated within them. [D, 20.] —*Acute t.* A sudden and excessive t. in puerperal women, with intense pain and great depression, simulating peritonitis; a variety of the "intestinal irritation" of Marshall Hall. [A, 43.] —*Peritoneal t.*, *T. abdominalis*. 1. T. due to an accumulation of air in the peritoneal cavity. [B, 2.] 2. See *T. aeriperitonitis*. See *Peritoneal t.* (1st def.). —*T. intestinalis*. See *T. pericardii*. See *PNEUMOPERICARDIUM*. —*T. universalis*. General emphysema. [L.] —*T. uteri*. See *PHYSOMETRA*.

**TYMPANITIC**, adj.  $Ti^2mp-a^2n-i^2t/i^2k$ . Gr., *τυμπανιτικός*. Lat., *tympaniticus*. Fr., *ballonné*. Ger., *tympanisch*. 1. Of the nature of or affected with tympanites. 2. Of a percussion-note, resembling in quality the note produced by percussing a tympanic abdomen.

**TYMPANITIS** (Lat.), n. f.  $Ti^2mp(tu^2mp)-a^2n(a^2n)-i(e)/ti^2s$ . Gen., *-it'idos (-idis)*. See *ORITIS media*.

**TYMPANO-EUSTACHIAN**, adj.  $Ti^2mp/a^2n-o-u^2s-tak/i^2-a^2n$ . For deriv., see *TYMPANUM* and *EUSTACHIAN*. Pertaining to the tympanum and the Eustachian tube. [a, 48.]

**TYMPANOHYAL**, adj.  $Ti^2mp-a^2n-o-hi^2l$ . Pertaining to the tympanic region or bone and the hyoid apparatus; as a n., see *T. BONE*.

**TYMPANO-KONTANTRON** (Lat.), n. n.  $Ti^2mp(tu^2mp)/a^2n(a^2n)-o(o^2)-kon(ko^2n)-i^2-a^2nt(a^2nt)/ro^2n$ . From *τύμπανον*, a kettledrum, *κόνα*, dust, and *άντρον*, a cavity. Of Weber and Liel, a longitudinally perforated piece of vulcanite with a small lateral tube, used with a catheter for medication of the tympanic cavity. [Gruber.]

**TYMPANOMALLÉAL** [Agassiz] (Fr.), n.  $Ta^2n^2-pa^2n^2-no-ma^2-la-a^2l$ . See *Symplectic BONE*.

**TYMPANOMALLEARIS** (Lat.), n. m.  $Ti^2mp(tu^2mp)-a^2n(a^2n)-o(o^2)-ma^2l(ma^2l)-le^2-ar(a^2r)/i^2s$ . From *tympanum* (q. v.), and *malleus* (q. v.). See *LAXATOR tympani minor*.

**TYMPANOPETROSALPINGOPTERYGOPALATINUS** (Lat.), n. m.  $Ti^2mp(tu^2mp)/a^2n(a^2n)-o(o^2)-pe^2t-ros''(o^2)-sa^2l(p-sa^2l)-i^2n^2g''(o^2)-te^2r(pte^2r)''(u^2g)-o(o^2)-pa^2l(pa^2l)-a^2t(a^2t)-in(-en)/u^2s(u^2s)$ . From *τύμπανον*, a kettledrum, *πέτρα*, a rock, *σάλπιγξ*, a trumpet, *πτερύξ*, a wing, and *palatum*, the palate. See *ABDUCTOR of the Eustachian tube*.

**TYMPANOPHONIA** (Lat.), n. f.  $Ti^2mp(tu^2mp)-a^2n(a^2n)-o(o^2)-fon/i^2-a^2$ . From *τύμπανον* (see *TYMPANUM*), and *φωνή*, sound. See *AUTOPHONY* (3d def.).

**TYPHOSEPSIS** (Lat.), n. f. Tif(tu<sup>6</sup>f)-o(o<sup>3</sup>)se<sup>2</sup>ps(saps)<sup>1</sup>is. Gen., -seps<sup>2</sup>eos (-is). From *typhos*, fever-stupor, and *σῆψις*, decay. Of L. Buzzonini, the systemic poisoning occurring in and caused by typhoid fever. [L, 50 (a, 34).]

**TYPHOSUS** (Lat.), adj. Tif(tu<sup>6</sup>f)-os<sup>2</sup>us(u<sup>4</sup>s). From *typhos*, fever-stupor. Typhous, typhoid. [a, 17.]

**TYPHOTOXINE**, n. Tif-o-to<sup>2</sup>x'en. From *typhus* (q. v.) and *toxicum*, poison. A poisonous base, C<sub>7</sub>H<sub>17</sub>NO<sub>3</sub>, isomeric with gadine, found in cultures of the *Bacillus typhosus*. [Brieger, "Arch. f. path. Anat. u. Phys. u. f. klin. Med.," cxv, p. 483 (B).]

**TYPHOUS**, adj. Tifus. From *typhus* (q. v.). Fr., *typhique*. Ger., *typhös*, *typhisch*. Of the nature of, pertaining to, or resembling typhus. [D.]

**TYPHUS** (Lat.), n. m. Tif(tu<sup>6</sup>f)/u<sup>2</sup>s(u<sup>4</sup>s). From *typhos*, fever-stupor. Fr., t. Ger., T. See T. FEVER.—**Abdominal t.** See Typhoid fever.—**Abortive t.** An incomplete form of t. with a sudden and favorable stop in the evolution of the disease. [L, 87 (a, 50).]—**Abortive t. with icterus.** See Weil's disease.—**Catarrhal t.** Irish fever; the peculiar type of t. fever prevalent in Ireland; it is characterized by thoracic complications. [D, 72.]—**Cerebral t.** (Ger.). See Typhoid fever.—**Cerebro-spinal t.** See Cerebro-spinal meningitis.—**Congestive t.** A form of t. in which the seat of the pathological process was supposed to be in the veins. [B, 226.] Cf. *Inflammatory t.*—**Exanthematischer T.** (Ger.). **Fleckt t.** (Ger.). See T. FEVER.—**Ganglionic t.** See Typhoid fever.—**Hunger t.** See T. FEVER and Relapsing fever.—**Indian t.** See Asiatic cholera.—**Inflammatory t.** A form of t. in which the seat of the pathological process was supposed to be in the arteries. [B, 226.] Cf. *Congestive t.*—**Irish t.** See Catarrhal t.—**Knochen t.** (Ger.). See Osteomyelitis.—**Kriegst t.** (Ger.). See T. FEVER.—**Maculated t.** T. gravior accompanied with a macular eruption. [D.]—**Oriental t.** See PLAGUE.—**Pernicious t.** See T. gravior.—**Petechial t.** True t. fever. [D, 74.]—**Puerperal t.** **Puerpero-t.** Fr., t. des femmes en couches. 1. Puerperal fever. 2. The gangrenous and diphtheritic forms of puerperal fever. [A, 9, 15.]—**Sinking t.** Of T. Miner, the t. epidemic that occurred in New England in 1823, characterized by great depression. [a, 34.]—**Spotted t.** See Maculated t.—**T. abdominalis.** See Typhoid fever.—**T. ægyptiacus.** Probably typhoid fever, occurring epidemically among the Egyptians. [a, 34.]—**T. amaril** (Fr.). **T. amaryl** (Fr.). See Yellow fever.—**T. ambulatorius.** Mild typhoid fever that allows the patient to pursue his usual avocations during the greater part of the disease. [a, 34.]—**T. aphthoideus.** See APHTHA infantum.—**T. apoplectico-tétanique** (Fr.). See Cerebro-spinal meningitis.—**T. à rechutes** (Fr.). See Relapsing fever.—**T. bengalensis.** See Asiatic cholera.—**T. biliosus.** See Bilious typhoid fever and Yellow fever.—**T. carbunculosus.** See ANTHRACOTYPHUS.—**T. carcerum.** See Jail fever.—**T. castrensis.** See Camp fever and T. FEVER.—**T. cérébral convulsif** (Fr.). See Electric chorea.—**T. cerebri apoplecticus.** **T. cérébro-spinal** [Boudin] (Fr.). See Cerebro-spinal meningitis.—**T. charbonneux** (Fr.). See Contagious anthrax.—**T. cholériforme** (Fr.). See Typhoid fever.—**T. comatosus.** T. with profound coma. [a, 34.]—**T. convulsif épidémique** (Fr.). See Cerebro-spinal meningitis.—**T. d'Afrique** (Fr.). See PLAGUE.—**T. d'Amérique** (Fr.). See Yellow fever.—**T. d'écurie** (Fr.). See T. equilis.—**T. de la faim** (Fr.). See T. FEVER and Relapsing fever.—**T. de porc** (Fr.). A term applied to contagious anthrax, also to measles in the pig. [A, 301 (a, 34).]—**T. des Antilles.** See Yellow fever.—**T. des femmes enceintes** (Fr.). A generic term for t. and typhoid fever occurring during pregnancy. [A, 24.]—**T. des membres** (Fr.). See Infectious osteomyelitis.—**T. des tropiques** (Fr.). See Yellow fever.—**T. equilis.** Fr., t. d'écurie. Of Mëgnin, influenza in the horse. [a, 34.]—**T. erysipel** (Ger.). Erysipelas observed during a typhus epidemic. [L, 57 (a, 50).]—**T. exanthematicus.** See Exanthematic t. fever and T. FEVER.—**T. exhaustorum.** T. affecting soldiers, sailors, prisoners, and others that have been subjected to privations, exposure, and exhaustion. [a, 34.]—**T. gangliaris.** See Typhoid fever.—**T. gift** (Ger.). The poison of t. fever or of typhoid fever. [D, 18.]—**T. gravior.** T. fever of severe or malignant type.—**T. hépatique** (Fr.). Of Landouzy, infectious jaundice with wasting of the liver cells. [a, 34.]—**T. hysterico-verminous** [Sauvages]. See Typhoid fever.—**T. icterodes.** See Bilious typhoid fever and Yellow fever.—**T. irritabilis.** See Typhoid fever.—**T. jaune** (Fr.). See Yellow fever.—**T. levis.** Fr., t. léger. A form of typhoid fever in which the symptoms are regular, but very mild and of short duration.—**T. levissimus.** A

febrile condition which presents more or fewer of the symptoms of typhus fever, but with great indistinctness. [Eloy, "Un. méd.," May 24, 1884, p. 913 (D).]—**T. malarique** (Fr.). See Typho-malarial fever.—**T. manipuera.** Of Sauvages, a disease resembling t., produced by taking the juice of the manihot. [a, 34.]—**T. mitior.** See Typhoid fever and T. levis.—**T. nervosus.** See Typhoid fever.—**T. nosocomialis.** See T. FEVER.—**T. odor.** The peculiar odor exhaled from the skin in t. fever. It is variously compared to the odor of rotten straw, mice, deer, certain reptiles, etc. It is strongest in damp weather and when the ventilation of the patient's room is bad. It is thought that the exhalation carries the poison of the fever. [D, 1.]—**T. petechialis gravior** [Cullen]. T. in which rigor and heat alternate without perspiration, and delirium is succeeded by stupor. [a, 34.]—**T. petechialis mitior** [Cullen]. T. with coma or quiet delirium, nausea, precordial oppression, and despondency. [a, 34.]—**T. pestilens.** See T. FEVER.—**T. putridus** [Cullen]. Severe t. fever. [a, 34.]—**T. recurrens.** See Relapsing fever.—**T. scarlatina.** See Scarlet fever.—**T. secundarius.** T. consequent upon some primary disease. [a, 34.]—**T. schorff** (Ger.). A crust-like slough shed from the intestinal glands in typhoid fever.—**T. sidérant** (Fr.). See T. gravior.—**T. syncopalis.** See Sinking t.—**T. urinosus.** See URÆMIA.—**T. vénérien** (Fr.). See Equine syphilis.—**T. versatilis.** T. associated with great delirium. [a, 34.]—**T. vesicularis** [Cullen]. See PEMPFIGUS.—**Yellow t.** See Pernicious yellow fever.

**TYPICAL**, adj. Tip<sup>2</sup>i<sup>2</sup>-k'l. Gr., τυπικός. Lat., typicus. Fr., typique. Ger., typisch. Pertaining to or representing a type. [a, 35.]

**TYPOSIS** (Lat.), n. f. Tip(tu<sup>6</sup>p)-os<sup>2</sup>is. Gen., -os<sup>2</sup>eos (-os<sup>2</sup>is). Gr., τύπωσις (from τύπος, an impression). Ger., Typose. A periodically recurring disease; intermittent fever. [G.]

**TYPUS** (Lat.), n. m. Tip(tu<sup>6</sup>p)/u<sup>2</sup>s(u<sup>4</sup>s). Gr., τύπος (from τύπτειν, to beat). See TYPE.—**T. intermittens anteponens.** See Anticipating intermittent fever.—**T. intermittens postponens.** See Postponing intermittent fever.

**TYRALINE**, n. Tir<sup>2</sup>a<sup>2</sup>-en. See MAUVE and MAUVEINE.

**TYREIN**, n. Tir<sup>2</sup>e<sup>2</sup>-i<sup>2</sup>n. Fr., tyréine, tyrine. See CASEIN.

**TYREMESIS** (Lat.), n. f. Tir(tu<sup>6</sup>r)-e<sup>2</sup>m<sup>2</sup>e<sup>2</sup>s-i<sup>2</sup>s. Gen., -es<sup>2</sup>eos (-e<sup>2</sup>mesis). From *typos*, cheese, and *έμεσις*, vomiting. Vomiting of cheesy or curdy matter. [L, 30, 50 (a, 14).]

**TYRIASIS** (Lat.), n. f. Tir<sup>2</sup>(tu<sup>6</sup>r)-i<sup>2</sup>(i<sup>2</sup>a<sup>2</sup>/a<sup>2</sup>s)(a<sup>2</sup>s)-i<sup>2</sup>s. Gen., -as<sup>2</sup>eos (-i<sup>2</sup>asias). See ALOPECIA and ELEPHANTIASIS.

**TYRODES** (Lat.), adj. Tir(tu<sup>6</sup>r)-od<sup>2</sup>e<sup>2</sup>z(as). Gr., τυρώδης (from τυρός, cheese, and εἶδος, resemblance). Fr., tyreux. Cheesy.

**TYROLEUCIN**, n. Tir-o-lu<sup>2</sup>z<sup>2</sup>i<sup>2</sup>n. Fr., tyroleucine. A starchy compound, C<sub>14</sub>H<sub>22</sub>N<sub>2</sub>O<sub>4</sub>, obtained from the decomposition products of albumin. [A, 93 (a, 14).]

**TYROMA** (Lat.), n. n. Tir(tu<sup>6</sup>r)-om<sup>2</sup>a<sup>2</sup>. Gen., -om<sup>2</sup>atos (-atis). Gr., τυρόμα (from τυρός, cheese). A tumor caused by caseation of the lymphatic glands. [A, 326 (a, 48).]

**TYROSIN, TYROSINE**, n's. Tir<sup>2</sup>o<sup>2</sup>s-i<sup>2</sup>2n, -en. Oxyphenylamidopropionic acid, C<sub>9</sub>H<sub>11</sub>NO<sub>3</sub> = C<sub>6</sub>H<sub>4</sub>(OH)(NH<sub>2</sub>)CO.OH, occurring as colorless, tasteless, and odorless acicular crystals. It dissolves in acids and solutions of the caustic alkalies, forming saline compounds with both. It is found uniformly among the products of proteid decomposition, and is thus produced in the intestines by the processes of pancreatic digestion. It is also said to occur normally in the spleen, pancreas, etc., but this is doubtful. Pathologically, it occurs in the urine, especially in acute yellow atrophy of the liver, and it has also been found in various parts of the body. [B, 12; B, 3, 270 (a, 38).]—**T. hydantoic acid.** A substance, C<sub>8</sub>H<sub>4</sub><C<sub>2</sub>H<sub>3</sub>.NH.CONH<sub>2</sub>.COOH = C<sub>10</sub>N<sub>2</sub>H<sub>12</sub>O<sub>4</sub>, forming large, transparent prismatic crystals, and bearing the same chemical relation to t. that hydantoic acid bears to glycocine. [Jaffe, "Ztschr. f. physiol. Chem.," vii, p. 306 (B).]—**T. hydatoint.** A substance, C<sub>10</sub>H<sub>10</sub>N<sub>2</sub>O<sub>3</sub>, forming yellow acicular crystals, found in the urine of dogs fed upon t. [Blendermann, "Ztschr. f. physiol. Chem.," v, 234; Jaffe, "Ztschr. f. physiol. Chem.," vii, p. 306 (B).]

**TYROSIS** (Lat.), n. f. Tir(tu<sup>6</sup>r)-os<sup>2</sup>i<sup>2</sup>s. Gen., -os<sup>2</sup>eos (-os<sup>2</sup>is). From τυρός, cheese. 1. Curdling. 2. See TYREMESIS. 3. See CASEATION.

**TYROTOXICON**, n. Tir-o-to<sup>2</sup>x<sup>2</sup>i<sup>2</sup>-kon. From τυρός, cheese, and τοξικόν, poison. Ger., Käsegift. A poisonous substance, C<sub>2</sub>H<sub>3</sub>N<sub>2</sub>, found by V. C. Vaughan, in 1888, in poisonous cheese and in poisonous vanilla ice-cream. [B; a, 35.]

## U

**UATERIUM** (Lat.), n. n. U<sup>2</sup>2(u)-a<sup>2</sup>t<sup>2</sup>(a<sup>2</sup>t<sup>2</sup>)-e(a<sup>2</sup>/r<sup>2</sup>i<sup>2</sup>2-n<sup>2</sup>m(u<sup>4</sup>m). From *oūs*, the ear. Fr., uatérion. A medicament for the ear. [L, 50 (a, 14).]

**UDDER**, n. U<sup>2</sup>2(u)<sup>2</sup>r. Gr., οὐδᾶρ. Lat., uber. Fr., pis. Ger., Euter. The consolidated mammae of the cow.

**UDENIA** (Lat.), n. f. U<sup>2</sup>2(ud)-e<sup>2</sup>n<sup>2</sup>-i(e)<sup>2</sup>a<sup>2</sup>. Gr., οὐδένεα (from οὐδέν, nothing). Worthlessness.

**UDIKA, UDIKA-BREAD**, n's. See DIKA.

**UDOSADENITIS** (Lat.), n. f. U<sup>2</sup>2(ud)-os-a<sup>2</sup>d(a<sup>2</sup>d)-e<sup>2</sup>n<sup>2</sup>-i(e)<sup>2</sup>i<sup>2</sup>s. Gen., -it<sup>2</sup>idos (-idis). Fr., udosadénite. See HIDROSADENITIS.

**UEBEL** (Ger.), adj. and n. U<sup>6</sup>b<sup>2</sup>e<sup>2</sup>l. An evil, a malady, a complaint. [A, 521 (a, 21).]—**Königsu**. See SCROFULA.—**U'keit.** See NAUSEA.—**U'riechend.** See FETID.

**UEBERBÄRTIGKEIT** (Ger.), n. U<sup>6</sup>b<sup>2</sup>e<sup>2</sup>r-bart<sup>2</sup>i<sup>2</sup>g-kit. See POGONIASIS.

**UEBERBEIN** (Ger.), n. U<sup>6</sup>b<sup>2</sup>e<sup>2</sup>r-bin. See GANGLION (1st def.) and EXOSTOSIS (1st def.).

**UEBERBINDEN** (Ger.), v. tr. U<sup>6</sup>b<sup>2</sup>e<sup>2</sup>r-bi<sup>2</sup>nd-e<sup>2</sup>n. To bandage. [E.]

**UEBERCHLORSÄURE** (Ger.), n. U<sup>6</sup>b<sup>2</sup>e<sup>2</sup>r-klor-zoir-e<sup>2</sup>. See PERCHLORIC acid.

**UEBERDECKT** (Ger.), adj. U<sup>6</sup>b<sup>2</sup>e<sup>2</sup>r-de<sup>2</sup>kt. See OBTECTED.

**UEBERDREHUNG** (Ger.), n. U<sup>6</sup>b<sup>2</sup>e<sup>2</sup>r-dra<sup>2</sup>um<sup>2</sup>. An excessive turning or rotation.—**U. der Frucht.** Excessive rotation of the fœtus in a breech delivery, after the expulsion of the breech, so that the back no longer occupies the oblique position it had before.

but is turned directly forward or backward or even somewhat into the opposite oblique diameter of the pelvis. [A, 61.]—**U. der Schultern.** See *Movement of restitution.*

**UEBEREINANDERGESTELLT** (Ger.), adj.  $U^b e^2 r$ -in- $a^3 n d^2 e^2 r$ - $g e^2 s t e^2 l t$ . See *SUPERIMPOSED.*

**UEBEREINANDERTRETEN** (Ger.), n.  $U^b e^2 r$ -in- $a^3 n d^2 e^2 r$ - $t r a t e^2 n$ . See *OVERRIDING.*

**UEBEREINSTIMMUNG** (Ger.), n.  $U^b e^2 r$ -in- $s t i^3 m$ - $m u n^2$ . See *ANALOGY AND CONSISTENCE.*

**UEBEREMPFÄNGNISS** (Ger.), n.  $U^b e^2 r$ - $e^2 m p$ - $f a n^2$ - $n i^2 s$ . See *SUPERFETATION.*

**UEBERERNÄHRUNG** (Ger.), n.  $U^b e^2 r$ - $e^2 r$ - $n a r$ - $u n^2$ . See *UBERNÄHRUNG.*

**UEBERFRUCHTUNG** (Ger.), n.  $U^b e^2 r$ - $f r u c h t$ - $u n^2$ . See *SUPERFETATION AND HYPERCARPOSIS.*

**UEBERFÜLLUNG** (Ger.), n.  $U^b e^2 r$ - $f u l l$ - $u n^2$ . See *EPILEPSIS AND HYPERPLEROSIS.*—**Partielle U.** See *MEREMPHRAXIS.*

**UEBERGANG** (Ger.), n.  $U^b e^2 r$ - $g a n^2$ . A passing over (as from the maternal into the foetal circulation).—**U'sbrücken.** See *Annectant CONVOLUTIONS.*—**U'sfalte.** A fold of an investing membrane where it passes from one structure to another; a fold of reflection (e. g., the fold formed by the peritonæum as it passes from the posterior vault of the vagina to the anterior wall of the rectum).

**UEBERGLIEDERUNG** (Ger.), n.  $U^b e^2 r$ - $g l e d$ - $e^2 r$ - $u n^2$ . See *HYPERARTHROSIS.*

**UEBERGREIFEN** (Ger.), n.  $U^b e^2 r$ - $g r i f$ - $e^2 n$ . See *SUPERPOSITION.*

**UEBERHÄUTUNG** (Ger.), n.  $U^b e^2 r$ - $h o i t$ - $u n^2$ . See *DERMATOPLASIA.*

**UEBERHÖRUNG** (Ger.), n.  $U^b e^2 r$ - $h u r n$ - $u n^2$ . See *KERATOPLASIA.*

**UEBERIMPFGUNG** (Ger.), n.  $U^b e^2 r$ - $i m p f$ - $u n^2$ . See *INOCULATION.*

**UEBERKLEIDEND** (Ger.), adj.  $U^b e^2 r$ - $k l i d$ - $e^2 n d$ . See *ENVELOPING.*

**UEBERLADUNG** (Ger.), n.  $U^b e^2 r$ - $l a d$ - $u n^2$ . Surfeit, repletion. [A, 521 (a, 48).]

**UEBERLASTET** (Ger.), adj.  $U^b e^2 r$ - $l a s t$ - $e^2 t$ . Of a muscle, having a weight attached to it in such a manner as to extend it only to the degree natural during rest. [K, 3.]

**UEBERLASTUNG** (Ger.), n.  $U^b e^2 r$ - $l a s t$ - $u n^2$ . The state of a muscle having such a weight attached to it that it is prevented from contracting with its usual rapidity and energy. [K, 16.]

**UEBERLEITUNG** (Ger.), n.  $U^b e^2 r$ - $l i t$ - $u n^2$ . See *TRANSFUSION.*

**UEBERLINGEN** (Ger.), n.  $U^b e^2 r$ - $l i n$ - $e^2 n$ . A bathing resort on Lake Constance, in Baden, where there is a gaseous and chalybeate spring. [L, 30, 49 (a, 14).]

**UEBERMANGANSÄURE** (Ger.), n.  $U^b e^2 r$ - $m a n$ - $g a n$ - $z o i r$ - $e^2$ . See *PERMANGANIC acid.*—**U.-Anhydrid.** See *MANGANESE heptoxide.*

**UEBERNÄHRUNG** (Ger.), n.  $U^b e^2 r$ - $n a r$ - $u n^2$ . See *FORCED ALIMENTATION* (2d def.) and *HYPERTROPHY.*

**UEBERNÄHRUNG** (Ger.), n.  $U^b e^2 r$ - $n a r$ - $u n^2$ . See *CICATRIZATION.*

**UEBEROSMIUMSÄURE** (Ger.), n.  $U^b e^2 r$ - $o s$ - $m e$ - $u m$ - $z o i r$ - $e^2$ . See *OSMIUM tetroxide.*

**UEBERPFLANZUNG** (Ger.), n.  $U^b e^2 r$ - $p f l a n t s$ - $u n^2$ . See *TRANSPLANTATION.*

**UEBERPFPROPFUNG** (Ger.), n.  $U^b e^2 r$ - $p f r o p f$ - $u n^2$ . See *SKIN-GRAFTING.*

**UEBERREIZ** (Ger.), n.  $U^b e^2 r$ - $r i t s$ . Excessive irritation or excitement. [A, 315 (a, 48).]

**UEBERRÖTHE** (Ger.), n.  $U^b e^2 r$ - $r u t e^2$ . See *ERYSIPELAS.*

**UEBERSCHLAG** (Ger.), n.  $U^b e^2 r$ - $s h l a g$ . A poultice or plaster. [A, 521 (a, 48).]

**UEBERSCHMELZEND** (Ger.), adj.  $U^b e^2 r$ - $s h m e l t s$ - $e^2 n d$ . Of a liquid, cooled below the freezing point without solidifying. [B.]

**UEBERSCHNAPPEN** (Ger.), n.  $U^b e^2 r$ - $s h n a p$ - $p e n$ . See *PARAPHRENESIS.*

**UEBERSCHWÄNGERUNG** (Ger.), n.  $U^b e^2 r$ - $s h w e n$ - $e^2 r$ - $u n^2$ . See *SUPERFECUNDATION.*

**UEBERSICHTIGKEIT** (Ger.), n.  $U^b e^2 r$ - $s i c h t$ - $i g k e i t$ . See *HYPERMETROPIA.*

**UEBERSPANNUNG** (Ger.), n.  $U^b e^2 r$ - $s p a n$ - $n u n^2$ . See *HYPERTONIA.*

**UEBERSTECHE** (Ger.), n.  $U^b e^2 r$ - $s t e c h$ - $e^2 n$ . See *INOCULATION.*

**UEBERSTRECKUNG** (Ger.), n.  $U^b e^2 r$ - $s t r e c k$ - $u n^2$ . See *DORSAL FLEXION.*

**UEBERTRAGBAR** (Ger.), adj.  $U^b e^2 r$ - $t r a g b a r$ . Transferable, transmissible, contagious. [D.]

**UEBERWANDERUNG** (Ger.), n.  $U^b e^2 r$ - $v a n d$ - $e^2 r$ - $u n^2$ . See *MIGRATION.*

**UEBERWEBT** (Ger.), adj.  $U^b e^2 r$ - $v a b t$ . See *ORTEXTUS.*

**UEBERWUCHERN** (Ger.), v. intr.  $U^b e^2 r$ - $v u c h$ - $e^2 r n$ . To become hypertrophied. [A, 521 (a, 21).]

**UEBERZÄHLIG** (Ger.), adj.  $U^b e^2 r$ - $t s a l i g$ . Supernumerary.

**UEBERZUG** (Ger.), n.  $U^b e^2 r$ - $t s u g$ . See *INDUMENTUM.*

**UEBUNG** (Ger.), n.  $U^b e^2 r$ - $u n^2$ . See *EXERCISE.*

**UEHKA** (Ar.), n. Okra pods. [Schweinfurth (a, 35).]

**UEPPIG** (Ger.), adj.  $U^p p i g$ . See *LUXURIANT.*

**UFUON** (Ar.), **UFYUON** (Ar.), n's. Opium. [a, 35.]

**UKIAH VICHY SPRINGS**, n.  $U^2$ - $k i a^3$ . A place in Mendocino County, California, where there are gaseous alkaline and saline springs. [Anderson (a, 14).]

**ULÉMORRHAGIA** (Lat.), n. f.  $U^2$ (ul)- $e^2 m$ (a<sup>2</sup>)- $e^2 m$ - $o^2 r$ - $r a j$ -(ra<sup>2</sup>g)/i<sup>2</sup>-a<sup>3</sup>. From *oδλον*, the gum, *αἷμα*, blood, and *ὀδύσσειν*, to burst forth. Fr., *ulémorrhagie*. Ger., *Zahnfleischblutung*. Hæmorrhage from the gums. [L, 50 (a, 14).]

**ULAGANACTESIS** (Lat.), n. f.  $U^2$ (ul)- $a^2 g$ (a<sup>2</sup>g)- $a^2 n$ (a<sup>2</sup>n)- $a^2 k t$ -(a<sup>3</sup>kt)-e(a)/si<sup>2</sup>s. Gen., -*es/eos* (-e/sis). From *oδλον*, the gum, and *ἀγάνκτης*, physical pain. Fr., *ulaganactèse*. Tension and itching in the gums. [L, 50 (a, 14).]

**ULATROPHIA** (Lat.), n. f.  $U^2$ (ul)- $a^2 t$ (a<sup>2</sup>t)- $r o$ (ro<sup>2</sup>)/i<sup>2</sup>-a<sup>3</sup>. From *oδλον*, the gum, a priv., and *τρέφειν*, to nourish. Atrophy of the gums. [a, 48.]

**ULCER**, n.  $U^2$ ls/u<sup>2</sup>r. Gr., *ἔλκος*. Lat., *ulcus*. Fr., *ulcère*. Ger., *Geschwür*. A localized loss of substance following a destructive inflammation and ordinarily followed by the production of a cicatrix. The term is usually restricted to cases in which the loss of substance involves at least the entire thickness of the epidermis or of the epithelium of a mucous membrane. [G, 16.] Cf. *SORE*.—**Aden u.** An endemic u. observed at Aden. [a, 34.]—**Adherent u.** Of J. Hardie, a cutaneous u. in which the base becomes incorporated with and adherent to the subjacent fascia, and there is a tendency to "indolence in cicatrization." [a, 34.]—**Amputating u.** An u. affecting a digit or a limb in which the ulcerative process destroys the tissue to the bone, virtually amputating the part. [a, 34.]—**Arterial u.** A cutaneous u. due to incompetency or disease of an artery. [a, 34.]—**Atonic u.** An u. having unhealthy granulations that cicatrize slowly. [a, 34.]—**Autochthonous u.** See *CHANCRE*.—**Cancerous u.** An ulcerating cancer. [G.]—**Carious u.** A gangrenous u. [a, 34.]—**Chancroidal u.** See *Simple CHANCRE*.—**Cochin-China u.** A chronic u., occurring on any part of the body, affecting persons newly arrived in Cochin-China. It usually results from a slight cutaneous lesion, and becomes phagedenic in consequence of heat, dirt, and privation. [A, 301 (a, 34).]—**Cock's-comb u.** Ger., *Hahnenkammgeschwür*. An u. with outgrowths resembling condylomata. [a, 34.]—**Cold u's.** Of Paget, small inflammatory u's occurring spontaneously on the extremities, especially at the ends of the fingers or toes. They resemble ulcerated chilblains, but are not due to exposure to cold. [E.]—**Constitutional u.** See *SYPHILITIC CHANCER*.—**Contagious u.** See *Simple CHANCER*.—**Contagious u. of Mozambique.** See *FRAMBESIA* (2d def.).—**Corrosive u. of Hippocrates.** See *Gangrenous STOMATITIS*.—**Crateriform u.** A peculiar form of acute epithelial cancer of the face, of very rapid and extensive growth. It forms a bossy conoidal mass in the centre of which softening takes place and a cavity like a crater is developed. ["Brit. Med. Jour.," Feb. 23, 1889, p. 412 (a, 50).]—**Creeping u. of the cornea.** A serpinous corneal u. ["Pract.," Mar., 1888, p. 226 (a, 34).]—**Diphtheritic u.** An u. that is covered with a false membrane. [a, 34.]—**Egyptian u.** An endemic u. observed in Egypt. [a, 34.]—**Endemic u.** A phagedenic u. usually affecting the lower extremities, observed in tropical countries. It is likely to follow any solution of continuity of the skin, and the seat of the lesion becomes inflamed, tumefied, and phagedenic. It is much more severe in debilitated subjects, and may end fatally. [a, 34.]—**Fissurated u.** Of Whitehead, laceration of the cervix uteri. [A, 37.]—**Fistulous u.** Lat., *ulcus fistulosum*. An u. communicating with a fistula. [G.]—**Follicular u.** An u. due to inflammation in the lymph-follicles of a mucous membrane. [D, 48.]—**Fungiform u.** See *CANCER verrucosus*.—**Fungous u.** An u. with fungous granulations. [a, 34.]—**Gastric u.** See *Perforating u. of the stomach*.—**Ghê-Ham u.** See *Cochin-China u.*—**Gummatous u.** An u. formed by the breaking down of a gumma. [a, 34.]—**Gwailor u.** An endemic u. observed at Gwailor. [a, 34.]—**Hæmorrhagic u.** An u. from which there is hæmorrhage. [a, 34.]—**Indolent u.** An u. observed in some dyscrasia or enfeebled condition of the system, that, while not spreading, shows no disposition to heal. [a, 34.]—**Inflamed u.** An u. surrounded by an area of inflammation. [a, 34.]—**Initial u.** of syphilis. See *CHANCER* (2d def.).—**Intractable u.** See *Indolent u.*—**Invertate u.** See *Indolent u.*—**Irritable u.** An u. that is painful. [a, 34.]—**Jacobs's u.** A rodent u., which begins as a small pimple on the skin of the lid near the inner canthus or over the lacrimal bone. It is shallow, with a well-defined, indurated margin, and its progress is very slow. It may remain superficial, but it usually extends deeply. [F.]—**Lupoid u.** An u. that closely resembles lupus. [a, 34.]—**Lupous u.** See *LUPUS*.—**Lymphatic u.** An u. from which there is a lymphic exudate. [a, 34.]—**Malignant u.** See *CANCER* and *HOSPITAL GANGRENE*.—**Malignant u. of the uterus.** An old term for a form of cancer of the uterus characterized by rapid softening and ulceration of the whole organ. [A, 42.]—**Marjolin's u.** An u., probably cancerous, arising upon the site of an old cicatrix. ["Pacif. Med. and Surg. Jour.," viii, p. 209 (a, 34).]—**Menstrual u.** Any u. that gives evidence of sympathy, to a lesser or greater degree, with the menstrual function, especially one from which vicarious menstruation takes place. [a, 34.]—**Mercurial u.** An u. supposed to be caused by systemic enfeeblement due to mercurinism. [a, 34.]—**Mozambique u.** See *ULCER contagieux de Mozambique*.—**Neuralgic u.** Painful u. See *Irritable u.*—**Peptic u.** An u. of the stomach supposed to be produced by a highly acid gastric juice. [D, 35.]—**Perforating u.** An u. that perforates through the tissues of a part, as of the stomach, intestines, etc. [a, 34.]—**Perforating u. of the foot.** See *MALUM perforans pedis*.—**Perforating u. of the stomach.**

**Lat., gastrostrosis.** An u. that perforates the gastric wall. [a, 34.]—**Persian u.** An u. endemic in Persia. [a, 34.]—**Phagedenic u.** An u. having the qualities of phagedena. [E.]—**Phlegmonous u.** See *Inflamed u.*—**Plantar u.** See *MALUM perforans pedis.*—**Post-molar u.** An u. forming behind the last molar tooth, on one or both sides, frequently occurring in Bengal (especially in the rainy season) in persons having the malarial cachexia. [“Ind. Med. Gaz.” June, 1887, p. 190 (a, 50).]—**Putrid u.** 1. An u. accompanied with putrefaction or gangrene, especially chancre. [G.] 2. See *Hospital GANGRENE.*—**Rodent u.** A deeply ulcerating variety of epithelioma, differing from ordinary epithelioma chiefly in its very slow course and in its tendency to involve every tissue with which it comes in contact, including muscles and bones. It more commonly affects the upper portion of the face. [G.]—**Round u. of the stomach.** See *Perforating u. of the stomach.*—**Round u. of the uterus.** Of Clarke, a form of u. of the uterus, of rapid course, supposed by him to be epitheliomatous, and by others to be analogous to lupus or due to the action of an irritating secretion. [Zahn, “Arch. f. path. Anat. u. Physiol. u. f. klin. Med.,” Mar., 1884, p. 388.]—**Round u. of the vagina.** An u. of the vagina similar to the round u. of the stomach. [Zahn, l. c.]—**Saemisch’s u.** An infectious u. of the cornea. [“Un. méd. et sci. du Nord-Est”; “Province méd.,” Oct. 6, 1888, p. 577.]—**Scabulous u.** See *PSORELCOIS.*—**Scorbutic u.** An unhealthy, indolent u. occurring in scurvy. [a, 34.]—**Scrofulous u.** An u. due to scrofula. [a, 34.]—**Serpinous u.** An u. which extends in a serpinous manner.—**Simple u.** An u. that is not dependent on systemic disease or poisoning, and that shows a tendency to heal. [a, 34.]—**Stercoral u.** An u. in the wall of the gut due to the presence of an accumulation of feces following intestinal stenosis. [L, 57 (a, 50).]—**Sublingual u.** An ulceration about the frenum linguae observed during the course of whooping-cough, thought to be due to the part being forced against the lower incisor teeth during the paroxysms.—**Symptomatic u.** An u. indicative of a disease not limited to the ulcerated point. [E.]—**Syphilitic u.** 1. An u. due to syphilis. [G.] 2. See *SYPHILITIC CHANCRE.*—**Syriac u.** See *Malignant ANGINA.*—**Taschkent u.** An endemic u. observed at Taschkent. [a, 34.]—**Toenail u.** Of Martin, the u. caused by an ingrowing toenail. [“Toledo Med. and Surg. Jour.,” iii, 1879 (a, 34).]—**Tubercular u.** An u. due to tubercular disease. [a, 34.]—**Turkistan u.** A form of ulceration observed in Russian soldiers while on the frontiers of Afghanistan, affecting the face, neck, abdomen, and joints. In the first stage there appeared reddish spots, spreading, but limited by an induration and becoming rounded ulcerations with irregular edges. During the second period the ulcerations were augmented, tended to become confluent, and were accompanied by profuse suppuration, lymphangitis, and adenitis. The third period was that of cicatrization. [“Union méd.,” Aug. 31, 1886, p. 371 (a, 50).]—**Varicose u.** An u. caused by varicose veins. [a, 34.]—**Venerical u.** See *CHANCRE* (2d def.).—**Yemen u.** See *Cochin-China u.*

**ULCERATE**, v. intr. U<sup>l</sup>s/u<sup>r</sup>-at. Lat., *ulcerare*. Ger., *ulceriren*. To undergo ulceration.

**ULCERATED**, adj. U<sup>l</sup>s/u<sup>r</sup>-at-e<sup>d</sup>. Lat., *ulceratus*. Fr., *ulcéré*. Affected with ulceration.

**ULCERATION**, n. U<sup>l</sup>s/u<sup>r</sup>-a/shu<sup>n</sup>. Gr., *ἔλκος*. Lat., *ulceratio*. Fr., *ulcération*. Ger., *Verschwürung*. The formation of an ulcer; of a part, the condition of being affected with an ulcer or with ulcers. [E.; a, 48.]—**Fissured u.** See *Fissured ULCER.*—**Follicular u.** Disease of the cervix uteri characterized by Nabothian follicles. [a, 37.]—**Hering’s pharyngeal u.** An oblong ulcer of the hard palate and the pillars of the fauces, associated with a unilateral and isolated u. of the pharynx, covered by a grayish-white pellicle. It heals in ten or twelve days without leaving any trace. [“Rev. de laryng., d’otol., et de rhin.,” Oct. 15, 1891, p. 625 (a, 50).]—**Malignant u.** U. due to cancer. [E.]—**Puerperal u.** U. of the genitals, consequent on puerperal traumatism, of a malignant character, usually accompanied by great oedema of the labia majora. [a, 24.]—**Syriac u.** See *Malignant ANGINA.*—**Tubercular u. of the larynx.** See *Tubercular LARYNGITIS.*

**ULCERATIVE**, adj. U<sup>l</sup>s/u<sup>r</sup>-at-iv. Lat., *exulcerans, ulcerosus, ulcerativus*. Fr., *ulcératif, ulcéreux*. Ger., *geschwürig*. Pertaining to or characterized by ulceration.

**ULCÈRE** (Fr.), n. U<sup>l</sup>-se<sup>r</sup>. See *ULCER.*—**U. annamite.** See *Cochin-China ULCER.*—**U. cancéreux.** See *LUPUS.*—**U. chancreux.** An ulcerating chancre. [G.]—**U. chancello-syphilitique.** See *Mixed CHANCRE.*—**U. de Cochin-Chine.** See *Cochin-China ULCER.*—**U. contagieux de Mozambique.** A single, rarely double, ulcer secreting an abundant foetid, sero-sanious matter that is highly contagious. It presents some resemblance to pian. It occurs in Réunion Island. [A, 301 (a, 34).]—**U. de la baie.** An endemic ulcer observed in the Bay of Honduras. [A, 301 (a, 34).]—**U. de Penjé, U. d’Orient.** See *Aleppo BOIL.*—**U. de Saigon.** See *Cochin-China ULCER.*—**U. épidermique.** See *LUPUS.*—**U. malin.** A malignant or phagedenic ulcer. [a, 34.]—**U. onco-phagédénique.** Of Ricord, a simple chancre that becomes inflamed and gangrenous in consequence of the abuse of alcoholic liquors. [A, 301 (a, 34).]—**U. papillaire, U. papilliforme.** An ulcer with papillary granulations.—**U. perforant.** See *MALUM perforans pedis.*—**U. pianiforme.** See *U. contagieux de Mozambique.*—**U. pointillé.** One of the small corneal ulcerations observed in keratitis. [A, 301 (a, 34).]—**U. syriac.** See *Malignant ANGINA.*

**ULCÉROÏDE** (Fr.), adj. U<sup>l</sup>-sa-ro-ed. Having the appearance of an ulcer. [a, 48.]

**ULCEROUS**, adj. U<sup>l</sup>s/u<sup>r</sup>-u<sup>s</sup>. Gr., *ἑλκώδης*. Lat., *ulcerosus*. Fr., *ulcéreux*. Ger., *ulcerös, geschwürartig*. 1. Having the character of an ulcer. 2. Affected with ulcers. [E.]

**ULCUS** (Lat.), n. n. U<sup>l</sup>sk(u<sup>l</sup>sk)u<sup>s</sup>(u<sup>s</sup>). Gen., *ulc’eria*. See *ULCER.*—**U. abambulans.** See *Phagedenic ULCER.*—**U. achilleum.** Ger., *achilleisches Geschwür*. A malignant, obstinate ulcer. [A,

305.]—**U. adenosum.** An ulcer involving a gland. [a, 34.]—**Ulcera aluminosa.** Of Paracelsus, ulcers preceded by swelling without heat and erosion, and readily undergoing resolution, but afterward discharging a foetid fluid. Alum was said to cure them, but sometimes accidentally to produce them. [H.]—**U. ambulativum.** A serpinous ulcer, especially a serpinous chancre. [G.]—**U. aperistaton.** A simple u. [a, 34.]—**U. aphthosum.** An ulcer caused by aphthous inflammation. [a, 34.]—**U. araneum.** Of Paracelsus, a gangrenous ulcer. [D, 90.]—**Ulcera arsenicalia.** See *Ulcera realgarina.*—**U. arthriticum.** A cutaneous ulcer caused by the irritation of an arthritic concrement. [a, 34.]—**U. artificiale.** An issue. [a, 34.]—**U. cacoethes.** A malignant u. [G.]—**U. callosum.** See *Indurated ULCER.*—**U. canerosum.** See *CHANCRE* (2d def.).—**U. canerosum fungosum.** See *CANCER verrucosum.*—**U. canerosum vulgare.** The common form of ulcerating chancre. [G.]—**Ulcera capitis manantia.** An old term for impetiginous eczema of the scalp. [G.]—**U. carcinomatousum.** A cancerous ulcer. [a, 34.]—**U. catarrhale.** An ulcer of the mucous membrane caused by acute or chronic catarrh. [a, 34.]—**U. chronicum cruris.** A chronic ulcer of the leg, usually varicose. [a, 34.]—**U. clysmaticum.** A roundish u. caused by the pressure of the point of a syringe used for rectal injections. [L, 57 (a, 50).]—**U. colpodēs.** See *U. sinuosum.*—**U. complicatum.** An ulcer complicated by some disease or dyscrasia. [a, 34.]—**U. condylomatousum.** See *Cock’s comb ULCER.*—**U. corneæ serpēs.** 1. An u. beginning as such in the cornea and extending deeply into the corneal tissue. It is further characterized by a tendency to spread superficially in a certain definite direction. It usually appears in the centre of the cornea as a circular u. surrounded by a zone of gray infiltration, and its progress is rapid in the direction of slough and perforation. [F.] 2. See *HYPOPYON KERATITIS.*—**U. corrodens Clarkii.** A phagedenic ulcer of the vagina. [A, 326 (a, 34).]—**U. corrosivum.** See *Perforating ULCER of the stomach.*—**U. cum callositate** (seu *duritie*, seu *duritie callosa*). See *Indurated CHANCRE.*—**U. depascens.** See *Phagedenic ULCER.*—**U. diphthericum.** An ulcer caused by diphtheria. [a, 34.]—**U. durum.** See *SYPHILITIC CHANCRE.*—**U. dysentericum.** An intestinal ulcer caused by dysentery. [a, 34.]—**U. eczematousum.** An ulcer caused by eczema. [a, 34.]—**U. elevatum.** 1. Simple chancre when attended with exuberant granulations that rise above the surrounding surface. [G.] 2. See *Raised indurated CHANCRE.*—**U. erethicum.** See *Irritable ULCER.*—**U. ex digestionē.** See *Peptic ULCER.*—**U. ferinum.** See *Phagedenic ULCER.*—**U. fistulosum.** See *FISTULOUS ULCER.*—**U. granulosum.** An ulcer covered with a granular surface.—**U. grave.** See *MADURA FOOT.*—**U. hæmorrhoidale.** See *HÆMORRHOIDOMA.*—**U. herpetica.** See *LUPUS* (2d def.).—**U. hypersthenicum.** See *Irritable ULCER.*—**U. hypertrophicum.** See *U. elevatum.*—**U. impetiginosum.** An ulcer accompanied by impetigo. [a, 34.]—**U. induratum.** See *Indurated CHANCRE.*—**U. inflammatorium.** See *Simple CHANCRE.*—**U. lentacular.** A lenticular ulcer, usually of tubercular origin. [a, 34.]—**U. leprosum.** Ulceration due to leprosy. [a, 34.]—**U. molle.** See *Simple CHANCRE.*—**U. narium fœtens.** See *OZENA.*—**U. neuroparalyticum.** An ulcer caused by paralysis of a nerve. [a, 34.]—**Ulcera nitri** [Paracelsus]. Scrofulous ulcerations. [H.]—**U. perforans.** See *Perforating u. of the stomach.*—**U. profundus.** See *Sloughing PHAGEDENA.*—**U. puerperale.** An ulcer of the genital tract occurring during the puerperium. [a, 34.]—**U. pulmonum.** Ger., *Lungengeschwür*. A pulmonary abscess. [a, 34.]—**Ulcera realgarina.** Of Paracelsus, malignant ulcers, supposed to be due to the action of realgar.—**U. rodens.** See *Rodent ULCER.*—**U. rodens urethræ.** Of Landau, an ulcer of the urethra in women, probably of syphilitic origin, attacking, step by step, the walls of the urethra and spreading from the meatus, where it takes its origin. [a, 34.]—**U. rotundum.** A round ulcer, usually of the stomach. [a, 34.]—**Ulcera salis communis.** Of Paracelsus, ulcers attributed to the corruption of the common salt in the body. They are at first moist, then dry up, are rather painful, but have no heat. [H.]—**U. serpēs.** See *Serpiginous ULCER.*—**U. simplex (venereum).** See *Simple CHANCRE.*—**U. sinuosum.** Ulceration of a sinuous or tortuous character; lupus serpinosus. [G.]—**U. sordidum.** A foul ulcer, especially a chancre. [G.]—**U. sphaculosum.** A gangrenous ulcer. [a, 34.]—**U. spongiosum.** See *Fungous ULCER.*—**U. syphiliticum.** See *SYPHILITIC ULCER.*—**U. syphiliticum conjunctivæ.** Either a chancre or the ulcerated surface of a broken-down gumma or tubercular syphilide. In either case the u. usually occurs on the palpebral conjunctiva near the edge of the lid, though it may extend to the cul-de-sac and involve the ocular conjunctiva. [F.]—**U. syringodes.** See *FISTULOUS ULCER.*—**U. telephium.** See *TELEPHIUM* (1st def.).—**U. tuberculosum.** See *Tubercular ULCER.*—**U. typhosum.** One of the intestinal ulcers characteristic of typhoid fever.—**Ulcera urinosa** (seu *urodialytica*). Ulcers attributed to suppressed or irregular urinary excretion. [G.] Cf. *URELCOIS.*—**Ulcera variolosa.** Small flat ulcers seen in various oöphagitis. [L, 57 (a, 50).]—**U. venereum.** See *CHANCRE* (2d def.).—**U. ventriculi chronicum.** A chronic gastric ulcer. [a, 34.]—**U. ventriculi rotundum.** See *Perforating ULCER of the stomach.*—**U. virgæ.** See *CHANCRE* (2d def.).

**ULCUSCULUM** (U<sup>l</sup>), n. n. U<sup>l</sup>sk(u<sup>l</sup>sk)u<sup>s</sup>(u<sup>s</sup>)u<sup>l</sup>(u<sup>l</sup>)u<sup>s</sup>m(u<sup>m</sup>). Dim. of *ulcus* (q. v.). A little ulcer. [G.]—**U. canerosum.** See *CHANCRE* (2d def.).

**ULE** (Lat.), n. f. U<sup>l</sup>(ul)/e(a). Gen., *ul’es*. Gr., *ὤλη*. See *CICATRIX*.

**ULERYTHEMA** (Lat.), n. n. U<sup>l</sup>(ul)-e<sup>r</sup>-i<sup>2</sup>(u<sup>l</sup>)-the(th)a/ma<sup>2</sup>. Gen., *em’atos (-atis)*. From *ὤλη*, a scar, and *ἐρύθημα*, erythema. Of Unna, an inflammatory condition of the skin in which a persistent erythema tends to produce atrophy or cicatrization of the skin without ulceration. [G.]—**U. acneiformis.** Of Unna, a rare skin disease that affects the face and the ears. It is limited to the circumference of a certain number of hair follicles and begins with a permanent erythema and hyperkeratosis accompanied by the

production of comedones and terminating in atrophy of the skin. [a, 34.]—**U. centrifugum**. Of Unna, see *Lupus erythematosus*.—**U. ophryogenes**. Of Taenzer, an inflammatory disease, usually beginning in infancy, affecting especially the region of the eyebrows, and attended with persistent erythema, permanent alopecia, and atrophy of the skin. It is said to be a form of folliculitis decalvans. [G.]—**U. sycosiforme** [Unna]. Lupoid syphilis of Milton, usually affecting the region of the beard, resembling syphilis but attended with the formation of scars. It begins at the upper part of the whiskers, traveling slowly downward with a narrow erythematous margin and marked infiltration, and is followed by cicatricial atrophy and destruction of the hair follicles. [G.] Cf. *FOLLICULITIS decalvans*.

**ULETIC**, adj.  $U^1l^e\text{-}e^2i^2k$ . Lat., *uleticus*. Pertaining to the gums. [L, 50 (a, 14).]

**ULEX** (Lat.), n. m.  $U^1(ul)^e\text{-}x$ . Gen., *ulicis*. Fr., *ajonc*. Ger., *Hecksame*. Furze; a genus of leguminous shrubs. The *Ulicineae* are a division of the *Genisteae*. [a, 35.]—**U. compositus**, **U. europaeus**, **U. grandiflorus**. Fr., *ajonc (marin)*, *ajonc bruse*, *genêt épineux*, *lande (épineuse)*, *landier*, *sainfoin d'Espagne* (ou *d'hiver*), *vigneau*. Common (or French) furze, gorse, thorn-broom, whin; a fodder plant of middle and southern Europe, the Azores, and the Canaries. The seeds contain ulexine. [a, 35.]—**U. minor**, **U. nanus**, **U. parviflorus**. Fr., *ajonc nain*, *petit landier*. Dwarf furze, cat-whin; a forage species. [a, 35.]—**U. provincialis**. Fr., *airelle de Provence*. Provence furze. It probably has the properties of *U. europaeus*. [a, 35.]

**ULEXINE**, n.  $U^1l^e\text{-}x^2en$ . An alkaloid,  $C_{11}H_{14}N_2O$ , obtained from the seeds of *Ulex europaeus*; bitter, colorless crystals. It acts as a stimulant and then a depressor of respiration, and in large doses causes increased excitability of the peripheral nerves, with quivering movements or convulsions, followed by sleepiness and paralysis. It increases the blood-pressure and acts as a diuretic. [B, 270 (a, 38); "Am. Jour. of Pharm.," Sept., 1890, p. 454.]

**ULICUS** (Lat.), adj.  $U^1(ul)^i\text{-}k^2\text{-}u^2s(u^2s)$ . See **ULETIC**.

**ULIGINOSUS**, adj.  $U^1l^i\text{-}j^2i^2n\text{-}os$ . Lat., *uliginosus*, *uliginarius* (from *uligo*, moisture). Fr., *uliginaire*, *uligineux*. 1. Marshy. 2. Growing or living in marshy places. [a, 35.]

**ULITIS** (Lat.), n. f.  $U^1(ul)^i\text{-}(e)^2ti^2s$ . From *ὤλον*, the gum. Fr., *ulite*. Inflammation of the gums. [E.]—**Aphthous u.** U. associated with aphthae. [a, 34.]—**Fungous u.** U. in which the gums present a fungous appearance, as in scurvy. [a, 34.]—**Mercurial u.** U. caused by mercurialism. [a, 34.]—**Parenchymatous u.** Inflammation of the parenchyma of the gums. [a, 34.]—**Scurbitic u.** U. caused by scurvy. [a, 34.]—**Ulcerative u.** U. with ulceration. [a, 34.]

**ULLEM**, n. A species of pyrosis endemic in Lapland, attributed to the use of reindeer milk and smoked meat. [L, 41 (a, 14).]

**ULLERSDORF** (Ger.), n.  $U^1l^e\text{-}rs\text{-}do^2rf$ . A place in Moravia, Austria, where there are alkaline, saline, and sulphurous springs. [L, 80, 49, 57 (a, 14).]

**ULMACEOUS**, adj.  $U^1l^e\text{-}ma^2shu^2s$ . Resembling the genus *Ulmus* or belonging to the *Ulmaceae*, a family of apetalous dicotyledons included by Bentham and Hooker in the *Urticaceae*. [a, 35.]

**ULMAIRE** (Fr.), n.  $U^1l^e\text{-}ma^2r$ . See *Flores SPIRAEAE*.

**ULMAL**, adj.  $U^1l^e\text{-}m^2l$ . Lat., *ulmalis*. Pertaining to the *Ulmales*, Lindley's u. alliance (*nixus ulmalis*) of the *Rectembryae*, including the *Ulmaceae*. [a, 35.]

**ULMARIA** (Lat.), n. f.  $U^1(ul)^i\text{-}ma^2ma^2ri^2a^2s$ . The genus *Spiraea*; also an old official name for *Spiraea u.* The *Ulmariæ* are a section of the *Rosaceae*; the *Ulmariæ* are a subtribe of the *Spiraeaceae*. [a, 35.]—**Flores ulmariae**. Ger., *Geissbartblumen*. The flowers of *Spiraea u.* [a, 35.]

**ULMARIC ACID, ULMARINE**, n's.  $U^1l^e\text{-}ma^2r^2i^2k$ ,  $u^1l^e\text{-}ma^2r\text{-}en$ . Fr., *acide ulmarique*. See *SALICYL aldehyde*.

**ULMIC ACID**, n.  $U^1l^e\text{-}mi^2k$ . Fr., *acide ulmique*. Ger., *Ulmisäure*. An acid found in brown peat, apparently identical with humic acid. Its existence does not seem fully established. [B, 2; B, 270 (a, 38).]

**ULMIN**, n.  $U^1l^e\text{-}mi^2n$ . See **HUMUS**.

**ULMUS** (Lat.), n. f.  $U^1(ul)^i\text{-}rau^2s(mu^2s)$ . Fr., *orme* (1st def.). Ger., *Ulm* (1st def.), *Rüster* (1st def.). 1. The elm; the typical genus of the *Ulmaceae*. [a, 35.] 2. Of the U. S. Ph., see **ELM-bark**.

—**Decoctum ulmi** [Br. Ph.]. Fr., *décocté d'orme*. Ger., *Ulmensindecoct*. A preparation made by boiling 2½ oz. of elm-bark with 1 pint of distilled water, straining, and washing the residue with water enough to make 1 part. [B; B, 95, 119 (a, 38).]—**Extractum ulmi** [Fr. Cod.]. See *Extrait d'écorce d'orme*.—**Mucilago ulmi** [U. S. Ph.]. A preparation made by macerating 6 parts of elm-bark in 100 of boiling water. [B.]—**Ulm cortex (interior)**. See **ELM-bark**.—**U. alata**. Wahoo (elm) of the southern United States, winged (or American small-leaved) elm. The inner bark is used like that of *U. fulva*. [a, 35.]—**U. americana**. American white elm. The inner bark is used like that of *U. fulva* and as a hemostatic. [a, 35.]—**U. campestris**. Fr., *orme champêtre* (ou *blanc*, ou *des champs*, ou *pyramidal* [Fr. Cod.]), *orneau*, *ormille*, *umeau*, *arbre à puerre homme*. Ger., *Feldrüster*, *gemeine Ulme*, *Weissrüster*. Common European (or English) elm, probably the *Ulmus* of Dioscorides (the bark of which was used as an astringent), indigenous to southern Europe and temperate Asia. The bark (see **ELM-bark**) is mucilaginous and slightly astringent, and was formerly used as an antiscorbutic. [a, 35.]—**U. effusa**. Fr., *orme pédonculé*. Ger., *wimperfrüchtige Ulme* (oder *Rüster*), *schwarze Rüster*. Lindblust, Traubenrüster, Bastulme, Flatterrüster. Spreading-flowered elm of Europe. It has the properties of *U. campestris*. [a, 35.]—**U. fulva**. Fr., *orme fauve* (ou *rouge*). Ger., *schleimige Ulme*. Slippery (or red, or moose-) elm; abundant west of the Alleghany Mountains. The leaves are thicker, larger, and rougher than those

of *U. americana*. The mucilaginous, demulcent inner bark is the u. of the U. S. Ph. It has the property of preserving fats from rancidity. [a, 35.]—**U. integrifolia**. Indian elm. The wood, boiled in water, is used to flavor arrack. [a, 35.]—**U. montana**. Witch- (or wych-) elm (or hazel), mountain- (or Scotch) elm; a species growing wild in northern England and Norway. [a, 35.]—**U. racemosa**. Rock- (or white, or cork-) elm; found from New Hampshire to New York and westward. It is used internally as a hemostatic. [a, 35.]

**ULNA** (Lat.), n. f.  $U^1l^e\text{-}(u^1l)^i\text{-}na^2$ . Gr., *ὀλένη*, *πῆχυς* [Galen]. Fr., *u.* Ger., *Ellenbogenknochen*. A long bone on the inner side of the forearm. It articulates above with the humerus by the greater sigmoid cavity, with the head of the radius by the lesser sigmoid cavity, and below with the radius by an articular eminence. [L.]

**ULNAD**, adv.  $U^1l^e\text{-}na^2d$ . Toward the ulnar aspect. [L, 141.]

**ULNAR**, adj.  $U^1l^e\text{-}na^2r$ . Lat., *ulnaris*. Fr., *ulnaire*. Pertaining to or connected with the ulna. [L, 343.]

**ULNARIS** (Lat.), adj.  $U^1l^e\text{-}(u^1l)^i\text{-}nar(na^2r)^2s$ . **Ulnar**; as a n. m., a muscle connected with the ulna. [a, 48.]—**U. anterior**. See **EPITROCHLEO-SUPERCARPEUS**.—**U. externus**. See **EXTENSOR carpi u.**—**U. externus brevis**. An anomalous muscle arising from the lower fourth of the ulna and the intermuscular septa of the forearm, and inserted into the bases of the fourth and fifth metacarpal bones and the tendon of the ulnaris externus. [Gruber (L).]—**U. gracilis**. See **PALMARIS longus**.—**U. internus**. See **FLEXOR carpi ulnaris**.—**U. internus brevis**. See **FLEXOR carpi ulnaris brevis**.—**U. lähmung** (Ger.). Paralysis of the ulnar nerve. [a, 34.]—**U. posterior**. See **EPICONDYLO-SUPERCARPEUS**.—**U. quinti**. An accessory bundle of the extensor carpi u. running to the little finger. [L, 332.]

**ULOCACE** (Lat.), n. f.  $U^1l^e\text{-}(u^1l)^i\text{-}o^2k^2a^2s(a^2k^2)\text{-}e(a)$ . Gen., *-ocaces*. From *ὤλον*, the gum, and *κακός*, evil. See **ULCERATIVE** **ULITIS**.

**ULOCARCINOMA** (Lat.), n. n.  $U^1l^e\text{-}(u^1l)^i\text{-}o^2k^2a^2r\text{-}si^2n(ki^2n)\text{-}om^2a^2s$ . Gen., *-omatos (-atis)*. For deriv., see **ULON** and **CARCINOMA**. Fr., *ulocarcinome*. Ger., *Zahnhöhlenkrebs*. Carcinoma of the gums. [L, 50 (a, 14).]

**ULON** (Lat.), n. n.  $U^1l^e\text{-}(u^1l)^i\text{-}o^2n$ . Gr., *ὤλον*. The gum. [a, 48.]

**ULONCUS** (Lat.), n. m.  $U^1l^e\text{-}(u^1l)^i\text{-}o^2n^2k^2u^2s(u^2s)$ . From *ὤλον*, the gum, and *ὄγκος*, a tumor. Fr., *uloncie*. Ger., *Zahnfleischgeschwulst*. A tumor of the gum. [a, 34.]

**ULORRHAGIA** (Lat.), **ULORRHŒA** (Lat.), n's f.  $U^1l^e\text{-}(u^1l)^i\text{-}o^2r\text{-}ra^2j(rag)^2i^2a^2$ . From *ὤλον*, the gum, and *ῥήγνυσθαι*, to burst forth, or *ῥέειν*, to flow. Fr., *ulorrhagie*, *ulorrhée*. Ger., *Zahnfleischblutung*. Hemorrhage from the gums. [L, 50 (a, 14).]

**ULOSIS** (Lat.), n. f.  $U^1l^e\text{-}(u^1l)^i\text{-}os^2i^2s$ . Gen., *-os'eos (-is)*. From *ὤλη*, a scar. Fr., *ulose*. See **CICATRIZATION**.

**ULOTIC**, adj.  $U^1l^e\text{-}o^2t^2i^2k$ . From *ὤλη*, a scar. Cicatrissant, vulnerary. [L, 50 (a, 14).]

**ULOTRICHOUS**, adj.  $U^1l^e\text{-}o^2t^2ri^2k\text{-}u^2s$ . From *ὤλος*, curly, and *τρίχης*, hair. Having crisp or wooly hair. The *Ulotrichi* (Fr., *ulotriches*; Ger., *Kraushaarige*) are a group of races so characterized, including the negroes, Hottentots, etc. [L, 12, 41, 50.] Cf. **LEIOTRICHOUS**.

**ULTIMATE**, adj.  $U^1l^e\text{-}i^2m\text{-}at$ . Lat., *ultimus* (superl. of *ulter*, that is beyond). The most remote or elementary as distinguished from the immediate. [B.] Cf. **PROXIMATE**.

**ULTIMUM MORIENS** (Lat.), n. n.  $U^1l^e\text{-}(u^1l)^i\text{-}i^2m\text{-}u^2m(u^4m)\text{-}mor(mor)^2i^2e\text{-}nz(ans)$ . Lit., that which dies last; the auricular appendix of the right auricle, which is the last to contract after the cessation of the heart-beat. [K.]

**ULTRA-BRACHYCEPHALIC**, adj.  $U^1l^e\text{-}ra^2-brach^2k^2i^2-se^2f\text{-}a^2l^2i^2k$ . From *ultra*, beyond *βραχύς*, short, and *κεφαλή*, the head. Having the cephalic index 90° or more. [L, 150 (a, 48).]

**ULTRA-DOLICHOCEPHALIC**, adj.  $U^1l^e\text{-}ra^2-do^2l^2i^2k^2o\text{-}se^2f\text{-}a^2l^2i^2k$ . From *ultra*, beyond, *δολιχός*, long, and *κεφαλή*, the head. Having the cephalic index 64° or less. [L, 150 (a, 48).]

**ULTRAMARINE**, n.  $U^1l^e\text{-}ra^2-ma^2r\text{-}en$ . From *ultra*, beyond, and *mare*, the sea. A blue pigment formerly obtained from lapis lazuli and now artificially prepared by roasting a mixture of fine white clay, sodium carbonate, sulphur, and charcoal or rosin. [B, 8 (a, 27).]—**Cobalt u.** See **Thénard's BLUE**.—**Yellow u.** See **Barium chromate**.

**ULTRAMICROSCOPIC**, adj.  $U^1l^e\text{-}ra^2-mi^2k^2o\text{-}sko^2p^2i^2k$ . From *ultra*, beyond, and *microscopic* (q. v.). Too small to be seen with a microscope. [L.]

**ULTRAQUININE**, n.  $U^1l^e\text{-}ra^2-kwi^2n^2en$ . Homoquinine. [B.]

**ULULATION**, n.  $U^1l^e\text{-}u^1l^i\text{-}a^2shu^2n$ . Lat., *ululatio* (from *ululare*, to howl). A howling or loud crying observed in hysteria. [a, 34.]

**ULVA** (Lat.), n. f.  $U^1l^e\text{-}(u^1l)^i\text{-}va^2$ . Fr., *u.*, *ulve*. Ger., *Schlauchfaden*. A genus of the *Ulveae* (Fr., *ulvées*; Ger., *Ulven*), which are a division of the *Algae*. The *Ulveae* are a tribe of the *Ulveae*. [a, 35.]—**U. lactuca**. Fr., *u. laitue*, *laitue de mer*. Ger., *Meerlattich*. Oyster-green, sea-lettuce, shoke, the *βρύον* of Theophrastus, the *βρύον θαλάσσιον* of Dioscorides; an edible species, used as a refrigerant in inflammations, headache, etc., and, on account of the iodine it contains, in scrofula. [a, 35.]

THE ULNA.

**UMÄNDERUNG** (Ger.), n. Um'and-e-r-un<sup>3</sup>. See **MUTATION**.

**UMBELL**, n. U'mb'e'l. Lat., *umbella* (dim. of *umbra*, a shadow). Fr., *ombelle*. Ger., *Dolde*, *Schirm*. 1. An indeterminate inflorescence consisting of several pedicels of nearly equal length radiating from the same point, like the rays of an umbrella. 2. The *Cypripedium pubescens*. [a, 35.]—**Compound u.** An u. in which the rays (primary pedicels) are themselves terminated by u's. [a, 35.]—**Cymose u.** A trichotomous (or polychotomous) cyme. [a, 35.]—**General u.** An u. formed by the branching of the primary axis. [a, 35.] Cf. **UMBELLULE**.—**Partial u.** See **UMBELLULE**.—**Simple u.** An u. in which the pedicels are not terminated by secondary u's. [a, 35.]

**UMBELLAL**, adj. U'm'be'l-ā. Lat., *umbellalis*. Pertaining to the *Umbellales*, which are: (1) Of Lindley, the u. alliance (Lat., *nizus umbellalis*) of the *Albuminosae*, consisting of the *Umbelliferae* and *Araliaceae*; (2) of Bentham and Hooker, a cohort of the *Calciflorae* consisting of the *Umbelliferae*, *Araliaceae*, and *Cornaceae*. [a, 35.]

**UMBELLATE**, adj. U'm'be'l-āt. Lat., *umbellatus*. Fr., *ombellé*. Ger., *doldig*. Forming or arranged in an umbel; bearing umbels. The *Umbellatæ* or *Umbellati* of Linnaeus are the *Umbelliferae*. [a, 35.]

**UMBELLIC ACID**, n. U'm'be'l-i'k. Fr., *acide ombellique*. Ger., *Umbellinsäure*. 1. Of Persoz, anisic acid. 2. An acid,  $C_6H_4O_4 = C_6[OH.H.OH.CH : CH.CO.OH.H.H.]$ , occurring as a yellowish powder. [B, 3 (a, 38).]

**UMBELLIFERON**, n. U'm'b-e'l-i'f'e'r-o'n. An oily alkaline substance,  $C_9H_{10}O_2 = C_9[OH.H.H.CH : CH.O.CO.H.]$ , obtained from the ethereal extracts of certain umbelliferous plants. [B, 3, 270 (a, 38).] Cf. **HYDROXYCOUMARIN**.

**UMBELLIFEROUS**, adj. U'm'b-e'l-i'f'e'r-u's. Lat., *umbellifer* (from *umbella*, an umbel, and *ferre*, to bear). Fr., *ombellifère*. Ger., *doldentragend*, *schirmtragend*. Bearing umbels. The *Umbelliferae* (Fr., *ombellifères*; Ger., *Doldengewächse*) are the umbellifers, an order of the *Umbellales* consisting of herbs, or more rarely shrubs or trees, with small flowers in umbels. The petals are usually imbricate in aestivation, the ovary is 2-celled, and the fruit (cremocarp) separates into 2 dry one-seeded carpels (mericarps), which are provided with raised longitudinal ribs and tubular receptacles (vittæ) containing essential oil. It is from the arrangement of these ribs and vittæ and from the shape of the inclosed albumen that the characters are derived distinguishing the numerous genera (*Apium*, *Carum*, *Cicuta*, *Conium*, *Chærophylum*, *Daucus*, *Ferula*, *Galbanum*, *Peucedanum*, *Sanicula*, *Seseli*, *Thapsia*, etc.). They often contain, besides essential oil and resinous matter, a bitter or astringent and tonic principle, and in some cases acid poisonous alkaloids. [a, 35.]

**UMBELLIFLOUS**, adj. U'm'b-e'l-i'f-lo'r-u's. From *umbella*, an umbel, and *flos*, a flower. Fr., *ombelliflore*. Ger., *doldenblühig*. Having the flowers in umbels. The *Umbellifloræ* are: Of Bartling, a class of the *Gymnoblasi* consisting of the *Umbelliferae*, *Araliaceae*, *Hederaceae*, and *Hamamelidæ*; of Spach, a class of dicotyledons consisting of the *Hamamelidæ*, *Cornaceae*, *Araliaceae*, and *Umbelliferae*. [a, 35.]

**UMBELLIFORM**, adj. U'm'be'l-i'f-o'r-m. Lat., *umbelliformis* (from *umbella*, an umbel, and *forma*, shape. Ger., *doldenformig*). In the form of an umbel. [a, 35.]

**UMBELLULARIA** (Lat.), n. f. U'm'b(u'm'b)-e'l-lu'l(i'u'l)-a-(a)<sup>3</sup>ri<sup>2</sup>-a<sup>3</sup>. From *umbellula*, a little umbel. A genus of the *Laurineæ*. [a, 35.]—*U. californica*. Bay- (or sassafras-) laurel of California and Oregon; an evergreen with a strong spicy odor. The leaves are used as a condiment and as an excitant to the circulation, and the pungent, volatile oil contained in them is recommended for inhalation in nasal catarrh and nervous headache. [a, 35.]

**UMBELLULE**, n. U'm'b'e'l-u'l. Fr., *ombellule*. Ger., *Döldchen*, *Schirmchen*. A partial umbel; an ultimate umbel in a compound umbel. [a, 35.]

**UMBIEGUNGSKANTE** (Ger.), n. Um-beg'u'nz-ka'nt-e<sup>2</sup>. The margin of that portion of the cerebellum which forms a part of the roof of the fourth ventricle. [I, 17 (K).]

**UMBILDUNG** (Ger.), n. Um'bi'l'd-un<sup>3</sup>. See **TRANSFORMATION**, **METAPLASIA**, and **ANAMORPHOSIS**.

**UMBILICAL**, adj. U'm'b-i'l-i'q-k'l. Lat., *umbilicalis* (from *umbilicus*, the navel). Fr., *ombilical*. Ger., *nabelartig*. Pertaining to the umbilicus. [C.]

**UMBILICATE**, **UMBILICATED**, adj's. U'm'b-i'l-i'q-k-at-, -at-e<sup>2</sup>d. Lat., *umbilicatus* (from *umbilicus*, the navel). Fr., *ombiliqué*. Ger., *genabelt*. Provided with an umbilicus or with a central depression. [a, 35.]

**UMBILICATION**, n. U'm'b-i'l-i'q-k-a'sh'u'n. From *umbilicatus*, navel-shaped. Fr., *ombilication*. A condition in which there is a central depression resembling the navel, as in variolous and vaccinal pocks. [a, 34.]

**UMBILICUS** (Lat.), n. m. U'm'b(u'm'b)-i'l-i'k(ek)'u's(u's). Fr., *ombilic*, *nombril* (1st def.), *cicatrice ombilicale* (1st def.). Ger., *Nabel*, *Körperrnabel* (1st def.). 1. The navel; the depression caused by the contraction of the remains of the umbilical cord. 2. Any depression in the centre of an organ. Cf. **HILUM** (1st def.). 3. A section of the genus *Cotyledon*. [a, 35.]—**Folia umbilicæ** (*Veneris*). The herb of *Cotyledon u.* [a, 35.]—**Posterior u.** A depression or sinus in the spinal region, due to defective closure of the two borders of the vertebral groove.—**U. Veneris**. The *Cotyledon u.* [a, 35.]

**UMBO** (Lat.), n. U'm'b(u'm'b)-o. Fr., *mamelon* (3d def.). Ger., *Stippe*, *Buckel* (3d def.). Lit., a boss (as of a shield). 1. In dermatology, see **STIGMA** (2d def.). 2. In botany, a protuberance with a

projecting point at its centre. [a, 35.] 3. See *U. tympani*.—**U. femoris**. See *Fossa capitis femoris*.—**U. (membrane) tympani**. The deepest part of the funnel-shaped curvature or concavity of the membrana tympani which is turned toward the external auditory canal. It corresponds with the inferior extremity of the handle of the malleus, by the traction of which inward the membrane appears hollowed out. [F, 32.]

**UMBONATE**, adj. U'm'b-on-āt. Lat., *umbonatus* (from *umbo*, a boss). Ger., *gebuckelt*. Provided with an umbo. [a, 35.]

**UMBONULATE**, adj. U'm'b-on-u'l-āt. From *umbo*, a boss. Ger., *kleinbuckelig*. Provided with a small umbo or nipple. [a, 35.]

**UMBRACULIFORM**, adj. U'm'b-ra'k-u'l-i'f-o'r-m. Lat., *umbraculiformis* (from *umbraculum*, a little shade, and *forma*, form). Like an umbrella in shape. [a, 35.]

**UMBRASCOPI**, n. U'm'b-ra'sk'op-i<sup>2</sup>. From *umbra*, a shadow, and *σκοπεῖν*, to examine. Fr., *umbrascopie*. Ger., *Umbraskopie*. See **RETINOSCOPI** (2d def.).

**UMBROSE**, adj. U'm'b'ros. Lat., *umbrosus* (from *umbra*, shade). Fr., *ombreux*. Ger., *schattig*. 1. Shady. 2. Growing in shady places. [a, 35.]

**UMDREHER** (Ger.), n. Um'dra-e-r. See **ROTATOR**.

**UMDREHUNG** (Ger.), n. Um'dra-un<sup>2</sup>. Rotation, torsion. [L, 30 (a, 14).]

**UMGESTALTUNG** (Ger.), n. Um'ge'st-a't-un<sup>2</sup>. See **METAMORPHOSIS**—**Krankheitsu.** See **METASCHEMATISM**.

**UMHÜLLUNG** (Ger.), n. Um-hu'ŷ-lun<sup>2</sup>. An envelope or covering. [a, 14.]—**U'en des Eies**. The investing membranes of the ovum.—**U'shaut**. An investing membrane; in embryology, the vitelline membrane. [A, 317.]

**UMKEHRUNG** (Ger.), n. Um'kar-un<sup>2</sup>. See **INVERSION**.

**UMLAUF** (Ger.), n. Um'la'z-uf. 1. See **CIRCULATION**. 2. See **PARONYCHIA** (1st def.).—**Feuriger U.** See **HERPES zoster**.

**UMLEGUNG** (Ger.), n. Um'lag-un<sup>2</sup>. See **ECTROPION**.

**UMSATZ** (Ger.), n. Um'za'ts. Exchange. [a, 48.]—**Stoffu.** Tissue-change. [K, 16.]

**UMSCHLAG** (Ger.), n. Um'shla'g. 1. An external application, such as a plaster, poultice, fomentation, or wet compress. [E, a, 48.] 2. See **PERIDIUM**.—**Schnur**. 1. A head bandage. 2. A cataplasn for the head. [E.]

**UMSCHNÜRUNG** (Ger.), n. Um-shnu'r-un<sup>2</sup>. Ligation, snaring. [A, 521 (a, 48).]

**UMSETZUNG** (Ger.), n. Um'ze'ts-un<sup>2</sup>. See **METASTASIS**.

**UMSTALTUNG** (Ger.), n. Um'st-a't-un<sup>2</sup>. See **METAMORPHOSIS**.

**UMSTECHUNG** (Ger.), n. Um-ste'ch'z-un<sup>2</sup>. The insertion of a suture to inclose a bleeding point. [E.]

**UMSTÜLPUNG** (Ger.), n. Um'stu'lp-un<sup>2</sup>. An inversion (as of the uterus). Cf. **EINSTÜLPUNG**.

**UMWANDELN** (Ger.), **UMWANDLUNG** (Ger.), n's. Um'-va'nd-e'ln-, -va'nd-lun<sup>2</sup>. See **TRANSFORMATION**.

**UNAHT** (Ger.), adj. Un'ach't. Spurious. [a, 35.]

**UNANUEA** (Lat.), n. f. Un-a'n-u'e-a<sup>2</sup>-a<sup>3</sup>. A genus of the *Scrophularineæ*. [a, 35.]—**U. febrifuga**. A Peruvian shrub having a febrifuge root. [a, 35.]

**UNATHEMBAR** (Ger.), adj. Un'a't-e'm-ba'r. Irrespirable.

**UNAUFLOSBAR** (Ger.), **UNAUFLOSICH** (Ger.), adj's. Un'a'-uf-lu's-ba'r-, -li'ch<sup>2</sup>. See **INSOLUBLE**.

**UNAUFSPRINGEND** (Ger.), adj. Un'a'-uf-spri'z-n<sup>2</sup>-e'nd. See **INDEHISCENT**.

**UNAUSROTTBAR** (Ger.), adj. Un'a'-u's-rot-ba'r. Ineradicable. [a, 14.]

**UNBEDECKT** (Ger.), adj. Un'be'de'kt. Uncovered. [a, 14.]

**UNBEHAART** (Ger.), adj. Un'be'ha'rt. See **GLABROUS**.

**UNBESCHNITTEN** (Ger.), adj. Un'be'shni't-te'n. 1. Uncircumcised. 2. Unpruned. [a, 14.]

**UNBESINNlichkeit** (Ger.), n. Un'be'si'z-n-li'ch<sup>2</sup>-kit. See **AMNESIA**.

**UNBEWEGlich** (Ger.), adj. Un'be'vag-li'ch<sup>2</sup>. Immobile, irreducible.

**UNBEWUSST** (Ger.), adj. Un'be'z-vust. See **UNCONSCIOUS**.

**UNBIEGSAM** (Ger.), adj. Un'beg-za'm. See **INFLEXIBLE**.

**UNBLUTIG** (Ger.), adj. Un'blut-i'g. See **BLOODLESS**.

**UNCAM**, n. Of the alchemists, mercury. [A, 325 (a, 48).]

**UNCARIA** (Lat.), n. f. U'n<sup>2</sup>ka(u'n<sup>2</sup>ka)-ar(a'r)'i<sup>2</sup>-a<sup>3</sup>. From *uncus*, a hook. Fr., *uncaire*. Ger., *Gambirsstrauch*. A genus of the *Rubiaceæ*. [a, 35.]—**Extractum uncariæ**. See **CATECHU** (2d def.).—**U. acida**. A species growing in the Malay Islands; used like *U. gambir*, of which some consider it a variety. [a, 35.]—**U. gambir**, **U. gambir**. Ger., *dichter Gambirsstrauch*. A stout climbing shrub indigenous to the countries bordering the Straits of Malacca. It yields catechu (*q. v.*, 2d def.). The detergent bitter leaves are used in apthæ and skin diseases. [a, 35.]

**UNCIA** (Lat.), n. f. U'n<sup>2</sup>s(u'n<sup>2</sup>ka)'i<sup>2</sup>-a<sup>3</sup>. Gr., *ὀνγία*, *ὀνγία*. 1. See **OUNCE**. 2. An inch.

**UNCIAL**, adj. U'n<sup>2</sup>s'i<sup>2</sup>-a<sup>2</sup>. Lat., *uncialis*. An inch long. [a, 35.]

**UNCIFORM**, adj. U'n<sup>2</sup>s'i<sup>2</sup>-fo'r-m. Lat., *unciformis* (from *uncus*, a hook, and *forma*, form). Fr., *unciforme*. Ger., *hakenförmig*. Hook-shaped, hooked. [L, 345.]

**UNCINATE**, adj. U'n<sup>2</sup>s'i<sup>2</sup>-n-at. Lat., *uncinatus* (from *uncinus*, a hook). Fr., *unciné*. Ger., *hakig*. Hooked, curved at the tip in the form of a hook; provided with hooks or bent spines. [a, 27, 35.]

—**U-setose**. Ger., *hakenborstig*. Covered with hooked bristles. [a, 35.]

**UNCINATUM** (Lat.), n. n.  $U^3ns(u^4n^2k)-i^2n(en)-at(a^2t)u^3m(u^4m)$ . From *uncinus*, a hook. See *Unciform* BONE.

**UNCINUS** (Lat.), n. m.  $U^3ns(u^4n^2k)-in(en)u^3s(u^4s)$ . From *uncus*, a hook. A hook, a barb. [A, 312 (a, 21).]—**M. attractorius**. See *CROTCHET*.

**UNCIPRESSION, UNCIPRESSURE**, n's.  $U^3ns-i^2-pre^2sh^1-u^3n, -u^3r$ . From *uncus*, a hook, and *premere*, to press. Of Van-zette, a method of hæmostasis by means of a hook inserted into the angle of a wound. [L, 87 (a, 34).]

**UNCONSCIOUS**, adj.  $U^3n-ko^2n'shu^3s$ . Fr., *inconscient*, *insensible*. Ger., *unbewusst*. Without consciousness. [D.]

**UNCTION**, n.  $U^3n^2k'shu^3n$ . Lat., *unctio* (from *ungere*, to smear). See *INUNCTION*.

**UNCTUOUS**, adj.  $U^3n^2kt'u^3-u^3s$ . Fr., *onctueux*. Ger., *fettig*, *schmierig*. Oily, greasy. [B.]

**UNCUS** (Lat.), n. m.  $U^3n^2k(u^4n^2k)-u^3s(u^4s)$ . Fr., *crochet*. Ger., *Haken*, *Hakenganglion* (3d def.). 1. A hook or hook-shaped structure. 2. The hook-shaped termination of the gyrus fornicatus. [L, 6 (K).] 3. See *Uncinate* process. 4. Of Vesalius, the olecranon. [L.]—**U. gyri fornicati**. See *U.* (2d def.).—**U. gyri hippocampi magni**. The hooked extremity of the uncinate convolution. [L, 3 (K).]

**UNDATE**, adj.  $U^3nd'at$ . See *UNDULATE*.

**UNDECYL**, n.  $U^3n/de^2s-i^2l$ . Fr., *undécyle*. See *HENDECATYL*.

**UNDECYLIC ACID**, n.  $U^3n-de^2s-i^2l/i^2k$ . See *HENDECATOIC ACID*.

**UNDERHORN**, n.  $U^3nd'u^3r-ho^2rn$ . Ger., *Unterhorn*. Of Owen, the descending horn of the lateral ventricle. [I, 14 (K).]

**UNDERSHRUB**, n.  $U^3nd'u^3r-shru^3b$ . Lat., *suffrutex*. Fr., *sous-arbrisseau*. Ger., *Halbstrauch*. A suffrutescent plant, a low shrub. [a, 35.]

**UNDER-TOE**, n.  $U^3nd'u^3r-to$ . A deformity in which one of the toes lies under the adjoining toe.

**UNDIMTA** (Lat.), n. f.  $U^3nd(u^4nd)-i^2m/i^2a$ . From *unda*, a wave. Of Paracelsus, see *EDEMA*.

**UNDULATE, UNDLATING**, adj's.  $U^3nd'u^3l-at, -at-i^2n^2$ . Lat., *undulatus* (from *unda*, a wave). Fr., *ondulé*. Ger., *wellen-rändig*. Wavy, repand. [a, 35.]

**UNDULATION** (Ger.), n. *Und-ul-a^2-tse-on'*. Fr., *ondulation*. A wave-like motion; also a condition characterized by wave-like motion. [a, 48.]—**Jugular u.** See *VENOUS PULSE* (2d def.).—**Respiratory u.** Ger., *Athmenswelle*. The variation of the curve of blood-pressure due to respiration. [K, 19.]

**UNDULSAMKEIT** (Ger.), n. *Un'duld-za^3m-kit*. See *INTOLERANCE*.

**UNDURCHBOHRT** (Ger.), adj. *Un'durch^2-bort*. See *IMPERFORATE*.

**UNDURCHLÄSSIG** (Ger.), adj. *Un'durch^2-las-si^2g*. Impenetrable. [B.]

**UNDURCHLÖCHERT** (Ger.), adj. *Un'durch^2-lu^3rch^2-e^2rt*. See *IMPERFORATE*.

**UNEHIG** (Ger.), adj. *Un'a-i^2g*. Agamous. [a, 35.]

**UNEINATHEMBAR** (Ger.), adj. *Un'in-a^2t-e^2m-ba^3r*. Irrespirable. [J.]

**UNEINREKNBAR** (Ger.), adj. *Un'in-re^2n^2k-ba^3r*. See *INTOLERABLE*.

**UNEMPFÄNGLICHKEIT** (Ger.), n. *Un'e^2mp-fa^2n-li^2ch^2-kit*. See *INSUSCEPTIBILITY* and *IMMUNITY*.

**UNEMPFINDLICH** (Ger.), adj. *Un'e^2mp-fi^2nd-li^2ch^2*. 1. Insensible. [a, 14.] 2. See *INOLENT*.

**UNEMPFINDLICHKEIT** (Ger.), n. *Un'e^2mp-fi^2nd-li^2ch^2-kit*. Insensibility; anaesthesia.

**UNENTHALTSAMKEIT** (Ger.), n. *Un'e^2nt-ha^2lt-za^3m-kit*. See *INCONTINENCE*.

**UNENTWICKELT** (Ger.), adj. *Un'e^2nt-vi^2k-e^2lt*. Undeveloped, immature. [a, 14.]

**UNEQUAL**, adj.  $U^3n-e^2kw^1$ . Lat., *inequalis, inequalis*. Fr., *inégal*. Ger., *ungleich*. Differing in length, size, proportions, or characters. [a, 48.]

**UNERSÄTTLICHKEIT** (Ger.), n. *Un'e^2r-zat-li^2ch^2-kit*. See *BULIMIA* (1st def.).

**UNERTRÄGLICHKEIT** (Ger.), n. *Un'e^2r-trag-li^2ch^2-kit*. See *INTOLERANCE*.

**UNFREIWILLIG** (Ger.), adj. *Un'fri-vi^2li^2g*. Involuntary.

**UNFRUCHTBARKEIT** (Ger.), n. *Un'fruch^2t-ba^3r-kit*. Barrenness, sterility.

**UNFÜHLBAR** (Ger.), adj. *Un'fu^1l-ba^3r*. Impalpable. [a, 48.]

**UNGEBOURT** (Ger.), n. *Un'ge^2-burt*. An embryo, a foetus.

**UNGEGLIEDERT** (Ger.), adj. *Un'ge^2-gled-e^2rt*. See *INARTICULATE* (1st def.).

**UNGEHEUER** (Ger.), n. *Un'ge^2-hoi-e^2r*. See *MONSTER*.

**UNGEIMPFT** (Ger.), adj. *Un'ge^2-impft*. Unvaccinated. [a, 14.]

**UNGENANNT** (Ger.), adj. *Un'ge^2-na^2nt*. See *INNOMINATE*.

**UNGEPAART** (Ger.), adj. *Un'ge^2-pa^2rt*. See *AZYGOS*.

**UNGESCHLECHTSREIF** (Ger.), adj. *Un'ge^2-scle^2ch^2ts-rif*. Sexually immature. [a, 48.]

**UNGESTALTET** (Ger.), adj. *Un'ge^2-sta^2t-e^2t*. See *DEFORMED*.

**UNGESTALTHEIT** (Ger.), **UNGESTALTUNG** (Ger.), n's. *Un'ge^2-sta^2t-hit, -un^2*. See *DEFORMITY*.

**UNGESTIELT** (Ger.), adj. *Un'ge^2-stelt*. See *SESSILE*.

**UNGESUNDHEIT** (Ger.), n. *Un'ge^2-zund-hit*. Sickness, unwholesomeness. [A, 521 (a, 48).]

**UNGLEICH** (Ger.), adj. *Un'gleich^2*. See *UNEQUAL*.—**U'artig**. See *HETEROGENEOUS*.—**U'mässigkeit**. See *ANOMALY*.

**UNGUAL**, adj.  $U^3n^2/gw^1$ . From *unguis*, a nail. Fr., *onguéal*. Pertaining to the nail. [a, 48.]

**UNGUEN** (Lat.), n. n.  $U^3n^2(u^4n^2)/gwe^2n$ . Gen., *un'guinis*. See *UNGUENTUM*.

**UNGUENT**, n. *Un^2/gw^nt*. See *ointment* and *UNGUENTUM*.—**Egyptian u.** A preparation resembling linimentum æruginis, but containing alum in addition to the copper subacetate. [B, 10.]

**UNGUENTUM** (Lat.), n. n.  $U^3n^2(u^4n^2)-gwe^2nt'u^3m(u^4m)$ . From *ungere*, to smear. Gr., *ὑπόψω*. Fr., *onguent, pommade* (1st def.). Ger., *Salbe*. 1. An ointment. 2. Of the U. S. Ph., specifically, a mixture of 4 parts of lard and 1 part of yellow wax; of the Br. Ph., the simplex (1st def.). [B; a, 38.]—**U. acre**. 1. Of the Ger. Ph., 1st ed., Swiss Ph., a mixture of 50 parts of cantharides, 30 of colophony, and 60 of turpentine with 15 (50 [Swiss Ph.]) of yellow wax, 250 (285 [Swiss Ph.]) of lard, and 10 (25 [Swiss Ph.]) of euphorbium. [B, 95 (a, 38).] 2. An ointment of 1 part each of corrosive sublimate, cantharis, and liquor stibii chlorati, and 4 parts of basilicon ointment, used for rubbing into the scalp in cases of progressive general paralysis. [Oebeke, "Allg. Ztschr. f. Psych.," xxxviii, 3; "Am. Jour. of Neurol. and Psych.," May, 1882, p. 320.]—**U. ad ambusta**. An ointment of 45 parts each of elder-bark and linden-bark, 60 of plantain-juice, 30 each of the juice of great houseleek, stag's suet, and white lead washed in rose water, 180 of linseed-oil, 15 of oil of eggs, and 7 of sugar; or of 180 grammes of white lead, 30 of camphor, 60 of olibanum, 90 of oil of roses, and the whites of 7 eggs. [B, 119 (a, 38).]—**U. ad blennorrhagiam chordatam**. See *U. mercuriale camphoratum*.—**U. ad decubitus**. An ointment for bed-sores; especially glycerinum tannatis plumbi. [B.]—**U. ad fomiculos**. 1. The u. cantharidum of the Ger. Ph. 2. *U. mezeri*. [B, 270 (a, 38).]—**U. ad hæmorrhoides**. An ointment of 83 grammes of the fresh root of figwort, 496 of butter, 55 of litharge, the yolks of 2 eggs, and 3 handfuls of white-henbane leaves. [B, 119 (a, 38).]—**U. ad perionies**. Fr., *onguent contre les engelures, onguent aromatique camphré*. Ger., *Frostsalbe, Frostbeulensalbe*. 1. Of the Palat. Disp., 1764, a preparation containing 4 parts each of wild-cat's fat, stag's fat, oil of bay, and wax, and 1 part of camphor. 2. An ointment of 60 parts of laurel-oil with 54 of mutton suet, 12 of camphor, and 3 each of the oils of juniper and lavender, or with 48 of mutton suet and 6 of camphor dissolved in a little oil of juniper. [B, 119 (a, 38).]—**U. ad scabiem**. Fr., *pommade antipsorique*. 1. A mixture of 2 parts each of quicklime and sulphur, 1 part of common salt, 12 parts of lard, and 24 of olive-oil. [B, 119.] 2. See *U. HYDRARGYRI nitratii*.—**U. ad scabiem Zelleri**. See *U. HYDRARGYRI ammoniati*.—**U. ægypticum**. See *EGYPTIAN UNGUENT*.—**U. album** [Finn. Ph.]. 1. An ointment of 10 parts of white wax, 15 of spermaceti, and 40 of olive-oil. [B, 95 (a, 38).] See also *Ceratum CETACEI*. 2. See *U. PLUMBI carbonici*.—**U. album camphoratum**. An ointment made by adding 1 part of camphor, triturated with a little oil of sweet almonds, to from 24 to 96 parts of ointment of lead carbonate. [B, 119 (a, 38).] See also *U. CERUSSÆ camphoratum*.—**U. album simplex** [Ger. Ph.]. See *Unguentum PLUMBI carbonatis*.—**U. ammoniacale**. See *POMMADE de Gondret*.—**U. anthelminthicum**. Fr., *onguent vermifuge*. An ointment of 45 parts each of onions, bryony-root, and the root of *Aspidium filix mas*, 7 each of *Artemisia abrotanum*, wormwood, and tansy, and 360 of oil, boiled together to dryness and mixed with 45 parts of yellow wax, 30 of aloes, 15 of colocynth, and 60 of inspissated ox-gall; or of 4 parts of hepatic aloes, 7 of inspissated ox-gall, and 30 of althæa ointment; or of 62 of aloes, 93 each of petroleum and inspissated ox-gall, and 750 of lard; or of 11 parts each of hepatic aloes, alhandal troches, *Asarum europæum*, wormwood, savin, and tansy, 90 each of myrrh, ox-gall, and yellow wax, 22 each of turpentine and oil of wormwood, and 4 each of petroleum and oil of savin. [L, 85; a, 38.]—**U. apostolorum**. See *DOCECAPHARMACUM*.—**U. Arcæi**. See *U. ELEMI compositum*.—**U. aromaticum**. Fr., *pommade dite baume nerval* [Fr. Cod.] (2d def.). 1. An ointment made of 250 parts of yellow wax (240 [Roum. Ph.], 240 of suet, and 80 of yellow wax [Norw. Ph.]), with 125 of laurel-oil (120 [Roum. Ph.], 5 [Norw. Ph.]), 10 each of the oils of juniper, lavender, rosemary, and turpentine, with 5 each of the oils of lavender and craped mint [Norw. Ph.], 1,000 of lard (480 [Norw. Ph.]), 250 of dilute alcohol (70-per-cent. alcohol [Austr. Ph.]), 300 of 70-per-cent. alcohol [Roum. Ph.], 80 of strong alcohol [Norw. Ph.], and 125 [Austr. Ph., Hung. Ph.], 120 [Roum. Ph.] of wormwood, 40 each of chamomile flowers and the herbs of melilotus and origanum [Norw. Ph.]; or with 480 parts of lard, 240 of mutton suet, 180 of strong alcohol, 60 each of yellow wax and oil of rosemary, 30 each of laurel-berries and root of pyrethrum, 20 of lavender flowers, and 10 of sweet marjoram [Dan. Ph.]. The Dan. Ph. directs the ointment to be colored with indigo or turmeric. 2. An ointment of 423 parts each of beef marrow and expressed oil of nutmeg, mixed with a solution of 34 of balsam of Tolu and 17 each of camphor and the oils of cloves and rosemary in 69 of 92-per-cent. alcohol [Belg. Ph.]; or of 350 parts of beef marrow, 450 of expressed oil of nutmeg, and 100 of almond-oil, mixed with a solution of 30 each of oil of rosemary and balsam of Tolu and 15 each of camphor and oil of cloves in 60 of 80-per-cent. alcohol [Fr. Cod.]; or of 40 parts of laurel-oil with 32 of mutton suet and a solution of 4 of camphor in 2 of oil of juniper [Gr. Ph.], or with 96 of yellow wax, 224 of lard, 24 of oil of juniper, 4 of oil of rosemary, and 12 of oil of turpentine [Swiss Ph.]. [B, 95 (a, 38).]—**U. arsenicale Heilmundi** [Ger. Ph., 1st ed.]. An extemporaneous mixture of pulvis arsenicalis Cosmi with eight times as much u. narcoticobalsamicum Heilmundi. [B,

95 (a, 38).—**U. Autenriethii**. See **U. ANTIMONII**.—**U. basilicum**. Fr., *onguent basilicum* [Fr. Cod.] (2d def.) (ou *suppuratif*). Sp., *unguento de colofonia pálido* [Sp. Ph.] (1st def.). 1. An ointment of 15 parts each of yellow wax, suet, and colophony (Burgundy pitch [Dan. Ph., Swed. Ph.]), with 45 of olive-oil and 7 of turpentine [Dan. Ph.] (60 of olive-oil and 15 of turpentine [Finn. Ph., Swed. Ph.]), or 45 of olive-oil and 10 of turpentine [Ger. Ph.], or 45 of olive-oil and 15 of Burgundy pitch [Sp. Ph.], or 40 of olive-oil and 15 of turpentine [Norw. Ph.]; or of 15 parts each of yellow wax, suet, and turpentine, 30 of colophony, and 45 of lard [Roum. Ph.]. 2. An ointment of 12 parts each of yellow wax, colophony, and black pitch with 12 each of suet and turpentine and 36 [Dan. Ph., Russ. Ph.] (40 [Norw. Ph.]) of olive-oil, or with 48 [Fr. Cod.] (72 [Gr. Ph.]) of olive-oil only; or of 15 parts each of yellow wax, black pitch, Burgundy pitch, and suet, 45 of oil of sesame, and 5 of larch turpentine [Swiss Ph.]; or of 143 parts each of yellow wax, colophony, and black pitch, and 571 [Belg. Ph.] (572 [Netherl. Ph.]) of olive-oil. [B, 95, 119 (a, 38).] See also **U. RESINÆ**.—**U. basilicum flavum**. See **U. basilicum** (1st def.).—**U. basilicum nigrum**. See **U. basilicum** (2d def.).—**U. basilicum veterinarium** [Belg. Ph.]. An ointment of 45 parts of colophony, 40 of mutton suet, 10 of tar, and 5 of cod-liver oil. [B, 95 (a, 38).]—**U. camphoratum**. Fr., *pommade camphrée*. Sp., *pomada alcanforada* [Sp. Ph.]. An ointment of 50 parts of camphor with 150 of lard and 16 [Fr. Cod.] (15 [Sp. Ph.]) of white wax (25 of yellow wax [Russ. Ph.]); or with 134 of lard and 16 of white wax [Belg. Ph.]; or with 200 of simple ointment [Swiss Ph.]. [B, 95 (a, 38).]—**U. carbolisatum** [Swiss Ph.]. An ointment of 2 parts of crystallized carbolic acid dissolved in 2 of glycerin and mixed with 200 of lard. [B, 95 (a, 38).]—**U. carminativum**. See **ONGUENT CARMINATIVUM**.—**U. ceratum**. See **CERATUM GALENI**.—**U. cereum** [Russ. Ph.]. A preparation corresponding nearly to the ceratum of the U. S. Ph., composed of 30 parts of yellow wax (white wax [Gr. Ph.]) and 90 (70 [Gr. Ph.], 75 [Gr. Ph.], 60 [Netherl. Ph.]) of olive-oil. [B, 95 (a, 38).]—**U. cinereum**. Gray ointment; the *onguent mercuriel simple* of the Fr. Cod. [B]. See under **U. HYDRARGYRI**.—**U. citrinum**. See **U. HYDRARGYRI NITRATIS**, **U. ALTHEÆ**, and **U. basilicum**.—**U. cupratum**. See **U. ERUGINIS** (2d def.).—**U. Cyrilli**. See **POMMADE DE CIRILLO**.—**U. de arthanita**. Fr., *onguent d'arthanita* (ou *de pain de porceau*). An ointment made by boiling 1,060 parts of the juice of *Cyclamen europæum*, 360 of the juice of squiring cucumber, 180 of polyody, 120 of colocynth, 720 of olive-oil, and 360 of fresh butter to dryness, straining, and adding 150 parts of yellow wax, 30 each of aloes, mezereum-berries, colocynth, scammony, and Indian jalap, 26 of euphorbium, 15 each of salt, chamomile, ginger, myrrh, and long pepper, and 30 each of sagapenum and ox-gall; or by macerating for 24 hours 664 parts each of the juices of *Cyclamen europæum* and squiring cucumber and 138 of colocynth, boiling down one half, straining, evaporating to an extract, and adding 28 parts each of ox-gall, salt, and sagapenum, 249 of yellow wax, 332 of butter, 664 of olive-oil, and 111 of powdered chamomile; or made of 360 parts of fresh butter or lard, 60 of inspissated ox-gall (or of extract of bile), 15 each of hepatic aloes and colocynth, and 8 to 12 of some essential oil or oils (wormwood alone or with tansy or rosemary). Sometimes 15 parts of sulphur were added, or, instead of 15 parts each, 45 parts each of aloes, colocynth, and flowers of sulphur were used. [L, 85 (a, 38).]—**U. defensivum ceruleum**. See *Unguentum oxydi cobaltii*.—**U. de nihilo**. See **U. ZINCI OXYDI**.—**U. digestivum**. Fr., *onguent digestif simple* [Fr. Cod.] (1st def.). 1. An ointment of 15 parts each of olive-oil and yolk of egg with 70 of larch turpentine [Belg. Ph.]; or of 10 grammes of olive-oil, 40 of larch turpentine, and the yolk of 1 egg [Fr. Cod.] (15 grammes of oil of hypericum, 60 of turpentine, and the yolks of 2 eggs [Sp. Ph.]). [B, 95 (a, 38).] 2. See **U. TEREBINTHINÆ COMPOSITUM**.—**U. digestivum aloeticum**. Fr., *onguent digestif animé*. An ointment of 29 parts of aloes, 116 of rhodomel, 335 of turpentine, and 88 of olive-oil; or of 45 grammes of aloes, 180 each of turpentine and basilicum, and the yolks of 3 eggs; or of 179 grammes of turpentine, 119 of honey, 190 of tincture of aloes, and the yolks of 4 eggs. [L, 85 (a, 38).]—**U. digestivum animatum**. An ointment of equal parts of liquid stryax and u. digestivum. In former times equal parts of basilicum ointment and compound ointment of elemi were added. [B, 95, 119 (a, 38).]—**U. digestivum mercuriale**. A mixture of equal parts of u. digestivum and u. hydrargyri (the Sp. preparation). [B, 95 (a, 38).]—**U. digestivum myrrhatum**. An ointment of 180 grammes of turpentine and the yolks of 4 eggs with either 22 grammes of myrrh and 45 of olive-oil or 11 each of myrrh and oilbanum, 45 of oil of St. John's wort, and enough saffron; or of 240 grammes of turpentine, 46 of oil of St. John's wort, 7 each of myrrh and oilbanum, and the yolks of 4 eggs; or of 30 parts of u. digestivum with 4 each of myrrh and oilbanum. [B, 119 (a, 38).]—**U. digestivum simplex** [Fr. Cod.]. See **U. digestivum** (1st def.).—**U. Dupuytren** [Swiss Ph.]. An ointment of 250 parts of purified beef marrow, 4 of lead acetate, 8 of balsam of Peru, 30 of diluted alcohol, 1 part of tincture of cantharides, and 1 each of the tinctures of cloves and cinnamon. [B, 95 (a, 38).]—**U. emolliens**. 1. Of the Austr. Ph., Hung. Ph., 2d ed., see **U. aquæ rosæ**. 2. See **U. suppurans**.—**U. enulatum**. See **U. HELENII**.—**U. epispasticum**. See **U. MEZEREII**.—**U. exsiccans rubrum Acrelii**. An ointment of 90 parts each of lead acetate and minium, 180 each of simple cerate, litharge, and calamine, 360 of goat's suet, 240 of linseed-oil, and 11 of camphor. [B, 119 (a, 38).]—**U. extensum**. Any ointment spread on a fabric. [Unna (a, 14).]—**U. flavum**. 1. Of the Ger. Ph., 1st ed., Russ. Ph., T. A., see **U. RESINÆ**. 2. See **U. ALTHEÆ**.—**U. foliatum**. See **NARD OINTMENT**.—**U. fuscum**. Fr., *onguent mercuriel de Boecking* (2d def.) (ou *brun* [3d def.]). 1. An ointment of 72 parts of oil, 16 of yellow wax, 8 each of colophony and black pitch, 4 each of mastic, turpentine, galbanum, sagapenum, and oilbanum, and 2 of round birthwort. 2. An ointment made by mixing red precipitate with 16 times as much u. resinæ. [B, 119 (a, 38).] 3. See **U. matris**.—**U. griseum**. See **U. HYDRARGYRI**.—**U. hæmorrhoidale**. An ointment of 23 grammes each of starch, white lead, litharge, lead suboxide, and tragacanth, 5 each of opium and camphor, 180 each

of mucilage of the seeds of *Plantago psyllium*, oil of roses, and oil of great mullein, 90 of yellow wax, and the whites of 2 eggs. [B, 119 (a, 38).]—**U. Hebræ** [Swiss Ph.]. An ointment of 250 parts each of litharge plaster and olive-oil with 5 of glycerin. [B, 95 (a, 38).] See also **U. DIACHYLON**.—**U. helleboratum** [Dan. Ph.]. An ointment of 2 parts of commercial potassium nitrate, 24 of rhizome of white hellebore, 90 of sublimed sulphur, 96 of green soap, and 288 of lard. [B, 95 (a, 38).]—**U. Holloway** [Gr. Ph.]. An ointment made of 125 parts of white wax, 60 each of yellow wax and larch turpentine, 50 of spermaceti, 250 of Burgundy pitch, 500 of lard, and 625 of olive-oil. [B, 95 (a, 38).]—**U. iodatum**. Fr., *pommade d'iode*. An ointment of iodine mixed with 16, 24, or 64 times as much lard. [B, 119 (a, 38).]—**U. irritans**. See **U. CANTHARIDIS**.—**U. jodatum** [Hung. Ph., 2d ed.]. An ointment of tincture of iodine extemporaneously mixed with nine times as much simple ointment. [B, 95 (a, 38).]—**U. labiale**. See **U. rubrum labiale** and **CERATUM CETACEI RUBRUM**.—**U. laurincamphoratum**. See **U. ad perniones**.—**U. laurinum**. Fr., *onguent de laurier*, *pommade de laurier* [Fr. Cod.] (2d def.). 1. Of the Netherl. Ph., see *Unguentum LAURI terebinthinatum*. 2. Of the Fr. Cod., an ointment of 50 parts each of fresh laurel-leaves and laurel-berries and 100 of lard. The Belg. Ph. orders the laurel-leaves and berries to be macerated in 25 parts of 92-per-cent. alcohol for two hours before heating with the lard, and both ph's order the ointment remelted when prepared. [B, 95 (a, 38).] 3. See **U. nervinum** (3d def.).—**U. leniens**. 1. Of the Russ. Ph., an ointment of 3 parts of white wax, 6 of spermaceti, 24 of almond-oil, and 4 of glycerin. [B, 95 (a, 38).] See also **CERATUM CETACEI**. 2. Of the Ger. Ph., see **U. aquæ rosæ**.—**U. lenitivum**. Fr., *onguent émollient*. An ointment of 18 parts of colophony, 36 of yellow wax, 126 of olive-oil, and 9 of turpentine. [B, 119 (a, 38).]—**U. lilaceum**. See **CRINOMYRON**.—**U. matris**. Brown salve; an ointment consisting essentially of 1 or 2 parts each of lard, butter, mutton suet, yellow wax, and litharge with 2, 3, or 8 of olive-oil. The butter was frequently omitted, sometimes also the olive-oil, and a little black pitch was occasionally added. Some ph's simply ordered 2 parts of mutton suet and 1 part of black pitch mixed with 56 parts of simple plaster, or 2 of camphor and 32 of yellow wax with 192 of simple plaster, or 5 of olive-oil with 8 of emplastrum minii rubrum, or 4 of lard and 2 each of mutton suet and yellow wax with 6 of simple plaster. [B, 119 (a, 38).]—**U. mercuriale**. See **U. HYDRARGYRI**.—**U. mercuriale album**. See **U. HYDRARGYRI ammoniati**.—**U. mercuriale aptylizomenon**. See **POMMADE DE CIRILLO**.—**U. mercuriale camphoratum**. A mixture of equal parts of camphor and mercurial ointment or of 2 parts of camphor and 4 of the ointment. [B, 119 (a, 38).]—**U. mercuriale citrinum**. See **U. HYDRARGYRI NITRATIS**.—**U. mercuriale corrosivum**. See **POMMADE DE CIRILLO**.—**U. mundificans Zelleri**. See **U. HYDRARGYRI ammoniati**.—**U. myrtinum compositum**. Fr., *pommade astringente*. An ointment of 345 parts of oil of myrtle, 96 of yellow wax, 29 each of gall-nuts and sumach-leaves, 7 each of myrtle-leaves, cypress-leaves, and pomegranate-peel, and 14 of mastic; or of 332 parts of oil of myrtle, 111 of yellow wax, 14 of alum, and 21 each of gall-nuts, cypress, plantain-seeds, and sumach-leaves. [B, 119 (a, 38).]—**Unguenta narcotica cum extractis parata** [Swiss Ph.]. Ointments consisting of 10 parts of a narcotic extract dissolved in 1 part each of dilute alcohol and water and mixed with 90 parts of wax ointment. [B, 95 (a, 38).]—**U. narcoticobalsamicum Hellmundi**. An ointment of 4 parts of lead acetate, 12 each of extract of hemlock and balsam of Peru, 2 of tinctura opii crocata, and 96 [Ger. Ph.] (100 [Swiss Ph.]) of wax ointment. [B, 95 (a, 38).]—**U. nardinum**. See **NARD OINTMENT**.—**U. neapolitanum**. See **U. HYDRARGYRI**.—**U. nervinum**. Fr., *onguent (ou baume) nervin*. 1. Of the Dan. Ph., see **U. aromaticum** (1st def.). 2. Of the Gr. Ph. and Swiss Ph., see **U. aromaticum** (2d def.). 3. An ointment made of mutton suet, essence of turpentine, and oil of laurel, to which in various old ph's were added several other oils of numerous herbs and other ingredients. [B, 119 (a, 38).] Cf. **U. ROSMARINI COMPOSITUM**.—**U. nitricatum**. See **ADEPS OXYGENATUS**.—**U. oculare Kliseri**. Fr., *onguent ophtalmique vert*. An ointment of 8 parts of verdigris, 150 of tartar, 40 of camphor, and 620 of lard. [B, 119 (a, 38).]—**U. opthalmicum**. An ointment of 2 parts of red mercury oxide, 38 of yellow wax, and 60 of almond-oil [Ger. Ph., 1st ed.], or of 2 parts of yellow mercury oxide and 98 of u. cetacei [Swiss Ph.]. Some of the older ph's directed zinc sulphate with 6 or 7 times as much fresh butter. [B, 95, 119 (a, 38).]—**U. opthalmicum album**. See **U. ZINCI OXYDI**.—**U. opthalmicum compositum**. An ointment made of 15 parts of red mercury oxide with 24 of yellow wax, 140 of lard, 6 of zinc oxide, 5 of camphor, and 10 of almond-oil [Ger. Ph., 1st ed.] (with 30 of yellow wax, 210 of lard, 74 each of zinc oxide and olive-oil, and 4 of camphor [Swiss Ph.]). [B, 95 (a, 38).]—**U. opthalmicum Desault** [Belg. Ph.]. Sp., *pomada de Desault* [Sp. Ph.]. An ointment of 80 parts each of alum (burned [Belg. Ph.]), red mercury oxide, and lead acetate, with 16 of calomel, 40 of zinc oxide, and 704 of benzoated lard [Belg. Ph.] (with 12 of calomel, 80 of tutia, and 600 of rose ointment [Sp. Ph.]). [B, 95 (a, 38).]—**U. opthalmicum Janini** [Swiss Ph.]. An ointment of 10 parts each of calomel, zinc oxide, and white bole and 50 of lard. [B, 95 (a, 38).]—**U. opthalmicum lausannense** [Swiss Ph.]. An ointment of 2 parts of red mercury oxide, 120 of lard, 8 of tinctura opii crocata, and 12 of solution of subacetate of lead. [B, 95 (a, 38).]—**U. opthalmicum Richter**. An ointment of 2 parts of red precipitate and 6 each of cacao butter and lard. [B, 119 (a, 38).]—**U. opthalmicum rubrum**. See **U. HYDRARGYRI OXYDI RUBRI**.—**U. opthalmicum Sti. Yvesii**. See **U. opthalmicum compositum**.—**U. opthalmicum simplex**. See **U. opthalmicum**.—**U. opiatum**. 1. An ointment made by mixing extemporaneously 5 parts each of extract of opium and water with 90 of wax ointment [Ger. Ph., 1st ed.] (of simple ointment [Swiss Ph.]), or of lard [Russ. Ph.]. 2. An ointment made by digesting 7 grammes of powdered opium with 60 grammes of calf's bile, and adding 60 of lard and 10 drops of oil of bergamot. [B, 95, 119 (a, 38).]—**U. opodeldorch**. See **LINIMENTUM SAPONATO-CAMPHORATUM**.—**U. oxygenatum**. Sp.,

*pomada oxigenada* [Sp. Ph.]. An ointment made by heating 100 parts of lard with 6 of nitric acid of sp. gr. 1.185 [Ger. Ph., 1st ed.], with 12½ of sp. gr. 1.230 [Gr. Ph.] (1321 [Sp. Ph.]), or with 10 of sp. gr. 1.32 to 1.34 [Swiss Ph.]. [B. 95 (a, 38).] See also *ADEPS oxygenatus*.—*U. oxygenatum* (Bañares). Sp., *aceite oxigenado de Bañares* [Sp. Ph.]. An ointment made by heating 460 parts of olive-oil with a solution of 29 of mercury in 58 of nitric acid of sp. gr. 1.321. [B. 95 (a, 38).]—*U. oxymenon*. See *U. ACIDI NITRICI* and *ADEPS oxymenon*.—*U. paraffinum* [Br. Ph.]. See *PETROLATUM*.—*U. phosphoratum*. Sp., *pomada fosforada* [Sp. Ph.]. An ointment made by heating phosphorus in a closed flask with 50 times as much melted lard. [B. 95 (a, 38).]—*U. plumbicum*. 1. Of the Gr. Ph., see *U. PLUMBI*. 2. Of the Swed. Ph., see *EMPLATRE brun.*—*U. pomadinum* [Austr. Ph.]. An ointment made by melting together 150 parts of white wax and 600 of lard washed with rose-water, straining, and adding, when the mixture is half cold, 3 parts each of the oils of bergamot and cloves. [B. 95 (a, 38).]—*U. populeum*. 1. Of the Belg. Ph. and Netherl. Ph., see *POMATUM populeum*. 2. Of the Russ. Ph., an ointment made by extracting poplar buds with half as much again 90-per-cent. alcohol, filtering, distilling off the alcohol, evaporating to the consistence of turpentine, and adding 8 times as much lard [Russ. Ph.], or by boiling the buds with twice as much lard till the moisture is dissipated, expressing, and filtering [Ger. Ph.]. [B. 95 (a, 38).]—*U. pro pede*. Fr., *onguent de pied* [Fr. Cod.]. A veterinary ointment made of 26 parts of colophony, 50 of mutton suet, 22 of cod-liver oil, and 2 of animal charcoal [Belg. Ph.]; or of equal parts of yellow wax, lard, turpentine, olive-oil, and vegetable tar [Fr. Cod.]. [B. 95 (a, 38).]—*U. quercinum*. See *PLUMBUM tannicum pulifforme*.—*U. refrigerans*. Fr., *onguent adoucissant* (2d def.). 1. Of the Swiss Ph., see *U. aquæ rosæ*. 2. A mixture of white wax with 3 or 4 times as much oil of roses. [B. 119 (a, 38).]—*U. rosatum*. Fr., *liparolé de roses, onguent rosat* (ou *pomadin*). Ger., *Rosensalbe*. Sp., *pomada de rosas* [Sp. Ph.] (1st def.). 1. An ointment made of 30 parts of rose-water with 60 of white wax and 300 of lard [Ger. Ph.], 30 of white wax and 120 of lard washed in rose-water [Ger. Ph.], 10 of white wax and 40 of olive-oil [Swiss Ph.], 60 of oil of theobroma and 120 of oil of sesame [Hung. Ph.]; or of 2 parts of oil of roses with 400 of white wax and 3,600 of benzoated lard [Belg. Ph.] (with 48 of yellow wax and 432 of washed lard [Russ. Ph.]); or of equal parts of fresh pink-rose petals and lard digested for three days at a gentle heat. The older ph's generally directed rose petals instead of rose-water and sometimes a large number of aromatic ingredients. [B. 95, 119 (a, 38).] 2. Of the Austr. Ph., see *U. pomadinum*.—*U. rosatum compositum*. See *U. HYDRARGYRI ammoniati*.—*U. rubefaciens*. See *U. MEZEREI*.—*U. rubrum balsamicum* [Belg. Ph.]. An ointment made of 248 parts of yellow wax, 498 of olive-oil, 170 of larch turpentine, and 42 each of balsam of Peru and red sandal-wood. [B. 95 (a, 38).]—*U. rubrum labiale* [Belg. Ph.]. Fr., *cérat à la rose*. Sp., *cérato rojo para los labios* [Sp. Ph.]. A preparation made up of 27 parts each of hog's lard and almond-oil and 46 of white wax, colored with alkanet-root and flavored with a mixture of balsam of Peru, and the oils of cloves, bergamot, and lemon. The preparations of the Swiss Ph. and Sp. Ph. are made of white wax mixed with about double its weight of expressed almond-oil colored with alkanet-root, and flavored with oil of roses. [B.] Cf. *Ceratum CETACEI rubrum*.—*U. santalinum*. An ointment made of 996 parts of myrtle-oil, 249 of white wax, 111 each of red rose and red sandal-wood, and 14 of camphor; or by boiling together 22 parts each of white, yellow, and red sandal-wood, 45 of red poppies, 75 of roses, 360 of oil of roses, and 120 of white wine until the moisture is dissipated, straining, and adding 90 parts each of Armenian bole and white wax and 7 of camphor. [B. 119 (a, 38).]—*U. sedativo-narcoticum*. A preparation made by digesting 4 grammes of opium in the gastric juice of a calf for 24 hours by the aid of gentle heat, and adding lard enough to make a soft ointment. [B. 119 (a, 38).]—*U. simplex*. 1. Of the Br. Ph., Austr. Ph., Belg. Ph., Gr. Ph., Hung. Ph. (2d ed.), and Swiss Ph., an ointment of 3 parts of white wax with 4½ of benzoated lard and 4½ fluid parts of almond-oil [Br. Ph.], with 17 of benzoated lard [Belg. Ph.], or with 12 (18 [Swiss Ph.]) of simple lard. [B. 95 (a, 38).] 2. Of the Netherl. Ph., see *U. cereum*. 3. See *CERATUM Galeni*. 4. See *U. PLUMBI carbonatis*.—*U. sinapium*. See *Cataplasma SINAPIS*.—*U. stibiatum*. See *U. ANTIMONII*.—*U. stomachicum*. Fr., *onguent stomacal* (1st def.) [ou *stomachique* (2d def.)]. 1. An ointment made of 240 parts each of wormwood, mint, sage, and yellow wax, 120 each of rose petals and styrax, 1,200 of olive-oil, and 5 each of the oils of mint, cloves, and wormwood. [B. 119 (a, 38).] 2. An ointment made of 30 parts each of nutmeg and cloves and 15 of mastic, all in powder. [B. 119 (a, 38).]—*U. strumale*. See *U. POTASSII iodidi*.—*U. sulfuratum*. 1. Of the Swiss Ph., see *U. SULPHURIS*. 2. Of the Austr. Ph. and Hung. Ph., 3d ed., see *U. SULPHURIS compositum*.—*U. sulfuratum compositum*. See *U. SULPHURIS compositum*.—*U. sulfuratum simplex*. See *U. SULPHURIS*.—*U. sulphuratum*. 1. Of the Belg. Ph., see *U. SULPHURIS*. 2. Of the Netherl. Ph., see *U. SULPHURIS compositum*.—*U. sulphuratum alcaicum*. See *U. SULPHURIS alcaicum*.—*U. suppurans*. Ger., *Eiterungsalbe*. An ointment made of 4 pounds of honey, 3 of figs, 1 pound each of resin, Venetian soap, and pulp of onions, and 2 oz. of galbanum; or of ½ pound each of yellow wax, resin, and white soap, and 2½ pounds each of roasted onions and honey. [B. 97 (a, 38).]—*U. terebinthinaceum*. See *U. TEREBINTHINÆ compositum*.—*U. terebinthinatum*. See *U. TEREBINTHINÆ*.—*U. universale* [Dan. Ph.]. An ointment made of 12 parts of yellow wax, 34 of oil of rape-seed, and 2 each of lead acetate and warm oil of rape-seed. [B. 95 (a, 38).]—*U. venereum de Cirillo*. See *POMADE de Cirillo*.—*U. vesicatorium*. See *U. CANTHARIDIS*.—*U. vesicatorium cum euphorbia* [Belg. Ph.]. Fr., *onguent vésicatoire (Lebas)* [Fr. Cod.]. A veterinary ointment made of 193 parts of cantharides, 65 of euphorbium, and 742 of pitch plaster [Belg. Ph.]; or of 300 parts of yellow wax, 400 each of terebinthina cocta and black pitch, 1,000 of olive-oil, 600 of cantharides, and 200 of euphorbium [Fr. Cod.]. [B. 95 (a, 38).]—*U. vien-*

*nense* [Netherl. Ph.]. Fr., *pommade sulfureuse contre la gale* [Fr. Cod.]. An ointment made of 3 parts each of sublimed sulphur and tar, 2 of potassium carbonate, and 6 each of lard and green soap [Netherl. Ph.]; or of 10 parts of potassium sulphide, 2 of pure potassium carbonate, and 800 of lard [Fr. Cod.]. [B. 95 (a, 38).]—*U. viride*. See *U. XERUGINIS*.—*U. viride potable*. Fr., *onguent vert*. An old preparation made of a large number of herbs and sometimes containing snails and crabs, made into an ointment with butter. [B. 119 (a, 38).]—*U. zincleo-plumbicum* [Swed. Ph.]. An ointment made of 8 parts each of olive-oil, zinc oxide, white lead, and litharge, 4 each of minium and lead acetate, 16 of suet, and 2 of camphor liniment. [B. 95 (a, 38).]

**UNGUICULAR**, adj.  $U^{n2}gwi^{2}k'u^{2}l-a^{2}r$ . Lat., *unguicularis* (from *unguiculus*, a small nail). Ger., *nagellang* (2d def.). 1. Of or pertaining to a claw or nail. 2. Half an inch in length. [a, 35.]

**UNGUICULATE**, adj.  $U^{n2}gwi^{2}k'u^{2}l-at$ . Lat., *unguiculatus*. Fr., *ongiculé*. Ger., *benagell, genagell*. Furnished with claws; of petals, contracted at the base into an unguis. [a, 35.]

**UNGUICULUS** (Lat.), n. m.  $U^{n2}(u^{n2})gwi^{2}k'u^{2}l(u^{n2})-u^{2}s(u^{n2})$ . Dim. of *unguis*, a nail. See *UNGUIS* and *NAIL* (1st def.).

**UNGUINOCELE** (Fr.), n.  $U^{n2}gwen-o-se^{2}l$ . From *unguen*, fat, and *κύηλα*, a tumor. See *AI*.

**UNGUIS** (Lat.), n. m.  $U^{n2}(u^{n2})gwi^{2}a$ . Fr., *onglet* (5th def.). Ger., *Nagel* (1st and 5th def's), *Nagellänge* (6th def.). 1. See *NAIL* (1st def.). 2. The hard, horny termination of the beak of a bird. [L, 221.] 3. See *ONYX* (2d def.). 4. The pes hippocampi of the hippocampus major. [I, 3(K).] 5. In botany, a claw or stalk of a petal. 6. Half an inch, being the length of the thumb-nail. [a, 35.]—*U. avis*. See *HIPPOCAMPUS minor*.—*U. corneæ*. See *ONYX* (2d def.).—*U. hippocraticus*. Of Hippocrates, the bluish discoloration of the nails observed in pulmonary diseases. [L, 57 (a, 50).]—*U. incarnatus*, *U. in carne*. See *Ingrowing NAIL*.—*U. in oculo*. See *PTERYGIUM* (2d def.).

**UNGULA** (Lat.), n. f.  $U^{n2}(u^{n2})gu^{2}l(gu^{n2})-a^{2}$ . From *unguis*, a nail. See *HOOF*.—*Ungulæ palpebrarum*. An old term for the tarsal cartilages. [F.]

**UNGULATA** (Lat.), n. n. pl.  $U^{n2}g(u^{n2})gu^{2}l(u^{n2})-at(a^{2})/a^{2}$ . From *ungula*, a hoof. An order of the *Mammalia* comprising the hoofed quadrupeds. [B, 28 (a, 27).]

**UNHEILBAR** (Ger.), adj. Un'hil-ba<sup>2</sup>r. See *INCURABLE*.

**UNHEILSAM** (Ger.), adj. Un'hil-za<sup>2</sup>m. Unwholesome, insalubrious. [A, 521 (a, 48).]

**UNIAXIAL**, adj.  $U^{n2}i^{2}a^{2}x^{2}i^{2}-l$ . From *unus*, one, and *axis*, an axis. See *MONAXIAL*.

**UNICELLULAR**, adj.  $U^{n2}i^{2}se^{2}l(u^{n2})-a^{2}r$ . Lat., *unicellularis* (from *unus*, one, and *cellula*, a small cell). Fr., *unicellulaire*, Ger., *einzellig, unicellulär*. Consisting of but one cell. [J.]

**UNICISM**, n.  $U^{n2}i^{2}s-i^{2}zm$ . From *unicus*, one only. Lat., *unitarismus*. Fr., *unicisme*. Ger., *Unitätslehre*. The doctrine that chancre and chancreoid are both due to a single virus (cf. *DUALISM* [5th def.]). [a, 48.]

**UNICIST**, n.  $U^{n2}i^{2}s-i^{2}st$ . A believer in unicism. [a, 17.]

**UNICITÉ** (Fr.), n.  $U^{n2}ne-se^{2}ta$ . The property of being unique (applied by Ricord to syphilis to indicate that it can affect an individual only once). [A, 319 (a, 48).]

**UNICORN-ROOT**, n.  $U^{n2}i^{2}ko^{2}rn-ru^{2}t$ . See *ALETIS fari-nosa*.

**UNICORN** (Lat.), n. n.  $U^{n2}(un)^{2}i^{2}ko^{2}rn(u^{n2})$ . From *unus*, one, and *cornu*, a horn. See *RHINOCEROS*.

**UNIFLOREOUS**, adj.  $U^{n2}i^{2}for(u^{n2})-a^{2}$ . Lat., *uniflorus* (from *unus*, one, and *flos*, a flower). Fr., *uniflore*. Ger., *einblüthig*. Bearing a single flower. [a, 35.]

**UNIFOLIATE**, adj.  $U^{n2}i^{2}fol(u^{n2})-a^{2}$ . Lat., *unifolius* (from *unus*, one, and *folium*, a leaf). Fr., *unifolié*. Ger., *einblättrig*. 1. Bearing but one leaf. 2. Unifoliate. [a, 35.]

**UNIFOLIOLATE**, adj.  $U^{n2}i^{2}fol(u^{n2})-ol(u^{n2})-a^{2}$ . Lat., *unifoliolatus* (from *unus*, one, and *foliolium*, a little leaf). Fr., *unifoliolé*. Ger., *eintheilblättrig*. Of a compound leaf, consisting of a single leaflet. [a, 35.]

**UNIGLANS** (Lat.), n. f.  $U^{n2}(un)^{2}i^{2}gla^{2}nz(gla^{2}ns)$ . Gen., *-gland'is*. Fr., *unigland*. Of Mirbel, a cupulate fruit containing but one glans (e. g., an acorn). [a, 35.]

**UNIJUGATE**, adj.  $U^{n2}i^{2}j(u^{n2})-g-at$ . Lat., *unijugus* (from *unus*, one, and *jugum*, a yoke). Fr., *unijugué*. Ger., *einpaarig*. Having but one jugum, or pair of leaflets. [a, 35.]

**UNILABATE**, adj.  $U^{n2}i^{2}lab(u^{n2})-a^{2}$ . Lat., *unilabatus* (from *unus*, one, and *labium*, a lip). Ger., *einlippig*. Having but one lip (said of a corolla in which one lip is obsolete). [a, 35.]

**UNILATERAL**, adj.  $U^{n2}i^{2}la^{2}t(u^{n2})-a^{2}r$ . Lat., *unilateralis* (from *unus*, one, and *latus*, a side). Fr., *unilatéral*. Ger., *einseitig*. 1. One-sided, growing on or turned all toward one side of an axis. [a, 35.] 2. Affecting only one side of the body or one of two laterally paired organs.

**UNIOBATE**, adj.  $U^{n2}i^{2}o^{2}b-at$ . Lat., *unilobatus* (from *unus*, one, and *lobus*, a lobe). Fr., *unilobé*. Ger., *einlappig*. Having but one lobe. The *Unilobata* (Fr., *unilobées*) are the monocotyledons. [a, 35.]

**UNIOCLULAR**, adj.  $U^{n2}i^{2}o^{2}cl(u^{n2})-a^{2}r$ . Lat., *unioclularis* (from *unus*, one, and *oculus* [q. v.]). Fr., *unioclaire*. Ger., *einkammerig, einfächerig*. 1. Having but one oculus; one-celled. [a, 35.] 2. Of a cystic tumor, made up of only one cyst.

**UNINERVATE**, adj.  $U^{n2}i^{2}n(u^{n2})-er-vat$ . Lat., *uninervis* (from *unus*, one, and *nervus*, a nerve). Fr., *uninerve*. Ger., *einnervig*. Having only one rib or midrib. [a, 35.]

**UNINERVI-OBLITERATUS** (Lat.), adj.  $U^2n(un)-i^2n-u^2r-(ne^2r)-v^2i^2(wi^2)-o^2b-li^2t(let)-e^2r-at(a^2t)-u^2s(u^2s)$ . From *unus*, one, *nervus*, a nerve, and *obliterare*, to obliterate. Fr., *uninervi-oblitère*. Having a single rib (midrib) which is obliterated before reaching the margin of the leaf. [a, 35.]

**UNINTERRUPTED**, adj.  $U^2n-i^2nt-u^2r-ru^2pt-e^2d$ . Consisting of equal parts or of parts which increase or decrease regularly; continuous. [a, 35.]

**UNINUCLEAR**, adj.  $U^2n-i^2nu^2k/le^2-a^2r$ . From *unus*, one, and *nucleus*, a nut. Ger., *einkernig*, *uniculcé*. Having but a single nucleus. [J.]

**UNIO** (Lat.), n. f.  $U^2n(un)/i^2-o$ . Gen., *o'nis*. From *unus*, one. See **UNION**.—**U. thalamorum nervorum opticorum**. See *Middle commissure of the brain*.—**U. vasorum**. See **ANASTOMOSIS** (2d def.).

**UNIOCLAR**, adj.  $U^2n-i^2-o^2k/u^2l-a^2r$ . Lat., *uniocularis*, *unioculatus* (from *unus*, one, and *oculus*, the eye). Fr., *unioculé*. Ger., *einäugig*. 1. Having but one eye. [F.] See **CYCLOPS**. 2. In botany, having but one point (eye) of vegetation. [a, 35.]

**UNION**, n.  $U^2n-yu^2n$ . Ger., *zweier*. Lat., *unio* (from *unus*, one). Fr., u. Ger., *U. Verbindung*. The act or process of conjoining two or more things, also the condition of being so conjoined. [E; a, 48.]—**Dissolved u.** A condition sometimes seen in fractures in which, callus having once formed and the fragments having been united, the reparative material subsequently dissolves and disappears. [E, 4.]—**Primary u.** See **FIRST INTENTION**.—**Secondary u.** See **SECOND INTENTION**.—**U. of granulations**. See **THIRD INTENTION**.—**Vicious u.** The condition of deformity following badly united fractures. [E.]

**UNIOVULAR**, **UNIOVULATE**, adj's.  $U^2n-i^2-o^2v/u^2l-a^2r$ , -at. From *unus*, one, and *ovulum*, a little egg. Ger., *eineiig*. Having a solitary ovule. [a, 35.]

**UNIPARA** (Lat.), n. f.  $U^2n(un)-i^2p/a^2r(a^2r)-a^2$ . From *unus*, one, and *parere*, to bring forth. A woman who is parturient for the first time. [a, 48.]

**UNIPAROUS**, adj.  $U^2n-i^2p/a^2r-u^2s$ . From *unus*, one, and *parere*, to bring forth. 1. Of animals, usually bringing forth but one foetus at a birth. 2. In botany, producing but one (e. g., a u. cyme is a cyme with one lateral axis). [a, 35.]

**UNIPETALOUS**, adj.  $U^2n-i^2-pe^2t/l-u^2s$ . Lat., *unipetalus* (from *unus*, one, and *petalum*, a petal). Fr., *unipétale*. Ger., *einzelblumenblättrig*. Consisting of a single petal (the others being aborted or non-developed); not to be confounded with *gamopetalous*. [a, 35.]

**UNIPOLAR**, adj.  $U^2n-i^2p/o^2l-a^2r$ . Lat., *unipolaris* (from *unus*, one, and *polus*, a pole). Fr., *unipolaire*. Ger., *einpolig*. Of cells, having but one process. [B.]

**UNISERIAL**, **UNISERIAL**, adj's.  $U^2n-i^2-ser/i^2-l$ , -at. From *unus*, one, and *series*, a row. Fr., *unisérié*. Arranged in a single line. [a, 35.]

**UNISEXUAL**, adj.  $U^2n-i^2-se^2x/u^2l$ . Lat., *unisexualis* (from *unus*, one, and *sexus*, a sex). Fr., *unisexual*. Ger., *eingeschlechtlich*. Having the sexual organs of but one sex; of a flower, having stamens or pistils only. The *Unisexuales* of Bentham and Hooker are a series of monochlamydeous dicotyledons, consisting of the *Euphorbiaceae*, *Cupuliferae*, *Juglandaceae*, etc. [a, 35.]

**UNISANT** (Fr.), adj.  $U^6-ne-sa^2n^2$ . See **CONNECTIVE**.

**UNIT**, n.  $U^2n-i^2t$ . From *unus*, one. Fr., *unité*. Ger., *Einheit*. 1. A single individual. 2. A quantity adopted as a starting-point by comparison with which other quantities are measured. [a, 48.]

**UNITAIRES** (Fr.), n. pl.  $U^6-ne-ta^2r$ . Isidore Geoffroy Saint-Hilaire's first class of monsters, including all in which the elements of a single individual only are found. [A, 301 (a, 34).]

**UNITARISMUS** (Lat.), n. m.  $U^2n(un)-i^2t-a^2r(a^2r)-i^2z(i^2s)/mu^2s(mu^2s)$ . From *unitas*, unity. Ger., *Unitätslehre*. See **UNICISM**.

**UNITÉ** (Fr.), n.  $U^6-ne-ta$ . 1. Oneness, unity. [a, 48.] 2. See **UNIT**.—**U. morbide**. In pathology, the aggregate of the lesions and symptoms which present in different cases sufficient analogy to be classed together under one name. [L, 41 (a, 14).]

**UNITIF** (Fr.), adj.  $U^6-ne-tef$ . See **CONNECTIVE**.

**UNIVALENCE**, n.  $U^2n-i^2v/l-e^2ns$ . Fr., u. Ger., *Einwerthigkeit*. The condition or property of being univalent. [B.]

**UNIVALENT**, adj.  $U^2n-i^2v/l-e^2nt$ . From *unus*, one, and *valere*, to be worth. Ger., *einwerthig*. Having an atomicity of one (i. e., being capable of replacing one atom of hydrogen in a compound). [B.]

**UNIVALVE**, adj.  $U^2n/i^2-v/a^2lv$ . From *unus*, one, and *valva*, a valve. Having a single valve; as a n., a mollusc having a shell consisting of a single valve or piece. [a, 48.]

**UNIVERSAL**, adj.  $U^2n-i^2-vu^2s/l$ . Lat., *universalis* (from *universus*, together). In botany, general, in contradistinction to partial. [a, 35.]

**UNIVOQUE** (Fr.), adj.  $U^6-ne-vok$ . Unequivocal, acting in one way only; of generation, normal (cf. **EQUIVOCAL**). [A, 385 (a, 48).]

**UNLEBENSFÄHIG** (Ger.), adj.  $Un/ab-e^2nz-fa-i^2g$ . Not viable. [a, 14.]

**UNLINING**, n.  $U^3n-lin/i^2n^2$ . See **CHORISIS**.

**UNLÖSLICH** (Ger.), adj.  $Un/lu^2s-li^2ch^2$ . See **INSOLUBLE**.

**UNMÄSSIGKEIT** (Ger.), n.  $Un/mas-si^2g-kit$ . See **INTERPERENCE**.

**UNOCULUS** (Lat.), adj.  $U^2n(un)-o^2k/u^2l(u^2l)-u^2s(u^2s)$ . See **UNIOCLAR**.

**UNONA** (Lat.), n. f.  $Un-on/a^2$ . Fr., u., *unone*. A genus of anonaceous trees or shrubs. The *Unoneae* (Fr., *unonées*) are a subdivision (tribe) of the *Anonaceae*. [a, 35.]—**U. aethiopica**. See *HABZELIA aethiopica*.—**U. narum**. See *U. VARIA narum*.

**UNORDENTLICH** (Ger.), adj.  $Un/ord-e^2nt-li^2ch^2$ . Irregular, atactic.

**UNPAAR** (Ger.), **UNPAARIG** (Ger.), adj's.  $Un/pa^2r$ , - $pa^2r-i^2g$ . See **AZYGOS**.

**UNREGELMÄSSIG** (Ger.), adj.  $Un/rag-e^2l-mas-si^2g$ . See **IRREGULAR**.

**UNREIF** (Ger.), adj.  $Un/rif$ . Unripe, immature. [a, 35.]

**UNREIN** (Ger.), n.  $Un/rin$ . Unclean, dirty. [a, 14.]

**UNREINHEIT** (Ger.), **UNREINLICHKEIT** (Ger.), n.  $Un/rin-hit$ , - $li^2ch^2-kit$ . Uncleanliness. [a, 14.]

**UNREIZBAR** (Ger.), adj.  $Un/rits-ba^2r$ . Not irritable.

**UNRUHE** (Ger.), n.  $Un/ru-e^2$ . Restlessness.—**Muskeln**. 1. Chorea minor. [D.] 2. See **CONVULSIBILITY**.

**UNSATURATED**, adj.  $U^2n-sa^2t/u^2r-at-e^2d$ . Ger., *ungesättigt*. Of a compound, not having the total combining capacities of all its elements satisfied; of a solution, not containing its maximum of a soluble body. [B; L.]

**UNSCHÄDLICH** (Ger.), adj.  $Un/shad-li^2ch^2$ . Harmless. [a, 48.]

**UNSCHMERZHAFT** (Ger.), n.  $Un/shme^2rts-ha^2ft$ . Painless.

**UNSINNIG** (Ger.), adj.  $Un/zi^2n-i^2g$ . Demented, insane. [a, 14.]

**UN SOUNDNESS OF MIND**, n.  $U^3n-su^2/u^2nd-ne^2s$ . A mental condition in which there is inability to transact ordinary affairs properly or to follow certain lines of thought consecutively. [a, 34.]

**UNSTABLE**, adj.  $U^3n-sta^2b'l$ . Lat., *instabilis*. Fr., *instable*. Ger., *unbeständig*. Not fixed or permanent. [a, 48.]

**UNSYMMETRICAL**, adj.  $U^3n-si^2m-e^2t/ri^2k'l$ . 1. Destitute of symmetry (cf. **SYMMETRY** and **ASYMMETRY**). [a, 48.] 2. Of a flower, having whorls which differ in numerical plan. [a, 35.] 3. Of a trisubstituted benzene compound, having two of the replacing radicles attached to two neighboring carbon atoms and the third to the carbon atom which is not adjacent to either of these two. [B.] Cf. **SYMMETRICAL**.

**UNTERBAUCH** (Ger.), n.  $Unt/e^2r-ba^2u^2ch^2$ . See **HYPGASTRIUM**.

**UNTERBINDUNG** (Ger.), n.  $Unt/e^2r-bi^2nd-un^2$ . See **LIGATION** and **LIGATION** (1st def.).

**UNTERCHLORIG** (Ger.), adj.  $Unt/e^2r-klor/i^2g$ . Hypochlorous. [B.]—**U'säure**. Hypochlorous acid. [B.]

**UNTERCHLORSÄURE** (Ger.), n.  $Unt/e^2r-klor/zoir-e^2$ . See **CHLORINE PEROXIDE**.

**UNTERDRÜCKUNG** (Ger.), n.  $Unt/e^2r-dru^2k/un^2$ . See **SUPPRESSION**.

**UNTEREITERN** (Ger.), v. intr.  $Unt/e^2r-it-e^2rn$ . To suppurate beneath. [L, 46 (a, 21).]

**UNTERGESICHT** (Ger.), n.  $Unt/e^2r-ge^2-zi^2ch^2t$ . The lower part of the face. [a, 32.]

**UNTERHALS** (Ger.), n.  $Unt/e^2r-ha^2ls$ . The lower part of the neck. [a, 48.]

**UNTERHAUT** (Ger.), n.  $Unt/e^2r-ha^2u^2t$ . 1. See **CORIUM** (1st def.). 2. The subcutaneous tissue. [J.]

**UNTERHÄUTIG** (Ger.), adj.  $Unt/e^2r-hoit-i^2g$ . See **SUBCUTANEOUS**.

**UNTERHIRN** (Ger.), n.  $Unt/e^2r-hern$ . See **SUBENCEPHALON**.

**UNTERHORN** (Ger.), n.  $Unt/e^2r-ho^2rn$ . See **DESCENDING HORN of the lateral ventricle**.

**UNTERKIEFER** (Ger.), n.  $Unt/e^2r-kef-e^2r$ . See **INFERIOR MAXILLA**.—**U'ast**. The ramus of the inferior maxilla. [L, 31.]—**U'phänomen**. See **JAW-JERK**.

**UNTERKIEMENDECKELSTÜCK** (Ger.), n.  $Unt/e^2r-kem-e^2n-de^2k-e^2l-stu^2k$ . See **SUBOPERCULAR BONE**.

**UNTERKINN** (Ger.), n.  $Unt/e^2r-ki^2n$ . 1. The lower part of the chin. [a, 14.] 2. See **BUCCULA** (1st def.).

**UNTERKÜHLT** (Ger.), adj.  $Unt/e^2r-ku^2lt$ . Cooled below the freezing point without solidifying. [B.]

**UNTERLAPPEN** (Ger.), n.  $Unt/e^2r-la^2p-pe^2n$ . See **BIVENTRAL LOBE and Temporo-sphenoidal LOBE**.—**Hinterer U.** See **POSTERIOR INFERIOR LOBE**.

**UNTERLASSEN** (Ger.), n.  $Unt/e^2r-la^2s-se^2n$ . See **INTERMISSION**.

**UNTERLAUFUNG** (Ger.), n.  $Unt/e^2r-la^2u^2f-un^2$ . See **ECCHYMOSIS and EXTRAVASATION**.

**UNTERLEIB** (Ger.), n.  $Unt/e^2r-lib$ . See **ABDOMEN**.—**U'sbeschauer**. See **LAPAROSCOPE**.—**U'sblähung**. See **TYMPANITES**.—**U'sbruch**. See **ABDOMINAL HERNIA**.

**UNTERPHOSPHORIG** (Ger.), adj.  $Unt/e^2r-fos-for-i^2g$ . See **HYPOPHOSPHOROUS**.—**U'säure**. Hypophosphorous acid. [B.]

**UNTERPHOSPHORSÄURE** (Ger.), n.  $Unt/e^2r-fos-for-zoir-e^2$ . Phosphatic acid. [A, 324.]

**UNTERRIPPENGEGEND** (Ger.), n.  $Unt/e^2r-ri^2p-pe^2n-gag-e^2nd$ . See **HYPochondriac REGION**.

**UNTERSALPETERSÄURE** (Ger.), n.  $Unt/e^2r-za^2l-pat-e^2r-zoir-e^2$ . Hyponitric acid. [A, 324.]

**UNTERSCHIEDUNG** (Ger.), n.  $Unt/e^2r-shid-un^2$ . See **DIFFERENTIATION and DIAGNOSIS**.

**UNTERSCHENKEL** (Ger.), n. *Unt'e²r-she²n²k-e²l*. See **LEO** (1st def.).—**U²strecker**. See **EXTENSOR quadriceps femoris**.

**UNTERSCHIED** (Ger.), n. *Unt'e²r-shed*. See **DIAPHORA**.

**UNTERSCHLÄCHTIG** (Ger.), adj. *Unt'e²r-shlach²t-i²g*. See **SUCCUBOUS**.

**UNTERSCHLÄFENFISTE** (Ger.), n. *Unt'e²r-shlaf-e²n-ferst-e²*. See **INFRATEMPORAL CREST**.

**UNTERSCHLÜSSELBEINMUSKEL** (Ger.), n. *Unt'e²r-shlu²s-e²l-bin-musk-e²l*. See **SUBCLAVIUS**.

**UNTERSCHULTERBLATTMUSKEL** (Ger.), n. *Unt'e²r-shult-e²r-bla²t-musk-e²l*. See **SUBSCAPULARIS**.

**UNTERSCHWEFLIG** (Ger.), adj. *Unt'e²r-shwaf-li²g*. See **HYPOSULPHUROUS**.

**UNTERSCHWEFELSÄURE** (Ger.), n. *Unt'e²r-shwaf-e²l-zoir-e²*. **Hyposulphuric acid**. [A, 324.]

**UNTERSUCHUNG** (Ger.), n. *Unt'e²r-zuch²-un²*. See **EXAMINATION**.—**Doppelte U.** Combined abdomino-vaginal examination.—**Fingern²**. See **Digital EXAMINATION**.—**Gemischte U.**, **Mehr-seitige U.** See **Bimanual EXAMINATION**.—**Sondenn²**. An examination with a sound.—**U²lehre**. See **DOCIMASIOLOGIA**.

**UNTERTAUCHEN** (Ger.), **UNTERTAUCHUNG** (Ger.), n's. *Unt'e²r-ta²-u²ch²-e²n*, *-un²*. See **IMMERSION**.

**UNTERTUCH** (Ger.), n. *Unt'e²r-tuch²*. See **ALÈZE**.

**UNTERWEIBIG** (Ger.), adj. *Unt'e²r-vib-i²g*. See **HYPGYNOUS**.

**UNTERWUNDRART** (Ger.), n. *Unt'e²r-vund-a²rtst*. An assistant surgeon. [A, 14.]

**UNTERWURM** (Ger.), n. *Unt'e²r-vurm*. See **INFERIOR vermi-form PROCESS**.

**UNTERZWICKEL** (Ger.), n. *Unt'e²r-tswi²k-e²l*. See **SUBCUNEUS**.

**UNVERBRENNBAR** (Ger.), **UNVERBRENNLICH** (Ger.), adj's. *Un'fe²r-bre²n-ba²r*, *-li²ch²*. See **INCOMBUSTIBLE**.

**UNVERDAULICH** (Ger.), adj. *Un'fe²r-da²-u²-li²ch²*. See **INDIGESTIBLE**.

**UNVERDAUUNG** (Ger.), n. *Un'fe²r-da²-u²-un²*. See **INDIGESTION** (1st def.).

**UNVERMÖGEN** (Ger.), n. *Un'fe²r-mu²g-e²n*. See **IMPOTENCE**.

**UNVERTRÄGLICH** (Ger.), adj. *Un'fe²r-trag-li²ch²*. See **INCOMPATIBLE**.

**UNVOLLKOMMEN** (Ger.), adj. *Un'fol-ko²m-me²n*. See **IMPERFECT**.

**UNWELL**, adj. *U²n-we²l*. 1. Sick, affected with illness. [A, 48.] 2. See **MENSTRUOUS** (2d def.).

**UNWILLKÜRLICH** (Ger.), adj. *Un'vi²l-ku²r-li²ch²*. See **INVOLUNTARY**.

**UNWOLHSEIN** (Ger.), n. *Un'vol-zin*. Indisposition. [L, 57.]

**UNWURZELKEIMER** (Ger.), n. pl. *Un'vurts-e²l-kim-e²r*. See **ARRHIZOBLASTÆ**.

**UNXIA** (Lat.), n. f. *U²n²x(u²n²x)²-i²-a²*. Fr., *unxie*. A genus of the *Compositæ*, referred by Benthams and Hooker to *Melanopodium*. [a, 35.]—**U. camphorata**. A Surinam species; used as a sudorific, and especially as an application in lumbago. [a, 35.]

**UNZEITIG** (Ger.), adj. *Un'tsit-i²g*. Premature, immature. [A, 521 (a, 48).]

**UNZULÄNGLICHKEIT** (Ger.), n. *Un'tsu-lan²-li²ch²-kit*. See **INSUFFICIENCY**.

**UNZURECHNUNGSFÄHIG** (Ger.), adj. *Un'tsu-re²ch²-nun²z-fa²g*. Not accountable, irresponsible. [a, 14.]

**UPAS** (Mal.), n. *U²pa²s*. A poison, especially the *U. antiar* and *U. tieute*. [a, 35.]—**U. antiar**. See **ANTIAR**.—**U. bidji**. See **SOPHORA tomentosa**.—**U. radja**, **U. tieute**. A poison more active than the *antiar* u., prepared from a decoction of the root-bark of *Strychnos tieute*, mixed with garlic, pepper, etc. It resembles strychnine in its effects. [a, 35.]—**U. tree**. See **ANTIARIS toxicaria**.

**UPPER BLUE LICK SPRINGS**, n. *U²p²u²r-blu²-li²k*. A place in Nicholas County, Kentucky, where there is a gaseous and sulphurous spring. [Anderson (a, 14).]

**URACHAL**, adj. *U²r²a²-k²l*. Pertaining to the urachus.

**URACHUS** (Lat.), n. m. *U²r(ur)²a²k(a²ch²)-u²s(u²s)*. From *oûron*, urine, and *êyeiv*, to hold. Fr., *ouraque*, Ger., *Harngang*, *Harnstrang*, *Harnblusenschwur*, *Blasenband*. In the embryo, a tubular extension of the walls of the urinary bladder toward and in part through the umbilicus to join the allantois; in the human embryo it does not generally pass beyond the root of the umbilical cord. In the adult, a ligamentous cord resulting from obliteration of the u. of the embryo connecting the bladder with the front wall of the abdomen. [A, 5; L, 12 (a, 27).]

**URACRASIA** (Lat.), **URACRATIA** (Lat.), n's f. *U²r(ur)²a²k(a²k)-ra²z(ra²s)²-i²-a²*, *-ra²sh(ra²t)²-(e)²a²*. From *oûron*, urine, and *ακρασία*, or *ἀκράτεια*, debility. See **ENTREISIS**.

**URÆMIA** (Lat.), n. f. *U²r(ur)²-em²(a²em)²-i²-a²*. From *oûron*, urine, and *αἷμα*, blood. Fr., *urémie*. Ger., *Crämie*, *Harnstoff-blutvergiftung*. A poisoned state of the blood due to defective elimination of the elements of urine in consequence of impairment of the functional capability of the kidneys, or by their resorption in cases of retention of urine; characterized by stupor and, especially in lying-in women, by convulsions.—**Dysuric u.**, **Pulmonary u.**—See **URÆMIC DYSURIA**.—**Renal u.** U. caused by retention of urine in the kidneys. [L, 57 (a, 14).]—**Urethral u.** U. caused by

retention of urine in the ureters. [L, 57 (a, 14).]—**Urethral u.** U. caused by constriction of the urethra and consequent retention of urine. [L, 57 (a, 14).]—**Vesical u.** U. caused by retention of urine in the bladder. [L, 57 (a, 14).]

**URÆMIC**, adj. *U²r-e²m²-i²k*. Lat., *uræmicus*. Fr., *urémique*. Ger., *urämisch*. Pertaining to or due to uræmia. [D.]

**URAGOGUS** (Lat.), adj. *U²r(ur)²-a²g(a²g)-og²(u²s)²-u²s*. From *oûron*, urine, and *ἀγαν*, to drive. Fr., *uragogue*. See **DIURETIC**.

**URAL**, n. *U²r²l*. Lat., *uralium*. A hypnotic combination of urethane and chloral hydrate; used in cardiac disease, mental disorders, and hysteria. ["N. Y. Med. Jour.," Feb. 1, 1890, p. 130.]

**URALI**, n. *Ur-a²le*. See **CURARE** (1st def.).

**URALIUM** (Lat.), n. n. *U²r(ur)²-a²(a²)²-li²-u²m(u²m)*. See **URAL**.

**URAMIDOBENZOIC ACID**, n. *U²r-a²m-i²d-o²-be²nz-o²-i²k*. Fr., *acide uramidobenzoïque*. Ger., *Uramidobenzoësäure*. An acid,  $C_{10}H_7N_2O_6$ , known in three isomeric forms: *Orthou² acid*, acicular crystals; *metau² acid*, acicular or prismatic crystals containing water of crystallization; and *parau² acid*, long tabular crystals. [B; B, 3 (a, 38).]

**URAMIDOXIME**, n. *U²r-a²m-i²d-o²-x²-i²m*. A body having at once the structure of a substituted urea and of an amidoxime. [B.]

**URAMIL**, n. *U²r-a²m-i²l*. Fr., *uramile*. Ger., *U. Of Liebig* and *Wöhler*, dialuramide. [B, 4.]

**URANALYSIS** (Lat.), n. f. *U²r(ur)²-a²n(a²n)-a²l(a²l)²-i²s(u²s)²-i²s*. Gen., *-ys²eos(-al²ysis)*. From *oûron*, urine, and *ἀνάλυσις*, a loosing. The analysis of urine.

**URANATE**, n. *U²r²a²n-at*. A compound of a metallic oxide with uranium trioxide. [B, 3.]

**URANE** (Fr.), n. *U²r²a²n*. A substance long considered an elementary body, but now shown to be a uranium oxide. [B.]

**URANFÄHLICH** (Ger.), adj. *Ur²a²n-fan²-li²ch²*. See **PRIMORDIAL**.

**URANIC**, adj. *U²r²a²n-i²k*. Fr., *uranique*. Containing uranium as a hexad radicle. [B.]

**URANIN**, n. *U²r²a²n-i²n*. 1. A compound of fluorescein with ammonia. ["Dtsch. med. Wchnschr.," 1882, 2, 3, 4 (B).] 2. A dye-stuff,  $C_{20}H_{10}O_6Na_2$ , the sodium salt of fluorescein. [B, 270 (a, 38).]

**URANISCOCHASMA** (Lat.), n. n. *U²r(ur)²-a²n(a²n)-i²sk-o²(a²)-ka²z(ch²a²s)²-ma²*. Gen., *-chas²matus(-atis)*. From *oûraniskos*, the palate, and *χάσμα*, a yawning. See **Cleft PALATE**.

**URANISCONITIS** (Lat.), n. f. *U²r(ur)²-a²n(a²n)-i²sk-o²n-i²-(e)²-ti²s*. Gen., *-it²idos(-idis)*. From *oûraniskos*, the palate. Fr., *palatite*. Ger., *Gaumenentzündung*. Inflammation of the palate. [E.]

**URANISCOPLASTY**, n. *U²r²a²n-i²sk-o²-pla²st-i²*. Lat., *uraniscoplasticæ* (from *oûraniskos*, the palate, and *πλάσσειν*, to mold). Fr., *uraniscoplasticæ*. See **URANOPLASTY**.

**URANISCORRHAPHY**, n. *U²r²a²n-i²sk-o²r²a²f-i²*. Lat., *uraniscorrhaphia*, *uraniscorrhaphæ* (from *oûraniskos*, the palate, and *ῥαφή*, a suture). Fr., *uraniscorrhaphie*. See **STAPHYLORRHAPHY**.

**URANISCOSTÉOPLASTIE** (Fr.), n. *U²r²a²-ne-sk-o²-sta-o-pla²st-e*. Restoration of the osseous palate by a plastic operation.

**URANISCUS** (Lat.), n. m. *U²r(ur)²-a²n(a²n)-i²sk-u²s(u²s)*. Gr., *οὐρανίσκος* (from *οὐρανός*, the vault of heaven). The vault of the mouth, the palate. [a, 48.]

**URANIUM** (Lat.), n. n. *U²r(ur)²-an(a²n)²-i²-u²m(u²m)*. Fr., *u.* Ger., *Uran*. A metallic element discovered by Klaproth in 1789, eight years after the discovery of the planet Uranus, from which it was named. It occurs in nature usually as an oxide. It is a hard, malleable, grayish-white metal of silvery lustre. In composition it acts as a tetrad, pentad, or hexad. Symbol, *U*; sp. gr., 18.39; atomic weight, 240. [B, 3.]—**U. tetroxide**. A body,  $UO_4$ , forming either a colorless micro-crystalline powder, or combined with water of crystallization,  $UO_4 \cdot 2H_2O$ , a yellowish-white substance. [B, 3.]—**U. trioxide**. A brownish-yellow powder,  $UO_3 = (UO_3)/O$ . [B, 3.]

**URANLAGE** (Ger.), n. *Ur²a²n-la²g-e²*. A primary rudiment; a germ. [A, 8.]

**URANOCOLOBOMA** (Lat.), n. n. *U²r(ur)²-a²n(a²n)-o²(a²)-ko²l-o²b²-om²-a²*. Gen., *-bom²atos(-atis)*. From *oûranos*, the palate, and *κολοβωμα*, mutilation. See **Cleft PALATE**.

**URANOMANIA** (Lat.), n. f. *U²r(ur)²-a²n(a²n)-o²(a²)-man²(ma²n)²-i²-a²*. From *oûranos*, heaven, and *μανία*, madness. A form of megalomania involving belief in the subject's divine or celestial origin. [A, 540 (a, 34).]

**URANOPLASTIC**, adj. *U²r²a²n-o²-pla²st-i²k*. Fr., *uranoplastique*. Ger., *Uranoplastik*. Pertaining to uranoplasty. [L, 107.]

**URANOPLASTY**, n. *U²r²a²n-o²-pla²st-i²*. From *οὐρανός*, the palate, and *πλάσσειν*, to mold. Fr., *uranoplastie*, *uranoplastie*. Ger., *Gaumenbildung*, *Uranoplastik*. The plastic surgery of the palate. Cf. **STAPHYLORRHAPHY**.—**Dieffenbach's u.**, **Fergusson's u.** An operation in which the edges of the hard palate are first drilled with holes with a curved bradawl for the passage of the threads; the palate itself is then cut through with a chisel in a line parallel to and half an inch from the edge of the cleft; the edges are thus brought together, and the spaces left where the cuts are made by the chisel are allowed to heal by granulation. [E.]—**Mason's u.** An operation in which the holes are first drilled with a curved bradawl through the hard palate on each side of the cleft to facilitate the use of the chisel and guide it in the division of the bone. [E.]

**URANORRHAPHIE** (Lat.), **URANORRHAPHIA** (Lat.), n's f. *U²r(ur)²-a²n(a²n)-o²r²a²f-i²(a²)-e²(a)*, *-o²r²a²f-i²(a²)-i²-a²*. Ger., *-rhap²hes*, *-rhap²hie*. From *οὐρανός*, the palate and *ῥαφή*, a suture. See **STAPHYLORRHAPHY**.

**URANOSCHISIS** (Lat.), **URANOSCHISMA** (Lat.), n. s. f. and n.  $U_3(ur)(ur-a^n)(a^n)-o^2sk(o^2sch^2/i^2s-i^2s, -o(o^2)-ski^2z(sch^2/i^2s)/ma^3$ . Gen., *-schis/eos (-och/i/osis), -schis/matos (-atis)*. From *οὐρανός*, the palate, and *σχίζω*, to cleave. See *Cleft PALATE*.

**URANOSO-URANIC**, adj.  $U_2r^2-a^n-o^2-u^2r-a^n/i^2k$ . Containing uranium both as a tetrad and as a hexad radicle. [B.]

**URANO-STAPHYLOKAPHY**, n.  $U_2r^2/a^n-o-sta^2f-i^2l-o^2r^2a^2f-i^2$ . From *οὐρανός*, the palate, *σταφυλή*, the uvula, and *πάφν*, a suture. Suture of the hard and of the soft palate. [a, 34.]

**URANOUS**, adj.  $U_2r^2/a^n-u^2s$ . Fr., *uraneux*. Containing uranium as a tetrad radicle. [B.]

**URANOXYD** (Ger.), n.  $Ur-a^n/ox-u^2d$ . Uranium trioxide; in composition with a qualifying adjective, a salt of uranyl. [B.]

**URANOXYDUL** (Ger.), n.  $Ur-a^n/ox-u^2d-ul$ . Uranium dioxide; in composition with a qualifying adjective, a uranous oxy-salt. [B.]

**URANYL**, n.  $U_2r^2/a^n-i^2l$ . Fr., *uranyle*. The dibasic radicle,  $UO_2$ , supposed to be present in the uranic compounds. [B, 2, 3.]—**U. acetate**. A substance,  $UO_2(C_2H_3O_2)_2 + H_2O$ , proposed as a test for albumin. [B.]—**U. and ammonium carbonate**. A lemon-colored, crystalline salt,  $UO_2CO_3 \cdot (NH_4)_2CO_3$ . [B, 3.]—**U. and ammonium phosphate**. A greenish-yellow substance,  $UO_2 \cdot (NH_4)_2PO_4$ , formed in one of the processes for the volumetric determination of phosphoric acid and also of uranium. [B, 3.]—**U. and calcium carbonate**. An apple-green substance,  $UO_2CO_3 \cdot CaCO_3 + 10H_2O$ , occurring native as a mineral. [B, 3.]—**U. and potassium carbonate**. A crystalline salt,  $UO_2CO_3 \cdot 2K_2CO_3$ . [B, 3.]—**U. and potassium fluoride**. A body,  $UO_2F_2 \cdot 3KF$ , forming lemon-colored crystals. [B, 3.]—**U. arsenate**. A compound of u. and arsenic acid. Salts of the constitution  $(UO_2)_2(AsO_4)_2 + 12H_2O$  and  $(UO_2)_4(AsO_4)_4 + 4H_2O$  are known. [B, 2, 3.]—**U. bromide**. A body,  $UO_2Br_2$ , forming yellow acicular crystals. [B, 3.]—**U. carbonate**. A compound of u. and carbonic acid. Double carbonates of u. and the alkaline metals and earths are known. [B.]—**U. chloride**. A yellow crystalline mass,  $UO_2Cl_2$ , or, combined with water of crystallization,  $UO_2Cl_2 \cdot H_2O$ . It forms double salts with the chlorides of the alkaline metals and with the hydrochlorides of organic basic compounds. [B, 3.]—**U. disulphate**. See *U. pyrosulphate*.—**U. fluoride**. A light-colored amorphous mass,  $UO_2F_2$ . It forms double salts with the fluorides of potassium, sodium, ammonium, and barium. [B, 3.]—**U. hydroxide**. A yellowish mass,  $UO_2(OH)_2 + H_2O$ . [B, 3.]—**U. nitrate**. A body,  $UO_2(NO_3)_2 + 6H_2O$ , forming prismatic crystals. [B, 3.]—**U. oxide**. See *URANIUM trioxide*.—**U. peruranate**. See *URANIUM tetroxide*.—**U. phosphate**. A compound of u. and phosphoric acid; the salt  $UO_2(H_2PO_4)_2 + 3H_2O$ , or  $2UO_2(H_2PO_4)_2 + 3H_2O$ , is known. [B, 3.]—**U. pyrosulphate**. A crystalline compound,  $UO_2S_2O_7$ . [B, 3.]—**U. sulphate**. A substance,  $UO_2SO_4 + 3H_2O$ , crystallizable with difficulty. It forms a green compound with sulphuric acid,  $UO_2SO_4 + H_2SO_4$ , and double sulphates with the alkaline metals. [B, 3.] See also *U. pyrosulphate*.—**U. sulphide**. The compound  $UO_2S$ . [B, 3.]

**URAPOSTEMA** (Lat.), n. n.  $U_2r(ur)-a^2p(a^2p)-o^2st-em(am)/a^2$ . Gen., *-em/atos (-atis)*. From *οὐρον*, urine, and *ἀπόστημα*, an abscess. An abscess containing urine. [E.]

**URARI**, n.  $U_2r-a^2r^e$ . See *CURARE*.

**URAROMA** (Lat.), n. n.  $U_2r(ur)-a^2r(a^2r)-om/a^2$ . Gen., *-om/atos (-atis)*. From *οὐρον*, urine, and *ἀρωμα*, a spice. Ger., *Harnarom*. A special musk-like odor said to have been observed in the urine of gouty persons and of some animals. [L, 50 (a, 14).]

**URARTHRTIS** (Lat.), n. f.  $U_2r(ur)-a^2rth-r(re)/ti^2s$ . Gen., *-thrit/idos (-idis)*. From *οὐρον*, urine, and *ἄρθρον*, a joint. See *ARTHRITIS uratica*.

**URATE**, n.  $U_2r^2at$ . Lat., *uras*. Fr., u. Ger., *harnsaures Salz*. A salt of uric acid. [K.]

**URATOSIS** (Lat.), n. f.  $U_2r(ur)-a^2t(a^2t)-os/i^2s$ . Gen., *-os/eos (-is)*. From *uras*, a urate. The precipitation of crystalline urates in the tissues or fluids of the body. [W. Roberts, "Brit. Med. Jour.," Nov. 22, 1890 (a, 34).]

**URATURIA** (Lat.), n. f.  $U_2r(ur)-a^2t(a^2t)-u^2r(ur)/i^2a^2$ . From *uras*, a urate, and *οὐρον*, urine. Gen., *Uraturie*. An abnormal excretion of urates in the urine. [L, 50 (a, 14).]

**URAWEL**, n. A place in the Caucasus where there is an alkaline and ferruginous spring. [L, 57 (a, 14).]

**URBALACONE** (It.), n.  $Ur-ba^2-l^2a^2-ko^2na$ . A place in Corsica where there are hot sulphurous springs. [a, 14].

**URBANYA**, n.  $U_2r-ba^2n-ya^2$ . A place in the department of the Pyrénées-Orientales, France, where there is a chalybeate spring.

**URBEROAGA DE ALZOLA** (Sp.), n.  $Urb-ar-o-a^2g/a^2$  da  $U^2b-th^2o^2la^2$ . A place in Guipuzcoa, Spain, where there is a warm mineral spring. [L, 49, 57 (a, 14).]

**URBEROAGA DE UBIELLA**, n.  $Urb-ar-o-a^2g/a^2$  da  $U^2b-e^2l/ya^2$ . A place in Biscay, Spain, where there is a warm saline spring. [L, 57 (a, 14).]

**URBILD** (Ger.), n.  $Ur/bi^2ld$ . See *ARCHETYPE*.

**URCOLARIA** (Lat.), n. f.  $U^2rs(urk)-e^2-o^2l-ar(a^2r)/i^2a^2$ . From *urceolus*, a little pitcher. Fr., *urcéolaire*. Ger., *Krugflechte*. A genus of lichens. The *Urcolariaceae* (*Urcolariaceae*, *Urcolarineae*) are a subfamily of the *Lecanoreae*. [a, 35.]—**U. esculenta**. A species used as food in northern Russia. [a, 35.]

**URCEOLATE**, adj.  $U^2rs/e^2-o^2l-at$ . Lat., *urceolatus* (from *urceolus*, a little pitcher). Fr., *urcéolé*. Ger., *Krugig*. Urn-shaped. [a, 35.]

**URCEOLUS** (Lat.), n. m.  $U^2rs(urk)-e^2-o^2l-u^2s(u^2s)$ . Dim. of *urceus*, a pitcher. Fr., *urcéole*. Ger., *Krug*. Any one of various urn-shaped parts (e. g., the calyx-tube of roses or [De Candolle] the

perigynium of the *Cariceae*). [a, 35.]—**U. nectarifer**. Ger., *Honigkrug*. The urceolate (often nectariferous) perianth of *Mirabilis*, *Balanites*, etc. [a, 35.]

**URDARM** (Ger.), n.  $Ur^2da^2rm$ . See *ARCHENTERON* and *BLASTOCÉLE*.

**UREA** (Lat.), n. f.  $U_2r(ur)-e(a)/a^2$ . From *οὔρον*, urine. Fr., *urée*. Ger., *Harnstoff*. Carbamide, or carboxyldiamine,  $CON_2H_4 = O \{ NH_2 \}_2$  (or  $H_2N-(CO)-NH_2$ ), the chief solid constituent of the urine and the principal excretory product containing nitrogen. It forms long, colorless, prismatic crystals, melting at  $130^\circ C$ , soluble in water and moderately soluble in alcohol. It acts as a base, forming addition compounds with acids and their salts and with metallic oxides. It is decomposed by heat and moisture, and more slowly by the action of an organized ferment (*Micrococcus ureae*), into normal ammonium carbonate. This process takes place in the urine, constituting its so-called alkaline fermentation and giving to stale urine its peculiar strong ammoniacal odor. U. is also decomposed into cyanogen compounds (cyanuric acid and ammeline) by the action of dry heat. It is remarkable as being the first organic body that was prepared artificially, Wöhler having accomplished this in 1828 by making the isomeric cyanate of ammonium, and then transforming the latter into u. by evaporation. [B.]—**Me-soxalyl u.** See *ALLOXAN*.—**U. and mercury nitrate**. An addition compound of varying composition formed by the action of mercuric nitrate on u. [B.]—**U. argentic oxide**. Ger., *Harnstoffsilberoxyd*. A grayish granular substance,  $2CO.N_2H_4.3Ag_2O$ . [B.]—**U. cyanurate**. See *TETRACRET*.—**U. hydrochloride**. A deliquescent crystalline mass,  $CON_2H_4.HCl = H_2N-CO-NH_2.HCl$ , formed by the action of dry hydrochloric acid gas on u. [B.]—**U. mercuric oxide**. Ger., *Harnstoffquecksilberoxyd*. 1. A white crystalline powder,  $CON_2H_4.HgO$ . 2. A gelatinous substance,  $2CON_2H_4.3HgO$ . 3. The compound  $CON_2H_4.2HgO$ . [B.]—**U. nitrate**. A substance,  $CON_2H_4.HNO_3 = H_2N-(CO)-N_2HONO_2$ , forming tabular crystals on the addition of nitric acid to a solution of u. (concentrated urine). [B.]—**U. oxalate**. A substance,  $2CON_2H_4.H_2C_2O_4 + 2H_2O = H_2N-CO-NH_2.O.C_2O_2.O.H_2N-CO-NH_2 + H_2O$ , forming laminar crystals, and produced by the action of oxalic acid on a rather concentrated solution of u. [B.]—**U. sodiochloride**. A substance,  $CON_2H_4.NaCl + H_2O$ , obtained as a crystalline body by evaporating a solution containing both u. and sodium chloride urine. [B.]

**URECCHYSIS** (Lat.), n. f.  $U_2r(ur)-e^2k/ki^2s(ch^2u^2s)-i^2s$ . Gen., *-chys/eos (-ec/chysis)*. From *οὐρον*, urine, and *ἐκχύω*, a pouring out. Fr., *urecchysie*. Ger., *Harnergiessung*. Effusion of urine into the cellular tissue. [L, 50 (a, 14).]

**URECHITES** (Lat.), n. f.  $U_2r(ur)-e^2k(e^2ch^2/i^2t-ez/as)$ . A genus of West Indian and Mexican apocynaceous undershrubs. [a, 35.]—**U. suberecta**. The *Echites suberecta*. [a, 35.]

**URECHITIN**, n.  $U_2r-e^2k-it/i^2n$ . From *urechites* (q. v.). A glucoside,  $C_{26}H_{41}O_9 + XH_2O$ , obtained by Bowrey from the leaves of *Urechites suberecta*. [B, 270 (a, 38).]

**URECHITOXIN**, n.  $U_2r-e^2k-i^2t-o^2x/i^2n$ . From *urechites* (q. v.), and *τοξον*, a bow. Of Bowrey, a glucoside obtained from the leaves of *Urechites suberecta*. [B, 270 (a, 38).]

**UREDIO** (Lat.), n. f.  $U_2r(ur)-ed(ad)/o$ . Gen., *-ed/inis*. From *urere*, to burn. Fr., *urédio*. Ger., *Schmierbrand* (3d def.). 1. Itching with a sensation of burning. 2. Urticaria. 3. The typical genus of the *Urediei* (of Fries, a subdivision of the *Uredineae*). The *Uredineae* of Lindley are the *Coniomycetes* of Fries. The *Uredineae* (Ger., *Uredineen*, *Rostpilze*), or *Uredineae* (Fr., *urédines*), are a division of the *Hypodermiceae*, parasitic as yellowish, brownish, or blackish spots (rusts) on the stems and leaves of various plants. Some of them are very destructive to crops (cf. *Corn-MILDREW*). [a, 35.]—**U. maydis**. See *USTILAGO maydis*.

**UREDOSPORE**, n.  $U_2r-e^2d/o-spor$ . From *uredo*, a blast, and *σπόρος*, a sowing. One of the yellowish spores (see under *Corn-MILDREW*) formed early in the season by the *Uredineae*. U's are produced from a mycelium growing within a grass or other plant, on which they form rust-like spots. [a, 35.]

**URÉE** (Fr.), n.  $U^2ra$ . See *UREA*.

**UREI** (Ger.), n.  $Ur^2l$ . See *PRIMITIVE OVUM*.

**URELCOMA** (Lat.), n. n.  $U_2r(ur)-e^2lk-om/a^2$ . Gen., *-om/atos (-atis)*. Ger., *Harngeschwür*. An ulcer of the urinary passages. [a, 34.]

**URELCOSIS** (Lat.), n. f.  $U_2r(ur)-e^2lk-os/i^2s$ . Gen., *-cos/eos (-is)*. From *οὐρον*, urine, and *ἔλκος*, ulceration. Fr., *urelcosse*. 1. Ulceration in the urinary tract. 2. Of Fuchs, any one of certain forms of ulceration, especially on the legs, supposed to be due to irregularities in the urinary secretion. [G, 5.]

**UREMA** (Lat.), n. n.  $U_2r(ur)-em(am)/a^2$ . Gen., *-em/atos (-atis)*. Gr., *οὐρμα* (from *οὐρον*, urine). See *URINE*.

**URÉMIE** (Fr.), n.  $U^2ra-me$ . See *URÆMIA*.

**URENA** (Lat.), n. f.  $Ur-an/a^2$ . Fr., *urène*. Indian mallow; a genus of tropical herbs and shrubs forming, with *Pavonia*, *Malva viscosa*, etc., a tribe (the *Ureneae*) of the *Malvaceae*. [a, 35.]—**U. heterophylla**. An Indian species. The root is used in snakebites. [a, 35.]—**U. lobata**. A species found in southeastern Asia. The flowers are used as an emollient and expectorant, the leaves as a vulnerary, and the root as an oxytocic. [a, 35.]—**U. scabriscula**. A shrub found from India to Brazil. The flowers are used as a pectoral, and the root and stem for flatulent colic. [a, 35.]

**URENIUM** (Lat.), n. n.  $U_2r(ur)-en(an)/i^2-u^2m(u^2m)$ . See *UREA*.

**URENS** (Lat.), adj.  $U_2r(ur)/e^2nz(ans)$ . Gen., *-en/tis*. From *urere*, to burn. Stinging, having stinging hairs. [a, 35.]

**UREO-CARBONIC ACID**, n.  $U_2r^2-e^2o-ka^2rb-o^2n/i^2k$ . See *ALLOPHANIC acid*.

**UREORRHEA** (Lat.), n. f.  $U^2r(ur)-e^2o-r-re/(ro^2e^2)-a^2$ . From *οὐρον*, urine, and *ῥέω*, a flowing. Fr., *urorrhée*. Excessive flow of urine, diabetes. [L, 50 (a, 14).]

**URESISTHESIS** (Lat.), n. f.  $U^2r(ur)-e^2s(as)-i^2e^2s(a^2)-e^2s(-th)(a)^2$ . Gen., *-thes(e)-is*. From *οὐρησις*, urination, and *αἰσθησις*, sensation. Fr., *urésisthèse*. Ger., *Fisserigsein*. A persistent inclination to urinate. [L, 50 (a, 48).]

**URESIS** (Lat.), n. f.  $U^2r(ur)-e(a)^2s(a)^2$ . Gen., *-es(e)-is*. Gr., *οὐρησις* (from *οὐρεῖν*, to urinate). Fr., *urésie*. See URINATION.

**URETER** (Lat.), n. m.  $U^2r(ur)-et(at)^2r(ar)$ . Gen., *-er'os(-is)*. Gr., *οὐρητήρ*. Fr., *urètre*. Ger., *Harnleiter*. The tube continuous with the pelvis of the kidney, which transports the urine to the bladder. It consists of an external fibrous, an internal mucous, and an intervening muscular coat, is about fifteen or sixteen inches in length, the size of a goose-quill, and descends beneath the peritoneum to the point of reflection of the posterior false ligament of the bladder, between the folds of which it passes to the side of the bladder along which it runs, and pierces it obliquely about an inch and a half to two inches posterior to the opening of the urethra. [L, 31, 142, 332.]

**URETERALGIA** (Lat.), n. f.  $U^2r(ur)-e^2t(at)-e^2r(ar)-a^2l(j)(a)^2lg/-i^2a^2$ . From *οὐρητήρ*, the ureter, and *άλγος*, pain. Fr., *urétéralgie*. Ger., *Harnleiter-schmerz*. Pain in the ureter. [L, 50 (a, 14).]

**URETERIC**, adj.  $U^2r-e^2t-e^2r'ik^2$ . Fr., *urétrique*, *urétéral*. Ger., *uretrisch*. Pertaining to the ureters.

**URETERITIS** (Lat.), n. f.  $U^2r(ur)-e^2t(at)-e^2r(ar)-i(e)^2ti^2s$ . Gen., *-it'id'os(-idis)*. From *οὐρητήρ*, the ureter. Fr., *urétrite*. Ger., *Harnleiterentzündung*. Inflammation of the ureter. [a, 14.]

**URETERODIALYSIS** (Lat.), n. f.  $U^2r(ur)-e^2t(at)-e^2r(ar)-o-(o^2)-di(di)^2-a^2l(a^2)/i^2(u^2)-si^2s$ . Gen., *-ys'eos(-al'ysis)*. From *οὐρητήρ*, the ureter, and *διάλυσις*, dissolution. Fr., *urétérodialyse*. Ger., *Harnleiterverletzung*. Injury to or rupture of the ureter. [a, 14.]

**URETEROLITHIASIS** (Lat.), n. f.  $U^2r(ur)-e^2t(at)-e^2r(ar)-o-(o^2)-li^2th-i^2a(a^2)/si^2s$ . Gen., *-as'eos(-is)*. From *οὐρητήρ*, the ureter, and *λίθος*, lithiasis. Fr., *urétérolithiasis*. The formation or presence of a calculus in the ureter. [L, 50 (a, 14).]

**URETEROLYSIS** (Lat.), n. f.  $U^2r(ur)-e^2t(at)-e^2r(ar)-o^2l(i^2u^2)-si^2s$ . Gen., *-ys'eos(-ol'ysis)*. From *οὐρητήρ*, the ureter, and *λύσις*, a loosing. Ger., *Harnleiterlähmung* (1st def.). 1. Paralysis of the ureter. [L, 50 (a, 14).] 2. See URETERODIALYSIS.

**URETEROPHLEGMA** (Lat.), n. n.  $U^2r(ur)-e^2t(at)-e^2r(ar)-o-(o^2)-fle^2g/ma^2$ . Gen., *-phle'gmato(-atis)*. From *οὐρητήρ*, the ureter, and *φλέγμα*, phlegm. Fr., *urétérophlegme*. Ger., *Harnleiterverschleimung*. An accumulation of mucus in the ureter. [a, 14.]

**URETEROPHLEGMASIA** (Lat.), n. f.  $U^2r(ur)-e^2t(at)-e^2r(ar)-o-(o^2)-fle^2g-ma^2z(ma^2)s/i^2a^2$ . From *οὐρητήρ*, the ureter, and *φλεγμασία* (see PHLEGMASIA). Fr., *urétérophlegmasie*. See URETERITIS.

**URETEROPYOSIS** (Lat.), n. f.  $U^2r(ur)-e^2t(at)-e^2r(ar)-o-(o^2)-pi-(pu^2)-os/i^2s$ . Gen., *-os'eos(-is)*. From *οὐρητήρ*, the ureter, and *πύον*, pus. Fr., *urétéropyose*. Ger., *Harnleitervereiterung*. Suppuration of the ureter. [L, 50 (a, 14).]

**URETERORRHAGIA** (Lat.), n. f.  $U^2r(ur)-e^2t(at)-e^2r(ar)-o^2r-raj(rag^2)/i^2a^2$ . From *οὐρητήρ*, the ureter, and *ῥήγνυσθαι*, to burst forth. Fr., *urétérorrhagie*. Ger., *Harnleiterblutung*. Hemorrhage from the ureter. [L, 50 (a, 14).]

**URETERORRHAPHY**, n.  $U^2r-e^2t-e^2r-o^2r-ra^2f-i^2$ . From *οὐρητήρ*, the ureter, and *ῥαφή*, a suture. Suture of the ureter. [a, 34.]

**URETEROSTENOSIS** (Lat.), n. f.  $U^2r(ur)-e^2t(at)-e^2r(ar)-o-(o^2)-ste^2g-nos/i^2s$ . Gen., *-nos'eos(-is)*. From *οὐρητήρ*, the ureter, and *στενωσις*, stenosis. Fr., *urétérosténose*. Stricture of the ureter. [L, 50 (a, 14).]

**URETEROSTENOMA** (Lat.), n. n.  $U^2r(ur)-e^2t(at)-e^2r(ar)-o-(o^2)-ste^2n-om'a^2$ . Gen., *-om'atos(-atis)*. From *οὐρητήρ*, the ureter, and *στενωμα*, a contraction. Fr., *urétérosténome*. Ger., *Harnleiterverengerung*. Contraction of the ureter. [L, 50 (a, 14).]

**URETEROSTOMA** (Lat.), n. n.  $U^2r(ur)-e^2t(at)-e^2r(ar)-o^2st/-o^2m-a^2$ . Gen., *-om'atos(-atis)*. From *οὐρητήρ*, the ureter, and *στόμα*, the mouth. Fr., *urétérostome*. Ger., *Harnleitermündung*. The mouth of the ureter, either in the pelvis of the kidney or in the bladder. [L, 41, 50 (a, 14).]

**URETEROTOMY**, n.  $U^2r-e^2t-e^2r-o^2t/-o^2m-i^2$ . From *οὐρητήρ*, the ureter, and *τομή*, a cutting. Fr., *urétérotomie*. Ger., *Harnleiterschnitt*. Ureterotomy. An incision into the ureter. [a, 14.]

**URETERO-VAGINAL**, adj.  $U^2r-e^2t-e^2r-o-va^2j/i^2n'l$ . Pertaining to the ureter and the vagina.

**URETERO-UTERINE**, adj.  $U^2r-e^2t-e^2r-o-u^2t/-e^2r-i^2n$ . Pertaining to the ureter and the uterus.

**URETHANE**, n.  $U^2r-e^2th-an$ . Lat., *urethanum*. Fr., *uréthane*. Ger., *Urethan*. 1. Of Dumas, ethyl carbamate, so called because regarded as a compound of urea with ethyl carbonate  $2CO \cdot \frac{1}{2}NH_2 \cdot H_2 = CON_2H_4 \cdot (C_2H_5)_2CO_2$ . It acts as a hypnotic. 2. Any one of the carbamates of a hydrocarbon radicle. [B.]—Methyl u. See METHYL carbamate.

**URETHRA** (Lat.), n.  $U^2r(ur)-eth(ath)^2ra^2$ . Gr., *οὐρήθρα* (from *οὐρεῖν*, to urinate). Fr., *urèthre*. Ger., *Harnröhre*. The tube, consisting of an internal mucous coat and an external coat made up of two layers of muscular fibres, the internal being longitudinal and the external circular, which serves for voiding the urine, and in the male sex for the ejaculation of the semen. In the adult male it is about 9 inches in length and forms a portion of the penis. It is divided into three portions: the prostatic, where it passes through the prostate gland; the membranous, or intermediate part; and the spongy, or that which is surrounded by erectile tissue (the corpus spongiosum). Its mucous lining is freely supplied, ex-

cept near the meatus urinarius, with a large number of glands (glands of Littre) and pouch-like recesses. Into the prostatic portion the ejaculatory ducts open. Except during the passage of urine or semen it is collapsed, with its longest diameter directed transversely. In the female it is about 1½ inch in length, is highly distensible, and is lodged in the anterior wall of the vagina. [L, 31, 142, 172, 332.]—**Irritable u.** Hyperæsthesia or neuralgia of the u. [a, 34.]—**Penial u.** **Penile u.** That portion of the u. which is lodged within the penis.—**Posterior u.** See PREVESICAL u.—**Pouched u.** Of Fenwick, a sacculated u. [“Lancet,” 1886, ii. p. 820 (a, 34).]—**Prevesical u.** **Prostatic u.** The prostatic portion of the u. (q. v.). [L.]—**Second u.** The deep part of the u.

**URETHREOMORRHAGIA** (Lat.), n. f.  $U^2r(ur)-e^2th(ath)-re^2m-(ra^2)-e^2m-o^2r-raj(rag^2)/i^2a^2$ . From *οὐρήθρα*, the urethra, *αἷμα*, blood, and *ῥήγνυσθαι*, to burst forth. Fr., *urétrémorrhagie*. Ger., *Harnröhrenblutung*. Hemorrhage from the urethra. [L, 50 (a, 14).]

**URETHRAL**, adj.  $U^2r-eth'r'l$ . Lat., *urethralis*. Fr., *urétral*, *urétral*. Ger., u. Pertaining to, proceeding from, or affecting the urethra. [a, 17.]

**URETHRALGIA** (Lat.), n. f.  $U^2r(ur)-e^2th(ath)-ra^2lj(rag^2)/i^2a^2$ . From *οὐρήθρα*, the urethra, and *άλγος*, pain. Fr., *urétralgie*. 1. Pain in the urethra. 2. Gonorrhœa. [L, 50, 57 (a, 14).]

**URETHRALIS** (Lat.), adj.  $U^2r(ur)-e^2th(ath)-ra^2l(rag^2)/i^2s$ . See URETHRAL; as a n. m., muscular fibres arching over and surrounding the membranous portion of the urethra. [L, 332.]

**URETHRAMETER**, n.  $U^2r-e^2th-ra^2m-e^2t-u^2r$ . See URETHROMETER.

**URETHREMPHRAXIS** (Lat.), n. f.  $U^2r(ur)-e^2th(ath)-re^2m-fra^2x(rag^2)/i^2s$ . Gen., *-phrax'eos(-is)*. From *οὐρήθρα*, the urethra, and *ἔμψαξις*, a stopping. Ger., *Harnröhrenverstopfung*. Occlusion or obstruction of the urethra. [L, 41, 50 (a, 14).]

**URETHREURYNTER** (Lat.), n. m.  $U^2r(ur)-e^2th(ath)-ru^2r-i^2nt(u^2nt)/u^2r(ar)$ . Gen., *-er'os(-is)*. From *οὐρήθρα*, the urethra, and *εὐρύων*, to make wide. Fr., *urétréurynière*. Ger., *Harnröhren-ausdehner*. A dilating bougie for the urethra. [L, 50 (a, 14).]

**URETHRIPRESSOR** [Cones] (Lat.), n. m.  $U^2r(ur)-e^2th(ath)-ri^2-pre^2s(so^2r)$ . Gen., *-sor'is*. From *urethra* (q. v.), and *premere*, to press. See CONstrictor urethrae.

**URETHRISMUS** (Lat.), n. m.  $U^2r(ur)-e^2th(ath)-ri^2z(ris^2)/mu^2s(mu^2s)$ . From *οὐρήθρα*, the urethra. Of Otis, spasm of the urethra.

**URETHRITIS** (Lat.), n. f.  $U^2r(ur)-e^2th(ath)-ri(re)^2ti^2s$ . Gen., *-rit'id'os(-idis)*. From *οὐρήθρα*, the urethra. Fr., *urétrite*. Ger., *Harnröhrenentzündung*. Inflammation of the urethra, usually gonorrhœa. [E; L, 50 (a, 14).]—**Posterior u.** **Prevesical u.** Inflammation of the prostatic urethra.—**Rheumatic u.** A form of u. occurring in rheumatism, accompanied by a discharge of purulent fluid and other symptoms common to gonorrhœa, but differing from it in the complete absence of gonococci. [Riel, “Lyon méd.,” March 14, 21, 1886; “N. Y. Med. Jour.,” July 10, 1886, p. 54 (a, 50).]

**U. anterior acuta.** Acute u. affecting the anterior portion of the urethra. [a, 34.]—**U. blennorrhœa.** See GLEET.—**U. catarrhalis.** Non-virulent gonorrhœa. [G.]—**U. chronica.** See GLEET.—**U. externa.** Of Guérin, a gonorrhœal affection of the follicles surrounding the meatus urinarius externus in either sex. [E. Odmansson, “Nord. med. Ark.,” xvii, 5; “Ctbl. f. Chir.,” Feb. 6, 1886, p. 89.]—**U. gonorrhœa.** See GONORRHEA.—**U. granulosa.** Chronic u. accompanied with urethral granulations. [a, 34.]—**U. herpetic.** U. causing herpetic eruptions. [a, 34.]—**U. inflammatoria.** Acute u. [a, 34.]—**U. membranacea.** Chronic u. with a membranous formation in the urethra. [a, 34.]—**U. membranacea desquamativa.** Chronic u. with desquamation of the urethral mucous membrane. [a, 34.]—**U. phlyctenulosa.** Chronic u. with phlyctenule of the mucous membrane. [a, 34.]—**U. pyorrhœa.** U. with an abundant purulent discharge. [a, 34.]—**U. pyorrhœa contagiosa.** See GONORRHEA.—**U. suppurativa.** See U. pyorrhœa.—**U. venerea.** See GONORRHEA.

**URETHRITOPROSTATITIS** (Lat.), n. f.  $U^2r(ur)-e^2th(ath)-ri^2t(re)^2t(o^2)-pro^2s-ta^2t(ta^2t)-i(e)^2ti^2s$ . Gen., *-it'id'os(-idis)*. Fr., *urétrithroprostatite*. Prostatitis accompanying gonorrhœa. [a, 14.]

**URETHRITORCHITIS** (Lat.), n. f.  $U^2r(ur)-e^2th(ath)-ri^2t(re)^2t(o^2)rk(o^2rch^2)-i(e)^2ti^2s$ . Gen., *-it'id'os(-idis)*. Orchitis complicating gonorrhœa. [L, 30, 50 (a, 14).]

**URETHRITOSYPHILIS** (Lat.), n. f.  $U^2r(ur)-e^2th(ath)-ri^2t(re)^2t(o^2)-si^2t(su^2f)/i^2l-i^2s$ . Gen., *-it'id'os(-idis)*. Syphilis accompanied by gonorrhœa. [L, 30, 50 (a, 14).]

**URETHROBLENNORRHEA** (Lat.), n. f.  $U^2r(ur)-e^2th(ath)-ro^2r-ra^2l(e^2n-no^2r-re)^2t(i^2a^2)$ . See GLEET.

**URETHRO-BULBAR**, adj.  $U^2r-eth'r-ro-bul^2b'a^2r$ . Fr., *urétrho-bulbaire*. Pertaining to the bulb of the urethra. [L, 41 (a, 14).]

**URETHROCATARRHUS** (Lat.), n. m.  $U^2r(ur)-eth(ath)^2ro-(ra^2)-ka^2t(kat^2)l(a^2)ra^2r(ru^2s)u^2s$ . From *οὐρήθρα*, the urethra, and *κατάρρῃς*, running down. Fr., *urétrhocatarrhe*. Ger., *Harnröhren-catarrh*. Catarrh of the urethra. [L, 50 (a, 14).]

**URETHROCELE** (Lat.), n. f.  $U^2r(ur)-e^2th(ath)-ro(ro^2)-sel(kal^2)-e(a)^2$ ; in Eng., *ur'eth-ro-sel*. Gen., *-cel'es*. From *οὐρήθρα*, the urethra, and *κύημα*, a tumor. Fr., *urétrhocéle*. A hernia like protrusion of a dilated portion of the urethra (generally such a protrusion of the urethra into the vagina).

**URETHROCYSTITIS** (Lat.), n. f.  $U^2r(ur)-e^2th(ath)^2ro(ro^2)-si^2st(ku^2st)-i(e)^2ti^2s$ . Gen., *-it'id'os(-idis)*. From *οὐρήθρα*, the urethra, and *κύστις* (q. v.). Cystitis associated with or consecutive upon urethritis. [a, 34.]

**URETHROCYSTOPLYNON** (Lat.), n. n.  $U^2r(ur)-eth(ath)^2ro-(ro^2)-si^2st(ku^2st)-o^2p-lim^2u^2n(o^2n)$ . An instrument invented by A. Fischer for irrigation of the bladder and urethra; consisting of two catheters, one within the other, the inner one to convey the water

into the bladder and urethra, and the outer one to serve for its outflow. [*"Contrib. f. Chir."*, July 22, 1882, p. 473.]

**URETHROCYSTOTOME**, n. U<sup>2</sup>r-eth-ro-si<sup>2</sup>st-o-tom. From *ὀυρήθρα*, the urethra, *κύστις*, the bladder, and *révure*, to cut. An instrument for performing urethral cystotomy.

**URETHRO-CYSTOTOMY**, n. U<sup>2</sup>r-eth-ro-si<sup>2</sup>st-o-tom-i<sup>2</sup>. Lat., *urethrocystotomia*. Ger., *Harnröhrenblasenschnitt*. Urethral cystotomy.

**URETHROGRAPH**, n. U<sup>2</sup>r-eth-ro-gra<sup>2</sup>f. From *ὀυρήθρα*, the urethra, and *γράφειν*, to write. An instrument devised by G. Herschell for detecting and recording variations in the calibre of the urethra, also their relative situation. [*"Lancet"*, 1884, ii, p. 608.]

**URETHROHEMORRHAGIA** (Lat.), n. f. U<sup>2</sup>r-(ur)-eth(ath)/ro(ro<sup>3</sup>)-he<sup>2</sup>m(ha<sup>2</sup>-e<sup>2</sup>m)-o<sup>2</sup>r-raj(rag<sup>2</sup>/i<sup>2</sup>-a<sup>2</sup>). From *ὀυρήθρα*, the urethra, *αἷμα*, blood, and *ῥήγνυσθαι*, to burst forth. See URETHROHÆMAGIA (1st def.).

**URETHROLAPAROCYSTIDOTOMIA** (Lat.), n. f. U<sup>2</sup>r(ur)-eth(ath)/ro(ro<sup>3</sup>)-la<sup>2</sup>p(la<sup>2</sup>p)/a<sup>2</sup>r(a<sup>2</sup>r)-o(o<sup>2</sup>)-si<sup>2</sup>st(ku<sup>2</sup>st)-i<sup>2</sup>d-o(o<sup>2</sup>)-tom(to<sup>2</sup>m)/i<sup>2</sup>-a<sup>2</sup>. From *ὀυρήθρα*, the urethra, *λαπάρα*, the flank, *κύστις*, the bladder, and *τομή*, a cutting. Fr., *uréthrolaparocystidotomie*. Combined lateral and suprapubic cystotomy. [L, 30, 50 (a, 14).]

**URETHROMETER**, n. U<sup>2</sup>r-e<sup>2</sup>th-ro<sup>2</sup>m'e<sup>2</sup>t-u<sup>2</sup>r. From *ὀυρήθρα*, the urethra, and *μέτρον*, a measure. Fr., *uréthromètre*. Ger., U.

OTIS'S URETHROMETER.

An instrument for measuring the calibre of the urethra.—Otis's u. A catheter, part of which consists of several sections which may be spread apart by a screw in the handle. The extent to which there can be separation in any part of the urethra is indicated by a gauge at the handle. [E.]

**URÉTHROPATHE** (Fr.), n. U<sup>6</sup>-ra-tro-pa<sup>2</sup>t. A person affected with a urethral disease.

**URÉTHRO-PÉNIEU** (Fr.), adj. U<sup>6</sup>-ra-tro-pa-ne-a<sup>2</sup>n<sup>2</sup>. Involving the urethra and the exterior of the penis.

**URETHROPHRAXIS** (Lat.), n. f. U<sup>2</sup>r(ur)-e<sup>2</sup>th(ath)-ro(ro<sup>3</sup>)-fra<sup>2</sup>x(fra<sup>2</sup>x)/i<sup>2</sup>s. See URETHREMPHRAXIS.

**URETHROPHYMA** (Lat.), n. n. U<sup>2</sup>r(ur)-e<sup>2</sup>th(ath)-ro(ro<sup>3</sup>)-fim(fu<sup>2</sup>m)/a<sup>2</sup>. Gen., *-phymatos (-atis)*. From *ὀυρήθρα*, the urethra, and *φύμα*, a growth. Fr., *uréthrophyme*. Ger., *Harnröhrengeschwulst*. A swelling of a portion of the urethra. [L, 30, 50 (a, 14).]

**URETHROPISTHORRHÆXIS** (Lat.), n. f. U<sup>2</sup>r(ur)-e<sup>2</sup>th(ath)-ro(ro<sup>3</sup>)-pi<sup>2</sup>sth-o<sup>2</sup>r-re<sup>2</sup>x(rax)/i<sup>2</sup>s. Gen., *-rhexeos (-is)*. From *ὀυρήθρα*, the urethra, *ὀπισθεν*, behind, and *ῥήξις*, a bursting. Fr., *uréthropisthorrhæxis*. Rupture of the urethra behind a stricture. [A, 322.]

**URETHROPLASTY**, n. U<sup>2</sup>r-eth-ro-pla<sup>2</sup>st-i<sup>2</sup>. Lat., *urethroplastica* (from *ὀυρήθρα*, the urethra, and *πλάσσειν*, to mold). Fr., *uréthroplastie*. Ger., *Harnröhrenbildung*, *Urethroplastik*. The plastic surgery of the urethra. [E.]

**URETHRORRHAGIA** (Lat.), n. f. U<sup>2</sup>r(ur)-e<sup>2</sup>th(ath)-ro<sup>2</sup>r-raj(rag<sup>2</sup>/i<sup>2</sup>-a<sup>2</sup>). From *ὀυρήθρα*, the urethra, and *ῥήγνυσθαι*, to burst forth. Fr., *urétrorrhagie*. Ger., *Harnröhrenblutfluss* (1st def.). 1. Hæmorrhage from the urethra. 2. A discharge from the urethra; gonorrhœa or gleet. [a, 34.]

**URETHRORRHAPHY**, n. U<sup>2</sup>r-eth-ro<sup>2</sup>r-a<sup>2</sup>f-i<sup>2</sup>. Lat., *urethrorrhaphia* (from *ὀυρήθρα*, the urethra, and *ῥαφή*, a seam. Fr., *urétrorrhaphie*. Ger., *Harnröhrennaht*. The operation of closing an abnormal opening into the urethra with sutures.

**URETHRORRHŒEA** (Lat.), n. f. U<sup>2</sup>r(ur)-e<sup>2</sup>th(ath)-ro<sup>2</sup>r-re<sup>2</sup>(ro<sup>2</sup>e<sup>2</sup>)/a<sup>2</sup>. From *ὀυρήθρα*, the urethra, and *ῥοία*, a flowing. Fr., *urétrorrhée*. Ger., *Harnröhrenfluss*. A morbid discharge from the urethra, especially gleet. [L, 30, 50 (a, 14).]

**URETHROSCOPE**, n. U<sup>2</sup>r-eth-ro-skop. From *ὀυρήθρα*, the urethra, and *σκοπεῖν*, to examine. Fr., *uréthroscope*. Ger., *Urethroskop*. A tubular or fenestrated instrument used to dilate the urethra to permit of examination of its lining membrane. [a, 34.]

**URETHROSPASMUS** (Lat.), n. m. U<sup>2</sup>r(ur)-e<sup>2</sup>th(ath)-ro(ro<sup>3</sup>)-spa<sup>2</sup>z(spa<sup>2</sup>s)/mu<sup>2</sup>s(mu<sup>2</sup>s). From *ὀυρήθρα*, the urethra, and *σπασμός*, a spasm. Fr., *urétrospasme*. Ger., *Harnröhrenkrampf*. Spasmodic stricture of the urethra. [L, 57 (a, 50).]

**URETHROSTENIA** (Lat.), n. f. U<sup>2</sup>r(ur)-eth(ath)/ro(ro<sup>3</sup>)-sten(ste<sup>2</sup>n)/i<sup>2</sup>-a<sup>2</sup>. *-ste<sup>2</sup>n-os/i<sup>2</sup>s*. Gen., *-sténia*, *-os/eos (-is)*. From *ὀυρήθρα*, the urethra, and *στενέω*, to straiten. Fr., *urétrosténie*, *urétrostenose*. Ger., *Harnröhrenverengerung*. Stricture of the urethra. [E.]

**URETHROSYSTOLEUS** (Lat.), n. m. U<sup>2</sup>r(ur)-eth(ath)/ro(ro<sup>3</sup>)-si<sup>2</sup>s(su<sup>2</sup>s)-tol(to<sup>2</sup>l)/e<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). From *ὀυρήθρα*, the urethra, and *συστολή*, contraction. Fr., *urétr systole*. Of Guthrie, the constrictor urethra. [L, 30, 50 (a, 14).]

**URETHROTOME**, n. U<sup>2</sup>r-eth-ro-tom. Lat., *urethrotomia* (from *ὀυρήθρα*, the urethra, and *τέμνειν*, to cut). Fr., *uréthrotome*. Ger., *Harnröhrenmesser*. An instrument for dividing strictures of the urethra. [E.]—**Dilating u.** **Divulsing u.** 1. A combined dilator and u. the two blades of which can be separated equally along their entire length by a screw attachment at the handle, one of the blades carrying the knife in a groove. 2. A divulsor resembling Thompson's, but provided with a cutting blade. [E.]—**Gouley's tunneled u.** A tunneled sound with a convex cutting blade near the end which is guided by a filiform bougie running

through the tunnel. [E.]—**Maisonneuve's u.** A tunneled sound carrying a small cutting blade at the end of a stylet which works

OTIS'S DILATING URETHROTOME.

forward or backward in the tunnel and groove. [E.]—**Ricord's u.** A director-like instrument that conceals a blade which can be extruded after the instrument is introduced into the urethra. [a, 34.]—**Voilemier's u.** A u. resembling Maisonneuve's, but with a blade of different shape and a screw-tip for a filiform bougie. [E.]

**URÉTHROTOMIE** (Fr.), n. U<sup>6</sup>-ra-tro-to-me. See URETHROTOMY.—**U. d'emblée.** Perineal section for the purpose of searching for the proximal portion of a ruptured urethra. [P. Gueterbock (A, 319).]—**U. sur conducteur** (Fr.). See *External urethrotomy with a guide*.

**URÉTHROTOMY**, n. U<sup>2</sup>r-e<sup>2</sup>th-ro<sup>2</sup>t-i<sup>2</sup>-o<sup>2</sup>m-i<sup>2</sup>. Lat., *urethrotomia* (from *ὀυρήθρα*, the urethra, and *τομή*, a cutting). Fr., *uréthrotomie*. Ger., *Urethrotomie*. The operation of dividing a stricture of the urethra. [E.]—**Cock's external u.** U. in which the perineum is laid open without a guide, the stricture being impervious. [E.]—**External u.** The operation of dividing a stricture of the urethra by means of an incision through the perineum. [E.]—**External u. with a guide.** External u. in which the stricture is divided on a grooved sound passed into the urethra. [a, 18.]—**External u. without a guide.** See *Cock's external u.*—**Internal u.** The operation of dividing a stricture of the urethra from within. [E.]—**Syme's external u.** U. in which the stricture is divided through the perineum on a grooved director passed through the stricture. [E.]—**Wheelhouse's external u.** An operation in which the urethra is opened in front of the stricture and a grooved probe passed through it into the bladder before its division. [E.]

**URETHRO-VAGINAL**, adj. U<sup>2</sup>r-eth-ro-va<sup>2</sup>j/i<sup>2</sup>-n<sup>2</sup>l. Pertaining to the urethra and the vagina. [a, 48.]

**URETHRO-VESICAL**, adj. U<sup>2</sup>r-eth-ro-ve<sup>2</sup>s/i<sup>2</sup>-k<sup>2</sup>l. Pertaining to the urethra and the bladder. [a, 48.]

**URETHRYMENIA** (Lat.), n. f. U<sup>2</sup>r(ur)-e<sup>2</sup>th(ath)-rim(ru<sup>2</sup>m)-en(e<sup>2</sup>n)/i<sup>2</sup>-a<sup>2</sup>. From *ὀυρήθρα*, the urethra, and *μύμη*, a membrane. Fr., *urétryménie*. Partial or total occlusion of the urethra by a membranous formation. [L, 50 (a, 14).]

**URETHYLANE**, n. U<sup>2</sup>r-e<sup>2</sup>th/i<sup>2</sup>-an. Fr., *uréthylane*. Methyl carbamate. [B, 2, 93.]

**URETIC**, adj. U<sup>2</sup>r-e<sup>2</sup>t/i<sup>2</sup>k. Gr., *ὀυρητικός* (from *ὀύρον*, urine). Lat., *ureticus*. Fr., *urétique*. 1. Pertaining to urine. 2. Diuretic. [L, 41, 50 (a, 14).]

**URÉTRE** (Fr.), n. U<sup>2</sup>r-e<sup>2</sup>t<sup>2</sup>r. See URETHRA.

**URGINEA** (Lat.), n. f. U<sup>2</sup>rj(u<sup>2</sup>rg)-i<sup>2</sup>n'e<sup>2</sup>-a<sup>2</sup>. From *urgere*, to press. Fr., *urginée*. A genus of the *Liliaceæ*. [a, 35.]—**U. indica.** 1. An Indian and African species. Its unilocular bulb is used like squill, but is said to have little virtue when old and large. 2. A species indigenous to India and Abyssinia. Its bulb, which differs from that of the preceding in being acaly, resembles squill in properties. [a, 35.]—**U. maritima**, **U. scilla**. Fr., *scille maritime*. Ger., *gemeine Meerzwiebel*. Squill, sea-onion, the *σκόλλα* of the ancients; indigenous to Mediterranean regions. The bulb, sliced and dried, official in the U. S. and Br. Ph's as *scilla*, abounds in an acid and even corrosive juice. Squill is used as a diuretic, expectorant, emetic, and purgative. [a, 35.]

**URIDROSIS** (Lat.), n. f. U<sup>2</sup>r(ur)-hid(hed)-ros/i<sup>2</sup>s. Gen., *-ros/eos (-is)*. See URIDROSIS.

**URIAGE** (Fr.), n. U<sup>2</sup>r-e-a<sup>2</sup>zh. A place in the department of the Isère, France, where there is a warm saline and sulphurous spring. [L, 57 (a, 14).]

**URIAS** (Lat.), n. f. U<sup>2</sup>r(ur)/i<sup>2</sup>-a<sup>2</sup>s(a<sup>2</sup>s). Gen., *-i<sup>2</sup>ados (-adis)*. Gr., *ὀύριος* (from *ὀύρον*, urine). A urinary fistula. [L, 50 (a, 14).]

**URIASIS** (Lat.), n. f. U<sup>2</sup>r(ur)-i(i<sup>2</sup>)/a<sup>2</sup>s(a<sup>2</sup>s)-i<sup>2</sup>s. Gen., *-as/eos (-i<sup>2</sup>asis)*. See URINATION.

**URIC**, adj. U<sup>2</sup>r/i<sup>2</sup>k. Lat., *uricus* (from *ὀύρον*, urine). Fr., *urique*. 1. Derived from or contained in the urine. [B.] 2. Due to the excessive production of u. acid (e. g., arthritis urica).

**URIC ACID**, n. U<sup>2</sup>r/i<sup>2</sup>k. Fr., *acide urique*. Ger., *Harnsäure*. A feebly dibasic acid, C<sub>4</sub>H<sub>4</sub>N<sub>2</sub>O<sub>6</sub>, occurring in small quantities in the human urine and that of other mammals, and in large quantities in that of birds, amphibians, and some insects. It was first isolated by Scheele in 1776. It consists of a white, spongy powder, devoid of taste and odor, which under the microscope is seen to be constituted of rhombic tables or of elongated plates, often disposed in the form of sheaves or of rosettes. As deposited from the urine it has a more or less reddish tinge, due to the presence of urinary coloring matters. It is soluble in about 15,000 parts of water at 20° C., and in from 1,000 to 2,000 parts at 100° C., insoluble in alcohol, moderately soluble in glycerin (which, however, produces a change

in the form of its crystals, and when associated with lithium carbonate is rendered quite soluble in water, producing increased solubility in the lithium salt. [B, 3, 4.]

**URICACIDÆMIA** (Lat.), n. f.  $U^2r(ur)-i^2k-a^2s(a^2k)-i^2d-em-(a^2e^2m)-i^2-a^2$ . From *oûpov*, urine, *acidus*, acid, and *αἷμα*, blood. Of von Jaksch, the presence of a recognizable amount of uric acid in the blood in consequence of the failure of the red blood-corpuscles to oxidize this acid. [a, 34.]

**URICÆMIA** (Lat.), n. f.  $U^2r(ur)-i^2s(i^2k)-em-(a^2e^2m)-i^2-a^2$ . From *oûpov*, urine, and *αἷμα*, blood. Fr., *uricémie*. Of Flint, see LITHÆMIA.

**URIDROSIS** (Lat.), n. f.  $U^2r(ur)-id(ed)-ros/i^2s$ . Gen., *-ros/eos (-is)*. From *oûpov*, urine, and *ῥέωσις*, a perspiring. Fr., *uridrose*. Ger., *Harnschweiss*, *Harnschwitzen*. A condition in which certain elements of the urine, especially urea, are excreted in the perspiration, sometimes in sufficient quantity to form a sensible deposit upon the skin. [G.]—**U. crystallina**. Fr., *éphidrose sablonneuse*. A condition in which saline constituents of the sweat, supposed to be derived from the urine, crystallize upon the skin, forming sand-like granules of a reddish or white color [Fuchs]; observed especially in uræmia connected with certain cases of cholera, scarlet fever, and renal calculus, in which a deposit consisting of crystals of urea forms upon the skin. [Schöttin, "Arch. f. physiol. Heilk.," xi, p. 73; Drasche, "Ztschr. d. Gesellsch. d. Aerzte zu Wien," xii.]

**URILE**, n.  $U^2r/i^2l$ . A radicle supposed by Morin to exist in urine. [B, 38 (a, 14).]

**URILIC ACID**, n.  $U^2r-i^2l/i^2k$ . Fr., *acide urilique*. Ger., *Urilsäure*. Of Liebig, a hypothetical substance,  $C_8H_8O_4$ , which may be considered as oxalic acid in which the oxygen is replaced by cyanogen. [B, 48 (a, 14).]

**URIN** (Ger.), n. Ur-en'. See URINE.—**U'abgang**. See DIURESIS.—**U'ablagerung**, **U'abscheidung**, **U'absonderung**. The secretion of urine. [L, 80.]—**U'beschwerden**. Difficulty in urination.—**U'drang**. Vesical tenesmus.—**U'lassen**. See URINATION.—**U'säure**. See HIPPURIC ACID.—**U'schau**. See UROSCOPY.—**U'treibend**. See DIURETIC.—**U'verhaltung**. See Retention of urine.

**URINA** (Lat.), n. f.  $U^2r(ur)-in(en)-a^2$ . See URINE.—**Acidum urinae**. Phosphoric acid. [B.]—**Extractum saponaceum urinae**. Of Rouelle, urea. [B, 3.]—**Spiritus salis urinae**. Ammonium carbonate. [B.]—**Spiritus urinae**. Ger., *Urinegeist*. An old name for aqueous ammonia. [B.]—**U. araneosa**. Urine loaded with cobweb-like filaments.—**U. cibi**. **U. digestionis**. Urine voided several hours after digestion. It contains more solids and has a higher specific gravity than at other times. [K.]—**U. flammea**. High-colored urine. [L, 128.]—**U. galactodes**. Urine of a milky appearance. [L, 50 (a, 14).]—**U. genitalis**. See SEMEN.—**U. noctilis**. See *U. sanguinis*.—**U. pericardii**. See LIQUOR PERICARDII.—**U. potus**. Of G. Bird, urine of low specific gravity, which is passed soon after drinking freely. [K.]—**U. sanguinis**. Urine secreted after a night's rest, and hence not influenced by food or drink. [K.]—**U. spastica**. Urine secreted during or after spasms (of hysteria, asthma, etc.). It is generally abundant, clear, and limpid, the coloring matter, urea, and sodium chloride being deficient in quantity. [D, 35.]

**URINACCELERATOR** [Cones] (Lat.), n. m.  $U^2r(ur)-i^2n(en)-a^2k(a^2k)-se^2l(ke^2l)-e^2r-at(a^2t)/o^2r$ . Gen., *-oris*. From *urina*, urine, and *accelerare*, to hasten. See BULBO-CAVERNOSUS.

**URINACULUM** (Lat.), n. n.  $U^2r(ur)-i^2n(en)-a^2k(a^2k)-u^2l(u^2l)-u^2m(u^2m)$ . Dim. of *urina*, urine. 1. See URACHUS. 2. A urinal. [L, 50 (a, 14).]

**URINÆMIA** (Lat.), n. f.  $U^2r(ur)-i^2n(en)-em-(a^2e^2m)-i^2-a^2$ . From *urina*, urine, and *αἷμα*, blood. Fr., *urinémie*. Poisoning by the retention of various urinary constituents (urea, creatin, creatinin, leucine, etc.) in the blood. It is to be distinguished from *uræmia*, which refers only to the retention of urea. Schöttin maintained that it was the cause of puerperal eclampsia. [A, 15.]

**URINAL**, n.  $U^2r/i^2n-l$ . Gr., *οὐροδοχείον*, *οὐροδόχη*. Lat., *urodochium*. Fr., *u. urinaire*. Ger., *Nachtlopf*, *Pissoir*. 1. A stationary receptacle for receiving urine. 2. A porcelain or metal vessel for receiving urine from patients confined to bed. 3. A rubber apparatus constantly worn to receive the urine in vesical incontinence. [a, 34.]—**Spray u.** A u. (1st def.) fitted with sprays of water from the top and sides of the receptacle to keep it clean. [a, 34.]—**Vaginal u.** A u. consisting of a beak to be introduced into the vagina and of a receptacle to hang between the thighs. ["Ctbl. f. Gyn.," Nov. 21, 1891, p. 937 (a, 50).]

**URINALIS** (Lat.), adj.  $U^2r(ur)-i^2n(en)-a^2(i^2)/i^2s$ . See URINARY; as a n., in the n. (*urinalis*), a urinal. [L, 50 (a, 48).]

**URINALYSIS** (Lat.), n. f.  $U^2r(ur)-i^2n(en)-a^2(i^2)/i^2s(u^2s)-i^2s$ . See URINALYSIS.

**URINARY**, adj.  $U^2r/i^2n-a^2ri^2$ . Lat., *urinosus*, *urinalis*. Fr., *urinaire*. Pertaining to the urine. [K.]

**URINATION**, n.  $U^2r-i^2n-a^2shu^2n$ . Fr., *u.* Ger., *Urinlassen*, *Harnlassen*. The act of voiding urine. [K.]

**URINE**, n.  $U^2r/i^2n$ . Gr., *oûpov*. Lat., *urina*. Fr., *u.* Ger., *Harn*, *Urin*. The excretion of the kidneys: normally an amber-colored, transparent fluid, having an acid reaction, a specific gravity varying from 1.010 to 1.030, a saline taste, and a faint odor. The latter is modified by food and drugs: the specific gravity, color, and reaction vary with the ingestion of food, the character and duration of the occupation, and the temperature. [a, 34.] See PLATE IV.—**Anomie u.** The u. in anæmia. [K.]—**Aqueous u.** See URINA POTUS.—**Black u.** U. containing melanin. [a, 34.]—**Blue u.** U. that deposited a sediment of deep blue granules on standing. ["Lancet," ii, 1875, p. 144 (a, 34).]—**Chylous u.** Ger., *Chylstarn*, *Milchharn*. U. which is milky in appearance from the presence

of fat. [D.] Cf. CHYLURIA.—**Coagulating u.** See *Fibrinous u.*—**Crude u.** A clear watery u. which deposits no sediment. [K.]—**Cyano u.** See *Blue u.*—**Cystinic u.** U. which deposits cystine. [K.]—**Definitive u.** The portion of the u. secreted by the epithelium lining the convoluted portions of the uriniferous tubules. ["N. Y. Med. Jour.," Aug. 18, 1888, p. 169 (a, 50).]—**Diabetic u.** U. passed in diabetes (*q. v.*). [K.]—**Dropsical u.** A highly albuminous u. [K.]—**Dyspeptic u.** U. passed by a dyspeptic patient. It sometimes deposits an excess of calcium oxalate (see OXALURIA). [K.]—**Elephant's u.** See ELEPHANTINUS.—**Febrile u.** The high-colored, scanty, acid, and slightly albuminous u. passed during acute febrile affections. [K.]—**Fibrinous u.** U. containing fibrin, that may coagulate in the tubules, in the bladder, or after extrusion. [a, 34.]—**Flocculent u.** U. in which flocculent masses are suspended. [K.]—**Gouty u.** U. passed during or after an attack of gout. It is of small amount, is highly colored, and deposits uric acid in excess. [K.]—**Hysterical u.** See URINA SPASTICA.—**Mucilaginous u.** U. abounding in mucus. [K.]—**Nebulous u.** Ger., *Harnwolke*. U. that is cloudy in consequence of a heavy deposit of the earthy phosphates. [a, 34.]—**Nervous u.** See URINA SPASTICA.—**Residual u.** In prostatic hypertrophy or cystic disease, a small quantity of u. that remains in the bladder after all efforts to empty it. [a, 34.]—**Rudimentary u.** The liquid that comes through the thin walls of the Malpighian glomeruli. ["N. Y. Med. Jour.," Aug. 18, 1888, p. 169 (a, 50).]—**Saccharine u.** U. containing sugar, as in diabetes. [K.]—**U. cuite** (Fr.). See URINA CIBI.—**U. de la boisson** (Fr.). See URINA POTUS.—**U. of digestion**. See URINA CIBI.

**URINEAU** (Fr.), n.  $U^6-ro-no$ . A urinal to be worn on or applied to the person. [A, 81.]

**URINIFEROUS**, adj.  $U^2r-i^2n-i^2f(e^2r)-u^2s$ . Lat., *uriniferus* (from *urina*, urine, and *ferre*, to bear). Fr., *urinifère*. Ger., *harntragend*, *harnführend*. Producing and conveying the urine. [J.]

**URINIPAROUS**, adj.  $U^2r-i^2n-i^2p(a^2r)-u^2s$ . Lat., *uriniparus* (from *urina*, urine, and *parere*, to produce). Fr., *urinipare*. Urine-producing (said of the cortical portion of the uriniferous tubules). [J, 83.]

**URINIREN** (Ger.), n. Ur-en-er'e<sup>2</sup>n. Micturition.

**URINO-GENITAL**, adj.  $U^2r-in-o-jēn/i^2-t-l$ . See URO-GENITAL.

**URINOLOGY**, n.  $U^2r-i^2n-o^2l/o^2-j-i^2$ . From *urina*, urine, and *λόγος*, understanding. See UROLOGY.

**URINOMETER**, n.  $U^2r-i^2n-o^2m/e^2t-u^2r$ . See UROMETER.

**URINOUS**, adj.  $U^2r/i^2n-u^2s$ . Lat., *urinosus* (from *urina*, urine). Fr., *urineux*. Ger., *harnartig*. Like urine. [K.]

**URITIS** (Lat.), n. f.  $U^2r(ur)-i^2e(i^2)/i^2s$ . From *urere*, to burn. 1. Inflammation due to a burn. 2. A flat bulla with ichorous contents. [G, 11.]—**U. diurna**. A disease in which red itching papules appear by day and are absent by night. [G, 11.] Cf. EPINXYCTIS *pruriginosa*.—**U. nocturna**. See EPINXYCTIS.

**URN**, n.  $U^6rn$ . Lat., *urna*. Fr., *urne*. Ger., *Urne*. The spangleum of mosses; also an acidium (1st def.). [a, 35.]

**URNIERE** (Ger.), n. Ur'ner-e<sup>2</sup>. See MESONEPHROS.—**U'naprosse**. The rudiment of the primitive kidney of the embryo.

**URNING**, n.  $U^6rn/i^2n^2$ . A man or woman who has an aversion for the opposite sex, but obtains sexual gratification from contact or association with one of the same sex. [G.]

**URO-AZOTIMÈTRE** (Fr.), n.  $U^6-ro-a^2-zo-te-me^2tr$ . An instrument for the volumetric differential analysis of the nitrogenous constituents of urine by means of sodium hypobromite. ["Ann. des mal. des org. gén.-urin.," Feb., 1869, p. 85 (a, 50).]

**UROBACILLUS** (Lat.), n. m.  $U^2r(ur)-o(o^2)-ba^2s(ba^2k)-i^2l/i^2s$  (lu's). From *oûpov*, urine, and *bacillus* (*q. v.*). A bacillus obtained from decomposed urine [Sternberg (a, 34).]—**U. Duclauxi**. Of Miquel, an aerobic and facultative anaerobic, motile, liquefying u. that grows in slender filaments in sewage or culture media containing ammonia or urea. [a, 34.]—**U. Freudenreichi**. A u. closely resembling *U. Pasteuri*, but forming longer chains and having more active movements. It is found in air, dust, sewer water, etc. [a, 34.]—**U. Maddoxi**. An aerobic, motile, liquefying, spore-forming u. that has round ends, is 1  $\mu$  thick and 3  $\mu$  to 6  $\mu$  long. It is relatively rare. [a, 34.]—**U. Pasteuri**. Of Miquel, an aerobic, liquefying, motile u. that forms spherical, usually solitary spores at one extremity of the rod. It grows in the form of short rods each made up of two to six urobacilli, in culture media containing urea, and its size varies with the media in which it grows. [a, 34.]—**U. Schützenbergi**. An aerobic, liquefying, motile, small oval bacillus, about 5  $\mu$  thick and 1  $\mu$  long, usually found in pairs. It is obtained from river and sewer water. [a, 34.]

**UROBENZOIC ACID**, n.  $U^2r-o-be^2nz-o^2i^2k$ . See HIPPURIC ACID.

**UROBILIN**, n.  $U^2r-o-bil/in$ . Fr., *urobiline*. Ger., *U.* A derivative,  $C_{32}H_{40}N_4O_7$ , of bilirubin formed by the action of nascent hydrogen. It is the most important coloring matter in the urine; a dark amorphous powder, nearly insoluble in water, soluble in alcohol, in ether, and in chloroform. [a, 14, 34.]

**UROBILINOIDIN**, n.  $U^2r-o-bil-in-o^2d/i^2n$ . A reduction product of hæmatin, resembling urobilin, but not identical with it. It is readily converted into isohæmatoporphyrin and hexahydrohæmatoporphyrin. It occurs in the urine under certain pathological conditions. [C. A. Nobel, "Ctbl. f. d. med. Wissenschaft.," Apr. 23, 1887, p. 305 (B).]

**UROBILINURIA** (Lat.), n. f.  $U^2r(ur)-o(o^2)-bil(bel)-i^2n-u^2r(ur)-i^2-a^2$ . From *urobilin* (*q. v.*) and *oûpov*, urine. Ger., *Urobilinurie*. The excretion of urobilin with the urine.

**UROBUTYLCHLORALIC ACID**, n.  $U^2r-o-bu^2-ti^2l-klor-a^2l/i^2k$ . A body,  $C_{10}H_{18}Cl_2O_7$  (or  $C_{10}H_{17}Cl_2O_7$ ), obtained from the urine after the ingestion of butyl chloral. [B.]

**UROCANINIC ACID**, n.  $U^2r\text{-}o\text{-}ka^2n\text{-}i^2n\text{-}i^2k$ . A substance,  $C_8H_8N_2O_2 + 2H_2O$ , presenting both acid and basic properties, obtained from dogs' urine. It occurs in long, flattened, colorless prisms or long needles. [B, 93 (a, 14).]

**UROCELE** (Lat.), n. f.  $U^2r(ur)\text{-}o(o^2)\text{-}se(ka)\text{-}le(ia)$ ; in Eng., *ur<sup>o</sup>-cel*. Gen., *-cel'es*. From *oûron*, urine, and *κῆλη*, a tumor. Fr., *urocèle*. Ger., *Harnbruch*. A tumor formed by the extravasation of urine. [E.]

**UROCHERAS** (Lat.), n. f.  $U^2r(ur)\text{-}o(o^2)k(o^2ch^2)/e^2r\text{-}a^2s(a^2s)$ . Gen., *-cher'ados (-adis)*. From *oûron*, urine, and *χεράδος*, gravel. Fr., *urochêras*. See GRAVEL.

**UROCHESIA** (Lat.), **UROCHEZIA** (Lat.), n's f.  $U^2r(ur)\text{-}o(o^2)\text{-}kez(ch^2e^2s)/i^2a^2$ , *-kez(ch^2e^2z)/i^2a^2*. From *oûron*, urine, and *χεῖν*, to ease one's self. Fr., *urochézie*. The discharge of urine per anum. [L, 41, 50 (a, 14).]

**UROCHROME**, n.  $U^2r\text{-}o\text{-}krom$ . From *oûron*, urine, and *χρῶμα*, pigment. Fr., u. Ger., *Urochrom*. A yellow pigment described by Thudichum, who attributed the yellow color of normal urine to its presence; probably identical with hydrobilirubin. [B, 93 (a, 14); K.]

**UROCLEPSIA** (Lat.), n. f.  $U^2r(ur)\text{-}o(o^2)\text{-}kle^2ps/i^2a^2$ . From *oûron*, urine, and *κλεψία*, theft. Fr., *uroclepsie*. Unconscious micturition. [L, 50 (a, 14).]

**UROCELE** (Lat.), n. f.  $U^2r(ur)\text{-}o(o^2)\text{-}sel'(ko^2e^2l)\text{-}i^2a^2$ . From *oûron*, urine, and *κοίλη*, the belly. Fr., *urocelle*. Ger., *Harnbauch*. Swelling of the abdomen due to infiltration of urine. [L, 50 (a, 14).]

**UROCRISIA** (Lat.), **UROCRISIS** (Lat.), n's f.  $U^2r(ur)\text{-}o(o^2)\text{-}kru^2z(kri^2s)/i^2a^2$ , *-o^2k'i^2s-i^2a*. Gen., *-cris'is*, *-cris'eos (-ocristis)*. From *oûron*, urine, and *κρίσις*, a separating. Fr., *urocriste*. Ger., *Harnkriste*. 1. A crisis which manifests itself in urination. 2. Examination of the urine, diagnosis by means of the urine. [A, 322 (a, 48).]

**UROCYANIN**, n.  $U^2r\text{-}o\text{-}si^2a^2n\text{-}i^2n$ . See CYANURIN.

**UROCYANOGEN**, n.  $U^2r\text{-}o\text{-}si^2a^2n\text{-}o\text{-}je^2n$ . From *oûron*, urine, *κύανος*, blue, and *γεννᾶν*, to produce. Fr., *urocyanose*. A blue sediment sometimes deposited from the urine of cholera patients. [K.]

**UROCYSTHÆMORRHOIDES** (Lat.), n. f. pl.  $U^2r(ur)\text{-}o(o^2)\text{-}si^2sth(ku^2sth)\text{-}e^2m(a^2e^2m)\text{-}o^2r\text{-}ro(ro^2)\text{-}id(ed)\text{-}ez(e^2s)$ . From *oûron*, urine, *κύστις*, the bladder, and *αἱμορροῖς*, a hæmorrhoid. Ger., *Blasenhämorrhöiden*. Hæmorrhoids of the bladder. [L, 50 (a, 14).]

**UROCYSTIS** (Lat.), n. f.  $U^2r(ur)\text{-}o(o^2)\text{-}si^2st(ku^2st)/i^2a^2$ . Gen., *-cyst'eos (-is)*. From *oûron*, urine, and *κύστις*, the bladder. Fr., *urocyste*. See URINARY BLADDER.

**UROCYSTITIS** (Lat.), n. f.  $U^2r(ur)\text{-}o(o^2)\text{-}si^2st(ku^2st)\text{-}i(e)\text{-}ti^2s$ . Gen., *-it'idis (-idis)*. Fr., *urocystitis*. See CYSTITIS.

**UROCYSTOCATARRHUS** (Lat.), n. m.  $U^2r(ur)\text{-}o(o^2)\text{-}si^2st(ku^2st)/o(o^2)\text{-}ka^2t(ka^2t)\text{-}a^2r(a^2r)/ru^2s(ru^2s)$ . From *oûron*, urine, *κύστις*, the bladder, and *κατάρρεω*, a running down. See CYSTORRHEA (1st def.).

**URODENSIMÈTRE** (Fr.), n.  $U^2r\text{-}o\text{-}da^2n^2\text{-}se\text{-}me^2tr'$ . See UROMETER.

**URODIALYSIS** (Lat.), n. f.  $U^2r(ur)\text{-}o(o^2)\text{-}di(di^2)\text{-}a^2l(a^2l)/i^2e(u^2e)$ . From *oûron*, urine, and *διάλυσις*, a separating. Fr., *urodialyse*. 1. See UROPLASIA. 2. Decomposition of the urine. [L, 50 (a, 14).]—**U. neonatorum**. Of Schönlein, retarded secretion of urine in the kidneys of new-born infants. [L, 50 (a, 14).]

**URODOCHIM** (Lat.), n. n.  $U^2r(ur)\text{-}o(o^2)\text{-}do^2k(do^2ch^2)\text{-}i(e)^2u^2m(u^2m)$ . Ger., *urôdocheion* (from *oûron*, urine, and *δοχεῖον*, a holder). See URINAL.

**URODRIMYTES** (Lat.), n. f.  $U^2r(ur)\text{-}o(o^2)\text{-}dri^2m(drem)/i^2t(u^2t)\text{-}ez(as)$ . Gen., *-et'os (-et'is)*. From *oûron*, urine, and *δρῦν*, acidity. Fr., *urodymie*. Acidity of the urine. [L, 41, 50 (a, 14).]

**URODYNIA** (Lat.), n. f.  $U^2r(ur)\text{-}o(o^2)\text{-}di^2n(du^2n)/i^2a^2$ . From *oûron*, urine, and *δύνῃ*, pain. Fr., *urodymie*. Pain in passing urine. [E.]

**UREDEMA** (Lat.), n. n.  $U^2r(ur)\text{-}ed(o^2e^2d)\text{-}em(am)^2a^2$ . Gen., *-em'atos (-atis)*. From *oûron*, urine, and *οἰδῆμα*, a swelling. A tumefaction caused by infiltration of urine. [E.]

**UROERYTHRIC ACID, UROERYTHRIN**, n's.  $U^2r\text{-}o\text{-}e^2r\text{-}i^2th(i^2k)\text{-}e^2r\text{-}i^2th(i^2n)$ . From *oûron*, urine, and *έρυθρός*, red. Fr., *uroerythrine, matière rosacée*. Ger., *Uroerythrin*. A coloring matter found in small quantities in normal urine, but forming a copious deposit in certain febrile conditions. It gives a rose color to a urinary deposit sometimes observed after wounds or operations. Its appearance is said to indicate visceral, and especially hepatic disease, and to be often followed by secondary hæmorrhage and gangrene. [Verneuil, "France méd.," May 2, 1885; "Glasgow Med. Jour.," Jan., 1886, p. 74.]

**UROFUSCOHÆMATIN**, n.  $U^2r\text{-}o\text{-}fu^2sk\text{-}o\text{-}he^2m\text{-}a^2t\text{-}i^2n$ . From *oûron*, urine, *fuscus*, dark, and *αἷμα*, blood. Of Baumstark, a red urinary pigment derived from hæmatin, formed in acute or severe disease. [a, 34.]

**URO-GENITAL**, adj.  $U^2r\text{-}o\text{-}je^2an\text{-}i^2t\text{-}l'$ . Lat., *urogenitalis*. Having reference both to the urinary and to the genital tract. This term and its equivalent, *urino-genital*, are more commonly used with regard to anatomical points, while the term genito-urinary, of essentially the same signification, is oftener employed in speaking of pathological matters.

**UROGLAUCIN**, n.  $U^2r\text{-}o\text{-}gla^2s/i^2n$ . See CYANURIN.

**UROGRAVIMETER**, n.  $U^2r\text{-}o\text{-}gra^2v\text{-}i^2m\text{-}e^2t\text{-}n^2r$ . From *oûron*, urine, *gravis*, heavy, and *μέτρον*, a measure. Of Thudichum, a urometer. [a, 34.]

**UROHÆMATIN**, n.  $U^2r\text{-}o\text{-}he^2m\text{-}a^2t\text{-}i^2n$ . Fr., *urohématine*. 1. Of Harley, uroerythrin. [K.] 2. Of MacMunn, see ISOHÆMATOPORPHYRIN.

**UROHÆMATOPORPHYRIN**, n.  $U^2r\text{-}o\text{-}he^2m\text{-}a^2t\text{-}o\text{-}po^2r\text{-}fi^2r\text{-}i^2n$ . From *oûron*, urine, *αἷμα*, blood, and *πόρφυρος*, purple. Hæmatoporphyrin derived from urine. [a, 34.]

**UROHYAL**, n.  $U^2r\text{-}o\text{-}hi^2l$ . From *οὐρά*, a tail, and *υδαής*, hyoid. See *Uro-hyal* BONE.

**UROLEUCIC ACID**, n.  $U^2r\text{-}o\text{-}lu^2si^2k$ . Ger., *Uroleucinsäure*. A monobasic acid,  $C_8H_8O_6$ , found in the urine in alkaptonuria. It has considerable antiseptic power, and is probably antipyretic. ["Brit. Med. Jour.," Aug. 4, 1888, p. 232, Nov. 23, 1889, p. 1149 (a, 50).]

**UROLEUCORRHEA** (Lat.), n. f.  $U^2r(ur)\text{-}o(o^2)\text{-}lu^2k\text{-}o^2r\text{-}re\text{-}(ro^2e^2)\text{-}a^2$ . From *oûron*, urine, *λευκός*, white, and *ρεῖν*, to flow. Fr., *uroleucorrhée*. Ger., *Uroleukorrhœe*. A condition in which the urine contains much mucus.

**UROLITHIASIS** (Lat.), n. f.  $U^2r(ur)\text{-}o(o^2)\text{-}li^2th\text{-}i^2a\text{-}(a^2)/si^2s$ . From *oûron*, urine, and *λίθιασις*, lithiasis. Fr., *urolithiase*. Ger., *Harnsteinbildung*. The formation of urinary calculi, also the condition of the system that results from such formation. [a, 14.]

**UROLITHOTOMIA** (Lat.), n. f.  $U^2r(ur)\text{-}o(o^2)\text{-}li^2th\text{-}o(o^2)\text{-}tom\text{-}(to^2m)/i^2a^2$ . From *oûron*, urine, *λίθος*, a stone, and *τομή*, a cutting. See LITHOTOMY.

**UROLITHUS** (Lat.), n. m.  $U^2r(ur)\text{-}o(o^2)\text{-}li^2th\text{-}u^2s(u^2s)$ . From *oûron*, urine, and *λίθος*, a stone. Fr., *urolithe*. A urinary calculus.

**UROLOGY**, n.  $U^2r\text{-}o(o^2)\text{-}ji^2$ . From *oûron*, urine, and *λόγος*, understanding. Fr., *urologie*. Ger., *Harnlehre*. The physiology, pathology, etc., of the urine and the urinary system. [a, 48.]

**UROMELANIN**, n.  $U^2r\text{-}o\text{-}me^2l\text{-}a^2n\text{-}i^2n$ . Fr., *uromélanine*. A coloring matter present normally in urine to the amount of 5 or 6 grammes a day. It occurs as thin, black, shiny lamellæ. [Ploetz, "Ztschr. f. phys. Chem.," viii, p. 85 (B).]

**UROMELUS** (Lat.), n. f.  $U^2r(ur)\text{-}o(o^2)\text{-}me^2l\text{-}u^2s(u^2s)$ . Gen., *-mel'es*. From *οὐρά*, the tail, and *μέλος*, a limb. A single monster in which there is fusion of the lower limbs; the thigh usually shows evidence of a double formation, but the leg is single and there is a single foot having the heel turned forward. [a, 34.]

**UROMETER**, n.  $U^2r\text{-}o(o^2)\text{-}m^2e\text{-}t\text{-}r$ . From *oûron*, urine, and *μέτρον*, a measure. Fr., *urômetre, pèse-urine*. A hydrometer for measuring the specific gravity of the urine. [K.]

**UROMPHALUS** (Lat.), n. m.  $U^2r(ur)\text{-}o(o^2)\text{-}mf\text{-}a^2l(a^2l)\text{-}u^2s(u^2s)$ . From *oûron*, urine, and *μφαλός*, the navel. Fr., *uromphale*. Ger., *Nabelharnschwellung*. Swelling of the umbilicus due to infiltration of urine. [L, 50 (a, 14).]

**URONCUS** (Lat.), n. m.  $U^2r(ur)\text{-}o(o^2)\text{-}n^2k\text{-}u^2s(u^2s)$ . From *oûron*, urine, and *ὄγκος*, a tumor. A tumor containing urine. [a, 34.]

**URONEPHROSIS** (Lat.), n. f.  $U^2r(ur)\text{-}o(o^2)\text{-}ne^2f\text{-}ros/i^2s$ . Gen., *-ros'eos (-is)*. From *oûron*, urine, and *νεφρός*, the kidney. See NEPHRYDROSIS.

**URONITROTOLUENE ACID**, n.  $U^2r\text{-}o\text{-}nit\text{-}ro\text{-}to\text{-}l\text{-}u^2e\text{-}n$ . A substance found in the urine after the ingestion of orthonitrotoluene. It is levorotary in aqueous solution, and on treatment with dilute acids is decomposed into orthonitrobenzyl, alcohol, and glycuronic acid. ["Ann. di chim. appl. alla farm. ed alla med.," July, 1883 (B).]

**UROPHÆIN**, n.  $U^2r\text{-}o\text{-}fe\text{-}i^2n$ . From *oûron*, urine, and *φαῖς*, gray. Of Heller, the ordinary coloring matter of the urine. [a, 34.]

**UROPHANIC**, adj.  $U^2r\text{-}o\text{-}fa^2n\text{-}i^2k$ . From *oûron*, urine, and *φανός*, conspicuous. Appearing in the urine. [a, 34.]

**UROPHRENESIS** (Lat.), n. f.  $U^2r(ur)\text{-}o(o^2)\text{-}fre^2n\text{-}e(a)/si^2s$ . Gen., *-es'eos (-is)*. From *oûron*, urine, and *φρήν*, the mind. Fr., *urophrénèse*. A supposed metastasis of urine to the brain. [a, 14.]

**UROPHTHISIS** (Lat.), n. f.  $U^2r(ur)\text{-}o(o^2)\text{-}pht\text{-}(i^2s)\text{-}thi^2s\text{-}i^2s$ . Gen., *-pht'his'eos (-ophth'isis)*. From *oûron*, urine, and *φθίσις*, decay. Fr., *urophthisie*. See DIABETES.

**UROPIITIN**, n.  $U^2r\text{-}o\text{-}pi^2t\text{-}i^2n$ . A crystallizable decomposition product (perhaps  $C_8H_8N_2O_5$ ) of urochrome. [B, 93 (a, 14).]

**UROPLANIA** (Lat.), n. f.  $U^2r(ur)\text{-}o(o^2)\text{-}plan(pla^2n)/i^2a^2$ . From *oûron*, urine, and *πλάνη*, a wandering. Ger., *Uroplanie, Harnaus-tretung*. 1. A condition in which the elements of urine are present in other parts than the urinary organs. In the pl., *Uroplanie* (Ger., *Uroplanien*), a genus of the family *Chymoplanice* of Fuchs's classification of skin diseases, including such forms of uræmia as are attended with urinary deposits in the skin producing various cutaneous diseases. [G.] 2. See PARVURIA ERRATICA.

**UROPOESIS** (Lat.), n. f.  $U^2r(ur)\text{-}o(o^2)\text{-}poi(po^2i^2)\text{-}e(a)/si^2s$ . Gen., *-es'eos (-is)*. From *oûron*, urine, and *ποιεῖν*, to make. Fr., *uropoésie*. Ger., *Harnbereitung*. The secretion of urine. [K.]

**UROPOIETIC**, adj.  $U^2r\text{-}o\text{-}poi\text{-}e^2t\text{-}i^2k$ . Ger., *harnabsondernd*. Pertaining to or concerned in the secretion of urine. [K.]

**UROPSAMMUS** (Lat.), n. m.  $U^2r(ur)\text{-}o(o^2)\text{-}ps\text{-}a^2m(a^2m)/mu^2s(mu^2s)$ . From *oûron*, urine, and *ψάμμος*, gravel. Urinary gravel. [L, 50 (a, 14).]

**UROPYGIAL**, adj.  $U^2r\text{-}o\text{-}pi^2j\text{-}i^2l$ . Pertaining to the uropygium. [L, 12.]

**UROPYGIUM** (Lat.), n. n.  $U^2r(ur)\text{-}o(o^2)\text{-}pi^2j(pu^2g)/i^2u^2m(u^2m)$ . From *οὐρά*, the tail, and *πυγή*, the rump. Fr., *croypion*. Ger., *Burzel, Schwanzgegend*. The rump or coccygeal region in a bird. [a, 48.]

**UROROSEIN**, n.  $U^2r\text{-}o\text{-}roz\text{-}e^2i^2n$ . Fr., *uroroséine*. Ger., *Uro-rosein*. A rose-colored pigment,  $C_{22}H_{40}N_4O_8$ , found in the urine of persons affected with diabetes, chlorosis, osteomalacia, nephritis, carcinoma, etc. Its solutions give a characteristic absorption line between the lines D and E of the spectrum. In its chemical relations

it behaves somewhat like the colors of the rosaniline series. ["Jour. f. prakt. Chem.," N. F., xxvi, p. 333 (B); "Arch. de méd. expér. et d'anat. path.," Dec. 16, 1891, p. 808.]

**URORRHAGIA** (Lat.), n. f.  $U^2r(ur)-o^2r-raj(ra^2g)/i^2-a^2$ . From  $o\dot{\rho}\rho\upsilon$ , urine, and  $\rho\eta\rho\rho\alpha\iota$ , to burst forth. Fr., *urorrhagie*. See DIABETES.

**URORRHŒA** (Lat.), n. f.  $U^2r-o^2r-re/(ro^2e^2)-a^2$ . From  $o\dot{\rho}\rho\upsilon$ , urine, and  $\rho\eta\alpha$ , a flowing. Fr., *urorrhée*. Ger., *Harnfluss*, *Urorrhoe*. See ENURESIS and POLYURIA.—**U. mellita**. See DIABETES mellitus.

**URORRHORRŒA** (Lat.), n. f.  $U^2r(ur)-o^2r-ro^2r-re/(ro^2e^2)-a^2$ . From  $o\dot{\rho}\rho\upsilon$ , urine,  $\rho\eta\alpha$ , a flowing, and  $\rho\eta\alpha$ , a flowing. Fr., *urorrhorrhée*. Albuminuria. [L. 50 (a, 14).]

**UROBUBIN**, n.  $U^2r-o^2r-u^2b/i^2n$ . Fr., *urubine*. Ger., *U*. A coloring matter found in normal and pathological urines. It forms a dark cherry-red, brittle mass, whose ethereal solution gives an absorption band extending from the lines D to F of the spectrum. [Ploasz, "Ztschr. f. phys. Chem.," xiii, p. 85 (B).]

**UROBUBROHEMATIN**, n.  $U^2r/o^2r-u^2b''/ro^2h-e^2m/a^2t-i^2n$ . From  $o\dot{\rho}\rho\upsilon$ , urine, *ruber*, red, and  $\alpha\iota\mu\alpha$ , blood. Of Baumstork, a brown urinary pigment obtained from a patient suffering with pemphigus leprosus. [a, 34.]

**UROSACRAL**, adj.  $U^2r-o^2s-ak'r'l$ . From  $o\dot{\upsilon}\rho\acute{\alpha}$ , the tail, and *sacrum* (q. v.). Pertaining to the tail and the sacrum (said of a bone formed by the fusion of the sacrum and some of the vertebrae anterior to it). [L. 12, 221.]

**UROSCHEOCELE** (Lat.), n. f.  $U^2r(ur)-o^2sk(o^2sch^2)-e^2-o^2(s)-se-(ka)/e^2(la)$ . In Eng.,  $u^2r-o^2sk/e^2-o^2-sel$ . Gen., *-cel'es*. From  $o\dot{\rho}\rho\upsilon$ , urine,  $\sigma\chi\epsilon\omega\varsigma$ , the scrotum, and  $\kappa\eta\lambda\eta$ , a tumor. Fr., *uroscheocèle*. A urocele of the scrotum.

**UROSCHESIS** (Lat.), n. f.  $U^2r(ur)-o^2sk(o^2sch^2)/e^2s-i^2s$ . Gen., *-sch'es/eos* (*-sch'es*). From  $o\dot{\rho}\rho\upsilon$ , urine, and  $\sigma\chi\epsilon\omega\varsigma$ , retention. Fr., *uroschésie*. Suppression of urine. [L. 41 (a, 14).]

**UROSCOPY**, n.  $U^2r-o^2sk/op-i^2$ . Lat., *uroscopia* (from  $o\dot{\rho}\rho\upsilon$ , urine, and  $\sigma\kappa\omicron\pi\epsilon\iota\upsilon$ , to examine). Fr., *uroscopie*. Ger., *Uroskopie*, *Harnschau*, *Harnbeschauung*. Examination of the urine. [K.]

**UROSEPSIS** (Lat.), n. f.  $U^2r(ur)-o^2(s)-seps(saps)/i^2s$ . Gen., *-seps'es* (*-is*). From  $o\dot{\rho}\rho\upsilon$ , urine, and  $\sigma\eta\psi\iota\varsigma$ , putrefaction. Septicæmia due to the putrefaction of urine extravasated within the tissues of the body. [a, 34.]

**UROSIS** (Lat.), n. f.  $U^2r(ur)-os/i^2s$ . Gen., *-os'es* (*-is*). From  $o\dot{\rho}\rho\upsilon$ , urine. Fr., *urose*. Ger., *Harnkrankheit*. Of Alibert, any disease of the urinary organs. [L. 41, 50 (a, 14).]

**UROSPASMUS** (Lat.), n. m.  $U^2r(ur)-o^2(s)-spa^2z(spa^2s)/mu^2s-(mu^2s)$ . From  $o\dot{\rho}\rho\upsilon$ , urine, and  $\sigma\pi\alpha\sigma\mu\acute{o}\varsigma$ , a spasm. Spasm of the urinary tract. [L. 50 (a, 14).]

**UROSPERMUM** (Lat.), n. n.  $U^2r(ur)-o^2(s)-spu^2rm(spe^2rm)/u^2m(u^2m)$ . From  $o\dot{\rho}\rho\acute{\alpha}$ , the tail, and  $\sigma\pi\epsilon\rho\mu\alpha$ , seed. Fr., *urosperme*. Sheep's-beard; a genus of composite herbs, typical of a subdivision (*Urospermeae*) of the *Lactucæ*. [a, 35].—**U. pteroides**. The *ἰερίδιον μέγα* of Dioscorides, indigenous to Mediterranean regions; used in gastric complaints and externally as an antiplogistic. [a, 35.]

**UROSTEALITH**, n.  $U^2r-o^2ste/a^2l-i^2th$ . From  $o\dot{\rho}\rho\upsilon$ , urine,  $\sigma\tau\epsilon\alpha\iota$ , fat, and  $\lambda\iota\theta\alpha\varsigma$ , a stone. Fr., *urostéaélite*. A pseudo-calculus consisting of fatty matter combined with lime, forming a kind of soap. [E. 12.]

**UROSTENOSIS** (Lat.), n. f.  $U^2r(ur)-o^2(s)-ste^2n-os/i^2s$ . Gen., *-os'es* (*-is*). From  $o\dot{\rho}\rho\upsilon$ , urine, and  $\sigma\tau\epsilon\nu\omega\varsigma$ , stenosis. See UROTHROSTENOSIS.

**UROSTIGMA** (Lat.), n. n.  $U^2r(ur)-o^2(s)-sti^2g/ma^2$ . Gen., *-stigm'atos* (*-atis*). A genus of the *Urticaceæ*, made by Benth and Hooker a section of the genus *Ficus*. [a, 35].—**U. elasticum**. See *Ficus elastica*.—**U. religiosa**. See *Ficus religiosa*.

**UROTHELIC ACID**, n.  $U^2r-o^2su^2lf/i^2k$ . See THIOURIC ACID.

**UROTHEOBROMINE**, n.  $U^2r-o^2o^2-brom'en$ . See PARAXANTHINE.

**UROTOXIC**, adj.  $U^2r-o^2to^2x/i^2k$ . Fr., *urotoxique*. Pertaining to the toxicity of urine. ["Sem. méd.," Dec. 4, 1889, p. 449 (a, 18).]

**UROUS ACID**, n.  $Ur^2u^2s$ . See XANTHIN.

**UROXANIC ACID**, n.  $U^2r-o^2x-a^2n/i^2k$ . Fr., *acide uroxanique*. Ger., *Uroxansäure*. A dibasic acid,  $C_6H_4N_4O_8$ , in prismatic crystals or spheruloids, obtained by long exposure of uric acid dissolved in caustic potash to air free from carbon dioxide. [B, 3 (a, 38).]

**UROXANTHIN**, n.  $U^2r-o^2za^2nth/i^2n$ . Fr., *uroxanthine*. Ger., *U*. See INDICAN.

**UROXIN**, n.  $U^2r-o^2x/i^2n$ . See ALLOXANTINE.

**UROZEMIA** (Lat.), n. f.  $U^2r(ur)-o^2(s)-zem(zam)/i^2-a^2$ . From  $o\dot{\rho}\rho\upsilon$ , urine, and  $\eta\upsilon\alpha\iota\alpha$ , loss. Fr., *urozémie*. See DIABETES.

**URPÉTHITE** (Fr.), n.  $Ur^2p-a^2-tet$ . See OZOKERITE.

**URPFLANZE** (Ger.), n.  $Ur^2pfla^2nts-e^2$ . See PROTOPHYTE.

**URRHODIN**, n.  $U^2r-rod/i^2n$ . From  $o\dot{\rho}\rho\upsilon$ , urine, and  $\rho\delta\delta\iota\upsilon\varsigma$ , made of roses. Of Thudichum, a decomposition product of the hemolysis by acids of a particular chromogen not yet isolated. [a, 34.]

**URRHODENOGEN**, n.  $U^2r-rod-i^2n/o^2ge^2n$ . Of Thudichum, a substance not yet isolated, the decomposition of which by hydrochloric acid produces urrhodin. [a, 34.]

**URRHODONIC ACID**, n.  $U^2r-rod-o^2n/i^2k$ . An acid obtained from urine, forming brown stellate or sheaf-like bundles of crystals, of a highly aromatic odor, very soluble in water and in ether. [a, 34.]

**URSACHE** (Ger.), n.  $Ur^2za^2sch^2-e^2$ . See CAUSE.—**Gelegenheitsu'**. See *Determining CAUSE*.—**Mitu'**, **Mitwirkende U'**. See *Accessory CAUSE*.—**Nächste U'**. See *Proximate CAUSE*.—**Nebenu'**. See *Accessory CAUSE*.

**URSCHLEIM** (Ger.), n.  $Ur^2shlim$ . See PROTOPLASM.

**URSONE**, n.  $Ur^2s'on$ . Fr., *u*. Ger., *Urson*. A substance,  $C_{10}H_{16}O$  (or  $C_{10}H_{15}O_2$ ), obtained by Trommsdorf from the leaves of *Arbutus uva ursi* as silky, acicular crystals. [B, 270 (a, 38).]

**URSPRUNG** (Ger.), n.  $Ur^2sprun^2$ . See ORIGIN.

**URSTOFF** (Ger.), n.  $Ur^2sto^2f$ . See ELEMENT.—**U'theilchen**. See ATOM.

**URTÈRE** (Fr.), n.  $Ur^2t-e^2r$ . An old form of *urètre* (q. v.).

**URTHERCHEN** (Ger.), **URTHERIE** (Ger.), n's pl.  $Ur^2t-eh^2e^2n$ , *-ter-e^2*. See PROTOZO.

**URTICA** (Lat.), n. f.  $Ur^2t(ur^2t)-ik(ek)/a^2$ . From *urere*, to burn. Fr., *ortie* (1st def.). Ger., *Brennnessel* (1st def.), *Nessel* (1st def.). 1. Nettle; a genus of herbs with stinging hairs, giving name to a large order (the *Urticaceæ* [Fr., *urticacées*; Ger., *Nesselgewächse*], *Urticæ*, *Urticæ* [Fr., *urticées*; Ger., *Urticeen*], *Urticina*, or *Urticina* [Fr., *urticinales*]) of apetalous dicotyledons. In an extended sense, the order includes the *Ulmæ*, *Celtidæ*, *Cannabineæ*, *Morææ*, *Artocarpeæ*, *Conocephalæ*, *Thelygonæ*, and *Urticæ* proper. These last, the nettles, including *U. Laportea*, *Urtica*, *Boehmeria*, etc., are remarkable for the caustic secretion of their glandular hairs. [a, 35.] 2. The eruption produced by the sting of a nettle; a pomphus; a wheal.—**Extractum urticae**. Fr., *extrait d'ortie*. An extract obtained from the juice of *U. dioica*, which is clarified by heating and evaporated. [B, 119 (a, 38).]—**Syrupus urticae**. Fr., *sirop d'ortie*. A syrup made by boiling together equal parts of clarified juice of *U. dioica* and sugar. [B, 119 (a, 38).]

—**U. baccifera**. A West Indian species. The flowers and roots are used as an aperient, and the leaves as a resolvent. [a, 35].—**U. dioica**. Fr., *ortie dioïque*, *grande ortie*, *ortuge*. Ger., *zweihäufige Nessel*, *grosse Brennnessel*. The common (stinging) nettle of Europe, Asia, and North America. The root, herb, and achenes, *radix*, *herba*, et *semen urticae* (*majoris*, seu *vulgaris*, seu *racemifera*, seu *dioicae*), were formerly official—the first, which contains a volatile oil, as a diuretic; the second as a diuretic, astringent, hæmostatic, anthelmintic, etc.; and the last as a mucilaginous emollient. The young shoots are eaten, boiled, as an antiscorbutic. The plant is applied to the skin in local paralysis, etc., as an irritant, the effects in such cases being due, it is said, to the presence of free formic acid in the hairs. [a, 35].—**Urticæ folia** [Gr. Ph.]. The fresh leaves of *U. pilulifera*. [B, 95 (a, 38).]—**U. gigas**. See *LAPORTEA gigas*.—**U. iners**. See *LAMIUM album*.—**U. latifolia**. A laxative and diuretic species growing in South America. [a, 35].—**U. major**. See *U. dioica*.—**U. membranacea**. A species found in southern Europe and northern Africa, considered aphrodisiac. In Egypt the herb and seed are used as an emmenagogue and pectoral. [a, 35].—**U. mexicana**. The *yegos del país* of the Mex. Ph. The root is used as a diaphoretic and as a substitute for *Sambucus ebulus*. [J. M. Maisch, "Ann. Jour. of Pharm.," Apr., 1886, p. 168.]—**U. minor**. See *U. urens*.—**U. mortua**. See *LAMIUM album*.—**U. nivea**. Fr., *ortie blanche*. The Chinese cotton-nettle. [a, 35.] See *BOEHMERIA nivea*.—**U. pilulifera**. Roman nettle, growing in southern Europe and in Asia. The mucilaginous fruits, *semen urticae romana* (seu *hispanica*, seu *pilulifera*), were formerly used as a pectoral and are now employed in Greece as a galactagogue. The root is considered astringent, diuretic, and pectoral. [a, 35].—**U. Rumphii**. A native of the Moluccas, where it is cultivated and much used as a scourge in local torpor, stiffness of joints, paralysis, etc. [a, 35].—**U. stimulans**. See *LAPORTEA stimulans*.—**U. urens**. Fr., *ortie brûlante* (ou *grièche*, ou *folle*, *petite ortie*. Ger., *kleine Nessel* oder *Brennnessel*). The small (British) nettle, or dwarf-nettle, of Europe, middle and northern Asia, and North America. The herb and fruits (achenes), *herba* et *semen urticae* (*minoris*, seu *urentis*), were formerly used like those of *U. dioica*. The plant has been recommended in metrorrhagia. [a, 35].—**U. urentissima**. Fr., *feuille du diable*. The *daum* seed of Java, devil's-leaf of Timor; a very poisonous species, said to be used like *Laportea stimulans*. [a, 35].—**U. vulgaris**. See *U. dioica*.

**URTICAL**, adj.  $Ur^2t-ik'l$ . Lat., *urticalis*. Belonging to the *Urticales*, which are Lindley's u. alliance (Lat., *uriceus urticalis*) of diclinous exogens, including the *Urticaceæ*, *Moraceæ*, *Artocarpaceæ*, etc. [a, 35.]

**URTICARIA** (Lat.), n. f.  $Ur^2t(ur^2t)-ik(ek)-a(a^2)/ri^2-a^2$ . From *urtica*, a nettle. Fr., *urticaire*, *fièvre urticaire*. Ger., *Nesselausschlag*, *Nesselfriesel*, *Nesselfieber*, *Nesselsucht*, *Porcellanfriesel*, *Wiebelsucht*. 1. Hives, nettle-rash; an acute or chronic disease of the skin characterized by an eruption of red, elevated, rounded efflorescences of irregular shape and size, which at a certain stage of their development appear blanched in the centre and erythematous at the periphery, being then commonly known as *wheals*. The eruption is attended with intense itching. It is usually transitory, though sometimes disposed to recur. The *Urticariæ* of Plenck correspond to u. febrilis. 2. Of Bazin and Auspitz, u. acuta, the chronic form being termed by them *cnidosis*. [G, 4, 26.]—**Glant u.** Fr., *urticaire massive*. Of Milton, u. characterized by large oedematous swellings of the skin or of the mucous membrane of the tongue, throat, urethra, etc., which are rarely accompanied by change of color or itching and are evanescent. ["Edinb. Med. Jour.," cclviii, p. 513 (G).] Cf. *U. oedematosa*.—**Internal u.** U. affecting the mucous membranes in the interior of the body. It is sometimes observed on the tongue, pharynx, or larynx, and inasmuch as attacks are sometimes associated with nausea and vomiting or with spasmodic dyspnoea, it is inferred that the stomach and air passages may also be subject to the lesions of the disease, and perhaps the mucous membranes of other regions. [G.]—**U. ab ingestis**. U. provoked by the ingestion of certain articles of food.

[G.]—**U. acuta**. Ger., *Nesselfieber*. U. that runs an acute course and is usually attended with fever. [G.]—**U. alba**. U. of the ordinary type, with wheals that show a white surface in the centre with redness at the periphery. [G.]—**U. annularis**. U. in which the eruption takes the form of rings. [L, 57 (a, 14).]—**U. bullosa**. U. attended with a production of bullae. [G.]—**U. chronica**. Ger., (*chronische Nesselsucht*). U. characterized by long continuance, or (more commonly) by a long-persisting tendency to relapsing attacks. [G.]—**U. conforti**. U. characterized by efflorescences closely clustered together. [G.]—**U. dermatographica**. See *U. factitia*.—**U. endemica**. A form of u. coinciding with (perhaps due to) the presence of *Bombyx processionea*, and consisting in a cutaneous eruption, forming partly pustules, partly wheals, and spreading over the entire body. It is accompanied with violent itching. ["Arch. f. path. Anat. u. Physiol.," 1891, 125, 2, p. 220 (a, 50).]—**U. ephemera**. Acute u. of short duration. [G.]—**U. evanida**. Ger., *wandelbare Nesselsucht*. U. of very brief duration, or that comes and goes. [G, 10.]—**U. factitia**. Chronic u. in which by artificially irritating the skin the eruption may be produced at will. [G.]—**U. febrilis**. See *U. acuta*.—**U. figurata**. U. characterized by efflorescences grouped in determinate figures. [G.]—**U. fugax**. See *U. evanida*.—**U. gigans**. See *U. tuberosa*.—**U. gyrata**. U. the efflorescences of which form gyrate figures or lines. [G.]—**U. hæmorrhagica**. See *PURPURA urticans*.—**U. medicamentosa**. U. provoked by the administration of drugs. [G.]—**U. miliaris**. U. attended with an eruption of miliary vesicles. [G.]—**U. neuritica**. U. due to a lesion of the nerve or nerves supplying the affected part. [G, 4.]—**U. nodosa**. See *U. tuberosa*.—**U. oedematosa**. A form of u. characterized by the sudden appearance of oedematous swellings upon different parts of the body, usually, though not always, accompanied by urticarial wheals and itching, and after a short time suddenly disappearing. [G, 51.]—**U. papulosa**. A form of u. observed especially in children, in which, instead of distinct wheals, smallish red papules are formed which itch violently and frequently appear excoriated from scratching. The eruption is usually more persistent than the ordinary form of u. [G, 3.]—**U. perstans**. Ger., *beharrende Nesselsucht*. U. in which the efflorescences persist throughout the attack. [G.]—**U. pigmentosa**. A form of chronic u., in young children, in which the efflorescences persist for a long time and are accompanied with a brownish-yellow pigmentation. [G.]—**U. porcellanea**. See *U. alba*.—**U. recidiva**. *U. recurrens*. U. characterized by a disposition to recur, as in u. chronica. [G.]—**U. rubra**. U. with red efflorescences. [G.]—**U. subcutanea**. Ger., *schleichende Nesselsucht*. Of Willan, a form of chronic or relapsing u. associated with itching or tingling of the skin, with an occasional eruption of wheals. [G, 12.]—**U. tuberosa**. Ger., *Nesselfriesel, harte Nesselsucht*. A form of u. marked by rapid increase of some of the wheals to a large size, forming hard tuberosities which seem to extend deeply and occasion deep-seated pains. [G, 12.]—**U. vaccinica**. U. induced by vaccination. [G, 27.]—**U. vesiculosa**. U. attended with vesicles. [G.]

**URTICARIAL**, adj. *Urt'ik-ar'iz-l*. Lat., *urticatus*. Fr., *ortié*. Pertaining to or resembling urticaria. [G.]

**URTICATING**, adj. *Urt'ik-at-in²*. Fr., *urticant*. Stinging like a nettle. [a, 27.]

**URTICATIO** (Lat.), n. f. *Urt'ik-at-ion²*. (a) (a³) (ti²) (i²)-o. Gen., *-on'is*. See URTICATION and URTICARIA chronica.

**URTICATION**, n. *Urt'ik-a'shu²n*. Lat., *urticatio* (from *urtica*, a nettle). Fr., *u*. A method of producing substitutive irritation by beating the skin with nettles. [G.]

**URUCU**, n. See ANNOTTO.

**URUCURI**, n. In Brazil, the *Attalea excelsa*. [a, 35.]

**URUSHIC ACID**, n. *Urt'ik-a'shu²n*. From Jap., *urushi*, lacquer. A monobasic acid discovered in Japanese lacquer. ["Nature," June 25, 1885, p. 190 (B).]

**URWINDUNG** (Ger.), n. *Urt'v'nd-un²*. 1. A primitive convolution of the brain. 2. Of Huschke, one of the frontal convolutions. [I, 6 (K).]

**URWIRBEL** (Ger.), n. *Urt'verb-e²*. A protovertebral somite. —**Eigentliches U.** [Kölliker]. All that portion of the protovertebral structure of the embryo which remains after the separation of the muscular plate; the *Wirbelkernmasse* of Remak. [A, 8.]

**URZEUGUNG** (Ger.), n. *Urt'zoi-g-un²*. See Spontaneous GENERATION.

**USAGRO**, n. An Arabian term apparently applied to psoriasis. [Rayer.]

**USNEA** (Lat.), n. f. *U³s(u³s)'ne²-a³*. Fr., *usnée*. Ger., *Bartflechte*. A genus of fruticose lichens. The *Usneaceæ* (*Usneacei*, *Usneæ*, *Usneæ*, *Usneei*, or *Usneidae*), including *Cetraria*, *U. Evernia*, etc., are a division of the *Utricaria*. [a, 35.]—**U. barbata**. Fr., *usnée barbuée, barbe de capucin*. Ger., *gemeine Bartflechte, Haarnose*. Necklace moss, tree hair; a species found on the bark of trees (sometimes on Loxa-bark). This and similar species, known as *Musci arbores*, *Musci quercinus*, *Musci arbores albus*, and *Musci albus quercinus*, are bitter and astringent, and were formerly used in indigestion, dysentery, hæmorrhages, etc. [a, 35.]—**U. cranii humani**. The *Parmelia omphalodes*, *Parmelia saxatilis*, and other lichens found on human bones and skulls exposed to the elements. [a, 35.]—**U. jubata**. Tree-hair lichen, formerly official as *Musci arbores nigricans*. [a, 35.]

**USNEIN, USNIC ACID, USNIN**, n's. *U³s'ne²-i²n*, *-ni²k*, *-ni²n*. Fr., *acide usnique, usnéine, usnine*. Ger., *Usninsäure*. A crystallizable acid, *C₁₃H₁₆O₇*, obtained from *Parmelia prunastri* and other lichens. [B, 93 (a, 14).]

**USNINIC ACID**, n. *U³s-ni²n'izk*. Fr., *acide usninique*. An acid, *C₁₃H₁₆O₇*, obtained from various lichens, occurring as sulphur-yellow prismatic crystals. [B, 270 (a, 38).]

**USSAT** (Fr.), n. *U³s-sa²*. A place in the department of the Ariège, France, where there are hot springs. [L, 41, 49, 57 (a, 14).]

**USTILAGO** (Lat.), n. f. *U³st(u³st)-i²-ag(a²g)'yo*. Gen., *-ag'inis*. Fr., *charbon* (1st def.). Ger., *Flugbrand* (1st def.). 1. The typical genus of the *Ustilaginaceæ*, or *Ustilaginæ* (Fr., *ustilaginées*; Ger., *Ustilagineen, Brandpilze*), or *Ustilaginei* (Fr., *ustilaginés*), which are the smut *Fungi*, a division of the *Hypodermia* or of the *Zygomycetes*, parasitic on flowering plants. The mycelium penetrates through the intercellular spaces of the host-plant and destroys it. [a, 35.] 2. Of the U. S. Ph. see *U. maidis*.—**U. caries**, *U. foetida*. See *TILETTIA caries*.—**U. maidis**, *U. maydis*. Corn- (or maize-) smut; a species which occurs on the stem, grains, and tassels of *Zea mays* in smooth, irregular, roundish-lobed masses, inclosing innumerable blackish-brown nodular spores, of disagreeable smell and taste. It is the u. of the U. S. Ph. (see *Ergot of maize*). [a, 35.]—**U. segetum**. Smut, brawn, brancorn; a species affecting wheat, barley, oats, Indian corn, and other grasses. Its spores are absorbed into the tissues of the grass, and are carried up till they reach the grain in the ear, which becomes a sooty mass. It differs from *U. foetida* in having no odor. [a, 35.]

**USTION**, n. *U³st'yu²n*. Gr., *καυσῶ*. Lat., *ustio* (from *urere*, to burn). Fr., *u*. Ger., *U*. 1. A burn. 2. Cauterization. [E.]

**USTULATION**, n. *U³st-u²l-a'shu²n*. Lat., *ustulatio* (from *ustulare*, to scorch). Fr., *u*. In ancient pharmacy, the roasting of a moist substance before powdering it. [L, 41, 56 (a, 14).]

**USTUS** (Lat.), adj. *U³st(u³st)'u³s(u³s)*. From *urere*, to burn. Burnt, calcined. [E.]

**USUR** (Ger.), n. *U-zur'*. Fr., *usure*. An abrasion.

**USURE** (Fr.), n. *U-zu²r*. See *USUR*.—**U. des dents**. See *ONTOPTOTRIE*.—**U. de l'utérus**. Ger., *Durchreibung des Uterus*. Slow perforation of the uterus by attrition during labor, as opposed to rupture properly so called.

**UTER** (Lat.), n. m. *U³t(u³t)'u³r(e²r)*. Gen., *ut'ri*. See *UTERUS*.

**UTERALGIA** (Lat.), n. f. *U³t(u³t)-e²r-a²l'j(a²l'g)'i²-a³*. From *uterus* (q. v.), and *algos*, pain. Fr., *utérâlgie*. See *HYSTERALGIA*.

**UTÉRANGIOLEUCITE** [Piorry] (Fr.), n. *U³-ta-ra³n²-zhe-o-lu²-set*. Inflammation of the lymphatics of the uterus. [a, 14.]

**UTÉREMPHRAXIE** (Fr.), n. *U³-ta-ra³n²-fra²x-e*. Obstruction of the uterus. [L, 41 (a, 14).]

**UTERINE**, adj. *U³t'e²r-i²n*. Lat., *uterinus*. Fr., *utérin*. Ger., *uterinal*. Pertaining to, associated with, or affecting the uterus.

**UTERITIS** (Lat.), n. f. *U³t(u³t)-e²r-i²(e)'ti²s*. Gen., *-it'idōs (-idis)*. Fr., *utérite*. See *METRITIS*.

**UTÉROCEPS** (Fr.), n. *U³-ta-ro-se²ps*. An instrument for grasping the cervix uteri. [L, 41 (a, 14).]

**UTERO-ABDOMINAL**, adj. *U³t'e²r-o-a²b-do³m'i²-n'l*. Pertaining to the uterus and the abdomen. [a, 48.]

**UTÉRO-EPICHOIRIAL** (Fr.), n. *U³-ta-ro-a-pe-ko-re-a²l*. See *DECIDUA serotina*.

**UTEROFIXATION**, n. *U³t'e²r-o-fi²x-a'shu²n*. From *uterus* (q. v.), and *figere*, to fix. See *HYSTEROPLEXIA*.

**UTERO-GESTATION**, n. *U³t'e²r-o-je²st-a'shu²n*. See *GESTATION* (2d def.).

**UTÉRO-INGUINORRHAPHIE** (Fr.), n. *U³-ta-ro-a²n²-ge-no-ra³-fe*. See *ADVANCEMENT of the round ligaments*.

**UTÉRO-LUMBAR**, adj. *U³t'e²r-o-lu²mb'a²r*. Fr., *utéro-lombaire*. Pertaining to or connecting the uterus and the lumbar region. [L, 41, 49 (a, 14).]

**UTEROMANIA** (Lat.), n. f. *U³t(u³t)-e²r-o(o³)-man(ma³n)'i²-a³*. From *uterus* (q. v.), and *mania*, madness. Fr., *utéromanie*. An old term for nymphomania. [A, 42.]

**UTERO-OVARIAN**, adj. *U³t'e²r-o-o-va'ri²'n*. Fr., *utéro-ovarien, utéro-ovarique*. Pertaining to the uterus and the ovary.

**UTERO-PARIETAL**, adj. *U³t'e²r-o-pa²r-i²e't-l*. Pertaining to the uterus and the abdominal wall.

**UTERO-PLACENTAL**, adj. *U³t'e²r-o-pla²s-e²n't'l*. Fr., *utéro-placentaire*. Ger., *uteroplacentar*. Pertaining to the uterus and the placenta. [a, 48.]

**UTERORRHAGIA** (Lat.), n. f. *U³t(u³t)-e²r-o²r-ra²j(r²a²g)'i²-a³*. From *uterus* (q. v.), and *ῥῆγνυσθαι*, to burst forth. See *METORRHAGIA*.

**UTERORRHAPHY**, n. *U³t'e²r-o²r'a²f-i²*. From *uterus*, the uterus, and *ῥάφῃ*, a seam. See *HYSTERORRHAPHY*.

**UTÉRORRHÉE** (Fr.), n. *U³-ta-ro-r²a*. See *METORRHÉE*.

**UTERO-SACRAL**, adj. *U³t'e²r-o-sa²k'r'l*. Fr., *utéro-sacré*. Pertaining to the uterus and the sacrum. [a, 48.]

**UTEROSCOPE** (Fr.), n. *U³-ta-ro-sko-pe*. See *METROSCOPY*.

**UTÉROSTOMELCIE** [Piorry] (Fr.), **UTÉROSTOMELCOSIE** [Piorry] (Fr.), n's. *U³-ta-ro-sto-me²l-se*, *-e²l-ko-ze*. Ulceration of the cervix uteri. [L, 41 (a, 14).]

**UTEROTOME**, n. *U³t'e²r-o-tom*. Fr., *utérótome*. See *HYSTEROTOME*.

**UTEROTOMY**, n. *U³t'e²r-o²t'om-i²*. Lat., *uterotomia* (from *uterus* [q. v.], and *τομή*, a cutting). Fr., *utérotomie*. See *HYSTEROTOMY*.

**UTEROTRACTOR**, n. *U³t'e²r-o-tra²kt'o²r*. From *uterus* (q. v.) and *trahere*, to drag. An instrument employed by A. C. Bernays for making traction on the cervix uteri, differing from Noeggerath's tenaculum-forceps chiefly in having several teeth on each blade. ["Weekly Med. Rev.," Apr. 12, 1884, p. 288.]

**UTERO-VAGINAL**, adj. *U³t'e²r-o-va²j'i²-n'l*. Pertaining to the uterus and the vagina.

**UTERO-VENTRAL**, adj.  $U^2(u^2)/e^2r-o-ve^2n/tr^1$ . Pertaining to the uterus and the abdominal cavity.

**UTERHÉMIE** [Piorry] (Fr.), n.  $U^2-te^2r-ra-me$ . See METRORRHAGIA.

**UTERUS** (Lat.), n. m.  $U^2(u^2)/e^2r-u^2s(u^4)s$ . Gr., *ὑτέρα*. Fr., *utérus*, *matrice*. Ger., *U.*, *Gebärmutter*, *Gebärorgan*, *Fruchthalter*, *Mutterbag* (3d def.). 1. The organ of gestation; made up chiefly of muscular fibres and having a cavity lined with mucous membrane continuous with that of the vagina. It is covered before and behind with peritoneum. In the human subject it is situated in the pelvis. In the non-gravid state it has the shape of a pear flattened from before backward. It is suspended in the pelvis by the broad ligaments. Its cavity is 2½ in. in depth. It is divided into a body and a neck; the latter projects backward and somewhat downward into the vagina. 2. In mycology, the *velum universale*. [a, 35.]—**Arched u.** Lat., *u. arcuatus*. That form of u. in which the longitudinal median furrow marking the union of the primitive halves of the organ is more than ordinarily pronounced at the fundus, from the fusion of the horns being somewhat defective. [a, 24.]—**Bilobed u.** See *U. bicornis*.—**Divided u.** See *U. septus*.—**Double u.** Ger., *doppelte Gebärmutter*. That malformation of the u. in which the two horns are developed, but have not become fused into one organ. See also *U. bicornis* and *U. septus*.—**Ductile u.** Syn.: *squatty u.* [Taylor]. Of I. E. Taylor (who repudiates "balloon u."), a condition of the u. in which its walls are lax and yielding, so that they collapse horizontally and may be carried up before a sound introduced into the cavity of the organ.—**Duplex u.** See *Double u.*—**Fusiform u.** Lat., *u. fusiformis*. Ger., *spindelförmiger U.* That form of the u. in which, during advanced pregnancy, its vertical diameter is the greatest. Schröder and Stratz [a, 388].—**Gravid u.** A u. containing a fecundated ovum.—**Imparous u.** Of Barnes, a u. that has never contained a product of conception. [a, 34.]—**Impregnated u.** See *Gravid u.*—**Ineudiform u.** An anvil-shaped u. [a, 34.]—**Infantile u.** Lat., *u. foetalis*. Fr., *utérus foetal* (on embryonnaire). That abnormality of the u. in which it is normally formed, but has been arrested in its development. [Lefort (A, 15).]—**Intestineform u.** A u. having an elongated cervix and a thin body resembling a section of intestine. [a, 34.]—**Inverted u.** The u. in a state of inversion (q. v.).—**Irritable u.** See *HYSTERALGIA* (2d def.).—**Male u.** See *U. masculinus*.—**Membranous u.** Of Walter, a u. in which the walls are attenuated by distention and atrophy caused by fibroid tumors. [a, 34.]—**Pregnant u.** See *Gravid u.*—**Retort-shaped u.** Ger., *Retortengestalt der Gebärmutter*. A flexed u. that has an elongated cervix, giving the organ the appearance of a retort. [a, 34.]—**Saccated u.** A u. in the condition of hour-glass contraction. [a, 75.]—**Squatty u.** [Taylor]. See *Ductile u.*—**Twin u.** See *Double u.*—**U. acollis**. See *U. parvicollis*.—**U. anhangē** (Ger.). See *UTERINE APPENDAGES*.—**U. arcuatus**. See *Arched u.*—**U. biangularis**. See *Incidiform u.*—**U. bicornis**. That malformation of the u. in which the two rudimentary lateral halves, or horns, remain more or less separate, instead of coalescing through their whole length. See also *U. bicornis duplex* and *U. bicornis semiduplex*.—**U. bicornis duplex**. Ger., *gänzliche Verdoppelung der Gebärmutter*. That variety of double u. in which the duplicate formation affects the whole organ. [a, 34.]—**U. bicornis simplex**. *U. bicornis semiduplex* (seu *infra simplex*). *U. bicornis uncollis*. Ger., *theilweise Verdoppelung der Gebärmutter*. A duplex u. in which the body alone is double and the cervix is single. [a, 34.]—**U. bicorpor**. A u. consisting of two bodies.—**U. biforis**. See *U. bicornis*.—**U. bifundalis uncollis**. See *U. bicornis uncollis*.—**U. bilocularis**, *U. bipartitus*. See *U. septus*.—**U. bruch** (Ger.). Rupture of the u.—**U. cordiformis**. Fr., *utérus échanuré*. That form of defective development of the u. in which the fundus remains depressed, so that the organ has somewhat the shape of the heart of a playing-card. [a, 22.]—**U. deficiens**. Absence of the uterus.—**U. didelphis**, *U. didelphys*. See *Double u.*—**U. diductus**. That variety of double u. in which there are complete independence and divergence of the two halves. [Lefort (A, 15).]—**U. duplex**. See *Double u.*—**U. duplex separatus**. A double u. in which there is no connection between the two halves of the organ; associated with double vagina. [Spiegelberg (a, 34).]—**U. flexus**. A u. with an abnormal flexion. [Lefort (A, 15).]—**U. foetalis**. See *Infantile u.*—**U. globularis**. A u. subseptus with complete fusion of the two lateral halves externally. [Lefort (A, 15).]—**U. hals** (Ger.). See *Cervix uteri*.—**U. imperforatus**. 1. An imperforate u. 2. A u. that has no cavity at all. [Lefort (A, 15).]—**U. masculinus**. The prostatic vesicle of the male, with its occasional vestigial accompaniments. [a, 5.]—**U. muscularis**. A u. in which there is an interstitial myoma. [a, 34.]—**U. naht** (Ger.). See *HYSTERORRHAPHY*.—**U. parvicollis**. Syn.: *u. acollis*. That malformation of the u. in which its body is normal, but its neck atrophied or lacking. [Lefort (A, 15).]—**U. peristaltik** (Ger.). Peristaltic contraction of the u. [a, 32.]—**U. redressur** (Ger.). See *INTRA-UTERINE PESSARY*.—**U. retroflexus**. See *RETROFLEXION of the uterus*.—**U. retroversus**. A retroverted u.—**U. ruptur** (Ger.). Rupture of the uterus.—**U. septus** (bilocularis). Fr., *utérus biloculaire*. That form of defective development of the u. in which, while the two Müllerian ducts have united, the partition between them remains wholly or in part. [a, 22.] See also *U. septus duplex* and *U. subseptus*.—**U. septus duplex**. That variety of u. bilocularis in which there is a division from the fundus to the external os, forming two equal halves. [Spiegelberg (a, 34).]—**U. semipartitus**. Fr., *utérus en partie cloisonné à l'intérieur* [Lefort]. See *U. subseptus*.—**U. subseptus**. That variety of u. septus in which the dividing wall between the two lateral canals has partly disappeared, leaving the vagina and the cervix single, while the cavity of the body of the u. is double.—**U. unicornis**. Ger., *einhörnige Gebärmutter*. A one-horned u.; that malformation of the u. in which only one of the two original lateral halves is fully developed, the other being rudimentary or wanting.—**U. unilocularis**. That form of double u. in which the cavity of the organ is normally formed, the du-

plicity appearing only at the fundus on the outside. [Lefort (A, 15).]—**U. velatus**. See *U. subseptus*.—**U. virilis**. See *U. masculinus*.—**Ventral u.** A term sometimes applied to the foetal sac in cases of abdominal pregnancy. [a, 65.]

**UTÉRUS** (Fr.), n. See *UTERUS*.—**U. échanuré**. See *UTERUS cordiformis*.—**U. pubescent**. Of Puech, an imperfectly developed uterus. [a, 34.]

**UTRICLE**, n.  $U^2/ri^2-k^1$ . Lat., *utriculus* (dim. of *uter*, a leathern bag). Fr., *utricule*. Ger., *Schlauch* (1st def.), *Hautfrucht* (3d def.), *Schlauchfrucht* (3d def.). Syn.: *sinus communis* (2d def.). 1. A little pouch or bag, especially a membranous, closed, sac-like part or organ. [a, 35.] 2. The larger of the two vesicles into which the otic vesicle of the embryo is divided by a constriction which at last shuts it off from the sacculle. [a, 5.] 3. A fruit in which the pericarp is like a bladder around the seed; of Gärtner, a cystidium (2d def.). [a, 35.]—**Primordial u.** 1. The membrane of a cartilage cell directly in contact with the cell. 2. A thin layer of protoplasm lining described by Hensen as the membrane of the red blood-corpuscles of the *Amphibia*, connected by delicate fibrils with a similar protoplasmic layer surrounding the nucleus. [J, 22, 35.] 3. A layer of protoplasm first deposited upon the inner surface of the wall of a cell. [a, 35.]—**U. of the prostatic portion of the urethra**. See *UTERUS masculinus*.—**U. of the vestibule**. The vestibular cavity which connects with the semicircular canals. It is imbedded in the recessus ellipticus, and communicates with the semicircular canals by five foramina. It is attached to the wall of the bony vestibule by loose connective tissue. It is surrounded by perilymph and contains endolymph. It consists of a fibrillar substantia propria bounded externally by vascular connective tissue and internally by angular pavement epithelium. [F, 32.]

**UTRICULAR**, adj.  $U^2-ri^2k^1/u^2i-a^2r$ . Lat., *utricularis*. Fr., *utriculaire*. Ger., *schlauchartig*, *schlauchig*, *schlauchicht*. Pertaining to a utricle; bladder-like in appearance; consisting of a utricle or bearing many utricles. [a, 35.]

**UTRICULARIA** (Lat.), n. f.  $U^3(u^2)-ri^2k^1-u^2i(u^1)-a(a^2)/ri^2-a^2$ . From *utriculus*, a little bag. Fr., *utriculaire*. Ger., *Wasserschlauch*. Bladderwort, hooded (water-) milfoil; a genus of the *Lentibulariaceae*. The *Utriculariaceae*, *Utriculariæ*, *Utriculariæ*, or *Utriculariæ* are the *Lentibulariæ*. [a, 35.]—**U. reticulata**. A Malabar species, used in flatulence. [a, 35.]—**U. vulgaris**. Fr., *millefeuille des marais*. Ger., *gemeiner Wasserschlauch*, *Wassergarbe*, *Laichkraut*. Common bladderwort, formerly official as *herba lentibularia*, and used in dysuria and externally as a vulnerary. [a, 35.]

**UTRICULUS** (Lat.), n. m.  $U^2(u^2)-ri^2k^1/u^2i(u^1)-u^2s(u^4)s$ . See *UTRICLE*.—**U. lacrimalis**, *U. lacrimarum*. See *Lacrymal SAC*.—**U. lacteus**. See *RECEPTACULUM chyli*.—**U. prostaticus**. See *UTERUS masculinus*.

**UTRIFORM**, n.  $U^2/ri^2-f^2o^2rm$ . Lat., *utriformis* (from *uter*, a bag, and *forma*, form). Fr., *utriforme*. Ger., *schlauchförmig*. Having the form of a bladder or udder. [L, 41 (a, 14).]

**UTTUR**, n. See *ATTAR*.

**UVA** (Lat.), n. f.  $U^2(u^1)/va^2(wa^2)$ . Fr., *baie* (1st def.), *raisins secs* [Fr. Cod.] (3d def.). Ger., *Beere*, *Traube* (1st def.). Sp., *vid* (*el fruto maduro y pasa* [Sp. Ph.]) (3d def.). Syn.: *fructus vitis minor* [Swed. Ph.] (3d def.), *passula majores* [Gr. Ph.] (seu *minores* [Belg. Ph., 1st ed., Gr. Ph.]) (3d def.). 1. A grape or cluster of grapes; a grape-like fruit. 2. The uvula. [L, 50 (a, 14).] 3. In the pl. *uva*, of the Br. Ph., raisins, the dried fruit of *Vitis vinifera* (var. *apprena* [Swed. Ph.]). The Br. Ph. admits only large (Malaga) raisins; the Swed. Ph. and Belg. Ph. admit only small (Corinthian) raisins (black currants); the Fr. Cod., Gr. Ph., and apparently Sp. Ph., admit both kinds. [B, 95 (a, 38).]—**Uvae corinthiæ**. See *Corinthian RAISINS*.—**U. crispata**. The fruit of *Ribes grossularia*. [a, 35.]—**U. inversa**, *U. lupina*. Old names for the *Paris quadrifolia*. [a, 35.]—**Uvae malacenses**. See *Malaga RAISINS*.—**U. marina**. The *Ephedra distachya*; in the pl. *uva marina*, the spawn of *Sepia officinalis*. [a, 35.]—**Uvae passæ**. See *RAISINS*.—**Uvae passæ majores**. Ordinary raisins. [a, 35.]—**Uvae passæ minores**. See *Corinthian RAISINS*.—**U. ursi**. See the major list.—**U. versa**, *U. vulpina*. See *PARIS quadrifolia*.

**UVARIA** (Lat.), n. f.  $U^2(u^1)/va^2(wa^2)/ri^2-a^2$ . From *uva*, a grape, Fr., *canang*. Ger., *Traubenbaum*. A genus of the *Uariæ*, which are a tribe of the *Anonaceæ*. [a, 35.]—**U. argentea**. A species found in the Moluccas. The bark is used as a curmative, etc. [a, 35.]—**U. latifolia**, *U. ligularis*. Species found in the Moluccas. From the fragrant spicy seed salves are prepared. [a, 35.]—**U. narum**. Ger., *kleinerer Traubenbaum*. An East Indian shrub, the *narumpan* of Malabar. The roots and a greenish oil obtained from them are used in fevers, dysentery, etc., and externally in rheumatism and gout. [a, 35.]—**U. odorata**. A tree growing throughout southern India. The flowers yield cananga-oil. A stimulating salve, used as a febrifuge, is prepared from the flowers. The bitter root-bark and seed are used as a stomachic. [a, 35.]

**UVATIO** (Lat.), n. f.  $U^2(u^1)/va^2(wa^2)/shi^2(ti^2)-o$ . Gen., *-ois*. From *uva*, a grape. An old term for a corneal staphyloma and for a keratocele. [F.]

**UVA URSI** (Lat.), n.  $U^2(u^1)/va^2(wa^2) u^2rs(u^4rs)/i^1(e)$ . 1. Of Tournefort, the genus *Arctostaphylos*. 2. The *Arctostaphylos u. u.* 3. Of the ph's, the leaves of *Arctostaphylos u. u.* [a, 35.]—**Decoctum uva u.** Fr., *decoction de buissole*. A decoction made by boiling 1 oz. of the leaves of *Arctostaphylos u. u.* with 1½ pint of water and reducing to 1 pint. [B, 119.]—**Extractum uva u.** Fr., *extrait de buissole*. Of some of the older formularies, an aqueous extract of the leaves of *Arctostaphylos u. u.* [B, 119.]—**Extractum uva u. fluidum** [U. S. Ph.]. A preparation made by moistening 100 grammes of u. u. in No. 30 powder with 35 of a mixture of 10 parts of glycerin and 90 of alcohol of sp. gr. 0.928, exhausting in a percolator with the rest of the menstruum and then

with more alcohol, and bringing up to 100 c. c. [B, 95 (a, 38).]—**Folia uvæ** u. See *U. u.* (3d def.).—**Infusum uvæ** u. Fr., *tisane d'u. u.* A preparation made by infusing *u. u.* (3d def.) in twenty times as much boiling water for an hour [Br. Ph.] (in one hundred times as much for half an hour [Fr. Cod.]), and straining. [a, 38.]

**UVEA** (Lat.), n. f.  $U^2(u)ve^2(we^2)a^3$ . From *uva*, a grape. Fr., *uvée*. Ger., *Traubenhaut*, *U*. The pigmented or middle coat of the eye, including the iris, ciliary body, and choroid; usually confined to the choroid. [F.]

**UVEAL**, adj.  $U^2v'e^2a^2l$ . Fr., *uvéale*. Ger., *u*. Pertaining to or constituting the uvea. [F.]

**UVEITIS** (Lat.), n. f.  $U^2(u)ve^2(we^2)i(e)ti^2s$ . Gen., *-it'idis (-idis)*. From *uvea* (q. v.). Fr., *uvéite*. Inflammation of the uvea. [F.]—**U. anterior**. Of Stellwag, parenchymatous keratitis, so called because it affects the posterior layers of the cornea that are embryologically classed with the uvea. [a, 34].—**U. sympathica**. U. due to irritation of the ciliary nerves. [L, 57 (a, 14).]

**UVIC ACID**, n.  $U^2v'i^2k$ . Fr., *acide uvique*. Ger., *Traubensäure*. A substance,  $C_7H_9O_{31}$ , forming fine, white needles of glassy lustre. [B, 93 (a, 14).]

**UVITIC ACID**, n.  $U^2v'i^2t'i^2k$ . Fr., *acide uvitique*. Ger., *Uvitinsäure*. A methylbenzenedicarboxylic acid,  $C_6H_5O_4 = C_6(CH_3)H.CO.OH.H.CO.OH.H.$ , occurring as grouped crystals or a crystalline powder. [B, 3 (a, 38).]

**UVULA** (Lat.), n. f.  $U^2(u)vu^2l(wu^4l)a^3$ . Dim. of *uva*, a grape. Gr., *σταβύλη*. Fr., *uvule*, *luette*. Ger., *Zäpfchen*. A conical process dependent in the middle line from the soft palate and made up of the azygos uvulae, elastic and areolar tissue, small acinous glands, and an investment of mucous membrane. [L.]—**Lieu-taud's u.** See *Vesical u.*—**U. bifida**. A fissured state of the u., presenting the appearance of two uvulae. [a, 34].—**U. cere-**

**belli**. See *U. of the cerebellum*.—**U. decidua**. See STAPHYLOPTOSIS.—**U. of the cerebellum**. Lat., *u. cerebelli*. Fr., *uvule du cervelet*, *pédicule de la luelle*. Ger., *Zäpfen des Kleinhirns*, *Zäpfchen*. A small projection on the inferior vermiform process of the cerebellum in front of the pyramid and between the amygdalæ. [I, 15 (K).]—**U. of the urinary bladder**. See *Vesical u.*—**U. palati**. See *U.*—**U. relaxata**. See STAPHYLOPTOSIS.—**U. vermis**. See *U. of the cerebellum*.—**U. vesicæ**, *Vesical u.* The posterior part of the caput galli that projects into the prostatic urethra. [L, 115 (a, 34).]

**UVULAR**, adj.  $U^2v'u^2l'a^2r$ . Lat., *uvularis*. Fr., *uvulaire*. Pertaining to the uvula. [L, 50 (a, 14).]

**UVULARIA** (Lat.), n. f.  $U^2(u)vu^2l(wu^4l)a(a^3)ri^2a^3$ . From *uva*, a grape. Fr., *uvulaire*. Ger., *Zäpfchenkraut*. Bellwort, a genus of liliaceous plants. The *Uvulariaceæ*, formerly regarded as a distinct order, are a tribe (*Uvularieæ*) of the *Liliaceæ*. [a, 35.]—**Folia** (seu *herba*) *uvulariæ*. The herb of *Ruscus hypoglossum*. [a, 35.]—**U. grandiflora**. Large-flowered bellwort; a North American species. The leaves and root are used by the Indians against the bite of the rattlesnake. [a, 35.]—**U. perfoliata**. Mealy bellwort; found in North America. The root is used to make an astringent gargle. [a, 35.]

**UVULARIS** [Cous] (Lat.), n. m.  $U^2(u)vu^2l(wu^4l)ar(a^3)ri^2s$ . See *AXYGOS uvule*.

**UVULATOME**, n.  $U^2v'u^2l'a^2tom$ . From *uvula* (q. v.) and *trépane*, to cut. Ger., *Uvulatom*. See STAPHYLOTOOME.

**UVULITIS** (Lat.), n. f.  $U^2(u)vu^2l(wu^4l)i(e)ti^2s$ . Gen., *-it'idis (-idis)*. From *uvula* (q. v.). Fr., *uvulite*. Ger., *Zäpfchengeschwulst*. See STAPHYLITIS.

**UVULOPTOSIS** (Lat.), n. f.  $U^2(u)vu^2l(wu^4l)o^2pt-os'i^2s$ . Gen., *-ptos'eos (-is)*. From *uvula* (q. v.) and *πτωσις*, a falling. See STAPHYLOPTOSIS.

## V

**V**, n. *Ve*. The letter V, also a V-shaped structure. [a, 48].—**V lingual** (Fr.). The V-shaped line of papillæ on the dorsum of the tongue.

**VACCIN** (Fr.), n.  $Va^3k-sa^2n^2$ . See VACCINE (n.).—**V. animal**. See *Animal LYMPH*.—**V. aviaire**. A protective serum obtained from birds in which the toxicity of certain pathogenic micro-organisms has been attenuated by inoculation. [a, 34].—**V. en poudre**. Of the Belgian sanitary commission, vaccine lymph dried by hot air, powdered, and preserved in sterilized glass tubes. [L, 57 (a, 14).]—**V. liquide**. See *Glycerin LYMPH*.—**V. sec**. See *Dried LYMPH*.

**VACCINA** (Lat.), n. f.  $Va^3k(wa^3k)sin(ken)a^3$ . From *vaccinus*, pertaining to the cow. See VACCINIA.

**VACCINABLE** (Fr.), adj.  $Va^3k-se-na^3-bl'$ . Capable of being vaccinated. [a, 48.]

**VACCINADS**, n.  $Va^3k'si^2n-a^2dz$ . From *vaccina* (q. v.). The micro-organisms of vaccine lymph. [a, 18.]

**VACCINAL**, adj.  $Va^3k'si^2n-l$ . Lat., *vaccinalis*. Fr., *v*. See VACCINE (adj.).

**VACCINATE**, v. tr.  $Va^3k'si^2n-at$ . Lat., *vaccinare*. Fr., *vacciner*. Ger., *impfen*, *vaccinieren*. To inoculate with vaccine virus. [G.]

**VACCINATION**, n.  $Va^3k-si^2n-a'shu^2n$ . Lat., *vaccinatio*. Fr., *v. Ger.*, *Kuhpockenimpfung*, *Impfung*, *V*. Inoculation with vaccine virus as a protective measure against small-pox. [D; G.] Recently the term has been improperly applied to inoculation with various other viruses.—**Anthraxic v.** Inoculation of animals with attenuated cultivations of the anthrax bacillus. [a, 34].—**Chemical v.** Of Castaneda and Borda, a v. done experimentally upon animals by injecting subcutaneously urine from yellow-fever patients, in the hope of its containing some chemical substance (perhaps a ptomaine) secreted by the specific micro-organism capable of affording protection against the disease. ["Lancet," Mar. 1, 1890, p. 481 (a, 50).]—**Intra-uterine v.** It., *vaccinazione intra-uterina*. Variolous immunity communicated by the mother to the fetus as the result of her having been successfully vaccinated during pregnancy. [L, 87 (a, 34).]—**Retro-v.** The communication of vaccinia from a cow to the cow. [D, 1].—**V. antirabique** (Fr.). Protective inoculation against rabies. The virus is secured by a series of inoculations of virus from the central nervous system of an animal dead of rabies under the dura of healthy animals; an emulsion is made of the spinal cord after it has dried for fourteen days, and some of this is inoculated into the animal to be protected, then the latter is inoculated with an emulsion of a cord dried for thirteen days, and so on in a decreasing series until an emulsion of fresh cord is used. ["N. Y. Med. Jour.," Oct. 26, 1886, p. 462 (a, 34).]—**V'szwang** (Ger.). Compulsory vaccination. [a, 14.]

**VACCINATOIR**, n.  $Va^3k'si^2n-at-o^2r$ . From *vaccinare*, to vaccinate. Fr., *vaccinateur* (1st def.). Ger., *Impfnadel* (2d def.). 1. One who vaccinates. 2. An instrument for performing vaccination. [G.]—**Carroll's v.** A v. (2d def.) composed of six needles fastened side by side at short distances from each other. [E.]—**Dawson's v.** A v. (2d def.) consisting of a number of needles worked by a spring. [E.]

**VACCINE**, adj.  $Va^3k'si^2n$ . Lat., *vaccinus*, *vaccinalis* (from *vacca*, a cow). Fr., *vaccinal*, *vaccinique*. Pertaining to the cow; also pertaining to vaccinia or to vaccination. [G.]

**VACCINE**, n.  $Va^3k'sen$ . Lat., *vaccinum*. Fr., *vaccin*. Ger., *Impfstoff*. The virus of cow-pox (vaccinia), being either the liquid contained in the pocks or the crust formed by their desiccation. For subheadings, see under LYMPH, and cf. VIRUS.

**VACCINE** (Fr.), n.  $Va^3k'sen$ . See Cow-pox and VACCINIA.—**Fausse v.** See VACCINELLA.—**V. ulcéreuse**. See VARIOLA *vac-cina ulcerosa*.

**VACCINELLA** (Lat.), n. f.  $Va^3k(wa^3k)si^2n(ken)e^2l'a^3$ . Fr., *vaccinelle* (q. v.), *vaccinoide*. Ger., *unächte Kuhpocken*. A disease or lesion produced by an abortive vaccination, differing in its symptoms from true vaccinia and usually failing to protect against variola. [G.]

**VACCINELLE** (Fr.), n.  $Va^3k-sen-e^2l$ . 1. A form of vaccinia attended by a generalized eruption, comparable to that of variola; supposed to result from successive self-inoculations from the original sore. [D, 74.] 2. See VACCINELLA.

**VACCINEUSE** (Fr.), n.  $Va^3k-se-nu^2z$ . Of Burq, an apparatus for charging needles with vaccine lymph and preserving them so charged. A number of needles are arranged in a circle, the points to the centre, and held between two discs of rubber forced together with a screw. The points are charged by smearing the lymph over them with a brush.

**VACCINIA** (Lat.), n. f.  $Va^3k(wa^3k)si^2n(ken)i^2a^3$ . From *vaccinus*, pertaining to the cow. Fr., *vaccine*. Ger., *Kuhpocken*, *Schutzpocken*, *Schutzblattern*. Cow-pox (q. v.) when inoculated upon the human subject, either immediately from an infected animal (v. primigena) or mediately from a person recently inoculated with the virus of the disease (v. vaccinaria). The disease is characterized by the appearance of a small papule at the site of inoculation in from one to three days, which two days later becomes a vesicle with clear contents. It increases in size until about the end of the first week, becoming depressed in the centre and surrounded by a red areola. After the first week the contents of the efflorescence become purulent and soon begin to desiccate and form a scab, which, falling off during the second week or later, leaves a superficial, pitted and permanent cicatrix. The affection is usually attended with slight fever. [G.]—**Generalized v.** Fr., *vaccinide*, *pullulation vaccinale généralisée*. V. attended with a general exanthem consisting of efflorescences that closely resemble in their appearance, course, and resulting cicatrices the localized disease at the point of inoculation. [G.]—**Irregular v.**, **Spurious v.**, **V. anormis**. See VACCINELLA.—**V. antivariolosa**. See *V.*—**V. gangrenosa**. A general exanthem accompanying v., consisting of pustular efflorescences, sometimes like those of variola, which become gangrenous. [J. Hutchinson, "Brit. Med. Jour.," Oct. 29, 1881 (G).]—**V. genuina**. True v. (i. e., v. capable of affording protection against variola). [G.]—**V. primigena**. See under *V.*—**V. tutoria**, *V. tutrix*. See *V.*—**V. vaccinaria**. V. produced by inoculation with humanized lymph. [G.]

**VACCINIACEOUS**, adj.  $Va^3k-si^2n-i^2a'shu^2s$ . Resembling the genus *Vaccinium*; of the *Vacciniaceæ*, which are an order of monopetalous dicotyledons included by some authors as a tribe (*Vaccinieæ*) in the *Ericaceæ*. [a, 35.]

**VACCINIAL**, adj.  $Va^3k-si^2n'i^2l$ . See VACCINE (adj.).

**VACCINIDE** (Fr.), n.  $Va^3k-se-ned$ . See Generalized VACCINIA.

**VACCINIFER**, n.  $Va^3k-si^2n'i^2fu^2r$ . From *vaccinia* (q. v.) and *ferre*, to bear. 1. An individual from whose body vaccinal virus is

taken for the purpose of conveying vaccinia to another. 2. An instrument for vaccination.

**VACCINIFORM**, adj.  $Va^2k\text{-}si^{2n}/^{12}\text{-fo}^2\text{-rm}$ . From *vaccinia* (q. v.) and *forma*, form. Fr., *vacciniforme*. Having the appearance of vaccinia or of vaccine lymph. [a, 48.]

**VACCININ**, n.  $Va^2k\text{-}si^{2n}\text{-}in$ . Fr., *vaccinine*. A non-nitrogenous substance obtained from *Vaccinium myrtillus*; it occurs as silky acicular crystals. [B, 93 (a, 14).]

**VACCININE**, n.  $Va^2k\text{-}si^{2n}\text{-}in$ . 1. Of Farr, the morbid germ of cow-pox. 2. Vaccine virus. [G; K.]

**VACCINIOLÆ** (Lat.), n. f. pl.  $Va^2k\text{-}(wa^2k)\text{-}si^{2n}\text{-}(ken)\text{-}i\text{-}(i)^2/o^2\text{-}e$  ( $a^2\text{-}e^2$ ). See VACCINOLÆ.

**VACCINIST**, n.  $Va^2k\text{-}si^{2n}\text{-}ist$ . See VACCINATOR (1st def.).

**VACCINIUM** (Lat.), n. n.  $Va^2k\text{-}(wa^2k)\text{-}si^{2n}\text{-}(ken)/^{12}\text{-}u^2m\text{-}(u^4m)$ . From *vaccinus*, pertaining to the cow. Fr., *vaccif*, *airelle*, *myrtille*. Ger., *Heidelbeere*. The typical genus of the *Vaccinaceae*. Some include in it the cranberries (*Oxycoccus*) as well as the blueberries. [a, 35.]—**V. arctostaphylos**. Fr., *airelle de Cappadoce*. Ger., *azorische Heidelbeere*. Oriental whortleberry; a tree of the Azores and Madeira. The berries are used like those of *V. myrtillus* and the dried leaves as tea (Trebizond tea). [a, 35.]—**V. corymbosum**, **V. discoloratum**. Common (or swamp) blueberry of North America; the huckleberry. The subacid, aromatic berries are used like those of *V. myrtillus*. [a, 35.]—**V. dumosum**. Ger., *spitzblättrige Heidelbeere*. See *GAYLUSSACIA dumosa*.—**V. frondosum**. Ger., *blattreiche Heidelbeere* (1st def.). 1. Blue (or leafy) whortleberry of North America. The berries, *baccæ vaccini*, are used like those of *V. myrtillus*. [a, 25.] 2. See *GAYLUSSACIA dumosa*.—**V. macrocarpum**. Fr., *airelle (ou myrtille) à gros fruits*. American (or large) cranberry; found in sphagnous swamps. The fruits furnish citric acid, and both fruits and leaves are detersive and astringent. [a, 35.]—**V. myrtillus**, **V. nigrum**. Fr., *myrtille*, *maceret*, *airelle myrtille* [Fr. Cod.] (ou *anguleuse*). Ger., *gemeine Heidelbeere*, *Blaubeere*, *Schwarzbeere*, *Krackbeere*. Sp., *arándano*, *mirtillo* [Mex. Ph.]. Common (or British) whortleberry (or bilberry), black-heart, huckleberry, blue (or hurtle, or whin-) berry of Europe, northern and middle Asia, and Arctic America. All parts of the bush, especially the leaves, contain quinic acid. The fruits, *baccæ seu fructus*, seu *grana* *myrtilli* (seu *myrtillorum*, seu *pseudomyrti*, seu *vaccinii nigri*), formerly used as a mildly astringent gargle and as a hemostatic, and still used in diarrhœa, contain malic and citric acids, tannin, sugar, and a violet coloring matter. [a, 35.]—**V. oxycoccus**, **V. oxycoccus**. Fr., *canneberge*, *basinet* (ou *coussinet*) *des marais*, *airelle à fruits acides*. Ger., *europäische Moosbeere*, *Torfbeere*, *Sumpfbeere*, *Krähenbeere*, *Sauerebeere*. The cranberry of Europe, northern and middle Asia, and North America; bogberry, fenberry, crawberry, marsh- (or moor-) berry. The leaves are used as tea, and the acid fruits (*baccæ oxycoccus*), which become edible after frost, as an astringent, detersive, and antiscorbutic and as a refrigerant in fevers. [a, 35.]—**V. uliginosum**. Fr., *airelle (ou myrtille) veinée (ou des marais, ou bombeuse)*. Ger., *Moor-Heidelbeere*, *grosse Sumpf-Heidelbeere*, *Rauschbeere*, *Trunkelbeere*. Bog-bilberry of Europe, northern and middle Asia, and North America. The berries, which are said to produce vertigo and delirium, are made into a spirit in Siberia. [a, 35.]—**V. vitis idæa**. Fr., *airelle ponctuée (ou à fruits rouges)*, *myrtille rouge*, *vigne du Mont Ida*. Ger., *Preisselbeere*, *rothe Heidelbeere*, *Bernitzbeere*, *Steinbeere*, *rothe Besinge*. Red whortleberry of Mt. Ida, cow-berry, flowering box, munshock; a shrub of Europe, northern and middle Asia, and North America. The leaves and berries, *folia et baccæ vitis idæa*, were formerly official. The leaves are used to adulterate *uva ursi* leaves. The fruits were once used as a refrigerant. [a, 35.]

**VACCINIZATION**, n.  $Va^2k\text{-}si^{2n}\text{-}iz\text{-}a\text{-}shu^2n$ . Fr., *vaccinisation*. Of Warlomont, the process of vaccinating.

**VACCINIZE**, v. tr.  $Va^2k\text{-}si^{2n}\text{-}iz$ . To vaccinate a subject repeatedly until no further effect is produced (until, as has been thought, the system is saturated with the virus).

**VACCINOGENE** (Fr.), adj.  $Va^2k\text{-}se\text{-}no\text{-}zhe^2n$ . Devoted to the production or distribution of vaccine, or to both.

**VACCINOID**, n.  $Va^2k\text{-}si^{2n}\text{-}oid$ . Fr., *vaccinoïde*. See VACCINELLA.

**VACCINOLÆ** (Lat.), n. f. pl.  $Va^2k\text{-}(wa^2k)\text{-}si^{2n}\text{-}(ken)/o^2\text{-}e\text{-}(a^2\text{-}e^2)$ . Ger., *Nebenpocken*. Secondary poeks; efflorescences resembling the vaccine poek, but occurring at a distance from the point of vaccination, usually due to accidental inoculation from the original poek, often through scratching. [G.]

**VACCINOPHOBIA** (Fr.), n.  $Va^2k\text{-}se\text{-}no\text{-}fob$ . One who fears or affects to fear the harmful influence of vaccine virus. [D, 10.]

**VACCINO-SYPHILIS** (Lat.), n. f.  $Va^2k\text{-}(wa^2k)\text{-}sin\text{-}(ken)/o^2\text{-}o^2$  ( $si^2\text{-}su^2\text{-}f/i^2\text{-}is$ ). Gen., *-itidos (-idis)*. See VACCINATION-SYPHILIS.

**VACCINUM** (Lat.), n. n.  $Va^2k\text{-}(wa^2k)\text{-}sin\text{-}(ken)/u^2m$ . See VACCINE, n.

**VACCINUS** (Lat.), adj.  $Va^2k\text{-}(wa^2k)\text{-}sin\text{-}(ken)/u^2s\text{-}(u^4s)$ . See VACCINE (adj.).

**VACCIOLA** (Lat.), n. f.  $Va^2k\text{-}(wa^2k)\text{-}si\text{-}(ki^2)/o^2\text{-}a^2$ . See VACCINIA.—**V. leprosa**. See VACCINELLA.—**V. scutellata**. See VACCINIA.—**V. spuria**. See VACCINELLA.

**VACUITÉ** (Fr.), n.  $Va^2\text{-}ku^2\text{-}e\text{-}ta$ . See VACUITY.—**V. postnatique** [Marey]. A "negative" pressure observed in the ventricles at the end of their systole. [K, 23.]

**VACUITY**, n.  $Va^2k\text{-}u^2\text{-}i^2\text{-}t^2$ . Lat., *vacuitas* (from *vacuus*, empty). Fr., *vacuité*. Vacancy; also a vacant or empty space.

**VACUOLATED**, adj.  $Va^2k\text{-}u^2\text{-}o^2\text{-}at\text{-}e^2d$ . Of a cell, containing one or more vacuoles. [J, 55.]

**VACUOLATION**, n.  $Va^2k\text{-}u^2\text{-}o^2\text{-}a\text{-}shu^2n$ . The formation of vacuoles. [E.]

**VACUOLE**, n.  $Va^2k\text{-}u^2\text{-}ol$ . Lat., *vacuolus* (from *vacuus*, empty). Fr., v. Ger., *Vakuole*, *Saftraum* (2d def.). 1. A small air-cell or a globular space containing either air or a pellucid liquid. [E.] 2. In botany, a cavity in a cell containing sap. [a, 35.]—**Auerbach's v.** An 8-shaped, transparent v. formed at the centre of the vitellus, according to Auerbach's theory of segmentation, after the disappearance of the original nucleus and as a step preliminary to the formation of the nuclei of the two succeeding segmentation spheres. [A, 8.] Cf. *ASTER*, *AMPHIASTER*, and *TETRASTER*.—**Contractile v.** A v. observed in a structureless mass of protoplasm (as in the *Endoplastica*) which slowly fills with a watery fluid and, after reaching a certain size, contracts to obliteration, the process of distention and contraction being repeated rhythmically, after the manner of a systole and diastole. [A, 12.]—**Food v's.** 1. Of Lankester, large v's in the endoderm cells of one of the *Medusæ* (*Limnocoelum*). They have been found to contain an albuminous substance supposed to be the product of intracellular digestion. ["Quart. Jour. of Micr. Sci.," 1881, p. 119 (J).] 2. See *GASTRIC v.*—**Gastric v.** A v. formed in the protoplasm of certain *Protozoa* around a particle of food surrounded with water. [A, 12.]—**Nuclear v.** See *Auerbach's v.*—**Permanent v's.** Spaces in the *Protozoa*, etc., which may contain water, oil-drops, etc., and are persistent. [L, 121.]—**Pulsating v.** See *Contractile v.*

**VACUOLUS** (Lat.), n. m.  $Va^2k\text{-}(wa^2k)\text{-}u^2\text{-}(u^4)/o^2\text{-}l\text{-}u^2s\text{-}(u^4s)$ . See VACUOLE.

**VACUUM** (Lat.), n. n.  $Va^2k\text{-}(wa^2k)\text{-}u^2\text{-}(u^4)\text{-}u^2m\text{-}(u^4m)$ . Fr., v. Ger., *Leere*. An empty space, especially a space from which the air that occupied it has been more or less completely removed. [a, 48.]—**Torriceillian v.** The v. over the mercury in Torricelli's barometer. [a, 48.]

**VACZA**, n. A place in Broos County, Transylvania, where there is a hot sulphurous spring. [L, 30, 57 (a, 14).]

**VAGABUNDIRTRIEB** (Ger.), n.  $Va^2g\text{-}a^2\text{-}bund\text{-}er\text{-}treb$ . Insanity with a special tendency to vagrancy. [L, 57 (a, 14).]

**VAGAL**, adj.  $Va^2g\text{-}l$ . Pertaining to the vagus nerve. [C.]

**VAGINÉ** (Fr.), n.  $Va^2\text{-}zha^2n^2$ . See VAGINA (2d def.).—**V. cloisonné**. See *Double VAGINA*.—**V. mâle**. See *UTERUS masculinus*.

**VAGINA** (Lat.), n. f.  $Va^2j\text{-}(wa^2g)\text{-}in\text{-}(en)/a^2$ . Fr., *âuvroir*. Ger., *Scheide*, *Mutterscheide* (2d def.). 1. See *SHEATH*. 2. That part of the parturient canal which serves as the organ of copulation, extending from the vulva backward and somewhat upward to terminate in a blind pouch situated in front of the rectum and slightly to the right of it. Its anterior wall, near its posterior extremity, is pierced by the cervix uteri. When the v. is not distended, its anterior and posterior walls are flattened and in contact with each other. Its anterior wall lodges the urethra. 3. In botany, a sheath, especially a leaf-sheath. [a, 35.]—**Double v.**, **Septate v.** Lat., v. *duplex*. A v. divided into two lateral portions by a longitudinal septum. [a, 34.]—**V. bipartita**. See *Double v.*—**V. cellularis**. See *ADVENTITIA* and *EPINEURIUM*.—**V. cordis**. See *PERICARDIUM*.—**V. femoris**. See *FASCIA lata*.—**V. fibrosa** (tendinis). See *SYNOVIAL SHEATH*.—**V. Glissoni**. See *GLISSON'S CAPSULE*.—**V. humoris vitrei**. See *HYALOID MEMBRANE*.—**V. lumbodorsualis**. See *LUMBAR FASCIA*.—**V. masculina**. See *UTERUS masculinus*.—**V. mucilaginosus**, **V. mucosa**. See *SYNOVIAL SHEATH*.—**V. muscularis**. See *PERIMYSIUM*.—**V. nervi cellulosus**, **V. nervorum**. See *PERINEURIUM*.—**V. pili**. See *Inner root-sheath of a hair* and *Outer root-sheath of a hair*.—**V. portæ**. See *GLISSON'S CAPSULE*.—**V. processus styloidei**. See *Vaginal PROCESS* (1st def.).—**V. radialis pili**. See *V. pili*.—**V. septa**. See *Double v.*—**V. subseptæ**. A v. that is double for only a portion of its length.—**Vagine synoviales tendinum**, **V. tendinis**. See *SYNOVIAL SHEATH*.—**V. tendinosa cruris**. See *FASCIA lata*.—**V. uteri**. See *V.* (2d def.).

**VAGINAL**, adj.  $Va^2j\text{-}i^2\text{-}n\text{-}l$ . Lat., *vaginalis*. Fr., v. Pertaining to the vagina or to a sheath, ensheathing. The *Vaginales* of Linneus are an order of plants consisting of *Polygonum*, *Rheum*, *Rumex*, etc. [a, 35.]

**VAGINALITIS** (Lat.), n. f.  $Va^2j\text{-}(wa^2g)\text{-}i^2n\text{-}(en)\text{-}a^2\text{-}(a^2\text{-}l)\text{-}i\text{-}(e)/ti^2s$ . Gen., *-itidos (-idis)*. From *vagina* (q. v.). Fr., *vaginite*. 1. Inflammation of the vaginal portion of the cervix uteri. 2. Inflammation of the tunica vaginalis testis. [L, 49, 57 (a, 14).]

**VAGINALPORTION** (Ger.), n.  $Va^2j\text{-}g\text{-}en\text{-}a^2\text{-}l\text{-}por\text{-}tse\text{-}on''$ . That portion of the cervix uteri which projects into the vagina. [a, 34.]—**Schnabelförmige V.** A beak-shaped cervix uteri. [a, 34.]—**Schürzenförmige V.** A cervix uteri resembling the head of a tapir. [a, 34.]

**VAGINANT**, adj.  $Va^2j\text{-}i^2\text{-}n\text{-}nt$ . Lat., *vaginans* (from *vagina*, a sheath). Fr., v. Ger., *umscheidend*, *scheidig*. Sheathing, forming a sheath around another part or organ. The *Vaginantæ* of Link are a subclass of exogens, consisting of the *Umbellatæ* and *Araliaceæ*. [a, 35.]

**VAGINATE**, adj.  $Va^2j\text{-}i^2\text{-}n\text{-}at$ . Lat., *vaginatus*. Fr., *vaginé*. Ger., *bescheidet*. Having a vagina or sheath. [a, 35.]

**VAGINIGLUTEUS** [E. Coues] (Lat.), n. m.  $Va^2ji\text{-}j\text{-}wa^2g\text{-}in\text{-}(en)/\text{-}i^2\text{-}glu^2\text{-}(glut)\text{-}e\text{-}(a^2\text{-}e^2)\text{-}u^2s\text{-}(u^4s)$ . See *TENSOR fasciæ latæ*.

**VAGINELLA** (Lat.), n. f.  $Va^2j\text{-}(wa^2g)\text{-}i^2n\text{-}(en)\text{-}e^2\text{-}l\text{-}la^2$ . Dim. of *vagina*, a scabbard. Fr., *vaginelle*. Ger., *Blattscheiden*. One of the chaff-like scales forming a sheath at the base of the clusters of leaves in pines. [a, 35.]

**VAGINERVOSE**, adj.  $Va^2j\text{-}i^2\text{-}nu^2\text{-}rv\text{-}os$ . Lat., *vaginerivis* (from *vagus*, wandering, and *nervus*, a nerve). Fr., *vaginervé*. Of leaves, having the veins running in different directions without order. [a, 35.]

**VAGINISMUS** [Sims] (Lat.), n. m.  $Va^2j\text{-}(wa^2g)\text{-}i^2n\text{-}(en)\text{-}i^2z\text{-}(i^2s)/mu^2s\text{-}(mu^4s)$ . From *vagina* (q. v.). Fr., *vaginisme*. Ger., *Scheidenkrampf*. Painful spasmodic contraction and hyperæsthesia of the

**vagina**, especially of the constrictor cunni, causing dyspareunia. [L. 41 (a. 14).]—**Mental v.** Of Bauduy, an unconquerable aversion of a woman to sexual intercourse, not dependent on a physical obstacle, although accompanied in the case related, by violent muscular contraction when coitus was attempted. ["St. Louis Cour. of Med." Mar., 1885, p. 256.]—**Perineal v.** V. due to spasm of the perineal muscles, especially the transversus perinealis. [Verneuil; A. Gillard, Thèse, "Ann. des mal. des org. gén.-ur.," July, 1885, p. 434.]—**Posterior v.** V. due to spasm of the deep-seated muscles. According to Gillard (*l. c.*), the term should be limited to that form in which the lower fibres of the levator ani are involved.—**Vulvar v.** V. due to spasm of the constrictor cunni. [Gillard, *l. c.*]

**VAGINITIS** (Lat.), n. f.  $Va^2j(wa^3g)-i^2n(en)-i(e)^{t}is$ . Gen., *-itis* (*-idis*). From *vagina* (*q. v.*). Fr., *vaginite*. Ger., *Scheidenentzündung*. See **ELYTRITIS**.—**Diphtheritic v.** Diphtheria of the vagina. [a. 50.] Cf. *Puerperal diphtheria*.—**Dysenteric v.** Of Klebs, a modification of diphtheritic elytritis accompanying chronic dysentery. [L. 87 (a. 50).]—**Granular v.** See **GRANULAR ELYTRITIS**.—**V. adhesiva.** Elytritis resulting in more or less complete atresia of the vagina.

**VAGINODYNIA** (Lat.), n. f.  $Va^2j(wa^3g)-i^2n(en)-o(o^3)-di^2n$  (*du^n*)/*i^2-a^3*. From *vagina* (*q. v.*) and *δύσιν*, pain. Pain in the vagina. [a. 34.]

**VAGINO-FIXATION**, n.  $Va^2j-i^2n-o-fi^2x-a'shu^2n$ . From *vagina* (*q. v.*) and *figere*, to fasten. Of Péan, fixation of the vagina to the sides of the pelvis. [a. 34.]

**VAGINO-LABIAL**, adj.  $Va^2j/i^2n-o-lab/i^2-l$ . Pertaining to the vagina and to the labia pudendi. [L. 41 (a. 14).]

**VAGINO-PÉRITONÉAL** (Fr.), adj.  $Va^2zhe-no-pa-re-to-na-a^3l$ . Pertaining to the tunica vaginalis testis or the vagina (2d def.) and to the peritonæum. [L. 41 (a. 14).]

**VAGINOSCOPE**, n.  $Va^2j/i^2n-o-skop$ . From *vagina* (*q. v.*) and *σκοπεῖν*, to examine. Ger., *Vaginoskop*. See **VAGINAL SPECULUM**.

**VAGINOTOMY**, n.  $Va^2j-i^2n-o-t'o^2m-i^2$ . From *vagina* (*q. v.*) and *τομή*, a cutting. See **ELYTROTONY**.

**VAGINO-VESICAL**, adj.  $Va^2j/i^2n-o-ve^3s/i^2-k'l$ . See **VESICO-VAGINAL**.

**VAGINO-VULVAR**, adj.  $Va^2j/i^2n-o-vu^3lv/a^3r$ . See **VULVO-VAGINAL**.

**VAGINULE**, n.  $Va^2j/i^2n-u^2l$ . Lat., *vaginula* (dim. of *vagina*, a sheath). Fr., v. Ger., *Scheiden*. Lit., a small sheath. In mosses, the apex of the pedicel which forms a sheath round the foot of the sporogonium. 2. A tubular regular floret in the *Compositæ*. [a. 35.]

**VAGITUS** (Lat.), n. m.  $Va^2j(wa^3g)-i(et)^{t}/u^3s(u^4s)$ . Gen., *-itus*. From *vagire*, to cry. Fr., *vagissement*. Ger., *Wimmern*. *Winseln*. The cry of a new-born child. [L. 41, 50 (a. 14).]—**V. interuterinus**, **V. uterinus**. The intra-uterine cry; the cry of a foetus while its head is yet within the uterus, showing that air has entered the uterus and that the child has breathed. The possibility of the occurrence is denied by some writers. [A. 61.]—**V. vaginalis**. The child's cry heard while its head is in the vagina. [a. 34.]

**VAGOSYMPATHICUS** (Lat.), n. m.  $Vag(wa^3g)/o(o^3)-si^2m$  (*su^2m*)-*pa^2th(pa^2th)/i^2k-u^3s(u^4s)*. Fr., *vagosympathique*. The conjoined pneumogastric and cervical sympathetic nerves, as seen in the dog. [L. 49 (a. 14).]

**VAGOTOMIE** (Ger.), n.  $Va^2g-o-to-m-e'$ . Section of the vagus nerves. [L. 57 (a. 14).]

**VAGOTOMISÉ** (Fr.), adj.  $Va^2go-to-me-za$ . Having the vagus nerves cut. ["Sem. méd.," April 24, 1889, p. 138 (a. 18).]

**VAGUS** (Lat.), adj.  $Vag(wa^3g)/u^3s(u^4s)$ . Fr., *vague*. Ger., *allestsvendig*, *vielleicht* (2d def.). 1. Uncertain, wandering; as a n., the v. nerve (See **PNEUMOGASTRIC NERVE**). 2. In botany, having no definite arrangement, without order. [a. 35.]—**V'gebiet** (Ger.). The region of the vagus nucleus. [I. 11 (K).]

**VAGUSWURZEL** (Ger.), n.  $Va^2g-us-vurts-e^2l$ . See **VAGUS NUCLEUS**.—**Hintere V.** [Meynert]. See **V.**—**Vordere V.** [Meynert]. See **NUCLEUS ambiguus**.

**VAHEA** (Lat.), n. f.  $Va^3e^2-a^3$ . Fr., *vahé*. A genus of caoutchouc-yielding *Apocynaceæ*, referred by Benth and Hooker to the genus *Landolphia*. [a. 35.]

**VAISSE** (Fr.), n.  $Ve^3s$ . A place in the department of the Allier, France, where there is a hot gaseous and alkaline spring.

**VAISSEAU** (Fr.), n.  $Ve^3s-so$ . See **VESSEL**.—**V'x déferans**. An old term for the oviducts. [A. 44.]—**V. droit**. See **Collecting TUBULE**.—**V'x préparans**. An old term for the spermatic arteries; so called because they were said to prepare the blood from which the semen or the ovule was elaborated by the testicle or the ovary. [A. 44.]—**V. sanguin**. A blood-vessel.—**V'x tourbillonnés**. See **VASA vorticiosa**.

**VALDIERI** (It.), n.  $Va^3l-de^2-a^3re$ . A place in Cuneo, Italy, where there are hot sulphurous springs and mud-baths. [a. 14.]

**VALDIVIN**, n.  $Va^3l/di^2v-i^2n$ . Fr., *valdivine*. A glucoside,  $C_{26}H_{36}O_{30} + 5H_2O$ , obtained from the fruit of *Picrolema valdivia*, forming very bitter hexagonal prisms. [B. 270 (a. 38).]

**VALENCE**, **VALENCY**, n's.  $Va^3l/e^2ns$ , *e^2ns-i^2*. Ger., *Wertigkeit*. See **ATOMICITY**.

**VALERAL**, n.  $Va^3l/e^2-r'l$ . Fr., *valéral*. Ger., *V.* See under **AMYLIDENE oxide**.

**VALERALDINE**, n.  $Va^3l-e^2r'a^3ld-en$ . Fr., *valéraldine*. An artificial alkaloid,  $C_{15}H_{31}NS_2$ , formed by the action of hydrosulphuric acid on valeral ammonia. [A. 1.]

**VALERAMIDE**, n.  $Va^3l-e^2r'a^2m-i^2d(id)$ . Fr., *valéramide*. Ger., *Valeramid*. A primary amide,  $C_5H_9O.NH_2$ , of valeric acid, forming brilliant scales. [B. 93 (a. 14).]

**VALERAS** (Lat.), n. m.  $Va^3l(wa^3l)/e^2r-a^2s(a^3s)$ . Gen., *-atis*. See **VALERIANATE**.—**V. ammoniacus**. See **AMMONIUM valerianate**.—**V. atropinus**. See **ATROPINE valerianate**.—**V. quinicus**. See **QUININE valerianate**.—**V. zincicus**. See **ZINC valerianate**.

**VALERATE**, n.  $Va^3l/e^2r-at$ . Lat., *valeras*. Fr., *valérate*. See **VALERIANATE**.

**VALERENE**, n.  $Va^3l/e^2r-en$ . Fr., *valérène*. Ger., *Valeren*. See **AMYLENE** and **BORNEENE**.

**VALERIAN**, n.  $Va^3l-e^2r-i^2n$ . 1. The genus *Valeriana*, especially *Valeriana officinalis*. [a. 35.] 2. See **V.-root**.—**American v.** The *Cypripedium pubescens* and *Cypripedium parviflorum* or their rhizome and rootlets (see *Cypripedium* [2d def.]). [a. 35.] See also **ARISTOLOCHIA serpentaria**.—**Clyster of v.** See **ENEMA antispasmodicum**.—**False v.** See **SENECIO aureus**.—**Greek v.** See **POLEMONIUM cæruleum**.—**Japanese v.** Kesso, the root-stock of *Patrinia scabiosaeifolia*. It smells and tastes nearly like medicinal v. [a. 35.]—**Medicinal v.** *Valeriana officinalis* or its root. [a. 35.]—**Oil of v.** Lat., *oleum* (seu *essentia*, seu *ætheroleum*) *valeriane*. A pungent and aromatic volatile oil obtained from v.-root and consisting of a hydrocarbon ( $C_{10}H_{16}$ ), a crystallizable compound ( $C_{10}H_{16}O$ ), isomeric with borneol, compounds of the alcohol  $C_{10}H_{16}O$  with formic, acetic, and isovaleric acids, and an ether ( $C_{10}H_{17}O$ ). It is of a pale-greenish color, but on exposure becomes yellow and viscid. It is used medicinally like v.-root. [a. 35.]—**V. rhizome**. **V.-root**. Lat., *valeriana* [U. S. Ph.], *valeriane* radix [Gr. Ph.] (seu *rhizoma* [Br. Ph.], *radix* (seu *rhizoma* [Russ. Ph.])) *valeriane* [Ger. Ph., Belg. Ph., Dan. Ph., Finn. Ph., Norw. Ph., Swed. Ph., Swiss Ph.], v. (*radix*) [Aust. Ph., Netherl. Ph.], v. (*rhizoma*) [Hung. Ph., 2d ed.]. Fr., *valériane*, *racine* (ou *souche*) de *valériane*, *valériane officinale* (*souche*) [Fr. Cod.]. Ger., *wilde Baldrianwurzel*. The rhizome and rootlets of *Valeriana officinalis*. [a. 35.]

**VALERIANA** (Lat.), n. f.  $Va^3l(wa^3l)-e(e^2)-ri^2-an(a^2n)a^3$ . Fr., *valériane*. Ger., *Baldrian*. 1. A genus of the valerians, or valerianorts, which are an order (*Valerianaceæ*, *Valeriane*, or *Valerianeæ*) of the *Asterales*. [a. 35.] 2. Of the U. S. Ph., see **VALERIAN-root**.—**Abstractum valeriane** [U. S. Ph., 1880]. A preparation made by exhausting 200 parts of valerian-root in No. 60 powder with 80 or more of alcohol, reserving 170 parts, evaporating the residue to 30, mixing the two, adding 50 of sugar of milk, drying, bringing up to 100, and reducing to a fine powder. [B. 5, 95 (a. 38).]—**Ætheroleum valeriane** [Swed. Ph.]. See **OIL of VALERIAN**.—**Aqua valeriane** [Ger. Ph. (1st ed.)], Belg. Ph., Gr. Ph., Swiss Ph., Russ. Ph., Fr., *eau distillée de valériane* [Fr. Cod.], Sp., *agua de v.* [Sp. Ph.]. A preparation made by distilling 1 part of valerian-root with water enough to make 4 parts [Fr. Cod., Sp. Ph.] (10 [Ger. Ph., Belg. Ph., Swiss Ph., Gr. Ph.]) or by dissolving oil of valerian in 1,500 times as much warm water [Russ. Ph.]. [B. 95 (a. 38).]—**Aqua valeriane concentrata** [Swiss Ph.]. A preparation made by distilling 10 parts of a mixture of 100 of aqua valeriane and 2 of alcohol of sp. gr. 0.832. [B. 95 (a. 38).]—**Essentia valeriane** [Belg. Ph.]. See **OIL of VALERIAN**.—**Extractum valeriane** [Ger. Ph. (1st ed.)], Belg. Ph., Finn. Ph., Gr. Ph., Swiss Ph., Netherl. Ph., Hung. Ph., Swed. Ph., Russ. Ph.], Fr., *extrait de valériane* [Fr. Cod.]. Ger., *Baldrianextract*. A thick extract (soft [Fr. Cod.], half-thick [Hung. Ph.], of pilular consistence [Gr. Ph.]) made by extracting valerian-root with dilute alcohol (with water [Finn. Ph., Gr. Ph.]). The Sp. Ph. has both an aqueous and an alcoholic extract. [B. 95 (a. 38).]—**Extractum valeriane fluidum** [U. S. Ph.]. A preparation made by exhausting 100 grammes of valerian-root in No. 60 powder with alcohol of sp. gr. 0.894, reserving 85 c. c., evaporating the residue to a soft consistence, mixing the two, and bringing up to 100 c. c. [B. 95 (a. 38).]—**Infusum valeriane** [Br. Ph.], Fr., *tisane de valériane* [Fr. Cod.]. Ger., *Baldrianwasser*. Sp., *infusión de v.* [Sp. Ph.]. A preparation made by infusing 1 part of valerian-root for an hour in enough boiling water to make 40 parts [Br. Ph.] (half an hour in enough boiling water to make 100 parts [Fr. Cod.], in water enough to make 138 parts [Sp. Ph.]). [B. 95 (a. 38).]—**Oleosaccharum valeriane**. A mixture of 3 drops of oil of valerian with 4 grammes of sugar. [B. 119 (a. 38).]—**Oleum valeriane**. See **OIL of VALERIAN**.—**Pulvis valeriane**. See **RADIX valeriane pulverata**.—**Pulvis valeriane aromaticus**. A powder of equal parts of valerian-root and orange-leaves; or of 53 parts of valerian and 8 of cinnamon; or of 78 of valerian, 124 of cinnamon, and 60 of oleosaccharum of valerian; or of 125 of valerian and 6 of camphor; or of 15 of valerian and 7 each of orange-peel and tartarated tartar; or of 16 each of valerian and magnesia, 24 of Florentine iris, 28 of licorice, 8 of anise, and 2 of saffron. [B. 119 (a. 38).]—**Radix valeriane**. See **VALERIAN-root**.—**Radix valeriane pulverata**. Fr., *poudre de valériane* [Fr. Cod.]. Valerian-root cleansed, dried at 40° C., powdered in a covered iron mortar, and sifted through a No. 120 silk sieve [Fr. Cod.]; or cleansed, dried in the oven, and powdered fine enough to leave  $\frac{1}{2}$  residue [Sp. Ph.] (sifted through a 1,600-mesh sieve [Russ. Ph.], or through a 1,000-mesh sieve with a pestle till a fibrous mass is left [Swed. Ph.]). [B. 95 (a. 38).]—**Rhizoma valeriane**. See **VALERIAN-root**.—**Syrupus valeriane** [Belg. Ph.]. Fr., *sirop de valériane* [Fr. Cod.]. A preparation made by macerating 125 parts of valerian-root for 24 hours in water enough to make 250 parts of clear filtered liquid, distilling the residue with water, drawing off 100 parts of the distillate, mixing with the first liquid, and adding 650 parts of sugar [Belg. Ph.]; or by dissolving 40 parts of extract of valerian in 1,000 of water of valerian, filtering, and adding 1,800 of sugar [Fr. Cod.]. [B. 95 (a. 38).]—**Tinctura valeriane**. Fr., *teinture de valériane* [Fr. Cod.]. Sp., *tintura alcohólica de v.* [Sp. Ph.]. 1. Of the U. S. Ph., Br. Ph., Ger. Ph., etc., a preparation made by macerating 1 part of valerian-root in No. 60 powder with alcohol of sp. gr. 0.894 for a day and then treating in a percolator with enough more alcohol to make 5 parts of tincture [U. S. Ph.]; or by macerating 24 oz. of valerian-root in No. 40 powder for two days, then treating in a percolator with enough more alcohol to make 20 fl. oz. [Br. Ph.]; or by macerating or digest-

ing valerian-root with 5 times as much (6 times as much [Gr. Ph., Netherl. Ph.], enough [Roum. Ph.]) diluted alcohol. [B. 95 (a, 38).] 2. Of the Swed. Ph., see *Tinctura valeriana aetherea*.—**Tinctura valeriana aetherea** (Ger. Ph., Belg. Ph., Dan. Ph., Finn. Ph., Gr. Ph., Swiss Ph., Hung. Ph. [2d ed.], Norw. Ph., Russ. Ph.). Fr., *teinture éthérée de valériane* [Fr. Cod.]. Ger., *ätherische Baldriantinctur* [Ger. Ph.]. Sp., *tintura etérea de v.* [Sp. Ph.]. A preparation made by macerating valerian-root for some days with 5 times (6 times [Gr. Ph.]) as much spiritus aethereus (5 times as much ether of sp. gr. 0.758 [Fr. Cod., Sp. Ph.]). The Russ. Ph. directs maceration of 1 part of the root with 4 parts of alcohol for 4 days, the addition of 2 parts of ether, and maceration for 3 days more. [B. 95 (a, 38).]—**Tinctura valeriana ammoniata**. A preparation made by macerating 20 parts of valerian-root in No. 60 powder one day with 20 of aromatic spirit of ammonia, then treating in a percolator with enough more spirit of ammonia to make 100 parts [U. S. Ph.]; or by macerating  $\frac{2}{3}$  of the root in No. 40 powder for seven days with enough of the aromatic spirit of ammonia to make 20 fl. oz. [Br. Ph.]; or by macerating 3 parts of the root with a mixture of 6 of caustic ammonia solution (of sp. gr. 0.970 [Pruss. Ph.] (0.962 [Gr. Ph.]) and 12 of alcohol of sp. gr. 0.840 [Pruss. Ph., Gr. Ph.], or with a mixture of 5 parts of ammonia solution of sp. gr. 0.960 and 10 of alcohol of sp. gr. 0.832 [Swiss Ph.]. [B. 95 (a, 38).]—**Tinctura valeriana spirituosus**. See *Tinctura valeriana* (1st def.).—**V. anglica**. See *V. phu*.—**V. asarifolia**. Ger., *haselwurzblättriger Baldrian*. A species found in Candia. The root is used like that of *V. celtica*. [a. 35.]—**V. capensis**. A species found in southern Africa. The root is antispasmodic. [a. 35.]—**V. celtica**. Fr., *nard celtique* (ou de montagne). Ger., *Nardenbaldrian*, *Speik*, *Spiknarde*. An alpine species. The aromatic root, which is stimulant, sudorific, emmenagogue, and antispasmodic, constitutes in part the *nardus celtica* of the ancients. [a. 35.]—**V. coarctata**. Fr., *valériane resserée*. A Peruvian species. The root is used in fractures. [a. 35.]—**V. dioica**. Fr., *valériane aquatique* (ou *dioïque*), *petite valériane*. Ger., *kleiner* (oder *zweiheuisiger*) *Baldrian*, *Weissenbaldrian*, *Sumpf-baldrian*. Marsh- (or small) valerian of Europe and the Orient. The root, *radix valeriana palustris* (seu *phu minoris*), was formerly official; it is similar to valerian-root, but milder, and is used to adulterate it. [a. 35.]—**V. Dioscoridis**. Ger., *rankenblättriger Baldrian*. A species found in Asia Minor, identified by Sibthorp with the  $\phi\phi\phi$  of Dioscorides. The root is more aromatic and of a less nauseous odor than valerian-root. [a. 35.]—**V. edulis**. A North American species. The root is eaten cooked. [a. 35.]—**V. Hardwickii**. An Asiatic species. The root, identified by some with the *nardus gangetis* of the ancients, is used medicinally and as an insectifuge. [a. 35.]—**V. hortensis**. See *V. phu*.—**V. italica**. A species found in Italy and Candia, closely related to *V. tuberosa*. The root was formerly official as *nardus montana*. [a. 35.]—**V. jatamansi**. See *Nardostachys jatamansi*.—**V. locusta** (*olitoria*). See *VALERIANELLA olitoria*.—**V. major**. See *V. phu*.—**V. mexicana**. The *cutitlapatl* of Mexico. The roots, which have a strong odor and bitter taste, are used like valerian root. [J. M. Maisch, "Am. Jour. of Pharm.," Apr., 1886, p. 108; a. 35.]—**V. minor**. See *V. officinalis* and *V. dioica*.—**Valeriana montana**. 1. Mountain valerian, found in the European Alps. The root is said, probably erroneously, to be more active than true valerian-root. [a. 35.] 2. See *V. officinalis* and *V. dioica*.—**V. officinalis**. Fr., *valériane officinale* (ou *sauvage*), *herbe au chat* (ou de *Saint-Georges*). Ger., *gemeiner* (oder *gebräuchlicher*) *Baldrian*, *Katzenbaldrian*, *Speer-krautwurz*, *Katzenwurz*, *Katzenheriak*, *Ackerbaldrian*. Great wild (or medicinal, or cats') valerian, all-heal, cut-finger, herb Benet, St. George's herb; found throughout Europe and northern and middle Asia. The rhizome, together with its rootlets, constitutes valerian-root, which has an aromatic, bitterish taste and a somewhat terebinthinous, camphoraceous, peculiar odor, though in its fresh state the odor is not pronounced. It contains oil of valerianic acid, a peculiar extractive matter soluble in ether and in alcohol, an odorous resin, etc., and (Runge) a peculiar fixed acid producing with bases white salts which turn green when exposed to the air. Valerian-root is stimulant and antispasmodic. The leaves are vulnerary. [a. 35.]—**V. olitoria**. See *VALERIANELLA olitoria*.—**V. phu**, **V. pontica**. Fr., *valériane phu* (ou *franche*, ou *des jardins*), *nard agreste* (ou de *Crête*), *grande valériane*, *encens terrestre*. Ger., *grosser* (oder *weisser*, oder *viinischer*, oder *Garten-)* *Baldrian*, *Therakwurz*, *Therakkrind*, *St. Georgenwurz*, *Cretan spikenard*, *garden-valerian* of southern and middle Europe. The roots have properties resembling those of valerian-root, but are less aromatic. The  $\phi\phi\phi$  of the ancients, now identified with *V. Dioscoridis*, was formerly thought to be this plant. [a. 35.]—**V. salunum**. Ger., *wohlt riechender Baldrian*. An alpine European species having the properties of *V. celtica* and affording a part of *nardus celtica*. [a. 35.]—**V. sambucifolia**. Elder-leaved valerian, a variety of *V. officinalis*. The root is less vigorous than that of *V. silvestris*, and is said to be less rich in volatile oil. [a. 35.]—**V. saxatilis**. 1. A species found in Europe. The root, which has a nauseous, penetrating odor, may be used in place of valerian-root. [a. 35.] 2. See *V. celtica*.—**V. silvestris**. A variety of *V. officinalis*. Its root is said to be superior to that of *V. sambucifolia*. [a. 35.]—**V. sitchensis**. A species indigenous to northwestern America, considered by the Russians to be the most active of the genus. [a. 35.]—**V. tolucaana**. A Mexican species. The tubers, which contain an abundance of valerianic acid, are reputed to be useful in diseases of the liver. [J. M. Maisch, "Am. Jour. of Pharm.," Jan., 1886, p. 20.]—**V. tuberosa**. Mountain-spikenard of southern Europe. The root, which has a strong valerian-like taste and odor, was formerly official as *nardus montana*, and is still used. [a. 35.]—**V. virginiana**. The *Aristolochia serpentaria*. [a. 35.]—**V. Wallichii**. An East Indian species. The root is used like that of *Nardostachys jatamansi*, though it has a stronger and less pleasant odor. [a. 35.]

**VALERIANAS** (Lat.), n. m.  $Va^{2l}(wa^{2l})-e^{2r}-i^{2a}-a^{2n}(a^{2n})/a^{2s}(a^{2s})$ . Gen., *-at'is*. See *VALERIANATE*.—**V. atropicus**. See *ATROPINE valerianate*.—**V. chinicus**. See *QUININE valerianate*.—**V. natri-**

**cus**, **V. sodicus**. See *SODIUM valerianate*.—**V. zincicus**. See *ZINC valerianate*.

**VALERIANATE**, n.  $Va^{2l}-e^{2r}-i^{2a}-a^{2n}$ -at. Lat., *valerianas*. Fr., *valérianate*. Ger., *valeriansaures* (oder *baldriansaures*) Salz. A salt of valerianic acid. [B.]

**VALÉRIANE** (Fr.), n.  $Va^{2l}-a-re-a^{2n}$ . See *VALERIANA* and *VALERIAN-root*.—**Bain de v.** A bath used for hysteria and other nervous affections, made by infusing 500 grammes of dried valerian-root in 3 litres of water, and pouring the infusion into the bath. [B. 46.]—**Eau (distillée)** [Fr. Cod.] **de v.** See *Aqua VALERIANÆ*.—**Essence de v.** See *Oil of VALERIAN*.—**Extrait de v.** See *Extractum VALERIANÆ*.—**Poudre de v.** See *Radix VALERIANÆ pulverata*.—**Sirup de v.** See *Syrupus VALERIANÆ*.—**Souche de v. officinale**. See *VALERIAN-root*.—**Teinture de v.** See *Tinctura VALERIANÆ* (1st def.).—**Teinture éthérée de v.** See *Tinctura VALERIANÆ aetherea*.—**Tisane de v.** See *Infusum VALERIANÆ*.—**V. franche**. See *VALERIANA phu*.—**V. officinale**. See *VALERIANA officinalis*.—**V. officinale (souche)** [Fr. Cod.]. See *VALERIAN-root*. **V. resserée**. See *VALERIANA coarctata*.—**V. sauvage**. See *VALERIANA officinalis*.

**VALERIANELLA** (Lat.), n. f.  $Va^{2l}(wa^{2l})-e^{2r}-i^{2a}-a^{2n}(a^{2n})-e^{2l}/la^{2s}$ . Fr., *valérianelle*. Ger., *Rapünzchen*. A genus of the *Valerianaceæ*. The *Valerianellæ* are a subdivision of the *Valerianæ*. [a. 35.]—**V. locusta**, **V. olitoria**. Fr., *mâche*, *salade de blé* (ou *royale*, ou *verte*), *doucette*, *poule grasse*, *oreillette*, *coquille*. Ger., *gemeines* (oder *Feld*) *Rapünzchen*. Corn-salad, lamb's-lettuce of Europe, northern Africa, and northern and middle Asia; an early salad plant formerly official as *herba valerianellæ* and used as an antiscorbutic and emollient. [a. 35.]

**VALERIANIC**, adj.  $Va^{2l}-e^{2r}-i^{2a}-a^{2n}/i^{2k}$ . Lat., *valerianicus*. Fr., *valérianique*. Pertaining to or derived from valerian. [B.]—**V. acid**. Lat., *acidum valerianicum* (seu *valericum*). Fr., *acide valérianique* (ou *valérianique officinal*) [Fr. Cod.]. Ger., *Baldri-ansäure*. One of the isomeric forms of valeric acid,  $C_5H_{10}O_2 = (CH_3)_2CH.CH_2.CO.OH$ . It is found in the roots of *Valeriana officinalis* and *Archangelica officinalis* and in the bark and fruit of *Viburnum opulus*. It is also produced by the decomposition of albuminoid substances and the oxidation of fats. It is a colorless oily liquid, acting as a monobasic acid. [B.]—**V. anhydride**. A liquid,  $[(CH_3)_2CH.CH_2.CO]_2O = C_{10}H_{18}O_5$ . [B. 4.]

**VALERIANSAUER** (Ger.), adj.  $Va^{2l}-ar-e-a^{2n}/za^{2s}-u^{2}-e^{2r}$ . Combined with valerianic acid in the form of a valerianate.

**VALERIC**, adj.  $Va^{2l}-e^{2r}/i^{2k}$ . Fr., *valérique*. Derived from valerian. [B.]—**V. acid**. An acid,  $C_5H_{10}O_2$ , of which four isomeric forms are known: (1) *Normal v. acid*, *isobutylicarbonic acid*, *isopropylacetic acid*, *pentoic acid*,  $CH_3-CH_2-CH_2-CH_2-C.OOH$ , a liquid of rancid odor; (2) *isovaleric acid* (see *VALERIANIC acid*); (3) *ethmetacetic acid*, *8-butylicarbonic acid*, *a-methylbutyric acid*, a liquid,  $CH_3-C_2H_4-CH.CO.OH$ ; and (4) *trimethacetic acid*, *trimethylcarbonic acid*, *pseudovaleric acid*, *pinolic acid*,  $CH_3-C \equiv C-CO.OH$ , occurring as foliate crystals. [B. 4.]—**V. aldehyde**. Amyliden oxide. [B.]

**VALERIN**, n.  $Va^{2l}-e^{2r}-i^{2n}$ . Fr., *valérine*. A compound of glycerin and valeric acid; a glyceryl valerate. [B.] Cf. *TRIVALERIN*.

**VALEROL**, n.  $Va^{2l}-e^{2r}-o^{2l}$ . Fr., *valérol*. Ger., *V.* That part of oil of valerian which boils between 205° and 215° C. [B. 270 (a, 38).]

**VALERONITRILE**, n.  $Va^{2l}-e^{2r}-o-nit'r/i^{2l}$ . Fr., *valéronitrile*. Ger., *Valeronitril*. See under *BUTYL cyanide*.

**VALERYL**, n.  $Va^{2l}-e^{2r}-i^{2l}$ . Fr., *valéryle* (2d def.). Ger., *V.* 1. An old name for the radicle  $C_5H_9$ , supposed to be contained in valerianic acid. The symbol *Vi* was sometimes given to it. [B. 118.] 2. The compound  $C_5H_9O$ . [B. 270 (a, 38).]

**VALERYLENE**, n.  $Va^{2l}-e^{2r}/i^{2l}-en$ . Fr., *valérylène*. Ger., *Valerylen*. A liquid,  $CH_3.C:C.C_2H_5 = C_5H_8$ , boiling at 51° C. Two isomeric forms also exist, *isovalerylene*,  $(CH_3)_2C:C.C_2H_5$ , a liquid of garlicky odor, and *isopropylacetylene*. [B. 8; a. 38.]

**VALET-À-PATIN** (Fr.), n.  $Va^{2l}-le^{2s}-a^{2s}-pa^{2s}-ta^{2n}$ . A forceps, invented by Gui Patin, for compressing blood-vessels before their ligation. [L. 41 (a, 14).]

**VALETUDINARIAN**, adj.  $Va^{2l}-e^{2t}-u^{2d}-i^{2n}-ar/i^{2l}-n$ . From *valetudo*, condition of health. Fr., *valétudinaire*. Ger., *kränklich*, *schwächlich*. Pertaining to a condition of weakness or feeble health; as a n., an invalid. [D. 20.]

**VALGUS** (Lat.), adj.  $Va^{2l}g(wa^{2l}g)/u^{2s}(u^{2s})$ . 1. Bow-legged. [A. 312 (a, 17).] 2. As a n., see *TALIPES v.*—**Nervous v.** V. of neurotic origin. [a. 34.]—**Paralytic v.** V. caused by paralysis of the muscles of the foot, especially the tibialis anticus. [a. 34.]—**Rhachitic v.** V. caused by rickets. [a. 34.]—**Spasmodic v.** An ephemeral intermittent v. caused by muscular paresis. [a. 34.]—**Spurious v.** *Pes planus*. (Reeves (a. 34).)—**Static v.** Talipes v. caused by an altered axis of bodily pressure toward the inner side of the foot. [a. 34.]—**Traumatic v.** V. caused by fracture or dislocation of the tibia, or by injury of the tarsal or metatarsal joints, or by cicatrices. [a. 34.]

**VALIDINE**, n.  $Va^{2l}/i^{2d}-en$ . Fr., v. A base,  $C_{14}H_{21}N$ , found in quinoline. [B. 270 (a, 38).]

**VALLECULA** (Lat.), n. f.  $Va^{2l}(wa^{2l})-le^{2k}/u^{2l}(u^{2l})-a^{2s}$ . Dim. of *vallis*, a valley. 1. A longitudinal depression; specifically, the v. cerebelli. [a. 48.] 2. In botany, one of the grooves between the ridges on umbelliferous fruits. [a. 35.]—**V. cerebelli**. See *FISSURA cerebelli longitudinalis*.—**V. cordis**. A shallow furrow at the apex of the heart uniting the anterior and posterior longitudinal furrows. [L.]—**V. glosso-epiglottica**, *Vallecule Lingue*. See *FOSSEA glosso-epiglottica*.—**V. ovata**. See *FISSURE for the gall-bladder*.—**V. petrosa**. See *FOSSETTA petrosa*.—**V. Reilii**. The depression between the cerebellar hemispheres which is occupied by the vermiciform process. [L. 17 (K.).]—**V. Sylvii**. See *STAMM der Fissura Sylvii*.—**V. unguis**. The fold of the nail. [G.]

**VALLECULATE, VALLECULOSE**, adj's.  $Va^2l-e^2k/u^2l-at$ . -os. Lat., *valleculatus, valleculosus*. Ger., *rillig, gerillt*. Provided with vallecula (2d def.).

**VALLE DI SELLA** (It.), n.  $Va^2l-la$  de  $se^2l/la^2$ . An Italian health resort and hydrotherapeutic establishment for children. [Weiss, "Gazz. med. ital.-Prov. Venete," June 3, 1882, p. 175.]

**VALLEE** (Fr.), n.  $Va^2l-la$ . A valley or valley-like depression. [a. 48.]—**V. de Sylvius**. The primitive sulcus which afterward becomes the fissure of Sylvius [L, 35 (K)].—**V. longitudinale de cervelet**. See *VALLECULA Reilii*.

**VALLEJO WHITE SULPHUR SPRINGS**, n. pl.  $Va^2l-ya^2h$  ho  $hvit$   $sul^2f/ur$ . A place in Solano County, California, where there are hot sulphurous springs. [Anderson (a, 14).]

**VALLICULA** (Lat.), n. f.  $Va^2l(wa^2l)-li^2k/u^2l(u^2l)-a^2$ . See *VALLECULA*.

**VALLUM** (Lat.), n. n.  $Va^2l(wa^2l)/u^2m(lu^2m)$ . Lit., a rampart. An old term for the supercilium (q. v.). [F.]—**V. of the circumvallate papillae of the tongue**. An elevation in the mucous membrane of the tongue which surrounds the fossa of the circumvallate papillae. [C.]

**VALMONT** (Fr.), n.  $Va^2l-mo^2n^2$ . A place in the department of the Seine-Inférieure, France, where there is a gaseous and alkaline spring. [L, 49 (a, 14).]

**VALOID**, n.  $Va^2l-oid$ . From *valere*, to be worth. Syn.: *equivalent extract*. A term applied in the United Kingdom to a class of proprietary pharmaceutical preparations. The *v*'s seem to be nothing more than fluid extracts prepared with particular regard to making a given weight of the product contain the same amounts of the active principles as are contained in the crude drug.

**VALONIA**, n.  $Va^2l-on^2l-a^2$ . From *βάλανος*, an acorn. Ger., *Valonen, Walonen*. A commercial name for the cups of *Quercus cegiops* and *Quercus vallonea*. [a, 35.]

**VALS** (Fr.), n.  $Va^2ls$ . A place in the department of the Ardèche, France, where there are numerous gaseous alkaline springs. [L, 41, 57 (a, 14).]

**VAL SINISTRA** (It.), n.  $Va^2l$   $si^2n-e^2st/ra^2$ . A place in the canton of the Grisons, Switzerland, where there are gaseous alkaline springs. [L, 57 (a, 14).]

**VALVACEUS** (Lat.), adj.  $Va^2l(wa^2l)-vas(wa^2k)/e^2u^2s(u^2s)$ . Fr., *valvacé*. 1. Of fruits, having marked seams or sutures, although indeludent. [a, 35.] 2. See *VALVATE*.

**VALVATE**, adj.  $Va^2lv/at$ . Lat., *valvatus, valvaris*. Fr., *valvé*. Ger., *klappig, klappenartig*. Syn.: *valvular*. 1. Composed of valves. 2. Opening by valves. 3. United by the margins. [a, 35.]

**VALVE**, n.  $Va^2lv$ . Lat., *valva*. Fr., *panneau*. Ger., *Valvel, Ventil, Klappe*. 1. A movable flap or fold which acts to close a passage or orifice more or less completely. [a, 48.] 2. In botany, a separable part in various organs, especially one of the pieces into which a dehiscient pericarp splits. The name has also been applied to the halves of a silicified membrane in the *Diatomaceae*, to the pieces of a glume, to the divisions of a spathe, to the volva in *Fungi* (by Pualet), and to the cotyledons (*valvæ seminum*) of seeds (by Jungius). [a, 35.]—**Aortic v.** The *v.* situated at the exit of the aorta from the heart. It consists of three semilunar segments, which prevent the reflux of blood into the heart. [L.]—**Bicuspid v.** See *Mitral v.*—**Cerebral v.** See *V. of Vieussens*.—**Eustachian v.** A crescentic fold of the lining structure of the fetal heart so situated as to direct the blood entering the right auricle by the vena cava inferior toward the opening of the foramen ovale. In the adult it may be obliterated, may be reduced to a trace, or may persist nearly as in the fetus. [A, 5.]—**Hasner's v.** A mucous fold at the nasal aperture of the nasal duct. [L.]—**Heister's v.** A *v.* formed by folds of the mucous membrane of the neck of the gall-bladder. [L, 332.]—**Houston's v's**. In the rectum, oblique folds of the mucous membrane, situated one at about the level of the prostate gland, another a little higher, and a third still higher. [L, 142.]—**Huschke's v.** See *VALVULA sacci lacrimalis superior*.—**Ileo-cæcal v.**, **Ileo-colic v.** Ger., *Dickdarmklappe, Blinddarmklappe*. An incomplete partition divided by a narrow slit-like opening, which is rounded anteriorly and narrow and pointed posteriorly, through which the cavities of the ileum and colon communicate. It is made up of the mucous membrane, its submucosa, and a few muscular fibres. It is nearly at right angles to the long axis of the colon, toward which one surface faces, the other facing toward the ileum. [L.]—**Interauricular v.** See *V. of the foramen ovale*.—**Large v. of the brain**. See *V. of Vieussens*.—**Mitral v.** A *v.* situated at the left auriculo-ventricular opening, consisting of two more or less jointed segments continuous at their attached borders. [L, 31, 142, 332.]—**Pulmonary v.** The *v.* in the left ventricle of the heart, at the entrance of the pulmonary artery. It consists of three semilunar segments, and prevents reflux of blood from the heart into the artery. [L.]—**Pyloric v.** Ger., *unterer Magenmundring*. A ring-like elevation of the mucous membrane of the stomach around the pylorus. [L, 31.]—**Semilunar aortic v.** See *Aortic v.*—**Semilunar pulmonary v.** See *Pulmonary v.*—**Semilunar (or Sigmoid) v's of the heart**. Those *v's* of the heart which consist of three semilunar segments attached by their convex borders. [L.]—**Triacuspid v.** A *v.* made up of three triangular segments, situated at the right auriculo-ventricular opening. [L.]—**V. of Amussat**. See *Heister's v.*—**V's of a vein**. Ger., *Flügelthüren, Venenklappen*. Semilunar folds of the inner coat of the veins, strengthened by connective tissue, with their concave side placed like the inside of a pouch toward the heart, so that when they are filled they retard the backward flow of the blood. [C.]—**V. of Bauhin**. See *Ileo-cæcal v.*—**V's of Kerkring**. See *VALVULE conniventes*.—**V. of the Basiasus**. A semicircular fold of the endocardium at the entrance of the coronary sinus into the heart. [L, 142, 332.]—**V. of the colon**. See *Ileo-cæcal v.*—**V. of the cystic duct**. See *Heister's v.*—**V. of**

**the foramen ovale**. A thin crescentic valvular fold, situated a little to the left of the foramen, in the embryonic heart, growing forward from the posterior wall of the auricles and projecting into the left auricle. Its office is to prevent the regurgitation of blood from the left auricle into the right one.—**V. of the gall-bladder**. See *Heister's v.*—**V's of the lymphatics**. Semilunar folds of the inner coat placed opposite each other, as in the veins. [C.]—**V's of the rectum**. See *Houston's v's*.—**V. of the trigone**. A depression between the anterior pillars of the fornix cerebri which Vieussens erroneously believed to be an opening leading into the fifth ventricle. [L, 55 (K)].—**V. of Tulpinus**. See *Ileo-cæcal v.*—**V. of Vieussens**. Ger., *Hirnklappe, vorderes Marksegel*. A triangular lamina of white nerve substance which bridges over the interspace between the superior cerebellar peduncles, forming a portion of the roof of the fourth ventricle. It expands posteriorly, where it is connected with the lower surface of the vermiform process. It is crossed by the lingula, and gives origin to the fourth cranial nerve. [L, 15 (K).]

**VALVULA** (Lat.), n. f.  $Va^2l(wa^2l)/vu^2l(wu^2l)-a^2$ . Dim. of *valva*, a valve. See *VALVE*, *VALVULE*, and *VALVE of Vieussens*.—**Valvulæ atrio-ventriculares**. The mitral and tricuspid valves. [L.]—**V. bicuspidalis**. See *Mitral valve*.—**V. cæci**. See *Ileo-cæcal valve*.—**V. anterior**. See *VALVE of Vieussens*.—**V. cerebelli posterior**. The posterior medullary velum. [L, 175 (a, 50).]—**V. cerebri** (Galen, seu major). See *VALVE of Vieussens*.—**V. coli**. See *Ileo-cæcal valve*.—**V. coli vesicæ**. See *V. vesico-urethralis*.—**Valvulæ conniventes**. Ger., *Querfalten*. Crescent folds of the mucous membrane of the intestine placed transversely to its long axis. [L.]—**V. cuspidalis**, **V. episcopalis**. See *Mitral valve*.—**V. Falloppii**. See *Ileo-cæcal valve*.—**V. faucium** [Schaarschmidt]. See *VELUM palati*.—**V. foraminis ovalis**. See *VALVE of the foramen ovale*.—**V. fossæ navicularis**. A transverse fold of the mucous membrane at the posterior extremity of the fossa navicularis urethrae. [L.]—**Valvulæ Hobokenii**. Semilunar or annular folds in the interior of the umbilical arteries. [L, 57 (a, 50).]—**V. hymenalis urethrae virilis**. See *V. fossæ navicularis*.—**Valvulæ intestinales**, **Valvulæ Kerkringii**. See *Valvulæ conniventes*.—**V. lacrimalis (inferior)**. See *V. sacci lacrimalis inferior*.—**V. lacrimalis superior**. See *V. sacci lacrimalis superior*.—**V. magna**. See *VALVE of Vieussens*.—**V. magni cerebri**. Of Prochaska, the superior cerebellar peduncles. [L, 3 (K)].—**V. ovals**. Of Vicq d'Azyr, see *VALVE of Vieussens*.—**V. processus vermiformis**. A mucous fold surrounding the small orifice by which the vermiform appendix opens into the cæcum. [L, 57 (a, 50).]—**V. sacci lacrimalis inferior**. A fold of mucous membrane at the junction of the lacrimal duct and sac. [L, 31, 332.]—**V. sacci lacrimalis superior**. A crescentic fold of the mucous membrane of the lacrimal sac below the openings of the canaliculi lacrimales. [L, 31, 332.]—**V. semicircularis posterior inferior**. Of Tarini, the posterior medullary velum. [L, 3 (K)].—**Valvulæ semilunares arteriarum**. See *Semilunar valves of the heart*.—**V. semilunaris**. 1. See *Posterior medullary velum*. 2. The third eyelid, or plica semilunaris; an old term for a fold of conjunctiva, inclosing a layer of dense fibro-connective tissue between its folds, lying in the conjunctival cul-de-sac in birds and some other of the lower mammals. [F.]—**V. semilunaris arteriæ pulmonalis**. See *Pulmonary valve*.—**V. semilunaris (cerebelli, seu Farini)**. See *Posterior medullary velum*.—**V. semilunaris (septi atriorum)**, **V. sinus sinistri**. See *VALVE of the foramen ovale*.—**V. triglochis**. See *Tricuspid valve*.—**V. urethrae pylorica**. See *SPHINCTER urethrae prostaticus*.—**V. vaginae**, **V. vaginalis**. See *HYMEN* (2d def.).—**Valvulæ venarum (seu venosæ)**. See *VALVES of a vein*.—**V. vesicæ**, **V. vesico-urethralis**. A valvular membrane found in middle-aged men at the junction of the internal portion of the urethra and the neck of the bladder. It is formed by hypertrophied prostatic fibres and fibres of the sphincter urethrae. [a, 34.]—**V. Vieussenii**. 1. See *VALVE of Vieussens*. 2. A fold at the opening of the great coronary vein of the heart. [L, 332.]—**V. willisiana**. See *VALVE of Vieussens*.

**VALVULAR**, adj.  $Va^2lv/u^2l-a^2r$ . Lat., *valvularis*. Fr., *valvulaire*. 1. Pertaining to a valve. 2. See *VALVATE*.

**VALVULE**, n.  $Va^2lv/u^2l$ . Lat., *valvula* (dim. of *valva*, a valve). Fr., *v. Ger., Klappchen*. 1. A little valve. [a, 35.] 2. Of Wilder, see *VALVE of Vieussens*.—**Grande v. du cerveau** (Fr.). See *VALVE of Vieussens*.—**V. antérieure** (Fr.). See *LAMINA cinerea*.—**V. de Cruveilhier** (Fr.). See *Hasner's valve*.—**V's de Guérin** (Fr.). Normal enlargements of the small mucous folds observed at the orifices of the glands of Littre. ["*Jour. de l'Anat. et de la physiol.*," xxviii, 1892, p. 244 (a, 50).]—**V. du col de la vessie** (Fr.). See *VALVULA vesicæ*.—**V. triglochine** (Fr.). See *Tricuspid valve*.

**VALVULITIS** (Lat.), n. f.  $Va^2l(wa^2l)-vu^2l(u^2l)-i(e)/ti^2s$ . Gen., *-it'idis (-idis)*. From *valvula*, a valve. Inflammation of one or more of the valves of the heart. [D, 68.]

**VALVULOTOME**, n.  $Va^2lv/u^2l-o-tom$ . From *valvula* (q. v.), and *τομή*, a cutting. Fr., *v.* 1. An instrument devised by François-Franck for removing pieces from the aortic valves of a living animal for the purpose of studying the effects of such mutilation. It is introduced by way of the carotid artery. ["*Gaz. hebdomadaire de méd. et de chir.*," Feb. 5, 1886, p. 94.] 2. A catheter-like instrument having a concealed knife devised by Mercier for anterior or posterior incision of the prostatic urethra. [a, 34.]

**VALYLENE**, n.  $Va^2l/i^2l-en$ . Fr., *valylène*. Ger., *Valylen*. A liquid hydrocarbon,  $C_8H_8$ . [B, 270 (a, 38).]

**VAMPYRISMUS** (Lat.), n. m.  $Va^2mp(wa^2mp)-i^2r(u^2r)-i^2z(i^2z)/mu^2s(mu^2s)$ . From *vampyrus*, a vampire. A form of delusional insanity epidemic early in the eighteenth century in Hungary, Siberia, etc., in which the patient believed that dead enemies had left their graves in order to suck his blood. [L, 57 (a, 50).]

**VANAD** (Ger.), n.  $Va^2n-a^2d$ . See *VANADIUM*.—**V. oxyd**. Vanadium pentoxide; in connection with a qualifying adjective, a

vanadic oxysalt. [B.]—**V'oxydul**. Vanadium trioxide; in connection with a qualifying adjective, a vanadious oxysalt. [B.]

**VANADATE**, n.  $Va^{2n}a^{2d}at$ . A salt of vanadic acid. [B.]

**VANADIC**, adj.  $Va^{2n}a^{2d}i^{2k}$ . Fr., *vanadique*. Containing vanadium as a pentad radicle. [a, 48.]—**V. acid**. Fr., *acide vanadique*. Ger., *Vanadinsäure*, *Vanadsäure*. An acid formed by the union of vanadium pentoxide with water. The v. acids are: (1) *Normal v. acid*, or *orthov' acid*,  $H_2VO_4$ , known only through its salts, the *vanadates*; (2) *metav' acid*,  $HVO_3$ ; and (3) *pyrov' acid*,  $H_4V_3O_{17}$  ( $= V_2O_5 - 2H_2O$ ). [B.]

**VANADIOUS**, adj.  $Va^{2n}a^{2d}i^{2u}a^s$ . Containing vanadium as a trivalent radicle. [B.]

**VANADIUM** (Lat.), n. n.  $Va^{2n}(wa^{3n})ad(a^{3d})i^{2u}m(u^{3m})$ . From *Vanadis*, a Scandinavian goddess. Fr., v. Ger., *Vanad*. A metallic element discovered in 1801 by Del Rio, and rediscovered in 1830 by Sefström, who gave it its present name. It is found in various rare minerals. It forms a light-grayish micro-crystalline powder, not readily oxidized, and infusible at a red heat. In composition, it acts usually as a pentad, but combines with oxygen in five different proportions, forming compounds resembling those of nitrogen. Symbol, V; atomic weight, 51.2; sp. gr., 5.5. [B, 3.]—**V. pentoxide**. Ger., *Vanadoxyd*. Vanadic oxide,  $V_2O_5$ , yellowish-red prismatic crystals. [B, 3.]

**VANADYL**, n.  $Va^{2n}a^{2d}i^{2l}$ . Fr., *vanadyle*. Ger., V. A trivalent radicle, (VO'''), occurring in the vanadic salts obtained by the action of vanadium pentoxide on acids. [B, 3.]

**VANDA** (Lat.), n. f.  $Va^{2n}d(wa^{3n})a^{2s}$ . A genus of epiphytal orchids. The *Vanaceae* (Fr., *vanadées*) are a tribe of the *Orchideae*. [a, 35.]—**V. Roxburghii**. See *AERIDES tessellatum*.—**V. scripta**. A species found on trees in the Moluccas. The sap is used in aphthae, the fruit in diarrhoea and dysentery, and the juicy pulp of the stem, in combination with curcuma-root, to heal ulcers and to hasten suppuration. [a, 35.]—**V. spatulata**. An East Indian species. The powdered leaves are used in diarrhoea and dysentery, the flowers as a pectoral, and the entire plant, mixed with oil, in skin diseases. [a, 35.]

**VANDELLIA** (Lat.), n. f.  $Va^{2n}d-e^{2l}li^{2a}a^s$ . From *Vandelli*, an Italian botanical writer. Fr., *vandellie*, *vandellie*. A genus of scrophulaceous herbs. [a, 35.]—**V. diffusa**. Fr., *vandelle* (ou *vandellie*) *étalée*. Bitter-blain; an emetic, diuretic, and purgative species found in tropical America; used in fevers, in liver derangements, as an anthelmintic, and as a detergent. [a, 35.]—**V. pratenensis**. See *SCOPARIA dulcis*.

**VANELLUS** (Lat.), n. m.  $Va^{2n}(wa^{3n})e^{2l}lu^{2s}(lu^{4s})$ . From *vannus*, a fan. A genus of birds, of the *Charadriaceae*. [a, 48.]—**V. cristatus**. Fr., *vanneau*. The lapwing; a European bird resembling a plover. [a, 48.]

**VANGUERIA** (Lat.), n. f.  $Va^{2n}g-e^{2r}i^{2a}a^s$ . Fr., *vanguier*. A genus of shrubs or trees of the tribe *Vanguerieae* of the *Rubiaceae*. In the Mauritius the leaves of some species are used as an antisynteritic and in strangulated hernia. [a, 35.]—**V. spinosa**. An East Indian species. The bark is febrifuge. [a, 35.]

**VANILLA** (Lat.), n. f.  $Va^{2n}(wa^{3n})i^{2l}la^{2s}$ . From Sp. *vainilla*, a v-bean. Fr., *vanillier* (1st def.), *vanille* [Fr. Cod.], *fruit (ou gousse) de vanille* (2d def.). Ger., *Vanille*. 1. A genus of tropical climbing orchids. The *Vanillaceae*, *Vanilleae*, or *Vanillidae* are a tribe of orchids (of Bentham and Hooker, a subtribe of the *Neottieae*). [a, 35.] 2. The fruit of *V. planifolia* (of *V. aromatica* [Belg. Ph.]). [a, 35.]—**Bastard v.** See *V. cimarona*.—**Bourbon v.** An inferior variety of v-bean, said to contain from 1.9 to 2.48 per cent. of vanillin. [a, 35.]—**Chocolata cum v.** [Fr. Cod.] (see *vanille*). Fr., *chocolat à la vanille* [Fr. Cod.]. A mixture of 100 parts of chocolate (the chocolate simple of the Fr. Cod. without the cinnamon) and 4 of vanilla saccharata. [B, 113.]—**Cream v. syrup**. A mixture of 3 fluidrachms of strong fluid extract of v., a pint of simple syrup, and a pint of cream syrup. [B, 5 (a, 21).]—**Essence of v.** Fluid extract of v. A preparation essentially equivalent to the tincture of v., but of about two thirds its strength. [B, 81 (a, 38).]—**Fructus vanillae**. See *V.* (2d def.).—**Mexican v.** The finest variety of v. [a, 35.]—**Pulvis vanillae cum saccharo**. See *V. saccharata*.—**Rio v.** See under *V. palmarum*.—**Small v.** See *V. cimarona*.—**Tinctura vanillae**. Fr., *teinture de vanille*. A preparation made by macerating 1 part of v. (2d def.) with 5 parts of alcohol of sp. gr. 0.804 for 12 hours, pouring off the liquid, adding 2 parts of sugar to the residue, and treating this in a percolator with the reserved liquid and with enough more alcohol to make 10 parts [U. S. Ph.]; or by macerating v. several days with five times as much dilute alcohol [Ger. Ph., Swiss Ph., T. A.] (70-per-cent. alcohol [Russ. Ph.], 80-per-cent. alcohol [Belg. Ph.]), or ten times as much 80-per-cent. alcohol [Fr. Cod.]. [B, 95 (a, 38).]—**V. aromatica**. (Ger., *gewürzhafte Vanille*). A species with very long cylindrical capsules, which form a part of the v. of commerce. Probably a number of species have been described under this name. The plant is used empirically in syphilis and as a vulnerary. [a, 35.]—**V-bean**. See *V.* (2d def.).—**V. cimarona**. Small, bastard, or wild v.; the fruit of *V. silvestris*. [a, 35.]—**V. claviculata**. Fr., *laine à blessures*. Ger., *keulenfrichtige Vanille*. Purple-lip orchid, green with the of the West Indies; a v.-yielding species identified by some with *V. planifolia* growing in the hot and damp regions of America and Africa; used like *V. aromatica*. [a, 35.]—**V. disease**. See *VANILLISM*.—**V. leg.** V. ley. Fr., *vanille leg.* The *vanilla mansa* of the Spaniards; the larger and more valuable v. derived from *V. sativa*. [a, 35.]—**V. palmarum**. A Brazilian species affording an inferior v. (Rio v.) containing 1.03 per cent. of vanillin. [a, 35.]—**V. planifolia**. V.-plant, a climbing species growing in moist, shady forests; indigenous to eastern Mexico and other parts of tropical America, but cultivated in Réunion, the Seychelles, Java, etc., for its fruit, which forms the bulk of the v. of commerce. This is a fleshy pod about  $\frac{3}{16}$  or  $\frac{1}{8}$  inch wide and 3 to 12 inches long,

hooked at the base, and opening lengthwise by two unequal valves. It contains a viscid, aromatic juice in which are imbedded numerous black seeds. Its peculiar fragrance is due to vanillin, which is contained in the juice

VANILLA PLANIFOLIA. [A, 32.]

or pulp, and is diffused throughout the entire fruit when it is dried. The surface of the pod is finely furrowed and often beset with crystals (see *VANILLE givrée*). It has been used as an excitant, stomachic, stimulant, etc., but is chiefly employed for flavoring. V. is said by Grasset to produce paralysis of the spinal cord and motor nerves in frogs. [a, 35.]—**V. pompona**. A South American species said to yield vanillon. [a, 35.]—**V. saccharata**. Fr., *poudre de vanille sucrée*. A preparation made by triturating 1 part of v. (2d def.) with 9 parts of sugar (10 of sugar and 5 of milk-sugar [Russ. Ph.]). The Fr. Cod. allows as a substitute a mixture of 1 part of crystallized vanillin dissolved in the least possible 90-per-cent. alcohol and 49 parts of sugar. [B, 95 (a, 38).]—**V. sativa**. The cultivated v.-plant, a variety of *V. planifolia* (or, according to some, of *V. aromatica*). [a, 35.]—**V. silvestris**. A variety of *V. planifolia* (according to some, a distinct species). Its fruit (*v. cimarona*) is smaller and less aromatic than that of *V. sativa*. [a, 35.]

**VANILLE** (Fr., Ger.), n's.  $Va^{2n}e^{2l}y^{2l}i^{2e}a^s$ . See *VANILLA*.—**Baume de v.** (Fr.). See *BAUME de v.*—**Chocolat à la v.** (Fr.). See *Chocolata cum VANILLA*.—**Gesetzliche V.** (Ger.). **Lange V.** See *VANILLA leg.*—**Poudre de v. sucrée** (Fr.). See *VANILLA saccharata*.—**Teinture de v.** (Fr.). See *Tinctura VANILLE*.—**V. givrée** (Fr.). V. the surface of which is beset with an efflorescence of minute colorless crystals of vanillin. [a, 35.]—**V. lee** (Fr.). See *VANILLA leg.*

**VANILLIC ACID**, n.  $Va^{2n}i^{2l}i^{2k}$ . An isomeric variety,  $C_9H_8O_5 = C_6(CO.OH.H.OCH_3.OH.H.H.)$ , of methylprotocatechuic acid, occurring as acicular crystals. [B, 3 (a, 38); B, 4.]

**VANILLIC ALDEHYDE**, n. See *VANILLIN*.

**VANILLIN**, n.  $Va^{2n}i^{2l}i^{2n}$ . Lat., *vanillin* [Fr. Cod.]. Fr., *vanilline* [Fr. Cod.]. Ger., V. A substance,  $C_9H_8O_3 = C_6(CHO.H.OCH_3.OH.H.H.)$ , found in the pods of *Vanilla planifolia* and in Siam benzoin, asafœtida, etc. It forms white acicular crystals, of fragrant odor and pungent taste; an isomeric variety, *isovanillin*,  $C_9(COOH.H.OH.OCH_3.H.H.)$ , forms prismatic crystals. [B, 3 (a, 38); B, 4, 5.]—**V. glucoside**. See *GLUCOVANILLIN*.

**VANILLISM**, n.  $Va^{2n}i^{2l}i^{2m}$ . Fr., *vanillisme*. A disease occurring among those who sort vanilla-pods, due to contact with an insect found on the pods. The chief symptoms are pruritus with redness and swelling of the surface and some evidences of general malaise. [“*Drugg. Circ. and Chem. Gaz.*,” Jan., 1884, p. 14 (B).]—**Alimentary v.** V. attributed to the ingestion of vanilla. Poisoning by tyrotoxicol has erroneously been called vanillism. [a, 34.]

**VANILLON**, n.  $Va^{2n}i^{2l}o^{2n}$ . An inferior variety of vanilla (fruit of *Vanilla pompona*), occurring as a broad, fleshy pod without efflorescence (*givre*) on its surface. It is of poor fragrance and contains, besides vanillin, benzaldehyde. [a, 35; B, 270 (a, 38).]

**VANILLYL ALCOHOL**, n.  $Va^{2n}i^{2l}i^{2l}$ . A substance,  $C_8H_8O_3 = C_6(H_2(OH)(OCH_3)CH_2.OH)$ , occurring as prismatic crystals. [B, 3 (a, 38).]

**VAO**, n. An arrow-poison from the United States of Colombia, containing corrovaline; supposed to be adulterated corroval. [a, 35.]

**VAPEUR** (Fr.), n.  $Va^{2n}pu^{2r}$ . Vapor; in the pl., v's, see *VAPORS*.

**VAPOR** (Lat.), n. m.  $Vap(wa^{3n})p^{2r}$ . Gen., *pors*. Gr., *ἀρῆς*. Fr., *vapeur*. Ger., *Dampf*. 1. A visible gaseous exhalation. [a, 48.] 2. See *INSALATION* (3d def.). 3. For the pl., the *vapors*, see the major list.—**V. acetous**. See *Liquor alexiterius acetatus*.—**V. sanguinis**. See *GAS of the blood*.

**VAPORARIUM** (Lat.), n. n.  $Vap(wa^{3n})p^{2r}(or)-a^{2r}i^{2l}i^{2m}$ . From *vapor*, steam. Fr., *étuve humide*. Ger., *Dampfbad*. A vapor bath, also the apartment in which it is administered. [a, 48.]

**VAPOREUX** (Fr.), adj.  $Va^{2n}po^{2r}$ . 1. Vaporous. 2. Pertaining to the vapors.

**VAPORIZABLE**, adj.  $Vap-o^{2r}i^{2z}a^{2b}l$ . Fr., *vaporisable*. Ger., *verdampfbar*. Capable of being converted into vapor. [B.]

**VAPORIZATION**, n.  $Vap-o^{2r}i^{2z}a^{2shu}n$ . From *vapor*, steam. Fr., *vaporisation*. Ger., *Verdunstung*. The conversion of a liquid or solid into a vapor by means of heat. [a, 48.]

**VAPORIZE**, v. tr. and intr.  $Vap-o^{2r}iz$ . Fr., *vaporiser*. Ger., *vaporistren*, *ausdunsten*. To convert or be converted into a vapor. [B.]

**VAPORIZER**, n.  $Vap-o^{2r}iz-u^{2r}$ . From *vapor*, steam. Fr., *vaporiseur*. See *ATOMIZER*.

**VAPOROLE**, n. Vap<sup>o</sup>2r-ol. Of Burroughs, a friable glass capsule containing a drug to be employed for inhalation or fumigation, enshathed in concentric layers of absorbent cotton, and the whole inclosed in a silken sac. [<sup>1</sup> Dublin Jour. of Med. Sci., Feb., 1889, p. 192 (a, 50).]

**VAPOROUS**, adj. Vap<sup>o</sup>2r-u<sup>s</sup>. Lat., *vaporosus* (from *vapor*, steam). Fr., *vaporeux*. 1. Pertaining to or containing vapor. 2. Of the blood, arterial. [Harvey (H).]

**VAPORS**, n. pl. Vap<sup>r</sup>2z. Fr., *affections vaporeuses*, *vapeurs*. An old popular term for hysterical and hypochondriacal affections.

**VARAIRE** (Fr.), n. Va<sup>3</sup>-ra<sup>2</sup>r. See VERATRUM.

**VAREC** (Fr.), **VARECH** (Fr.), n's. Va<sup>3</sup>-e<sup>2</sup>k. Ger., *Vareh*. See FUCUS.—V. *vésiculeux* [Fr. Cod.]. See FUCUS *vesiculosus*.

**VARENI**, n. See AMBULO.

**VARENNEA** (Lat.), n. f. Va<sup>3</sup>-e<sup>2</sup>n<sup>2</sup>-ne<sup>2</sup>-a<sup>3</sup>. The genus *Eysenhardtia*. [a, 35.]—V. *polystachya*. Sp., *cuete, taray de México* [Mex. Ph.]. A Mexican species, used in nephritis, cystitis, and chicken-cholera. The gum has the properties of kino. [J. M. Maisch, "Am. Jour. of Pharm.," Mar., 1886, p. 122 (a, 17).]

**VARENNES** (Fr.), n. Va<sup>3</sup>-re<sup>2</sup>n. A place in the department of the Maine-et-Loire, France, where there is a gaseous chalybeate spring. [L, 49 (a, 14).]

**VARIATION**, n. Var-i<sup>2</sup>-a<sup>3</sup>-shu<sup>2</sup>n. Lat., *variatio* (from *variare*, to change). The act or process of changing in form, character, rate of motion, etc.; also the amount or degree of such change. [a, 48.]—**Double v.** [Du Bois-Reymond]. The double current observed at any point in a muscle or nerve, caused by the passage through it of a single induction shock. [Mayer, "Arch. f. Anat. u. Phys.," 1868, p. 655 (K).]—**Negative v. of the muscle current.** Of Du Bois-Reymond, the diminution of the muscle current of a muscle that yields a strong electrical current, produced by throwing the muscle into a state of tetanic contraction by stimulating its motor nerve. [a, 34.]

**VARICE** (Fr.), n. Va<sup>3</sup>-res. See VARIX.

**VARICELLA** (Lat.), n. f. Va<sup>3</sup>r(wa<sup>3</sup>r)-i<sup>2</sup>s(i<sup>3</sup>k)-el<sup>2</sup>-a<sup>3</sup>. Fr., *varicelle*, *variolette*, *vérette*, *faussee vérole*, *vérole bâtarde*, *petite vérole volante*, *vérolette*, *pustules de poulet*, *nesles*. Ger., *Varicelle*, *Schafblattern*, *Spitzblattern*, *falsche Pocken*. 1. Chicken- (or swine-, or sheep-, or glass-, or water-) pox, water-jags, hives; a mild infectious disease of children, characterized by an eruption of vesicles on the skin and mucous membranes. In the usual form, commonly known as *chicken-pox*, the vesicles are superficial, with clear contents, and the disease is of short duration. It is sometimes followed by cicatrices, but usually not. A severer form, with deeper-seated or purulent efflorescences, is sometimes termed *swine-pox*. [G.] Cf. *V. lentiformis*, *V. coniformis*, and *V. globularis*. 2. See *VARIOLO MITIGATA*. 3. See *VARIOLOID*.—**Conoidal v.** See *V. coniformis*.—**Gangrenous v.** Lat., *v. gangrenosa*. V. characterized by gangrenous efflorescences. [G.] Cf. *VACCINIA gangrenosa*.—**Pustular umbilicated v.** See *VARIOLO VARICELLOIDES*.—**Pustular v.** See *VARIOLOID*.—**V. acuminata**. V. in which the vesicles are acuminate. [a, 34.]—**V. bullosa**. See *V. cellulosa*. See *VARIOLO VARICELLOIDES*.—**V. coniformis**, *V. conoides*, *Varicellæ duræ ovales*. Swine-pox; v. in which the vesicles are conical, seated upon inflamed bases with hard borders, and apt to be followed by scars. [G, 9, 11.]—**Varicellæ emphysematosæ**. Ger., *Windpocken*. V. in which the vesicles contain air. [G, 11.]—**V. globata**, *V. globularis*. Swine-pox, hives; v. in which the vesicles are rounded. They are larger than in *v. lentiformis*, but attended with less induration than in *v. coniformis*. [D, 1; G, 9.]—**V. hæmorrhagica**. V. attended with hæmorrhage into the vesicles. [G.]—**P. infantum**. See *V. (1st def.)*.—**V. lenticularis**, *V. lentiformis*, *Varicellæ lymphaticæ*. Ger., *Linsenpocke*. V. in which the efflorescences are lentiform, superficial, but slightly elevated, and not followed by scars. [G, 9.]—**V. ovalis**. V. in which the vesicles are oval. [a, 34.]—**V. papularis**. See *VARIOLO CORNEA* and *VARIOLO VERRUCOSA*.—**V. prurigo**. Of Hutchinson, an itching cutaneous eruption, consisting of papules, vesicles, and pustules, which sometimes follows v. and also vaccination. [<sup>1</sup> Brit. Med. Jour., 1875, i, pp. 631, 663, 702 (G).]—**V. pustularis**. V. in which the contents of the efflorescences are more or less purulent. [G, 7.]—**Varicellæ sine varicellis**. Of Wilson, varioloid without eruption. [G, 62.]—**V. solidescens**. See *VARIOLO CORNEA* and *VARIOLO VERRUCOSA*.—**V. syphilitica**. Variellaform syphiloderm (q. v.). When occurring in scattered efflorescences it is known as *V. syphilitica disseminata*; when confluent, as *V. syphilitica confluens* (see PEMPHIGUS *syphiliticus*). [G.]—**V. varioloides**. See *VARIOLOID*.—**Varicellæ ventosæ**. See *Varicellæ emphysematosæ*.—**Varicellæ verrucosæ**. See *VARIOLO VERRUCOSA*.—**V. vesicularis**. V. in which vesicles form with clear contents. [G, 7.]

**VARICELLE** (Fr.), n. Va<sup>3</sup>-re-se<sup>2</sup>l. See *VARICELLA*.—V. *à petites vésicules*. See *V.*—V. *à vésicules globuleuses*, *V. globuleuse proprement dite*. See *VARICELLA globata*.—V. *tronquée*. See *VARIOLOID*.

**VARICELLOID**, n. Va<sup>3</sup>r-i<sup>2</sup>-se<sup>2</sup>l<sup>2</sup>oid. See *ABORTIVE SMALL-POX*.

**VARICIFORM**, adj. Va<sup>3</sup>r-i<sup>2</sup>s-i<sup>2</sup>-fo<sup>2</sup>rm. From *varix* (q. v.), and *forma*, form. Like a varix. [a, 48.]

**VARICOBLEPHARON** (Lat.), n. n. Va<sup>3</sup>r(wa<sup>3</sup>r)-i<sup>2</sup>k-o(o<sup>3</sup>)-ble<sup>2</sup>t(a<sup>3</sup>r(a<sup>3</sup>r)-o<sup>3</sup>n. From *varix* (q. v.), and *βλεφάρων*, the eyelid. An old term for a varicose tumor or swelling of the eyelid. [F.]

**VARICOCELE** (Lat.), n. f. Va<sup>3</sup>r(wa<sup>3</sup>r)-i<sup>2</sup>k-o(o<sup>3</sup>)-sel(kal)/e(a); in Eng., va<sup>3</sup>r-i<sup>2</sup>k-o-sel. Gen., *-celæ*. From *varix* (q. v.), and *κῆλη*, a tumor. Fr., *varicocèle*. Ger., *V.*, *Krampfaderbruch*. An enlarged and tortuous condition of the veins of the pampiniform plexus. [a, 34.]—**Ovarian v.** Of Richet, a varicose enlargement of the veins of the broad ligament. [a, 34.]—**Utero-ovarian v.** V. in the female. [a, 34.]

**VARICOCELECTOMIE** (Fr.), n. Va<sup>3</sup>r-ek-o-sal-e<sup>2</sup>kt-om-e. Excision of a varicocele. [a, 34.]

**VARICOMPHALUS** (Lat.), n. m. Va<sup>3</sup>r(wa<sup>3</sup>r)-i<sup>2</sup>k-o<sup>2</sup>mf(a<sup>2</sup>l)(a<sup>2</sup>l)-u<sup>3</sup>s(u<sup>3</sup>s). From *varix* (q. v.), and *ὀμφαλός*, the navel. Fr., *varicomphale*. Ger., *Krampfadernebelbruch*. A varicose tumor at the navel. [E.] See also CAPUT *Medusæ*.

**VARICOSE**, adj. Va<sup>3</sup>r-i<sup>2</sup>k-os. Lat., *varicosus*. Fr., *variqueux*. Ger., *Krampfaderig*. Pertaining to a varix; of a vein, abnormally dilated. [a, 48.]

**VARICOSIS** (Lat.), n. f. Va<sup>3</sup>r(wa<sup>3</sup>r)-i<sup>2</sup>k-os-i<sup>2</sup>s. Gen., *-os-eos* (-osis). From *varix* (q. v.). A varicose state of the veins of a part.

**VARICOSITY**, n. Va<sup>3</sup>r-i<sup>2</sup>k-o<sup>2</sup>s-i<sup>2</sup>t-i<sup>2</sup>. Ger., *Varikosität*. See *VARIX* and *VARICOSIS*.

**VARICOTOMY**, n. Va<sup>3</sup>r-i<sup>2</sup>k-o<sup>2</sup>t/o<sup>2</sup>m-i<sup>2</sup>. From *varix* (q. v.), and *τομή*, a cutting. See *CIRSOTOMY*.

**VARICULA** (Lat.), n. f. Va<sup>3</sup>r(wa<sup>3</sup>r)-i<sup>2</sup>k/u<sup>2</sup>(u<sup>2</sup>l)-a<sup>3</sup>. Dim. of *varix* (q. v.). See *CIRSOPHTHALMA*.

**VARIETY SPRINGS**, n. pl. Va<sup>3</sup>r-i<sup>2</sup>e<sup>2</sup>t-i<sup>2</sup>. A place in Augusta County, Virginia, where there are gaseous springs. [Anderson (a, 14).]

**VARIKOSITÄT** (Ger.), n. Va<sup>3</sup>r-ek-oz-et-at'. See *VARICOSITY*.—*Nervenv'en*. The varicosities seen on the axis-fibrillæ of nerves, especially near their termination. [J.]

**VARIOLO** (Lat.), n. f. Va<sup>3</sup>r(wa<sup>3</sup>r)-i<sup>2</sup>(i<sup>2</sup>)/o<sup>2</sup>l-a<sup>3</sup>. Written also in the pl., *variola*. From *varius*, mottled. See *SMALL-POX*.—**Black v.** See *V. hæmorrhagica*.—**Congenital v.** V. of new-born children due to intra-uterine infection. The pustules are usually discrete; they do not develop as when exposed to the air, and form no crusts. It is usually fatal. [a, 34.]—**Emphysematous v.** V. in which the pustules contain gas. [D, 74.] Cf. *V. siliquosa*.—**False v.** See *VARICELLA*.—**Hæmorrhagic v.** See *V. hæmorrhagica* and *Variolæ sanguineæ*.—**Tuberculous v.** V. in which certain of the pustules take the form of cutaneous tubercles. [D, 74.]—**V. acutissima**. See *V. maligna*.—**V. amboinensis**. See *FRAMBESIA*.—**Variolæ anomale**. 1. V. complicated with other diseases. 2. V. characterized by an unusual or anomalous exanthem. [G.]—**V. apyretica**. V. of a very mild form, attended with little or no fever. [G.]—**V. Arabum**. V. of the Arabians.—**V. benigna**. V. of a mild type, and attended with a comparatively superficial eruption. [G.]—**Variolæ bullatæ**. V. lymphatica in which the efflorescences coalesce so as to form large bullæ. [G, 11.]—**V. coherens**. V. in which the efflorescences barely touch each other, or in which confluent pustules occur here and there in rows; intermediate between *v. discreta* and *v. confluens*. [D, 1; G, 11.]—**V. confluens**. Ger., *Fließpocken*. 1. V. in which the papules are small, less prominent than in the discrete form, and so numerous that even on the first appearance of the eruption there is hardly any distinct separation between them. They extend over the greater part of the body. [D, 1.] 2. V. in which the pustules form and run into each other; a variety that is often but not necessarily malignant. [G.]—**V. cornea**. Stone-pox, horn-pox; a variety of small-pox in which, in place of pustules, solid papular efflorescences appear upon the skin. [G.] Cf. *V. verrucosa*.—**V. corymbosa**. V. in which the efflorescences occur in groups or clusters; usually a severe form of the disease, and often fatal. [G.]—**V. cruenta**. See *V. hæmorrhagica*.—**Variolæ crystallinæ**. See *VARICELLA* and *V. lymphatica*.—**V. curta**. See *VARIOLOID*.—**Variolæ cuspidatæ**. V. the pustules of which are pointed or acuminate. [G, 11.]—**V. discreta**, *V. distincta*. V. in which the pustules remain distinct and separate. [G.]—**V. emphysematica**. See *Emphysematous v.*—**V. equina**. Fr., *eaux aux jambes*, *javart*. Ger., *Mauke*, *Fussrose*. (Pustular) grease, grease-pox, horse-pox; a contagious disease of horses, attended with fever and an erysipelatous or eczematous exanthem in the region of the pastern joint, furnishing a clear, yellowish, odorless, and greasy discharge, the hair falling out where the eruption appears. The disease is communicable to man, and is believed to be allied to cow-pox. [G.]—**V. gangrenosa**. See *Gangrenous SMALL-POX*.—**V. gastrica**. V. with gastric complications. [a, 34.]—**Variolæ hæmatoides**. See *Variolæ sanguineæ*.—**V. hæmorrhagica**. Ger., *schwarze Blattern*. V. (usually of a grave form) associated with hæmorrhages into the efflorescences, giving the pustules and crusts a blackish color. There is also a tendency to hæmorrhage from the mucous surfaces. [D, 1; G.] See also *Variolæ sanguineæ*, *V. maligna*, and *V. petechialis*.—**Variolæ hallitose** (seu *hybride*, *seu illegitimæ*). See *VARICELLA*.—**Variolæ inoculatorum**. V. of inoculators; said to be a modified v., which consisted in the appearance of a pustule here and there upon the hands of those who practiced small-pox inoculation or of such as were in the habit of handling children with v., or occurring in persons who had already had small-pox. [G, 11.]—**Variolæ institivæ**. V. acquired by inoculation. [G.]—**Variolæ irregulares**. V. that pursues an irregular course. [G, 11.]—**V. lymphatica**. V. in which the efflorescences are filled with clear lymph. [G, 11.]—**V. maligna**. Fr., *variole foudroyante*. Ger., *faufige Blattern*. A very severe and often fatal form of v., chiefly characterized by the presence of a hæmorrhagic tendency. The exanthem is marked by intense, diffuse redness and swelling of the skin, especially of the face, sometimes together with papular efflorescences or bloody vesicles, but without pustulation. Hæmorrhagic extravasations take place in the skin, forming deep-red maculæ or petechiæ, and severe hæmorrhages occur from the mucous orifices. [G.]—**Variolæ miliaris**. V. with pustules of about the size of a millet-seed or a little larger. [Plenck (G, 11).]—**V. mitigata**. A mild form of v. without severe fever, and with comparatively few efflorescences. [G, 7.]—**V. modificata**. See *VARIOLOID*.—**V. morbilli**. V. complicated with measles. [G.]—**Variolæ naturales**. V. acquired by accidental (natural) infection. [G, 11.]—**V. nigra**. See *V. hæmorrhagica* and *V. maligna*.—**Variolæ nothæ**. See *VARICELLA*.—**Variolæ ovine**. See *SHEEP-POX* (1st def.).—**V. petechi-**

**alls.** V. attended with hæmorrhagic efflorescences, either in the form of petechia in the interspaces between the pustules, or of bloody effusions within the pustules themselves, in consequence of which their contents become red. [D. 11.]—**Variolæ præcursæ.** V. in which one or more pustules appear several days before the fever or just at the beginning of the stage of invasion; by Plenck to indicate a favorable issue. [G. 11.]—**V. puerperalis.** Small-pox in a lying-in woman.—**Variolæ pustulæ.** See *V. pustulosa*.—**V. pusillæ** [Heberden]. See *VARI-CELLA*.—**V. pustulosa.** The ordinary form of v., characterized by a pustular exanthem. [G.]—**Variolæ regulares.** V. that pursues a regular course. [H. 11.]—**Variolæ sanguinæ.** V. hæmorrhagica with black pustules "containing and discharging blood, with a black, gangrenous base." [G. 11.]—**V. semiconfluens.** 1. V. in which the pustules partly coalesce. [G.] 2. V. confluent limited to a portion of the cutaneous surface. [D. 5.]—**V. serosa.** See *V. lymphatica*.—**V. siliquosa.** **Variolæ siliquosæ.** V. exhibiting pod-like vesicles, the contents having been absorbed. [G. 11.]—**V. silvatica.** **V. silvestris.** See *VARICELLA*.—**Variolæ simplices crystalline.** See *VARICELLA*.—**V. sine eruptione** (seu sine exanthemate). V. without eruption. [G.] Cf. *Variolous fever*.—**V. sine variolis.** V. without an eruption.—**V. spuria.** See *VARIOLID* and *VARICELLA*.—**Variolæ sulcæ.** See *SWINE-POX*.—**V. syphilitica.** See *Variolaform syphiloderma*.—**V. truncata.** See *VARIOLID*.—**V. tutoria.** See *VACCINIA*.—**Variolæ umbilicatæ.** V. the pustules of which are umbilicated. [G. 11.]—**V. vaccina atrophica.** Ger. *verkümmerte* (oder *warzige*) *Schutzpocken*, *Steinpocken*. Stone-pox; an abortive form of vaccinia in which the pock, instead of developing normally, forms only a papular or small vesicular efflorescence and soon dries, with the production of a small brownish-yellow scab resembling a wart, and is not followed by a scar. The contents of the vesicle may or may not be inoculable. [G.]—**V. vaccina bullosa.** Ger. *Blasenpocken*. Vaccinia characterized by the appearance at the site of inoculation, in place of the ordinary papular or vesicular efflorescences, of single bulles with watery contents which dry into crusts, are not further inoculable, and are not generally followed by scars, though sometimes deep ulcers form beneath the scabs, leaving deep cicatrices. [G.]—**Variolæ vaccinae** [Jenner]. See *VACCINIA* and *COW-POX*.—**V. vaccina erysipelatosæ.** Ger. *Vaccinio-Erysipel*, *Impferysipel*. Vaccinia complicated with erysipelas proceeding from the point of vaccination at the period of maturation and spreading, with pain, swelling, and redness, over the arm and sometimes on the body. [G.]—**V. vaccina furunculosa.** Ger. *Vaccinefurunkel*. A form of vaccinia in which, at the site of inoculation, a pea-sized red tubercle forms which suppurates and presents the appearance of a follicular furuncle, the contents of which are not inoculable, and which is not followed by a characteristic scar. [G.]—**V. vaccina herpetica.** Ger. *Ezeempocken*, *Krätzpocken*. Vaccinia in which, on the third day after vaccination, there appear at the point of inoculation a number of watery vesicles attended with itching, which leads to rubbing or scratching of the part and rupture of the vesicles, together with the development of a surrounding eczema. [G. 3.]—**V. vaccina pemphigodes.** See *V. vaccina bullosa*.—**V. vaccinosa.** See *VARIOLID*.—**V. vaccina ulcerosa.** Ger. *Vaccinengeschwür*. Vaccinia characterized by the appearance, at the seat of vaccination, of an ulcer believed to be due to the presence of some extraneous virus. It is often attended with constitutional disturbance. ["*Rem. méd.*," Nov. 27, 1889, p. 439 (a, 18); G.]—**V. varicelloides.** See *ABORTIVE SMALL-POX* and *VARIOLID*.—**V. vera.** Small-pox as distinguished from varioloid. [D.]—**V. verrucosa.** Wart-pox; a mild form of v. in which the efflorescences fail to develop fully, not passing the papular stage, and begin to subside after a few days. [G.] Cf. *Variolæ verrucosæ*.—**Variolæ verrucosæ.** V. attended with an eruption of "hard, pointed papule resembling atheromatous material." [G. 11.]—**Variolæ volatæ.** See *VARICELLA*.

**VARIOLAD**, n.  $Va^2r^1i^2o^1a^2d$ . One of the active or infectious elements or germs of small-pox virus. [Farr (a, 18).]

**VARIOLAR**, adj.  $Va^2r^1i^2o^1a^2r$ . Lat., *variolaris*. See *VARIOLATE* and *VARIOLOUS*.

**VARIOLARIA** (Lat.), n. f.  $Va^2r^1(wa^2r)^1i^2o^1a^2(a^2)^1r^1i^2a^2$ . Fr., *variolaire*. From *variola*, small-pox. A genus of lichens. The *Variolariaceæ* (*Variolarieæ*, *Variolariæ*) are a division of the *Idiothalamææ*. [a, 35.]—**V. amara.** A species used as an anthelmintic and febrifuge. [a, 35.]

**VARIOLARYNGITE** (Fr.), n.  $Va^2r^1e-o-la^2-ra^2n^2-zhet$ . Laryngitis due to variola. [L, 41 (a, 14).]

**VARIOLATE**, adj.  $Va^2r^1o^1l-at$ . Lat., *variolatus*. Having markings resembling the pits of small-pox. [a, 35.]

**VARIOLATION**, n.  $Va^2r^1i^2o^1a^2-shu^2n$ . From *variola*, small-pox. Ger., *Blatterbelzen*. The act of communicating variola. [D. 1.]—**Artificial v.** V. by inoculation. [D. 1.]

**VARIOLATED**, adj.  $Va^2r^1i^2o^1a^2-at-o^1l$ . Lat., *variolatus*. Fr., *variolé*. 1. Affected or inoculated with variola. 2. Pock-marked.

**VARIOLE** (Fr.), n.  $Va^2-re-ol$ . See *VARIOLA*.—**V. adultérine.** **V. bâtarde.** See *VARIOLID*.—**V. des vaches.** See *COW-POX*.—**V. foudroyante.** See *VARIOLA maligna*.—**V. petite volante.** See *VARICELLA*.

**VARIOLETTE** (Fr.), n.  $Va^2-re-o-le^2t$ . See *VARICELLA*.

**VARIOLI** (Lat.), n. m. pl.  $Va^2r^1(wa^2r)^1i^2o^1l-i^2e$ . An old term for variola. [G.]

**VARIOLIC**, adj.  $Va^2r^1i^2o^1l-i^2c$ . Lat., *variolicus*. Fr., *varioloque*. 1. Variolous. 2. Pocky.

**VARIOLIFORMIS** (Lat.), adj.  $Va^2r^1(wa^2r)^1i^2o^1l-i^2o^1rm^1i^2s$ . From *variola* (g. v.) and *forma*, form. Fr., *varioliforme*. Having the appearance of small-pox.

**VARIOLINE**, n.  $Va^2r^1i^2o^1l-en$ . Lat., *variolinum*. Ger., *Pockengift*, *Blattergift*. The specific virus of small-pox. [G.]

**VARIOLOID**, adj.  $Va^2r^1i^2o^1l-oid$ . Lat., *varioloïdes* (from *variola*, small-pox, and *êdos*, resemblance). Fr., *varioloïde*. Ger., v. Resembling variola; pertaining to the disease v.; as a n. (Lat., *varioloïdes*, *variolois*, *variella*, *varioloïda*; Ger., *V.*, *Mittel-pocken*), small-pox modified by recent vaccination or by a previous attack of variola. It is usually milder in character and of shorter duration than ordinary variola, and the exanthem is apt to be less extensive and each efflorescence more superficial. [G.]

**VARIOLOIS** (Lat.), n. f.  $Va^2r^1(wa^2r)^1i^2o^1l-i^2s$ . Gen., *-loïdos* (-idis). From *variola* (g. v.). 1. Variola mitigata. 2. Varioloid. [G.]—**V. fimbriata.** See *CRASPEDECPHLOGIOIS*.

**VARIOLOUS**, adj.  $Va^2r^1i^2o^1l-u^2s$ . Lat., *variolosus*. Fr., *varioloex*. Ger., *variölös*. Of the nature of or pertaining to variola. [G.]

**VARIQUEUX** (Fr.), adj.  $Va^2-re-ku^2$ . See *VARICOSE*.

**VARIX** (Lat.), n. m. and f.  $Var^1(wa^2r)^1ix$ . Gen., *varicis*. From *varus*, bent awry. Fr., *varice*. Ger., *Aderbruch*, *Adergeschwulst*, *Aderknoten*, *Aderkropf*, *Blutadergeschwulst*, *Krampfader*. A morbid dilatation of a vein; a varicosity. [C.]—**Aneurysmal v.** Fr., *anérysme de Pott* (ou par *érosion*). A direct communication between an artery and a varicose vein, without any intervening sac. See also *Varicose ANEURYSM* and *ANEURYSM by anastomosis*.—**Arterial v.** A cirroid aneurysm, especially one composed of a single dilated and tortuous artery. [E.]—**Lymphatic v.** V. of the lymphatic vessels. [a, 34.]—**Varices arteriarum.** See *GEMMULE Hobokenii*.—**Varices gelatinosæ.** Ger., *Sulzknoten*. Nodular accumulations of the gelatinous matter of the umbilical cord. [A, 112.]

**VARUS** (Lat.), adj.  $Var^1(wa^2r)^1u^2s(u^2s)$ . Bent awry, knock-kneed; as a n., see *TALIPES v.*

**VARUS** (Lat.), n. m.  $Var^1(wa^2r)^1u^2s(u^2s)$ . 1. An old term for acne. 2. See *TALIPES v.*—**Equino-v.** See *EQUINO-v.*—**V. comedo.** *Acne punctata*. [G.]—**V. disseminatus.** *Acne disseminata*. [G.]—**V. équín** (Fr.). See *EQUINO-v.*—**V. frontalis.** See *MILIUM* (1st def.).—**V. gutta rosea.** See *ROSACEA*.—**V. hordeolatus.** Fr., v. *orgéol*. See *HORDEOLUM*.—**V. mentagra.** See *SYCOsis*.—**V. miliaris.** See *MILIUM* (1st def.).—**V. punctatus.** See *ACNE punctata*.—**V. sebaceus.** See *SEBORRHEA* and *ACNE punctata*.

**VAS** (Lat.), n. n.  $Va^2s(wa^2s)$ . Gen., *va^2sis*. Gr., *ἀγγειον*. See *VESSEL*.—**V. aberrans.** A vessel following an anomalous course or occupying an anomalous position. [L.]—**V. aberrans Halleri.** A long convoluted tube connected with the lower part of the canal of the epididymis or with the v. deferens. It has a blind extremity which lies in the lower part of the spermatic cord. [L, 31, 115, 142.]—**V. aberrans inferius.** A v. aberrans springing from the head of the epididymis. [L, 332.]—**V. aberrans superius.** See *V. aberrans Halleri*.—**Vasa aberrantia bilifera.** Biliary ducts in the triangular ligament of the liver, in its transverse fissure, and in other parts adjacent to the liver; commonly regarded as ducts of atrophied hepatic tissue, by some regarded as blood-vessels or lymphatic vessels. [L, 31.]—**Vasa aberrantia media.** *Vasa aberrantia* lying along the middle of the epididymis. [L.]—**Vasa aberrantia testis.** Certain convoluted vessels hanging free from the general substance of the epididymis, but communicating with its main tube, supposed to be vestiges of one or more of the tubes of the mesonephros. [A, 5.]—**V. afferens glomeruli.** The artery leading to a glomerulus of the kidney. [L.]—**Vasa afferentia.** Vessels conveying blood to a part. [L.]—**Vasa afferentia of the Malpighian corpuscles.** Branches of the interlobular arteries of the kidney from which the glomeruli are formed. [L, 31, 142.]—**Vasa annularia.** Ger., *ringförmige Gefässe*. In botany, those vessels whose membrane is thickened by successive cross-rings. [L, 49 (a, 14).]—**V. capillare.** See *CAPILLARY* (3d def.).—**Vasa caprocularia.** The arteries and veins of the spermatic cord. [A, 301, 322, 325.]—**Vasa centralia retinae.** The central artery and veins of the retina. [L.]—**Vasa chylifera.** See *CHYLIFEROUS VESSELS*.—**Vasa ciliaria.** The ciliary arteries and veins. [L.]—**V. deferens.** Fr., *canal déférent*. Ger., *Samenleiter*. The excretory duct of the testicle, a tube about 2 feet long, the upward continuation of the canal of the epididymis. From the globus minor it passes up in the spermatic cord to the inguinal canal, through which it enters the abdominal cavity. Here it runs beneath the peritoneum across the external iliac vessels to the side of the bladder, where it curves backward and downward to the base of the prostate gland and unites with the duct from the seminal vesicle to form the ejaculatory duct. [L, 31, 142, 332.]—**V. deferens mulleris.** See *OVIDUCT*.—**V. efferens glomeruli.** The efferent vein from a glomerulus of the kidney. [L.]—**Vasa efferentia corporis Malpighii.** The venous twigs which emerge from the glomeruli of the kidney and form a dense network over the walls of the uriniferous tubules. [L.]—**Vasa efferentia testis.** Canals which continue those of the rete vasculosum, pierce the tunica albuginea beneath the globus major, form the coni vasculosi, and empty into the canal of the epididymis. [L, 31, 142, 332.]—**V. epididymidis.** See *CANAL of the epididymis*.—**V. hæmorrhoidale.** See *HÆMORRHOID*.—**V. Halleri.** See *V. aberrans Halleri*.—**Vasa hepatis interlobularia.** The interlobular veins of the liver. [L.]—**Vasa inferentia.** See *Vasa afferentia*.—**Vasa intestinalis tenuis.** Small intestinal branches of the mesenteric arteries. [a, 34.]—**Vasa lactea.** See *CHYLIFEROUS VESSELS*.—**Vasa lymphatica.** The lymphatics.—**V. mammarium internum.** See *Internal mammary ARTERY*.—**Vasa omphalomesenterica.** The omphalo-mesenteric arteries and veins. [L.]—**Vasa plasmatica.** See *SEROUS CANALICULI*.—**Vasa propria.** Of Mohl, soft, thin-walled cells constituting typical parenchyma. [a, 35.]—**Vasa propria of the fetus.** Of Jungbluth, certain vessels (not observed by any one else) which form a capillary network in the chorion up to the middle of gestation. ["*Arch. f. Gyn.*" iv, p. 554 (a, 34).]—**Vasa recta (of the kidney).** Veins which collect the

blood from the substance of the medulla and pass upward to join the arches at the bases of the pyramids. [C.]—**V. resorbens**. See **LYMPHATIC** (1st def.).—**V. sanguiferum**, **V. sanguineum**. A blood-vessel.—**Vasa sedalia**. Of Willis, the hemorrhoidal veins.—**Vasa serosa**. See **SEROUS CANALICULI**.—**V. serpentinum testis**. See **CONVOLUTED TUBULE**.—**Vasa spermatica externa**. See **UTERINE ARTERIES**.—**Vasa spermatica interna**. The blood-vessels and lymphatics which enter the substance of the testicle at its posterior edge. [L.]—**Vasa spermatica præparantia**. The small blood-vessels of the testicle. [L. 349 (a, 34).]—**V. spermaticum**. See **V. deferens**.—**Vasa umbilicalia**. The umbilical arteries and veins.—**Vasa vasorum**. Small arteries and veins which supply blood to and return it from the coats of arteries, lymphatics, and veins. [L.]—**Vasa vorticosa**. Fr., *vaisseaux tourbillonnés, tourbillons vasculaires*. Ger., *Wirbelvenen, büschelförmige Gefässe*. The whorl-like arrangement of the veins of the choroid just before they unite into the short, straight trunks which perforate the sclera obliquely to empty into the ophthalmic vein. [F.]

**VASAL**, adj. Va'sal. See **VASCULAR**.

**VASCOA** (Lat.), n. f. Va'sko-a. Fr., *v.* A genus of the *Leguminosæ*. [a, 35].—**V. amplexicaulis**. The licorice-bush of southern Africa. The roots are demulcent. [a, 35].—**V. perfoliata**. A Cape-of-Good-Hope species. The root is diuretic. [a, 35].

**VASCULAR**, adj. Va'sk-u'al-a'r. Lat., *vascularis, vascularis* (from *vasculum* [q. v.]). Fr., *vasculaire, vasculeux*. Ger., *gefäßreich, gefäßig, vasculös*. Having vessels; richly supplied with blood-vessels; pertaining to the circulatory system. The *Vasculares* of Lindley are a class of plants consisting of the *Exogæne* and *Endogæne*. [a, 35].

**VASCULARITY**, n. Va'sk-u'al-a'r-i'ti. Fr., *vascularité*. Ger., *Vascularität, Gefäßreichtum*. The state of being vascular.

**VASCULO-MOTOR**, adj. Va'sk'u'e'l-o-mot'o'r. Lat., *vasculo-motorius*. See **VASO-MOTOR**.

**VASCULOSE**, adj. Va'sk'u'e'l-os. Lat., *vasculosus*. Fr., *v.* See **VASCULAR**; as a n., of Frémy, the ground substance of the vessels of plants. [B, 93 (a, 14).]

**VASCULUM** (Lat.), n. n. Va'sk(wa'sk)u'al(u'l)-u'm(u'm). Dim. of *vas*, a vessel. 1. A vessel, especially a small vessel. [a, 48.] 2. A pitcher-shaped leaf. 3. A case used by botanists for freshly gathered specimens. [a, 35].—**V. aberrans Halleri** (seu *testis*). See **VAS aberrans Halleri**.—**V. testium**. See **SCROTUM**.

**VASELINE**, n. Va's'e'l-en. Lat., *vaselinum*. Fr., *v.* Ger., *Vaselin*. 1. Petroleum ointment; a commercial product for which the official petrolatum (q. v.) is intended as a substitute. [B.] 2. See **UNGUENTUM PARAFFINI**.—**White v.** V. that is freed from volatile products by simmering over a water-bath and then filtered repeatedly through charcoal until it is opal-white. [a, 34.]

**VASIFACTIVE**, adj. Vas-i'fa-kt'i'v. From *vas*, a vessel, and *facere*, to make. See **ANGIOPLASTIC**.

**VASIFORM**, adj. Va's'i'fo'rm. Resembling a duct. [a, 35.]

**VASO-CONSTRICTOR**, n. Vas'o-o-ko'n-stri'kt'o'r. A nerve the action of which is to constrict blood-vessels.

**VASODENTIN**, n. Vas-o-de'n'tin. Fr., *vaso-dentine*. Ger., *V.* A variety of dentin which contains blood-vessels. [L.]

**VASO-DILATOR**, adj. Vas-o-di-lat'o'r. From *vas*, a vessel, and *dilatare*, to dilate. Fr., *vaso-dilatateur*. Ger., *vasodilatatorisch, gefäßverweiternd*. Causing active dilatation of the smaller arteries (said of certain nerves and drugs). [K.]

**VASO-FORMATIVE**, adj. Vas-o-f'o'rm-a'ti'v. From *vas*, a vessel, and *formare*, to form. Fr., *v.f.*, *vaso-formateur*. Ger., *vaso-formativ*. See **HÆMATOPOIETIC** (2d def.).

**VASO-INHIBITORY**, adj. Vas-o-i'n-hi'b'i'to'r-i'v. Producing or causing inhibition of the action of the vaso-motor nerves. [Landois (a, 34).]

**VASO-MOTOR**, adj. Vas-o-mot'o'r. Fr., *vaso-moteur, vasculo-moteur*. Ger., *vaso-motorisch*. Causing constriction of the smaller arteries; pertaining to or constituting nerves or drugs so acting. [K, 9.]

**VASO-MOTRICITÉ** (Fr.), n. Va'so-mo-tre-se-ta. The property possessed by blood-vessels of varying their calibres through the influence of the vaso-motor and vaso-inhibitory nerves. ["Sem. méd.," Oct. 9, p. 381 (a, 18).]

**VASONEUROSE** (Ger.), n. Va'so-zo-noir-oz'e. See **ANGIONEUROSTIS**.

**VASO-SENSITIF** (Fr.), adj. Va'so-sa'n'i'te-se-tef. Pertaining to sensation and circulation (said of the nerves of blood-vessels). [A, 301 (a, 34).]

**VASTUS** (Lat.), adj. Va'st(wa'st)u's(u's). Of large size, immense; as a n., the v. externus and v. internus regarded as one muscle. [L.]—**V. anterior**. See **CRURÆUS**.—**V. externus**. Ger., (*düsserer*) *Unterschenkelstrecker*. A muscle arising from the outer surface and base of the great trochanter, the line between this and the linea aspera, and the upper half of the outer border of the linea aspera. It passes down the outer and anterior surfaces of the thigh to be inserted into the tendon of the rectus femoris and the upper and outer margins of the patella. [L. 31, 142, 332.]—**V. internus**. Ger., *innerer dicker Schenkelmuskel*. A part of the quadriceps extensor cruris arising from the inner lip of the linea aspera of the femur. After blending with the cruræus and the tendon of the rectus femoris, it is inserted into the inner margin of the upper half of the patella. [L.]—**V. lateralis** [Ger. Anat. Soc.]. See **V. externus**.—**V. longus**. See **ISCHIOTIBIALIS externus**.—**V. medialis** [Ger. Anat. Soc.]. See **V. internus**.—**V. medius**. See **CRURÆUS**.

**VATAIREA** (Lat.), n. f. Va't-a'r'e-a. Fr., *vatairée*. A genus of the *Leguminosæ*. [a, 35].—**V. guianensis**. A Guiana tree. The seeds (Fr., *graines à dardres*) are used in skin diseases. [a, 35.]

**VATERIA** (Lat.), n. f. Va't-e'r-i'a. From *Vater*, a German botanist. Fr., *vatérie*. A genus of tropical Asiatic trees. The *Vateriæ* are a suborder of the *Dipterocarpeæ*. [a, 35].—**V. acuminata**. A Ceylon tree yielding East Indian dammar. [a, 35].—**V. indica**. 1. See *V. acuminata*. 2. Of Roxburgh, a species which is the source of Indian copal. The seeds contain an aromatic fat used in rheumatism, etc. The astringent bark is used to retard fermentation in making jaggery from toddy. [a, 35].—**V. malabarica**. See *V. indica* (2d def.).

**VATICINATIO** (Lat.), n. f. Va't(wa'st)-i'z'e(i'k)-i'n-a(a')shi'z-ti'z-o. Gen., *-on'is*. From *vaticinari*, to foretell. Propheying. [D, 18].—**V. morientium**. The last words of the dying. [D, 3.] Cf. **ECSTASY**.

**VAUGNIÈRES** (Fr.), n. Von-ye-e'r. A place in the department of the Drôme, France, where there is a gaseous and chalybeate spring. [L, 49 (a, 14).]

**VAULT**, n. Va'lt. See **FORNIX**.—**V. of the cranium**. The upper curved portion of the cranium. [L.]—**V. of the vagina**. Lat., *fornix* (seu *fundus*) *vaginae*. Fr., *fond du vagin*. Ger., *Scheidengewölbe, Scheidengrund*. The upper portion of the vagina, forming, when the passage is distended, a v.-like structure surrounding the neck of the uterus.

**VAUQUELINE** (Fr.), n. Vok-len. An old term for strychnine. [B, 93, 93 (a, 14).]

**VAYSONIER** (Fr.), n. Va's-e-zo-ne-a. A porous vessel used for the transport of leeches; so named from Vayson, the inventor. [B, 93 (a, 14).]

**VEAU** (Fr.), n. Vo. A calf; also veal.—**Gélée de v. médicinale**. See *Calf's-foot JELLY*.—**Suif de v.** Veal suet. [B.]

**VECORDIA** (Lat.), n. f. Ve(wa)-ko'r'd-i'z-a. From *vecors*, destitute of reason. Of Kahlbaum, a mild form of insanity occurring mostly at the time of puberty. [A, 319.]—**V. diastrophia**. See **DIASTROPHIA**.

**VECTIS** (Lat.), n. m. Ve'kt(w'e'kt)-i'z. Gen., *vect'is*. From *vehere*, to carry. Fr., *levier*. Ger., *Hebel*. 1. A lever; in obstetrics, an instrument, usually shaped like one of the blades of an obstetrical forceps, but with only the cephalic curve, used as a lever or tractor. It was probably invented by one of the Chamberlens. [A, 15.] 2. See **LEMNISCUS** (2d def.).—**Baudelocque's v.**

A VECTIS.

A v. having a strong, large handle, and a shaft that is curved at its extremity and expanded into a fillet. [A, 15 (a, 34).]—**Boddaert's v.** A v. having a wooden handle holding a shaft that has a double curve: the shaft is concave from side to side, and scoop-shaped at its extremity. [A, 15 (a, 34).]—**Hubert's v.** A v. invented by the younger Hubert, of Louvain; used with a fillet. [A, 15.]—**Roonhuysen's v.** A v. supposed to be the original form, secretly sold to Roonhuysen by one of the Chamberlens. [A, 15.]—**V. elevatorius**. See **BONE-ELEVATOR**.—**V. triplodes**. See **TRIPLOD ELEVATOR**.—**Veradini's v.** A v. having a handle like a lithotrite, the shaft being long, concave, curved, and fenestrated. [A, 15 (a, 34).]

**VEGETABLE**, adj. Ve'j'e't-a'b'l. Lat., *vegetabilis* (from *vegetare*, to quicken). Fr., *végétal*. Ger., *vegetabilisch, pflanzlich*. Pertaining to or of the nature of plants; as a n., a plant, especially an esculent plant or the esculent portion of a plant. [a, 35.]

**VEGETARIAN**, n. Ve'j'e't-a'r-i'z. n. Ger., *Vegetarianer*. A person who subsists exclusively on vegetable food. [L, 80, 57 (a, 14).]

**VEGETARIANISM**, n. Ve'j'e't-a'r-i'z-n-i'z'm. Lat., *vegetarianismus*. Fr., *végétarisme*. The practice of living exclusively on vegetable food; also the doctrine that this is the only kind of food proper for man. [a, 48.]

**VEGETATIO** (Lat.), n. f. Ve'j(w'e'j)-e't-a(a')shi'z-ti'z-o. Gen., *-on'is*. See **VEGETATION**.—**Vegetationes globulosæ cordis**. Globular fibrinous vegetations found in the heart. [a, 34.]

**VEGETATION**, n. Ve'j'e't-a'shu'n. Lat., *vegetatio* (from *vegetare*, to quicken). Fr., *végétation*. Ger., *V., Wachstum* (3d def.). 1. The vital processes (absorption, circulation, exhalation, assimilation, etc.) on which the life and growth of a plant depend. 2. Plants in general. [a, 35.] 3. A growth or deposit upon some portion of the body of a substance or tissue foreign to that part; especially a condyloma acuminatum. [D.]—**Adenoid v's of the naso-pharynx**. V's resulting from excessive growth (due to chronic inflammation) of the adenoid or cytogenous tissue contained in the stroma of the mucous membrane lining the nasopharyngeal cavity. These v's are comb-like, tongue-shaped, or globular, and are mostly found on the superior pharyngeal wall, but often extend forward into the posterior nares. [F.]—**Dermal v.** See **CONDYLOMA acuminatum**.—**Digital v's**. Prominent villous v's. [A, 42.]—**Fibrinous v's**. Small or large semi-transparent or opaque grayish or grayish-yellow wart-like bodies, projecting from a serous surface, especially the pleura and pericardium. When separated from their base they leave a rough, slightly projecting surface. [a, 34.]—**Travelled heart v.** See **EMBOLUS** (2d def.).—**Umbilical v.** See **FUNGUS EXCRESCENCE of the umbilicus**.—**Urethral v's**. See **URETHRAL PAPILLOMA**.

**VEGETATIVE**, adj. *Ve2j'e2t-at-i2v*. Lat., *vegetativus*. Fr., *végétatif*. Ger., *vegetativ*. 1. Pertaining to a vegetable. 2. Pertaining to growth, nutritive. [K.]

**VEGETO-ALKALOID**, n. *Ve2j'i'e2t-o-a2l'k'a2l-oid*. A vegetable alkaloid. [B.]

**VEGETUS** (Lat.), adj. *Ve2j'(we2g)-e2t-u2s(u4s)*. Ger., *frisch, grünbleibend*. Remaining green, not withering. [a, 35.]

**VEHICLE**, n. *Ve'i2-k'l*. Lat., *vehiculum* (from *vehere*, to bear). Fr., *véhicule*. Ger., *Bindemittel, Vehikel*. A liquid or solid excipient. [B, 93 (a, 14).]

**VEIL**, n. Val. Lat., *velum*. Fr., *voile*. Ger., *Schlier*. 1. A cloth or similar fabric used as a covering. [a, 48.] 2. In botany, the partial covering of the stem or margin of the pileus of *Fungi*, also the indusium of ferns. [a, 35.]—**Uterine v.** Lat., *pessarum occlusivum*. A cap for the cervix uteri, used to prevent conception.

**VEILCHEN** (Ger.), n. *Fil'ch'e2n*. See *VIOLA* (1st def.).—**Ackerv.**, *Dreifarbige V.* See *VIOLA tricolor* (1st def.).—**Hundsv.** See *VIOLA canina*.—**Mürzv.** See *VIOLA odorata*.—**V'campher**. See *IRIS camphor*.—**V'syrup**. Syrup of the flowers of *Viola odorata*. [B, 108 (a, 14).]—**V'wurzel**. See *IRIS florentina* (3d def.).

**VEIN**, n. Van. Gr., *φλέψ*. Lat., *vena*. Fr., *veine*. Ger., *Ader, Blutader, Vene*. 1. A vessel the function of which is to convey blood toward the heart. [a, 48.] 2. A rib or nerve of an insect's wing. [L, 206 (a, 27).] 3. A distinct thread-like structure in a plant-organ, especially one of a group of branching threads. [a, 35, 48.]—**Accessory portal v's.** Of Sappey, small v's from the areolar tissue and peritoneal folds around the liver, emptying into the portal v. [C.]—**Acromio-thoracic v.** A v. accompanying the artery of like name, and emptying into the axillary v. [C.]—**Adipose v's.** Lat., *adiposæ venæ*. Ger., *Fettvenen*. Branches of the emulgent v's arising in the fat around the kidneys. [A, 343.]—**Alar thoracic v.** A branch of the axillary v. accompanying the alar thoracic artery. [C.]—**Anastomotic v. of Trolard**. See *VENA communicans magna*.—**Angular v.** A v. formed by the union of the supra-orbital, frontal, superior palpebral, and nasal v's, emptying into the facial v. [C.]—**Annular v.** See *VENA metacarpa uharis*.—**Anterior auricular v.** A small v. emptying into the temporo-maxillary v. [F.]—**Anterior cardiac v's.** Lat., *venæ cordis minores*. Ger., *vordere Kranzblutadern des Herzens*. Two or three v's on the front of the right auricle and the right border of the heart, emptying separately into the auricle. [C.]—**Anterior ciliary v's.** Ger., *vordere Blendungsblutadern*. V's accompanying the anterior ciliary arteries which empty into the ophthalmic v. [L.]—**Anterior cutaneous v. of the neck**. See *Anterior jugular v.*—**Anterior ethmoidal v.** A v. accompanying the anterior ethmoidal artery, and emptying into the ophthalmic v. [C.]—**Anterior facial v.** See *Facial v.*—**Anterior intercostal v's.** Small offshoots of the internal mammary v. which accompany the arteries of like name. [L.]—**Anterior internal maxillary v.** See *Deep facial v.*—**Anterior jugular v.** Ger., *vordere oberflächliche Halsvene*. A v. formed by branches from the submaxillary region, the lower lip, and the chin, and ending in the external jugular v. or in the subclavian v. [C.]—**Anterior longitudinal spinal v's.** Lat., *venæ spinales longitudinales*. Two plexiform v's which extend along the whole spinal canal in front of the cord and connect above with the basilar sinus. [C.]—**Anterior mediastinal v's.** Lat., *venæ mediastinæ anteriores*. Branches of the innominate v. from the anterior mediastinal space. [L, 332.]—**Anterior temporal v.** A v. running from the diploe of the frontal and temporal bones, and emptying into one of the branches of the temporal v. [L.]—**Anterior tibial v.** Lat., *vena poplitea anterior*. A v. corresponding to the artery of like name; it empties into the popliteal v. [C.]—**Anterior ulnar cutaneous v.** A v. which ascends from the anterior surface of the wrist and unites below the bend of the elbow with the posterior ulnar cutaneous v. to form the common ulnar cutaneous v. [L.]—**Anterior ulnar v.** A v. which returns the blood from the dorsal plexus of the hand to the posterior ulnar v. or the median basilic v. [C.]—**Anterior vertebral v.** Lat., *vena cervicalis ascendens*. A v. arising from a plexus over the cervical vertebrae, receiving branches from the prevertebral and scaleni muscles, and emptying into the inferior end of the vertebral v. [C.]—**Anterior vitelline v.** Lat., *vena vitellina anterior, vena omphalomesenterica anterior*. Ger., *vordere Dottervene*. The v. (often two v's) by which the sinus terminalis of the primitive embryonic circulation empties into the posterior vitelline v. [A, 8.]—**Articular v.** A v. that returns blood from the structures of a joint. [a, 34.]—**Ascending cervical v.** See *Anterior vertebral v.*—**Ascending lumbar v.** A v. formed by a series of vertical communications between the lumbar v's, and also connecting the lateral sacral, ilio-lumbar, and common iliac v's. It empties into the azygos v. of its side. [C.]—**Auditory v's, Auricular v's.** Ger., *Gehörblutadern*. See *VENÆ auditivæ internæ* and *Deep auricular v's.*—**Axillary v.** Lat., *vena axillaris*. Ger., *Achselvene*. A v. that returns the blood from the arm. It is a continuation of the basilic v., and extends from the lower border of the teres major muscle to the outer margin of the first rib. It receives the brachial, cephalic, circumflex, subscapular, long thoracic, acromio-thoracic, and superior thoracic v's. [C.]—**Azygos v.** See *Large azygos v.*, *Left upper azygos v.*, and *Small azygos v.*—**Basilar v.** Lat., *vena basilaris*. A branch of the v. of Galen from the choroid plexus and the base of the brain in the vicinity of the inner side of the crus cerebri. [C, L.]—**Basilic v.** Ger., *Ellenbogenhautphthalader*. A v. formed by the union of the median basilic and posterior ulnar cutaneous v's; continuous with the axillary v. [C.]—**Basivertebral v's.** Ger., *Wirbelkeiferblutadern*. Small v's, reduced to their intima, which ramify in the bodies of the vertebrae and empty into the anterior longitudinal spinal v's. [L, 332.]—**Branchial v's.** V's, one on each side of the brachial artery, which follow its branches and empty into the axillary v. at the lower border of the subscapularis. [L.]—**Brachio-cephalic v.** See *In-*

*nominate v's.*—**Branchial v's.** The vessels that return the blood from the branchial arches. [L.]—**Bronchial v's.** Small v's receiving the blood from the nutrient arteries of the lungs and bronchial tubes. They empty into the large azygos v. on the right side, and into the upper azygos v. on the left side. [L.]—**Buccal v's.** Ger., *Mundblutadern*. V's returning the blood from the buccal muscles and emptying into the facial v. [C.]—**Capsular v's.** Lat., *venæ adheventes capsulares* (2d def.). 1. See *Suprarenal v's*. 2. Branches of the portal v. which return the blood from the capsule of the liver. [L, 142.]—**Cardiac v's.** Ger., *Herzvenen*. V's from the tissue of the heart. [L.]—**Cardinal v's.** Lat., *venæ cardinales*. The foetal v's which return the blood from the mesonephros, the vertebral column, and the parietes of the trunk. Their inferior portions afterward become the internal iliac v's; above the latter they become obliterated for the most part. [A, 5.]—**Central v's (of the liver).** See *Intralobular v's of the liver*.—**Central v. of the retina.** Lat., *vena retina centralis*. A branch of the superior ophthalmic v. which returns the blood from the tissues supplied by the branches of the central artery of the retina. [L.]—**Central v's of the spinal cord.** Two v's, one on each side, in the substantia gelatinosa centralis of the spinal cord, which terminate at the upper and lower ends of the cord in a number of small branches. [L, 332.]—**Cephalic v.** A v. formed by the union of the median cephalic and radial cutaneous v's, which passes up along the outer border of the biceps brachii to empty into the axillary v. [L.]—**Cerebral v's.** Ger., *Gehirnvenen*. V's divided into two sets—those which return the blood from the surface of the brain, and those which return it from the ventricles. [L.]—**Choroid v.** Lat., *vena chorioidea (lateralis)*. A v. which returns the blood from the lateral ventricle and choroid plexus, and unites with the vena corporis striati to form the v. of Galen. [L, 332.]—**Ciliary v's.** Ger., *Blendungsblutadern*. V's which usually extend from the chorio-capillaris in a radiate direction through the choroid, and form the vasa vorticosa, five or six in number, which perforate the sclera obliquely at or just behind the equator of the eye, pass into the orbit, and empty into the ophthalmic v. [F.]—**Circumflex iliac v.** Ger., *umgeschlagene Hüftblutader*. A v. receiving the blood from the circumflex iliac artery and emptying into the external iliac v. [L.]—**Circumflex v's.** V's accompanying the circumflex arteries. [L.]—**Circumflex v's of Kohlrausch.** See *VENÆ circumflexæ penis*.—**Circumflex v's of the arm.** Branches of the axillary v. returning the blood from the distribution of the anterior and posterior circumflex arteries of the arm. [L.]—**Common facial v.** Ger., *gemeinschaftliche Gesichtsbloodader*. A v. formed by the union of the facial and temporal v's, emptying into the internal jugular v. [L.]—**Common iliac v.** Lat., *vena iliaca communis*. Ger., *gemeinschaftliche Hüftblutader, Hüftvene*. A v. formed by the union of the external and internal iliac v's. It extends from the sacro-iliac synchondrosis to about the junction of the fourth and fifth lumbar vertebrae, and unites with its fellow to form the inferior vena cava. [L.]—**Common jugular v.** 1. The portion of the internal jugular v. below the entrance of the common facial v. 2. Of the older authors, the innominate v. 3. The internal jugular v. [L.]—**Common pudic v.** Ger., *gemeinschaftliche Schamblutader*. See *Internal pudic v.*—**Common ulnar cutaneous v.** A v. formed by the union of the anterior and posterior ulnar cutaneous v's, which joins the median basilic v. at the bend of the elbow. [L, 142.]—**Common vitelline v.** See *MEATTS venosus*.—**Condylar emissary v.** See *EMISSARIUM occipitale inferius*.—**Coronary v.** See *Large coronary v.*—**Coronary v. of the placenta.** Lat., *vena coronaria placenta*. Ger., *grosses Randgefäß*. A v. which courses along the border of the placenta for more or less of its extent, gathers its blood from radicles in the substance of the placenta, and returns it to the maternal organism by channels leading to the v's of the uterus. [A, 61.]—**Coronary v. of the stomach.** Lat., *vena coronaria ventriculi*. Ger., *obere Magenblutader*. A v. which runs parallel to the coronary artery and empties into the portal v. [L.]—**Costal v.** A v. proceeding from the midrib of a leaf. [a, 35.]—**Crural v.** See *Femoral v.*—**Cystic v.** See *VENA cystica*.—**Deep auricular v's.** V's which return the blood from a portion of the auricle and empty into the

THE SUPERFICIAL VEINS OF THE HEAD, FACE, AND NECK.

1, the frontal vein; 2, the supra-orbital vein; 3, 3', the nasal veins; 4, the transverse vein of the face; 5, the facial vein; 6, the anterior terminal branch of the temporal vein; 7, the internal jugular vein; 8, the anterior jugular vein; 9, 14, the external jugular vein; 10, the subclavian vein; 11, the middle temporal vein; 11', 12, the temporal vein; 13, the occipital vein.

side, in the substantia gelatinosa centralis of the spinal cord, which terminate at the upper and lower ends of the cord in a number of small branches. [L, 332.]—**Cephalic v.** A v. formed by the union of the median cephalic and radial cutaneous v's, which passes up along the outer border of the biceps brachii to empty into the axillary v. [L.]—**Cerebral v's.** Ger., *Gehirnvenen*. V's divided into two sets—those which return the blood from the surface of the brain, and those which return it from the ventricles. [L.]—**Choroid v.** Lat., *vena chorioidea (lateralis)*. A v. which returns the blood from the lateral ventricle and choroid plexus, and unites with the vena corporis striati to form the v. of Galen. [L, 332.]—**Ciliary v's.** Ger., *Blendungsblutadern*. V's which usually extend from the chorio-capillaris in a radiate direction through the choroid, and form the vasa vorticosa, five or six in number, which perforate the sclera obliquely at or just behind the equator of the eye, pass into the orbit, and empty into the ophthalmic v. [F.]—**Circumflex iliac v.** Ger., *umgeschlagene Hüftblutader*. A v. receiving the blood from the circumflex iliac artery and emptying into the external iliac v. [L.]—**Circumflex v's.** V's accompanying the circumflex arteries. [L.]—**Circumflex v's of Kohlrausch.** See *VENÆ circumflexæ penis*.—**Circumflex v's of the arm.** Branches of the axillary v. returning the blood from the distribution of the anterior and posterior circumflex arteries of the arm. [L.]—**Common facial v.** Ger., *gemeinschaftliche Gesichtsbloodader*. A v. formed by the union of the facial and temporal v's, emptying into the internal jugular v. [L.]—**Common iliac v.** Lat., *vena iliaca communis*. Ger., *gemeinschaftliche Hüftblutader, Hüftvene*. A v. formed by the union of the external and internal iliac v's. It extends from the sacro-iliac synchondrosis to about the junction of the fourth and fifth lumbar vertebrae, and unites with its fellow to form the inferior vena cava. [L.]—**Common jugular v.** 1. The portion of the internal jugular v. below the entrance of the common facial v. 2. Of the older authors, the innominate v. 3. The internal jugular v. [L.]—**Common pudic v.** Ger., *gemeinschaftliche Schamblutader*. See *Internal pudic v.*—**Common ulnar cutaneous v.** A v. formed by the union of the anterior and posterior ulnar cutaneous v's, which joins the median basilic v. at the bend of the elbow. [L, 142.]—**Common vitelline v.** See *MEATTS venosus*.—**Condylar emissary v.** See *EMISSARIUM occipitale inferius*.—**Coronary v.** See *Large coronary v.*—**Coronary v. of the placenta.** Lat., *vena coronaria placenta*. Ger., *grosses Randgefäß*. A v. which courses along the border of the placenta for more or less of its extent, gathers its blood from radicles in the substance of the placenta, and returns it to the maternal organism by channels leading to the v's of the uterus. [A, 61.]—**Coronary v. of the stomach.** Lat., *vena coronaria ventriculi*. Ger., *obere Magenblutader*. A v. which runs parallel to the coronary artery and empties into the portal v. [L.]—**Costal v.** A v. proceeding from the midrib of a leaf. [a, 35.]—**Crural v.** See *Femoral v.*—**Cystic v.** See *VENA cystica*.—**Deep auricular v's.** V's which return the blood from a portion of the auricle and empty into the

temporal v. [F.]—**Deep cerebral v's.** See *V's of Galen.*—**Deep cervical v.** A branch of the vertebral v., close to its entrance into the innominate v., which returns the blood from the suboccipital region. [L, 142.]—**Deep circumflex iliac v.** A branch of the external iliac v. receiving the blood from the distribution of the deep circumflex iliac artery. [L.]—**Deep facial v.** Ger., *tiefe Gesichtsbloodader*, *vordere innere Kieferblutader*. A v. receiving the blood from the pterygoid plexus and joining the facial v. below

SECTION THROUGH THE CRANIUM, SHOWING THE VEINS WHICH ENTER INTO THE FORMATION OF THE SINUSES.

the malar bone. [C.]—**Deep femoral v.** Lat., *vena femoralis profunda*. A branch of the femoral v. which returns the blood from the parts supplied by the deep femoral artery. [L, 332.]—**Deep median v.** A branch of the median cutaneous v. which communicates with the deep v's of the forearm. [L, 31, 142.]—**Deep palmar v's.** Branches of the brachial v's which follow the distribution of the deep palmar arch. [L.]—**Deep temporal v's.** Three or four v's coming from the temporal muscles to join the pterygoid plexus. [C.]—**Diaphragmatic v's.** See *Phrenic v's.*—**Digital v's.** Ger., *Fingerblutadern*. Small v's returning the blood from the parts supplied by the digital arteries. [L.]—**Dorsal costal v's.** See *Intercostal v's.*—**Dorsal spinal v's.** Lat., *venae spinales dorsales*. V's returning the blood from the muscles and integument of the back, forming a plexus over the arches of the vertebrae and emptying into the posterior branches of the intercostal v's, or, as in the neck, into the vertebral v. [C.]—**Dorsal v. of the clitoris.** Lat., *vena dorsalis clitoridis*. A v. returning the blood from the clitoris and its vicinity and emptying into the pudendal plexus (2d def.). [L.]—**Dorsal v. of the penis.** Lat., *vena dorsalis penis*. A v. returning the blood from the glans penis and prepuce, the corpus spongiosum, the corpora cavernosa, and the overlying skin, and emptying into the prostatic plexus. [C.]—**Dorsal v's of the tongue.** V's which connect the plexus beneath the mucous membrane of the posterior third of the tongue with the internal jugular or common facial v. [C.]—**Dorsi-spinal v's.** V's lying on the exterior of the spinal column. [a, 34.]—**Efferent v's of the kidney.** The v's which emerge from the glomeruli of the kidney and form a network on the convoluted tubules. [L, 142.]—**Emissary mastoid v.** See *EMISSARIUM mastoideum.*—**Emissary v's.** See *EMISSARIA Santorini.*—**Emissary v. of Luschka.** See *EMISSARIUM condyloideum anterius.*—**Emissary v. of Rektorzik.** A v. or plexus of v's accompanying the internal carotid artery and connecting the internal jugular v. with the cavernous sinus. [C.]—**Emulgent v.** See *Renal v.*—**Epigastric v.** Ger., *Bauchdeckenblutader*. See *Superficial epigastric v.*—**Ethmoidal v's.** Ger., *Siebbeinblutadern*, *Riechbeinvenen*. The anterior and posterior ethmoidal v's.—**External cervical v.** See *Anterior vertebral v.*—**External hæmorrhoidal v.** A v. following the distribution of the inferior hæmorrhoidal arteries and emptying into the hæmorrhoidal plexus. [L, 142, 332.]—**External iliac v.** Ger., *äussere Hüftblutader*. The continuation of the femoral v. from Poupart's ligament to its junction with the internal iliac v. near the lumbosacral articulation. It receives the deep circumflex iliac and epigastric v's. [C.]—**External jugular v.** A v. formed by the union of the posterior auricular v. and the posterior part of the temporal maxillary v. and joined by the posterior external jugular, transverse cervical, and suprascapular v's. It descends from about the level of the angle of the inferior maxilla between the platysma and the fascia and empties into the subclavian v. by one or more trunks. [C; L.]—**External mammary v.** A branch of the axillary v. or subclavian v. accompanying the artery of the same name. [L.]—**External maxillary v.** See *Facial v.*—**External posterior spinal v's.** Ger., *äussere Rückenblutadern der Wirbelsäule*. See *Dorsal spinal v's.*—**External pudic v's.** V's returning the blood from the parts supplied by the inferior and superior external pudic arteries and emptying into the internal saphenous v. [C.]—**External saphenous v.** Lat., *saphena parva*. Ger., *äussere (oder kleine) Rosenader*. A v. formed by the confluence of v's on the dorsum of the foot, which passes along the outer border of the tendo Achillis and runs on the gastrocnemius, between the heads of which it passes ending in the popliteal v. [C; L.]—**External spermatic v.** A branch of the external iliac v. running from the inguinal canal. [L.]—**External thoracic v.** See *Ex-*

*ternal mammary v.*—**Facial communicating v.** A short, nearly transverse v. uniting the facial and temporal v's near the angle of the jaw. [L.]—**Facial v.** Lat., *vena facialis*. Ger., *Gesichtsbloodader*, *äussere Kopfblutader*. A v. which receives the frontal, supra-orbital, angular, inferior palpebral, superior labial, deep facial, buccal, submental, submaxillary, and inferior palatine v's, and empties into the common facial v. [C.]—**Femoral v.** Lat., *vena femoralis*. Ger., *Schenkelblutader*. The continuation upward of the popliteal v. above the opening in the adductor magnus to Poupart's ligament, where it terminates in the external iliac v. It lies at first on the outer side of the femoral artery, then behind it, and in the upper part of the thigh on the inner side of it, and is included with it in a common sheath. [L.]—**Fluid-v's.** Fr., *veines fluides*. Of Chauveau, the oscillatory movements of the blood-stream in the dilated portion of a vessel just beyond a point of constriction. [K, 25.]—**Frontal v.** Lat., *vena frontalis*. Ger., *Stirnblutader*. 1. A v. which returns the blood from the upper surface of the head and forehead, emptying into the facial v. [C.] 2. A branch of the supra-orbital v. from the diploe of the frontal bone. [L, 172.]—**Funicular v.** The umbilical v. [a, 18.]—**Gastric v's.** Lat., *venae gastricae (breves)*. Branches of the splenic v. running from the left extremity of the stomach. [L.]—**Gastro-duodenal v.** A branch of the right gastro-epiploic v. running from the pancreas and duodenum. [L.]—**Gastro-epiploic v's.** The right and left gastro-epiploic v's. [L.]—**Gastro-splenic v.** See *Splenic v.*—**Gate v.** See *Portal v.*—**Gluteal v.** Lat., *vena glutæa*. Fr., *veine fessière*. Ger., *Gesässvene*. A branch of the internal iliac v. following the ramifications of the gluteal artery. [C.]—**Great cardiac v.** See *Large coronary v.*—**Hæmorrhoidal v's.** The external, inferior, middle, and superior hæmorrhoidal v's.—**Hemi-azygous v.** See *Small azygous v.*—**Hepatic brachial v.** See *Right basilic v.*—**Hepatic v's.** Ger., *Lebervenen*. A number of v's, usually in three sets, which empty into the inferior vena cava, where it lies in its fissure. They arise in the substance of the liver as the interlobular v's. [L.]—**Hyaloid v.** A v. accompanying the hyaloid artery. [L.]—**Hypogastric v.** See *Internal iliac v.*—**Ileo-colic v.** See *VENA ileo-colica.*—**Iliac v's.** The common external and internal iliac v's. [a, 34.]—**Ilio-lumbar v's.** Lat., *venæ ilio-lumbales*. V's from the posterior part of the abdominal wall, the muscles of the back, and the spinal canal, which empty into the common iliac v. [C.]—**Inferior cerebellar v's.** V's from the lower surface of the cerebellum which enter the inferior petrosal and the occipital sinuses. [C.]—**Inferior cerebral v.** A v. which receives the blood from the lower surface of the cerebrum and empties into one or another of the sinuses at the base of the skull. [L, 332.]—**Inferior dental v.** A v. which returns the blood from the parts supplied by the inferior dental artery into the pterygoid plexus. [L.]—**Inferior diaphragmatic v's.** See *Inferior phrenic v's.*—

THE VEINS ENTERING INTO THE FORMATION OF THE SINUSES AT THE BASE OF THE SKULL.

1, the ophthalmic vein.

**Inferior hæmorrhoidal v.** A v. which returns the blood from the parts supplied by the artery of like name and empties into the internal iliac v. [C.]—**Inferior labial v's.** Two or three v's which collect the blood in the lower lip and empty into the submental branch of the facial v. [C.]—**Inferior laryngeal v.** A branch of the inferior thyroid v. which receives the blood from

the lower part of the larynx. [L.]—**Inferior longitudinal v.** See *Inferior longitudinal sinus*.—**Inferior mesenteric v.** A branch of the portal or the splenic v. which returns the blood from the distribution of the inferior mesenteric artery. [L. 172, 332.]—**Inferior ophthalmic v.** Lat., *vena ophthalmica externa* (seu *facialis*, seu *inferior*). Ger., *untere Augenblutader*. A v. which begins at the lower margin of the orbit by an anastomosis with the facial v. and empties into the cavernous sinus or the ophthalmic v. [L. 31, 332.]—**Inferior palatine v.** See *Palatine v.* (1st def.).—**Inferior phrenic v's.** Branches of the inferior vena cava or of the suprarenal v's which follow the distribution of the inferior phrenic arteries. [L.]—**Inferior thyroid v's.** Ger., *untere Schilddrüsenvenen*. V's whose radicles form a plexus on the anterior surface of the larynx, returning the blood from the thyroid gland, the lower part of the larynx, the trachea, and the oesophagus, and emptying, one on each side, into the innominate v's. [L. 142, 332.]—**Infrorbital v.** A branch of the inferior ophthalmic v. from the face just below the orbit. [L. 332.]—**Innominate v's.** Lat., *venae innominatee*. Ger., *ungenannte Venen*. The large v's, one on each side, formed by the union of the subclavian and internal jugular v's behind the sterno-clavicular articulations. They unite on the right side a little below the cartilage of the first rib to form the superior vena cava. That of the right side is short and nearly vertical, and lies on the pleura and the upper part of the right lung; that of the left side runs obliquely downward from left to right, and rests on the arch of the aorta in front of the innominate, left carotid, and subclavian arteries. [L. 34, 142, 332.]—**Innominate v's of Veissens.** See *Anterior cardiac v's*.—**Intercoastal v's.** Ger., *Zwischenrippenblutadern*. Branches of the large and small azygos v's and the superior intercostal v's which accompany the arteries of the same name. [L.]—**Interlobular v's.** Small v's running between the lobules of a gland. [L.]—**Interlobular v's of the kidney.** V's which accompany the interlobular arteries and convey the blood from the cortex of the kidney to the arches at the bases of the renal pyramids. [C.]—**Interlobular v's of the liver.** Lat., *venae interlobulares hepatis, venulae centrales lobulorum*. Small branches of the portal v. which run between and around the lobules of the liver. [C.]—**Intermediate v's.** See *Interlobular v's*.—**Internal auditory v's.** See *VENÆ AUDITIVÆ INTERNÆ*.—**Internal cerebral v.** A v. formed by the union of the choroid v. and the vena corporis striati, which is continuous with the v. of Galen of its own side when there are two, but converging to form the v. of Galen when it is single. [L. 31, 332.]—**Internal hemorrhoidal v.** See *Superior hemorrhoidal v.*—**Internal iliac v.** Ger., *Beckenblutader, Unterbauchvene*. A short trunk which lies behind the internal iliac artery, receives the blood from the v's corresponding to the branches of that vessel, and unites near the margin of the pelvis with the external iliac v. to form the common iliac v. [L.]—**Internal jugular v.** Ger., *innere Drosselblutader*. 1. A large v. which is continuous above with the lateral sinus and joins below with the subclavian v. to form the innominate v. In its upper portion it lies to the outer side of and close to the internal carotid artery as far as the cornu of the hyoid bone, where it receives the common facial v. and descends upon the outer side of the common carotid artery. Its most important branches are the lingual, pharyngeal, occipital, laryngeal, and superior thyroid v's. [L. 31, 142, 332.] 2. See *Common jugular v.*—**Internal mammary v.** A branch of the innominate v. receiving small v's from the costal region. [L. 332.]—**Internal maxillary v.** A v. which returns the blood from the pterygoid plexus, and empties into the temporal v. [C.]—**Internal pudic v.** Lat., *vena pudenda communis* (seu *interna*). A v. emptying into the internal iliac v. or into the pudendal plexus, formed by the union of a number of small v's from the perineum, scrotum, and anus. It accompanies the internal pudic artery. [L. 332.]—**Internal saphenous v.** Lat., *saphena, vena interna saphena* (seu *magna*). Fr., *saphène*. Ger., *grosse Rosenvene*. A v. which, beginning in a plexus upon the dorsal aspect of the foot, runs upward in front of the inner ankle and along the inner side of the leg to the internal condyle of the femur, behind which it passes to ascend upon the inner side of the thigh to the saphenous opening, through which it passes to empty into the femoral v. a little below Poupart's ligament. It receives a large number of cutaneous branches and communicates freely with the deeper v's of the thigh and leg. [L. 142, 172, 332.]—**Internal spermatic v.** Ger., *innere Samenblutader*. A v. (sometimes one of several) that returns the blood from the testicle. It forms a constituent of the spermatic cord, and empties on the right side into the inferior vena cava and on the left into the renal v. [L. 142, 332.]—**Interosseous v's.** See *VENÆ INTEROSSEAE ANTI-Brachii*.—**Intralobular v's of the liver.** Branches of the interlobular v's which spring from the capillary plexus within the lobules of the liver. [L. 142, 172.]—**Ischiadic v.**, **Ischiatic v.** See *Sciatic v.*—**Jugular v's.** Ger., *Drosselblutadern*. The anterior, external, and internal jugular v's. [L.]—**Jugulo-cephalic v.** An anomalous v. which passes over the clavicle, uniting the cephalic and external jugular v's. [L. 142.]—**Labial v.** A branch of the facial v. from the region of the lip. [L. 142.]—**Lacrimal v's.** Ger., *Thränenvenen*. V's from the upper eyelid and lacrimal gland which accompany the lacrimal artery and empty into the palpebral and ophthalmic v's. [F.]—**Large azygos v.** Lat., *vena azygos major*. Ger., *grosse unpaarige Blutader, unpaare Vene*. A v. of the right side which arises opposite the first or second lumbar vertebra by a branch from one or more of the lumbar v's, the renal v's, or the inferior vena cava. It perforates the diaphragm in company with the aorta and ends in the superior vena cava close to the pericardium. It receives the nine or ten lower right intercostal v's, the small azygos v., the right bronchial v., and small v's from the thoracic cavity. [L. 31, 142, 172, 332.]—**Large coronary v. (of the heart).** Lat., *vena coronaria magna (cardiac)*. Fr., *grande veine cardiaque*. Ger., *grosse Kranzblutader des Herzens*. A v. which arises upon the anterior surface of the apex of the heart, and ascends in the anterior interventricular groove to that between the left auricle and ventricle, along which

it runs to the posterior surface of the heart, where it terminates in the left end of the coronary sinus. [L. 31, 142, 332.]—**Large mesaraic v.** See *Superior mesenteric v.*—**Laryngeal v.** Lat., *vena laryngea (superior)*. Ger., *Lufttröhrenkopfsvene*. A branch of the internal jugular v. or of one of its branches. It receives small vessels from the interior of the larynx which pierce the thyreo-hyoid membrane. [L. 142, 332.]—**Lateral sacral v's.** V's which receive the blood from the lateral sacral arteries and, with the middle sacral v's, form the anterior sacral plexus. [L. 142, 172.]—**Lateral vitelline v's.** Lat., *venae vitellinae laterales*. Those two of the vitelline v's which, arising laterally, accompany the trunks of the large arteries of the primitive embryonic circulation. On the left side this vessel unites with the posterior vitelline v., on the right side with the anterior, or, if the latter is wanting, forms alone the trunk of the right omphalo-mesenteric v. [A. 8.]—**Left coronary v.** See *Large coronary v. of the heart*.—**Left gastro-epiploic v.** A v. from the great curvature of the stomach which empties into the splenic v. [C.]—**Left lower azygos v.** See *Small azygos v.*—**Left upper azygos v.** An inconstant v. which receives those of the intercostal v's below the superior intercostal v. of the left side that do not empty into the small azygos v. When it is absent its place is supplied by the left superior intercostal v. [L. 31, 142, 172.]—**Lieno-intestinal v.** See *Splenic v.*—**Lingual dorsal v's.** See *Dorsal v's of the tongue*.—**Lingual v.** Lat., *vena lingualis*. Ger., *Zungenvene*. A branch of the internal jugular or facial v. which anastomoses freely with the v's of the vicinity and returns the blood from the tongue, the sublingual and submaxillary glands, and the floor of the mouth. [L. 31, 142, 332.]—**Longitudinal spinal v's.** The anterior and posterior longitudinal spinal v's. [L.]—**Long saphenous v.** See *Internal saphenous v.*—**Long thoracic v.** A branch of the axillary v. accompanying the branches of the external mammary artery. [C.]—**Lumbar v's.** Lat., *venae lumbales*. V's accompanying the

1, 1, the external jugular veins; 2, the right anterior jugular vein; 3, 3, the internal jugular veins; 4, 4, the subclavian veins; 5, the right innominate vein; 6, the left innominate vein; 7, the superior vena cava; 8, the left axillary vein; 9, the right cephalic vein; 10, the inferior vena cava.

lumbar arteries and emptying into the inferior vena cava. [L. 142, 332.]—**Lumbo-costal v.** See *Ascending lumbar v.*—**Marginal v. of the heart.** See *Middle cardiac v.*—**Masseteric v's.** Lat., *venae massetericae*. Ger., *Kaumuskelblutadern*. Branches of the facial v. from the masseter muscle. [L.]—**Mastoid emissary v.** See *EMISSARIUM MASTOIDEUM*.—**Maxillary v's.** Ger., *Kieferblutadern*. The external and internal maxillary v's.—**Median basilic v.** Lat., *vena basilica mediana*. The innermost of the two terminal branches of the median cutaneous v. It is given off at the bend of the elbow on the anterior surface of the arm, passes up in front of the brachial artery between the biceps brachii and the pronator radii teres, and joins the basilic v. [L. 172, 332.]—**Median cephalic v.** Lat., *vena cephalica mediana*. The outer and smaller of the two terminal branches of the median cutaneous v. It passes upward in the bend of the elbow between the supinator longus and the biceps brachii to join the cephalic v. [L. 172, 332.]—**Median cutaneous v.** A cutaneous branch of the median v. [L.]—**Median labial v.** See *VENA ANGLI ORIS*.—**Median v. of the arm.** Lat., *vena mediana*. Ger., *Mittlerarmblutader*. A short v. upon the anterior surface of the forearm which divides at the bend of the elbow into the median basilic v. and the median cephalic v. [L.] See also *Median cutaneous v.* and *Deep median v.*—**Median v. of the neck.** Lat., *vena colli mediana*. See *Anterior jugular v.*—**Mediastinal v's.** The anterior and posterior mediastinal v's. [L.]—**Medullary-spinal v's.** A venous plexus between the spinal arachnoid and pia. [L.]—**Meningeal v's.** V's accompanying the meningeal arteries. [L.]—**Meningo-rachidian v's.** V's situated in the interior of the spinal canal, between the vertebrae and the theca vertebralis. [A. 34.]—**Menstriferous v's of the uterus.** An old term

for certain v's of the uterus which were supposed to be the special source of the menstrual flow. [A, 42].—**Mental v.** Lat., *vena mentalis*. A branch of the anterior jugular v. running from the chin. [L.]—**Mesenteric v's.** Ger., *Gekrösblutadern*. The inferior and superior mesenteric v's.—**Middle cardiac v.** Lat., *vena cordis media*. Ger., *mittlere Kranzblutader des Herzens*. The largest of the v's on the posterior surface of the heart. It lies in the groove between the ventricles, and empties into the right extremity of the coronary sinus. [L, 31, 142].—**Middle cerebral v.** Lat., *vena cerebri media*. A v. accompanying the middle cerebral artery and emptying into the cavernous or sphenoparietal sinus (2d def.). [L, 31, 332].—**Middle hemorrhoidal v's.** Small v's which connect the hemorrhoidal plexus with the internal iliac v. [L, 332].—**Middle meningeal v.** A v. accompanying the middle meningeal artery, and emptying into the cavernous, sphenoparietal, or sphenosquamous sinus or the internal maxillary or pterygoid plexus. [L, 142, 332].—**Middle sacral v.** Lat., *vena caudalis* (seu *sacralis media*). A v. on the anterior surface of the sacrum, returning the blood from the middle sacral artery and emptying into the left common iliac v. or the inferior vena cava. [L, 142, 172].—**Middle temporal v.** A v. which arises in the vicinity of the eyebrow, communicates with the supra-

1, the splenic vein; 2, the portal vein; 3, the superior mesenteric vein; 4, the inferior mesenteric vein.

orbital and frontal v's, receives the palpebral v's and branches from the temporals, and unites with the superficial temporal v. over the temporal portion of the zygomatic arch. [L, 142, 332].—**Middle thyroid v.** Lat., *vena thyroidea lateralis* (seu *media*). A branch of the lower portion of the internal jugular v. which returns the blood from the lower portion of the lateral lobe of the thyroid gland and receives twigs from the trachea and larynx. [L, 142, 172].—**Midv.** The midrib of a leaf. [A, 35].—**Nasal v's.** Lat., *venae nasales*. Unimportant branches of the angular v. running from the dorsal and lateral surfaces of the nose. [L, 142, 332].—**Oblique v. of the heart.** Lat., *vena posterior atrii sinistri*. A small v., the relic of the left innominate v. of the fetus, which runs on the back part of the left auricle of the heart to the coronary sinus. [L, 172].—**Obturator v.** Lat., *vena obturatoria*. Fr., *veine obturatrice*. Ger., *Hüftlochvene*. A branch of the internal iliac v. which returns the blood from the distribution of the obturator artery. [L, 332].—**Occipital emissary v.** [Henle]. See *EMISSARIUM OCCIPITALE SUPRUS*.—**Occipital v.** Ger., *Hinterhauptvene*. 1. A branch of either the external or internal jugular v. which arises in a plexus in the occipital region. 2. A branch from the

diaploe of the occipital bone, emptying into the occipital sinus or the occipital v. (1st def.). [L.]—**Oesophageal v's.** Lat., *venae oesophagicae*. Branches of the inferior thyroid v's running from the oesophagus. [L, 332].—**Omphalo-mesenteric v's.** See *VITELLINE V'S*.—**Ophthalmic v.** Lat., *vena ophthalmica* (*cerebralis*, seu *interna*, seu *superior*). Ger., *Gesichtsaugenvene*. A large v. which commences the frontal v. at the inner angle of the orbit, and passes out of the orbit through the inner extremity of the sphenoidal fissure to empty into the cavernous sinus. [F.]—**Orbital v's.** Ger., *Augenhöhlenblutadern*. Branches of the ophthalmic v. and the vena ophthalmica externa running from the tissues in the orbit. [L.]—**Ovarian v.** A v. following the same course as the ovarian artery and emptying into the vena cava or renal v. [L.]—**Palatine v.** Lat., *vena palatina* (*inferior* [1st def.]). Ger., *Gaumenblutader*. 1. A branch of the facial v., or of one of its branches, returning the blood from the vicinity of the tonsil and soft palate. 2. In the pl., small branches of the internal maxillary v. [L, 142, 332].—**Pancreatico-duodenal v's.** Branches of the superior mesenteric v. running from the head of the pancreas and from the duodenum. [L, 7].—**Pancreatic v.** A branch of the splenic v. running from the pancreas. [L.]—**Parietal emissary v.** See *EMISSARIUM PARIETALE*.—**Parotid v's.** Small v's running from the parotid gland to the temporal v. [A, 34].—**Parumbilical v.** Lat., *vena paraumbilicalis* (seu *paromphalica*). 1. Of Hyrtl, a venous channel said to be formed in the adult by a reopening of the hepatic portion of the umbilical v. in cases of obstruction of the portal circulation. [A, 19]. 2. In the pl., branches of the portal v., or of a pervious umbilical v., which connect with the deep epigastric v. [L, 142, 332].—**Pericardiac v's.** Ger., *Herzbeutelvenen*. Small branches of the azygous, internal mammary, and innominate v's running from the pericardium. [L, 332].—**Peroneal v's.** See *VENA PERONEA* (1st def.).—**Pharyngeal v's.** Lat., *venae pharyngeae*. Ger., *Schlundkopfblutadern*. Branches of the internal jugular (occasionally of the superior thyroid or lingual) v's which form a plexus in the walls of the pharynx. [L, 142, 332].—**Phrenic v's.** Lat., *venae phrenicae*. Small branches of the inferior vena cava which accompany the phrenic arteries. [L, 142, 332]. Cf. *Superior phrenic v's* and *Inferior phrenic v's*.—**Plantar v's.** Lat., *venae plantares*. The deep v's of the sole of the foot. [L, 332].—**Popliteal v.** Lat., *vena poplitea*. Ger., *Kniekehlblutader*. A v. formed by the union of the anterior and posterior tibial v's, near the lower border of the popliteus. It becomes continuous with the femoral v. above the opening in the adductor magnus. It lies in a plane posterior to the popliteal artery, at first on its inner side, then behind it, and finally on its outer side. It receives small branches in the popliteal space and also the external saphenous v. [L, 142, 332].—**Portal v.** Lat., *vena portae* (seu *portarum*). Ger., *Pfortader*. A v. from three to four inches long, formed by the union of the splenic and superior mesenteric v's, which conveys the blood from the chylipoietic organs to the liver. It is situated behind the hepatic artery and bile duct, and is included within the layers of the lesser omentum. Close to the right end of the transverse fissure of the liver it divides into two branches which enter the substance of the liver (where it receives blood from the branches of the hepatic artery) and give off branches to form the vaginal plexus and the interlobular v's. [L, 31, 142, 172, 332].—**Postcaval v.** In birds, the v. returning the blood from the trunk and lower extremities. [L, 221].—**Posterior auricular v.** Ger., *hintere Ohrvene*. A branch of the temporo-maxillary v. which receives the blood from the back part of the external ear and its vicinity. [L, 172, 332].—**Posterior cardiac v's.** Lat., *venae cordis posteriores*. Three or four v's which run on the posterior surface of the ventricles and empty into the coronary sinus at its lower border. [C.]—**Posterior ciliary v's.** V's which collect the blood from the chorioid, pass out through the sclera midway between the cornea and the optic nerve, and empty into the ophthalmic v. [C.]—**Posterior cutaneous v. of the neck.** See *EXTERNAL JUGULAR V.* and *POSTERIOR EXTERNAL JUGULAR V.* (1st def.).—**Posterior dental v.** A branch of the internal maxillary v. accompanying an artery of the same name. [L.]—**Posterior ethmoid v.** A branch of the ophthalmic v. accompanying an artery of the same name. [L.]—**Posterior external jugular v.** 1. A v. which collects blood from the occipital region and from the integument and superficial muscles of the back of the neck, and empties into the external jugular v. [C.] 2. See *EXTERNAL JUGULAR V.*—**Posterior facial v.** See *TEMPORO-MAXILLARY V.* and *TEMPORAL V.*—**Posterior intercostal v's.** Lat., *venae intercostales posteriores*. Branches of the intercostal v's accompanying the posterior intercostal arteries. [L.]—**Posterior internal maxillary v.** See *INTERNAL MAXILLARY V.*—**Posterior longitudinal spinal v's.** Two v's in the spinal canal between the dura and the posterior wall. They anastomose freely with each other and empty into the occipital sinus. [C.]—**Posterior mediastinal v's.** Lat., *venae mediastinae posteriores*. Branches of the large azygous v. running from the posterior mediastinum. [L, 332].—**Posterior saphenous v.** See *EXTERNAL SAPHENOUS V.*—**Posterior temporal v.** 1. The posterior branch of the temporal v. 2. A v. from the diaploe of the parietal bone, emptying into the lateral sinus. [L.]—**Posterior tibial v's.** Two v's following the distribution of the posterior tibial artery and emptying into the popliteal v. [C.]—**Posterior ulnar (cutaneous) v.** A v. beginning on the back of the hand by a number of vessels which unite to form the vena salvatella, and running up on the posterior aspect of the ulnar border of the forearm to unite with the anterior ulnar cutaneous v. [C.]—**Posterior vertebral v.** 1. See *DEEP CERVICAL V.* 2. In the pl., of Rathke, two fetal v's, continuous with the upper portions of the cardinal v's, which receive the lumbar and intercostal twigs. [A, 5].—**Posterior vitelline v.** Lat., *vena vitellina posterior*. Ger., *hintere (linke) Dotterveine*. A v. of the primitive embryonic circulation which arises posteriorly from the sinus terminalis and empties into the left omphalo-mesenteric v.—**Precaval v's.** In birds, the v's returning the blood from the head and upper extremities. [L, 221].—**Primary v.** Ger., *Hauptader*. One of the primary branches sent off from the mid-

vein of a leaf. [a, 35].—**Primitive jugular v.** A v. of the fœtus which receives the blood from the cranial cavity. The greater part of it afterward becomes the internal jugular v., but on the right side that portion of it situated below a communicating v. that runs to its fellow forms, together with the right duct of Cuvier, the vena cava superior. [A, 5].—**Pubic v.** Lat., *vena pubica*. A v., sometimes doubled, which runs externally to the crural ring over the superior ramus of the os pubis to join the external iliac v. [L, 332.]

1, the left external jugular vein; 2, the left internal jugular vein; 3, the left anterior jugular vein; 4, the left innominate vein; 5, the left subclavian vein; 6, the superior vena cava; 7, the large axillary vein; 8, the small axillary vein; 9, the left inferior thoracic vein; 10, the left superior intercostal vein; 11, the inferior vena cava; 12, the right common iliac vein; 13, the right internal iliac vein; 14, the right external iliac vein; 15, the right femoral vein; 16, the right deep femoral vein; 17, the renal veins; 18, the internal spermatic vein.

—**Pudic v's.** Ger., *Schamblutadern*. The external and internal pudic v's.—**Pulmonary v's.** Lat., *venae pulmonales*. Ger., *Lungenvenen*. Four (occasionally five) v's which return the aerated blood from the lungs to the left auricle of the heart, into the posterior portion of which they open. The two of the right side lie behind the right pulmonary artery, the aorta, the right auricle, and the superior vena cava; those of the left side lie in front of the aorta. They arise in the substance of the lung, in the capillary network of the alveoli and smaller bronchial tubes, and form freely anastomosing vessels, which become larger as they approach the root of the lung, where they unite to form the main trunks. [L, 31, 142, 172, 332].—**Radial (cutaneous) v.** A v. which arises in a plexus on the posterior surfaces of the thumb and index finger and ascends upon the radial border of the forearm, where it unites with the median cephalic v. [L, 142, 172].—**Ranine v.** Lat., *vena ranina*. A branch of the internal jugular, facial, or lingual v., which arises at the apex of the tongue and runs superficially on its lower surface close to the frenum, in company with the ranine artery. [L, 142, 172, 332].—**Renal v.** Lat., *vena renalis*. Ger., *Nierenblutader*, *Nierenvene*. A short v. with a large lumen which returns the blood from the kidney into the inferior vena cava. That of the right side is the longer, and passes in front of the aorta. It receives branches from the suprarenal capsule and, on the left side, the internal spermatic v. [L, 142, 332].—**Right axillary v.** See *Large axillary v.*—**Right basilic v.** The basilic v. of the right arm.—**Right coronary v.** See *Small cardiac v.*—**Right gastro-epiploic v.** A branch of the superior mesenteric v. running from the right extremity of the stomach. [L, 332].—**Sacral v's.** Ger., *Kreuzbeinblutadern*. The lateral and middle sacral v's. [L].—**Saphenous v's.** The external and internal saphenous v's.—**Satellite v's.** See *Venae comitantes*.—**Sciatic v.** Lat., *vena ischiatica*. A v. which collects the blood from the parts supplied by the sciatic artery and empties into the internal iliac v. [C].—**Secondary v.** One of the branches of a primary v. [a, 35].—**Short gastric v's.** See *Gastric v's.*—**Short saphenous v.** See *External saphenous v.*—**Small axillary v.** Lat., *vena humi axygos*. A v. which arises from one or two lumbar v's and the renal, suprarenal, or spermatic v. of the left side, and empties into the right axillary v. after crossing the vertebral column over the ninth dorsal

vertebra. It receives a varying number of the lower intercostal v's, also small v's from the thoracic cavity. [C; L].—**Small cardiac (or coronary) v.** Lat., *vena coronaria parva*. Ger., *kleine Kranzblutader des Herzens*. A v. which receives the blood from the posterior portion of the right auricle and ventricle of the heart, and empties into the right extremity of the coronary sinus. [L, 31, 142, 332].—**Smallest cardiac v's.** See *Venae cordis minimae*.—**Small mesaraic v.** See *Inferior mesenteric v.*—**Spermatic v's.** Ger., *Samenvenen*. The external and internal spermatic v's. [L].—**Sphenopalatine v.** Lat., *vena sphenopalatina*. A v. from the sphenoid bone and palate, emptying into the pterygoid plexus. [C].—**Spinal v's.** The venous plexuses placed upon and within the vertebral column. They include the dorsi-spinal v's, the meningo-rhachidian v's, the v's of the bodies of the vertebrae, and the medullary-spinal v's.—**Splenic v.** Lat., *vena lienalis*. Ger., *Milzblutader*, *Milzvene*. A large branch of the portal v. which returns the blood from the spleen, the pancreas, the duodenum, part of the rectum, the descending colon, and the larger part of the stomach and omentum; formed by the union of several vessels which emerge from the spleen. It runs beneath the pancreas in company with the splenic artery, and joins with the superior mesenteric v. in front of the vertebral column. It receives the gastric and left gastro-epiploic v's and a number of unnamed vessels from the intestines, etc. [L].—**Stellate v's.** See *Venae stellatae*.—**Stylo-mastoid v.** A v. accompanying the stylo-mastoid artery and emptying into the posterior auricular v. [a, 34].—**Subclavian v.** Lat., *vena subclavia*. Ger., *Schlüsselbeinblutader*, *Unterschlüsselbeinvene*. A large v., the continuation of the axillary v., extending from the upper margin of the serratus anticus major to the inner end of the clavicle, where it unites with the internal jugular v. to form the innominate v. It receives the anterior and external jugular and the vertebral v's. [L, 31, 142, 332].—**Subintestinal v.** In embryonic fishes, the homologue of the caudal v. and the ductus venosus. [L].—**Sublingual v.** See *Ranine v.*—**Sublobular v.** A venous trunk formed by the union of several of the intralobular v's of the liver and emptying into the hepatic v. or its branches. [L, 351].—**Submaxillary v's.** Branches of the facial v. running from the submaxillary gland. [L, 332].—**Submental v.** Ger., *Unterkinblutader*. A branch of the facial v. (occasionally of the lingual or superior thyreoid v.) which returns the blood from the submaxillary gland and the mylo-hyoideus. [L, 142, 332].—**Subscapular v.** Lat., *vena subscapularis*. A branch of the axillary v. accompanying the distribution of the subscapular artery. [L, 142, 332].—**Superficial circumflex iliac v.** A v. returning the blood of the artery of like name, and emptying into the internal

THE SUPERFICIAL VEINS OF THE DORSAL ASPECT OF THE FOREARM.

1, the radial cutaneous vein; 2, the posterior ulnar cutaneous vein.

THE VEINS OF THE PALMAR ASPECT OF THE ARM AND FOREARM.

1, the radial cutaneous vein; 2, the cephalic vein; 3, the anterior ulnar cutaneous vein; 4, the posterior ulnar cutaneous vein; 5, the basilic vein; 6, the median vein; 7, the median basilic vein; 8, the median cephalic vein.

saphenous v. [C].—**Superficial epigastric v's.** Branches of the internal saphenous v. running from the superficial epigastric region. [L].—**Superficial external pudic v.** A branch of the internal saphenous v. corresponding to the inferior external pudic artery. [L].—**Superficial interosseous v's.** See *Venae meta-*

*carpeæ*.—**Superficial temporal v.** A v. made up of the posterior auricular v's and their branches that extend over the lateral and superior aspects of the skull, anastomosing freely with the vessels of the vicinity, and converging near the posterior portion of the zygoma to unite with the middle temporal v. [L, 142, 332.]—**Superficial ulnar v's.** The anterior and posterior ulnar v's. [L.]—**Superior auricular v's.** Branches of the external jugular v's running from the cranial aspect of the auricle and the side of the head. [L.]—**Superior cerebellar v's.** Branches of the straight or transverse sinus or of the v. of Galen running from the upper surface of the cerebellum. [L, 142, 332.]—**Superior cerebral v's.** Ten or twelve v's lying mostly in the sulci of the upper part of the cerebrum and emptying into the superior and inferior longitudinal sinuses. They anastomose freely with each other and with the inferior cerebral v's. [C.]—**Superior epigastric v.** A branch of the internal mammary v. which accompanies the superior epigastric artery. [L, 332.]—**Superior gastric v.** Ger., *obere Magenblutader*. See *Coronary v. of the stomach*.—**Superior hæmorrhoidal v.** A branch of the inferior mesenteric v. which returns the blood from the upper half of the rectum. [L, 332.]—**Superior intercostal v's.** Lat., *venæ intercostales supremæ*.

V's which return the blood from the upper three or four intercostal spaces. That of the right side is the smaller, corresponds to the distribution of the superior intercostal artery, receives the blood from one, two, or three of the upper intercostal spaces, and empties into the right innominate v. or the large azygos v. That of the left side receives branches from the upper three or four intercostal spaces and the left branchial v., passes across

1, 1, the internal saphenous vein. 1, the external saphenous vein.

cial v. running from the upper eyelid. [L.]—**Superior phrenic v's.** Branches of the innominate v's running from the diaphragm. [L, 31.]—**Superior thoracic v.** A branch of the axillary v. which returns the blood from the parts supplied by the superior thoracic artery. [L, 142, 332.]—**Superior thyroid v.** A branch of the internal jugular v. which arises by branches in the thyroid gland which anastomose freely with the v's of the vicinity. [L, 142, 332.]—**Supra-orbital v.** Ger., *Oberaugenhöhlvene*. A branch of the facial or frontal v. which lies beneath the occipito-frontalis, running in toward the eyebrow. It receives branches from the adjacent structures and anastomoses freely with the v's of the vicinity. [L, 142, 332.]—**Suprarenal v's.** Ger., *Nebennierenblutadern*. V's running from the suprarenal capsules. That of the right side empties into the vena cava, that of the left into the phrenic or renal v. of the same side. [L, 142, 332.]—**Suprascapular v.** Ger., *Oberschulterblattblutader*. A branch of the external jugular v., near its termination, which accompanies the suprascapular artery and its branches. [L, 142, 332.]—**Sural v's.** See *VENÆ gastrocnemicæ*.—**Systemic v's.** Ger., *Körpervenen*. The v's which return the blood to the right auricle of the heart from all the tissues and organs except the lungs and chylipoietic organs. [L.]—**Temporal v.** Lat., *vena temporalis (communis)*. Ger., *Schläfenvene*. A v. formed by the union of the superficial and middle temporal v's and joining with the internal maxillary v. to form the temporo-maxillary v. [C.] See also *Anterior temporal v.*, *Posterior temporal v.*, and *Deep temporal v's*.—**Temporo-maxillary v.** A v. formed by the union of the temporal and internal maxillary v's near the neck of the lower jaw. It divides near the angle of the jaw into two branches, one of which goes to the facial v., the other to the external jugular v. [L, 142, 332.]—**Thymic v's.** Branches of the right and left innominate v's (especially of the former) running from the thymus gland. [L, 332.]—**Thyroid v's.** The inferior, middle, and superior thyroid v's and the vena thyroidea ima.—**Tibial v's.** The anterior and posterior tibial v's. [L.]—**Transverse cervical v.**

Lat., *vena colli transversa*. A branch of the transverse cervico-scapular v. which receives blood from the deep lateral cervical muscles. [L, 332.]—**Transverse cervico-scapular v.** Lat., *vena transversa colli et scapulae*. A v. formed by the union of the transverse cervical and scapular v's. It lies beneath the trapezius and empties normally into the subclavian v., occasionally into the external jugular v. [L, 332.]—**Transverse facial v.** A branch of the temporal v. which accompanies the branches of the transverse facial artery. [L, 142, 332.]—**Transverse lumbar v's.** See *Lumbar v's*.—**Transverse scapular v.** Lat., *vena scapula transversa*. A branch of the transverse cervico-scapular v. which receives blood from the posterior and upper scapular regions. [L, 332.]—**Ulnar cutaneous v.** See *Anterior ulnar cutaneous v.*, *Posterior ulnar cutaneous v.*, and *Superficial ulnar v's*.—**Ulnar v.** A branch of the brachial v. accompanying the branches of the ulnar artery. [L.]—**Umbilical v's.** Lat., *venæ umbilicales*. Ger., *Nabelvenen*. Two v's, a right and a left, made up of radicles arising in the chorionic villi of the placenta, and formed in the embryo at the time of the development of the allantoic circulation. Uniting to form a short trunk, they return the blood from the placenta into the meatus venosus. The right umbilical v. soon disappears; the left one, now termed the umbilical v., courses through the umbilical cord, enters the abdomen of the fetus, and proceeds to the lower border of the suspensory ligament of the liver, in the anterior part of the longitudinal fissure, where it divides into two branches, one of which goes to the portal v., while the other, the ductus venosus Arantii, empties into the ascending vena cava. [A, 23.]—**Uterine v's.** Ger., *Muttervenen*. Branches of the internal iliac v. which accompany the uterine arteries and form a plexus in the walls of the uterus. [L.]—**Utero-ovarian v.** See *Ovarian v.*—**Vaginal v's of the liver.** V's ramifying in Glisson's capsule, accompanying the vaginal branch of the hepatic artery. [A, 34.]—**Varicose v.** See *VARIX*.—**V's of Galen.** Two v's, one on each side, which are continuations of the internal cerebral v's. They run back in the folds of the velum interpositum, emerge through the transverse fissure of the cerebrum, and, after joining to form one trunk, empty into the straight sinus. Often they are replaced by a single vessel, then called the v. of Galen, which sometimes is separated by a longitudinal septum into two. [L, 31, 142, 172, 332.]—**V's of Santorini.** See *EMISSARIA Santorini*.—**V's of the corpus spongiosum.** V's carrying blood from the corpus spongiosum to the dorsal v. of the penis. [A, 34.]—**V's of Thebesius.** See *VENÆ cordis minime*.—**V. of the corpus cavernosum.** A v. which returns the blood from the corpus cavernosum and empties into the internal pudic v. [C.]—**V. of the liver.** The right basilic v. [L, 104.]—**Ventricular v's.** See *V's of Galen*.—**Vertebral v.** Lat., *vena vertebralis interna* (seu *lateralis*, seu *superficialis*). Ger., *Wirbelblutader*, *Halswirbelvene*. 1. A branch of the subclavian v., near its termination, which arises in the suboccipital region and accompanies the vertebral artery. [L, 2.] In the pl., the vertebral v., anterior vertebral v., posterior vertebral v., and basivertebral v's. [L.]—**Visceral v's.** V's which return the blood from the viscera. [L.]—**Vitelline v's.** Lat., *venæ vitelline* (seu *omphalomesentericæ*). Ger., *Dottervenen*. Several venous trunks of the primitive embryonic circulation which carry the blood from the sinus terminalis to the meatus venosus. See *Anterior vitelline v.*, *MEATUS venosus*, *Lateral vitelline v's*, and *Posterior vitelline v.*

**VEINE** (Fr.), n. Ve'n. See *VEIN*.—**V. anastomotique cérébrale.** See *VENA communicans magna*.—**V. apoplectique.** A jugular v., especially the external jugular v. [L.]—**V. artérielle.** See *Pulmonary ARTERY*.—**V. auriculaire profonde.** See *Deep auricular VEIN*.—**V. cardiaque grande.** See *Large coronary VEIN of the heart*.—**V's cardiaques petites.** See *Anterior cardiac VEINS*.—**V. cave abdominale** (ou *ascendante*). See *Inferior VENA cava*.—**V. cave descendante** (ou *thoracique*). See *Superior VENA cava*.—**V. céphalique du bras.** See *Cephalic VEIN*.—**V. céphalique du pouce.** See *VENA cephalica pollicis*.—**V. céphalique interne.** See *Internal jugular VEIN*.—**V's cérébrales grandes** (ou *internes*). See *VEINS of Galen*.—**V's cubitales cancé.** See *Ulnar cutaneous VEIN* and *Basilic VEIN*.—**V. demi-azygos.** See *Small azygos VEIN*.—**V's des ailes du nez.** See *VENÆ laterales nasi*.—**V's des corps des vertèbres.** See *Basivertebral VEINS*.—**V's du diplôé.** See *VENÆ diploeticæ*.—**V. fessière.** See *Gluteal VEIN*.—**V. grande lymphatique droite.** The right lymphatic duct. [L.]—**V. grande mésentérique.** See *Superior mesenteric VEIN*.—**V. honteuse.** A pudic vein.—**V. iliaque externe.** See *External iliac VEIN*.—**V. iliaque interne.** See *Internal iliac VEIN*.—**V. iliaque primitive.** See *Common iliac VEIN*.—**V. obturatrice.** See *Obturator VEIN*.—**V. porte.** See *Portal VEIN*.—**V's surrénales.** See *Suprarenal VEINS*.—**V. terminale.** See *SINUS terminalis*.

**VEINED**, adj. Vand. Fr., *veiné*. See *GERM*.—**Veined**. Provided with veins. [A, 35.]—**Digitated v.** See *PALMINERVED*.—**Feather-v.** See *PINNINERVED*.—**Fork-v.** Having the fibro-vascular bundles forking. [A, 35.]—**Hidden-v.** Having the veins, as of a leaf, buried in the parenchyma so that they are not visible. [A, 35.]—**Netted-v.** Of leaves, reticulate. [A, 35.]—**Palmetely v.** See *PALMINERVED*.—**Pinnately v.** See *PINNINERVED*.—**Radiately v.** See *PALMINERVED*.

**VEINING**, n. Van/î'n². See *VENATION*.

**VEINLESS**, adj. Van/le²s. Without veins. [A, 35.]

**VEINLET**, n. Van/le²t. Lat., *venula*. Fr., *veinule*. Ger., *Aederchen*. A branch of a primary vein; of some botanists, a primary vein or branch of the midvein. [A, 35.]

**VEINOSITÉ** (Fr.), n. Ve²-no-ze-ta. A variety of varicosity in which, according to Briquet, there is a simple development of little veins, which are very numerous, enlarged, and excessively branched, and have become very superficial, almost hypodermic, so that they color the skin violet or bright red. It is most commonly seen on the lower limbs in women of middle age or older. [A, 15.]

**VEINULET**, n. Van'u<sup>2</sup>l-e<sup>2</sup>t. A branch of a veinlet (in either sense). [a, 35.]

**VEINY**, adj. Van'i<sup>2</sup>. See **VENOSE**.

**VEITYTANZ** (Ger.), n. Vits'ta<sup>2</sup>nts. See **CHOREA**.—**Englischer V.** See **CHOREA minor**.—**Grosser V.** See **CHOREA magna**.—**Kleiner V.** See **CHOREA minor**.

**VELAMEN** (Lat.), n. n. Ve<sup>2</sup>l(wal)-a<sup>2</sup>(a<sup>2</sup>)/me<sup>2</sup>n. Gen., -am'inis. From *velare*, to cover. A covering; a veil; in the pl., *velamina*, the meninges of the brain. [I, 8 (K).]—**V. radicum**. A peculiar covering formed on epiphytal roots by epidermal cells which have become filled with air after losing their succulent contents. [a, 35.]—**V. vulvæ**. See **Pudendal APRON**.

**VELAMENTOUS**, adj. Ve<sup>2</sup>l-a<sup>2</sup>m-e<sup>2</sup>nt'u<sup>2</sup>s. Ger., *velamental*, *velamentös*. Resembling a veil or membrane. [a, 48.]

**VELAMENTUM** (Lat.), n. n. Ve<sup>2</sup>l(wal)-a<sup>2</sup>-me<sup>2</sup>nt'u<sup>2</sup>m(u<sup>4</sup>m). From *velare*, to cover. A covering or investment. [G.]—**V. abdominale**. See **PERITONEUM**.—**Velamenta cerebri**. The cerebral dura, pia, and arachnoid. [L.]—**V. nativum**. The skin; the common integument. [G.]

**VELAMINARIS** (Lat.), adj. Ve<sup>2</sup>l(wal)-a<sup>2</sup>m(a<sup>2</sup>m)-i<sup>2</sup>n-a<sup>2</sup>(a<sup>2</sup>)/ri<sup>2</sup>s. From *velamen*, a cover. Fr., *velaminaire*. Of the dehiscence of an anther, valvular. [a, 35.]

**VÉLAR** (Fr.), n. Va-la<sup>2</sup>r. Of the Fr. Cod., either the flowering plant or simply the leaves of *Sisymbrium officinale*. [a, 38.]

**VELATE**, adj. Vel'at. Lat., *velātus* (from *velare*, to cover). Fr., *voilé*. Ger., *beschleiert*, *verschleiert*. Veiled, partly concealed from view (said of *Fungi* with a veil or of fruits with induvie). [a, 35.]

**VELLARINE**, n. Ve<sup>2</sup>l'a<sup>2</sup>r-en. Fr., v. Ger., *Vellarin*. An oily liquid obtained from *Hydrocotyle asiatica*. It has been recommended against leprosy. [B, 93, 108 (a, 14).]

**VELLERON** (Fr.), n. Ve<sup>2</sup>l-l'-ro<sup>2</sup>n<sup>2</sup>. A place in the department of Vaucluse, France, where there is a gaseous and alkaline spring. [L, 49 (a, 14).]

**VELLICATIO**, n. Ve<sup>2</sup>l-i<sup>2</sup>k-a'shu<sup>2</sup>n. Lat., *vellicatio* (from *vellicare*, to pluck). See **CARPHOLOGY**.

**VELLUS** (Lat.), n. Ve<sup>2</sup>l(wel<sup>2</sup>)/lu<sup>2</sup>s(lu<sup>2</sup>s). Gen., *vel'leris*. The stipe of certain *Fungi*. [a, 35.]

**VELOPORPHYRE**, n. Ve<sup>2</sup>l-o-po<sup>2</sup>r'f'ir. A cylindrical apparatus used for mixing fatty bodies intimately by means of a solid ball which rolls inside it. [<sup>1</sup>Proc. of the Am. Pharm. Assoc., xxxiv, p. 307 (a, 50).]

**VELOSYNTHESIS** (Lat.), n. f. Vel(wal)-o<sup>2</sup>(o<sup>2</sup>)-si<sup>2</sup>n(su<sup>2</sup>n)'the<sup>2</sup>s. Gen., -thes'cos (-synth'esis). From *velum*, a veil, and *synthesis*, a putting together. Of Syme, staphyloorrhaphy. [a, 34.]

**VELU** (Fr.), adj. V'-lu<sup>2</sup>. See **VILLOUS**.

**VELUM** (Lat.), n. n. Vel(wal)/u<sup>2</sup>m(u<sup>4</sup>m). Fr., *voile*. Ger., *Schleier*. A veil or curtain; a membrane or other thin structure serving as a covering or partition; in the brain, the posterior medullary v. [A, 312 (a, 17); I, 17 (K).]—**Anterior medullary v.** See **VALVE of Vieussens**.—**Inferior medullary v.**, **Posterior medullary v.** Ger., *hintere Markseigel*. A lamina of gray nerve-substance which stretches across the fourth ventricle from the sides of the uvula to the amygdalæ. [I, 1 (K).]—**Superior medullary v.**, **V. apophysi vermiciformi obtentum**. See **VALVE of Vieussens**.—**V. cerebelli (posterius)**. See **Posterior medullary v.**—**V. cerebelli vasculosum**, **V. chorioides** [Vicq d'Azyr] (**interpositum**). See **V. interpositum**.—**V. confine**. A close irregular plexus formed by the spongioblasts at the junction of the gray with the white matter of the brain. [a, 34.]—**V. flocculi**, **V. interjunctum cerebelli**. See **Posterior medullary v.**—**V. interpositum**. Fr., *toile vasculaire*. Ger., *obere Gefäßplatte*, *Gefäßvorhang*. A fold of pia situated just beneath the fornix, which extends over the third ventricle and the optic thalami. Its borders are vascular fringes which constitute the chorioid plexuses of the lateral ventricles. [I, 15 (K).]—**V. medullare anterius**. See **VALVE of Vieussens**.—**V. medullare cerebelli**, **V. medullare posterius** (see **posticum**). See **Posterior medullary v.**—**V. medullare superius**. See **VALVE of Vieussens**.—**V. palati**, **V. palatinum**. Fr., *voile du palais*. Ger., *Gaumensegel*. The incomplete partition between the mouth and the pharynx which is suspended from the posterior margin of the hard palate. Its anterior and posterior surfaces are covered with mucous membrane continuous respectively with that covering the hard palate and that lining the pharynx and the nasal passages. In the middle line it is prolonged into the uvula, and is made up of muscular fibres, acinous glands, and areolar tissue. [L.]—**V. partiale**. The veil extending from the stipe to the margin of the pileus in the *Hymenomyces*. [a, 35.]—**V. processibus cerebelli ad testes interjunctum**. See **VALVE of Vieussens**.—**V. pendulum palati**. See **V. palati**.—**V. pupillæ**. See **MEMBRANA pupillaris**.—**V. Turini**. See **Posterior medullary v.**—**V. terminalis**. See **TENIA semicircularis**.—**V. triangulare**. See **TENIA chorioides superior**.—**V. vesicæ urinariæ**. See **TRIGONE of the bladder**.—**V. Vieussenii**. See **VALVE of Vieussens**.

**VELUMEN** (Lat.), n. n. Ve<sup>2</sup>l(wel<sup>2</sup>)-u<sup>2</sup>(u<sup>4</sup>)/me<sup>2</sup>n. Gen., -um'inis. From *velare*, to pluck. Fr., *velours*. The velvety covering formed over some leaves by hairs. [a, 35.]

**VELUTINOUS**, adj. Ve<sup>2</sup>l-u<sup>2</sup>t'v-n-u<sup>2</sup>s. Lat., *velutinus*. Fr., *velouté*. Ger., *samtartig*, *samtig*. Velvety, covered with a short silky pubescence. [a, 35.]

**VELVET-LEAF**, n. Ve<sup>2</sup>l-v'e<sup>2</sup>t-le<sup>2</sup>f. The *Cissampelos pareira*, *Abutilon Avicennæ*, and *Anthema arborea*. [a, 35.]

**VELVOTE** (Fr.), **VELVOTTE** (Fr.), n's. Ve<sup>2</sup>l-vot. The *Linnaria elatine* and *Linnaria spuria*. [a, 35.]

**VENA** (Lat.), n. f. Ven(wan)/a<sup>2</sup>. 1. See **VEIN**. 2. Of the ancients, either a vein or an artery. [H, 12.]—**Ascending v. cava**. See **Inferior v. cava**.—**Descending v. cava**. See **Superior v. cava**.—**Inferior v. cava**. Ger., *aufsteigende Hohlblutader*. A large vein which collects the blood from the lower limbs and the abdomen. It starts from the junction of the common iliac veins and ends in the right auricle of the heart. [C.]—**Superior v. cava**. A large vein which carries the blood from the head and neck, the upper limbs, and the walls of the thorax to the heart. It originates in the union of the right and left innominate veins. [C.]—**Venæ absorbentes**. The lymphatics. [L.]—**Venæ adiposæ**. See **Adipose VEINS**.—**Venæ advehentes**. See **Venæ hepaticæ advehentes**.—**Venæ advehentes capsulares**. See **Capsular VEINS** (2d def.).—**Venæ alares (narium)**. See **Venæ laterales nasi**.—**Venæ albæ**. The lymphatics. [L.]—**V. anastomotica magna (cavi cranii, seu cerebri)**. See **V. communicans magna**.—**V. angularis**. See **Angular VEIN**.—**V. anguli oris**. A branch of the facial vein leading from the angle of the mouth. [L, 332.]—**V. anonyma (brachiocephalica)**. See **Innominate VEINS**.—**V. anonyma iliaca**. See **Common iliac VEIN**.—**V. anterior cerebri**. See **Inferior cerebral VEIN**.—**V. aqueductus cochleæ**. One of the venæ auditivæ internæ running from the aqueduct of the cochlea. [L.]—**V. arteriarum nutritrix**. See **FORAMEN of Botallo**.—**V. arteriosa**. Of Harvey, the pulmonary artery. [H.]—**Venæ articulares genui**. Branches of the popliteal vein running from the knee joint. [L.]—**V. articularis genu communis**. See **V. poplitea collateralis**.—**V. ascendens**. See **Inferior v. cava**.—**Venæ ascendentes columnæ vertebralis**. The anterior and posterior longitudinal spinal veins. [L.]—**Venæ atrabiliaræ**. See **Suprarenal VEINS**.—**V. auditiva**. A branch of the inferior petrosal sinus that returns the blood from the distribution of the auditory artery. [L.]—**Venæ auditoriæ internæ**. Branches of the superior petrosal and transverse sinuses which convey the blood from the internal ear. [L.]—**V. auricularis anterior**. See **Anterior auricular VEIN**.—**V. auricularis posterior**. See **Posterior auricular VEIN**.—**V. axillaris**. See **Axillary VEIN**.—**V. azygos**. See **Large azygos VEIN**.—**V. azygos accessoria**. See **Left upper azygos VEIN**.—**V. azygos cerebelli posterior**. One of the inferior cerebellar veins that returns the blood from the vermis posterior. [L, 332.]—**V. azygos conarii**. A branch of the vein of Galen running from the conarium. [L, 332.]—**V. azygos lumbaris**. See **Ascending lumbar VEIN**.—**V. azygos magna (seu major)**. See **Large azygos VEIN**.—**V. azygos minor (seu parva, seu sinistra)**. See **Small azygos VEIN**.—**V. basilaris (cerebri)**. See **Basilar VEIN** and **Inferior cerebral VEIN**.—**V. basilaris Rosenthalii (ascendens)**. See **Inferior cerebral VEIN**.—**V. basilica**. See **Basilic VEIN**.—**V. basilica mediana**. See **Median basilic VEIN**.—**Venæ basis vertebrarum**. See **Basivertebral VEINS**.—**Venæ brachiales**. See **Brachial VEINS**.—**Venæ bronchiales anteriores**. Branches of the innominate veins running from the bronchi. [L, 332.]—**Venæ bronchiales posteriores**. Branches of the superior intercostal veins running from the bronchi. [L, 332.]—**Venæ buccales**. See **Buccal VEINS**.—**Venæ bulbosæ (seu bulbo-urethrales)**. Branches of the pudendal plexus running from the bulb of the urethra. [L.]—**Venæ calcaneæ**. Veins running from the heel to the posterior tibial veins. [L.]—**V. capitalis** [Bardeleben] (**brachii**). A fetal vein beginning on the dorsum of the hand and ascending the arm to the primitive jugular vein. [L.]—**Venæ cardiacæ**. See **Cardiac VEINS**.—**Venæ capsulares**. See **Suprarenal VEINS**.—**Venæ cardinales**. See **Cardinal VEINS**.—**V. carotidis externa**. See **Temporal VEIN**.—**V. caudalis**. See **Middle sacral VEIN**.—**V. cava abdominalis (seu ascendens)**. See **Inferior v. cava**.—**V. cava descendens (seu superior, seu thoracica)**. See **Superior v. cava**.—**Venæ cavernosæ**. Branches of the pudendal plexus running from the corpora cavernosa of the penis. [L.]—**Venæ centrales (hepatis)**. See **Intrahepatic VEINS of the liver**.—**V. centralis**. See **V. suprarenalis centralis**.—**V. centralis retinæ**. See **Central VEIN of the retina**.—**V. cephalica anterior**. See **Common facial VEIN**.—**V. cephalica (antibrachii et brachii)**. See **Cephalic VEIN**.—**V. cephalica communis**. See **Common jugular VEIN**.—**V. cephalica externa**. See **Common facial VEIN**.—**V. cephalica humeri**. See **Cephalic VEIN**.—**V. cephalica interna**. See **Internal jugular VEIN**.—**V. cephalica mediana**. See **Median cephalic VEIN**.—**V. cephalica pollicis**. A branch of the venous plexus upon the dorsum of the hand running between the metacarpal bones of the thumb and index finger. [L, 31, 332.]—**V. cephalica posterior**. See **Internal jugular VEIN**.—**V. cephalica radialis**. See **Cephalic VEIN**.—**Venæ cerebelli inferiores**. See **Inferior cerebellar VEINS**.—**Venæ cerebelli superiores**. See **Superior cerebellar VEINS**.—**Venæ cerebelli superiores laterales**. The most external of the superior cerebellar veins. [L, 7.]—**Venæ cerebelli superiores medię**. Those of the cerebellar veins that have a median situation. [L, 7.]—**Venæ cerebrales inferiores**. Branches of the cavernous, circular, or petrosal sinus from the lower surface of the cerebrum. [L, 332.]—**Venæ cerebrales laterales**. Veins from the lower lateral portions of the cerebrum emptying into the cavernous, circular, or petrosal sinus. [L.]—**V. cerebrales Galeni**. See **VEINS of Galen**.—**V. cerebrales interna**. See **Internal cerebral VEIN**.—**V. cerebrales magna**. See **V. magna Galeni**.—**V. cerebri anterior (seu ascendens, seu inferior)**. See **Inferior cerebral VEIN**.—**V. cerebri interna communis**. See **Internal cerebral VEIN**.—**V. cerebri interna major**, **V. cerebri magna**. See **VEINS of Galen**.—**V. cerebri media**. See **Middle cerebral VEIN**.—**Venæ cerebri profundæ**. The choroid vein and the v. corporis striati. [L.]—**V. cerebri relata**. See **V. corporis striati**.—**Venæ cerebri superiores**. See **Superior cerebral VEINS**.—**V. cervicalis ascendens**. See **Anterior cervical VEIN**.—**V. cervicalis profunda**. See **Deep cervical VEIN**.—**V. cervicalis superficialis**. See **Posterior external jugular VEIN** (1st def.).—**V. chorioidæ (lateralis)**. See **Choroid VEIN**.—**Venæ ciliares**. See **Ciliary VEINS**.—**Venæ ciliares anteriores**. See **Anterior ciliary VEINS**.—**Venæ ciliares posteri-**

**ores** (seu **posticæ**). See **Posterior ciliary VEINS**.—**V. circumflexa brachii posterior**. A branch of the axillary vein accompanying the posterior circumflex artery of the arm. [L.]—**Venæ circumflexæ femoris**. Branches of the v. profunda femoris accompanying the external and internal circumflex arteries of the thigh. [L. 332.]—**Venæ circumflexæ penis**. Branches of the dorsal vein of the penis running from the lateral portions of the organ. [L. 332.]—**V. circumflexa illi**. See **Circumflex iliac VEIN**.—**V. circumflexa illi profunda**. See **Deep circumflex iliac VEIN**.—**V. clitoridis dorsalis**. See **Dorsal VEIN of the clitoris**.—**V. colica dextra**. A branch of the superior mesenteric vein that returns the blood from the distribution of the right colic artery. [L.]—**V. colica sinistra**. A branch of the superior mesenteric vein that returns the blood from the distribution of the left colic artery. [L. 332.]—**V. colli cutanea anterior**. See **Anterior jugular VEIN**.—**V. colli cutanea posterior**. See **Posterior jugular VEIN**.—**V. colli superficialis inferior**. See **ARCUS venosus juguli**.—**V. colli transversa**. See **Transverse cervical VEIN** and **ARCUS venosus juguli**.—**V. comitans cruralis tertia**. An anomalous third crural vein. [L. 332.]—**V. comitans hypoglossi**. See **EMISSARIUM condyloideum anterius**.—**Venæ comitantes**. Veins which accompany arteries in pairs, usually one on each side. [L.]—**Venæ comitantes crurales** (seu **femoris**). The venæ comitantes of the femoral artery. [L.] Cf. **Femoral VEIN**.—**Venæ comitantes popliteæ**. The venæ comitantes of the popliteal artery. [L.] Cf. **Popliteal VEIN**.—**Venæ comites**. See **Venæ comitantes**.—**V. communicans cephalica pollicis**. A branch of the v. cephalica pollicis that joins the radial vein. [L.]—**V. communicans magna**. A vein connecting the middle cerebral vein and the superior petrosal sinus. [L.]—**V. communicans ulnaris**. A branch of the basilic vein which communicates with the arcus volaris carpi venosus profundus. [L. 332.]—**Venæ communicantes obturatorie**. Two veins into which the dorsal vein of the penis sometimes divides, that empty into the obturator veins. [L.]—**V. conaril**. See **V. azygos conarii**.—**V. condyloidea postica**. See **EMISSARIUM condyloideum anterius**.—**V. conjugata**. See **Small azygos VEIN**.—**V. conjugata dextra**. See **Large azygos VEIN**.—**Venæ cordis anteriores**. See **Anterior cardiac VEINS**.—**V. cordis Galeni**. 1. See **Middle cardiac VEIN**. 2. In the pl., veins traversing the walls of the right ventricle, into which they empty. [L.]—**V. cordis magna**. See **Large coronary VEIN**.—**V. cordis media**. See **Middle cardiac VEIN**.—**Venæ cordis minime**. The smallest of the cardiac veins emptying into the cavities of the heart. [L. 31.]—**Venæ cordis posteriores**. See **Posterior cardiac VEINS**.—**Venæ cordis minores** (seu **parvæ**). See **Anterior cardiac VEINS**.—**V. cornu** [Lenhossek]. Ger., **Hornvene**. A branch running to the internal iliac vein from the apex of the pudendal plexus. [L. 31.]—**V. coronaria cordis dextra**. See **Small cardiac VEIN**.—**V. coronaria cordis dextra posterior**. See **Small cardiac VEIN**.—**V. coronaria cordis magna**. See **Large coronary VEIN of the heart**.—**V. coronaria cordis media** (seu **minor**). See **Middle cardiac VEIN**.—**V. coronaria cordis parva**. The small cardiac vein; in the pl., the anterior cardiac veins. [L.]—**V. coronaria cordis posterior**. See **Middle cardiac VEIN**.—**V. coronaria cordis sinistra**. See **Large coronary VEIN of the heart**.—**Venæ coronariæ cordis anteriores**. See **Anterior cardiac VEINS**.—**V. coronaria labii inferioris**. See **Inferior labial VEINS**.—**V. coronaria labii superioris**. See **Superior labial VEINS**.—**V. coronaria magna** (cordis). See **Large coronary VEIN**.—**V. coronaria parva**. See **Small cardiac VEIN**.—**V. coronaria uteri**. A vein which with its fellow forms a circle around the os internum of the uterus. [L. 332.]—**V. coronaria ventriculi**. **V. coronaria ventriculi dextra**. See **Coronary VEIN of the stomach**.—**V. coronaria ventriculi inferior**. See **Right gastro-epiploic VEIN**.—**V. coronaria ventriculi superior**. See **Coronary VEIN of the stomach**.—**Venæ corporis callosi anteriores inferiores**. Branches of the v. corporis striati running from the corpus callosum. [L.]—**Venæ corporis callosi posteriores inferiores**. Veins running from the posterior and superior part of the corpus callosum, and emptying into the cavernous or inferior longitudinal sinus. [L. 31.]—**V. corporis striati**. A vein which aids in forming the internal cerebral vein and returns the blood from the corpus striatum. [L. 332.]—**Venæ costales supremæ**. See **Superior intercostal VEINS**.—**V. cruralis**. See **Femoral VEIN**.—**V. cruralis poplitea**. See **Popliteal VEIN**.—**V. cruris**. 1. See **Femoral VEIN**. 2. See **FILARIA medinensis**.—**V. cubitalis cutanea**. See **Ulnar cutaneous VEIN**.—**V. cubiti profunda**. A branch of the median vein running to the inner side of the forearm. [L. 97.]—**V. cutanea externa**. See **Cephalic VEIN**.—**V. cutanea cervicis magna**. See **Posterior external jugular VEIN** (1st def.).—**V. cutanea colli anterior**. See **Anterior jugular VEIN**.—**V. cutanea colli inferior**. See **Common facial VEIN**.—**V. cutanea colli magna**. **V. cutanea colli posterior**. See **External jugular VEIN**.—**V. cutanea externa**. See **Cephalic VEIN**.—**Venæ cutaneæ femoris**. The external and internal saphenous veins and their superficial branches. [L.]—**V. cutanea frontis magna**. See **Frontal VEIN**.—**V. cutanea interna**. See **Ulnar cutaneous VEIN**.—**V. cutanea interna brachii**. See **Basilic VEIN**.—**V. cutanea mediana**. See **Median cutaneous VEIN**.—**V. cutanea radialis** (brachii). See **Cephalic VEIN**.—**V. cutanea ulnaris** (brachii). See **Basilic VEIN** and **Ulnar cutaneous VEIN**.—**V. cystica**. Fr., **veine cystique**. A branch of the portal vein running from the gall-bladder. [L.]—**V. dentalis inferior**. See **Inferior dental VEIN**.—**Venæ diaphragmaticæ inferiores**. See **Inferior phrenic VEINS**.—**Venæ diaphragmaticæ superiores**. See **Superior phrenic VEINS**.—**Venæ digitales**. See **Digital VEINS**.—**Venæ digitales pedis**. Ger., **Fusszehvenen**. Veins running from the toes. [L.]—**Venæ diploicæ** (seu **diploicæ**). Small veins, reduced to their intima, found in the diploe of the flat cranial bones. They empty into the cranial sinuses, into the veins on the exterior of the skull, or into both. [L.]—**V. diploica frontalis**. A vein from the diploe of

the frontal bone which empties either into the superior longitudinal sinus or into the frontal vein. [L. 332.]—**V. diploica occipitalis**. Ger., **Hinterhauptknochenblutader**. A vein from the diploe of the tabular portion of the occipital bone which empties into the torcular Herophilli, the transverse sinus, or one of the occipital veins. [L. 332.]—**V. diploica temporalis anterior**. A vein from the diploe of the temporal bone which empties into the sphenoparietal sinus or some vein over the temporal bone. [L. 332.]—**V. diploica temporalis posterior**. A vein from the diploe of the posterior portion of the temporal bone which empties into the superior longitudinal or the cavernous sinus or the deep auricular vein. [L. 332.]—**Venæ dorsales nasi**. Branches of the angular vein running from the dorsum of the nose. [L. 332.]—**Venæ dorsales pedis**. Ger., **Fussrückvenen**. Veins forming a plexus on the dorsum of the foot. [L.]—**Venæ dorsales penis subcutaneæ**. Small veins running from the prepuce and skin of the dorsum of the penis. [L. 332.]—**V. dorsalis clitoridis**. See **Dorsal VEIN of the clitoris**.—**V. dorsalis mediana**. See **Dorsal VEIN of the penis**.—**V. dorsalis pedis externa**. A superficial dorsal vein in the first metatarsal space. [L. 332.]—**V. dorsalis pedis interna**. A superficial dorsal vein in the fourth metatarsal space. [L. 332.]—**V. dorsalis penis** (profunda). See **Dorsal VEIN of the penis**.—**Venæ dissipinales**. See **Dorsal spinal VEINS**.—**Venæ duodenales**. Branches of the superior mesenteric veins from the duodenum. [L.]—**Venæ duræ matris**. See **Meningeal VEINS**.—**Venæ emissariæ Santorini**. See **EMISSARIA Santorini**.—**V. emulgens**. See **Renal VEIN**.—**V. epigastrica superior**. See **Superior epigastric VEIN**.—**V. ethmoidalis anterior**. See **Anterior ethmoidal VEIN**.—**V. facialis** (anterior). See **Facial VEIN**.—**V. facialis communis**. See **Common facial VEIN**.—**V. facialis cutanea communis**. See **Facial VEIN**.—**V. facialis externa**. See **Temporal VEIN**.—**V. facialis interna** (seu **magna**). See **Facial VEIN**.—**V. facialis posterior**. See **Temporal VEIN**.—**V. faciei transversa**. See **Transverse facial VEIN**.—**V. falciformis**. See **Inferior longitudinal SINUS**.—**V. femoralis**. See **Femoral VEIN**.—**V. femoralis profunda**. See **Deep femoral VEIN**.—**V. femoropoplitea**. A branch of the external saphenous vein in the popliteal space running from the posterior surface of the thigh. [L. 332.]—**V. fossæ Sylvii**. See **Middle cerebral VEIN**.—**V. frontalis**. See **Frontal VEIN**.—**V. Galeni**. See **Middle cardiac VEIN**.—**VEINS of Galen**, and **V. cordis Galeni**.—**V. gastrica dextra inferior**. See **Right gastro-epiploic VEIN**.—**Venæ gastricæ** (breves). See **Gastric VEINS**.—**V. gastrica sinistra inferior**. See **Left gastro-epiploic VEIN**.—**V. gastrica superior**. See **Coronary VEIN of the stomach**.—**Venæ gastrocnemice**. Branches of the popliteal vein running from the gastrocnemii. [L.]—**V. gastrocolica**. A venous stem sometimes formed by the union of the right gastro-epiploic vein and the v. colica dextra. [L.]—**V. gastrollealis**. See **Splenic VEIN**.—**V. genitalis**. See **Vas deferens**.—**Venæ glandulosæ**. See **Submamillary VEINS**.—**V. glutææ**. See **Gluteal VEIN**.—**V. grandis Galeni**. See **VEINS of Galen**.—**Venæ hæmorrhoidales mediæ**. See **Middle hæmorrhoidal VEINS**.—**V. hæmorrhoidalis externa**. See **External hæmorrhoidal VEIN**.—**V. hæmorrhoidalis inferior**. See **Inferior hæmorrhoidal VEIN**.—**V. hæmorrhoidalis interna** (seu **superior**). See **Superior hæmorrhoidal VEIN**.—**V. hemi-azygos**. See **Small azygos VEIN**.—**V. hemi-azygos accessoria** (superior). See **Left upper azygos VEIN**.—**V. hepatica brachii**. See **Right basilic VEIN**.—**Venæ hepaticæ**. See **Hepatic VEINS**.—**Venæ hepaticæ adheventes**. Two veins, a right and a left, branches of the umbilical vein, which become the right and left divisions of the portal vein. [A. 5.]—**Venæ hepaticæ intralobulares**. See **Intralobular VEINS of the liver**.—**Venæ hepaticæ revehentes**. Two veins in the fœtus, a right and a left, which afterward become the hepatic veins. [A. 5.]—**V. hyaloides**. See **Hyaloid VEIN**.—**V. hypogastrica**. See **Internal iliac VEIN**.—**V. ileocolica**. A branch of the superior mesenteric vein running from the ileum and colon. [L. 332.]—**V. iliaca communis**. See **Common iliac VEIN**.—**V. iliaca externa**. See **External iliac VEIN**.—**V. iliaca interna**. See **Internal iliac VEIN**.—**V. iliaca primitiva**. See **Common iliac VEIN**.—**Venæ iliolumbales**. See **Ilio-lumbar VEINS**.—**V. ima impar**. See **V. thyroidea ima**.—**V. infra-orbitalis**. See **Infra-orbital VEIN**.—**Venæ inguinales**. Branches of the internal saphenous vein running from the groin. [L.]—**Venæ innominate**. See **Innominate VEINS**.—**Venæ interapicalares**. Trunks which receive the veins from the palmar aspect of the fingers. [L.]—**Venæ intercostales**. See **Intercostal VEINS**.—**Venæ intercostales anteriores**. See **Anterior intercostal VEINS**.—**Venæ intercostales supremæ**. See **Superior intercostal VEINS**.—**V. intercostalis suprema accessoria**. An anomalous vein accompanying the artery of like name. [L.]—**Venæ interlobulares hepatis**. See **Interlobular VEINS of the liver**.—**Venæ interlobulares renis**. See **Interlobular VEINS of the kidney**.—**Venæ interosseæ antibrachii**. Branches of the brachial veins which follow the distribution of the anterior and posterior interosseous arteries of the forearm. [L. 332.]—**Venæ interosseæ superficiales**. See **Venæ metacarpeæ**.—**V. interventricularis postica** (seu **posterior**). See **Middle cardiac VEIN**.—**V. ischiadica**. See **Sciatic VEIN**.—**V. jugularis anterior**. See **Anterior jugular VEIN**.—**V. jugularis anterior horizontalis**. See **ARCUS venosus juguli**.—**V. jugularis cephalica** (posterior). **V. jugularis cerebralis**. See **Internal jugular VEIN** (1st def.).—**V. jugularis communis**. See **Common jugular VEIN**.—**V. jugularis externa**. See **External jugular VEIN**.—**V. jugularis externa anterior**. See **Anterior jugular VEIN**.—**V. jugularis externa posterior**. See **External jugular VEIN** and **Posterior external jugular VEIN**.—**V. jugularis interna**. See **Internal jugular VEIN**.—**V. jugularis primitiva**. See **Primitive jugular VEIN**.—**V. jugularis thoracica**. See **Innominate VEIN**.—**V. jugularis transversalis anterior**. See **ARCUS venosus juguli**.—**Venæ labiales anteriores**. Branches of the internal saphenous vein running from the labia pudendi. [L. 332.]—**Venæ labiales inferiores**. See **Inferior labial VEINS**.—**Venæ labiales posteriores**. Branches of the pudendal plexus running from the labia pudendi. [L.]—**V. labi-**

**alis media.** See *V. anguli oris*.—**V. labialis superior.** See *Superior labial vein*.—**Venae lacrimales.** See *Lacrimal veins*.—**Venae lacteae.** The lymphatics. [L.]—**V. laryngea inferior.** See *Inferior laryngeal vein*.—**Venae laterales nasi.** Ger., *Flügelnasenvenen*. Branches of the angular vein running from the lateral aspect of the nose. [L.]—**V. lienalis.** See *Splenic vein*.—**V. lienalis accessoria.** An anomalous branch of the portal vein accessory to the splenic vein. [L. 332.]—**V. lingualis.** See *Lingual vein*.—**Venae lumbales (transversae).** See *Lumbar veins*.—**V. lumbales ascendens.** See *Ascending lumbar vein*.—**Venae lumbares.** See *Lumbar veins*.—**Venae lumbocostales communes.** Costal veins, one on each side, which unite to form the large azygos vein. [L. 332.]—**V. lumbocostalis.** See *Ascending lumbar vein*.—**Venae lymphaticae.** The lymphatics. [H. 12.]—**Venae maculares.** Veins accompanying the arteriae maculares inferiores et superiores.—**V. magna.** Of Harvey, the vena cava. [H. 12.]—**V. magna Galeni.** 1. See *Veins of Galen*. 2. The common trunk formed by the union of the veins of Galen. [L.] Cf. *Internal cerebral vein*.—**V. magna longitudinalis anterior.** See *Anterior longitudinal spinal veins*.—**V. mammaria interna.** See *Internal mammary vein*.—**V. marginalis ventriculi sinistri.** See *Middle cardiac vein*.—**Venae massetericae.** See *Masseteric veins*.—**V. maxillaris anterior interna.** See *Deep facial vein*.—**V. maxillaris externa.** See *Facial vein*.—**V. maxillaris interna.** See *Internal maxillary vein*.—**V. media cordis.** See *Middle cardiac vein*.—**V. mediana.** See *Median vein* and *Filaria medinensis*.—**V. mediana antibrachii.** See *Median vein*.—**V. mediana basilica.** See *Median basilic vein*.—**V. mediana brachii.** See *Median cutaneous vein* and *Deep median vein*.—**V. mediana cephalica.** See *Median cephalic vein*.—**V. mediana collis.** See *Anterior jugular vein*.—**V. mediana communis (seu cutanea).** See *Median cutaneous vein*.—**V. mediana medullae spinalis anterior.** A vein (or veins) of small size in the anterior median longitudinal fissure of the spinal cord. [L. 332.]—**V. mediana medullae spinalis posterior.** See *Venae spinales propriae laterales*.—**Venae mediastinae (seu mediastinales) anteriores.** See *Anterior mediastinal veins*.—**Venae mediastinales posteriores.** See *Posterior mediastinal veins*.—**Venae meningae.** See *Meningeal veins*.—**V. meningea media.** See *Middle meningeal vein*.—**V. mentalis.** See *Mental vein*.—**V. mesenterica inferior.** See *Inferior mesenteric vein*.—**V. mesenterica magna (seu major).** See *Superior mesenteric vein*.—**V. mesenterica minor (seu parva).** See *Inferior mesenteric vein*.—**V. mesenterica superior.** See *Superior mesenteric vein*.—**Venae metacarpeae.** Small veins of the dorsum of the hand in the intermetacarpal spaces. [L.]—**V. metacarpea ulnaris.** A cutaneous vein in the fourth metacarpal space. [L. 322.]—**Venae musculares.** Venous twigs running from muscles. [L.]—**Venae musculares oculi.** Branches of the ophthalmic vein running from the extrinsic muscles of the eye. [L. 332.]—**Venae nasales.** See *Nasal veins*.—**Venae nasales dorsales.** See *Venae dorsales nasi*.—**Venae nasales laterales (alares).** See *Venae laterales nasi*.—**V. nasalis posterior.** See *Sphenopalatine vein*.—**V. nervi hypoglossi.** See *EMISSARIUM condyloideum anterius*.—**Venae nutritiae.** Ger., *Ernährungsveren.*, *Knochenvenen*. Veins accompanying the nutrient arteries of bones. [L.]—**V. obliqua atrii posterior (seu sinistra).** **V. obliqua auricularis.** See *Oblique vein of the heart*.—**V. obturatoria.** See *Obturator vein*.—**Venae occipitales anteriores.** Branches of the posterior auricular veins running from the occipital region. [L.]—**V. occipitalis posterior.** See *Occipital vein*.—**Venae oesophageae.** See *Oesophageal veins*.—**Venae ophthalmosentericae.** See *Vitelline veins*.—**V. ophthalmica (cerebralis).** See *Ophthalmic vein*.—**V. ophthalmica externa (seu facialis, seu inferior).** See *Inferior ophthalmic vein*.—**V. ophthalmica interna (seu superior).** See *Ophthalmic vein*.—**V. ophthalmomeningea.** A branch either of the sphenoparietal sinus or the ophthalmic vein running from the fissure of Sylvius. [L.]—**V. palatina (inferior).** See *Palatine vein* (1st def.).—**Venae palpebrales superiores.** See *Superior palpebral veins*.—**V. pancreatica.** See *Pancreatic vein*.—**Venae pancreaticoduodenales.** See *Pancreaticoduodenal veins*.—**V. para-umbilicalis (Hyrtl).** **V. paramphalica (Schiff).** See *Paraumbilical vein* (1st def.).—**V. penis dorsalis.** See *Dorsal vein of the penis*.—**Venae pericardiacae.** See *Pericardiac veins*.—**Venae perinei.** Ger., *Mittelfleischvenen*, *Dammvenen*. Veins accompanying the arteries of the perineum. [L.]—**V. peronea.** 1. A branch of the posterior tibial vein accompanying the distribution of the peroneal artery. [L.] 2. In the pl., see *Peroneal veins*.—**V. petrosa inferior.** A small vein which enters the skull through the jugular foramen and empties into the inferior petrosal sinus. [L.]—**Venae pharyngeae.** See *Pharyngeal veins*.—**V. phrenica.** See *Phrenic veins*.—**Venae phrenicae inferiores.** See *Inferior phrenic veins*.—**Venae phrenicae superiores.** See *Superior phrenic veins*.—**Venae plantares.** See *Plantar veins*.—**V. poplitea.** See *Popliteal vein*.—**V. poplitea anterior.** See *Anterior tibial vein*.—**V. poplitea collateralis.** An anomalous branch of the femoral vein running from the knee joint. [L. 332.]—**V. porta.** **V. portae.** **V. portarum.** See *Portal vein*.—**V. posterior atrii sinistri.** See *Oblique vein of the heart*.—**V. posterior ventriculi sinistri.** A vein on the posterior surface of the left ventricle of the heart opening usually into the coronary sinus, occasionally into the large coronary vein of the heart. [L. 31.]—**V. preparata.** See *Frontal vein*.—**Venae profundae brachii confluuntantes.** See *Brachial veins*.—**Venae profundae brachii (propriae).** Branches of the axillary vein which accompany the inferior and superior profunda arteries of the arm. [L. 332.]—**Venae profundae clitoridis.** Branches of the pudendal plexus running from the clitoris. [L. 332.]—**Venae profundae crurales et femorales.** The veins that return the blood from the deep structures of the leg and thigh. [L. 332.]—**V. profunda linguae.** See *Ranine vein*.—**V. profunda penis.** A branch of the pudendal plexus running from the deep

portions of the penis. [L. 332.]—**Venae pterygoideae.** Branches of the internal maxillary plexus running from the pterygoid muscles. [L. 332.]—**V. publica.** See *Pubic vein*.—**V. pudenda communis.** See *Internal pudic vein*.—**Venae pudendae externae profundae.** Branches of the femoral vein running from the symphysis pubis and its vicinity. [L. 332.]—**V. pudenda interna.** See *Internal pudic vein*.—**V. pudendo-glutea (Lenhoussek).** A branch of the internal iliac vein connected with the pudendal plexus and receiving the gluteal and sciatic veins. [L. 332.]—**Venae pulmonales.** See *Pulmonary veins*.—**V. pulmonalis dextra inferior.** A vein running from the lower lobe of the right lung to the right pulmonary vein. [L. 332.]—**V. pulmonalis dextra media.** An occasional vein running from the middle lobe of the right lung to the right pulmonary artery. [L. 332.]—**V. pulmonalis dextra superior.** A vein running from the middle and upper lobes (occasionally from the latter alone) to the right pulmonary vein. [L. 332.]—**V. pulmonalis sinistra inferior.** The lower of the two vessels which unite to form the left pulmonary vein. [L. 332.]—**V. pulmonalis sinistra superior.** The upper of the two vessels which form the left pulmonary vein. [L. 332.]—**V. pylorica.** A branch of the portal vein, or of one of its branches, that returns the blood from the pylorus. [L.]—**V. radialis cephalica (seu cutanea).** See *Radial (cutaneous) vein*.—**V. ranina.** See *Ranine vein*.—**Venae rectae.** The vasa recta of the kidney. [L.]—**V. reflexa.** See *V. corporis striati*.—**V. renalis.** See *Renal vein*.—**V. renalis adhevens.** In the *Amphibia*, a renal vein whose contents pass through the liver. [L.]—**V. retinae centralis.** See *Central vein of the retina*.—**Venae revehentes.** See *Venae hepaticae revehentes*.—**V. Rosenthalli.** See *Inferior cerebral vein*.—**V. sacci lacrimalis.** Ger., *Thränsackblutader*. A branch of the ophthalmic vein running from the lacrymal sac. [L.]—**Venae sacrales laterales.** See *Lateral sacral veins*.—**V. sacralis media.** See *Middle sacral vein*.—**V. septi lucidi.** Of Schwabe, a vein which enters the anterior extremity of the septum lucidum and runs backward along its lower edge to anastomose with the v. corporis striati. [I. 17 (K.).]—**V. salutaris.** **V. salvatella.** See *V. metacarpea ulnaris*.—**V. saniosa.** See *Filaria medinensis*.—**V. saphena externa.** See *External saphenous vein*.—**V. saphena interna (seu magna).** See *Internal saphenous vein*.—**V. saphena minor (seu parva, seu posterior).** See *External saphenous vein*.—**Venae satellites arteriarum.** See *Venae comitantes*.—**V. scapulae transversa.** See *Transverse acapular vein*.—**Venae scrotales anteriores.** Branches of the internal saphenous vein running from the anterior portion of the scrotum. [L. 332.]—**Venae scrotales posteriores.** Branches of the internal iliac vein running from the posterior portion of the scrotum. [L. 332.]—**V. semino-urethro-sacralis.** A branch of the internal iliac vein connected with the pudendal plexus. \*It receives veins from the seminal vesicles and one emerging from the second anterior sacral foramen. [L. 332.]—**V. sine comite (seu sine pare).** See *Large azygos vein*.—**V. spermatica interna.** See *Internal spermatic vein*.—**V. sphenopalatina.** See *Sphenopalatine vein*.—**Venae spinales externae posteriores.** See *Dorsal spinal veins*.—**Venae spinales internae anteriores.** See *Anterior longitudinal spinal veins*.—**Venae spinales internae posteriores.** See *Posterior longitudinal spinal veins*.—**Venae spinales longitudinales anteriores.** See *Anterior longitudinal spinal veins*.—**Venae spinales longitudinales posteriores.** See *Posterior longitudinal spinal veins*.—**Venae spinales propriae.** The veins running from the substance of the spinal cord. They communicate with the veins within the spinal canal and above with the inferior cerebellar veins of the inferior petrosal sinuses. [L.]—**Venae spinales propriae laterales (seu posteriores).** Small veins running along the postero-lateral surfaces of the spinal cord. [L. 332.]—**V. spinalis mediana posterior.** A vein running along the middle of the posterior aspect of the spinal cord. [L.]—**V. spinalis propria anterior.** See *V. mediana medullae spinalis anterior*.—**V. splenica.** See *Splenic vein*.—**V. splenica brachii.** See *Left basilic vein*.—**Venae stellatae.** Numerous small groups of venous radicles on the surface of the kidney, which converge, unite, penetrate the renal substance, and form the beginnings of the interlobular renal veins. [J. 24, 28, 30.]—**V. stylomastoidea.** A branch of the temporal vein running from the mastoid region. [L.]—**V. subalaris.** See *Axillary vein*.—**V. subclavia.** See *Subclavian vein*.—**V. subcutanea colli (anterior).** See *Anterior jugular vein*.—**V. subcutanea colli posterior.** See *Posterior external jugular vein* (1st def.).—**Venae subcutanea brachii.** The basilic, cephalic, and median veins and their branches. [L. 332.]—**Venae subcutanea femoris.** See *Vena cutanea femoris*.—**V. subcutanea radialis.** See *Radial cutaneous vein*.—**V. sublingualis.** See *Ranine vein*.—**V. sublobularis.** See *Sublobular vein*.—**Venae submaxillares.** See *Submaxillary veins*.—**V. submentalis.** See *Submental vein*.—**V. subscapularis.** See *Subscapular vein*.—**Venae subventrales.** The internal mammary and the inferior and superior epigastric veins. [L. 332.]—**Venae subvertebrales laterales.** A collective name for the veins in front of and on each side of the vertebral column (i. e., the large, small, and left upper azygos, superior intercostal, external vertebral, internal jugular, ilio lumbar, and lateral and middle sacral veins). [L. 332.]—**V. subvertebralis media.** See *Inferior v. cava*.—**V. sulci centralis.** A vein in the central fissure of the brain which empties into the superior longitudinal or transverse sinus. [L. 332.]—**Venae superficiales cruris et femoris.** See *Vena cutanea femoris*.—**V. superficialis colli anterior.** See *Anterior jugular vein*.—**V. superficialis colli inferior.** See *ARCUS venosus juguli*.—**V. superficialis colli verticalis.** **V. superficialis mediana colli.** See *Anterior jugular vein*.—**V. supraorbitalis.** See *Supraorbital vein*.—**Venae supra renales.** See *Suprarenal veins*.—**V. suprarenalis centralis.** The largest of the suprarenal veins. [L. 332.]—**V. suprascapularis.** See *Suprascapular vein*.—**Venae sulares profundae.** See *Vena gastrocnemii*.—**V. temporalis anterior.** See *Anterior temporal vein*.—**V. temporalis communis.** See *Temporal vein*.—**V. temporalis media (seu pro-**

funda). See *Middle temporal VEIN*.—*V. temporalis superficialis*. See *Superficial temporal VEIN*.—*V. terminalis*. See *Sinus terminalis*.—*Venæ Thebesii*. See *Venæ cordis minime*.—*V. thoracica longa*. See *Long thoracic VEIN*.—*V. thoracica superior*. See *Superior thoracic VEIN*.—*V. thoracicoacromialis*. See *Acromio-thoracic VEIN*.—*Venæ thymicæ*. See *Thymic VEINS*.—*V. thyroidea ima*. An unpaired vein running from the isthmus of the thyroid gland and emptying into the left innominate vein. [L.]—*Venæ thyroideæ inferiores*. See *Inferior thyroid VEINS*.—*V. thyroideæ laterales (seu media)*. See *Middle thyroid VEIN*.—*V. thyroidea superior*. See *Superior thyroid VEIN*.—*Venæ tibiales posteriores*. See *Posterior tibial VEINS*.—*V. tibialis antica*. See *Anterior tibial VEIN*.—*V. tonsillaris*. Ger., *Mandelvene*. A branch of the facial vein, or of one of its branches, running from the venous plexus around the tonsil. [L.]—*V. transversa colli*. See *Transverse cervical VEIN*.—*V. transversa colli et scapulae*. See *Transverse cervico-scapular VEIN*.—*V. transversa faciei*. See *Transverse facial VEIN*.—*V. transversa scapulae*. See *Transverse scapular VEIN*.—*V. ulnaris*. See *Ulnar VEIN*.—*V. ulnaris cutanea*. See *Ulnar cutaneous VEIN*.—*Venæ umbilicales*. See *Umbilical VEINS*.—*Venæ uterinae*. See *Uterine VEINS*.—*Venæ uteroplacentares*. See *Utero-placental sinuses*.—*Venæ vasorum*. Veins that return blood from the walls of blood-vessels. [L.]—*V. velata*. See *V. corporis striati*.—*V. vertebralis anterior*. See *Anterior vertebral VEIN*.—*V. vertebralis externa*. See *Deep cervical VEIN and Ascending cervical VEIN*.—*V. vertebralis externa anterior*. See *Ascending cervical VEIN*.—*V. vertebralis interna (seu lateralis)*. See *Vertebral VEIN*.—*V. vertebralis posterior*. See *Deep cervical VEIN*.—*V. vertebralis superficialis*. See *Vertebral VEIN and Anterior vertebral VEIN*.—*Venæ vertebrolumbares*. See *Lumbar VEINS*.—*Venæ vesicales*. Small veins running from the walls of the bladder. [L.]—*Venæ Viesseni*. See *Anterior cardiac VEINS*.—*Venæ virides*. The ranine veins. [L.]—*Venæ vitellinae laterales*. See *Lateral vitelline VEINS*.—*V. vitellina posterior*. See *Posterior vitelline VEIN*.—*Venæ vorticose (Stenosis)*. See *Vasa vorticosa*.—*V. zygomatico-orbitalis*. See *Orbital VEIN*.

**VENÆSECTIO** (Lat.), n. f. Ve'n(wan)-e²(a²-e²)-se²k'shi²(tī²)-o. Gen., -io'nis. See **VENESECTION**.

**VENAL**, adj. Ve'n'l. Lat., *venalis*. See **VENOUS**.

**VENATIO** (Lat.), n. f. Ve'n(wan)-a(a³)/shi²(tī²)-o. Gen., -o'nis. From *venari*, to hunt (1st def.), or *vena*, a vein (2d def.). 1. A hunting. [A. 312 (a, 17).] 2. See **VENATION**.—**Floccorum v.** See **CARPOLOGY**.

**VENATION**, n. Ve'n-a'shu'n. Lat., *venatio*. Ger., *Knospenlage, Blätterknospenlage*. Veining; the arrangement of the veins of a leaf, an insect's wing, etc. [a, 35].—**Forked v.** *Furcate v.* V. in which the veins fork once or repeatedly into equal divisions. [a, 35].—**Parallel v.** See *Unbranched v.*—**Radiate v.** V. in which the main veins radiate from the top of the petiole. [a, 35].—**Reticulate v.** V. in which the veins form a network. [a, 35].—**Unbranched v.** A v. in which the veins, unconnected by cross-veins or connected by minute veinlets only, run in a parallel or undivided manner from the base of the leaf to the tip (as in grasses) or from the midrib to the margin (as in the banana and many other tropical endogens). [a, 35].

**VENENATUS** (Lat.), adj. Ve'n(we'n)-e²n(an)-at(a³)/u²s(u²s). From *venenare*, to poison. Fr., *venéneux*. Poisonous, venomous.

**VENENIFIC**, adj. Ve'n-e²n-īf'ī²k. From *venenum*, poison, and *facere*, to make. Fr., *vénéfique*. Poison-producing.

**VENEOSE**, adj. Ve'n'e²n-os. Lat., *venenosus* (from *venum*, poison). Poisonous, venomous.

**VENENUM** (Lat.), n. n. Ve'n(we'n)-en(an)/u²m(u²m). See **POISON**.—**V. botulinum**. See *ALLANTOTOXICON*.

**VÉNÉOROLOGIE** (Fr.), n. Va-na-o-ro-lo-zhe. That part of medicine which relates to venereal diseases. ["Ann. de dermat. et de syphil." *passim* (G.)]

**VENEREAL**, adj. Ve'n-e²r'e²'l. Lat., *venereus, venerius* (from *Venus*, the goddess of love). Fr., *vénerien*. Ger., *venereich*. 1. Pertaining to or arising from sexual intercourse. 2. Adapted to the cure of diseases resulting immediately or indirectly from sexual intercourse. 3. Aphrodisiac. 4. As a n. v. disease. [G, 30.]

**VENEREUS** (Lat.), adj. Ve'n(we'n)-er(e²r)/e²-u²s(u²s). 1. Venereal. 2. Containing copper.

**VENERIE** (Ger.), n. Van-ar-e'. See **SYPHILIS**.

**VENERY**, n. Ve'n'e²r-i². Sexual intercourse.

**VENESECTION**, n. Ven-e²-se²k'shu'n. Lat., *venæsectio* (from *vena*, a vein, and *secare*, to cut). Ger., *Venesectio*. Bloodletting by the opening of a vein. [a, 48].—**Gordonian v.** V. in a case of puerperal fever, in accordance with Gordon's teachings. [A, 84.]

**VENIMEUX** (Fr.), adj. V'-ne-mu². Poisonous. [a, 14.]

**VENIN** (Fr.), n. V'-na²n². See **VENOM**.—**V. dartreux**. See *Dartroous HUMOR*.

**VENOM**, n. Ve²'n'm. Gr., *φάρμακον*. Lat., *venenum*. Fr., *venin, poison*. Ger., *Gift*. Poison, especially the poison secreted by certain animals (e. g., serpents, scorpions, etc.). [a, 48].—**Quickening v.** *Vital v.* Semen. [J.]

**VENOMOUS**, adj. Ve²'n'm-u²s. Lat., *venenatus*. Fr., *venimeux*. Ger., *giftig*. Pertaining to or characterized by venom; secreting venom. [a, 48.]

**VENOSE**, adj. Ven'os. Lat., *venosus* (from *vena*, a vein). Fr., *veineux*. Ger., *venös, aderig, geader*. 1. From **VEINED**. 2. Veiny; abounding in veins, forming a network of veins. The *Venose* are an order of the *Synchlamydeæ*. [a, 35.]

**VENOSITY**, n. Ve'n-o²s'i²t-i². Lat., *venositas*. Fr., *veinosité*. Ger., *Venosität*. 1. An increase in the number of veins or the amount of venous blood in a part. 2. A condition of the blood in which it contains less than the normal proportion of oxygen (i. e., is venous in the systemic arteries). It is due to a deficient aeration of the blood in the lungs, and often occurs in physiological experiments by a cessation of the use of the bellows supplying air to the lungs. [J, 19; K, 4.]

**VENOUS**, adj. Ven'u²s. Gr., *φλεβώδης*. Lat., *venosus* (from *vena*, a vein). Fr., *veineux*. Ger., *aderig, venös*. 1. Pertaining to the veins or their contents. 2. Pertaining to blood containing a relatively large amount of carbon dioxide and a relatively small amount of oxygen. [J.] See **VENOUS BLOOD**.

**VENTER** (Lat.), n. m. Ve²nt(we²nt)/u²r(e²r). Gen., *vent'ris*. Gr., *γαστήρ, κοιλία*. Fr., *ventre*. Ger., *Bauch*. 1. See **ABDOMEN**. 2. See **RUMEN**. 3. See **UTERUS**; in law, the maternal patchage of a child. 4. See **FETUS**. 5. See **ENTRAILS**. 6. Any belly-like swelling or protuberance, or any broad expanse of surface. 7. The inner face of a carapellary leaf. 8. The thick basal part of an archegone, containing the oosphere. [a, 35].—**V. bifidus** *gastrocæci*. A fleshy division of the branch of the flexor sublimis digitorum which goes to the index finger that becomes tendinous, then unites in another fleshy portion in the palm of the hand, again becoming tendinous, and eventually being inserted in the normal manner into the margins of the second phalanx. ["N. Y. Med. Jour.," June 2, 1888, p. 612 (a, 34)].—**V. illi**. See *V. of the ilium*.—**V. imus**. See **HYPOGASTRIUM** (1st def.).—**V. inferus**. *V. infimus*. See **ABDOMEN**.—**V. magnus**. See **RUMEN**.—**V. medius**. An old name for the thoracic cavity. [L, 41 (a, 14)].—**V. musculi**. See **BELLY** (2d def.).—**V. of the ilium**. The broad expanded portion of the innominate bone. [L.]—**V. parvus**. See **HYPOGASTRIUM** (1st def.).—**V. propendens**, *V. propendulus*. See *Pendulous ABDOMEN*.—**V. renis**. See *PELVIS of the kidney*.—**V. scapulae**. The broad expanded portion of the scapula. [L.]—**V. supremus**. The cranial cavity. [A, 313.]

**VENTEUX** (Fr.), adj. Va²n²-tu². Flatulent. [L, 41 (a, 14).]

**VENTIL** (Ger.), n. Ve²nt-el'. See **VALVE**.—**Segelv'**. A segment (literally a sail) of a valve of the heart. [L.]

**VENTILATION**, n. *Ve²nt-i²l-a'shu²n*. Lat., *ventilatio* (from *ventilare*, to fan). Fr., *v.* Ger., *V.* *Ventilierung*. The act or process of supplying fresh and pure air (e.g., to a chamber or to the lungs). [a. 48.]—**Lung v.**, **Pulmonary v.**, **Pulmonic v.** The constant supply of pure air to the lungs and the removal of vitiated air by the processes of inspiration and expiration. [J.]—**Respiratory v.** The constant supply of a fluid rich in oxygen and comparatively poor in carbon dioxide to a respiratory membrane, and the constant removal of the fluid (air or water) after it has given up oxygen and received carbon dioxide in return. [J.]

**VENTILATOR**, n. *Ve²nt-i²l-at-o²r*. From *ventilare*, to fan. Fr., *ventilateur*. Ger., *V.* Any apparatus used for purposes of ventilation. [L.]

**VENTNOR**, n. *Ve²nt-no²r*. A sea-bathing resort on the south coast of the Isle of Wight, England. [L, 57 (a, 14).]

**VENTOUSE** (Fr.), n. *Va²n²-tuz*. See *Cup* (2d def.).—**V. de Junod**. See *Boor*.—**V. utérine**. See *METROMYZEUS*.

**VENTRAD**, adv. *Ve²nt-ra²d*. Toward the belly; in human anatomy, anterior to the vertebral column. [L, 343.]

**VENTRAL**, adj. *Ve²nt-r¹l*. Lat., *ventralis* (from *venter*, the belly). 1. Pertaining to the belly or to the portion of the body anterior to the vertebral column; the opposite of dorsal. [L, 343.] 2. In botany, pertaining to the anterior surface. [a, 35.]

**VENTRALLY**, adv. *Ve²nt-r¹l-i²*. Ventrally.

**VENTRE** (Fr.), n. *Va²n²-tr¹*. The belly. See *VENTER*.—**Bas-v.** See the major list.—**V. avalé**. See *Pendulous ABDOMEN*.—**V. en bateau**. The boat-like appearance which results from retraction of the abdominal walls. [A. Fournier, "Union méd.," June 10, 1884, p. 1021 (D).]—**V. en besace**, **V. en surplomb**. See *Pendulous ABDOMEN*.—**V. inférieur**. See *BAS-V.*—**V. réservé**. See *CONSTIPATION*.

**VENTRICLE**, n. *Ve²nt-r¹²-k¹l*. Lat., *ventriculus* (dim. of *venter*, the belly). Fr., *ventricule*. Ger., *Ventrikel*, *Kammer*. A small thick-walled cavity in an organ, especially the heart or brain.—**Anterior v's.** See *Lateral v's.*—**Anterior v. of the heart.** See *Right v. of the heart.*—**Aortic v.** See *Left v. of the heart.*—**Cerebellar v.** [Owen]. A prolongation of the fourth v. into the primary cephalic vesicle; described as strictly embryonic in man, but persistent in birds, fishes, and reptiles. [I, 14 (K).]—**Cerebral v.** A v. of the brain.—**Fifth v.**, **First v.** [Wenzel]. Lat., *sinus quintus*. Ger., *Kammer der Scheidewand*. The space between the two laminae of the septum lucidum. [L.]—**Fourth v.** Lat., *ventriculus cerebri quartus*. Ger., *Kammer des kleinen Hirns*. A lozenge-shaped space bounded laterally above by the processus cerebelli ad testes and below by the posterior pyramids and the restiform bodies. Its floor is formed by the posterior surface of the pons Varolii and medulla oblongata, and its roof by the valve of Vieussens and the inferior surface of the cerebellum (a layer of the pia being interposed). It connects above with the aqueduct of Sylvius, and below with the central canal of the spinal cord. [L, 31, 172, 332.]—**Large v's.**, **Lateral v's (of the brain).** Lat., *ventriculi cerebri laterales*. Ger., *Seitenventrikel des Gehirns*. Serous cavities, one on each side, in the cerebral hemispheres, lined with ciliated epithelium, and separated from each other in the middle line by the septum lucidum. They communicate with the anterior portion of the third v. and with each other by the foramen of Monro. Each is divided into a central triangular portion, the body, from which the anterior, middle, and posterior cornua descend into the substance of the hemisphere. The roof is formed by the lower surface of the corpus callosum and the substance of the cerebrum, and the floor by the corpus striatum, tænia semicircularis, optic thalamus, chorioid plexus, corpus fimbriatum, fornix, cornu Ammonis, eminentia collateralis, fascia dentata, and the substance of the cerebrum. [L, 142, 172, 332.]—**Lateral v. of the cerebellum.** A furrow on the floor of each half of the fourth v. near the lateral wall. [I, 35 (K).]—**Left v. of the heart.** Lat., *ventriculus cordis sinister*. Ger., *linker Ventrikel*. The cavity which occupies a small part of the left anterior portion of the heart and the larger part of its left posterior portion, and forms the apex. It communicates with the aorta and the left auricle. By the contractions of its walls it propels the arterial blood into the arterial system through the aorta. [L.]—**Middle v.** See *Third v.*—**Middle v. of the cerebellum.** The median fissure on the floor of the fourth v. [I, 35 (K).]—**Optic v's.** See *Lateral v's.*—**Pineal v.** Of Leuret and Gratiolet, a small cavity in the centre of the pineal gland. [I, 35 (K).]—**Posterior v. of the heart.** See *Left v. of the heart.*—**Proencephalic v.** [Owen]. A lateral v. in the brain of the embryo. [I, 14 (K).]—**Right v. of the heart.** Lat., *ventriculus cordis dexter*. Ger., *rechter Ventrikel*. The rounded triangular cavity of the heart which forms the greater part of its anterior and a small part of its posterior portion. It communicates with the right auricle, and propels the venous blood through the pulmonary arteries. [L.]—**Second v's.**, **Superior v's.** See *Lateral v's.*—**Sylvian v.** See *Fifth v.*—**Terminal v.** See *Fourth v.*—**Third v.** Ger., *Mittellirnhöhle*, *mittlere Kammer*. An open space between the optic thalami, bounded above by the lower surface of the velum interpositum, and laterally by the peduncles of the pineal gland. Its floor is formed by the lamina cinerea, tuber cinereum, infundibulum, corpora albicantia, and posterior perforated space. It communicates with the lateral v's through the foramen of Monro, and with the fourth v. through the aqueduct of Sylvius and with the cavity of the infundibulum. [L, 31, 142, 172.]—**Third v. proper.** The third v. as distinguished from the foramen of Monro. ("Boston Med. and Surg. Jour.," Aug. 12, 1880, p. 152 (K).) —**V. of Arantius.** 1. The small depression or cavity at the pointed extremity of the calamus scriptorius. [I, 17 (K).] 2. See *CALAMUS scriptorius*.—**V. of Morgagni.** See *V. of the larynx*.—**V. of the corpus callosum.** See *Fifth v.*—**V's of the heart.** The right and left v's of the heart.—**V. of the larynx.** Lat., *sinus laryngis*. An elongated depression between the superior and inferior vocal

bands which is prolonged upward as the laryngeal pouch. [C; L.] —**V. of the olfactory nerve.** Lat., *ventriculus bulbi*. A cavity in the olfactory bulb which in some animals communicates directly with the corresponding lateral v. [I, 12, 17 (K).]—**V. of the pelvic enlargement.** The persistent central canal of the spinal cord seen in cold-blooded animals. [I, 14 (K).]—**V. of the prosencephalon.** See *Proencephalic v.*—**V. of the septum.** See *Fifth v.*—**V. of the spinal cord.** See *Central canal of the spinal cord.*—**Verga's v.** A space sometimes existing between the lyra Davidis and the corpus callosum. [a, 34.]

**VENTRICOLUMNÆ** (Lat.), n. f. pl. *Ve²nt(we²nt)-r¹²-ko²l-u²m(u²m)'ne(na²-e²)*. From *venter*, the belly, and *columna*, a column. Of Wilder, see *Anterior COLUMNS of the spinal cord*.

**VENTRICOSE**, **VENTRICOUS**, adj's. *Ve²nt-r¹²-k-os*, *-u²s*. Lat., *ventricosus* (from *venter*, the belly). Fr., *ventru*, *renflé*. Ger., *bauchig*. Inflated on one side, swollen unequally; bulbous. [a, 35.]

**VENTRICULAR**, adj. *Ve²nt-r¹²-k'u²l-a²r*. Fr., *ventriculaire*. Pertaining to a ventricle. [L.]

**VENTRICULE** (Fr.), n. *Va²n²-tre-ku²l*. See *VENTRICLE*.—**Grand v.** See *Lateral VENTRICLE*.—**Premier v.** See *Fifth VENTRICLE*.—**V's antérieurs.** See *Lateral VENTRICLES*.—**V. aortique.** See *Left VENTRICLE of the heart*.—**V. cérébelleux.** See *Fourth VENTRICLE and Cerebellar VENTRICLE*.—**V. commun** [Vesalius]. **VENTRIÈRE** (Fr.), n. *Va²n²-tre-e²r*. See *TUNICA abdominalis*.

**VENTRIKEL** (Ger.), n. *Fe²nt-rek'e²l*. See *VENTRICLE*.—**Gehirnv.** A ventricle of the brain. [L.]—**Herz v.** A ventricle of the heart. [L.]—**Hirnv.** See *Gehirnv.*—**Seiten v.**, **V. des Grosshirns.** See *Lateral VENTRICLES*.—**V. Hohlräum** [Schwalbe]. The cavity of the fourth ventricle. [I, 17 (K).]

**VENTRILOQUISM**, n. *Ve²nt-r¹²'o-kwi²z'm*. From *venter*, the belly, and *loqui*, to speak. Fr., *ventriloquisme*. Ger., *Bauchreden*. The art or practice of speaking so that the sounds appear not to come from the speaker's lips, but to have some other origin. [a, 48.]

**VENTRIPYRAMIDS**, n.  $\text{Ve}^2\text{n}^1\text{-ri}^2\text{-pi}^2\text{-a}^2\text{m}^1\text{-i}^2\text{dz}$ . From *venter*, the belly, and *pyramis*, a pyramid. See *Anterior PYRAMIDS*.

**VENTROFIXATION**, n.  $\text{Ve}^2\text{n}^1\text{-ro}^2\text{-fi}^2\text{x-a}^2\text{shu}^2\text{n}$ . Lat., *ventrofixatio* (from *venter*, the belly, and *fixus*, fastened). Of Olshausen, see *HYSTEROPEXIA*.

**VENTRO-LATERAL**, adj.  $\text{Ve}^2\text{n}^1\text{-ro}^2\text{-la}^2\text{t-e}^2\text{-r}^1$ . From *venter*, the belly, and *latus*, a side. 1. On the lateral aspect of the abdomen. 2. Ventral and lateral at the same time.

**VENTROSITY**, n.  $\text{Ve}^2\text{n}^1\text{-ro}^2\text{-s}^2\text{i}^2\text{-t}^2$ . From *venter*, the belly. Fr., *ventrosité*. Protuberance of the abdomen due to obesity. [L, 41 (a, 14).]

**VENTROTOMY**, n.  $\text{Ve}^2\text{n}^1\text{-ro}^2\text{-t}^2\text{-o}^2\text{m}^1\text{-i}^2$ . From *venter*, the belly, and *tomé*, a cutting. See *LAPAROTOMY*.

**VENTRO-UTERO-VAGINAL**, adj.  $\text{Ve}^2\text{n}^1\text{'-ro}^2\text{-u}^2\text{'-t}^2\text{'-e}^2\text{-r}^1\text{'-o}^2\text{'-va}^2\text{'-j}^2\text{'-i}^2\text{'-n}^1$ . Pertaining to the abdominal cavity, the uterus, and the vagina.

**VENULA** (Lat.), n. f.  $\text{Ve}^2\text{n}^1\text{(wan)u}^2\text{s(u)}^2\text{-a}^2$ . Dim. of *vena*, a vein. See *VENULE*.—*Venulae centrales lobulorum*, *Venulae intralobulares hepatis*. See *Intralobular VEINS of the liver*.

**VENULE**, n.  $\text{Ven}^1\text{u}^2$ . Lat., *venula*. A small vein. [C.]

**VENULOSE**, adj.  $\text{Ve}^2\text{n}^1\text{u}^2\text{-os}$ . Abounding in small veins. [a, 35.]

**VENUS** (Lat.), n. f.  $\text{Ven}^1\text{(we}^2\text{n)u}^2\text{s(u)}^2\text{-a}^2$ . Gen., *Veneris*. Gr., *Ἀφροδίτη*. Fr., *Vénus*. Ger., *V.* 1. The goddess of love of the ancient Romans; hence, of the alchemists, copper. [A, 325 (a, 48).] 2. Of Paracelsus, see *SYPHILIS*.—*Bezoardicum Veneris*. A preparation made by extracting a tincture made from copper filings with rectified antimony trichloride and fixing with nitric acid. [B, 300.]—*Vberg*. See *MONS Veneris*.—*Vbeule* (Ger.). See *BUBO*.—*Vblüthen*, *V gürtel* (Ger.). See *CORONA Veneris*.—*V'hügel* (Ger.). See *MONS Veneris*.—*V'seuche* (Ger.). See *SYPHILIS*.

**VER** (Fr.), n.  $\text{Ve}^2\text{r}$ . A worm or a worm-like structure. [L, 41, 49 (a, 14).]—*Huile de v's de terre*. See *Oleum LUMBRICORUM*.—*V. cutanée*, *V. de Guinée*, *V. de Médine*. See *FILARIA medinensis*.—*V. du lobe centrale*. See *Superior vermisform PROCESS*.—*V. du vinaigre*. See *RHABBITIS aceti*.—*V. inférieur* (du cerveau). See *Inferior vermisform PROCESS*.—*V's intestinaux cavitaires*. See *CELELMINTHA*.—*V's intestinaux parenchymateux*. See *STERELMINTHA*.—*V. palmiste*. See under *Cocos amara*.—*V. solitaire*. See *LENIA solium* (1st def.).—*V. spermatique* [Leeuwenhoek]. See *SPERMATIZOID*.—*V. supérieur*. See *Superior vermisform PROCESS*.

**VERÄHNLICHUNG** (Ger.), n.  $\text{Fe}^2\text{r-an}^1\text{'li}^2\text{ch}^2\text{-un}^2$ . See *ASSIMILATION*.

**VERÄNDERND** (Ger.), adj.  $\text{Fe}^2\text{r-and}^2\text{'e}^2\text{r}^2\text{nd}$ . Alternative.

**VERÄNDERUNG** (Ger.), n.  $\text{Fe}^2\text{r-and}^2\text{'e}^2\text{r}^2\text{-un}^2$ . Change; degeneration.

**VERARBEITUNG** (Ger.), n.  $\text{Fe}^2\text{r-a}^2\text{r}^2\text{'bit-un}^2$ . See *DIGESTION*.

**VERARMT** (Ger.), adj.  $\text{Fe}^2\text{r-a}^2\text{r}^2\text{'mt}^2$ . See *DEPAUPERATE*.

**VERÄSTELUNG** (Ger.), n.  $\text{Fe}^2\text{r-ast}^2\text{'e}^2\text{l-un}^2$ . 1. See *RAMIFICATION*. 2. One of the branched processes of the arbor vitae cerebelli. [L, 17 (K).]

**VERATRABINE**, n.  $\text{Ve}^2\text{r-a}^2\text{t-ra}^2\text{'b-en}$ . Fr., *véatrabine*. An amorphous alkaloid,  $\text{C}_{28}\text{H}_{43}\text{NO}_9$ , obtained from the root of *Veratrum album*. [B, 5, 270 (a, 38).]

**VERATRAMARIN**, n.  $\text{Ve}^2\text{r-a}^2\text{t-ra}^2\text{'m-a}^2\text{r-i}^2\text{-n}$ . Fr., *véatramarine*. Of Weppen, a non-nitrogenous bitter principle contained in the rhizome of *Veratrum album*. [B, 270 (a, 38).]

**VÉRATRE** (Fr.), n.  $\text{Va-ra}^2\text{'-tr}^1$ . See *VERATRUM*.—*Extrait liquide de v. américain*. See *Extractum VERATRI viridis fluidum*.

**VERATRIA** (Lat.), n. f.  $\text{Ve}^2\text{r(war)-a}^2\text{t(a}^2\text{t)ri}^2\text{-a}^2$ . See *VERATRINE*.

**VERATRIC ACID**, n.  $\text{Ve}^2\text{r-a}^2\text{'tri}^2\text{k}$ . Ger., *Veratrinaäure*, *Veratrinaäure*. An insoluble crystalline substance,  $\text{C}_8\text{H}_5(\text{OCH}_3)_2\text{-CO}_2\text{OH}$ , found in *Veratrum sabadilla*. [B, 3, 93 (a, 14, 38).]

**VERATRINA** (Lat.), n. f.  $\text{Ve}^2\text{r(war)-a}^2\text{t(a}^2\text{t)-rin}^2\text{(ren)u}^2\text{-a}^2$ . See *VERATRINE*.—*Oleatum veratrine* [U. S. Ph.]. A preparation made by rubbing up 2 parts of veratrine with a little oleic acid, gradually adding more of the acid till 100 parts are obtained, and stirring till the veratrine is dissolved. [B, 95 (a, 38).]—*Tinctura veratrine* [Belg. Ph.]. A solution of veratrine in 199 times as much 92-per-cent. alcohol. [B, 95 (a, 38).]—*Unguentum veratrine*. An ointment consisting of 4 parts of veratrine, 6 of alcohol, and 96 of benzoated lard [U. S. Ph.]; or of 1 part of veratrine, triturated with a little almond-oil, and 90 parts of lard [Br. Ph.]; or of 1 part of veratrine, 7 parts of olive-oil, and a mixture of 14 of solid paraffin and 41 of petrolatum [Russ. Ph.]. [B, 95 (a, 38).]

**VERATRINE**, n.  $\text{Ve}^2\text{r-a}^2\text{'ren}$ . Lat., *veratrina*, *veratria*. A poisonous alkaloid,  $\text{C}_{28}\text{H}_{43}\text{NO}_9$ , or mixture of alkaloids, obtained from the seeds of *Schénocaulon officinale*. Commercial v. occurs as a yellowish-white or grayish-white amorphous powder. Though it has no odor, it produces violent sneezing. The crystalline v. of Merck (identical with the pure v. of Flückiger and the cevadilla of Wright and Luff) occurs as anhydrous, transparent crystals becoming opaque in the air. A soluble variety, the amorphous v. of Flückiger and the veratridine of Bosetti, is known as a yellow-white resinous mass soluble in cold water but passing into the insoluble crystalline form when its solution is heated. Schmidt and Köppen recognize a third modification of v., but this seems to be a mixture similar to commercial v. V. is used externally in neuralgia. [B, 95, 270 (a, 38).]

**VERATRINUM** (Lat.), n. n.  $\text{Ve}^2\text{r(war)-a}^2\text{t(a}^2\text{t)-rin}^2\text{(ren)u}^2\text{-m(u)}^2$ . See *VERATRINE*.—*Unguentum veratrinum* [Russ. Ph.]. See *Unguentum VERATRINÆ*.

**VERATROIDINE**, n.  $\text{Ve}^2\text{r-a}^2\text{'roid-en}$ . Fr., *véatroidine*. An amorphous or partially crystalline alkaloid said to be found in veratrum. Its existence is doubted by E. Schmidt. [B, 270 (a, 38).]

**VERATROL**, n.  $\text{Ve}^2\text{r-a}^2\text{'t-ro}^2$ . Fr., *véatrol*. Ger., *V.* A liquid,  $\text{C}_8\text{H}_4(\text{OCH}_3)_2$ . [B, 3, 270 (a, 38).]

**VERATRUM** (Lat.), n. n.  $\text{Ve}^2\text{r(war)-a}^2\text{t(a}^2\text{t)ru}^2\text{m(ru}^2\text{m)}$ . Fr., *véatre*, *véatrum*. Ger., *Germer*. False hellebore; a genus of the *Veratrea*, which are a tribe of the *Liliaceae*. [a, 35].—*Decoctum veratri*. Fr., *décoction* (ou *hydrole*) *d'ellébore blanc*. A preparation made by boiling 39 parts of white hellebore in 946 parts of water until reduced one half, then straining and adding 61 parts of alcohol. [B, 119 (a, 38).]—*Extractum veratri viridis fluidum* [U. S. Ph.]. A preparation made by exhausting 100 grammes of *V. viride* with alcohol in a percolator, reserving 90 c. c., evaporating the residue to a soft extract, mixing the two, and bringing up to 100 c. c. [B, 5, 93 (a, 38).]—*Infusum veratri albi* [Russ. Ph.]. A preparation made by treating 18 centigrammes of white hellebore over the water-bath for five minutes with water enough to make 30 grammes of strained infusion. [B, 95 (a, 38).]—*Radix veratri*. 1. The root of *Helleborus niger*. [a, 35.] 2. Of the Ger. Ph., see under *V. album*.—*Rhizoma veratri (albi)*. Fr., *hellebore blanc (souche)* [Fr. Cod.]. Sp., *elébore blanco*, *vedegambre (rizoma)* [Sp. Ph.]. The rhizome of *V. album*. [B, 95 (a, 38).]—*Rhizoma veratri albi pulveratum*. White hellebore-root cleansed, dried at 40° C., powdered in an iron mortar, and sifted through a No. 120 silk sieve [Fr. Cod.] (through a 1,000-mesh sieve [Russ. Ph.]) [B, 95 (a, 38).]—*Tinctura veratri* [Ger. Ph., Swiss Ph.] [*albi* [Austr. Ph., Belg. Ph., Russ. Ph.]]. Fr., *teinture d'hellebore blanc* [Fr. Cod.]. A tincture made by macerating or digesting the rhizome of white hellebore in 5 (10 [Ger. Ph., Russ. Ph.]) times as much dilute alcohol. [B, 95 (a, 38).]—*Tinctura veratri viridis*. A tincture made by treating 1 part of the rhizome of *V. viride* in No. 60 powder with alcohol enough to make 2 parts by percolation after one day's maceration [U. S. Ph.]; or 4 oz. of the rhizome in No. 40 powder with alcohol enough to make 20 fluid oz. after two days' maceration [Br. Ph.]; or 1 part of the rhizome with 5 parts of dilute alcohol [Hung. Ph., 1st ed.]. [B, 95 (a, 38).]—*V. album*. Fr., *véatrum* (ou *véatre*) *blanc*, *varaire*. Ger., *weisser Germer*, *weisse Nieswur*. 1. Langwort, lyngwort, white hellebore; a native of the mountainous regions of Europe and northern and middle Asia. It has the acrid, poisonous properties of *V. viride*, and probably in greater degree. The fleshy root-stock (*radix veratri* [Ger. Ph.], *v. album* [U. S. Ph., 1870]) occurs in cylindrical or subconical, rough pieces, more or less beset with the remains of roots. It is a general stimulant to the secretions, but is now rarely used, except in scabies, etc., and by the veterinarians. It was formerly used in dropsy, mania, epilepsy, leprosy, etc. It contains, according to Wright and Luff, jervine, rubijervine, pseudojervine, veratrabine, and traces of a sternutatory alkaloid. It does not contain veratrine (Maisch). [a, 35.] 2. Of the U. S. Ph., see under 1st def. *V. frigidum*. A Mexican species. The rhizome closely resembles that of *V. album*, and has like properties. [a, 35.]—*V. lobelianum*. Ger., *Lobel's Germer*. A variety (by some considered a distinct species) of *V. album* found in southern and middle Europe. [a, 35.]—*V. nigrum*. 1. The *Helleborus niger* and other species of *Helleborus*. 2. A species found in central and southern Europe. Its rhizome is substituted for that of *V. album*, but is smaller and less active. [a, 35.]—*V. officinale*. See *SCHÉNOCAULON officinale*.—*V. sabadilla*. A species indigenous to Mexico, the West Indies, and (according to some) China. It resembles *V. album*, and is said, probably erroneously, to furnish a portion of the cevadilla-seed of commerce. [a, 35.]—*V. viride*. Fr., *véatrum* (ou *véatre*) *vert*. Ger., *grüner Germer*. 1. American (or swamp-) hellebore, Indian poke, poke-root, itch-weed, a variety, according to Hanbury, of *V. album*, but usually regarded as a distinct species, growing in the United States and Canada. The acrid rhizome (the v. *viride* of the U. S. Ph.), a powerful spinal and arterial depressant, is from an inch to three inches long, obtuse at the end, externally of a dark-brown color, and beset with yellowish roots marked with numerous indentations; in the shops it occurs in small fragments or transverse slices or discs of a buff, brownish, or whitish color. By the early colonists it was used as a purgative, antiscorbutic, and insecticide, but it is now employed as a cardiac, arterial, and nervous sedative. It is said not to be narcotic and rarely to cause purging. [a, 35.] 2. Of the U. S. Ph., see under 1st def.

**VERBÄLT** (Ger.), adj.  $\text{Fe}^2\text{r-balt}^2$ . Inflamed and stiff as a result of continued pressure. [L, 30 (a, 14).]

**VERBAND** (Ger.), n.  $\text{Fe}^2\text{r-ba}^2\text{'nd}$ . See *BANDAGE* and *DRESSING* (2d def.).—*Bleibender V.* See *Permanent DRESSING*.—*Concentiv*. See *Retentive BANDAGE*.—*Deckv.* A protective dressing. [L, 57 (a, 14).]—*V'pückchen*. The small pack containing bandages and antiseptic materials carried by a soldier. [Ctbl. f. Chir., July 3, 1886, p. 457 (a, 34).]—*V'papier*. See *EPRÉDOCHARTA*.—*V'stoffe*, *V'stücke*. Materials for making dressings. [a, 14, 18].—*V'tasche*. See *Dressing CASE*.—*V'watte*. A

cotton-wadding bandage. [a, 34].—**Vzeug**. Material for dressing wounds, especially bandages. [L, 57 (a, 14)].—**Wasserglasv**. See *Silica-BANDAGE*.—**Zungenv**. See *GLOSSODESMUS* (2d def.).

**VERBASCUM** (Lat.), n. n. Vu<sup>r</sup>(we<sup>r</sup>)-ba<sup>2</sup>sk(ba<sup>2</sup>sk)/u<sup>2</sup>m(u<sup>2</sup>m). Fr., *molène*. Ger., *Wollkraut*, *Königskeizer*. 1. Mullein; a genus of the *Verbasceae*, which are a tribe of *scrophulaceae* plants. The *Verbasceae* are a section of the *Capriferae*. The *Verbasceae* comprise *V. Celsia*, and *Isanthera*: the *Verbasceae*, *V. and Celsia*. [a, 35.] 2. Of the Austr. Ph. and Hung. Ph., see *Flores verbasci*.—**Decoctum verbasci anodynum**. A preparation made by boiling for a quarter of an hour 1½ oz. each of great mullein-leaves and mallow-leaves, 2 oz. of linseed, and 1 scruple of poppy-heads in 4 lbs. of water. [B, 97 (a, 38)].—**Decoctum verbasci compositum**. Sp., *cocimiento de gordolobo compuesto* [Sp. Ph.]. A preparation made by boiling 45 parts each of the leaves of *V. thapsus* and mallow, 58 of flaxseed, and 4 of poppyseed in 1,380 of water and straining. [B, 95 (a, 38)].—**Flores verbasci**. Fr., *bouillon blanc* (ou *molène*) [Fr. Cod.]. Mullein-flowers, especially the corolla without the calyx of *V. phlomoides*, *V. thapsiforme*, and *V. thapsus* (only of the last [Fr. Cod., Roum. Ph.], of various large-flowered kinds of *V.* [Finn. Ph.]). [B, 95 (a, 38)].—**Folia verbasci**. Fr., *bouillon blanc* (ou *molène*) [Fr. Cod.]. Sp., *verbasco*, *gordolobo* [Sp. Ph.]. The leaves of *V. thapsus* (and of *V. thapsiforme* also [Belg. Ph.]). [B, 95 (a, 38)].—**V. blattaria**. Fr., (*molène*) *blattaire*, *herbe aux mitres*. Ger., *Mottenwollkraut*, *Schabenkraut*, *Rattenkraut*. Moth-mullein of southern Europe and eastern Asia. The bitter herb (*herba blattaria*) has properties like those of *V. thapsus*. It has an unpleasant odor, and is said to be an insecticide. [a, 35].—**V. lychnitis**. Fr., *molène cunéiforme*, *bouillon femelle*. A European species. The leaves have the properties of those of other species. [a, 35].—**V. montanum**. Fr., *molène de montagne*. Ger., *Bergwollkraut*. A species found in southern Europe, closely related to *V. phlomoides*; used like *V. thapsus*. [a, 35].—**V. nigrum**. Fr., *molène noire*. Ger., *schwärtzliche Wollkraut*, *Braunwurz*. Black-rooted mullein of Europe. The root and flowers, *radix et flores verbasci* (*nigr*), were formerly official. The former is no longer used; the latter are smaller than those of *V. thapsus*, and not so much used, though they have the same emollient properties. [a, 35].—**V. phoeniceum**. Fr., *molène de Phénicie*, *thé de Sibérie*. Purple-flowered mullein of Europe; its properties resemble those of *V. thapsus*. [a, 35].—**V. phlomoides**. Fr., *molène phloïde*. Ger., *Königskeizer*. Woolly mullein of Europe. It has the properties of *V. thapsus*. The flowers, *flores verbasci*, are found in European shops. [a, 35].—**V. Schraderi**. A European species. The flowers are used like those of *V. thapsus* and *V. phlomoides*. [a, 35].—**V. sinuatum**. Ger., *buchtiges Wollkraut*. A species found in northern Africa and southern Europe; the *phlois* *thapsus* of Dioscorides. [a, 35].—**V. thapsiforme**. A variety of *V. thapsus*. [a, 34].—**V. thapoides**. See *V. phlomoides*.—**V. thapsus**. Fr., *molène commune*, *bon-homme*, *bouillon blanc* [Fr.

VERBASCUM THAPSUS. [A, 327.]

Cod.] (ou *mâle*), *cierge de Notre-Dame*, *herbe à bonhomme* (ou *Saint-Fiacre*), *molène*. Ger., *gemeines Wollkraut*, *Himmelskeizer*, *Himmelbrand*, *Packelkraut*, *Feldkerzenkraut*. Common (or great) mullein of middle and southern Europe, Siberia, the Himalayas, and North America. The flowers and leaves, *flores et folia verbasci* (ou *verbasci albi*, seu *verbasci maris*, seu *thapsi barbati*, seu *candelae*, seu *pulmonariarum vacuorum*), are official in the Fr. Cod. and the leaves in the Ger. Ph. The flowers are used in mild catarrhs, etc., and externally in itching skin diseases. The leaves are mildly astringent, emollient, and anodyne. They are used for diarrhoea; dried and smoked like tobacco, in aphonia from irritation of the pharynx; and steeped in hot water or boiled in lard, as an external anodyne. The root is employed in pulmonary diseases of cattle, and the seed to poison mice and to stupefy fish. [a, 35.]

**VERBENA** (Lat.), n. f. Vu<sup>r</sup>(we<sup>r</sup>)-ben(ban)/a<sup>2</sup>. From *ver* or *verbera*, foliage used in religious ceremonies. Fr., *verveine*. Ger., *Eisenkraut*, *Vervain*; a genus of the *Verbenae*, or *Verbenaceae*, or *Verbenaceae*, which are the *vervains*, an order of gamopetalous dicotyledonous plants, some of which have the aromatic properties of the *Labiatae*. Bentham and Hooker place them in the *Lami-*

*ales*. The *Verbenae* are also a tribe of the *Verbenaceae*. The *Verbenae* of Brongniart are a class of hypogynous *Gamopetalae*. [a, 35].—**Lemon** (-scented) *v.* Fr., *verveine odorante* [Fr. Cod.]. See *ALOYSIA citriodora*.—**Oil of v.** Lemon-grass oil (see under *ANDROPOGON citratum*). [a, 35].—**Upright v.** See *V. officinalis*.—**V. erinoides**. A diuretic species found in Chile and Peru, used in gonorrhoea and as an emmenagogue. [a, 35].—**V. hastata**. Wild hyssop, blue vervain, simpler's joy; an emetic and sudorific North American species. It has been used in fevers. [a, 35].—**V. mas**, *V. officinalis*. Fr., *verveine* (*officinale*) [Fr. Cod.], *herbe de sang* (ou *du foie*, ou *sacrée*). Ger., *gemeines* (ou *gebräuchliches*) *Eisenkraut*, *Eisenhart*, *Eisenreichkraut*, *Eiserich*, *Stahlkraut*, *Taubentliebkraut*. Common vervain, holy herb, Juno's tears, pigeon's grass, simpler's joy, the *νεπιτερεών ὄρθος* (upright *v.*) of Dioscorides; a plant widely distributed in the warmer and temperate parts of the eastern hemisphere. Marvelous properties were formerly attributed to its herb, *herba verbenae* (seu *verbenae maris*, seu *verbenae vulgaris*, seu *sacra*), but at most it is only a mild astringent and feeble aromatic. [a, 35].—**V. pseudo-gervao**. A Brazilian species; the leaves have been used as tea. [a, 35].—**V. supina**. The *νεπιτερεών ὄρθος* of Dioscorides; a species having the properties of *V. officinalis*. [a, 35].—**V. urticifolia**. White (or nettle-leaved) vervain of North America. The astringent root is used as a wash against poisoning by *Rhus toxicodendron*. [a, 35].—**V. vulgaris**. See *V. officinalis*.

**VERBENACA** (Lat.), n. f. Vu<sup>r</sup>(we<sup>r</sup>)-be<sup>2</sup>n(ban)-ak(a<sup>2</sup>k)/a<sup>2</sup>. An old name for *Verbena officinalis*. [a, 35.]

**VERBERGER** (Ger.), n. Fe<sup>2</sup>r-be<sup>2</sup>rg/e<sup>2</sup>r. A concealer. [a, 48].—**Hodenv**. See *CREMASTER*.

**VERBESINA** (Lat.), n. f. Vu<sup>r</sup>(we<sup>r</sup>)-be<sup>2</sup>s(bas)-in(en)/a<sup>2</sup>. Fr., *verbésine*. Ger., *V.* 1. Crown-beard; a genus of the *Verbesineae*, which are a subtribe of the *Helianthoideae*. 2. An old name for *Bidens cernua* and *Bidens tripartita*. [a, 35].—**V. biflora**. An East Indian species. The root, leaves, and flowers are used as a carminative. [a, 35].—**V. capitaneja**. The *capitaneja* of the Mexicans; a species used to cure saddle-galls on horses' backs. [B, 121].—**V. lavania**. Fr., *herbe de flau*. A species found in southern Asia and in Oceania. The root, leaves, and flowers are carminative, the leaves are antispasmodic, and the sap is a stimulating sternutatory. [a, 35].—**V. mutica**. Fr., *verbésine sans barbe*. A Guinea species, applied to gangrenous sores. [a, 35].—**V. virginica**. Crown-beard; a diaphoretic species found in the United States. [a, 35.]

**VERBESSERND** (Ger.), adj. Fe<sup>2</sup>r-be<sup>2</sup>s/se<sup>2</sup>rnd. See *CORRIGENT*.

**VERBIEGUNG** (Ger.), n. Fe<sup>2</sup>r-beg/un<sup>2</sup>. See *CAMPsis* (1st def.).—**Rückgratsv**. See *SCOLIOSIS*.

**VERBIGATION**, n. Vu<sup>r</sup>br-i<sup>2</sup>z-e<sup>2</sup>r-a/shu<sup>2</sup>n. From *verbi-gere*, to talk. Fr., *verbigeration*. The repetition by an insane person of words and phrases in the form of a discourse, but without sense or sequence. [a, 18.] Cf. *CATATONY*.

**VERBINDEN** (Ger.), n. Fe<sup>2</sup>r-bi<sup>2</sup>nd/e<sup>2</sup>n. See *BANDAGING*.

**VERMICELLI**, n.  $Vu^2r$ m-i<sup>2</sup>se<sup>2</sup>li<sup>2</sup>. A dried dough of a worm-like form made from the flour of a small, hard-grained wheat grown in Italy. [a, 35.]  
**VERMICIDE**, n.  $Vu^2r$ m-i<sup>2</sup>sid. From *vermis*, a worm, and *cædere*, to slay. Fr., v. A medicine that destroys intestinal worms. [a, 48.] Cf. **VERMIFUGE**.  
**VERMICULAIRE** (Fr.), adj.  $Ve^2r$ -me-ku<sup>2</sup>-la<sup>2</sup>r. See **VERMICULAR**; as a n., a body having a worm-like appearance or movement. [a, 48].—**V. supérieure**. See **Superior vermiform PROCESS**.  
**VERMICULAR**, adj.  $Vu^2r$ m-i<sup>2</sup>ku<sup>2</sup>-la<sup>2</sup>r. Lat., *vermicularis* (from *vermiculus*, a little worm). Fr., *vermiculaire*, *vermiculant*. Ger., *wurmartig*. Worm-like in appearance or in movement. [a, 35.]

**VERMIFORM**, adj.  $Vu^r m/i^2-f'o^2 m$ . Lat., *vermiformis* (from *vermis*, a worm, and *forma*, form). Fr., *vermiforme*. Ger., *wurmformig*. Worm-shaped, worm-like.

**VERMIFUGE**, adj.  $Vu^r m/i^2-fu^2 j$ . From *vermis*, a worm, and *fugare*, to put to flight. Fr., *v.* Ger., *wurmtreibend*. Having the property of expelling intestinal worms.

**VERMINATION**, n.  $Vu^r m/i^2-n'a^2 shu^2 n$ . Lat., *verminatio* (from *verminare*, to have worms). Fr., *v.* See **HELMINTHIASIS**.

**VERMINOUS**, adj.  $Vu^r m/i^2-n'u^2 s$ . Lat., *verminosus* (from *vermis*, a worm). Fr., *vermineux*. Due to or having the characters of worms. [A, 385 (a, 48).]

**VERMIS** (Lat.), n. m.  $Vu^r m(we^2 r n)/i^2 s$ . Gen., *ver'mis*. Gr., *ἄμυς, ἄμυς*. Fr., *v.* 1. A worm or worm-like structure; in the pl., *Vermes*, a group of worm-like animals (a term that has been employed by different taxonomists with great diversity of application, now comparatively little used). [a, 48.] 2. See **VERMIFORM PROCESS** (1st def.).—**V. bombycinus** [Arantius]. See **HIPPOCAMPUS major**.—**V. cerebelli**. See **VERMIFORM PROCESS** (1st def.).—**Vermes cerebri**. See **CHORIOID PLEXUS**.—**V. cucurbitinus**. See **TENIA solium** (1st def.).—**V. digiti**. See **PARONYCHIA** (1st def.).—**V. du cerveau latéral** (Fr.). A convoluted projection in the cerebellar hemispheres of some of the lower animals, the termination of the restiform bodies. [I, 35 (K).]—**V. du cerveau médian (ou moyen)** (Fr.). See **VERMIFORM PROCESS** (1st def.).—**V. inferior (cerebelli)**. Ger., *Untervurm*. See **INFERIOR vermiform PROCESS**.—**V. inferior posterior**. See **NODULE** (2d def.).—**V. intermedius**. See **VERMIFORM PROCESS** (1st def.).—**V. intermedius anterior**. See **Superior vermiform PROCESS**.—**V. intermedius inferior (seu posterior)**. See **Inferior vermiform PROCESS**.—**Vermes laterales** [Günther]. See **Cerebellar HEMISPHERES**.—**V. major**. One of the cerebellar hemispheres. [I, 3 (K).]—**V. medinensis**. See **FILARIA medinensis**.—**V. superior (cerebelli)**. See **Superior vermiform PROCESS**.—**V. superior posterior**. See **FOLIUM cuminum**.—**V. terre, V. terrestris**. See **LUMBRICUS terrestris**.—**V. vesicularis (eremita)**. See **CYSTICERCUS cellulosa**.—**V. vesicularis socialis**. See **CENURUS cerebri**.

**VERMISCHUNG** (Ger.), n.  $Fe^2 r-mi^2 sh'un^2$ . See **ALLOY** and **COMPOSITION**.

**VERMIVORE** (Fr.), n.  $Ve^2 r-me-vor$ . Lit., a worm-eater; a remedy which destroys intestinal parasites and digests them. [Bouchut. "Paris méd."; "Nouv. remèdes"; "N. Y. Med. Jour." Sept. 19, 1883, p. 336.]

**VERMOLKUNG** (Ger.), n.  $Fe^2 r-mo^2 lk'un^2$ . See **APORRHOSIS**.

**VERMONT SPRING**, n.  $Vu^r-mo^2 nt'$ . A chalybeate spring in Franklin County, Vermont. [L, 57 (a, 14).]

**VERMOUTH**, n.  $Vu^r-muth'$ . Fr., *v.* Ger., *Wermuth*. A fortified white wine flavored with *Artemisia absinthium* and various other bitter and aromatic substances. [A, 385.]

**VERNAL**, adj.  $Vu^r-n'l$ . Lat., *vernalis, vernus* (from *ver*, the spring). Fr., *printanier, v.* Ger., *Frühlings*. Pertaining to or occurring or appearing in spring. [a, 35.]

**VERNARBUNG** (Ger.), n.  $Fe^2 r-na^2 rb'un^2$ . See **CICATRIZATION**.

**VERNATION**, n.  $Vu^r n-a^2 shu^2 n$ . Lat., *vernatio* (from *vernare*, to bloom). Fr., *v.* Ger., *Knospenlage, Blätterknospenlage*. The arrangement of leaves in the bud. (Many of the terms applied to aestivation are also applicable to v.) [a, 35.]—**Imbricate v.** V. in which the leaves of the bud are applied over each other. [a, 35.]—**Valvate v.** V. in which the leaves, being nearly in a circle at the same level, touch each other by their edges. [a, 35.]

**VERNICOSE**, adj.  $Vu^r n/i^2 k-os$ . Lat., *vernicosus* (from *vernix*, varnish). Ger., *firnisglänzend*. Shining as if varnished. [a, 35.]

**VERNINE**, n.  $Vu^r n'en$ . A substance,  $C_8H_{10}N_4O_4$ , obtained from *Trifolium, Medicago sativa*, etc., occurring as fine acicular crystals. [B, 270 (a, 38).]

**VERNIS** (Fr.), n.  $Ve^2 r-ne$ . See **VARNISH**.—**V. caéxéux**. See **VERNIX caseosa**.—**V. du Canada**. See **RHUS radicans**.—**V. du Japon**. See **RHUS vernicifera** and **AILANTUS glandulosa**.

**VERNIX** (Lat.), n. f.  $Vu^r n(we^2 r n)/i^2 x$ . Gen., *ver'nix*. 1. See **VARNISH**. 2. The *Thuja articulata*. 3. The genus *Toxicodendron*. [a, 35.]—**Resina v.** See **SANDARAC**.—**V. caseosa**. Fr., *enduit sébacé, vernis caéxéux*. Ger., *käsig Schmiere, Hautschlacke, Frucht-schleim*. A viscid, whitish, fatty material found on the fœtus at birth; a mixture of cast-off epithelium, downy hairs, and the secretion of the sebaceous glands.—**V. sandaraca, V. sicca**. See **SANDARAC**.

**VERNONIA** (Lat.), n. f.  $Vu^r n-on/i^2 a^2$ . From W. *Vernon*, an English botanist. Fr., *vernonie*. Ger., *Vernonie*. Iron-weed; a genus of the *Veronica*, or *Vernonia* (a division or tribe of the *Compositae*). [a, 35.]—**V. anthelmintica**. Khatzum (or kinka) oil-plant of the East Indies. The nauseous, bitter seeds, which yield a solid green oil, are diuretic, powerfully anthelmintic, and, according to some, tonic and stomachic, and are used in Malabar for coughs and flatulence. They form a part of a powder used in snake-bites, and mixed with lime-juice, are used to kill pediculi. The bitter leaves and roots are used externally in rheumatism. [a, 35.]—**V. arborecens**. West Indian flabane. The flowers and fruits are used in stimulating fomentations, and the leaves as an antispasmodic and diaphoretic. [a, 35.]—**V. chinensis**. A species found in southern Asia; used as a tonic, astringent, pectoral, and emmenagogue. [a, 35.]—**V. cinerea**. An East Indian and tropical African species, used as a tonic and diaphoretic. The root is used as a pectoral and in diarrhœa. The young leaves are eaten. [a, 35.]—**V. leptophylla**. A species found in the Moluccas; used

as a tonic, pectoral, and aphrodisiac. [a, 35.]—**V. nigritiana**. A species found in western Africa, where it is called *batiator*. The root is used as a febrifuge. ["Gaz. hebdomadaire de méd. et de chir." May 25, 1888, p. 330 (a, 50).]—**V. noveboracensis**. New York iron-weed, flat-tops. The herb and root are said to be used against snake-bites. [a, 35.]—**V. prealta**. 1. See *V. noveboracensis*. 2. A North American species; considered alexipharmac and used like *V. noveboracensis*. [a, 35.]—**V. Rheedii**. An East Indian shrub doubtfully referred to this genus. The spicy leaves are diaphoretic, stomachic, etc. [a, 35.]—**V. scabra**. A Brazilian shrub. The leaves and flowers have a vanilla-like odor, and are used in ophthalmia and, together with the young branches, in aromatic baths and fomentations. [a, 35.]

**VERNONIN**, n.  $Vu^r n-on/i^2 n$ . A glucoside,  $C_{10}H_{24}O_7$ , obtained from *Vernonia nigritiana*, a white hygroscopic powder. [B, 270 (a, 38).]

**VERNUS** (Lat.), adj.  $Vu^r n(we^2 r n)/u^2 s(u^2 s)$ . See **VERNAL**.

**VERÖDUNG** (Ger.), n.  $Fe^2 r-u^2 d'un^2$ . Atrophy, obliteration. **VEROLE** (Fr.), n. *Var-ol*. An eruptive disorder, especially syphilis. [a, 14.]—**Fausse v.** See **VARICELLA**.—**Grosse v.** See **SYPHILIS**.—**Petite v.** See **SMALL-POX**.—**Petite v. de l'esprit**. A poetical term for the reserve, bordering on melancholy, sometimes observed as the result of puberty in girls. [a, 18.]—**V. bâtarde**. See **VARICELLA**.—**V. bénigne**. See *Benign* **SYPHILIS**.—**V. d'Amboyne**. See **FRAMBESIA**.—**V. des vaches**. See **COW-POX**.—**V. galopante, V. grave**. See *Malignant* **SYPHILIS**.

**VEROLETTE** (Fr.), n. *Var-ole'te*. See **VARICELLA**.

**VEROLIQUE** (Fr.), adj. *Var-ol-ek*. See **SYPHILITIC**.

**VERONICA** (Lat.), n. f.  $Ve^2 r(war)-o^2 n-ik(ek)a^2$ . Perhaps from *verus*, true, and *eikon*, an image. Fr., *véronique*. Ger., *Ehrenpreis*. Cancer-wort, speedwell; a genus of the *Scrophularineæ*. The *Veronica* are an order of plants consisting of *V. Pedicularis*, *Polygala*, etc. The *Veronica* are a tribe of the *Scrophulariaceæ*. [a, 35.]—**V. americana**. American brooklime, found in the United States and Canada; formerly used in scurvy and as an alternative. [a, 35.]—**V. anagallis**. Fr., *mouron d'eau, petit beccabunga*. Ger., *Wasserehrenpreis, Wassergauchheil*. Great water-speedwell, water-pimpernel, faverell; found in Europe, northern Asia, northern Africa, and North America. The fresh herb, *herba anagallidis aquaticæ*, is used as a laxative and the dried herb as a digestive. [a, 35.]—**V. arvensis**. Fr., *velvette sauvage*. Wall- (or spiked) field-, or corn- speedwell; a European and North American species. The leaves are said to be stimulant, diuretic, and antiscorbutic. [a, 35.]—**V. beccabunga**. Fr., *beccabunga* [Fr. Cod.], *beccabungue, grand beccabungue, cresson de chien, laitue (ou salade) de chouette*. Ger., *Bachbünig, Bachbohnen, Wasserbungen, Queleehrenpreis, Wassergauchheil*. Brooklime, horse-well grass, water-pimpernel; a succulent salad plant found in all climates, especially in the temperate regions. The fresh herb, *herba recens beccabunge* (seu *veronica beccabunge*, seu *veronica aquaticæ*, seu *anagallis aquaticæ*), is used as an antiscorbutic and in chronic diarrhœa. [a, 35.]

**V. americana**.—**V. chamædrys**. Fr., *fausse germandrée, pichot-chainé, (veronique) chamædrys, véronique chênète (ou des bois, ou des haies, ou germandrée, ou petit chène)*. Ger., *Gaman-drehrenpreis, wilder Gamander, kleines Gamanderlein, Blau-manderle, Frauenbiss*. Angel's-eyes, God's-eye, bird's- (or blue-) eyes, blue stars, female fluellen, germander speedwell; a European species. The herb, gathered usually with the flower, was formerly official as *herba chamædrys* (seu *chamædrys*, seu *chamædrys spuria fœminæ*, and was used like *V. officinalis*. [a, 35.]—**V. latifolia**. See *V. teucrium*.—**V. major, V. mas**. See *V. officinalis*.—**V. montana**. The mountain-speedwell of Europe; similar to *V. chamædrys* in properties. [a, 35.]—**V. officinalis**. Fr., *véronique officinale (ou mâle), herbe aux ladies, thé d'Europe (ou du Nord)*. Ger., *ächter (oder gebräuchlicher, oder gemeiner) Ehrenpreis, Grossbathengel, Grundheil, europäischer Thee, Köhlerkraut, Wundkraut, Mundkraut, Frauenbiss, Hühnertraute, Heil aller Welt*. European tea, fluellen, common medicinal tea-speedwell, ground-hele; found throughout all (especially temperate) climates. The stem, *herba veronica* (seu *veronica officinalis* [seu *majoris*, seu *maris*, seu *vulgaris serpentina*], seu *betonica alba* [seu *Pauli*], seu *alsines palustris*), including the leaves and flowers, is astringent and tonic. [a, 35.]—**V. parviflora**. A New Zealand plant furnishing koromoko (g. v.).—**V. scutellata**. Fr., *véronique à feuilles linéaires (ou d'écusson)*. The bog- (or marsh-) speedwell of Europe. The stimulant stomachic tops are used like tea. [a, 35.]—**V. spicata**. The spike-flowered speedwell of Europe; used like *V. officinalis*. [a, 35.]—**V. teucrifolia, V. teucrium**. Fr., *véronique à feuilles de germandrée, germandrée bâtarde, teucride d'Allemagne, teucriette, véronique des prés*. Ger., *breitblättriger (oder edler, oder wahrer) Gamanderhrenpreis, Erdbathengel, Erdweirauch*. Hungarian (or saw-leaved) speedwell. The herb, *herba chamædrys* (seu *chamædrys*, seu *chamædrys spuria maris* [seu *veronica teucrifolia*]), was formerly used like that of *V. officinalis*. [a, 35.]—**V. triphylla**. Fr., *véronique à trois feuilles*. Ger., *dreiblättriger Ehrenpreis, blaues Hungerblümchen, Händlein-kraut*. A European species; formerly used, especially in jaundice, under the name of *herba alsines triphylla*. [a, 35.]—**V. virginica**. Culver's physic (or root), great Virginian speedwell; a North American herb. The bitterish, somewhat acrid rhizome is the *leptandra* of U. S. Ph. In its dried state it is a mild cathartic and is recommended in duodenal indigestion and chronic constipation. The eclectics use it in place of mercurials, though it has but little influence on the liver. The fresh root is a violent purgative and emetic. [a, 35.]—**V. vulgaris serpens**. See *V. officinalis*.

**VERORDNUNG** (Ger.), n.  $Fe^2 r-o^2 rd'nun^2$ . See **PRESCRIPTION**.

**VERPFLANZUNG** (Ger.), n.  $Fe^2 r-pfla^2 nts'un^2$ . See **TRANSPLANTATION**.

**VERPFLEGEUNG** (Ger.), n.  $Fe^2 r-pfla^2 g'un^2$ . 1. Maintenance. [a, 14.] 2. See **NURSING** (4th def.).

**VERPRASSELUNG** (Ger.), n.  $\text{Fe}^2\text{r-pra}^3\text{'se}^1\text{-un}^2$ . See CREPITATION.

**VERPRELLUNG** (Ger.), n.  $\text{Ve}^2\text{r-pre}^2\text{'lun}^2$ . See CONTUSION (2d def.).

**VERPUFFUNG** (Ger.), n.  $\text{Fe}^2\text{r-puf}^2\text{'fun}^2$ . See EXPLOSION.

**VERQUICKUNG** (Ger.), n.  $\text{Fe}^2\text{r-kwi}^2\text{'kun}^2$ . See AMALGAMATION.

**VERRE** (Fr.), n.  $\text{Ve}^2\text{r}$ . See GLASS (1st and 2d def's).—**Fiel** (ou Sel) de v. See ANATRON and SEL de v.—**V. liquide**. See WATER-GLASS.

**VERRÉE** (Fr.), n.  $\text{Ve}^2\text{r-ra}$ . A glassful; a measure of 150 grammes (about 5 oz.) of distilled water. [B, 93 (a, 14).]

**VERKENKUNG** (Ger.), n.  $\text{Fe}^2\text{r-re}^2\text{'n}^2\text{kun}^2$ . See SPRAIN.

**VERRICHTUNG** (Ger.), n.  $\text{Fe}^2\text{r-ri}^2\text{'ch}^2\text{'tun}^2$ . The function of an organ; also the exercise of that function. [a, 14, 48.]

**VERRUCA** (Lat.), n. f.  $\text{Ve}^2\text{r(we}^2\text{r)-ru}^2\text{(ru)'ka}^2$ . Gr.,  $\theta\upsilon\mu\iota\omicron\nu$ . Fr., *verru*. Ger., *Warze*. 1. A wart; a circumscribed hypertrophy of the papillary layer of the corium and of the epidermis, producing a rounded, flat or acuminated, smooth or rough and horny protuberance of the skin. [G.] 2. A pedunculated wart growing from a mucous surface, such as that of the vulva. [A, 42.] Cf. THYMION (2d def.). 3. In botany, a sessile wart-like elevation. [a, 35.]—**V. andicola**. See VERRUGAS.—**V. ani**. A condyloma in the region of the anus. [G.]—**V. caduca**. A falling or transitory wart; a wart that tends after a short duration to disappear spontaneously. [G.]—**V. canerosa**. See CANCER *verrucosus*.—**V. carnea**, **V. carnosa**. See FIBROMA *molluscum* and CONDYLOMA.—**V. congenita**. A congenital wart; a v. appearing at or shortly after birth. Frequently more than one is present, occurring often along the course of a cutaneous nerve (see PAPILLOMA *neuropathicum*). Sometimes it is pigmented and hairy (see NÆVUS *verrucosus*). [G.]—**V. febrilis**. See VARIOLA *verrucosa*.—**V. filiformis**. See ACROCHORDON (2d def.).—**V. follicularis**. Fr., *verru seborrhéique* (ou *plate de la vieillesse*). Ger., *Sebumwarze* [Hebra], *Comedonoseichebe*. A disease first described by Hebra, consisting in an accumulation of dried horny and sebaceous matter about the orifices of the sebaceous glands upon the surface of the skin, forming circumscribed, dark-colored, rough, wart-like elevations, which, on being removed, show the skin beneath to be intact. [Barthélemy, "Ann. de derm. et de syph.," 1881, No. 3; G, 3, 75.]—**V. formicaria**. Fr., *myrmécie*. Ger., *Ameisenwarze*. A wart developed in the palmar and plantar regions, producing painful itching. [L, 43.]—**V. gallica**. See CONDYLOMA *latum*.—**V. glabra**. A smooth wart, one the surface of which is not broken by clefts. [G.]—**V. gregalis**. A wart of a kind occurring in clusters on the hands or face. They often disappear spontaneously. [G, 11, 17.]—**V. lobosa**. A wart characterized by vertical clefts. [G.]—**V. madida** [Plenck]. See CONDYLOMA *latum*.—**V. mollusca**. See *V. carnea*.—**V. necrogenica**. Ger., *Leichentuberkel*, *Leichenwarze*. Anatomical tubercle; a form of tuberculosis *verrucosa* cutis occurring on the hands of persons engaged in dissecting the dead bodies of men or animals. There first appears a pustule with an inflamed base, which is succeeded by a tough, warty growth, with a rough, horny surface, often broken by numerous clefts or fissures. It may disappear in time spontaneously or may remain for life. [G.]—**V. non gallica**. See CONDYLOMA *acuminatum*.—**Verruca œsophagi**. A simple elongation of a group of normal papillæ of the œsophageal mucous membrane, with simultaneous thickening of their epithelial covering. [a, 34.]—**Verruca palpebrarum**, **V. pensilis**. See ACROCHORDON (2d def.).—**V. perstans**. A wart that persists for a long time, that does not tend to disappear spontaneously. [G.]—**V. plana**. A wart that has a flattened appearance, and is not much elevated above the surrounding skin. [G.]—**V. plana juvenilis**. Flat warts occurring in young people, affecting usually the backs of the hands or the face. [Mntsch. f. prakt. Dermat., ix, 10, p. 471 (G).]—**V. rhagoides**. A wart with a cleft or fissured surface. [G.]—**V. senilis**. Ger., *Greisenwarze*, *Alterswarze*. A wart occurring on the trunk, face, or extremities of an old person. They are usually discolored, flat, and uneven, and are easily detached, usually leaving a bleeding surface. They differ from ordinary warts chiefly in that the papillæ of the skin are very slightly implicated. [G, 34.]—**V. sessilis**. See *V. plana*.—**V. simplex**. See ACROCHORDON (2d def.) and *V. vulgaris*.—**V. syphilitica**. Condyloma of syphilitic origin. [G.]—**Verruca veneræ**. Of Plenck, tubercular syphiloderm of the face with the tubercles in compact clusters. [G.]—**V. vulgaris**. 1. Common or simple wart; a tough, insensitive, more or less elevated growth, varying in size from that of a pin-head to that of a pea. Its surface is sometimes smooth, but often rough and split into many divisions by numerous vertical clefts. It is most common in children, and occurs usually on the hands. [G.] 2. Of Alibert, see *V. plana*.

**VERRUCARIA** (Lat.), n. f.  $\text{Ve}^2\text{r(we}^2\text{r)-ru}^2\text{k(ruk)-a(a}^3\text{'ri}^2\text{-a}^2$ . From *verruca*, a wart. Fr., *verrucaire*. Ger., *Warzenflechte*. The typical genus of an order (Verrucariaceæ, Verrucaria, Verrucaride, Verrucariæ, Verrucariæ, Verrucarii, or Verrucarinæ) of angelocarpous lichens, various species of which are often found on medicinal barks; also the *Heliotropium europæum*, *Calendula officinalis*, or *Lapsana communis*. [a, 35.]

**VERRUCATUS** (Lat.), adj.  $\text{Ve}^2\text{r(we}^2\text{r)-ru}^2\text{k(ruk)-at(a}^3\text{'t)-u}^2\text{s-}$  (u's). See VERRUCOSE.

**VERRÜCKT** (Ger.), adj.  $\text{Fe}^2\text{r-ru}^2\text{'kt}$ . Dislocated; mentally deranged. [A, 521 (a, 48).]

**VERRÜCKTHEIT** (Ger.), n.  $\text{Fe}^2\text{r-ru}^2\text{'kt/hit}$ . See IDIOCY and INSANITY.—**Hallucinatorische V.** Dementia with hallucinations. [L, 57 (a, 14).]—**Originäre V.** See Original MONOMANIA.—**Pri-märe V.** See MONOMANIA.

**VERRÜCKUNG** (Ger.), n.  $\text{Fe}^2\text{r-ru}^2\text{'kun}^2$ . See DISLOCATION.—**Fiebert**. Febrile delirium. [a, 34.]

**VERRUCOSE, VERRUCOUS**, adj's.  $\text{Ve}^2\text{r/ru}^2\text{k-os, -u}^2\text{s}$ . Lat., *verrucosus*. Fr., *verruqueux*. Ger., *verrukos, warzig, warzenartig*. Warty, of the nature of a wart; attended with or covered with warts or wart-like growths. [G; a, 35.]

**VERRUCULOSE**, adj.  $\text{Ve}^2\text{r-ru}^2\text{k'u}^2\text{-os}$ . Lat., *verruculosus* (from *verrucula*, a little wart). Fr., *verruculeux*. Ger., *klein-warzig*. Covered with minute warts. [a, 35.]

**VERRUE** (Fr.), n.  $\text{Ve}^2\text{r-ru}^2$ . See VERRUCA.—**V. charnue**. See FIBROMA *molluscum*.

**VERRUGA** (Sp.), n.  $\text{Ve}^2\text{r-rug}^2\text{'a}^2$ . See VERRUCA and VERRUGAS.—**V. andina**, **V. peruana**. See VERRUGAS.

**VERRUGAS** (Sp.), n. pl.  $\text{Ve}^2\text{r-rug}^2\text{'a}^2\text{s}$ . An endemic disease resembling frambœsia in its general appearances, which is not known to exist except in Peru, on the Pacific slope of the Andes. Fatigue, debility, and non-acclimation are predisposing causes; neither age, sex, nor race seems to have any influence on the disease, and it attacks animals as well as man. There is a period of incubation of from twenty to forty days, in which malaise, lassitude, depression, and gastric disturbances are present; subsequently there are muscular soreness, arthritic and spinal pain (worse at night), and sometimes muscular spasm, producing torticollis or opisthotonus, etc. A chill initiates a fever (Oroya fever) that is accompanied by a rise of temperature to from 102° to 104° F. (39° to 40° C.), defervescence occurring about midnight. The pulse is soft and compressible, the blood-corpuscles are decreased in number, and there is loss of hæmoglobin. The mind becomes dull, there is effusion into the serous cavities, and, after the twentieth day, there is an eruption on the face, body, limbs, and mucous membranes, of small reddish spots that become papules and eventually form wart-like, sessile tumors usually of about the size of a pea. According to Izquierdo [Arch. f. path. Anat. u. Physiol. u. f. klin. Med., xcix, p. 411], they are connective-tissue neoplasms, having a strong resemblance to sarcomata. They are very vascular, and are associated with a peculiar bacillus (see BACILLUS of *verru-ga peruana*). They eventually desiccate, leaving no scar. Occasionally they attain a diameter of several centimetres, and exhaust the patient by supuration and hæmorrhage. The eruption may last from a few weeks to several months. Convalescence is slow. [B; a, 34.]—**Frog v.** V.; so called from the resemblance of the eruption to the skin of the frog. [a, 34.]—**Mule v.** V. in mules. [a, 34.]—**Peruvian v.** See V.

**VERSAILLES** (Fr.), n.  $\text{Ve}^2\text{r-sa}^2\text{'el-y'}$ . A place in the department of the Seine-et-Oise, France, where there are gaseous and chalybeate springs. [L, 49 (a, 14).]

**VERSAILLES SPRINGS**, n.  $\text{Vu}^2\text{r-salz'}$ . A place in Brown County, Illinois, where there are gaseous and alkaline springs. [Anderson (a, 14).]

**VERAMENTO A BISACCIA** (It.), n.  $\text{Ve}^2\text{r-sa}^2\text{-me}^2\text{'nt'o a}^2$  bez- $\text{a}^2\text{'t'che-a}^2$ . Lit., a saddle-bag effusion. An effusion of blood situated both without and within the dura, from a lesion of a branch of the middle meningeal artery, with simultaneous perforation of the dura. [Ceccherelli, "Gazz. med. ital., Prov. Venete," Apr. 29, 1882, p. 141.]

**VERSÄURUNG** (Ger.), n.  $\text{Fe}^2\text{r-zoir}^2\text{'un}^2$ . See ACIDIFICATION.

**VERSCHIEBUNG** (Ger.), n.  $\text{Fe}^2\text{r-sheb}^2\text{'un}^2$ . See DISLOCATION and DISPLACEMENT (3d def.).—**Nahtv.** See HEAD-MOLD SHOT.—**Zeitv.** See HETEROCHRONY.

**VERSHIEDENARTIG** (Ger.), adj.  $\text{Fe}^2\text{r-shed}^2\text{'e}^2\text{n-a}^2\text{rt-i}^2\text{g}$ . See HETEROGENEOUS.

**VERSHIEDENGESTALTET** (Ger.), adj.  $\text{Fe}^2\text{r-shed}^2\text{'e}^2\text{n-g}^2\text{-sta}^2\text{'lt-e}^2\text{t}$ . See DIVERSIFORM.

**VERSCHLAGEN** (Ger.), n.  $\text{Fe}^2\text{r-shla}^2\text{'g-e}^2\text{n}$ . Rheumatism or any other disease (especially of a horse) contracted by sudden cooling after perspiration. [L, 30 (a, 14).]

**VERSCHLEIMUNG** (Ger.), n.  $\text{Fe}^2\text{r-shlim}^2\text{'un}^2$ . 1. The copious secretion of mucus. 2. The condition of being covered with mucus.

**VERSCHEPPBARKEIT** (Ger.), n.  $\text{Fe}^2\text{r-shle}^2\text{'p-ba}^2\text{r-kit}$ . Transportability (e. g., of a contagium). [a, 14.]

**VERSCHLISSMUSKEL** (Ger.), n.  $\text{Fe}^2\text{r-shles}^2\text{'musk-e}^2\text{l}$ . See OBTURATOR (1st def.), and SPHINCTER.

**VERSCHLIESSUNG** (Ger.), n.  $\text{Fe}^2\text{r-shles}^2\text{'sun}^2$ . Occlusion, closure, atresia.

**VERSCHLIMMERN** (Ger.), v. tr. and intr.  $\text{Fe}^2\text{r-shli}^2\text{'m-me}^2\text{rn}$ . To make or to become worse. [a, 14.]

**VERSCHLIMMERUNG** (Ger.), n.  $\text{Fe}^2\text{r-shli}^2\text{'m-me}^2\text{rn-un}^2$ . Deterioration. [a, 14.]

**VERSCHLINGUNG** (Ger.), n.  $\text{Fe}^2\text{r-shli}^2\text{'n-un}^2$ . 1. See DEGLUTITION. 2. An entwining. [a, 14.]

**VERSCHLOSSENSEIN** (Ger.), n.  $\text{Fe}^2\text{r-shlo}^2\text{'s-se}^2\text{n-zin}$ . Occlusion, closure.

**VERSCHLUCKEN** (Ger.), n. and v. tr.  $\text{Fe}^2\text{r-shluk}^2\text{'e}^2\text{n}$ . 1. To swallow. 2. As a n., (a) hicough; (b) deglutition. [a, 14.]

**VERSCHLUCKUNG** (Ger.), n.  $\text{Fe}^2\text{r-shluk}^2\text{'un}^2$ . See DEGLUTITION.

**VERSCHLUSS** (Ger.), n.  $\text{Fe}^2\text{r-shlus}^2\text{'}$ . See ATRESIA, CLOSURE, and OCCLUSION.

**VERSCHMÄCHTUNG** (Ger.), n.  $\text{Fe}^2\text{r-shma}^2\text{'ch}^2\text{'tun}^2$ . Languishing, starving. [a, 14.]

**VERSCHMÄLERUNG** (Ger.), n.  $\text{Fe}^2\text{r-shmal}^2\text{'e}^2\text{rn-un}^2$ . See STENOSIS.

**VERSCHMELZUNG** (Ger.), n.  $\text{Fe}^2\text{r-shme}^2\text{'lts-un}^2$ . Fusion, confluence. See also ANKYLOSIS (2d and 3d def's).

**VERSCHNEIDUNG** (Ger.), n.  $\text{Fe}^2\text{r-shnid}^2\text{'un}^2$ . See CASTRATION.

**VERSCHNITTENER** (Ger.), n. Fe<sup>2</sup>r-shni<sup>2</sup>t/te<sup>2</sup>n-e<sup>2</sup>r. See CASTRATUS.

**VERSCHORFUNG** (Ger.), n. Fe<sup>2</sup>r-sho<sup>2</sup>rf/un<sup>2</sup>. The formation of scurf. [A, 14.]

**VERSCHREIBUNG** (Ger.), n. Fe<sup>2</sup>r-shrib/un<sup>2</sup>. See PRESCRIPTION.

**VERSCHWÄRUNG** (Ger.), n. Fe<sup>2</sup>r-shwar/un<sup>2</sup>. See ULCERATION.

**VERSCHWINDEN** (Ger.), adj. Fe<sup>2</sup>r-shwi<sup>2</sup>nd/e<sup>2</sup>nd. See DELIQUESCENT and EVANESCENT.

**VERSCHWITZEN** (Ger.), v. tr. and intr. Fe<sup>2</sup>r-shwi<sup>2</sup>ts/e<sup>2</sup>n. 1. To perspire; to excrete by perspiration. 2. To cease sweating.

**VERSEHEN** (Ger.), n. Fe<sup>2</sup>r-za/e<sup>2</sup>n. See HALLUCINATION.

**VERSEIFUNG** (Ger.), n. Fe<sup>2</sup>r-zif/un<sup>2</sup>. See SAPONIFICATION.

**VERSETZUNG** (Ger.), n. Fe<sup>2</sup>r-ze<sup>2</sup>ts/un<sup>2</sup>. 1. See ALLOY. 2. See METATHESIS and METASTASIS.

**VERSCOLOR** (Lat.), adj. Vu<sup>2</sup>rs(we<sup>2</sup>rs)-i<sup>2</sup>k/o<sup>2</sup>l-o<sup>2</sup>r. From *vertere*, to turn, and *color*, color. Fr., v. Ger., *verschiedenfarbig*. 1. Variegated. 2. Of corollas, etc., having the sides differing in color. 3. Changing color. [A, 35.]

**VERSILBERN** (Ger.), v. tr. Fe<sup>2</sup>r-zi<sup>2</sup>lb/e<sup>2</sup>rn. To silver (*q. v.*).

**VERSIO** (Lat.), n. f. Vu<sup>2</sup>r(we<sup>2</sup>r)/zhi<sup>2</sup>(si<sup>2</sup>)-o. Gen., -on/s. See VERSION.—V. in clunes. See PELVIC VERSION.

**VERSION**, n. Vu<sup>2</sup>r/zhu<sup>2</sup>n. Gr., *στροφή*. Lat., *versio* (from *vertere*, to turn). Fr., v. Ger., *Wendung* (1st def.), *Lageabweichung* (2d def.). 1. The operation of turning the foetus in utero so as to change the presenting part materially. 2. A deviation of an organ, especially the uterus, from its natural posture; an inclination.—**Abdominal v.** See *External v.*—**Ano-pelvic v.** Of Cazeaux and Guéniot, a method of pelvic v., recommended in difficult cases, in which the child is seized by the pubic arch or the tip of the coccyx, a finger being hooked into the mother's rectum for the purpose. [A, 15.]—**Bipolar v.** Turning by acting upon both poles of the foetus. See also *Combined external and internal v.*—**Busch's cephalic v.** See under METHOD.—**Cephalic spontaneous v.** That variety of spontaneous v. in which the cephalic pole engages. [A, 24.]—**Cephalic v.** Syn.: *head-turning, rectification* (applied to a mere change of position). Turning so as to cause the head to present.—**Combined (external and internal) v.** Fr., v. *par manœuvres internes et externes combinées* (ou *combinée, ou bipolaire, ou mixte*). Ger., *combinirte äussere und innere Wendung*. Of J. B. Hicks, a variety of bipolar v.;

**VERSPRECHEN** (Ger.), n. Fe<sup>2</sup>r-spre<sup>2</sup>ch<sup>2</sup>e<sup>2</sup>n. See HETERO-LALIA.

**VERSPRINGEN** (Ger.), n. Fe<sup>2</sup>r-spri<sup>2</sup>n<sup>2</sup>e<sup>2</sup>n. See SPRAIN.

**VERSTAND** (Ger.), n. Fe<sup>2</sup>r-sta<sup>2</sup>nd<sup>2</sup>. Sense, meaning; intelligence, wit; understanding, intellect. [A, 450 (a, 17).]—**V'esbe-raubung**. See DEMENTIA.—**V'eskrankheit**. See INSANITY.—**V'eschwäche**. See DYSNUSIA.—**V'esstörung**. Any intellectual disorder. [A, 34.]—**V'essinne**. See *Intellectual senses*.—**V'esverwirrung**. See PARANEA.

**VERSTÄRKUNG** (Ger.), n. Fe<sup>2</sup>r-stark/un<sup>2</sup>. See CONCENTRATION, EXACERBATION, and INTENSITY.

**VERSTÄRRUNG** (Ger.), n. Fe<sup>2</sup>r-sta<sup>2</sup>r/run<sup>2</sup>. Stiffness, numbness. [A, 450 (a, 17).]

**VERSTAUCHUNG** (Ger.), n. Fe<sup>2</sup>r-sta<sup>2</sup>u<sup>2</sup>ch<sup>2</sup>-un<sup>2</sup>. See SPRAIN.

**VERSTEINERUNG** (Ger.), n. Fe<sup>2</sup>r-stin<sup>2</sup>e<sup>2</sup>r-un<sup>2</sup>. See CALCAREOUS DEGENERATION and PETRIFICATION.

**VERSTOPFUNG** (Ger.), n. Fe<sup>2</sup>r-sto<sup>2</sup>pf/un<sup>2</sup>. See ASTRICITION, CONSTIPATION, OBSTIPATION, and OBSTRUCTION.—**Albuminöse V.** See *Amyloid degeneration*.—**Leibesv.** See CONSTIPATION and OBSTIPATION.—**V'smuskel**. See under OBSTURATOR (1st def.).

**VERSTOPFUNGSBAND** (Ger.), n. Fe<sup>2</sup>r-sto<sup>2</sup>pf/un<sup>2</sup>-z-ba<sup>2</sup>nd. See Obturator LIGAMENT.—**Äusseres V.** See *Posterior occipito-atlantal LIGAMENT*.

**VERSTREICHEN** (Ger.), **VERSTREICHUNG** (Ger.), n's. Fe<sup>2</sup>r-strich<sup>2</sup>e<sup>2</sup>n, -un<sup>2</sup>. The act of spreading out. [A, 14.]—**V. der Vaginalportion**. The shortening of the canal of the cervix uteri formerly supposed to take place during pregnancy.

**VERSTÜMMELUNG** (Ger.), n. Fe<sup>2</sup>r-stu<sup>2</sup>m/me<sup>2</sup>l-un<sup>2</sup>. See MUTILATION.

**VERSTÜMMUNG** (Ger.), n. Fe<sup>2</sup>r-stum/mun<sup>2</sup>. See APHONIA.

**VERSUCH** (Ger.), n. Fe<sup>2</sup>r-zuch<sup>2</sup>. See ASSAY, n., and EXPERIMENT.—**Klopfv.** See AUSCULTATION.

**VERT-DE-GRIS** (Fr.), n. Ve<sup>2</sup>r-d'-gre. See COPPER subacetate.

**VERTEBRA** (Lat.), n. f. Vu<sup>2</sup>rt(we<sup>2</sup>rt)/e<sup>2</sup>b-ra<sup>2</sup>. From *vertere*, to turn. Gr., *σπόνδυλος, σπονδυλος*. Fr., *vertèbre*. Ger., *Wirbel*. 1. One of the osseous segments of which the "skeleton proper" is made up. It consists typically of a number of osseous pieces definitely arranged so as to form two rings, a dorsal and a ventral, meeting in a common centre (the centrum), which inclose respectively the central nervous system and the circulatory organs and vis-

only two or three fingers are introduced into the uterus, and with them the presenting pole is pushed away from the brim of the pelvis while the other hand, applied to the abdominal wall, presses or slides the opposite pole down into the pelvic inlet.—**D'Outre-pont's cephalic v.** See *D'Outre-pont's method of cephalic v.*—**External v.** Fr., v. *par manœuvres externes*. Ger., *Wendung durch äussere Handgriffe*. V. by external manipulation solely.—**Forced v.** See *Accouchement forcé*.—**French method of v.** A method of podalic v. in which the hand is first directed to the breech as a guide, and then follows down between the thighs to the feet. [A, 61.] Cf. *German method of v.*—**German method of v.** A method of podalic v. in which the hand is carried up on the abdominal aspect of the foetus directly to the feet. [A, 61.] Cf. *French method of v.*—**Hicks's method of v.** See *Combined v.*—**Internal v.** Fr., v. *par manœuvres internes*. Ger., *Wendung durch innere Handgriffe*. V. with the hand carried into the uterus.—**Mixed v.** See *Combined v.*—**Pelvic spontaneous v.** That variety of spontaneous v. in which the pelvic pole engages. [A, 24.]—**Pelvic v.** Fr., v. *pelvienne*. Ger., *Wendung auf den Steiss*. Turning by the breech; v. by the pelvic pole.—**Podalic v.** Lat., in *pedes verai*. Fr., v. *podalique*. Ger., *Wendung auf die Füsse*. Turning by the feet.—**Spontaneous v.** Ger., *Selbstwendung*. The process by which a transverse presentation of the foetus is converted by the powers of nature into a presentation of one or the other pole. See also *Cephalic spontaneous v.*, *Pelvic spontaneous v.*, and *Spontaneous evolution*.—**Two-finger v.** V. by the introduction of two fingers within the uterus.—**V. by the breech**. Fr., v. *sur le siège*. See *Pelvic v.*—**V. by the hand. See *Cephalic v.*—**V. monopode** (Fr.), V. on one leg. Podalic v. in which only one foot is brought down.**

cera, and are known as the neural and haemal arches (*q. v.*). 2. As commonly used, one of the separate pieces which make up the vertebral column. [L.]—**Amphicœlous v.** [Huxley]. A v. of which the body is concave both before and behind. Cf. *Proœlous v.* and *Opisthocœlous v.*—**Basilar v.** The last lumbar v.—**Caudal vertebrae**, 1. The vertebrae of the tail. [L, 41 (a, 14).] 2. In man, see *Coccygeal vertebrae*.—**Cephalic vertebrae**, Ger., *Kopfweibel*. The bones of the skull considered as vertebral in type. Some writers restrict the term to such of the cranial bones as are developed from primordial cartilage, excluding those of intra-membranous formation. Cf. *Cranial vertebrae*.—**Cervical vertebrae**. The anterior or superior seven of the vertebrae, the two nearest the skull being termed the atlas and axis. They have the transverse processes perforated for the vertebral artery, the spinous process short and bifid and the lumen of the neural arch somewhat triangular and larger than in the dorsal or lumbar vertebrae. [L.]—**Coccygeal vertebrae**, Ger., *Steisswirbel*. Syn.: *caudal vertebrae*. The vertebrae of the coccygeal region. They are rudimentary, commonly four in number, sometimes five, seldom three.—**Cranial vertebrae**, Ger., *Schädelwirbel*. Vertebrae whose component parts consist of cranial bones and the osseous and cartilaginous appendages of the skull. The theory of their existence was advanced by Goethe and Oken and elaborated by Cuvier and Sir Richard Owen. Their homology with true vertebrae is no longer accepted on embryological evidence. [L.]—**Dorsal vertebrae**. The vertebrae, twelve in number, with which the ribs articulate. They are especially characterized by articular surfaces for the ribs, downward-sloping spinous processes, and a small circular lumen of the neural arch. [L.]—**False vertebrae**. The fused segments of the coccyx and the sacrum.

[L.]—**First cervical v.** See ATLAS.—**Fixed vertebrae.** See *False vertebrae*.—**Fronto v., Fronto-mandibular v.** A cranial v. having the body of the presphenoid as its centrum, its neural arch made up of the presphenoid, orbito-sphenoid, and frontal bones, and its hæmal arch consisting of the vomer and the prefrontal and nasal bones. [L, 27].—**Lumbar vertebrae.** Ger., *Lendenwirbel*. The five vertebrae which lie above or anterior to the sacrum. They lack costal articular surfaces, and the transverse diameters of their bodies is greater than the antero-posterior. —**Movable vertebrae.** See *True vertebrae*.—**Nasal v., Naso-turbinal v.** A cranial v. with its vomer as its centrum, its neural arch made up of the ethmoid and nasal bones, and its hæmal arch of the turbinate bones. [L, 13].—**Occipital v., Occipito-hyoid**

A LUMBAR VERTEBRA, VIEWED FROM ABOVE.

**v.** The basilar process of the occipital bone (centrum), the lateral and anterior portions of the same bone and the mastoid walls of the tympanum (neural arch), and the scapulae, clavicles, and hyoid bones (hæmal arch). [L, 13].—**Opisthocœlous v.** [Huxley]. A v. having its body concave behind. Cf. *Procoelous v.* and *Amphicoelous v.*—**Parietal v., Parieto-maxillary v.** A cranial v. having the body of the basisphenoid bone as its centrum, its neural arch made up of the basisphenoid, alisphenoid, parietal, and mastoid bones, and its hæmal arch of the inferior maxilla. [L, 13, 27].—**Pelvic vertebrae.** See *Sacral vertebrae*.—**Primitive v., Primordial vertebrae.** See *Mesoblastic somites*.—**Procoelous v.** [Huxley]. A v. having its body concave in front. Cf. *Amphicoelous v.* and *Opisthocœlous v.*—**Sacral vertebrae.** Fr., *vertèbres*

A LUMBAR VERTEBRA, VIEWED Laterally.

*sacrées*. Ger., *Kreuzbeinwirbel*. The segments, five in number, which in adult life fuse to form the sacrum. [L.]—**Sphenofrontal v.** See *Fronto-v.*—**Thoracic vertebrae.** Ger., *Brustwirbel*. See *Dorsal vertebrae*.—**Tricuspid v.** The sixth cervical v. in lower animals. [L, 13].—**True vertebrae.** Ger., *wahre Wirbel*. The vertebrae which are not fused in adult life, i. e., the cervical, dorsal, and lumbar. [L.]—**United vertebrae.** See *False vertebrae*.—**Vertebrae abdominales (seu abdominis).** See *Lumbar vertebrae*.—**Vertebrae caudales.** See *Caudal vertebrae*.—**Vertebrae cervicis.** See *Cervical vertebrae*.—**Vertebrae coccygeales.** See *Coccygeal vertebrae*.—**Vertebrae colli.** See *Cervical vertebrae*.—**Vertebrae interscapulii** [Vesalius]. See *Dorsal vertebrae*.—**Vertebrae lumbales (seu lumborum).** See *Lumbar vertebrae*.—**V. magna** [Realdus]. See ATLAS.—**V. prominens.** The seventh cervical v.; so called on account of the prominence of its spinous process. [C.]—**Vertebrae spuriae (ossis sacri).** See *False vertebrae*.—**Vertebrae thoracicae (seu thoracis).** See *Dorsal vertebrae*.—**Vertebrae verae.** See *True vertebrae*.

**VERTEBRAL**, adj. Vu<sup>rt</sup>e<sup>2</sup>-br'l. Lat., *vertebralis*. Fr., *vertébral*. Ger., *wirbelig*. 1. Pertaining to a vertebra. 2. Having vertebrae, vertebrate. [C.]

**VERTEBRARTERIAL**, adj. Vu<sup>rt</sup>e<sup>2</sup>-b-ra<sup>2</sup>-rt-e<sup>2</sup>-ri<sup>2</sup>-l. Pertaining to the vertebral arteries or veins. [L, 153.]

**VERTEBRATA** (Lat.), n. n. pl. Vu<sup>rt</sup>(we<sup>2</sup>rt)-e<sup>2</sup>-b-rat(rat<sup>2</sup>)/a<sup>2</sup>. From *vertebra* (q. v.). Fr., *vertébrés*. Ger., *Wirbelthiere*. 1. Animals having a backbone, or spinal column. They are distinguished

by a partition, shown in a transverse or vertical section, completely separating the body into two cavities: the dorsal (containing the cerebro-spinal nervous system), and the ventral (containing the heart, alimentary canal, and ordinarily the sympathetic nervous system). The V. are divided into three primary groups: *Ichthyopsida* (fishes and amphibians), *Sauropsida* (reptiles and birds), and *Mammalia*. Haeckel proposes the division into *Leptocardia* and *Pachycardia*. [L, 12.] 2. A phylum of the animal kingdom characterized by a notochord, pharyngeal clefts, and a dorsal median nerve tract, derived from the epiblast, beneath the surface of the body and usually tubular. It includes the *Craniata*, *Cephalochorda*, *Unichorda*, and *Hemichorda*. [L, 121.]

**VERTEBRATE**, adj. Vu<sup>rt</sup>e<sup>2</sup>-b-rat. Lat., *vertebratus*, *vertebralis*. Fr., *vertébré*, *vertébral*. Ger., *wirbelartig*, *gewirbelt*. 1. Pertaining to a vertebra; having vertebrae; as a n., a v. animal. [C.] 2. In botany, (a) see LOMENTACEOUS; (b) having the blade connected with the petiole by a joint (said of a leaf). [a, 35.]

**VERTEBRO-BASILAR**, adj. Vu<sup>rt</sup>e<sup>2</sup>-b-ro-ba<sup>2</sup>s<sup>2</sup>/i<sup>2</sup>-a<sup>2</sup>r. Pertaining to the vertebrae and the lower portion of the skull, especially the basilar bone or process. [L.]

**VERTEBRO-CHONDRAL**, adj. Vu<sup>rt</sup>e<sup>2</sup>-b-ro-kond<sup>2</sup>/r'l. Connecting the vertebrae and the costal cartilages. [L.]

**VERTEBRO-COSTAL**, adj. Vu<sup>rt</sup>e<sup>2</sup>-b-ro-kos<sup>2</sup>t'l. Pertaining to or connecting the ribs and the vertebrae. [L.]

**VERTÉBRO-CRÂNIEN** (Fr.), adj. Ve<sup>2</sup>-ra-ta-bro-kra<sup>2</sup>-ne-a<sup>2</sup>n<sup>2</sup>. Pertaining to or connecting the spinal column and the skull. [A, 385 (a, 48).]

**VERTEBRODIDYMIA** (Lat.), n. f. Vu<sup>rt</sup>(we<sup>2</sup>rt)-e<sup>2</sup>-b-ro(ro<sup>2</sup>)-di<sup>2</sup>-di<sup>2</sup>m(du<sup>2</sup>m)/i<sup>2</sup>-a<sup>2</sup>. From *vertebra* (q. v.), and *δίδυμος*, double. A double monstrosity in which the individuals are united by the vertebrae. [a, 34.]

**VERTEBRO-FEMORAL**, adj. Vu<sup>rt</sup>e<sup>2</sup>-b-ro-fe<sup>2</sup>m/o<sup>2</sup>-r'l. Pertaining to the vertebral column and the femur. [L.]

**VERTEBRO-ILIAC**, adj. Vu<sup>rt</sup>e<sup>2</sup>-b-ro-i<sup>2</sup>/i<sup>2</sup>-a<sup>2</sup>k. Lat., *vertebro-iliacus*. Fr., *vertébro-iliaque*. Pertaining to the vertebrae and the ilium. [C.]

**VERTEBRUM** [Zerbis] (Lat.), n. n. Vu<sup>rt</sup>(we<sup>2</sup>rt)-e<sup>2</sup>-b-ru<sup>2</sup>m-(ru<sup>2</sup>m). The head of the femur. [L, 349.]

**VERTEX** (Lat.), n. m. Vu<sup>rt</sup>(we<sup>2</sup>rt)-e<sup>2</sup>x. Gen., *verticis*. From *verte*, to turn. Gr., *κορυφή*. Fr., *sommeil*. Ger., *Scheitel*. 1. The crown of the head; a somewhat indefinite area of the head that is highest when the subject is in the erect posture. Obstetrical writers vary in the meaning they attach to the term, some applying it to the anterior fontanelle, others to the posterior fontanelle, others to a point a little in front of the posterior fontanelle, others to a point midway between the two fontanelles, and others to the whole portion of the head between them. The last-mentioned sense of the term is generally recognized by writers of the present day. [A, 60.] 2. The apex of an organ. [a, 35.]—**V. cranii.** See V. (1st def.).—**V. cubiti.** See OLECRANON.—**V. of the bladder.** Ger., *Blasen-scheitel*, *Blasengipfel*. The portion of the urinary bladder at the upper extremity of its longest axis (when distended). [L.]—**V. palpitans.** See FONTANELLE (1st def.).

**VERTEBULUM** (Lat.), n. m. Vu<sup>rt</sup>(we<sup>2</sup>rt)-i<sup>2</sup>-b/u<sup>2</sup>(u<sup>2</sup>l)-u<sup>2</sup>m(u<sup>2</sup>m). From *verte*, to turn. See *Articular head* and *TREPINE*.

**VERTICAL**, adj. Vu<sup>rt</sup>/i<sup>2</sup>-k'l. Lat., *verticalis* (from *vertex* (q. v.)). Fr., v. Ger., *vertikal*, *scheitelrecht*. Perpendicular to the plane of the horizon. [a, 48.]

**VERTICIL**, n. Vu<sup>rt</sup>/i<sup>2</sup>-si<sup>2</sup>l. Lat., *verticillus* (dim. of *vertex*, a whirlpool). Fr., *verticille*. Ger., *Quirl*, *Wirtel*. A circle of leaves or other parts lying in the same horizontal plane around an axis. [a, 35.]—**Dimidiate v.** Ger., *Halbwirtel*, *Halbquirl*. A whorl in which the parts are so inclined toward one side of the axis or so spread out as to seem to surround only half the axis. [a, 35.]

**VERTICILLASTER**, n. Vu<sup>rt</sup>-i<sup>2</sup>-s<sup>2</sup>/i<sup>2</sup>-a<sup>2</sup>-st<sup>2</sup>/u<sup>2</sup>r. Lat., *verticillastrum* (from *verticillus*, a verticil, and *aster*, a star). Fr., *verticillastre*. A spurious verticil, one of the pairs of cymes in the axils of the opposite leaves of *Mentha*, etc. [a, 35.]

**VERTICILLATE**, adj. Vu<sup>rt</sup>-i<sup>2</sup>-s<sup>2</sup>/i<sup>2</sup>-at. Lat., *verticillatus*, *verticillaris* (from *verticillus*, a whirl). Fr., *verticillé*. Ger., *quirllich*, *wirtelig*. Whorled, arranged in a whorl or whorls; of leaves, having the verticil composed of three whorls. The *Verticillate* are an order of plants corresponding to the *Labiatae*. [a, 35.]

**VERTICILLIUM** (Lat.), n. n. Vu<sup>rt</sup>(we<sup>2</sup>rt)-i<sup>2</sup>-s<sup>2</sup>(i<sup>2</sup>k)-i<sup>2</sup>/i<sup>2</sup>-u<sup>2</sup>m-(u<sup>2</sup>m). From *verticillus*, a whirl. A genus of *Fungi*. [a, 35.]—**V. candelabrum.** A species occurring on rotten wood. Its micrococcus form was said by Tschamer to occur in the blood, urine, faeces, epithelial cells, and mucus of scarlet-fever patients. [Ctbl. f. Kinderheilk., 1879, no. 23; "Ctbl. f. Bacteriol. u. Parasitenk.," 1887, 13, p. 381 (B).]—**V. cylindrosporum.** A species forming colorless threads often overgrowing *Claviceps purpurea*. [a, 35.]

**VERTICILLUM** (Lat.), n. n. Vu<sup>rt</sup>(we<sup>2</sup>rt)-i<sup>2</sup>-s<sup>2</sup>(i<sup>2</sup>k)-i<sup>2</sup>/i<sup>2</sup>-u<sup>2</sup>m-(u<sup>2</sup>m). From *verte*, to turn. See TOURNIQUET.

**VERTICO-MENTAL**, adj. Vu<sup>rt</sup>/i<sup>2</sup>-k-o-me<sup>2</sup>n<sup>2</sup>t'l. Pertaining to the vertex and the chin. [L, 125.]

**VERTICO-TRANSVERSE**, adj. Vu<sup>rt</sup>/i<sup>2</sup>-k-o-tra<sup>2</sup>n<sup>2</sup>-s<sup>2</sup>-vu<sup>2</sup>r's. 1. Transverse and passing through the vertex of the skull. 2. Vertical and transverse at the same time (said of the perpendicular transverse plane or section of a body). [L.]

**VERTICULA** (Lat.), **VERTICULUM** (Lat.), **VERTICULUS** (Lat.), n's f., n., and m. Vu<sup>rt</sup>(we<sup>2</sup>rt)-i<sup>2</sup>-k/u<sup>2</sup>(u<sup>2</sup>l)-a<sup>2</sup>, -u<sup>2</sup>m(u<sup>2</sup>m), -u<sup>2</sup>s(u<sup>2</sup>s). From *verte*, to turn. 1. See JOINT and ARTICULATION. 2. See VERTEBRA.

**VERTIEFUNG** (Ger.), n. Fe<sup>2</sup>-tef/un<sup>2</sup>. A cavity, a recess. [a, 14.]

**VERTIGE** (Fr.), n. *Ve*<sup>2</sup>-*tez*<sup>h</sup>. See **VERTIGO**.—**V. de Ménière**. See **MÉNIÈRE'S DISEASE**.—**V. marin**. See **SEASICKNESS**.—**V. paralyssant**. See **Gerlier's DISEASE**.—**V. stomacal**. See **Gastric VERTIGO**.

**VERTIGINOSUS**, adj. *Vu*<sup>2</sup>-*rt*<sup>2</sup>-*i*<sup>2</sup>/*i*<sup>2</sup>-*n*<sup>2</sup>-*s*. Lat., *vertiginosus*. Fr., *vertigineux*. Ger., *schwindelig*, *schwindelsüchtig*. Pertaining to, of the nature of, or affected with vertigo. [D.]

**VERTIGO** (Lat.), n. f. *Vu*<sup>2</sup>-*rt*<sup>2</sup>(*we*<sup>2</sup>)*rt*<sup>2</sup>-*ig*(*eg*)<sup>2</sup>-*o*; in Eng., *vu*<sup>2</sup>-*rt*<sup>2</sup>/*ig*-*o*. Gen., *-ig*<sup>2</sup>*inis*. From *vertere*, to turn. Gr., *βίωσ*. Fr., *vertige*. Ger., *Schwindel*. 1. Any movement or sense of movement, either in the individual himself or in external objects, that involves a real or seeming defect in the equilibrium of the body and is associated with more or less disturbance of consciousness. [a, 34.] 2. Of Rhazes, see **COCHLEA** (4th def.).—**Arterio-sclerotic v.** V. due to impaired brain nutrition in consequence of arterio-sclerosis of the cerebral vessels. [a, 34.]—**Auditory v.**, **Aural v.**, **Auricular v.** Ger., *Ohrenschwindel*. See **MÉNIÈRE'S DISEASE**.—**Bilious v.** Of C. L. Dana, v. due to self-intoxication from hepatic torpidity. [a, 34.]—**Cerebral v.** Ger., *Kopfschwindel*. V. entirely due to cerebral disorder. [D, 47.]—**Epileptic v.** A vertiginous or quasi-vertiginous condition assumed in one of the forms of epilepsy. [D, 35.]—**Essential v.** Of Gowers, v. that is caused by some unrecognizable morbid state. [a, 34.]—**Gastric v.** Lat., *v. a stomacho læso*. Fr., *vertige stomacal*. Ger., *Magenschwindel*. V. caused by disorder of the stomach. [a, 34.]—**Greenland fisherman's v.** An hallucination occurring to an Eskimo fisherman when he finds himself alone in his boat with no land and no other boat in sight, in which he believes his boat has lost its balance so that he rushes from one end of it to the other to restore the equilibrium. [N. Y. Med. Jour., July 30, 1887, p. 131 (a, 34).]—**Horizontal v.** V. which appears when the patient reclines, and ceases when he assumes the erect posture. [L, 88 (a, 50).]—**Intestinal v.** V. due to some intestinal disturbance. [a, 34.]—**Labyrinthine v.** See **MÉNIÈRE'S DISEASE**.—**Laryngeal v.** A mild v. that begins with a short cough followed by a laryngeal spasm, limited convulsive movements, and transitory syncope. [a, 34.]—**Lateral v.** V. appearing while the patient is walking along by the side of some structure (e. g., a fence) made up of similar parts. [L, 88 (a, 50).]—**Lithemic v.** Of C. L. Dana, paroxysmal v. due to lithæmia. [a, 34.]—**Mechanical v.** V. produced by the movements of a ship, steam-car, elevator, or other rapidly moving objects. [a, 34.]—**Ménière's v.** See **MÉNIÈRE'S DISEASE**.—**Mental v.** V. caused by some mental disturbance. [a, 34.]—**Migrainous v.** Of Gowers, v. occurring either as part of an attack or as an occasional symptom of migraine. [a, 34.]—**Neurasthenic v.**, **Neurotic v.** Subjective v. due to exhausted or irritated nerve-centres. [a, 34.]—**Nocturnal v.** A sensation of falling felt shortly after going to sleep.—**Objective v.** V. in which external objects seem to whirl around. [a, 34.]—**Ocular v.**, **Ophthalmic v.**, **Optical v.**, **Optic v.** Ger., *Augenschwindel*, *Gesichtsschwindel*. Of Abadie, a variety of v. accompanied by severe pain in the back of the neck, inability to elevate the pupils more than two or three millimetres above the horizontal plane, and a feeling as of falling backward. It is secondary to disorder of the ocular muscles. [F.]—**Otopathic v.** See **MÉNIÈRE'S DISEASE**.—**Rotatory v.** V. produced by rapid rotation of the body or by looking at rotating objects. [a, 34.]—**Stomachal v.** See **Gastric v.**—**Subjective v.** V. in which the person affected seems to himself to move. [a, 34.]—**Vertical v.** V. caused by looking upward to or downward from an elevation. [L, 88 (a, 50).]—**V. ab aure (læsa)**. See **MÉNIÈRE'S DISEASE**.—**V. a stomacho læso**. See **Gastric v.**—**V. auditiva miasmatica**. Of Longhi, aural v. occurring periodically at regular intervals among patients in the marshy districts of Upper Italy. [F, 3.]—**V. of the kakaj**. See **Greenland fisherman's v.**—**V. tenebriosa**. See **SCOTODINIA**.—**V. titubans**, **V. vacillans**. V. with a sensation as of falling forward or backward. [L, 87 (a, 50).]

**VERTILGUNG** (Ger.), n. *Fe*<sup>2</sup>-*ti*<sup>2</sup>/*g*<sup>2</sup>-*un*<sup>2</sup>. See **EXTIRPATION**.

**VERTRETUNG** (Ger.), n. *Fe*<sup>2</sup>-*tre*<sup>2</sup>/*t*<sup>2</sup>-*un*<sup>2</sup>. A dislocation or sprain (of the foot). [A, 450 (a, 17).]

**VERTROCKNUNG** (Ger.), n. *Fe*<sup>2</sup>-*tro*<sup>2</sup>/*k*<sup>2</sup>-*nun*<sup>2</sup>. See **XEROSIS**.

**VERUGAS**, n. *Ve*<sup>2</sup>-*ug*<sup>2</sup>-*a*<sup>2</sup>-*s*. See **VERRUGAS**.

**VERUMONTANUM** (Lat.), n. n. *Ve*(*we*<sup>2</sup>)-*u*<sup>2</sup>(*u*)-*mo*<sup>2</sup>-*nt*-*an*(*a*<sup>2</sup>*n*)-*u*<sup>2</sup>(*m*)-*u*<sup>2</sup>(*m*). See **CAPUT gallinaginis**.

**VERUNSTALTUNG** (Ger.), n. *Fe*<sup>2</sup>-*un*<sup>2</sup>-*sta*<sup>2</sup>/*lt*<sup>2</sup>-*un*<sup>2</sup>. Disfigurement, deformity. [a, 14.]

**VERVAIN, VERVEIN**, n's. *Vu*<sup>2</sup>-*r*<sup>2</sup>-*van*. 1. See **VERBENA** and **VERBENA officinalis**. 2. See **STACHYTARPHETA jamaicensis**.

**VERVEINE** (Fr.), n. *Ve*<sup>2</sup>-*r*<sup>2</sup>-*ve*<sup>2</sup>-*n*. See **VERBENA**; of the Fr. Cod., see **VERBENA officinalis**.—**V. odorante** [Fr. Cod.]. The *Aloysia citrifolia* of its leaves. [B, 95 (a, 38); a, 35.]—**V. officinale**. 1. See **VERBENA officinalis**. 2. Of the Fr. Cod., the flowering plant (leaves [Sp. Ph.]) of *Verbena officinalis*. [B, 95 (a, 38).]

**VERWACHSEN** (Ger.), adj. *Fe*<sup>2</sup>-*va*<sup>2</sup>-*ch*<sup>2</sup>-*s*<sup>2</sup>-*e*<sup>2</sup>-*n*. 1. See **ADHERENT** and **CONNATE** (2d def.). 2. Grown crooked, hunch-backed. [A, 450 (a, 17).]

**VERWACHSUNG** (Ger.), n. *Fe*<sup>2</sup>-*va*<sup>2</sup>-*ch*<sup>2</sup>-*s*<sup>2</sup>-*un*<sup>2</sup>. Adhesion, agglutination, coalescence.—**V'sbrücke** [Uskow]. See **SAPTEM transverbum**.

**VERWAHRMITTEL** (Ger.), n. *Fe*<sup>2</sup>-*va*<sup>2</sup>-*r*<sup>2</sup>-*mi*<sup>2</sup>/*t*<sup>2</sup>-*le*<sup>2</sup>. A prophylactic remedy. [a, 14.]

**VERWANDLUNG** (Ger.), n. *Fe*<sup>2</sup>-*va*<sup>2</sup>-*nd*<sup>2</sup>/*un*<sup>2</sup>. Transformation, metamorphosis. [a, 14.]

**VERWANDTSCHAFT** (Ger.), n. *Fe*<sup>2</sup>-*va*<sup>2</sup>-*nt*<sup>2</sup>/*sha*<sup>2</sup>-*ft*. See **AFFINITY**.

**VERWECHSELUNG** (Ger.), n. *Fe*<sup>2</sup>-*ve*<sup>2</sup>-*ch*<sup>2</sup>-*s*<sup>2</sup>-*e*<sup>2</sup>-*un*<sup>2</sup>. Permutation. [a, 14.]

**VERWELKEND** (Ger.), adj. *Fe*<sup>2</sup>-*ve*<sup>2</sup>/*l*<sup>2</sup>-*e*<sup>2</sup>-*nd*. See **MARCESCENT**.

**VERWERFEN** (Ger.), n. *Fe*<sup>2</sup>-*ve*<sup>2</sup>-*r*<sup>2</sup>/*f*<sup>2</sup>-*e*<sup>2</sup>-*n*. Abortion (in lower animals only). [a, 14.]

**VERWESUNG** (Ger.), n. *Fe*<sup>2</sup>-*vaz*<sup>2</sup>/*un*<sup>2</sup>. See **PUTREFACTION**.

**VERWIRTHEIT** (Ger.), n. *Fe*<sup>2</sup>-*vert*<sup>2</sup>/*hit*. See **HALLUCINATION**.

**VERWITTERUNG** (Ger.), n. *Fe*<sup>2</sup>-*vi*<sup>2</sup>-*t*<sup>2</sup>/*te*<sup>2</sup>-*un*<sup>2</sup>. Decay, etc., resulting from exposure to the weather. [a, 14.]

**VERWUNDBARKEIT** (Ger.), n. *Fe*<sup>2</sup>-*vund*<sup>2</sup>/*ba*<sup>2</sup>-*r*<sup>2</sup>-*kit*. Vulnerability. [a, 14.]

**VERWUNDUNG** (Ger.), n. *Fe*<sup>2</sup>-*vund*<sup>2</sup>/*un*<sup>2</sup>. A wounding, a wound. [a, 14.]

**VERZEHREND** (Ger.), adj. *Fe*<sup>2</sup>-*tsar*<sup>2</sup>/*e*<sup>2</sup>-*nd*. Consuming, consumptive. [a, 14.]

**VERZERRTSEHEN** (Ger.), n. *Fe*<sup>2</sup>-*tse*<sup>2</sup>-*r*<sup>2</sup>/*za*<sup>2</sup>-*e*<sup>2</sup>-*n*. Distorted vision. [L, 57 (a, 14).] See **METAMORPHOSIA**.

**VERZERRUNG** (Ger.), n. *Fe*<sup>2</sup>-*tse*<sup>2</sup>/*r*<sup>2</sup>-*un*<sup>2</sup>. Distortion by external force, a sprain. [a, 14.]

**VERZIEHUNG** (Ger.), n. *Fe*<sup>2</sup>-*tse*<sup>2</sup>/*un*<sup>2</sup>. Distortion by displacement. [A, 450 (a, 17).]

**VERZUCKUNG** (Ger.), n. *Fe*<sup>2</sup>-*tsuk*<sup>2</sup>/*un*<sup>2</sup>. See **CONVULSION**.

**VERZÜCKUNG** (Ger.), n. *Fe*<sup>2</sup>-*tsu*<sup>2</sup>/*k*<sup>2</sup>-*un*<sup>2</sup>. Ecstasy, delirium. [a, 14.]

**VERZWEIGUNG** (Ger.), n. *Fe*<sup>2</sup>-*tswig*<sup>2</sup>/*un*<sup>2</sup>. See **DIVARICATION** and **RAMIFICATION**.

**VESANIA** (Lat.), n. f. *Ve*<sup>2</sup>-*s*(*was*)-*an*(*a*<sup>2</sup>*n*)-*i*<sup>2</sup>-*a*<sup>2</sup>. From *vesanus*, insane. Fr., *vésanie*. See **INSANITY**.—**Primary intellectual v.** See **DELIRIUM grandiosum**.—**V. abortiva**. An abortive insanity. [a, 34.]—**V. acuta**. Of Kahlbaum, see **Febrile DELIRIUM**.—**V. in puerpera**. See **Puerperal INSANITY**.—**V. paralytica progressiva**. Progressive paralytic insanity. [L, 57 (a, 34).]—**V. paralytica progressiva circularis**. Of Fabre, a recurrent form of general paresis. [L, 57 (a, 34).]—**V. paralytica progressiva divergens**. Of Kahlbaum, general paresis with occasional lucid intervals in the early part of the disease. [L, 57 (a, 34).]—**V. paralytica progressiva maniacalis**. Progressive paralytic insanity with access of fury. [L, 57 (a, 34).]—**V. paralytica progressiva melancholica**. Progressive paralytic insanity with melancholic symptoms. [a, 34.]—**V. paralytica progressiva rapida**. See **Galloping PARALYSIS**.—**V. paralytica progressiva stuporosa** (seu *stupida*). Progressive paralytic insanity in which the patient is generally in a state of stupor. [L, 57 (a, 14).]—**V. progressiva simplex**. Of Kahlbaum, primary paralytic dementia. [L, 57 (a, 14).]—**V. typica completa circularis**. Recurrent typical insanity. [L, 57 (a, 14).]—**V. typica incompleta**. Periodic insanity with variable symptoms. [L, 57 (a, 14).]—**V. typica katatonica**. See **CATATONIA**.—**V. typica legitima incompleta**. Transitory insanity. [L, 57 (a, 14).]—**V. typica legitima siveiens**. Acute insanity, generally followed by death. [L, 57 (a, 14).]—**V. typica vera**. Typical insanity without stuporous accidents. [L, 57 (a, 14).]

**VESANICUS** (Lat.), **VESANUS** (Lat.), adj's. *Ve*<sup>2</sup>-*s*(*was*)-*a*<sup>2</sup>-*n*(*a*<sup>2</sup>*n*)-*i*<sup>2</sup>-*k*<sup>2</sup>-*u*<sup>2</sup>-*s*(*u*)-*s*, -*an*(*a*<sup>2</sup>*n*)-*u*<sup>2</sup>-*s*(*u*)-*s*. From *ve*, not, and *sanus*, sane. Fr., *vesanique*. See **INSANE**.

**VESCE** (Fr.), n. *Ve*<sup>2</sup>-*s*. See **VICIA**.

**VESCUS** (Lat.), adj. *Ve*<sup>2</sup>-*sk*(*we*<sup>2</sup>)*sk*<sup>2</sup>/*u*<sup>2</sup>-*s*(*u*)-*s*. In botany, small, thin, weak. [a, 35.]

**VESICA** (Lat.), n. f. *Ve*<sup>2</sup>-*s*(*was*)-*ik*(*ek*)<sup>2</sup>-*a*<sup>2</sup>. Gr., *κύστις*. Fr., *vesie*. Ger., *Blase*. 1. A bladder, especially the urinary bladder. 2. See **Graafian VESICLE**.—**V. biliaria**. See **Gall-BLADDER**.—**V. bipartita**. A more or less incomplete division of the urinary bladder into two parts by the shortening of a band of the longitudinal muscular fibres. [L, 57 (a, 38).]—**V. bovina** [Finn. Ph.]. The bladder of the ox blown up and dried. [B, 95 (a, 38).]—**V. cordis**. See **PERICARDIUM**.—**V. fellea**, *V. fella*. See **Gall-BLADDER**.—**V. natoria**. See **Swim-BLADDER**.—**V. prostatica**. See **UTERUS masculinus**.—**V. saccata**. See **Saccated BLADDER**.—**V. urinæ**, *V. urinaria*. See **Urinary BLADDER**.

**VESICAL**, adj. *Ve*<sup>2</sup>-*s*<sup>2</sup>/*i*<sup>2</sup>-*k*<sup>2</sup>. Lat., *vesicalis*. Fr., *vésical*. Pertaining to the bladder. [C.]

**VESICALIS** (Lat.), adj. *Ve*<sup>2</sup>-*s*(*was*)-*i*<sup>2</sup>-*k*(*ek*)-*al*(*a*<sup>2</sup>*l*)-*i*<sup>2</sup>-*s*. From *vesica*, the bladder. Vesical; as a n. m., see **COMPRESSOR prostatae**; as a n. f., a vesical artery. [a, 48.]—**V. suprema**. Ger., *vierte Blasenarterie*. Of Hyrtl, a fourth vesical artery found during the patency of the funicular portion of the umbilical artery. [A, 19.]

**VESICANT**, adj. *Ve*<sup>2</sup>-*s*<sup>2</sup>/*i*<sup>2</sup>-*k*<sup>2</sup>-*nt*. Lat., *vesicans* (from *vesica*, a bladder). Fr., *vésicant*. Ger., *blasenziehend*. Producing vesication; as a n. (Ger., *Blasenzieher*), a v. substance.

**VESICARIA** (Lat.), n. f. *Ve*<sup>2</sup>-*s*(*was*)-*i*<sup>2</sup>-*k*(*ek*)-*ar*(*a*<sup>2</sup>*r*)-*i*<sup>2</sup>-*a*<sup>2</sup>. From *vesica*, the bladder. Fr., *vésicaire*. 1. Of Crantz, a section of the genus *Trifolium*. 2. Of Lamarck, a genus of the *Cruciferae*. 3. An old name for the *Physalis alkekengi* and *Cardioperium hibernicum*. [a, 35.] 4. Of Schrank, a genus of the *Tamietia* in the larval state. [L, 16.]—**V. granulosa**. See **ECCHINOCYSTIS hominis**.—**V. hygroma**, *V. lobata* (autilia), *V. orbicularis*. See **CYSTICERCUM cellulosa**.—**V. scrofula**. See **CYSTICERCUS cerebralis**.

**VESICARIUM** (Lat.), n. n. *Ve*<sup>2</sup>-*s*(*was*)-*i*<sup>2</sup>-*k*(*ek*)-*ar*(*a*<sup>2</sup>*r*)-*i*<sup>2</sup>-*u*<sup>2</sup>-*m*(*m*). From *vesica*, a bladder. See **OVARY**.

**VESICATION**, n. *Ve*<sup>2</sup>-*s*<sup>2</sup>/*i*<sup>2</sup>-*k*<sup>2</sup>-*a*<sup>2</sup>-*shu*<sup>2</sup>-*n*. Lat., *vesicatio* (from *vesica*, a bladder). Fr., *vésication*. Ger., *Blasenziehen* (1st def.). 1. The act or process of raising a blister. 2. The formation of a blister.

**VÉSICATOIRE** (Fr.), n. *Vaz*-*ek*-*a*<sup>2</sup>-*twaz*<sup>2</sup>-*r*. See **BLISTER** (2d def.).—**V. ambulant**. See **Flying BLISTER**.—**V. ammoniacal**. See **POMMADE de Goudrel**.—**V. camphré** [Fr. Cod.]. See **Emplastrum CANTHARIDUM camphoratum**.—**V. de Janin**. See **Emplastrum PICIS irritans**.

**VESICATORY**, adj. Ve's/i'k-a't-or-iē. Lat., *vesicatorius*. See **VESICANT**.

**VESICLE**, n. Ve's/i'k-l. Gr., *κυστίς*. Lat., *vesicula* (dim. of *vesica*, a bladder). Fr., *vésicule*. Ger., *Bläschen*, *Blase*. 1. A little sac or cyst; in histology, a minute solid or semisolid mass (e.g., a cell or nucleus) inclosed by a membrane. [J.] 2. A lesion of the skin or mucous membrane formed by a collection of clear liquid within or beneath the epithelium, causing a small, circumscribed elevation of the surface. Cf. **BLEB**, **BULLA**, and **POCK**. 3. In botany, (a) a cell of vegetable tissue; (b) an air-cavity or little bladder (e.g., one of the air-bladders in many *Fucaceae*, which render the branches buoyant); and (c) a spore-v. [a, 35].—**Adipose v.** See **FAT-CELL**.—**Air v.** 1. See **AIR-LACUNULE**. 2. See **AIR-CELL** (1st def.) and **ALVEOLUS** (2d def.). 3. See **V.** (3d def. [b]).—**Air v's of the lungs.** See **Air v.** (2d def.).—**Allantoic v.** The internal, epithelial portion of the allantois.—**Anterior cephalic** (or **cerebral**, or **encephalic**) **v.** Ger., *vordere Hirnblase*. A thin-walled cavity formed by the closing in of the dorsal laminae over the cephalic extremity of the primitive groove of the embryo and a subsequent transverse constriction at about the extremity of the notochord. From it are developed the cerebral hemispheres, pineal gland, pituitary body, corpus callosum, cerebral peduncles, fornix, and lateral and third ventricles. Subsequently it is divided by an antero-posterior cleft, which finally becomes the longitudinal fissure. [L.]—**Antipodal v.** See **ANTIPODAL CELL**.—**Aschersonian v's.** V's formed by shaking fluid fat and fluid albumin together, the latter forming a kind of investment or membrane for the minute globules of the fat. [J.] See also **HAPTOTOGENOUS MEMBRANE**.—**Auditory v.** See **OTIC v.**—**Blastodermic v.** See **BLASTULA**.—**Blood v's.** Blood-corpuses. [J.]—**Cerebral v's.** See **ENCEPHALIC v's**.—**Contractile v.** 1. An expansion of the lower end of the excretory canal of some of the *Distomidae*. [L, 16.] 2. See **CONTRACTILE VACUOLE**.—**Directing v.** See **DIRECTING GLOBULE**.—**Embryonal v.** **Embryonic v.** Ger., *Keimschlauch*. See **EMBRYONIC CELL** (4th def.).—**Encephalic v's.** Lat., *vesicula cephalica*. Ger., *Hirnbläschen*. The three compartments into which the anterior extremity of the primitive medullary tube is divided at an early period in foetal life. Other secondary v's spring from the primary one, from which are formed the organs of sense. [I, 15 (K)].—**Erythroid v.** Fr., *vésicule érythroïde*. Of Pockel, a vesicular structure described as constituting one of the elements of the ovum; pyriform, milky white, and larger than the umbilical vesicle; thought by Velpeau to be pathological. [A, 45].—**Fat-v.** See **FAT-CELL**.—**Germinal v.** **Germinal v.** 1. A somewhat spherical body in the ovum with an investing membrane, having fluid and granular contents with a protoplasmic network and germinal spot or spots; regarded essentially as a nucleus. [L, 142, 201.] See cut under **OVUM**. 2. In botany, the imperfectly formed germ-cell in the embryo-sac previous to fertilization. [a, 35].—**Glandular v.** **Gland-v.** See **ACINUS** (7th def.).—**Graafian v.** Fr., *vésicule de Graaf*, *poche vésiculaire*. Ger., *Eierstocksförmig*, *Eiersack*. A closed sac which contains the ovarian ovum. It consists of an external membrane lined with small granular cells (the *membrana granulosa*) which are condensed at one point to form the discus proligerus. Prior to the ripening of the ovum the v. is situated within the stroma of the ovary, but as maturation advances it becomes superficial, its walls grow vascular, and it is distended with a serous fluid. It finally ruptures, allowing the ovum to escape. [L.]—**Kupffer's v.** See **POSTAL v.**—**Lens v.** See **SECONDARY OCULAR v.**—**Malignant v.** See **CONTAGIOUS ANTHRAX**.—**Marginal v's.** See **MARGINAL BODIES**.—**Medullary v. of the eye.** See **PRIMARY OPTIC v.**—**Mesencephalic v.** **Middle cerebral** (or **encephalic**, or **primary**) **v.** Ger., *mittlere Hirnblase*. In embryology, the dilatation of the medullary tube just posterior to the cephalic extremity of the notochord, from which the corpora quadrigemina, cerebral peduncles, and aqueduct of Sylvius are developed. [L.]—**Nuclear v.** See **NUCLEUS** (1st def.).—**Ocular v's.** See **PRIMARY OPTIC v's**.—**Olfactory v.** The primitive v. from which is developed the olfactory lobe. [I, 2 (K)].—**Otic v.** Ger., *Gehörbläschen*, *Ohrbläschen*, *Gehörkapsel*. The embryonic rudiment of the organ of hearing, formed by an involution of the epiblast from the outer surface of the head in the region of the medulla oblongata, opposite the dorsal end of the hyoidean arch. [A, 5].—**Ovarian v.** See **Graafian v.**—**Polar v.** See **EXTRUSION GLOBULE**.—**Pituitary v.** The primitive pituitary body in the embryo. [I, 2 (K)].—**Postanal v.** A vesicular dilatation of the posterior extremity of the postanal gut. [L, 201].—**Posterior cephalic** (or **cerebral**, or **encephalic**) **v.** The posterior enlargement of the medullary tube from which the cerebellum, pons Varolii, medulla oblongata, and fourth ventricle are developed. [L.]—**Primary ocular** (or **optic**) **v's.** Lateral projections from the anterior cerebral v., from which the eyes are developed. [L.]—**Primitive cerebral v.** An expansion at the anterior extremity of the medullary tube, from which is developed the encephalon. It is subsequently divided into the anterior, middle, and posterior cerebral v's. [I, 28 (K); L.]—**Primitive optic v's.** See **PRIMARY OCULAR v's**.—**Prosencephalic v.** See **ANTERIOR CEPHALIC v.**—**Prostatic v.** See **UTERUS MASCULINUS**.—**Pulmonary v.** See **AIR-CELL** (1st def.) and **ALVEOLUS** (2d def.).—**Purkinjean v.** **Purkinje's v.** See **GERMINAL v.** (1st def.).—**Secondary occipital v.** See **POSTERIOR CEREBRAL v.**—**Secondary ocular** (or **optic**) **v.** A depression, or involution, in the wall of the primary optic v., which receives the lens. [I, 15 (K)].—**Seminal v's.** Lat., *vesicula seminales*. Ger., *Samenbläschen*, *Samenblasen*, *Samenstückchen*. Two membranous tubes, coiled and doubled upon themselves so as to present a sacculated appearance, and lying on the base of the bladder with their blind posterior extremities (between which the vasa deferentia run) considerably separated. They converge toward the prostate and unite each with its corresponding vas deferens. They serve as receptacles for the semen. [L.]—**Sense-v.** A v. from which an organ of special sense is developed. [L.]—**Spore-v.** Lat., *vesicula sporarum* (see *sporidiorum*). Ger., *Sporenblase*. In the *Phycomycetes* (vesicular molds), one of the bladder-like fruits containing sporidia. [a, 35].—**Umbilical v.**

Ger., *Nabelbläschen*, *Dottersack*, *Nabelblase*. The navel sac, a structure of the human ovum which in the lower animals is called the vitelline sac or yolk sac. It is situated on the abdominal aspect of the embryo, being continuous with the omphalo-mesenteric duct. [A, 11].—**Unpaired (anterior) v.** See **ANTERIOR CEPHALIC v.**—**Urinary v.** The allantois.—**V. of Baer.** The ovum in the Graafian v. [J, 33].—**V. of Balbiani.** See **YOLK NUCLEUS**.—**V. of Graaf.** See **Graafian v.**—**V's of Naboth.** See **NABOTHIAN FOLLICLES**.—**V. of Purkinje.** See **GERMINAL v.**—**V. of the optic thalamus.** See **ANTERIOR CEREBRAL v.**

**VESICO-ABDOMINAL**, adj. Ve's/i'k-o-a'b-do'm'i'z-n'l. For deriv., see **VESICA** and **ABDOMEN**. Pertaining to the urinary bladder and the abdomen. [L.]

**VESICOCELE** (Lat.), n. f. Ve's/s(was)-i'k(ek)-o(o)-sel(kal)/e(a); in Eng., ve's/i'k-o-sel. Gen., *-cel'es*. From *vesica*, a bladder, and *κῆλη*, a tumor. See **CYSTOCELE**.

**VESICO-CERVICAL**, adj. Ve's/i'k-o-su'v'i'z-k'l. For deriv., see **VESICA** and **CERVIX**. Pertaining to the urinary bladder and cervix uteri. [L.]

**VESICOCOLYSIS** (Lat.), n. f. Ve's/s(was)-i'k(ek)-o'k/li's(lu's)/-i's. Gen., *-clys'eos* (-oc'lysis). From *vesica*, the bladder, and *κλύσις*, a washing. Of McDowell, the injection of fluids into the bladder. [a, 34.]

**VESICOPLASTIK** (Ger.), n. Vaz-ek-o-pla'st-ek'. The plastic surgery of the urinary bladder. [L.]

**VESICO-PROSTATIC**, adj. Ve's/i'k-o-pro-sta't'i'z-k. Pertaining to the urinary bladder (or the seminal vesicle) and the prostate.

**VÉSICO-PROSTATIQUE** (Fr.), n. Va-se-ko-pro-sta't-tek. See **COMPRESSOR PROSTATE**.

**VÉSICO-PUBIEN** (Fr.), adj. Va-se-ko-pu'a-be-e'n. Pertaining to the urinary bladder and the pubic bone or region. [L.]

**VESICO-SPINAL**, adj. Ve's/i'k-o-spi'n'l. Pertaining to the urinary bladder and the spinal cord. [L.]

**VESICO-UMBILICAL**, adj. Ve's/i'k-o-u'mb-i'z/i'k-l. Pertaining to the urinary bladder and the umbilicus. [L.]

**VESICO-UTERINE**, adj. Ve's/i'k-o-u't'e'r-i'n. Pertaining to the urinary bladder and the uterus. [L.]

**VESICO-UTERO-VAGINALIS** (Lat.), adj. Ve's/s(was)-ik(ek)-o(o)-u't(u't)-e'r-o(o)-va'j(wa'g)-i'z(n)-en(al)/a'pl'i'z's. Pertaining to the urinary bladder, uterus, and vagina. [L.]

**VESICO-VAGINAL**, adj. Ve's/i'k-o-va'j/i'z-n'l. Pertaining to the urinary bladder and the vagina. [L.]

**VESICULA** (Lat.), n. f. Ve's/s(was)-i'k(ek)/u'z(l)/a'z. See **VESICLE**.—**V. alba.** The umbilical vesicle.—**V. blastodermica.** See **BLASTULA**.—**V. bronchica.** See **AIR-CELL** (1st def.) and **ALVEOLUS** (2d def.).—**V. cephalica.** See **ENCEPHALIC VESICLES**.—**Vesiculae cervicis uteri.** See **NABOTHIAN FOLLICLES**.—**Vesiculae cristallinae genitalium.** Herpes progenerialis. [G, 11].—**V. directrix.** See **DIRECTING GLOBULE**.—**Vesiculae divae barbare.** See **VARIOLA CONFUSA**.—**V. felica.** **V. fellis.** See **GALL-BLADDER**.—**Vesiculae gelatinosae.** See **GELATIN CAPSULE**.—**V. germinativa** [Bernhardt]. See **GERMINAL VESICLE**.—**V. graafiana.** **V. Graafii.** See **Graafian VESICLE**.—**Vesiculae griseae** (lienis). See **MALPIGHIAN CORPUSCLES** (3d def.).—**V. malpighiana.** See **V. pulmonalis**.—**V. omphalo-mesenterica.** **V. ovals.** See **UMBILICAL VESICLE**.—**V. prolifera.** **V. prolifera.** See **GERMINAL VESICLE**.—**V. pulmonen.** **V. pulmonalis.** **V. pulmonum.** See **AIR-CELL** (1st def.) and **ALVEOLUS** (2d def.).—**V. Purkinji.** See **GERMINAL VESICLE**.—**Vesiculae sanguinis.** Blood-corpuses. [J.]—**Vesiculae seminales.** See **SEMINAL VESICLES**.—**V. serosa.** See **FALSE AMNION**.—**Vesiculae spermaticae.** See **SEMINAL VESICLES**.—**V. spermatica spuria.** See **UTERUS MASCULINUS**.—**V. sporarum.** **V. sporidiorum.** See **SPORE-VESICLE**.—**V. umbilicalis.** See **UMBILICAL VESICLE**.

**VESICULAR**, adj. Ve's/i'k/u'z-l-a'r. Lat., *vesicularis* (from *vesicula*, a vesicle). Fr., *vésiculaire*. Ger., *blasig*, *blasenartig*, *bläschenförmig*. 1. Pertaining to a vesicle; affected with, consisting of, or of the nature of vesicles. 2. Pertaining to or resembling a bladder-like structure (e.g., the seminal vesicles). 3. Of a murmur, sounding as if generated within vesicles; emitting a soft, sighing sound. [D, 1.]

**VESICULATED**, adj. Ve's/i'k/u'z-l-a't-e'd. From *vesicula*, a vesicle. Fr., *vésiculé*, *en grappes*. Having the appearance of a bunch of grapes; hydatidiform. [A, 42.]

**VESICULATION**, n. Ve's/i'k-u'z-l-a'shu'n. From *vesicula*, a vesicle. The formation of vesicles.

**VÉSICULE** (Fr.), n. Vaz-ek-u'l. See **VESICLE**.—**Première v. cérébrale.** See **ANTERIOR CEREBRAL VESICLE**.—**Seconde v. encéphalique.** See **MESENCEPHALIC VESICLE**.—**Troisième v. cérébrale primitive.** **Troisième v. encéphalique.** See **POSTERIOR CEREBRAL VESICLE**.—**V. auditive.** See **OTIC VESICLE**.—**V. biliaire.** See **GALL-BLADDER**.—**V. cérébelleuse.** See **POSTERIOR CEREBRAL VESICLE**.—**V. cérébrale antérieure.** See **ANTERIOR CEREBRAL VESICLE**.—**V. cérébrale moyenne.** See **MIDDLE CEREBRAL VESICLE**.—**V's craniennes.** See **ENCEPHALIC VESICLES**.—**V's cristalligènes.** Of Treul, vesicles containing albuminoid matter in the form of crystalloids. [a, 35].—**V's des hémisphères.** The lateral portions of the anterior cerebral vesicle from which the cerebral hemispheres are formed. [L.]—**V. des tubercules quadrigeminaux.** See **MESENCEPHALIC VESICLE**.—**V. du bulbe.** **V. du cerveau postérieur.** See **POSTERIOR CEREBRAL VESICLE**.—**V. du fiel.** See **GALL-BLADDER**.—**V. du germe.** See **GERMINAL VESICLE**.—**V. élémentaire.** See **HÉMATOBLAST**.—**V. embryogène.** See **YOLK NUCLEUS**.—**V's épidémiques.** See **SYPHILIS**.—**V's filles.** See **DAUGHTER-BLADDERS**.—**V's latérales.** See **V's des hémisphères**.—**V's génératrices.** See **PROLIFERATING CELLS of the tubuli uriniferi**.—**V. germinative.** See **GERMINAL VESICLE**.—**V's incolores**

du sang. See *White BLOOD-CORPUSCLES*.—*V. inférieure*. The lower subdivision of the posterior cerebral vesicle, from which arises the medulla oblongata. [L, 36 (K).]—*V. médiane*. See *Mesencephalic VESICLE*.—*V. mère*. See *Mother-CELL*.—*V's mères* (de spermatozoïdes). See *V's génératrices*.—*V. moyenne*. See *PROSTATE*.—*V. nucléenne*. See *NUCLEUS* (1st def.).—*V. organique*. See *CELLULE*.—*V. ovarienne*, *V. ovarique*. See *Graafian VESICLE*.—*V. primitive des hémisphères*. See *Anterior cerebral VESICLE*.—*V. prostatique*. See *UTERUS masculinus*.—*V. pulsatile*. See *Contractile VACUOLE*.—*V. séreuse*. See *False AMNION*.—*V's spermaticques*. See *V's génératrices*.—*V's spermatozôgènes*. See *Seminal CELLS*.—*V. supérieure*. See *Anterior cerebral VESICLE*.—*V. webérienne*. See *UTERUS masculinus*.

**VESICULEUX** (Fr.), adj. Va-se-ku<sup>6</sup>-lu<sup>8</sup>. See *VESICULOSE*.

**VESICULIFEROUS**, adj. Ve-s-i<sup>2</sup>k-u<sup>1</sup>-i<sup>2</sup>f'e<sup>2</sup>r-u<sup>2</sup>s. Lat., *vesiculiferus* (from *vesicula*, a vesicle, and *ferre*, to bear). Fr., *vésciculifère*. Bearing vesicles. The *Vesiculiferi* are the *Physomyces*. [a, 35.]

**VESICULIFORM**, adj. Ve-s-i<sup>2</sup>k-u<sup>1</sup>-i<sup>2</sup>f'o<sup>2</sup>rm. From *vesicula*, a vesicle, and *forma*, form. Fr., *vésiculiforme*. Bladdery, having the form of a vesicle. [a, 35.]

**VESICULITIS** (Lat.), n. f. Ve-s(was)-i<sup>2</sup>k(ek)-u<sup>1</sup>(u<sup>1</sup>)-i(e)-t'i<sup>2</sup>s. Gen., -it'idos (-idis). From *vesicula*, a vesicle. Inflammation of a vesicle, especially of the seminal vesicles. [a, 34.]—**Seminal v.** An acute or chronic infective inflammation of the seminal vesicles. ["N. Y. Med. Jour.," Aug., 1889, p. 631 (a, 34).]

**VESICULO-PROSTATIQUE** (Fr.), adj. Va-se-ku<sup>6</sup>-lo-pro-sta<sup>2</sup>-tek. Pertaining to the bladder and the prostate.

**VESICULOSE**, adj. Ve-s-i<sup>2</sup>k-u<sup>1</sup>-os. Lat., *vesiculosus*. Fr., *vésiculeux*. Ger., *blasig*. 1. Consisting of or covered with vesicles. 2. Vesiculiform. [a, 35.]

**VESICULO-TUBULAR**, adj. Ve-s-i<sup>2</sup>k-u<sup>1</sup>-o-tu<sup>2</sup>b'u<sup>1</sup>-a<sup>2</sup>r. Vesicular and tubular at the same time (said of a murmur). [L.]

**VESICULOUS**, adj. Ve-s-i<sup>2</sup>k-u<sup>1</sup>-u<sup>2</sup>s. Lat., *vesiculosus*. Fr., *vésiculeux*. See *VESICULAR* and *VESICULOSE*.

**VESOU** (Fr.), n. V'zu. Sugar-cane juice. [L, 49 (a, 14).]

**VESPA** (Lat.), n. f. Ve'sp(we'sp)/a<sup>2</sup>. Gr., σφῆξ. Fr., *guêpe*. Ger., *Wespe*. A genus of the *Vespidæ*, or wasps (a family of hymenopterous insects). [a, 35.]—*V. crabro*. Fr., *frelon*. Ger., *Hornisse*. The hornet; formerly used as a purgative and diuretic. [a, 35.]—*V. vulgaris*. Ger., *gemeine Wespe*, *Erdwespe*. The common wasp; formerly used as a purgative and diuretic. [a, 35.]

**VESPAJO** (It.), n. Ve-s-pa<sup>2</sup>-yo. 1. A wasp's nest. 2. Anthrax. 3. Malignant pustule. [G, 71.] Cf. *FURUNCULUS vespajus*.—*V. del capillizio*. See *KERION*.

**VESPARIUS** (Lat.), adj. Ve-sp(we'sp)-a(a<sup>2</sup>)-ri<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). From *vespa*, a wasp. Fr., *guêpaire*. Pertaining to or containing wasps. [A, 385 (a, 48).]

**VESPERTINE**, adj. Ve-sp(we'sp)-er-t-i<sup>2</sup>n. Lat., *vespertinus* (from *vesper*, the evening). Of the evening, appearing in the evening; of fowls, opening at nightfall. [a, 35.]

**VESSE-DE-LOUP** (Fr.), **VESSE-LOUP** (Fr.), n's. Ve-s-d'lu, ve-s-lu. The *Lycoperdon giganteum* and other species of *Lycoperdon*. [a, 35.]

**VESSEL**, n. Ve-s'e<sup>2</sup>. Gr., ἀγγεῖον. Lat., *vas*. Fr., *vaisseau*. Ger., *Gefäss*. A utensil for holding liquids, etc.; in anatomy, a duct or channel for containing or conveying any fluids of the body, especially the blood. [a, 48.]—**Absorbent v's**. The lacteals and lymphatics. [C.]—**Ambulacral v's**. A system of v's consisting of a circular canal around the mouth (in the echinoderms), giving origin usually to canals which follow the middle line of each of the ambulacral metameræ. [A, 12.]—**Blood-v**. See the major list.—**Capillary v**. See *CAPILLARY* (3d def.).—**Chyliferous v's**. Lat., *vasa chylifera*. Ger., *Milchgefässe*. Absorbent v's which arise in the villi of the intestinal walls and terminate in the thoracic duct. Those from the descending colon and sigmoid flexure connect with the lumbar lymphatics or the thoracic duct by a separate trunk. [C.]—**Hæmorrhoidal v's**. The dilated veins of the rectum and anus. [a, 34.]—**Lacteal v's**. See *Lactiferous v's*.—**Lactiferous v's**. Lat., *vasa lactifera* (see *laticis*). Milk-v's, the tubes secreting the peculiar juice of plants. [a, 35.] See *LATER-CELL*.—**Lymphatic v's**. *Lymph v's*. See *LYMPHATICS*.—**Milk-v's**. See *Lactiferous v's*.—**Pitted v**. See *Pitted CELL*.—**Plasmatic v's**. See *SERIOUS canaliculi*.—**Spiral v**. See *Spiral CELL*.—**Umbilical v's**. Lat., *vasa umbilicalia*. Fr., *vaisseaux ombilicales*. Ger., *Nabelgefässe*. The umbilical arteries and veins. [L.]

**VESSE** (Fr.), n. Ve<sup>2</sup>-se. See *BLADDER*.—**V. à cellules**. See *Saccated BLADDER*.—**V. à colonnes**. See *Columnar BLADDER*.—**V. du fiel**. An old term for the gall-bladder. [A, 41.]—**V. en bissac**. See *Bilobed BLADDER*.—**V. natatoire**. See *Air-BLADDER*.

**VESSIGNON** (Fr.), n. Ve-s-sen-yo<sup>2</sup>n<sup>2</sup>. A chronic synovial tumor sometimes observed on one side of a horse's hock. [A, 301 (a, 34).]

**VESTIBULAR**, adj. Ve-st(i<sup>2</sup>b)-u<sup>1</sup>-a<sup>2</sup>r. From *vestibulum*, an entrance-court. Pertaining to a vestibule, especially the vestibule of the vulva.

**VESTIBULE**, n. Ve-st(i<sup>2</sup>b)-u<sup>1</sup>. Lat., *vestibulum*. Fr., *v. Vorhof*. 1. A triangular space bounded on the two sides by the labia pudendi minora and below by the ostium vaginae. [A, 15.] 2. The first division of the osseous labyrinth of the internal ear; an irregular, elliptical cavity, 4 to 5 mm. in diameter. Its lateral wall is formed in great part by the fenestra ovalis and the foot-plate of the stapes. On the median and inferior walls are two depressions for the reception of the sacculi. On the posterior and partly on the superior and inferior walls lie the mouths of the semicircular canals. On the anterior inferior wall is the entrance of the cochlea

into the scala vestibuli. [F, 3.] 3. Of Gratiolet, the upper portion of the third ventricle of the brain. [I, 35 (K).] 4. In botany, see *STOMA* (3d def.).—**Aortic v.** Of Sibson, the small compartment formed by the left ventricle, adjoining the root of the aorta. Its walls are formed of fibro-cartilage and do not collapse, thus leaving room for the flaps of the aortic valve to descend during diastole of the heart. [C.]—**V. of the ear**. See *V*. (2d def.).—**V. of the mouth**. The portion of the mouth outside of the teeth, bounded by the lips and the cheeks. [L, 57 (a, 50).]—**V. of the nose**. The region of the external nostrils, including all parts roofed by the nasal cartilages. [C.]—**V. of the vagina**. Ger., *Schamvorhof*. See *V*. (1st def.).—**V. of the ventricles**. The entrance to the ventricles of the brain. [I, 43.]

**VESTIBULUM** (Lat.), n. n. Ve-st(we'st)-i<sup>2</sup>b-u<sup>1</sup>(u<sup>1</sup>)-u<sup>2</sup>m(u<sup>2</sup>m). See *VESTIBULE*.—**V. labyrinthi**. See *VESTIBULE* (2d def.).—**V. membranaceum**. See *UTRICLE* (2d def.).—**V. pharyngis**. The isthmus faucium.—**V. vaginae**. See *VESTIBULE* (1st def.).

**VESTIGIUM** (Lat.), n. n. Ve-st(we'st)-i<sup>2</sup>j(eg)/i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). Lit., a foot-print; a trace, a slight impression or marking, a rudimentary structure; also the sole. [L, 50 (a, 48).]—**V. foraminis ovalis**. See *FOVEA of the right auricle of the heart*.—**Vestigia of muscles**. The seven intrinsic muscles of the auricle; so called from their extremely rudimentary condition in man. [F.]—**V. pedis**. The metatarsus. [L, 50 (a, 48).]

**VESTIMENTUM** (Lat.), n. n. Ve-st(we'st)-i<sup>2</sup>(e)-me<sup>2</sup>nt-u<sup>2</sup>m(u<sup>2</sup>m). From *vestis*, clothing. Ger., *Bekleidung*. See *INDUMENTUM* (1st def.).

**VESUVIN**, n. Ve-s-u<sup>2</sup>-v'i<sup>2</sup>n. See *TRIAMIDO-AZOBENZENE hydrochloride*.

**VETA**, n. See *Mountain SICKNESS*.

**VETCH**, n. Ve<sup>2</sup>ch. The genus *Vicia*. [a, 35.]—**Bitter v**. See *LATHYRUS macrorrhizus*, *OROSUS* (3d def.), and *Vicia ervilia*.—**Chickling v**. See *LATHYRUS sativus*.—**Kidney-v**. See the major list.—**Licorice-v**. See *ASTRAGALUS glycyphyllos*.—**Milk-v**. See *ASTRAGALUS* (6th def.).

**VETCHLING**, n. Ve<sup>2</sup>ch/li<sup>2</sup>n<sup>2</sup>. The genus *Lathyrus*. [a, 35.]

**VETERINARIAN**, n. Ve<sup>2</sup>t'er-i<sup>2</sup>n-ar'i<sup>2</sup>n. Lat., *veterinarius*, *equarius*. Fr., *vétérinaire*. Ger., *Veterinärarzt*. A practitioner of veterinary medicine. [a, 48.]

**VETERINARY**, adj. Ve<sup>2</sup>t'er-i<sup>2</sup>n-ar-i<sup>2</sup>. Lat., *veterinarius*, *veterinus*. Fr., *vétérinaire*. Ger., *veterinär*. Pertaining to or concerned with the domestic animals (cf. *V. MEDICINE*).

**VETERNOMANIA** (Lat.), n. f. Ve(we't)-u<sup>2</sup>rn(e<sup>2</sup>rn)-o(o)-man(ma<sup>2</sup>n)/i<sup>2</sup>-a<sup>2</sup>. From *veterus*, drowsiness, and *mania*, madness. See *TYPHOMANIA*.

**VETERNOSITAS** (Lat.), **VETERNUS** (Lat.), n's f. and m. Ve<sup>2</sup>t(we't)-u<sup>2</sup>rn(e<sup>2</sup>rn)-o(o)s(os)/i<sup>2</sup>t-a<sup>2</sup>s(a<sup>2</sup>s), -u<sup>2</sup>rn(e<sup>2</sup>rn)/u<sup>2</sup>s(u<sup>2</sup>s). Gen., -ta<sup>2</sup>i(-ter'ni). See *DROWSINESS*.

**VÉTIVER** (Fr.), n. Va-te-va. 1. The *Hemidesmus indicus*. [a, 35.] 2. See *VETIVERIA* (3d def.).

**VETIVERIA** (Lat.), n. f. Vat-e-ve'r/i<sup>2</sup>-a<sup>2</sup>. From E. Ind., *vetivayr*. Fr., *vétiverie* (1st def.), *vétiver* (2d def.), *vetiver* (2d def.). Ger., *Vetiver*. 1. A section of the genus *Andropogon*. 2. The *Andropogon muricatus* or its root. [a, 35.]—**Oleum vetiveriæ**. Ger., *Vetiveröl*. An ethereal oil obtained from radix vetiveriæ. [B, 108 (a, 14).]—**Radix vetiveriæ**. Sp., *vetiver*, *grama de las Indias (raíz)* (Sp. Ph.). The root of *Andropogon muricatus*. [B, 95 (a, 38).]—**V. odorata**. See *ANDROPOGON muricatus*.

**VETULA** (Lat.), n. f. Ve<sup>2</sup>t(we't)/u<sup>1</sup>(u<sup>1</sup>)-a<sup>2</sup>. From *vetus*, old. 1. Of old writers, the skin of the navel wrinkled by age. 2. Less correctly, the os sacrum. [A, 322, 500 (a, 48).]

**VEVEY**, n. Ve<sup>2</sup>-va. A climatic health resort in the canton of Vaud, Switzerland. [L, 57 (a, 14).]

**VEXILLAR, VEXILLARY**, adj's. Ve<sup>2</sup>x/i<sup>2</sup>-a<sup>2</sup>r, -ar-i<sup>2</sup>. Lat., *vexillaris* (from *vexillum*, a military ensign). Fr., *vexillaire*. Ger., *fahnenförmig*. Pertaining to or resembling a vexillum. [a, 35.]

**VEXILLUM** (Lat.), n. n. Ve<sup>2</sup>x(we'x)-i<sup>2</sup>/lu<sup>2</sup>m(u<sup>2</sup>m). From *vehere*, to carry. Fr., *étendard, pavillon*. Ger., *Fahne, Wimpel*. The standard; the large upper petal of a papilionaceous corolla. [a, 35.]

**VIA** (Lat.), n. f. Vi(wi<sup>2</sup>)/a<sup>2</sup>. Gr., ὁδός. Fr., *voie*. Ger., *Weg*. A way, passage, or tract; also a method or manner. [a, 48.]—**Prime vie**. Fr., *premières voies*. The gastro-intestinal tract. [K.]—**Secundæ vie**. An old term for the lacteals. [K.]—**V. humida**. See *Wet WAY*.—**Vie lacrimales**. See *LACRYMAL PASSAGES*.—**V. siccæ**. See *Dry WAY*.

**VIABILITY**, n. Vi-a<sup>2</sup>b-i<sup>2</sup>/i<sup>2</sup>t-i<sup>2</sup>. Fr., *viabilité*. Ger., *Lebensfähigkeit (des Fötus)*. The state of being viable.

**VIALE**, adj. Vi-a<sup>2</sup>-b'l. Lat., *vitalis, vitabilis* (from *vita*, life). Fr., *v.* (from *vie*, life), whence the English word. Ger., *lebensfähig*. Of a fœtus, far enough advanced in development to be capable of survival apart from the maternal organism.

**VIAL**, n. Vi'al. See *PHIAL*.

**VIANDÉ** (Fr.), n. Ve-a<sup>2</sup>n-dé. See *MEAT*.—**Extrait de v**. See *BEER-extract*.—**Jus de v**. See *BEER-juice*.—**Poudre de v**, **V. desséchée**, **V. en poudre**. See *MEAT flour*.

**VIBEX** (Lat.), n. f. Vib(we'be)/x. Gen., -e'cis. Gr., μόλωψ. Fr., *vergeure*. Ger., *Striemen, Blutschwiele*. 1. A mark produced or appearing as if produced by the stroke of a whip. 2. A linear ecchymosis.—**V. a flagello**. V. due to the stroke of a whip. [G, 11.]—**V. a panaritio**. Of Plenck, a red stripe extending from a finger affected with paronychia to the forearm, and disappearing after incision of the finger; probably due to an inflamed lymphatic vessel. [G, 11.]—**V. febrilis**. V. sometimes observed in the course of malignant fevers. [G, 11.]—**V. scorbutica**. See *PURPURA scorbutica*.

**VIBRATILE**, adj. Vib/ra<sup>2</sup>t-<sup>2</sup>l. Lat., *vibratilis* (from *vibrare*, to shake). Fr., *v. Ger.*, *zitternd*, *schwankend*. Capable of shaking or quivering. [a, 48.]

**VIBRATION**, n. Vib-ra/shu<sup>2</sup>n. Gr., *κλόνος*. Lat., *vibratio* (from *vibrare*, to shake). Fr., *v.*, *frémissement*. Ger., *V.*, *Schwingung*. 1. The act or process of shaking or quivering. 2. An oscillating or quivering motion. [a, 48.]—**Elastic after-v.** The final oscillations which follow the period of elongation in a muscular contraction. [Landois (K).]—**Hydatid v.** See *Hydatid THRILL*.—**Nerve v.** See *PERCUSSION* (2d def.).

**VIBRATOR** [Bauhinus] (Lat.), n. m. Vib(wi<sup>2</sup>b)-rat(rat<sup>2</sup>)/o<sup>2</sup>r. Gen., -tor<sup>2</sup>is. From *vibrare*, to shake. Fr., *vibrateur*. See *Vas defrens*.

**VIBRATORY**, adj. Vib/ra<sup>2</sup>t-or-<sup>2</sup>l. Lat., *vibratorius*. Fr., *vibratoire*. Shaking, quivering, oscillating. [a, 48.]

**VIBRIO** (Lat.), n. m. Vi<sup>2</sup>b(wi<sup>2</sup>b)/ri<sup>2</sup>o. Gen., -on<sup>2</sup>is. From *vibrare*, to shake. Fr., *vibron*. An elongated, coiled bacillus (spirillum) having the turns not strongly developed; of some authors, a distinct genus of the *Schizomycetes*. [a, 35.]—**Septic v.** See *BACILLUS edematis*.—**V. (anguillula) aceti.** See *RHABDITIS aceti*.—**V. danubius.** Of A. Heider, a v. resembling in appearance the cholera v., found in Danube water. Its growth on gelatin does not resemble that of the cholera v. [a, 34.]—**V. felinus** [Escherich]. A non-pathogenic spirillum found in intestinal catarrh of the cat. [Virehow (B).]—**V. Metschnikovi.** A bacillus found in the cholera gastro-enteritis of birds. It resembles Koch's spirillum, but is shorter, thicker, and more curved. [a, 34.] ["Arch. de méd. expér.," iv, p. 661 (a, 50).]—**V. prolifer.** See *SPIRILLUM undula*.—**V. proteus** [Buchner]. See *SPIRILLUM Finkler-Prior*.—**V. rugula.** A bacillus occurring (often with *Bacillus amylobactes*) in marsh water, in faeces, in the deposit on the teeth, etc., under the form of cells 6 to 8  $\mu$  long, 0.5 to 2.5  $\mu$  thick, sometimes united into longer chains matted together. The cells, which have but one bend or at most only flat, spiral turns, rotate rapidly around their long axis. The threads become thicker before spore-formation and, by the development at their extremities of a swelling (which eventually becomes a round spore), assume the appearance of comas. The organism decomposes cellulose [Prazmowski]. [a, 35.]—**V. serpens.** See *SPIRILLUM serpens*.—**V. tritici.** See *RHABDITIS tritici*.—**V. undula.** See *SPIRILLUM undula*.

**VIBRION** (Fr.), n. Ve-bre-o<sup>2</sup>n<sup>2</sup>. See *VIBRIO*.—**V. avicide.** See *VIBRIO Metschnikovi*.—**V. du choléra.** See *SPIRILLUM cholerae asiaticæ*.—**V. septique** [Pasteur]. See *BACILLUS edematis*.

**VIBRISSÆ** (Lat.), n. f. pl. Vi<sup>2</sup>b(wi<sup>2</sup>b)-ri<sup>2</sup>s(se/a<sup>2</sup>-e<sup>2</sup>). From *vibrare*, to shake. Fr., *vibrisses*. 1. Specialized tactile hairs situated on the upper lip of most mammals. (Wilder and Gage [a, 39].) 2. The hairs that grow at the entrance of a mucous orifice, especially the v. of the nose (g. v.) [G.] 3. Bristly or bristle-tipped feathers about the mouth of a bird. [L, 343.] 4. The inward-curved hairs on the tentacles of insects. [L, 30, 41 (a, 14).]—**V. of the nose.** See *V.* (2d def.).

**VIBURNIN**, n. Vi<sup>2</sup>b-u<sup>2</sup>rn/i<sup>2</sup>n. A concentrated extract from viburnum. [B, 270 (a, 48).]

**VIBURNUM** (Lat.), n. n. Vi<sup>2</sup>b(web)-u<sup>2</sup>rn(u<sup>2</sup>rn)/u<sup>2</sup>m(u<sup>2</sup>m) (Lat. Fr., *viorne* (1st def.), *viburne* (1st def.). Ger., *Schlingbaum* (1st def.). 1. A genus of the *Sambuceæ*. The *Viburnæ*, or *Viburnaceæ*, are the *Sambuceæ*. 2. Of the U. S. Ph., the bark of *V. prunifolium*. [a, 35.]—**Cortex viburni.** The inner bark of *Rhamnus frangula*. [a, 35.]—**Extractum viburni fluidum** [U. S. Ph.]. A preparation made by exhausting by percolation 100 grammes of v. in No. 60 powder with a mixture of 2 parts of alcohol and 1 part of water, and bringing up to 100 c. c. [B, 95 (a, 38).]—**V. lantana.** Fr., *viorne cotonneuse* (ou *moutarde*, ou *des pauvres*), bardeau, bourdaine blanche, marselle, valinée, mantanne. Ger., *wolliger Schlingbaum*, *Schwindelbeerbaum*. Common wayfaring-tree, cotton-tree, mealy-tree, cottoner; a European shrub. The mildly astringent leaves and the mucilaginous berries, *folia et bacca viburni*, are used. The vesicant bark is used in veterinary medicine for setons. [a, 25.]—**V. opobatum.** Fr., *viorne à manchette*. A species found in the southern United States. The bark is antiperiodic. [a, 35.]—**V. opulus.** Fr., (*viorne*) *obier*, *aubier*, *sureau aquatique* (ou *d'eau*, ou *des marais*), *caillebot*. Ger., *gemeiner Schlingbaum*, *Wasserholder*, *Hirschholder*, *Schneeball*, *Galingenholz*. Dog- (or water-, or marsh-) elder, dog-rowan-tree, snowball-tree, whiten-tree, ope-tree, guelder-rose of Europe and the northern United States. The bark, flowers, and fruits, *cortex, flores, et bacca sambuce aquatica*, have properties like those of *Sambucus nigra*, and were formerly official. The bark, known as *cramp-bark*, is antispasmodic. Both bark and fruits contain valerician acid. [a, 35.]—**V. prunifolium.** Fr., *viorne à feuilles de prunier*. Ger., *amerikanischer Schneeball*. (North) American black haw; a shrub common in the Middle and Southern States. The bitterish bark, the v. of the U. S. Ph., occurs in thin, glossy, brownish pieces or quills with small black dots and scattered warts. Its medicinal properties are not well determined; the fluid extract has been used as a tonic, diuretic, astringent, nerve, etc., and is especially recommended for the prevention of miscarriage, in uterine pain, and in the nervous complaints of pregnant women. [a, 35.]—**V. tinus.** Fr., *viorne tin*, (*viorne*) *laurier-tin*, *laurétin*. Ger., *Bastardlörbeer*, *Laurustinus*, *immergrüner Schlingbaum*. *Laurustinus*; a shrub found in southern Europe, northern Africa, and the Orient. The fruits, which are a drastic purgative, were formerly used, especially in dropsy. [a, 35.]

**VICARIOUS**, adj. Vi<sup>2</sup>k-a/ri<sup>2</sup>-u<sup>2</sup>s. Lat., *vicarius* (from *vici*, interchange). Ger., *vikarierend*. Exercising the function of a substitute (cf. *V. MENSTRUATION*). [a, 48.]

**VICE** (Fr.), n. Ves. Lat., *vitium*. A fault, an imperfection, a blemish; a diathesis or cachexia. [L, 41 (a, 17).] Cf. *VITUM*.—**V. cancéreux.** A cancerous cachexia. [a, 34.]—**V. de conforma-**

**tion.** See *MALFORMATION*.—**V. scrofuleux.** A scrofulous cachexia. [a, 34.]—**V. syphilitique.** A syphilitic cachexia. [a, 34.]

**VICHY** (Fr.), n. Veshé. A place in the department of the Allier, France, where there are hot and cold gaseous, alkaline, saline, and chalybeate springs, the most important of which contain the following ingredients in 10,000 parts:

	Grande Grille.	Chomel.	Hôpital.	Nouvelle Celestine.	Cusset.
Sodium chloride .....	5.34	5.34	5.18	5.50	5.34
Sodium sulphate .....	2.91	2.91	2.91	3.14	2.91
Sodium phosphate .....	1.30	0.70	0.46	...	...
Sodium arsenate .....	0.02	0.02	0.02	0.03	0.03
Sodium bicarbonate .....	48.83	50.91	50.29	41.01	51.30
Potassium bicarbonate ..	3.52	3.71	4.40	2.31	2.74
Magnesium bicarbonate ..	3.08	3.38	2.00	5.54	5.32
Calcium bicarbonate .....	4.34	4.27	5.70	6.99	7.25
Iron bicarbonate .....	0.04	0.04	0.04	0.44	0.40

[L, 37, 41, 49, 57 (a, 14).]

**VICHY SPRINGS**, n. Vi<sup>2</sup>sh/i<sup>2</sup>. Mineral springs situated at New Almaden, Santa Clara County, California. [A, 363 (a, 21).]

**VICIA** (Lat.), n. f. Vi<sup>2</sup>s(wi<sup>2</sup>k)/i<sup>2</sup>a-<sup>2</sup>. Gr., *βικίον*. Fr., *vesce*. Ger., *Wicke*. Vetch; a genus of herbaceous plants forming, with *Cicer*, *Lens*, etc., a section (*Vicieæ*) or tribe (*Vicieæ*) of the *Leguminosæ*. [a, 35.]—**V. cracca.** Fr., *vesce multiflore, jarseau, luisset des prés, luezeau, pois à crapaud*. Cow-vetch, wild fitches (or fitches), common tufted vetch; a fodder species found in Europe, Africa, Asia, and North America. It yields a yellow dye. [a, 35.]—**V. ervilia.** Fr., *vesce ers* (ou *noire*), *fausse orobe, jarosse, lentil ervilière, orobe bâtarde* (ou *officinale, ou des boutiques*), *pois-pigeon, aliez, comin*. Ger., *Erve*, *Ervenlinse*. Ers, pigeon's-pea, black bitter vetch of southern Europe, northern Africa, and southwestern Asia. The seeds, *semen ervi* (seu *ervi veri*, seu *ervilia*, seu *erviliae silvestris*, seu *orobi*), which are said to be poisonous to domestic animals except sheep, were formerly used in urinary diseases, dropsy, etc., and are still employed in poultices as a resolvent. [a, 35.]—**V. faba.** Fr., *fève de marais, fave, faveolotte*. Ger., *Bohnenwicke*, *Puffbohne*, *Saubohne*, *Pferdebohne*, *Futterbohne*. Straight (or horse-, or coffee-) bean, the *κνίσιος ἀλκυικός* of Dioscorides; a native of the Orient and regions of the Caspian Sea. Numerous varieties are cultivated for their starchy and edible seeds. The stems, flowers, and seeds, *stipites, flores, et semina fabarum* (seu *fabe, seu vicie fabe*), are used. The potash obtained from the stems is used in glandular swellings, the flowers are used in renal calculus, and the farina (*farina fabarum*) of the seeds is employed as an emollient, resolvent, and vulnerary. [B, 95; a, 25.]—**V. sativa.** Fr., *vesce cultivée*. Ger., *Futterwicke*. Tare, vetch, fetch, fitches, lints; an annual fodder plant of Europe, northern Africa, and northern and middle Asia. The seeds, *semen vicie*, were formerly used in diarrhoea and inflammatory skin diseases and in poultices as an emollient. [a, 35.]

**VICINE**, n. Vi<sup>2</sup>s/en. A body, C<sub>28</sub>H<sub>51</sub>N<sub>11</sub>O<sub>21</sub>, obtained from the seeds of *Vicia sativa*. [B, 270 (a, 38).]

**VICINTRACTUS** (Lat.), **VICINITRAHA** (Lat.), n's m. and f. Vi<sup>2</sup>s(wi<sup>2</sup>k)-i<sup>2</sup>n(en) i<sup>2</sup>-tra<sup>2</sup>kt(trakt)/u<sup>2</sup>s(u<sup>2</sup>s), -i<sup>2</sup>t(ra<sup>2</sup>-ha<sup>2</sup>). From *vicinus*, near, and *trahere*, to draw. See *ERYSIPELAS* (1st def.).

**VIC SUR CÈRE** (Fr.), n. Vek su<sup>2</sup>r se<sup>2</sup>r. A place in the department of Cantal, France, where there is a gaseous, alkaline, saline, and chalybeate spring. [L, 41, 49, 57 (a, 14).]

**VICTORIALIS** (Lat.), n. f. Vi<sup>2</sup>kt(wi<sup>2</sup>kt)-or-<sup>2</sup>i al(a<sup>2</sup>)/i<sup>2</sup>s. Fr., *victoriale*. See *ALLIUM victoriale* and *GLADIOLUS communis*.—**V. femina.** See *GLADIOLUS communis*.—**V. longa.** V. mas. See *ALLIUM victoriale*.—**V. rotunda.** See *GLADIOLUS communis*.

**VICTOR SPRING**, n. Vi<sup>2</sup>kt/to<sup>2</sup>r. A mineral spring situated at Darien Centre, Genesee County, New York. [A, 363 (a, 21).]

**VIDANGES** (Fr.), n. Ve-da<sup>2</sup>n<sup>2</sup>zh. See *LOCHIA*.

**VIDE-BOUTEILLES** (Fr.), n. pl. Ved-bu-tal-y'. A caoutchouc cap connected with an irrigating tube, that may be attached to the neck of any bottle to act as a siphon. ["Gaz. de gynéc.," Nov. 15, 1887, p. 344 (a, 54).]

**VIDIAN**, adj. Vi<sup>2</sup>d/i<sup>2</sup>-u<sup>2</sup>n. Fr., *vidien*. Named from or described by Vidius (Guido Guidi), an Italian anatomist. [a, 17.]

**VIE** (Fr.), n. Ve. See *LIFE*.—**V. moyenne.** Average lifetime. [a, 48.]

**VIEH** (Ger.), n. Fe. A beast, especially one of the cow kind. [a, 48.]—**V'arzenel.** See *Veterinary MEDICINE*.—**V'arz.** See *Veterinary SURGEON*.—**V'seuche.** An epizootic disease of cattle.

**VIEILLEESSE** (Fr.), n. Ve-e<sup>2</sup>l-ye<sup>2</sup>s. See *SENECTUS* and *SENILITY*.—**V. fleurissante.** See *AGERASIA*.

**VIELBRUSTIGKEIT** (Ger.), n. Fel'bru<sup>2</sup>st-i<sup>2</sup>g-<sup>2</sup>kit. See *POLYMASTIA*.

**VIELECKIG** (Ger.), adj. Fel'e<sup>2</sup>ck-i<sup>2</sup>g. Many-angled. [a, 48.]

**VIELFACHSEHEN** (Ger.), n. Fel'fa<sup>2</sup>ch<sup>2</sup>-ze-e<sup>2</sup>n. See *POLYOPSIA*.

**VIELFÖRMIG** (Ger.), **VIELGESTALTET** (Ger.), **VIELGESTALTIG** (Ger.), adj's. Fel'fu<sup>2</sup>rm-i<sup>2</sup>g, -g<sup>2</sup>e-sta<sup>2</sup>lt-e<sup>2</sup>lt, -i<sup>2</sup>g. See *POLYMORPHIC*.

**VIELGLIEDERIG** (Ger.), adj. Fel'gled-e'r-i'g. See POLYMEROUS.

**VIELHARNEN** (Ger.), n. Fel'ha'r'n-e'n. See POLYURIA (1st def.).

**VIELJÄHRIG** (Ger.), adj. Fel'yar-i'g. See PERENNIAL.

**VIELKERNIG** (Ger.), adj. Fel'ke'r'n-i'g. See MULTINUCLEAR and MULTINUCLEOLATE.

**VIELKOPF** (Ger.), n. Fel'ko'pf. A many-headed animal. See POLYCEPHALUS.—**Menschenv.** See ECHINOCOCCUS hominis.—**V. des Schafes.** See CENURUS cerebrius.

**VIELLAPPIG** (Ger.), adj. Fel'la'p-pi'g. See MULTILOBATE.

**VIELSEHEN** (Ger.), n. Fel'za-e'n. See POLYOPTIA.

**VIELTHEILIG** (Ger.), adj. Fel'til-i'g. See POLYMEROUS and MULTIPARTITE.

**VIELZELLBILDUNG** (Ger.), **VIELZELLENBILDUNG** (Ger.), n's. Fel'tse'l-bi'ld-un'g, -tse'l-le'n-bi'ld-un'g. See Multiple cell-formation.

**VIELZELLIG** (Ger.), adj. Fel'tse'l-li'g. See MULTICELLULAR.

**VIERECK** (Ger.), n. Fer'e'ck. A quadrangle.

**VIERECKIG** (Ger.), adj. Fer'e'ck-i'g. Quadrangular.

**VIERFLÄCHIG** (Ger.), adj. Fer'flach'i'g. See TETRAEDRAL.

**VIERHÜGEL** (Ger.), n. Fer'hü'g-e'l. See CORPORA quadrigemina.—**Hintere V.** See TESTES (2d def.).—**Obere V.** The anterior pair of corpora quadrigemina. [I, 17 (K).]—**Untere V.** See TESTES (2d def.).—**V'gebiet, V'egend** [Schwalbe]. See V.—**V'hirn.** See MESENCEPHALON.—**V'paar.** A single pair of the corpora quadrigemina. [I, 27 (K).]—**Vordere V.** The anterior pair of corpora quadrigemina. [I, 17 (K).]

**VIERLING** (Ger.), n. Fer'lin'g. See QUADRUPLER.

**VIERTÄGIG** (Ger.), adj. Fer'tag-i'g. See QUANTAN.

**VIERTGEBÄRENDE** (Ger.), n. Fert'ge't-bar-e'nd-e's. A quartipara.

**VIERWERTHIG** (Ger.), adj. Fer've'rt-i'g. See QUADRIVALENT.

**VIEUX-MAL** (Fr.), n. Ve-u's-ma'l. Intermittent boiterie. [A, 385 (a, 48).]

**VIGNALE** (It.), n. Ven-ya's'la. A place in Alessandria, Italy, where there is a saline and sulphurous spring. [L, 30, 49 (a, 14).]

**VIGNE** (Fr.), n. Ven-y'. See VITIS.

**VIGNETTE** (Fr.), n. Ven-ye't. See SPIRÆA ulmaria.

**VIGNOLLES** (Fr.), n. Ven-yo'l. A place in the department of the Vienne, France, where there is a saline spring. [L, 49 (a, 14).]

**VILLAFÁILA** (Sp.), n. Vel-ya's'fa's'fe-la's. A place in Zamora, Spain, where there is a hot sulphurous spring. [L, 49 (a, 14).]

**VILLAFRANCA** (It.), n. Vel-la's'fra'n'ka's. A sea-bathing resort in the department of the Alpes-Maritimes, France. [a, 14].]

**VILLATOYA** (Sp.), n. Vel-ya's'to-ya's. A place in Albacete, Spain, where there are hot chalybeate and saline springs. [a, 14].]

**VILLAVIEJA DE NULES** (Sp.), n. Vel-ya's've-a'ha's da nul'e'sa. A place in Castellón de la Plana, Spain, where there are ferruginous and hot sulphurous springs. [L, 49, 57 (a, 14).]

**VILLEFRANCHE** (Fr.), n. Vel'fra'n'sh. See VILLAFRANCA.

**VILLERS SUR MER** (Fr.), **VILLERVILLE** (Fr.), n's. Vel-ye'r' su'r me'r, -ye'r-vel. Sea-bathing resorts in the department of Calvados, France. [L, 49, 57 (a, 14).]

**VILLITIS** (Lat.), n. f. Vi'l(i)wi'l(i)le/ti's. Gen., -it'idōs (-idis). Of Haycock, inflammation of the coronary substance of a horse's hoof. [a, 34].]

**VILLOSE**, adj. Vi'l-os'. See VILLOUS.

**VILLOUSCULUS** (Lat.), adj. Vi'l(i)wi'l(i)-lo's-i'z-u'sk(u)sk(u)-u'l(i)u's(u)s. Dim. of villous, hairy. Ger., kurzzottig, schwachzottig. Villous, but with the hairs shorter or more widely separated. [a, 35].]

**VILLOSITÉ** (Fr.), n. Ve-lo-ze-ta. See VILLUS and VILLOUSITY.—**V's amniotiques.** The equivalent of Ahlfeld's term for villi that are often found produced by proliferation of the caruncles amniotiques. [A, 15].]

**VILLOUSITY**, n. Vi'l-i-o's'i'ti'z. Fr., villosité. A soft, flexible offshoot, more or less branching, from a membranous surface (e. g., that of the vitelline membrane and that of the chorion).

**VILLOUS**, adj. Vi'l-i'u's. Lat., villosus (from villus, shaggy hair). Fr., villex. Ger., villös, zottig. Bearing villi. [a, 35].]

**VILLUS** (Lat.), n. m. Vi'l(i)wi'l(i)u's(u)s. Fr., villosité. Ger., Zotte, Zottenhaar. Lit., a tuft of hair, a hair-like growth or process, especially from a membranous surface; in botany, one of numerous shaggy or long and weak hairs, also such hairs considered collectively as a covering of a part or organ. [G; a, 35.]—**Arachnoidal villi** [Luschka]. See PACCHIONIAN BODIES.—**Fetal villi.** See VILLI of the chorion.—**Intestinal villi.** Fr., villosités intestinales. Ger., Zotten des Dünndarms, Darmzotten. Minute finger-like or tongue-like processes projecting from the free surface of the mucous membrane of the small intestine. They consist of a central part, or core, formed by a projection of the mucous membrane and a few longitudinally arranged muscular fibre-cells from the muscularis mucosae. The core of the v. contains a closely set network of blood-vessels and one or more lacteal trunks with a cecal termination near the free end of the v. If a v. contains more than one lacteal vessel, as in the sheep, there are usually numerous anastomosing branches between them. The villi are covered with typical columnar epithelium continuous with that lining the lumen of the intestine and dipping into the crypts of Lieberkühn. In the duo-

denum and jejunum the villi are large and closely set, but near the termination of the ileum they are comparatively small and sparse. [J, 24, 30, 35.]—**Synovial villi.** Ger., Synovialzotten. Minute finger-like processes projecting from the surface of the vascular or Haversian fringes of the synovial membranes. They consist of a central non-vascular core of connective tissue and a covering of small, rounded cells which appear, after staining with silver nitrate, somewhat like endothelia. Some of these villi seem to be entirely composed of fibro-cartilage. [J, 30:] "Arch. f. mik. Anat." 1874, p. 401 (J).—**Vascular villi.** See VILLI of the chorion.—**Villi of a mucous membrane.** Small thread-like elevations of the corium seen in the stomach and elsewhere. They are covered with epithelium, and contain blood-vessels, nerves, and lacteals. [C.]—**Villi of the chorion.** Fr., villosités choriales. Cellular processes or fringes growing outward from the external surface of the vitelline membrane or the outer layer of the blastoderm and eventually covering the entire chorion. Only those confined to that portion of the chorion that forms the fetal part of the placenta become fully developed. [a, 34.]—**Villi pericardiaci.** Vascular villi on the inner surface of the pericardium. [L, 332.]—**Villi peritoneales.** Villi upon the free surface of the peritonæum. [L, 332.]—**Villi pleurales.** Villi on the parietal pleura. [L, 332.]

**VILTRUM** (Lat.), n. n. Vi'l(i)tr(u)m(ru'm). See FILTER.—**V. philosophorum.** See ALEMbic.

**VIMINAL**, **VIMINEOUS**, adj's. Vi'm-i'n-i'l, vi'm-i'n-e'u's. Lat., vimineus (from vimen, a plant twig). Fr., vimineux. Ger., gertenartig. Bearing long, flexible twigs. [a, 35].]

**VIN** (Fr.), n. Va'n'a. See VINUM and WINE.—**Esprit de v.** Spirit of wine; ordinary alcohol. [B.]—**Huile (douce, ou volatile) de v.** See ETHERAL OIL.—**Pierre de v.** Crude potassium bitartrate. [B.]—**V. aloétique.** See VINUM ALOES.—**V. aluné** [Fr. Cod.]. A veterinary preparation consisting of powdered alun dissolved in 25 times as much red wine. [B, 95 (a, 38).]—**V. amer.** See VINUM GENTIANÆ.—**V. antimonial (d'Huxham).** **V. antimonlé.** See VINUM ANTIMONII.—**V. antiscorbutique.** Sp., vino antiescorbútico. A preparation made by macerating 30 parts of horseradish-root, 15 each of the leaves of Cochlearia officinalis and Nasturtium officinale, 3 of the dried leaves of Menyanthes trifoliata, 7 of ammonium chloride, 15 of black mustard, and 16 of compound spirit of cochlearia [Fr. Cod.] (30 each of horseradish-root and the leaves of Nasturtium officinale, and either Cochlearia officinalis or Lepidium latifolium [Sp. Ph.]), with 1,000 of (strong [Sp. Ph.]) white wine for ten days, expressing, and filtering. [B, 95 (a, 38).]—**V. aromatique** [Fr. Cod.]. A mixture of alcoolature vulnéraire with 7 times as much red wine. [B, 95 (a, 38).] See also VINUM AROMATICUM.—**V. armo-aloétique.** See VINUM ALOES.—**V. arsenical cuivreux.** See MIXTURE cathartique.—**V. blanc** [Fr. Cod.]. French white wine containing about 10 per cent. of alcohol. [B, 95 (a, 38).] Cf. VINUM ALBUM.—**V. chalybé** [Fr. Cod.]. See VINUM FERRI CITRATIS.—**V. de Cérés.** An ancient name for beer.—**V. de Champagne.** See CHAMPAGNE.—**V. de Grenache** [Fr. Cod.]. A sweet wine containing about 15 per cent. of alcohol and having a sp. gr. of about 1.028. It comes from the region of France bordering on the eastern Pyrenees, and is sometimes white, but more commonly dark red. [B, 95 (a, 38).]—**V. de Lunel** [Fr. Cod.]. A French wine containing about 15 per cent. of alcohol. It is rarely obtained pure. [B, 95 (a, 38).]—**V. de Trousseau** [Fr. Cod.]. See VIN de DIGITALE composé de l'Hôtel-Dieu.—**V. d'Huxham.** See TINCTURA CINCHONÆ COMPOSITA.—**V. diurétique auxher de la Charité.** See V. de SCILLE composé de la Charité.—**V. ferrugineux.** See VINUM FERRI CITRATIS.—**V. Mariani.** Mariani's wine of coca.—**V's médicinaux.** See VINA medicata.—**V. musqué.** See TINCTURA MOSCHI VINOSA.—**V. ordinaire.** See VINUM CIBARIUM.—**V. rouge** [Fr. Cod.]. French red wine. [B, 95 (a, 38).]—**V. scillitique.** See VINUM SCILLÆ.—**V. stibié.** See VINUM ANTIMONII.

**VINADIO** (It.), n. Ven-a'di'e-o. A place in Cuneo, Italy, where there are hot saline and sulphurous springs. [L, 37, 41, 57 (a, 14).]

**VINAGE** (Fr.), n. Ve-na'zh. The addition of alcohol to weak wines. [B, 38, 93 (a, 14).]

**VINAGRILLO** (Sp.), n. Ven-a'g-rel'yo. In South America, the Oxalis acetosella; also, in Chile, dried cakes of pounded oxalis-leaves, which are infused in water to make an acid drink. [a, 35].]

**VINAIGRE** (Fr.), n. Ve-ne'g-r'. See VINEGAR and ACETUM.—**Esprit de v.** Glacial acetic acid. [B.]—**Mellite de v.** See UNDER OXYMEL.—**Mellite de v. scillitique.** See OXYMEL SCILLÆ.—**Sel de v.** See LIQUOR alexiterius acetatus.—**Sirap de v.** Lat., oxyssaccharum aceticum. Sp., jarabe de vinagre [Sp. Ph.]. A preparation made by dissolving 175 parts of sugar in 100 of white vinegar containing 7 or 8 per cent. of acid [Fr. Cod.]; or 620 parts of sugar in 345 of white vinegar containing 63 per cent. of acid [Belg. Ph.]. [B, 95 (a, 38).]—**Sirap de v. framboisé** [Fr. Cod.]. A mixture of equal parts of syrup of vinegar and raspberry syrup. [B, 95 (a, 38).]—**V. anglais.** See ACETUM BRITANNICUM (2d def.).—**V. antihystérique.** See ACETUM ANTHYSTERICUM and ACETUM RUTÆ COMPOSITUM.—**V. antiépileptique.** See ACETUM AROMATICUM.—**V. aromatique.** 1. Of the Fr. Cod., see ACETUM AROMATICUM. 2. See Compound vinegar of ANGELICA.—**V. camphoraté, V. camphré.** See ACETUM CAMPHORATUM.—**V. cantharidé.** See ACETUM CANTHARIDIS.—**V. chalybé.** See ACETUM CHALYBEATUM.—**V. de Marseilles.** V. des quatre voleurs. See ACETUM AROMATICUM.—**V. glacial.** Glacial acetic acid. [B.]—**V. martial.** See ACETUM CHALYBEATUM.—**V. médicinaal.** See ACETOLÆ.—**V. phéniqué** [Fr. Cod.]. A filtered mixture of 1 part of crystallized carbolic acid, 20 parts of acetic acid of sp. gr. 1.060 (containing 10 parts of glacial acetic acid), and 79 parts of distilled water. [B; B, 95 (a, 38).]—**V. rosat.** See ACETUM ROSARUM.—**V. scillitique.** See ACETUM SCILLÆ.

**VINAIGRIER** (Fr.), n. Ve-ne's-gre-a. The Rhus coriaria and other species of Rhus. [a, 35].]

**VINCA** (Lat.), n. f.  $V_i2n^2k(wi^2n^2k/a^3)$ . From *vincire*, to bind. Fr., *pervenche*. Ger., *Sinngrün*, *Wintergrün*. Periwinkle; a genus of the *Vinceae* (a section or tribe of the *Apocynaceae*). The *Vinceae* are a family of the *Corolliflorae*. [a, 35].—**Herba vincae** [Russ. Ph.]. The leafy and flowering branches of *V. minor*. [a, 35].—**V. major**. Fr., (*grande*) *pervenche*, *grand pucelage*. Ger., *grosses Sinngrün*. Large periwinkle, band-plant, cut-finger; an undershrub of southern Europe having the properties and uses of *V. minor*. [a, 35].—**V. minor**. Fr., *petite pervenche*, *petit pucelage*, *violette des sorciers*, *herbe à la capucine*, *bergère*. Ger., *kleines Sinngrün*, *Wintergrün*, *Ewiggrün*, *Todtenmyrte*, *Jungfernkronen*, *Mägdelpalmen*, *Todtengrün*, *Bergwinkelkraut*. Ground ivy, common (or small) periwinkle of Europe. The leafy and flowering branches, formerly official as *herba vincae* (see *pervinca*, see *vincae pervinca*, see *vincae minoris*, see *clematidis pervinca*, etc.), are used as a hæmostatic, as a mild purgative and diaphoretic, and, in Poland, in plica polonica. The *κληματίς δαρφροειδής* of Dioscorides was probably both this species and *V. major*. [a, 35].—**V. parviflora**. An East Indian species used externally in sciatica and rheumatism. [a, 35].—**V. pervinca**. See *V. minor*.—**V. pusilla**. A Malabar species, used externally in lumbago. [a, 35].—**V. rosea**. Madagascar periwinkle, old maid of the West Indies, rosy-flowered Indian periwinkle; a small herb said to be used as an alternative. [a, 35].

**VINÇA** (Fr.), n.  $Va^2n^2sa^2$ . A place in the department of the Pyrénées-Orientales, France, where there is a hot saline and sulphurous spring. [L, 49 (a, 14).]

**VINCETOXICUM** (Lat.), n. n.  $Vi^2ns(wi^2n^2k)-e^2-to^2x/i^2k-u^3m(u^4m)$ . From *vincere*, to conquer, and *toxicum*, poison. Fr., *vincetoxicum*, *dompote-venin*. Ger., *Schwalbenwurz*. 1. A genus of the *Asclepiadeæ*, referred by Brown to *Cynanchum*. 2. In pharmacy, the *Cynanchum v.* (*V. officinale*). [a, 35].—**Extractum vincetoxici**. A preparation made by digesting the root of *Cynanchum v.* with 6 times as much water for some days, boiling a little, expressing, and evaporating. [B, 119 (a, 38)].—**Tinctura vincetoxici**. Fr., *teinture de dompote-venin*. A tincture made of the root of *Cynanchum v.* with 5 times as much alcohol. [B, 119 (a, 38)].—**V. luteum**, **V. medium**. See *CYNANCHUM fuscum*.—**V. officinale**. See *CYNANCHUM v.*

**VINCETOXIN**, n.  $Vi^2n-se^2t-o^2x/i^2n$ . A glucoside,  $C_{11}H_{12}O_8$ , obtained by Taurer from the root of *Cynanchum vincetoxicum*. There are two varieties, both amorphous. [B.]

**VINCTURA** (Lat.), n. f.  $Vi^2n^2kt(wi^2n^2kt)-u^2r(ur)/a^3$ . From *vincire*, to bind. See **BANDAGE** and **LIGATURE** (1st def.).

**VINCULUM** (Lat.), n. n.  $Vi^2n^2k(wi^2n^2k)/u^2l(u^4l)-u^3m(u^4m)$ . From *vincire*, to bind. See **BANDAGE** and **LIGAMENT**.—**Vincula tendinum**. Vascular synovial folds which stretch over the flexor tendons of the hand and foot on the first and second phalanges. [L, 31, 332].—**Vincula vaginalia tendinum**. Ligamentous bridle-like bands connected with the tendons of the fingers.—**Vincula vasculosa** (tendinum). See *Vincula tendinum*.

**VINE**, n. Vin. 1. The genus *Vitis*. 2. Any plant with a climbing or trailing stem. [a, 35].—**Mercury v.**, **Poison v.** See *Rhus radicans*.

**VINEAL**, adj.  $Vi^2n^2e^2l$ . Lat., *vinealis*. Fr., *vinéal*. Ger., *weinbergbewohnend*. Of plants, growing wild in vineyards. [a, 35].

**VINEGAR**, n.  $Vi^2n^2e^2g-a^2r$ . Lat., *acetum*. Fr., *vinaigre*, *acétol*, *acétolat*, *acétolature*, *acétolés* (2d def.). Ger., *Essig*, *Weinessig* (1st def.). 1. A liquid of pungent aromatic odor and sour taste obtained from wine and other alcoholic solutions by acetous fermentation. 2. A pharmaceutical preparation consisting of a solution of a medicinal substance in v. (1st def.). The v's (Lat., *aceta*) of the U. S. Ph. are made with 10 per cent. of the crude drug. [B.].—**Antiseptic v.**, **Aromatic v.** A preparation made by dissolving various aromatic essential oils in highly concentrated acetic acid. [B, 5]. See also **ACETUM aromaticum**.—**Crude v.** Commercial v.—**Distilled v.** V. prepared by distilling about three quarters of crude v. It should have no color, contain at least 4 per cent. of acetic acid, and have a sp. gr. of about 1.004. [B, 81 (a, 38)].—**English v.** See **ACETUM britannicum** (2d def.).—**Marseilles v.** See **ACETUM aromaticum**.—**Malt v.** V. obtained from an infusion of malt. [B.].—**Mother of v.** Lat., *mater aceti*. A gelatinous nitrogenized substance having the power of exciting the acetification of pure alcohol in the presence of atmospheric air. It has been described as a fungus, the *Mycoderma vini* (*Saccharomyces mycoderma*). [A, 1].—**Proof v.** V. containing from 4.6 to 5 per cent. of acetic acid. [B.].—**Purified v.** See **Distilled v.**—**Pyroigneous v.** Pyroigneous acid; impure acetic acid. [B.].—**Radical v.** Lat., *acelum radicale*. Acetic acid made from verdigris. The term is also often applied to glacial acetic acid, however prepared. [B, 3, 5, 10].—**Spirit of v.** See **ACIDUM ACETICUM dilutum**.—**Thieves' v.** See **ACETUM aromaticum**.—**V. of lead**. See **Liquor PLUMBI subacetatis**.—**V. plant.** The *Penicillium glaucum*. [a, 35].—**V. tree**. The *Rhus typhina* and *Rhus glabra*. [a, 35].

**VINETINE**, n.  $Vi^2n^2e^2t-en$ . Fr., *vinétine*. See **OXYACANTHINE**.

**VINIFEROUS**, adj.  $Vi^2n^2f^2e^2r-u^3a$ . Lat., *viniferus* (from *vinum*, wine, and *ferre*, to bear). Fr., *vinifère*. Ger., *weintragend*. Bearing viticulus, or vines. The *Viniferae* (Fr., *vinifères*) are the *Ampelideæ* and a tribe or suborder of that family. [a, 35].

**VINOMETER**, n.  $Vi^2n-o^2m^2e^2t-u^2r$ . From *vinum*, wine, and *μετρον*, a measure. Fr., *vinomètre*. An instrument for measuring the percentage of alcohol in a liquor. [a, 49].

**VINOPHOSPHORIC ACID**, n.  $Vin-o-fos^2s-fos^2r/i^2k$ . See **ETHYLPHOSPHORIC ACID**.

**VINOSULPHURIC ACID**, n.  $Vin-o-su^2lf-u^2r/i^2k$ . Sulpho-vinic acid (see under **ETHYL sulphate**).

**VINOSUS** (Lat.), adj.  $Vi^2n(wen)-os^2u^3s(u^4s)$ . From *vinum*, wine. Vinous; alcoholic; spirituous.

**VINOUS**, adj.  $Vin-u^3s$ . From *vinum*, wine. Gr., *οινώδης*. Lat., *vinosus*. Fr., *vineux*. Ger., *weinig*. Containing wine or possessing its characteristics. [a, 38].

**VINOXALIC ACID**, n.  $Vin-o^2x-a^2l/i^2k$ . Acid ethyl oxalate.

**VINUM** (Lat.), n. n.  $Vin(wen)/u^3m(u^4m)$ . Gr., *οίνος*. See **WINE**; in the pl., *vina*, of the Belg., Finn., and Swed. Ph's, see *Vina medicata*.—**Alcohol vini**. See **ETHYL ALCOHOL**.—**Clyma vini antimonialis**. Of the Sp. Ph., 1798, a mixture of antimonial wine with twice as much water. [B, 97 (a, 21)].—**Lautissima vina**. Very excellent wines; of old writers, wines spiced with myrrh. [A, 312, 325 (a, 48)].—**Mistura spiritus vini gallici**. Egg brandy, brandy mixture; made by triturating the yolks of 2 eggs with 4 oz. of powdered sugar and adding 4 fl. oz. each of cinnamon water and brandy. [B, 95 (a, 38)].—**Spiritus vini**. 1. Alcohol. 2. Brandy.—**Spiritus vini æthereus**. Ethyl ether. [B, 19].—**Spiritus vini alcoholisatus**. See **SPIRITUS alcoholisatus**.—**Spiritus vini camphoratus crocatus**. See **Aqua pestilentialis**.—**Spiritus vini cognac**. See **COGNAC** and **Spiritus vini gallici**.—**Spiritus vini communis**. A mixture of concentrated alcohol and water. [B.].—**Spiritus vini concentratus** (see **dephlegmatissimus**). See **ETHYL ALCOHOL**.—**Spiritus vini depuratus**. Alcohol obtained by distillation of brandy. [B, 97].—**Spiritus vini dilutus** [Aust. Ph.]. Dilute alcohol. See **ETHYL ALCOHOL**.—**Spiritus vini et salis** [Valentine]. A solution of ethyl chloride in alcohol, prepared by the action of hydrochloric acid (*spiritus salis*) on alcohol (*spiritus vini*). [B, 3].—**Spiritus vini gallici**. Fr., *eau de vie*, *cognac* [Hung. Ph., 2d ed.]. Ger., *Branntwein*. Brandy. Of the Br. Ph., the spirit obtained from French wine; of the U. S. Ph., any spirit distilled from fermented grapes and containing the proper proportion of alcohol. [B, 5].—**Spiritus vini tartarizatus**. Very strong alcohol obtained by dehydration of rectified spirit with potassium carbonate. [B, 97].—**Spiritus vini tenuis**. A mixture of 20 parts of rectified spirit with 17 of water. [B.].—**V. absinthiatum**. Wormwood wine: made by macerating *Artemisia absinthium*, sometimes combined with *Artemisia pontica* and with *Acorus calamus*, in white wine. [B, 97]. Cf. *Vin d'absinthe*.—**V. adustum**. Brandy. [B, 97].—**V. album**. White wine; any wine of light color, made from white grapes or from dark grapes fermented apart from the skins and seeds (*marc*) [U. S. Ph.]; German or other white wine [Ger. Ph.]; white wine from Naxos [Gr. Ph.]; French white wine [Netherl. Ph.]. [B, 95 (a, 38)].—**V. album fortius** [U. S. Ph.]. A mixture of white wine with one seventh as much alcohol of sp. gr. 0.820. It must contain from 20 to 25 per cent. by weight of absolute alcohol. [B, 95 (a, 38)].—**V. album generosum** [Swiss Ph.]. The best white Swiss wine. [B, 95 (a, 38)].—**V. alcoholicum** [Gr. Ph.]. Wine from the island of Thera. [B, 95 (a, 38)].—**V. amarum**. 1. Of the Netherl. Ph., a preparation made by dissolving 2 parts each of cascariola, lesser centaury, gentian, myrrh, and extract of blessed thistle in 180 of Spanish wine, and adding 12 of tincture of orange-peel. 2. Of the Belg. Ph., see *ELIXIR AURANTIORUM compositum*.—**V. anglicanum**. See **BEER**.—**V. anthemithicum**. See *V. absinthiatum*.—**V. antimonial**, **V. antimoniatum** (Huxhami). See *V. ANTIMONII*.—**V. aromaticum**. Sp., *vino de especias aromáticas* [Sp. Ph.]. A preparation made by extracting 1 part each of lavender-flowers, peppermint, rosemary, sage-leaves, and the herbs of wormwood and origanum with enough stronger white wine to make 100 parts by percolation [U. S. Ph.]; or by macerating for five days 6 parts each of lavender-flowers and the leaves of rosemary and sage with 90 of red French wine [Swed. Ph.], or 1 part each of peppermint, rosemary, and sage-leaves, and the herbs of wormwood, hyssop, origanum, *Thymus serpyllum*, and *Thymus vulgaris* with 80 of red French wine [Russ. Ph.]; or by macerating for some days 100 parts of aromatic species with 1,000 of red wine containing 10 per cent. of alcohol [Belg. Ph.]. (800 of red wine and 250 of aqua vulneraria spirituosus [Ger. Ph.], 900 of red wine and 100 of strong alcohol [Swiss Ph.], 833 of red wine [Sp. Ph.], 1,000 of red wine and 100 of aromatic spirit [Roum. Ph.]). The Belg. Ph. orders 64 parts of spiritus carminativus, the Sp. Ph. 50 of spiritus vulnerarius, to be added to the expressed and filtered product of the maceration. [B, 95 (a, 38)]. See also **VIN aromaticum**.—**V. benedictum**. See *V. ANTIMONII*.—**V. camphoratum** [Ger. Ph., Swiss Ph.]. Ger., *Kampferwein*. A whitish fluid composed of 1 part each of camphor and alcohol, 3 parts of mucilage of gum arabic, and 45 of white wine. The Swiss Ph. directs the use of 1 part each of camphor and gum arabic and 48 parts of white wine. [A, 319 (a, 21); B, 95 (a, 38)].—**V. cedrinum**. See **CEDRITES**.—**V. chalybeatum**. See *V. FERRI citratis*.—**V. chalybeatum compositum**. See *Énolés de citrate de fer*.—**V. chamæpityllum**. Wine in which the green leaves of *Ajuga chamæpitys* have been infused. It was formerly considered diuretic. [B, 115, 200].—**V. chinatum**. See *Vinum CHINÆ*.—**V. cibarium**. Fr., *vin ordinaire*. Ger., *Tischwein*. A table wine. [A, 322].—**V. crocatum**. A preparation made by macerating 3 parts of saffron with 48 of white wine for some days and straining. [B, 119 (a, 38)].—**V. digitaleum compositum**. See *Vin de DIGITALE composé de l'Hôtel Dieu*.—**V. disoretium** [Swiss Ph.]. A preparation consisting of 3 parts each of squill, juniper-berries, mace, angelica-root, and calamus, 6 each of melissa-leaves and wormwood, 12 each of pale cinchona-bark, orange-peel, and lemon-peel, 40 of strong alcohol, and 760 of white wine, expressed and filtered after ten days' maceration. [B, 95 (a, 38)].—**V. emeticum**. See *V. ANTIMONII*.—**V. ex corevisia**. An old name for beer. [Martin, "Jour de méd. de Paris," Apr. 15, 1882].—**V. extracti Smithi**. Sp., *vino de extracto de Smith* [Sp. Ph.]. A preparation made by dissolving 80 parts of extractum specierum Smithi in 540 of stronger white wine, filtering, and adding 1 part of oil of sassafras. [B, 95 (a, 38)].—**V. ferratum** [Swiss Ph.]. A preparation identical with the vin chalybé of the Fr. Cod. (see *V. FERRI citratis*) except that Malaga wine is used. [B, 95 (a, 38)].—**V. ferruginosum** [Gr. Ph.]. A preparation made by digesting 4 parts of iron filings and 2 of cassia with 48 of white wine for some days and filtering. [B, 95 (a, 38)]. See also *V. FERRI*.—**V. gallicum album**. French white wine. [B, 95 (a, 38)].—**V. gallicum rubrum**. 1. Of the Russ. Ph., French red wine. 2. Of

the Swed. Ph., red Bordeaux wine. [B. 95 (a, 38).]—**V. hippocraticum**. See **HIPPOCRAS**.—**V. hippocraticum antimoniales**. A preparation containing the product of the action of vinegar on antimony or its oxide. [B.]—**V. hispanicum** [Netherl. Ph.]. Brown Spanish wine. [B. 95 (a, 38).]—**V. hordeaceum**. Barley wine; beer. [B. 59.]—**V. lusitanicum**. Port wine. [B.]—**V. maderense**. Madeira wine. [B. 95 (a, 38).]—**V. malacense**, **V. malagense**. Malaga wine. [B. 95 (a, 38).]—**V. mariatum** [Belg. Ph.]. An extemporaneous mixture of 1 part of iron lactate and 999 parts of Malaga wine. [B. 95 (a, 38).]—**Vina medicata** [Dan. Ph.] (see **medicinalia** [Gr. Ph., Russ. Ph.]). Fr., *vins médicinaux* [Fr. Cod.], *cenolés* [Fr. Cod.]. Medicinal preparations made by digesting or macerating drugs with wine in the same general way as for the preparation of tinctures. The Dan. Ph. replaces with more wine the portion which is evaporated in the process. [B. 95 (a, 38).]—**V. pepticum**. See **V. PEPISIN**.—**V. portense**. Port wine. [B.]—**V. regionum septentrionalium**. Beer. [B. 59.]—**V. roburans**. See **Vinum CHINE amarum**.—**V. rubrum**. Fr., *vin rouge*. Sp., *vino tinto*. Red wine; any wine of deep-red color made from black grapes fermented with the skins and seeds (*marc*) [U. S. Ph.]; French red wine [Fr. Cod., Russ. Ph.]; Bordeaux red wine [Swed. Ph.]; German and other red wine [Ger. Ph.]; red wine from the island of Syra [Gr. Ph.]. [B. 95 (a, 38).]—**V. rubrum generosum** [Swiss Ph.]. The best Swiss red wine. [B. 95 (a, 38).]—**V. scilliticum** [Fr. Cod.]. See **V. SCILLE**.—**V. stibiato-tartaricum**. See **V. STIBIATUM**.—**V. stibiaticum**. See **V. ANTIMONIUM**.—**V. stibiaticum turbidum**. Sp., *vino emético turbido* [Sp. Ph.]. A mixture of 3 parts of washed liver of antimony and 24 of white wine. [B. 95 (a, 38).]—**V. strumale** [Swiss Ph.]. A preparation made by macerating 48 parts of powdered burnt sponge, 4 of orange-peel, 6 of cinnamon, and 2 of cloves with 1,000 of Malaga wine for three days, expressing, and filtering. [B. 95 (a, 38).]—**V. thebaicum**. See **Vinum OPII** (1st def.).—**V. thebaicum crocatum**. See **Tinctura OPII crocata**.—**V. xerense**, **V. xericum** [Br. Ph.]. Sherry wine. [B.]

**VINYL**, n. Vin'yl. Fr., *vinyle*. Ger., *V. Ethenyl* (q. v.). It is supposed to exist in acetic aldehyde. [B.]

**VIOL** (Fr.), n. Ve-ol. Violation, rape. [a, 48.]

**VIOLA** (Lat.), n. f. Vi(wi)<sup>2</sup>o<sup>2</sup>l-a<sup>3</sup>. Gr., *iov*. Fr., *violette* (1st def.). Ger., *Veichen* (1st def.), *Viole* (1st def.). 1. Violet, pansy; a genus of herbs, rarely undershrubs, forming, with *Noisettia*, *Ionidium*, etc., an order (*Violaceae*) of polypetalous dicotyledons. [a, 35.] 2. Of the Netherl. Ph., see *Flores violæ*.—**Decoctum herbæ violæ tricoloris cum aqua**. A decoction of 6 drachms of the herb of *V. tricolor* in water enough to make 6 fl. oz. when strained. [B. 97 (a, 38).]—**Decoctum herbæ violæ tricoloris cum lacte**. A decoction of 4 oz. of the herb of *V. tricolor* in 1 lb. of cow's milk. [B. 97 (a, 38).]—**Flores violæ** (see *violæ odorata* [Belg. Ph.], see *violarum*). Fr., *violette odorante* [Fr. Cod.]. Sp., *viola* [Sp. Ph.]. The flowers of *V. odorata*. [B. 95 (a, 38).]—**Oleum violarum**. A preparation made by infusing sweet violets in four times as much oil or by boiling together equal parts of sweet violets and olive-oil till the moisture is dissipated. [B. 119 (a, 38).]—**Syrupus violæ odorata**, **Syrupus violarum**. Fr., *sirap de violette* [Fr. Cod.]. Sp., *jarabe de violetas azul* [Sp. Ph.]. A preparation made by infusing sweet-violet flowers without the calyx in three times as much boiling water (twice as much, after previous washing with three times as much [Sp. Ph.]), and dissolving in 400 parts of the strained liquid 730 [Sp. Ph.] (800 [Gr. Ph.], 720 [Swiss Ph., Roum. Ph.]) of sugar (654 of sugar in 346 of liquid [Belg. Ph.], 380 in 210 [Fr. Cod.], 400 in 220 [Netherl. Ph.]). [B. 95 (a, 38).]—**Syrupus violarum communis**. Sp., *jarabe de violetas común* [Sp. Ph.]. A preparation made by pouring upon 8 parts of dried sweet violets water enough to make 80 parts of strained liquid and dissolving in this 144 of sugar. [B. 95 (a, 38).]—**V. arvensis**. Fr., *violette des champs*, *petite jacinthe*. 1. A European species used as a depurative. The root is emetic. 2. The *V. tricolor*, var. *arvensis*. [a, 35].—**V. brevicaulis**. Fr., *violette à tige courte*. A native of Brazil (perhaps not a member of this genus) having an emetic root. [a, 35].—**V. calamina**. A species growing on the calamine hills of Rhenish Prussia; said to contain zinc. [a, 35].—**V. canina**. Fr., *viollette de chien*. Ger., *Hunds-veichen*, *Rosveichen*. Dog- (or horse-) violet; a European species. The root is emetic and purgative, but is little used. [a, 35].—**V. capillaris**. A Chilean undershrub used as a laxative. [a, 35].—**V. clandestina**. Sweet white violet of North America; used as a vulnerary. [a, 35].—**V. cucullata**. Common blue (or hollow-leaved) violet of North America. It resembles *V. odorata*, but is without its fragrance. [a, 35]. Cf. *V. palmata*.—**V. damascena**. See **HESPERIS matronalis**.—**V. diandra**. A Chinese species with emetic roots. [a, 35].—**V. ennesperma**. Fr., *viollette à neuf armenes*. A Malabar plant. The root is emetic. [a, 35].—**V. hirta**. Hairy violet; a European species having a purgative and emetic root. [a, 35].—**V. indecorum**. Fr., *viollette du Brésil*. A Brazilian emetic-rooted species. [a, 35].—**V. ipecacuanha**, **V. itouhoua**. See **IONIDIUM ipecacuanha**.—**V. lunaris**. The Luna-

VIOLA ODORATA. [A, 327.]

*ria rediviva*. [a, 35].—**V. lutea**. 1. See **CHEIRANTHUS cheiri**. 2. Mountain-violet; violet; found in Switzerland. [a, 35].—**V. martia**, **V. martiana**. See *V. odorata*.—**V. matronalis**. See **HESPERIS matronalis**.—**V. mirabilis**. Broad-leaved violet of Europe. The root is emetic and purgative. [a, 35].—**V. mortuorum**. See **VINCA minor**.—**V. odorata**. Fr., *violette odorante* [Fr. Cod.] (ou de mars), *violier commun* (ou de mars), *jacinthe de printemps*. Ger., *woltrichendes* (oder blaues, oder März-) *Veichen*, *woltrichende Viole*. Sweet-scented (or March-) violet of middle and southern Europe, northern Africa, and middle Asia; the *νεκκίον μέλας* of the ancients. The flowers, root, and seed, *flores*, *radix*, et *semen violarum* (see *violæ*) have been used, the flowers as a cardiac tonic

VIOLA TRICOLOR. [A, 327.]

and as a diuretic (now employed only in the preparation of a pectoral and emollient syrup [see *Syrupus violarum*]) and as a test for acids and alkalies. The acid root is emetic and purgative. The seeds were used in calculous complaints. [a, 35].—**V. ovata**. Ger., *eirundblättriges Veichen*. A species (a variety of *V. sagittata*, according to Wood) found from New Jersey southward; used in diarrhoea, dysentery, and urinary complaints, and internally and externally for rattlesnake-bites. [a, 35].—**V. palmata**. Hand-leaf violet of the Southern States, by Wood considered a variety of *V. cucullata*; used like *V. pedata*. [a, 35].—**V. pedata**. Fr., *violette pédière*, *pensée d'Amérique*. Ger., *fussförmigblättriges Veichen*. Bird's-foot violet; an expectorant and demulcent species found from New England to the Carolinas; formerly official in the U. S. Ph. [a, 35].—**V. riviniana**. A European species. The root is emetic and purgative. [a, 35].—**V. sagittata**. Arrow-leaved violet; growing from Canada to Florida and westward to Arkansas. [a, 35]. Cf. *V. ovata*.—**V. silvestris**. 1. See *V. tricolor*. 2. A European species having a purgative and emetic root. [a, 35].—**V. tricolor**, **V. trinitatis**. Fr., *violette (ou jacinthe) tricolore* (1st def.), *fleur (ou herbe) de la Trinité* (1st def.), *pensée sauvage* [Fr. Cod.] (2d def.). Ger., *dreifarbiges Veichen*, *Ackerveichen*, *Freisamkraut*, *Stiefmütterchen*, *Dreifaltigkeitsblume*, *Jelängerjelieber* (all 1st def.). Sp., *trinitaria* [Sp. Ph.]. 1. Heart's-ease or pansy of the gardens, fancy, herb Trinity, love-in-idleness, etc.; a native of Europe, naturalized in the United States. The herb (the flowering plant without the root), *herba jaceæ* (see *jaceæ tricoloris* [see *majoris*, see *violæ tricoloris*], see *silvestris*, see *trinitatis*, see *heptachtri*), is laxative, emollient, diuretic, diaphoretic, and antispasmodic, and was formerly used externally and internally in various skin diseases. Of the numerous varieties, the var. *arvensis* is considered the most active. [a, 35.] 2. The flowering herb (the herb [Sp. Ph.], flowering plant [Fr. Cod.]) of *V. tricolor* (var. *arvensis* [Fr. Cod., Sp. Ph.]). [B. 95 (a, 38).]

**VIOLACEOUS**, adj. Vi-o<sup>2</sup>l-a'shu<sup>2</sup>a. 1. Violet in color. 2. Pertaining to the genus *Viola*, belonging to the *Violaceæ*. [a, 35.]

**VIOLAL**, adj. Vi'o<sup>2</sup>l-l. Lat., *violalis*. Belonging to the *Violales*, Lindley's v. alliance (Lat., *vixus violalis*), which includes the *Flacourtiaceæ*, *Samydeæ*, *Crassulaceæ*, *Violaceæ*, etc. [a, 35.]

**VIOLANILINE**, n. Vi-o<sup>2</sup>l-a<sup>2</sup>n'i<sup>2</sup>l-n. Fr., v. Ger., *Violamin*. A violet coloring matter, C<sub>15</sub>H<sub>10</sub>N<sub>2</sub>, obtained as a by-product in the manufacture of rosaniline. [B. 46.]

**VIOLARIA** (Lat.), n. f. Vi(wi)<sup>2</sup>o<sup>2</sup>l-a<sup>2</sup>(a<sup>3</sup>)/ri<sup>2</sup>a<sup>3</sup>. From *viola*, a violet. The *Viola odorata*. The *Violaria*, or *Violarieæ*, are the *Violaceæ*. [a, 35.]

**VIOLATION**, n. Vi-o<sup>2</sup>l-a'shu<sup>2</sup>n. From *violare*, to outrage. See **RAPE** (in law).

**VIOLE** (Ger.), n. Ve-o<sup>2</sup>l'e<sup>2</sup>. See **VIOLA** (1st def.) and **VIOLA odorata**.—**Abendv'**, **Nachtv'**, **Pfingstv'**. See **HESPERIS matronalis**.—**V'nshwertelwurz**, **V'nwurz**. See **Iris florentina** (3d def.).

**VIOLET**, n. Vi'o<sup>2</sup>l-e<sup>2</sup>t. Lat., *viola* (1st def.). Fr., *violette* (1st def.), v. (2d def.). Ger., *Viole* (1st def.). 1. The genus *Viola*, especially *Viola odorata* (in Europe) and *Viola cucullata* (in America). [a, 35.] 2. A color more or less resembling the purple of v's; also a dye-stuff producing such color. [a, 48].—**Britannia v.** An aniline v. dye-stuff produced by the action of brominated oil of turpentine on an alcoholic solution of magenta (aniline red). [B. 2.]—**Damask v.**, **Dame's v.** See **HESPERIS matronalis**.—**Gentian v.** An important v. aniline dye, used in histological and bacteriological investigations. [J. 64, 194.]—**Green v.** See **SOLEA concolor**.—**Hof-**

**mann's v., Iodine v.** See TRIMETHYLOSANILINE hydriodide and TRIETHYLOSANILINE hydriodide.—**Paris v.** See METHYLANILINE v.—**Sweet v.** See VIOLA odorata.—**V. impérial** (Fr.). A v. dye of the aniline series, prepared by heating rosaniline or one of its salts with less aniline than would be required for aniline blue. It is much used in the arts. [B, 2.]

**VIOLETTE** (Fr.), n. Ve-o-le't. See VIOLA (1st def.).—**Eléol6 de v., Huile de v.** See OLEUM violarum.—**Sir6p de v.** [Fr. Cod.]. See SYRUPUS violarum.—**Tisane de v.** [Fr. Cod.]. A preparation made by infusing the flowers of *Viola odorata* with 100 times as much boiling water for half an hour and straining. [B, 95 (a, 38).]—**V. de mars, V. odorante.** See VIOLA odorata.

**VIOLIER** (Fr.), n. Ve-o-le-a. See CHEIRANTHUS incanus, LEUCOM (3d def.), and NARCISSUS (1st def.).

**VIOLINE**, n. Vi'o-l-en. 1. See MAUVEINE. 2. See AZODIPHENYL blue. 3. An emetic and poisonous alkaloid obtained from *Viola cucullata* and *Viola odorata*. [B, 38, 48, 93 (a, 14).]

**VIOLURIC ACID**, n. Vi-o-l-u'r-i'k. A monobasic acid, C<sub>4</sub>H<sub>5</sub>N<sub>3</sub>O<sub>4</sub>, occurring as pyramidal crystals. Its salts (the violurates) are of brilliant violet colors. [B, 3, 4.]

**VIORNE** (Fr.), n. Ve-orn. See VIBURNUM (1st def.).—**V. des pauvres.** See VIBURNUM lantana and CLEMATIS vitalba.—**V. obier.** See VIBURNUM opulus.

**VIPERA** (Lat.), n. f. Vip(wep)'e'r-a's. From *vivus*, living, and *parere*, to bring forth. Fr., *vipère*. Ger., *Viper*. Sp., *víbora* [Sp. Ph.]. A genus of viviparous venomous serpents, of which *V. berus* is the type; a viper. [a, 48.]—**Spiritus viparum.** See SPIRITUS CORNU CERVI.—**V. aspis, V. berus.** Ger., *Atter*. The common viper of Europe, known as the adder in England, and the only venomous reptile in that country. [a, 48.] Cf. JUSCULUM viperinum.

**VIPERINA** (Lat.), n. f. Vip(wep)'e'r-in(en)'a's. Fr., *vipérine*. See ECHUM vulgare and ARISTOLOCHIA serpentaria.

**VIPERINE**, n. Vip'e'r-en. A principle found in the venom of *Vipera berus*, corresponding to the ptyalin of the saliva. [D.]

**VIPÉRINE** (Fr.), n. Ve-pa-ren. See ECHUM.

**VIRE** (Fr.), n. Ver. See PARONYCHIA vulgaris.

**VIRENS** (Lat.), adj. Vir(wi'r)'e'nz(ans). Gen., -ent'is. From *virere*, to be green. Ger., *grünlich* (1st def.). 1. Greenish. 2. Evergreen. [a, 35.]

**VIRESCENCE**, n. Vi'r-e's'e's'ens. The production, in flowers, of green (chlorophyll) in place of the usual color. [a, 35.]

**VIRESCENT**, adj. Vi'r-e's'e's'ent. Lat., *virescens* (from *virescere*, to become green). 1. Greenish. 2. Turning green. [a, 35.]

**VIRGA** (Lat.), n. f. Vu'rg(wi'rg)'a's. Fr., *verge*. 1. A rod or rod-like structure (e. g., the penis). 2. See SOLIDAGO.—**Extractum virgæ aureæ.** An extract made by boiling golden rod in water and evaporating. [B, 119 (a, 38).]—**V. aurea.** 1. The genus *Solidago*. 2. The *Solidago v. aurea*. [a, 35.]—**V. cerea.** See WAX BOUGIE.—**V. cerebri.** See PINEAL GLAND.

**VIRGAUREA** (Lat.), n. f. Vu'rg(wi'rg)-a'r(a's'u'r)-e's-a's. See VIRGA aurea.

**VIRGILIA** (Lat.), n. f. Vu'r'j(wi'rg)-i'2'l'i'a-s. From P. *Virgilius* (*Vergilius*) Maro, the poet. Fr., *virgilier*. A genus of the Leguminosæ. [a, 35.]—**V. capensis.** A South African tree with edible seeds. The roots are said to be used against colic. [a, 35.]

**VIRGIN**, n. Vu'r'j'i'n. Ger., *zuphevos*. Lat., *virgo*. Fr., *vierge*. Ger., *Jungfer* (1st def.), *Jungfrau* (1st def.). 1. A woman who has had no experience of sexual intercourse. [a, 48.] 2. As an adj. (applied to oil, wine, etc.), flowing spontaneously, without pressure being used.

**VIRGINAL**, adj. Vu'r'j'i'n-l. Lat., *virginæus* (from *virgo*, a virgin). Ger., *jungfräulich*. Pertaining to or in the state proper to virginity; in botany, pertaining to the time before anthesis. [a, 35.]

**VIRGINIC ACID**, n. Vu'r'j-i'n'i'k. Fr., *acide virginéique*. Ger., *Virginsäure*. A fatty acid obtained from the root of *Polygala senega*. [B, 93 (a, 14).]

**VIRGINITY**, n. Vu'r'j-i'n'i'te-i't. Lat., *virginitas* (from *virgo*, a virgin). Fr., *virginité*. Ger., *Jungferschaft*. The condition of being a virgin. [a, 48.]—**Physical v.** That condition of a woman in which no coitus has actually taken place, whatever the real state of her virtue may be.

**VIRGIN'S-BOWER**, n. Vu'r'j'i'nz-bu's-u'r. The *Clematis vitalba* and other species of *Clematis*. [a, 35.]

**VIRIDE** (Lat.), n. n. of adj. *viridis* (q. v.). Vi'r(wi'r)'i'd-e(a). Gen., *vir'idis*. From *virere*, to be green. Green color, also something of that color. [a, 48.]—**V. æris.** See VERDIGRIS.—**V. cubicum.** See IRON sulphate (1st def.).

**VIRIDESCENS** (Lat.), adj. Vi'r(wi'r)'i'd-e's'e's'enz(kans). Ger., *grün werdend*. Viridescent, becoming green. [a, 35.]

**VIRIDIC ACID**, n. Vi'r'i'd-i'd'i'k. Fr., *acide viridique*. Ger., *Viridinsäure*. An acid, C<sub>14</sub>H<sub>14</sub>O<sub>8</sub>, derived from caffeotannic acid. [B, 93 (a, 14).]

**VIRIDINE**, n. Vi'r'i'd-en. Fr., v. Ger., *Viridin*. 1. An oily liquid, C<sub>12</sub>H<sub>12</sub>N, derived from the oils obtained from the distillation of organic matter. [B, 4.] 2. See CHLOROPHYLL.

**VIRILE**, adj. Vi'r'i'l. Lat., *virilis* (from *vir*, a man). Fr., *viril*. Ger., *mannbar, männlich*. Pertaining to a man or to the faculties or powers of a man or the male sex. [a, 48.]

**VIRILESCENCE**, n. Vir-i'l-e's'e's'enz. From *virilis*, virile. Ger., *Virilescenz*. The development of masculine characteristics in a woman. [A, 69.]

**VIRILITY**, n. Vi'r-i'l'i'te-i't. Lat., *virilitas* (from *virilis*, virile). Fr., *virilité*. Ger., *Mannbarkeit, Virilität*. The condition of possessing virile powers. [a, 48.]

**VIOLA** (Lat.), n. f. Vi'r(wi'r)'o'l-a's. Fr., *viole*. See MYRISTICA (1st def.).—**V. sebilifera.** See MYRISTICA sebilifera.

**VIROSE**, adj. Vi'r'o's. Lat., *virosus* (from *virus*, poison). Fr., *viroux*. Ger., *virös*. Poisonous; having a taste and smell indicative of poisonous properties. [a, 35.]

**VIRULENCE**, n. Vi'r'u'l-e's'ns. Lat., *virulentia* (from *virulentus*, virulent). Fr., v. Ger., *Virulenz*. The condition of being virulent; of a disease, intensity or malignancy, also infectiousness. [a, 48.]

**VIRULENT**, adj. Vi'r'u'l-e'n't. Lat., *virulentus* (from *virus*, poison). Fr., v. Poisonous, containing or due to an active virus, malignant. [D; a, 17.]

**VIRUS** (Lat.), n. n. Vir(wer)'u's(u's). Gen., *vir'i*. Fr., v. Ger., *Jauche, Krankheitsgift*. 1. A poison. 2. Any morbid agent which, when brought into contact with animal tissue, disseminates itself so as to affect the vitality of the parts on which it acts and in many cases that of the entire organism. [D.]—**Specific v.** The characteristic poison of a particular disease. [D.]—**Vaccine v.** See VACCINE LYMPH.—**V. darteux** (Fr.). See DARTROUS HUMOR.

**VIS** (Lat.), n. f. Vi's(wes). Gen., *vis*; plur., *vires*. Ger., *is*. See FORCE and POWER.—**V. a tergo.** Pressure from behind (used especially in physiology, for that exerted by the heart's action on the circulation of the blood). [K.]—**V. conservatrix.** See V. medicatrix natura.—**V. contractilis insita.** See MUSCULAR IRRITABILITY.—**V. essentialis** [Wolff]. The "physical soul," the mysterious cause of the development of animal organisms according to the Wolffian theory of epigenesis. [A, 42.]—**V. expultrix.** An old term for a supposed force which effected the removal of excrementitious matters from the system. [K.]—**V. formativa.** See PLASTIC FORCE.—**V. insita** [Haller]. The inherent irritability of a muscle (cf. *V. nervosa*, 2d def.). [K.]—**V. medicatrix.** A remedial force or impulse. [a, 48.]—**V. medicatrix natura.** Ger., *Naturheilung*. The remedial impulse of nature; the self-recuperative power of the bodily system independent of the use of medicines. [a, 48.]—**V. metabolica.** See METABOLISM.—**V. mortua** [Haller]. The physical properties of tissues aside from those depending on their vitality (e. g., the elasticity which may remain in tendons after the occurrence of somatic death). [K, 3.]—**V. muscularis.** See MUSCULAR FORCE.—**V. nervosa.** 1. See NERVOUS POWER. 2. Of Haller, the nerve-current which excites a muscular contraction (cf. *V. insita*). [K.]—**V. opposita.** Ger., *Gegenkraft*. A force acting in the direction opposite to that of another force or of the resultant of other forces. [a, 48.]—**V. plastica.** See PLASTIC FORCE.—**V. vitæ, V. vitalis.** The energy or force that characterizes an organism in virtue of its possessing life. [a, 48.]—**V. viva.** See LIVING FORCE.

**VISAGE**, n. Vi'z'e'2j. Fr., v. See FACE.—**V. pleurard** (Fr.). In neurology (e. g., as a symptom of labio-glossolaryngeal paralysis), a weeping or whining countenance caused by paralysis of the facial muscles. [a, 34.]

**VISCAOUTSCHINE**, n. Vi's-ka's-ut'chi'n. A substance, C<sub>8</sub>H<sub>10</sub>O, obtained from crude viscin. [B, 38, 93 (a, 14).]

**VISCERA** (Lat.), n. n., pl. of *viscus* (q. v.). Vi's(wi's)'se'r(ke'r)-a's. See under VISCUS.

**VISCERAL**, adj. Vi's'se'r-l. Lat., *visceralis*. Fr., *viscéral*. Ger., v. Pertaining to the viscera or to a viscus. [a, 17.]

**VISCERALGIA** (Lat.), n. f. Vi's(wi's)-se'r(ke'r)-a'2]j(a'2]g)'i'2-a's. From *viscus* (q. v.), and *álgos*, pain. See ENTERALGIA.

**VISCÈRE** (Fr.), n. Ve-se'r. See VISCUS.

**VISCÉROPATHIE** (Fr.), n. Ve-sa-ro-pa'te. A visceral lesion or disease. [a, 18.]

**VISCID**, adj. Vi's'si'd. Lat., *viscidus* (from *viscum*, the mistletoe). Fr., *visqueux*. Ger., *schleimig*. Slimy, glutinous. [a, 35.]

**VISCIN**, n. Vi's'si'n. Fr., *viscine*. Ger., v. A viscous, soft, and elastic substance, C<sub>20</sub>H<sub>30</sub>O<sub>8</sub>, obtained from *Viscum album*, the bark of *Ilex aquifolium*, the sap of *Ficus religiosa*, etc. Dried at 120° C., it is a colorless, transparent, inodorous, insipid, and feebly acid mass. [B, 93 (a, 14).]

**VISCOSE**, adj. Vi'sk'os. See VISCID; as a n., the gummy substance formed by the viscous fermentation of cane-sugar. [Proc. of the Am. Pharm. Assoc., xxx, p. 368 (a, 50).]

**VISCOSIMETER**, n. Vi'sk'o's-i'm'e'te'r. From *viscosus*, viscous, and *metron*, a measure. An instrument for determining the degree of viscosity of a liquid. [Drugg. Circ. and Chem. Gaz., Aug., 1880, p. 149 (B).]

**VISCOSITY**, n. Vi'sk'o's'i'te-i't. Fr., *viscosité*. Ger., *Klebrigkeit*. The state of being viscous. [B.]

**VISCOUS**, adj. Vi'sk'u's. Lat., *viscosus*. Fr., *visqueux*. See VISCID.

**VISCUM** (Lat.), n. n. Vi'sk(wi'sk)'u's(u'm). Fr., *gui* (1st def.). Ger., *Mistel* (1st def.). 1. A genus of lorantheaceous shrubs parasitic on trees. The *Viscæ* are a division of the *Loranthæ*, a tribe of the *Viscoideæ*, or a tribe of the *Loranthaceæ*. The *Viscoideæ* are a suborder of the *Loranthaceæ*. The *Viscinæ* are a family of the *Polymorphæ*. [a, 35.] 2. See under V. album.—**Decoctum visci albi.** A preparation made by boiling 30 to 60 grammes of V. album in 2 litres of water till the liquid is reduced one half. [B, 119 (a, 38).]—**Extractum visci aquosum.** Fr., *extrait aqueux de gui*. A preparation made by boiling V. album in three times as much water, expressing, clarifying with white of egg, and evaporating. [B, 119 (a, 38).]—**Extractum visci vinosum.** A preparation made by digesting V. album with five or six times as much white wine for three days, straining, boiling the residue with fresh wine, mixing the liquids, and evaporating. [B, 119 (a, 38).]—**V. æthiopicum.** Fr., *gui d'Ethiopie*. A species used as tea at the Cape of Good Hope. [a, 35.]—**V. album.** Fr., *gui blanc, gillon, pomme héorrhoidale, verquet*. Ger., *geme-*

*ine* Mistel, Eichenmistel, Vogelleimistel, Kensterholz, Kreuzholz, Eichenkenster. Common mistletoe, mistletoe of the oak; parasitic on trees, found in middle and southern Europe. The young branches (including the bark and leaves), *lignum* (seu *stipites*) *visci* (*albi*, seu *quercini*), *v. v. album* (Pruss. Ph., 6th ed., Gr. Ph.), *v. quernum*, were formerly used in epilepsy, catarrh, etc. The bark is rich in bird-lime, as are also the poisonous berries (*baccæ visci albi*, etc.), which were formerly employed as emollients, discutients, and maturatives. [a. 35.]—*V. flavesces*. See PHORADENDRON *flavesces*.—*V. quercinum*, *V. quernum*. See *V. album* and *LOBANTHUS europæus*.

**VISCUS** (Lat.), n. n.  $V_i^2sk(wi^2sk)u^2s(u^2s)$ . Gen., *visceris*. Gr., σπλάγχνος. Fr., viscère. Any one of the internal organs of the body; generally used in the pl., *viscera* (Ger., Eingeweide).

**VISH**, n.  $V_i^2sh$ . See BISH.

**VISION**, n.  $V_i^2zh(u^2n)$ . Gr., ὄψις. Lat., *visio*, *visus* (from *videre*, to see). Fr., *v. vue*. Ger., *Sehen*. The act of seeing; the power of seeing; sight. [F.]—**After-v.** The perception of an after-image. [K.]—**Binocular (single) v.** *V.* in which both eyes are used simultaneously to obtain a simple (single) image. When the fovea centralis of the retina of each eye is fixed on an object, all objects lying in the same horopter will form images on the respective retine which will lie at equal distances from the fovea, and will therefore be appreciated as single. [F.]—**Double v.** See DIPLOPIA.—**False v.** See PSEUDOLEPSIA.—**Half-v.** See HEMIOPIA.—**Iridescent v.** An anomaly of *v.*, usually arising in the lens, in which objects appear either colored (chromatopsia) or with their edges or outlines exhibiting prismatic colors. [F.]—**Lateral v.** See DYOPSIA *lateralis*. **Manifold v.**, **Multiple v.** See POLYOPSIA.—**Quadruple v.** Ger., *Vierfachsehen*. The perception of four visual images at once. ["Rev. des sci. méd." April, 1889, p. 682 (a. 18).]—**Skin-v.** The apprehension of light, both quantitatively and qualitatively, by the skin, without a visual organ, as in earthworms, *Triton cristatus*, etc. [Graber, "Am. Nat.," xvii, p. 680 (a. 32).]—**Stereoscopic v.** That form of *v.* in which the combined virtual image seen appears to be a solid body and a perfect counterpart of the object. It is a blending of the virtual images of an object presented separately one to each eye. [F.]—**Triple v.** See TRIPOPIA.

**VISIREBENE** (Ger.), n.  $Ve\text{-}zer'ab\text{-}e^2n\text{-}e^2$ . See PLANE of regard.

**VISIR-LINE**, n.  $V_i^2z\text{-}er'lin$ . Fr., *ligne de visée*. Ger., *Visirlinie*. See VISUAL AXIS.—**Crossing-point of the v.-l.** See LINE of sight.—**Principal v.-l.** See LINE of fixation.

**VISIR-PLANE**, n.  $V_i^2z\text{-}er'plan$ . Fr., *plan de visée*. Ger., *Visirebene*. See VISUAL PLANE.

**VISITE** (Fr.), n.  $Ve\text{-}zet$ . A visit; a search or examination.—**V. de l'axilla**. An examination of the lymphatic glands of the axilla, as in cases of mammary tumor, with a view to their removal if necessary. [A. 94.]

**VISITIREISEN** (Ger.), n.  $Ve\text{-}zet\text{-}er'iz\text{-}e^2n$ . See PROBE.

**VISITIRKERZE** (Ger.), n.  $Ve\text{-}zet\text{-}er'ke^2rts\text{-}e^2$ . See CEREOLUS (2d def.).

**VISMIA** (Lat.), n. f.  $V_i^2s(mi^2)a^2$ . From *Visme*, a Portuguese botanist. Fr., *vismie*, *v.* A genus typical of the *Vismieæ*, which are a tribe of the *Hypericineæ*. [a. 35.]—**V. cayennensis**. Fr., *arbre à la fièvre, bois baptiste, arbre à sang*. Ger., *cayennischer Guttibaum*. A Guiana species yielding a resin like that of *V. guianensis*. [a. 35.]—**V. gulanensis**. Fr., *arbre à la fièvre*. American gum-plant (or gamboge-tree, or gutta-gum-tree), wax-tree of Guiana. All parts yield a yellow resinous juice (American gamboge), which is used as a purgative and in eczema, etc. [a. 35.]—**V. laccifera**, **V. latifolia**, **V. longifolia**, **V. micrantha**, **V. sessilifolia**. Species yielding American gamboge. The second is found in Guiana, the third and fourth in Brazil, and the fifth (the leaves of which are used as a febrifuge) in the northern part of South America. [a. 35.]

**VISMUTHUM** (Lat.), n. n.  $V_i^2z(wi^2s)\text{-}mu^2th(mu^2th)u^2m(u^2m)$ . See BISMUTH.—*Calx vismuthi*. See BISMUTH *subnitrate*.

**VISNEA** (Lat.), n. f.  $V_i^2z(ne^2)a^2$ . Fr., *v. visnée*. A genus of the *Ternstroemiaceæ*. [a. 35.]—**V. mocanera**. Fr., *mocan*. Ger., *Mokanere*. A shrub found in the Canaries; used in hemorrhoids (cf. *MOCAN*). [a. 35.]

**VISORIUS** (Lat.), adj.  $V_i^2z(wes)\text{-}or'i^2u^2s(u^2s)$ . See VISUAL.

**VISOS** (Fr.), n.  $Ve\text{-}zo$ . A place in the department of the Hautes-Pyrénées, France, where there is a saline and chalybeate spring. [L. 49, 57 (a. 14).]

**VISUAL**, adj.  $V_i^2zh(u^2s)'l$ . Lat., *visorius* (from *videre*, to see). Fr., *visuel*. Pertaining to vision. [F.]

**VISUAL REPERTUM** (Lat.), n. n.  $Vis(wes)u^2m(u^2m)\text{-}re(re)^2pu^2tripe^2rt(u^2m(u^2m))$ . See FUNDSCHEIN.

**VISIOMETER**, n.  $V_i^2zh(u^2s)u^2m(u^2m)\text{-}e^2tr(u^2s)$ . From *visus*, sight, and μέτρον, a measure. Fr., *visiomètre*. Ger., *V.* An instrument for measuring the range of vision. Risley's *v.* consists of a stand which is clamped firmly to a table. To the top of the stand is fixed a pair of semicircles, with their concavity upward, for the reception of trial glasses, stenopæic slit, etc. In front of the holders is a triangular horizontal bar, 20" long and graduated in fractions of an inch. Upon this bar is adjusted a freely movable carrier, designed to bear a series of cords containing the test-types of Snellen and Jaeger, and test-figures for astigmatism. The examinations are all made at an artificial far-point of 10' or 12'. [F.; a. 34.]

**VISUS** (Lat.), n. m.  $Vis(wes)u^2s(u^2s)$ . Gen., *visus*. From *videre*, to see. See VISION.—**V. acris**. See OXYDERCIA.—**V. amplipictus**. See MACROPIA.—**V. coloratus**. See CHROMATOPSIA.—**V. debilitas**. See ANTHROPIA.—**V. decolor**. See COLOR-BLINDNESS.—**V. defiguratus**. See PSEUDOLEPSIA.—**V. dimidiatus**.

See HEMIOPIA.—**V. diminutus**. See MICROPIA.—**V. diurnus**. See HEMERALOPIA (1st def.).—**V. duplicatus**. See DIPLOPIA.—**V. evanidus**. An old term for failure to recognize objects and their gradual disappearance, owing to fatigue of the retina. [F.]—**V. interruptus**. An old term for a form of amblyopia in which the patient loses sight of a word here and there on the printed page. [F.]—**V. juvenum**. An old term for myopia. [F.]—**V. lateralis**. See DYOPSIA *lateralis*.—**V. lucidus**. See PHOTOPSIA.—**V. muscarum**. See MUSCÆ *volitantes*, and cf. METAMORPHOPSIA.—**V. nebulosus**. See LEUCOMA (4th def.).—**V. nocturnus**. See NYCTALOPIA.—**V. obliquus**. See STRABISMUS.—**V. senilis**. See PRESBYOPIA.—**V. triplex**. See TRIPOPIA.

**VITA** (Lat.), n. f.  $Vit(wet)a^2$ . Fr., *vie*. See LIFE.—**V. cerebri**. See Cerebral LIFE.—**V. psychica**. See PSYCHIC LIFE.

**VITAL**, adj.  $V_i^2t'l$ . Gr., ζωτικός. Lat., *vitalis*. Fr., *v. Ger.*, *v. lebensfähig, lebendig*. Pertaining to life, also essential to life; as a *n.*, in the pl., *v's*, organs which are regarded as necessary to life, or injury to which endangers or destroys life. [a. 48.]

**VITALBA** (Lat.), n. f.  $V_i^2t(wet)\text{-}a^2l(ba^2l)a^2$ . The genus *Clematis*, especially *Clematis* *v.* [a. 35.]

**VITALISM**, n.  $V_i^2t'l(i^2z)m$ . Lat., *vitalismus* (from *vitalis*, vital). Fr., *vitalisme*. Ger., *Vitalismus*. The doctrine of vital force; an old system of physiology which considered life as a "pure entity" apart from the body. [K.]

**VITALITY**, n.  $Vit\text{-}a^2l(i^2z)i^2$ . Lat., *vitalitas* (from *vitalis*, vital). Fr., *vitalité*. Ger., *Lebenskraft*. 1. The principle of life. 2. Action, animation. [K.] 3. The state of being alive, also the power to resist death.

**VITALIZE**, v. tr.  $V_i^2t'l\text{-}iz$ . To impart life to, to endue with life. [a. 48.]

**VITELLARY**, adj.  $V_i^2t'e^2l\text{-}ar\text{-}i^2$ . See VITELLINE.

**VITELLIN**, n.  $V_i^2t\text{-}e^2l(i^2n)$ . Fr., *vitelline*. Ger., *V.* An albuminoid principle contained in the yolk of eggs, etc. [B. 99 (a. 14).]—**Crystalline v.** See CRYSTALLINE GLOBULIN.

**VITELLINE**, adj.  $V_i^2t'e^2l(i^2n)$ . Lat., *vitellinus*. Fr., *vitellin*. Ger., *vitellin, dottergelb* (2d def.). 1. Pertaining to the vitellus. [J.] 2. In botany, of the color of the yolk of egg. [a. 35.]

**VITELLO-INTESTINAL**, adj.  $V_i^2t'e^2l\text{-}o\text{-}i^2n\text{-}te^2st(i^2n)\text{-}l$ . Lat., *vitello-intestinalis*. Pertaining to the vitelline sac and the intestine. [a. 48.]

**VITELLOLUTEIN**, n.  $V_i^2t'e^2l\text{-}o\text{-}lu^2t'e^2i^2n$ . A non-nitrogenous yellow pigment obtained from the yolk of hen's eggs. [B.]

**VITELLOMESENTERIC**, adj.  $V_i^2t'e^2l\text{-}o\text{-}me^2z\text{-}e^2n\text{-}te^2r(i^2k)$ . Fr., *vitello-mésentérique*. Of Velpeau, see OMPHALO-MESENTERIC.

**VITELLORUBIN**, n.  $V_i^2t'e^2l\text{-}o\text{-}ru^2b(i^2n)$ . Fr., *vitellorubine*. A red pigment obtained from the yolk of hen's eggs, a chemically unstable, dark-red powder. [B.]

**VITELLOSE**, n.  $V_i^2t'e^2l\text{-}o$ . Intermediate products in the hydration of vitellin analogous to an albumose. [Halliburton (a. 34).]

**VITELLUS** (Lat.), n. m.  $V_i^2t(wi^2t)\text{-}e^2l(i^2n)s(lu^2s)$ . Dim. of *vitulus*, a calf. Gr., ἰάκωβος. Fr., *v.*, *matière vitelline* (ou *jaune*), *jaune de l'œuf* (2d def.). Ger., *Dotter, Eigelb* (2d def.). Syn.: *ovi v.* [Br. Ph.] (2d def.). 1. The cell-body of the ovum; the yolk of an egg or of an ovule; that portion of the contents of the vitelline membrane which is to afford nutriment to the embryo and take part in its development during the period of incubation in the *Ovipara*, and up to the time of the establishment of a nutrient connection with the maternal organism in the *Vivipara*. 2. Of the U. S. Ph., yolk of egg, the yolks of hen's eggs.—**Formative v.**, **Germinal v.**, **Germ v.** Lat., *morpholecithus*. Fr., *v. de formation*. Ger., *Bildungsdotter, Hauptdotter*. The protoplasmic portion of the *v.* as distinguished from the nutritive *v.*—**Glyceritum vitelli** [U. S. Ph.]. A preparation made by triturating together 9 parts of yolk of egg and 11 of glycerin. [B. 95 (a. 38).]—**Nutritive v.** Lat., *tropholecithus*. Fr., *protolécithe*. Ger., *Nahrungsdotter*. The granular portion of the yolk; the part that serves not directly for development, but in a subsidiary way by nourishing the formative *v.* [A. 5.]—**Oleum e vitellis ovorum. See OIL of eggs.—**Plastic v.** See *Formative v.*—**Primary v.** The *v.* of a simple ovum.**

—**Retrait du v.** (Fr.). A process of shrinkage on the part of the *v.*, giving rise to a space between it and the vitelline membrane. See LACUNA (2d def.).—**Secondary v.** [Kölliker]. An additional nutritive *v.* substance found in compound ova, formed in special organs or in special cells of the ovary. [A. 8.]—**V. ovarien** (Fr.). The yolk of an ovarian ovum.—**V. ovi**. See *V.* (2d def.).—**White v.** Ger., *weisser Dotter, weisser Nahrungsdotter, Dotterveis*. A thin, white portion of the nutritive *v.*, forming a layer surrounding the yellow *v.* and penetrating to the centre of the latter in the form of a whitish cord terminating in a globular mass. [A. 8.]—**Yellow v.** Ger., *Gelb, gelber Dotter*. The whole of the nutritive *v.* that is not included in the term white *v.*

**VITERBO** (It.), n.  $Vet\text{-}e^2rb(u^2s)$ . A place in the province of Rome, Italy, where there are hot sulphurous springs and a gaseous chalybeate spring. [L. 30, 37, 49, 57 (a. 14).]

**VITEX** (Lat.), n. f.  $Vit(wet)e^2x$ . Gen., *viticis*. Fr., *gattilier*. Ger., *Mülden*. A genus of verbenaceous trees and shrubs. The *Viticeæ* are a family comprising the *Myoporeæ* and *Verbenaceæ*, or a division (tribe) of the *Verbenaceæ*. The *Viticeæ* are the *Verbenaceæ*. [a. 35.]—**V. agnus castus**. Fr., (*gattilier*) *agnus castus*, *arbre au poivre, poivre faux*. Ger., *gemeine Müllen, Keuschbaum, Schafmüllen, Keuschamminstrach, Abrahamsbaum, Mönchs Pfefferstrach*. Tree-of-chastity, hemp- (or chaste- or monk's pepper-) tree; an aromatic shrub of the Orient and southern Europe, known as *ayax* to the ancients, who ascribed to it antiferic virtues, and used the leaves as an emmenagogue and oxytocic and externally as a discutient. The hot, pungent, and acrid seeds (or by substitution the fruits), *semen agni casti* (seu *arboris castæ*, seu *viticis* offer-

*nal*is), have been used as an emmenagogue, as a digestive, in diarrhoea and intermittent fever, and as a diaphoretic and diuretic in snake-bites; more recently they have been used, like cubebs, in gonorrhoea. [a, 35.]—**V. arborea**. A Sumatra species. The bark is used in ophthalmia. [a, 35.]—**V. latifolia**. An East Indian tree. The leaves are used for venomous bites and the bark and root in diarrhoea and dysentery. [a, 35.]—**V. moluccana**. A tree of the Moluccas, where the bark is used as a vulnerary. [a, 35.]—**V. negundo**. Fr. *gattilier incisé*. Five-leaved chaste-tree of India and other warm parts of Asia. The aromatic leaves are used as a topical application in rheumatism, sprains, etc., and in decoction as a bath for women after delivery. The bitter root and the dried fruits are anthelmintic, and the former also febrifuge. The Mohammedans smoke the dried leaves for headache and catarrh. [a, 35.]—**V. pinnata**. A Ceylon species. The flowers are used to aromatize tea. [a, 35.]—**V. rheedii**. A Malabar tree. The mildly aromatic bark is used in abdominal complaints and, with the fragrant leaves, as an emmenagogue and in after-pains. The young branches are used for rheumatism and gout. [a, 35.]—**V. spicata**. A species found in China and Cochinchina; used as a calefacient, stimulant, and discutient, and especially in various nervous disorders. [a, 35.]—**V. trifolia**. Three-leaved chaste-tree, (East) Indian privet; a species having the medicinal properties of *V. negundo* in greater degree. The young shoots and the leaves are a powerful discutient. The powdered leaves are used as a febrifuge, and the root as an anodyne application. The fruit is used in the Fiji Islands as a nervine, cephalic, and emmenagogue. [a, 35.]

**VITIATED-HUMORIST**, n. *Vi*<sup>sh</sup>/*i*<sup>2</sup>-at-e<sup>2</sup>d-hu<sup>2</sup>m-o<sup>2</sup>r-ist. A believer in the origin of a given disease in a vitiation of the fluids of the body. [A, 84.]

**VITICULA** (Lat.), n. f. *Vi*<sup>2</sup>t(wet)-i<sup>2</sup>k'u<sup>2</sup>l(u<sup>2</sup>)-a<sup>2</sup>. Dim. of *vitis*, a vine. Fr., *viticule*. A vine or sucker. [a, 35.]

**VITILIGO** (Lat.), n. f. *Vi*<sup>2</sup>t(wi<sup>2</sup>t)-i<sup>2</sup>l-ig(eg)-o. Gen., *-ig/inis*. From *vitium*, a defect. Fr., *v.*, *achrome, vitiligo*. Ger., *Pigment-schwund, Nebelfleck, Malfleck, vertiefter Hautfleck*. 1. In the modern acceptance of the term, and also as defined by certain of the older writers (e. g., *gorreus*), an acquired form of achromatosis, characterized by white or light-colored patches of skin of irregular shape, usually bordered by a zone more darkly pigmented than the surrounding skin. [G, 3.] Cf. *V. of Bateman* and *V. of Celsus*, also *ALBINISMUS partialis*. 2. See *LEPROSY*.—**V. alba**. See *V.* (1st def.).—**V. alba gravior**. See *White LEPROSY* (1st def.).—**V. alba levior**. An old term for macular leprosy. [G.] See *LEPRA maculosa*.—**V. albus**. See *White LEPROSY*.—**V. capitis**. 1. Vitiligo of Celsus (q. v.) in which white spots appeared on the hairy scalp. 2. *V.* (1st def.) affecting the hairy scalp so as to produce circumscribed areas of canities. 3. Of Cazenave, alopecia areata. [G.]—**V. congeniale** (Fr.). See *ALBINISMUS partialis*.—**V. gravior**. See *V. of Celsus*.—**V. hepatica**. See *CHLOASMA hepaticum*.—**V. hypopigricum**. Linear atrophy of the skin due to its over-distention from dropsy. [G.]—**V. matrum**. Linear atrophy of the skin due to pregnancy. [G.]—**V. melas**. Probably a variety of leprosy. [G, 17.] See *Black LEPROSY* and cf. *V. of Celsus* and *MORPHEA nigra*.—**V. nigra**. See *Black LEPROSY*.—**V. obscurum**. Linear atrophy of the skin due to corpulence. [G.]—**V. of Bateman**. A tubercular skin disease of uncertain character said to be followed, on the subsidence of the tubercles, by permanent white, glistening patches. [G, 17.]—**V. of Celsus**. "A loathsome disease" arising "from a bad habit of body," attended with alteration of the color of the skin (leprosy?). Celsus described three kinds: *albus*, *melas*, and *leuce*. The first occurred in disseminated white patches or spots, attended with roughening of the surface. The second (*melas*) differed from *albus* only in the spots being black or dark-colored. The third (*leuce*) was characterized by spots whiter than those of *albus*, affecting the skin more deeply, so that the hairs were rendered white, and the disease was incurable. By some the first and second forms are supposed to have been superficial scaly diseases belonging either to psoriasis or to eczema, while the third form was leprosy. [G, 13.]

**VITILIGOIDEA** (Lat.), n. f. *Vi*<sup>2</sup>t(wi<sup>2</sup>t)-i<sup>2</sup>l-i<sup>2</sup>g(eg)-o(o<sup>2</sup>)-i<sup>2</sup>d(ed)-e<sup>2</sup>-a<sup>2</sup>. From *vitiligo* (q. v., 1st def.), and *idos*, resemblance. See *XANTHOMA*.—**V. granulosa**. See *XANTHOMA tuberculatum*.—**V. palpebrarum**. See *XANTHELASMA palpebrarum*.—**V. papulosa**. See *XANTHOMA tuberculatum*.—**V. plana**. See *XANTHOMA planum*.—**V. tuberosa**. See *XANTHOMA tuberosum*.

**VITIS** (Lat.), n. f. *Vit*(wet)/i<sup>2</sup>s. Gen., *vit'is*. Fr., *vigne*. Ger., *Weinrebe*. The vine; a genus of the *Ampelideæ*. [a, 35.]—**Fructus v. minute** (Swed. Ph.). Corinthian raisins. [B, 95 (a, 38).] Cf. *UVÆ*.—**Fructus v. sennatus** (Dan. Ph.). A preparation made by digesting 10 parts of senna-leaves in enough boiling water to make 15 parts when expressed at the end of an hour, boiling up with 30 of white sugar into a syrup, and adding 30 of grapes and 1 part of cassia. [B, 95 (a, 38).]—**Rob baccarum v. idææ**, *Rob v. idææ*. Fr., *rob de canneberge ponctuée*. A preparation made by boiling the juice of the berries of *Vaccinium v. idææ* with one fourth of its weight of sugar to the consistence of honey. [B, 119.]—**V. acetosa**. North Australian vine; an acid plant which has been used as an antiscorbutic. The fruit is edible. [a, 35.]—**V. æstivalis**. The summer grape of the United States. The berries are edible. [a, 35.]—**V. alba** (silvestris). See *BRONIA alba*.—**V. apyrena**. A seedless variety of *V. vinifera*, yielding passulæ minores. [a, 35.]—**V. caribbæa**. Ger., *westindische Weinrebe*. Jamaica grape, water-withe. The leaves and young branches are refrigerant and mildly astringent. The berries are eaten. [a, 35.]—**V. carnosa**. See *Cissus carnosæ*.—**V. chironia**. An old term for the *Tamus communis*.—**V. corinthiaca**. See *V. apyrena*.—**V. idæa**. The *Vaccinium v. idæa*, also the genus *Vaccinium* or a section of that genus. [a, 35.]—**V. idæa myrtillus**. The *Vaccinium myrtillus*. [a, 35.]—**V. labrusca**. Fr., *vigne cotonneuse*. American plum- (or Isabella-, or Northern fox-) grape, found also in Japan. The edible fruits are used in making wine. [a, 35.]—**V. latifolia**. An East

Indian species; used in odontalgia, as a detergent in indolent ulcers, and as an alternative. [a, 35.] Cf. *Cissus latifolia* (glauca).—**V. salix**. Of Dumortier, a section of the genus *Salix*. [a, 35.]—**V. setosa**. A very acrid East Indian species. The leaves, toasted and smeared with oil, are used as a maturant. [a, 35.]—**V. silvestris**. See *BRONIA alba*. *BRONIA dioica*, and *SOLANUM dulcamara*.—**V. trifolia**. An East Indian species. The leaves are used as a febrifuge and the roots as a discutient. [a, 35.]—**V. vinifera**. Fr., *vigne cultivée* (ou de Noé). Ger., *edle Weinrebe*, *Weinstock*, *Traubenstock*. The grape-vine; a native probably of Caspian regions, but now cultivated under numerous forms (*alexandria*, *alicantia*, *apyrena*, *muscatella*, etc.) in all countries having a mean summer temperature of 66° F. or more. The leaves and tendrils (Lat., *folia et pampini*) contain tartaric and malic acids, tartrates and malates, glucose and cane-sugar; they are cooling and astringent, and have been used in diarrhoea, hæmorrhages, etc. The juice which flows from the stem when incised in the spring was formerly official as *lacrýmæ v.*, and has been used as a tonic eye-wash and in ophthalmia. The unripe fruits contain malic, tartaric, and racemic acids, and (in their skins) tannic acid; their refrigerant juice (Lat., *omphacium*, *succus omphacii*, *agresta*, *succus agrestis*) was formerly used against epilepsy. The ripe fruits are diuretic, laxative, and refrigerant, and their fermented juice constitutes wine. The dried fruits constitute raisins. The seeds contain 5 or 6 per cent. of tannin and over 15 per cent. of a bland fixed oil consisting of the glycerides of erucic, stearic, and palmitic acids; they have been used in chronic diarrhoea. [a, 35.]—**V. vulpina**. Bullet- (or Muscadine, or Southern fox-) grape; a United States species, found also in Japan. A variety known as "*scuppernong*" is cultivated in the Southern States. [a, 35.]

**VITIUM** (Lat.), n. n. *Vi*<sup>2</sup>t(wi<sup>2</sup>)/shi<sup>2</sup>(ti<sup>2</sup>)-u<sup>2</sup>m(u<sup>2</sup>m). Gr., *ἀνάρρημα, νόσος*. A fault, a defect; an abnormality. [a, 17.]—**V. primæ conformationis**. See *Congenital MALFORMATION*.

**VITRÉ** (Fr.), n. *Ve*-tra. A place in the department of the Ille-et-Vilaine, France, where there is a ferruginous spring. [a, 14.]

**VITREATUS** (Lat.), adj. *Vi*<sup>2</sup>t(wi<sup>2</sup>t)-re<sup>2</sup>-at(a<sup>2</sup>t)/u<sup>2</sup>s(u<sup>2</sup>s). From *vitrum*, glass. Made into glass. [B.]

**VITREOCAPSULITIS** (Lat.), n. f. *Vi*<sup>2</sup>t(wi<sup>2</sup>t)/'re<sup>2</sup>-o(o<sup>2</sup>)-ka<sup>2</sup>ps-(ka<sup>2</sup>ps)-u<sup>2</sup>l(u<sup>2</sup>)-i(e)/ti<sup>2</sup>s. Gen., *-it'idos* (-idis). An old term for hyalitis. [F.]

**VITREOUS**, adj. *Vi*<sup>2</sup>t(re<sup>2</sup>)-u<sup>2</sup>s. Lat., *vitreus*, *vitrosus* (from *vitrum*, glass). Fr., *vitreux*, *vitré*. Ger., *glasig*, *gläsern*. Glassy, resembling glass; as a n. (Lat., *vitreum*), the corpus vitreum.—**Primordial v.** The embryonic v. It differs mainly from the v. of extra-uterine life in having many parabolic elements. [F.]

**VITRIFICATUS** (Lat.), adj. *Vi*<sup>2</sup>t(wi<sup>2</sup>t)-ri<sup>2</sup>-fi<sup>2</sup>k-at(a<sup>2</sup>t)/u<sup>2</sup>s(u<sup>2</sup>s). From *vitrum*, glass, and *facere*, to make. Made into glass or made like glass. [B, 119.]

**VITRINA** (Lat.), n. f. *Vi*<sup>2</sup>t(wi<sup>2</sup>t)-rin(ren)/a<sup>2</sup>. From *vitrum*, glass. Fr., *vitrine*. A vitreous humor.—**V. ocularia**, **V. ocularis**, **V. oculi**. See *CORPUS vitreum*.

**VITRIOL**, n. *Vi*<sup>2</sup>t(r'i<sup>2</sup>)-u<sup>2</sup>l. From *vitrum*, glass. Lat., *vitriolum*. Fr., *v.* Ger., *V.* Any metallic salt (as now used, generally a sulphate) having a glassy lustre. [B, 3.]—**Blue v.** See *COPPER sulphate*.—**Calcareous v.** Calcium sulphate. [B, 91.]—**Copper v.**, *Cyprischer V.* (Ger.). Lat., *vitriolum cupri*. See *COPPER sulphate*.—**Double v.** Fr., *v. de Salzbourg*. An impure copper sulphate containing 70 to 80 per cent. of ferrous sulphate. [B, 81 (a, 38).]—**Elixir of v.** See *ACIDUM SULPHURICUM aromaticum*.—**Espirit de v. éthéré martial**. See *Tinctura FERRI chlorati æthereæ*.—**Green v.**, **Martial v.** See *IRON sulphate* (1st def.).—**Nordhausen oil of v.**, **Nordhäuser Vol.** (Ger.). Nordhausen sulphuric acid. [B.]—**Oil of v.** Ger., *Vitriölöl*. Sulphuric acid; so called because originally prepared from green vitriol. [B.]—**Roman v.** See *COPPER sulphate* and *IRON sulphate* (1st def.).—**V. blanc** (Fr.). White v.—**V. bleu** (Fr.). See *COPPER sulphate*.—**V. d'Angleterre** (Fr.). See *IRON sulphate* (1st def.).—**V. de Vénus** (Fr.). See *COPPER sulphate*.—**V. mixte de Chypre** (Fr.). A variety of v. containing zinc sulphate. [B, 81 (a, 38).]—**V.öl**. Oil of v., especially Nordhausen sulphuric acid. [B.]—**V. pesant** (Fr.). Barium sulphate. [B, 119.]—**V. saure** (Ger.). See *SULPHURIC ACID*.—**V. todtenkopf** (Ger.). See *Caput mortuum VITRIOLI*.—**V. végétal** (Fr.). See *Nostoc commune*.—**V. vert** (Fr.). Green v.; ferrous sulphate.—**White v.** Zinc sulphate, especially the commercial salt. [B.]

**VITRIOLATED**, adj. *Vi*<sup>2</sup>t(r'i<sup>2</sup>)-o<sup>2</sup>-l-at-e<sup>2</sup>d. Lat., *vitriolatus*. Fr., *vitriolé*. Composed of or containing vitriol; containing sulphur or sulphuric acid. [B.]

**VITRIOLIC**, adj. *Vi*<sup>2</sup>t(r'i<sup>2</sup>)-o<sup>2</sup>-l-i<sup>2</sup>k. Containing or derived from vitriol; sulphuric. [B.]—**V. acid**. See *SULPHURIC ACID*.

**VITRIOLUM** (Lat.), n. n. *Vi*<sup>2</sup>t(wi<sup>2</sup>t)-ri(ri<sup>2</sup>)/o<sup>2</sup>-l-u<sup>2</sup>m(u<sup>2</sup>m). See *VITRIOL*.—**Ether vitrioli**. See *ETHYL ETHER*.—**Ether vitrioli aquosus**. See *LIQUR ANODYNUM mineralis aquosus*.—**Aqua vitrioli alba**. See *AQUA ophthalmica aluminosa*.—**Aqua vitrioli cærulea**. See *Solutio CUPRI ammoniacalis*.—**Caput mortuum vitrioli**. Ger., *Vitriöltodtenkopf*. The residue of impure ferric oxide obtained when ferrous sulphate is distilled to obtain fuming sulphuric acid. [B, 2.]—**Colcothar vitrioli**. See *COLCOTHAR*.—**Collyrium adstringens v. vitrioli albo**. See *AQUA ophthalmica aluminosa*.—**Elixir vitrioli Mynsichti**. See *ACIDUM sulphuricum aromaticum*.—**Naphtha vitrioli**. See *ETHYL ETHER*.—**Naphtha vitrioli camphorata**. See *Solutio CAMPHORÆ æthereæ*.—**Naphtha vitrioli diluta**. See *LIQUR ANODYNUM mineralis aquosus*.—**Naphtha vitrioli martialis**. See *Tinctura FERRI chlorati æthereæ*.—**Oleum vitrioli**. See *SULPHURIC ACID*.—**Oleum vitrioli depuratum**. Purified sulphuric acid. [B, 97.]—**Oleum vitrioli dulce**. Impure ether mixed with alcohol. [B, 97.]—**Oleum vitrioli purificatum**. Purified sulphuric acid. [B, 97.]—**Sal vitrioli narcoticum**. Boric acid. [B, 97.]—

**Spiritus vitrioli dulcis.** Impure ether mixed with alcohol. [B, 97].—**Spiritus vitrioli philosophicum.** A preparation made by inspissating to one half the limpid acid liquid obtained in the preparation of the powder of Algaroth, precipitated when antimony trichloride is dropped into water. [B, 200].—**Spiritus vitrioli phlogisticatus.** See **ANTIMONY CLYSSUS**.—**V. album.** See **White VITRIOL**.—**V. calcareatum.** Calcium sulphate. [B, 180].—**V. camphoratum.** See **CUPRUM ALUMINATUM**.—**V. hungaricum.** **V. londinense.** **V. Riverii.** See **IRON SULPHATE** (1st def.).—**V. romanum.** See **Roman VITRIOL**.—**V. Veneris.** See **COPPER sulphate**.

**VITRO-DENTIN**, n.  $Vit^2-ro-de^2nt/i^2n$ . Fr., *vitro-dentine*. Ger., *Vitrodentin*. Of Owen, a very dense form of dentin, such as that covering the teeth in the pike. [J, 28, 29, 35.]

**VITREOUS** (Lat.), adj.  $Vit^2(wi^2t)-ros/u^2s(u^2s)$ . See **VITREOUS**.

**VITRUM** (Lat.), n. n.  $Vit(wi^2t)/ru^2m(ru^2m)$ . See **GLASS**.—**Fæx vitri**, **Recrementa vitri**, **Sagimen vitri**, **Sal vitri**. See **ANATRON**.—**V. causticum.** See **BURNING-GLASS**.—**V. hypoclepticum.** Ger., *Scheidetrichter*. A funnel for separating water from oil. [L, 50, 135 (a, 39)].—**V. ruthenicum.** See **SELENITE** (2d def.).

**VITRY-LE-FRANÇOIS**, **VITRY-SUR-MARNE** (Fr.), n's.  $Ve-tre-l'fra^2n^2-swa^2-su^2r-ma^2rn$ . A place in the department of the Marne, France, where there is a chalybeate spring. [a, 14.]

**VITTA** (Lat.), n. f.  $Vit^2(wi^2t)/ta^2$ . From *viere*, to bend. Fr., *vitte*. Ger., *Strieme*, *Striemen* (3d def.), *Binde* (3d def.), *Bandstreifen* (3d def.). 1. See **FASCIOLA** (1st def.). 2. See **CAUL** (1st def.). 3. A broad transparent or colored streak or band on a part or organ. 4. One of the narrow canals or oil-tubes on the pericarp of umbelliferous plants. [a, 35].—**Vittæ commissurales.** Ger., *Fugenstriemen*. The vittæ imbedded in the face of the commissure of some umbelliferous fruits. [a, 35].—**Vittæ dorsales.** Ger., *Rückenstriemen*. The vittæ beneath the intervals of the ribs of umbelliferous fruits. [a, 35.]

**VITTATE**, adj.  $Vit^2(at)$ . Lat., *vittatus*. Provided with vittæ.

**VITTEL** (Fr.), n.  $Ve-te^2l$ . A place in the department of the Vosges, France, where there are gaseous alkaline and chalybeate springs. [L, 49, 57 (a, 14).]

**VITULAR, VITULARY, VITULINE**, adj's.  $Vit^2(u^2l)-a^2r$ , -ar-i^2, -i^2n. From *vitulus*, a calf. Fr., *vitulaire*. Pertaining to or associated with calves (cf. *V. FEVER*). [a, 48.]

**VIVACE** (Fr.), n.  $Ve-va^2s$ . Of Levret, a malignant fungous polypus-like outgrowth from the interior of the uterus. [A, 42.]

**VIVANT** (Fr.), adj.  $Ve-va^2n^2$ . Living, active. [a, 14.]

**VIVERRA** (Lat.), n. f.  $Viv^2(wi^2)-ve^2r(r)/ra^2$ . The civet or civet cat; a genus of the *Viverridæ*, which are a family of cat-like carnivorous mammals. [a, 48].—**V. civetta**, **V. zibetha**. Fr., *civet*, *cive*. Ger., *Zibethkatze*, *Bismakete*. A species (or perhaps distinct species) found in northern Africa and in Asia. For the perfume obtained from their anal glands, see *CIVER* (2d def.). [a, 48.]

**VIVES**, n. *Vivs*. See under **AVIVES**.

**VIVIPARITY**, n.  $Viv^2v-i^2-pa^2r/i^2t-i^2$ . From *vivus*, alive, and *parere*, to bring forth. Fr., *viviparité*. Viviparous generation.

**VIVIPAROUS**, adj.  $Viv^2v-i^2-pa^2r-u^2s$ . Lat., *viviparus*. Fr., *viuipare*. Ger., *lebendiggebärend*. Bringing forth the young alive and free; in botany, germinating from seed, or sprouting from buds, while on the parent plant. The *Vivipares* of De Blainville are a subtype of the *Osteozaires* equivalent to mammals. [L, 231 (a, 35).]

**VIVISECTION**, n.  $Viv^2v-i^2-se^2kt/shu^2n$ . From *vivus*, alive, and *secare*, to cut. Fr., v. Ger., *V.*, *Vivisektion*. The performance of cutting operations on living animals for purposes of scientific investigation or demonstration. [a, 48.]

**VIVISECTOR**, n.  $Viv^2v-i^2-se^2kt/o^2r$ . One who practices or advocates vivisection. [K.]

**VIVUS** (Lat.), adj.  $Viv(wi^2)/vu^2s(wu^2s)$ . From *vivere*, to live. Fr., *vivant*. Ger., *lebendig*. Living. [a, 14.]

**VLISS** (Ger.), n. *Fles*. See **FLEECE**.—**V'faser**. A nerve-fibre which interlaces or forms a network with others. [L, 6 (K).]

**VOCAL**, adj.  $Vo^2k'l$ . Lat., *vocalis* (from *vox*, the voice). Fr., *vocal*. Ger., v. Pertaining to, produced by, or contributing to the production of the voice. [a, 48.]

**VOGEL** (Ger.), n. *Fog'e^2l*. A bird; in the pl., *Vögel*, the class *Aves*. [a, 48].—**V'klause**. See **HIPPOCAMPUS minor**.—**V'kraut**. The genus *Orthanthum*, also *Stellaria media* and various other plants. [a, 35].—**V'kunde**. See **ORISTHOLOGY**.—**V'lein**. See **BRUCLINE**.—**V'sporn**. See **HIPPOCAMPUS minor**.—**V. Strauss**. See **STRUTHIO camelus**.

**VOICE**, n. *Vois*. Gr., *φωνή, φθέγγος*. Lat., *vox*. Fr., *voix*. Ger., *Stimme*. The utterance of articulate sounds; also the faculty of uttering such sounds, or the instrumentality by which they are produced, or an articulate sound of some particular character. [a, 48].—**Amphoric v.** See **AMPHORIC RESONANCE** (2d def.).—**Breaking v.** See **PARAPHONIA puerum**.—**Bronchial v.** See **BRONCHOPHONY**.—**Cavernous v.** See **PECTORILLOQUY**.—**Chest v.** Fr., *voix de poitrine*. Ger., *Bruststimme*. The ordinary normal v. [K].—**Choleric v.** The weak whispering or husky voice characteristic of cholera. [D, 38].—**Laryngeal v.** See **LARYNGOPHONY**.—**Nasal v.** See **MYCTEROPHONIA**.—**Thoracic v.** The sound of the v. as heard in thoracic auscultation. [a, 34].—**Tracheal v.** The v. as heard over (and appearing to be produced in) the trachea. [D].—**Whispering v.** 1. Articulation in whispers. [a, 48.] 2. See **CHUCHOTEMENT**.

**VOIE** (Fr.), n. *Vwa^2*. See **VIA**.—**Premières v's**. See **PRIMÆ VIZ**.—**V. spermaticque**. See **VAS deferens**.

**VOILE** (Fr.), n. *Vwa^2l*. See **VEIL**.—**V. du palais**. See **VELUM palati**.—**V. du quatrième ventricule**. See **VALVE of Vieussens**.—**V. médullaire**. See **VELUM medullare**.—**V. médullaire inférieur**. See **Inferior (posterior) medullary VELUM**.—**V. médullaire postérieur**. See **Posterior medullary VELUM**.—**V. membraneux**. See **SÆPTUM lucidum**.

**VOITURE** (Fr.), n. *Vwa^2-tu^2r*. A carriage. [a, 48].—**V. caisson**. See **AMBULANCE** (3d def.).—**V. Macon**. A French two-wheeled ambulance wagon. [A, 244.]

**VOIX** (Fr.), n. *Vwa^2*. See **VOICE**.—**V. chevrotante**. See **ÆGOPHONY**.—**V. chuchotée**. See **CHUCHOTEMENT**.—**V. convulsive**. A vocal neurosis in which there is difficulty in talking in consequence of defective innervation of the laryngeal muscles. [a, 34].—**V. scandée**. A form of speech, occurring in various cerebral affections, in which words and sentences are uttered in a hesitating, staccato manner. [a, 18].—**V. soufflée**. A voice that has as auscultatory blowing sound; it is only produced when there is a respiratory bronchial or cavernous murmur in that part of the lung where it is heard. [A, 301 (a, 34).]

**VOLA** (Lat.), n. f.  $Vol(wo^2l)/a^2$ . Gr., *θέωω*. The palm of the hand, also the sole of the foot. [A, 312 (a, 17)].—**V. manus**. See **PALM** (2d def.).

**VOLAR**, adj.  $Vol/a^2r$ . Lat., *volaris* (from *vola*, the palm of the hand). Ger., v. See **PALMAR**.

**VOLATICUS** (Lat.), adj.  $Vol^2(wo^2l)-a^2t(a^2t)/i^2k-u^2s(u^2s)$ . From *volare*, to fly. Fr., *volatique*. Fleeting; of an eruption, transient. [G.]

**VOLATILE**, adj.  $Vol^2/a^2t-i^2l$ . Lat., *volatilis* (from *volare*, to fly). Fr., *volatil*. Ger., *fliegend, flüchtig*. Fleeting; tending to assume the state of vapor. [B.]

**VOLATILIZATION**, n.  $Vol^2-a^2t-i^2l-i^2z-a^2shu^2n$ . Lat., *volatilizatio* (from *volatilis*, flying). Fr., *volatilisation*. Ger., *Verflüchtigung, Abrauchen*. The act or process of conversion of a solid or liquid into vapor. [B.]

**VOLATILIZER**, n.  $Vol^2-a^2t/i^2l-iz-u^2r$ . Fr., *volatiliseur*. Ger., *Flüchtigmacher*. An apparatus for effecting volatilization. Von Trötsch's v. consists of a glass bottle with a wide neck, closed by a stopper of vulcanized rubber, pierced with three holes and fixed on a stand. Into the middle orifice is inserted a thermometer, and into the lateral orifices two glass tubes are passed; the one serves for the conduction of the compressed air, and the other for the introduction of the vapor into the tympanic cavity. At the bottom of the glass bottle is a layer of sand, which is heated by the flame of a spirit-lamp, and soon causes the medicated substance in the metal vessel to evaporate. [F, 32.]

**VOLCANIC MINERAL SPRINGS**, n.  $Vol^2lk-a^2n/i^2k mi^2n/-e^2-r^2l$ . A place in Inyo County, California, where there are gaseous alkaline springs. [Anderson (a, 14).]

**VOLCANIC STATION SPRINGS**, n.  $Vol^2lk-a^2n/i^2k sta^2shu^2n$ . A place in San Diego County, California, where there are sulphurous springs. [Anderson (a, 14).]

**VOLITION**, n.  $Vol^2-i^2-shu^2n$ . From *velle*, to wish. Fr., v. Ger., *V.*, *Willensäusserung*. The act of willing. [L, 49 (a, 14).]

**VOLITIONAL**, adj.  $Vol^2-i^2-shu^2n-l$ . Fr., *volitionnel*, *volitif* (1st def.). Pertaining to volition; voluntary. [a, 17.]

**VOLKAMERIA** (Lat.), n. f.  $Folk-a^2m-e^2r/i^2-a^2$ . From *Volkamer*, a German botanist. Fr., *volkamérie, volkamier*. 1. Of Browne, see **CLETHRA** (2d def.). 2. Of Linneus, see **CLEODENDRON** (1st def.). 3. The genus *Capparis*. [a, 35].—**V. aculeata**. Fr., *amourette de Saint-Christophe*. A native of tropical America. The bark is said to be substituted for cinchona. [a, 35].—**V. inermis**. See **CLEODENDRON inermis**.

**VOLLBLÜTIG** (Ger.), adj.  $Fo^2l/blu^2t-i^2g$ . See **PLETHORIC** and **SANGUINE** (2d def.).

**VOLLBLÜTIGKEIT** (Ger.), n.  $Fo^2l/blu^2t-i^2g-kit$ . See **PLETHORA**.—**Arterielle V.** See **ERYTHROSIS**.

**VOLLGEBAUT** (Ger.), adj.  $Fo^2l/ge^2-ba^2-u^2t$ . Full-formed, full-grown. [a, 14.]

**VOLLKOMMEN** (Ger.), adj.  $Fo^2l-ko^2m-me^2n$ . See **PERFECT**.

**VOLLLEIBIG** (Ger.), adj.  $Fo^2l/lēb-i^2g$ . See **CORPULENT**.

**VOLLSAFTIG** (Ger.), adj.  $Fo^2l/za^2ft-i^2g$ . Full of sap; plethoric.

**VOLLZELLBILDUNG** (Ger.), n.  $Fo^2l/tse^2l-bi^2ld-un^2$ . See **REJUVENESCENCE** (2d def.).

**VOSELLA** (Lat.), n. f.  $Vo^2l(wo^2l)-se^2l/a^2$ . From *vellere*, to pluck. Gr., *λαβή*. A forceps having one or more hooks at the free extremity of each blade. [a, 34.]

**VOLT**, n.  $Vo^2lt$ . From *A. Volta*, one of the discoverers of galvanism. Ger., *V.*, *Volte*. The unit of electromotive force. [a, 48.]

**VOLTAGE**, n.  $Vo^2lt/e^2j$ . The electro-motive strength of an electrical current measured in volts.

**VOLTAIC**, adj.  $Vo^2lt-a^2i^2k$ . Fr., *voltaïque*. Ger., *voltaisch*. See **GALVANIC**.

**VOLTAISM**, n.  $Vo^2lt/a^2-i^2z^2m$ . Lat., *voltismus*. Fr., *voltisme*. See **GALVANISM**.

**VOLTAMETER**, n.  $Vo^2lt-a^2m-e^2t-u^2r$ . Lat., *voltametrum* (from *Volta* [see **VOLT**], and *μετρον*, a measure). Ger., *V.* An apparatus for measuring absolute quantities of electricity by electrolytic decomposition. [L, a, 49.]

**VOLTMETER**, n.  $Vo^2lt-met-u^2r$ . An instrument for indicating the voltage of an electric current. [a, 49.]

**VOLUBLE**, adj.  $Vol^2(u^2)-b^2l$ . Lat., *volubilis* (from *volvere*, to turn). Fr., *voluble*. Ger., *windend, gewunden*. Twining, ascending by coiling round a support. [a, 35.]

**VOLUME**, n.  $\text{Vo}^2/\text{u}^2\text{m}$ . Lat., *volumen* (from *volvere*, to roll). Fr., *v.* Ger., *Volum*, *Volumen*, *Umfang*. Bulk.—**Atomic v.** Fr., *v. atomique*. Ger., *Atomvolum*. 1. As formerly used, molecular v. 2. The v. occupied by an atom in a solid or liquid compound as measured by the increase in molecular v. of the compound due to the addition of one atom of the element to its molecule. This quantity is not constant for each element, but varies according to the method of its union with the compounds. [B. 4.]—**Diffusion v.** The v. through which a given v. of matter will diffuse itself within a given time on being added to a fluid. [a. 49.]—**Equivalent v.**, **Molecular v.**, **Specific v.** Formerly called *atomic v.* The v. occupied by a molecule of a substance. In the gaseous state, and under equal conditions of temperature and pressure, the molecular v.'s are the same for all substances, and are equal to the molecular weights divided by the specific gravity referred to hydrogen as a unit. In the solid and liquid states the molecular v. is equal to the molecular weight divided by the specific gravity referred to water as a unit. [B.]

**VOLUMEN** (Lat.), n. n.  $\text{Vo}^2/(\text{wo}^2)\text{-u}^2(\text{me}^2)\text{n}$ . Gen., *-um/inis*. From *volvere*, to roll. Ger., *V.* 1. A roll; anything rolled or wound up. [L. 30 (a. 14).] 2. See **VOLUME**.—**V. chirurgicum**. See **EIGHT-EN-TAILED BANDAGE**.—**V. pulmonum auctum**. See **PULMONARY EMPHYSEMA**.

**VOLUMETRIC**, adj.  $\text{Vo}^2/\text{u}^2\text{m-e}^2/\text{ri}^2\text{k}$ . From *volumen*, volume, and *μετρον*, a measure. Fr., *volumétrique*. Ger., *volumetrisch*. Pertaining to measurement by volume. [a. 48.] See **V. ANALYSIS**.

**VOLUNTARY**, adj.  $\text{Vo}^2/\text{u}^2\text{nt-a-r}^2$ . Gr., *ἐκούσιος*. Lat., *voluntarius* (from *voluntas*, will). Fr., *volontaire*. Ger., *freiwillig*. In accordance with or under the control of the will. [K.]

**VOLUTE**, adj.  $\text{Vo}^2/\text{u}^2\text{t'}$ . Lat., *volutus* (from *volvere*, to roll). Rolled up. [a. 35.]

**VOLVA** (Lat.), n. f.  $\text{Vo}^2/(\text{wo}^2)/\text{va}^2(\text{wa}^2)$ . From *volvere*, to roll. Fr., *volve* (1st def.). Ger., *Wulst* (1st def.). 1. The membrane covering the fruiting organs in some *Fungi*. [a. 35.] 2. See **VULVA**.

**VOLVACEOUS**, adj.  $\text{Vo}^2/\text{iv-a'shu}^2\text{s}$ . Lat., *volvaceus*. Fr., *volvacé*. Volvate; especially having a well-developed volva (1st def.). [a. 35.]

**VOLVAL**, adj.  $\text{Vo}^2/\text{v}^2\text{l}$ . Lat., *volvalis*. Pertaining to the *Volvae*, which are Lindley's v. alliance (Lat., *nixus volvalis*) of the *Polycarpæ*, consisting of the *Cuscutæ*, *Convolvulaceæ*, *Polemoniaceæ*, and *Hydroleaceæ*. [a. 35.]

**VOLVATE**, adj.  $\text{Vo}^2/\text{v}^2\text{at}$ . Lat., *volvatus*. Fr., *volvé*. Ger., *beumstet*. Having a volva (1st def.). [a. 35.]

**VOLVENS** (Lat.), adj.  $\text{Vo}^2/(\text{wo}^2)/\text{ve}^2\text{nz}(\text{wans})$ . Gen., *-vent'is*. From *volvere*, to roll. Rolling, causing to roll; as a n. m., a muscle that acts to cause rolling. [a. 48.]—**Volventes nubl.** The oblique muscles of the eye. [L. 349.]

**VOLVOX** (Lat.), n. m.  $\text{Vo}^2/(\text{wo}^2)/\text{vo}^2\text{x}(\text{wo}^2\text{x})$ . Gen., *-voc'is*. From *volvere*, to roll. Ger., *Kugelthierchen*. A genus giving its name to an order (the *Volvocineæ*), Fr., *volvocinées*; Ger., *Volvocineen*) of the *Chlorophyceæ*. [a. 35.]—**V. globator**. A freshwater plant consisting of a hollow spherical colony (coenobium) composed of numerous cells imbedded in a tough gelatinous transparent membrane. The cells are connected with each other by threads of protoplasm forming a network over the surface of the sphere, and are provided each with a pair of cilia projecting beyond the membrane, which, by their vibrations, give a rolling motion to the sphere. The colony, when mature, has a diameter about half that of a pin's head. [a. 35.]

**VOLVULUS** (Lat.), n. m.  $\text{Vo}^2/(\text{wo}^2)/\text{vu}^2/(\text{wu}^2\text{l})\text{-u}^2\text{s}(\text{u}^2\text{s})$ . From *volvere*, to roll. Fr., *volvule*, *enroulement*. Ger., *Gedärmsver-schlingung*. 1. A twisting of an intestine about its mesenteric axis, or (rarely) upon its own axis, so that the lumen is occluded. 2. An intertwining or knotting of two coils of intestines so as to cause obstruction in their lumina. [a. 34.]—**V. sanguineus**. Of the Hippocratic school, scurvy. [a. 34.]

**VOMER** (Lat.), n. m.  $\text{Vom}(\text{wom})/\text{u}^2/\text{er}^2(\text{e}^2\text{r})$ . Gen., *vomeris*. From *v.*, a plowshare. Fr., *v.* Ger., *Pflugschar*. 1. A thin mesial bone, which is irregularly quadrilateral, placed vertically between the nasal fossæ. [C.] 2. In ornithology, see **PYOSTYLE**.—**V. cartilagineus**. A cartilaginous plate which extends from the anterior extremity of the v. to the nasal spine of the superior maxilla. [L. 332.]

**VOMERINE**, adj.  $\text{Vom}^2/\text{e}^2\text{r-i}^2\text{n}$ . Fr., *vomérien*. Pertaining to the vomer.

**VOMICA** (Lat.), n. f.  $\text{Vo}^2\text{m}(\text{wo}^2\text{m})/\text{i}^2\text{k-a}^2$ . From *vomere*, to vomit. Fr., *vomique* (2d def.). 1. A pulmonary cavity due to destruction of lung tissue. 2. As understood by the French, a sudden and profuse expectoration of a fetid, purulent liquid. [Hardy, "Med. and Surg. Reporter," June 3, 1882, p. 589.]—**V. liquoris æterni**. An old term for mercury. [B. 59.]

**VOMICINE**, n.  $\text{Vo}^2\text{m}^2/\text{i}^2\text{s-en}$ . See **BRUCINE**.

**VOMI-PURGATIF** (Fr.), n.  $\text{Vo-me-pu}^2/\text{r-ga}^2\text{-tef}$ . See **EMETO-CATHARTIC**.

**VOMIQUE** (Fr.), n.  $\text{Vo-mek}$ . 1. See **VOMICA** (2d def.). 2. See **STRYCHNOS**.

**VOMIQUEUR** (Fr.), n.  $\text{Vo-me-ke-a}$ . See **STRYCHNOS**.

**VOMISSEMENT** (Fr.), n.  $\text{Vo-mes-ma}^2\text{n}^2$ . See **VOMIT** and **VOMITING**.—**V. de la grossesse**. See **MORNING SICKNESS**.—**V. de sang**. See **HÆMATEMESIS**.—**V. incoercible**. Uncontrollable vomiting. —**V. noir fébrile**. Black vomit due to malarial poisoning.—**V. simples de la grossesse**. The vomiting of pregnancy of a mild form. [A. 96.]

**VOMIT**, n.  $\text{Vo}^2\text{m}^2/\text{i}^2\text{t}$ . Gr., *ἔμετος*. Lat., *vomit*. Fr., *vomissement* (1st def.), *vomitif* (2d def.). Ger., *Erbrechen* (1st def.). 1.

Matter vomited. 2. An emetic.—**Bilious v.** V. stained by bile forced back into the stomach. [D.]—**Black v.** Lat., *melænemesis* (1st def.). 1. The vomiting of dark-colored matter. 2. The characteristic dark fluid ejected in yellow fever. It is produced by mixture of the blood with the contents of the stomach, changes of decomposition being added. It is of low sp. gr. (1'004 to 1'006), and is acid in reaction, though containing ammonia. The sediment is composed of coagulated albumin and the debris of blood-cells. [D. 1.]—**Bloody v.** V. of blood, or containing blood.—**Coffee-ground v.** V. consisting of disintegrated blood-clots mingled with the contents of the stomach. [D. 25.]—**Green v.** V. containing biliary matter. [a. 34.]—**White v.** The clear, pale, or opalescent acid fluid which is ejected in yellow fever at the beginning of the stage of acid elimination. [D. 1.]

**VOMITIF** (Fr.), adj. and n.  $\text{Vo-me-tef}$ . See **EMETIC**.—**V. central**. See **INDIRECT EMETIC**.—**V. périphérique**. See **DIRECT EMETIC**.

**VOMITINE**, n.  $\text{Vo}^2\text{m}^2/\text{i}^2\text{t-en}$ . See **EMETINE**.

**VOMITING**, n.  $\text{Vo}^2\text{m}^2/\text{i}^2\text{t-i}^2\text{n}^2$ . Gr., *ἔμετος, ἔμετος*. Lat., *vomit*, *vomitio*. Fr., *vomissement*. Ger., *Erbrechen*, *Vomiren*, *Brech-act*. The ejection from the mouth of matter regurgitated from the stomach. [D.]—**Dry v.** A popular term for persistent nausea with retching and straining, but with little or no actual ejection of more than gas from the stomach.—**Fæcal v.** See **STERCORACEOUS v.**—**Gastric v.** V. caused by some disturbance of the stomach. [a. 34.]—**Hysterical v.** V. which sometimes accompanies an attack of hysteria; said to be sometimes a complement of hysterical suppression of urine. [D. 35.]—**Pernicious v. of pregnancy**. See **VOMITUS GRAVIDARUM PERNICIOSUS**.—**Pregnancy-v.** See **V. of pregnancy**.—**Spasmodic v.** V. in which the ejection occurs spasmodically. [a. 34.]—**Stercoraceous v.** Lat., *copremesis*, *vomit*, *feculentus*. Fr., *vomissement fécaloïde*. The v. of fæcal matter or what appears to be such. It is usually of a dark-yellow color, sometimes brownish, and often mixed with greenish particles, the remains of food, mucus, and bile. Rarely it is due to a fistulous opening between the stomach and the colon; most frequently to a mechanical obstruction to the passage of fæces. [D. 25.]—**Sympathetic v.** 1. V. caused by derangement of the sympathetic nervous system. [a. 34.] 2. The v. with which a husband is sometimes affected in consequence of his wife's pregnancy.—**Uncontrollable v.** Fr., *vomissement incoercible*. Ger., *nicht zu stillendes Erbrechen*. V. that proves rebellious to treatment, as in some cases of the v. of pregnancy.—**V. of pregnancy**. Lat., *vomit* (seu *nausea*) *gravidarum*. Fr., *vomissement* (ou *nausées*) *des femmes enceintes*. V. occurring during pregnancy and due to disturbances of the sympathetic nervous system. [a. 34.]

**VOMITORY**, adj.  $\text{Vo}^2\text{m}^2/\text{i}^2\text{t-o-r}^2$ . Lat., *vomitarius* (from *vomere*, to vomit). Fr., *vomitore*. See **EMETIC**.

**VOMITURITION**, n.  $\text{Vo}^2\text{m}^2/\text{i}^2\text{t-u}^2\text{r-i}^2\text{shu}^2\text{n}$ . Lat., *vomituri-tio* (from *vomituri*, to desire to vomit). Fr., *v.* Ger., *V.*, *Brech-reiz*. 1. Retching, inclination to vomit. [D. 30.] 2. Vomiting of but little matter. 3. An incomplete regurgitation of the contents of the stomach. [L. 41, 57 (a. 14).]

**VOMITUS** (Lat.), n. m.  $\text{Vo}^2\text{m}(\text{wo}^2\text{m})/\text{i}^2\text{t-u}^2\text{s}(\text{u}^2\text{s})$ . Gen., *-vom-itus*. See **VOMIT** and **VOMITING**.—**V. æruginosus**. The vomiting of grass-green material. [L. 50 (a. 34).]—**V. atrabiliaris**. V. containing black bile. [a. 34.]—**V. bezoardicus**. Vomit produced by an emetic. [a. 34.]—**V. biliosus**. See **BILIOUS VOMIT**.—**V. callosus**. Tough viscid vomit. [a. 34.]—**V. crapulosus**. The vomiting of drunkards. [L. 57 (a. 14).]—**V. cruentus**. See **BLOODY VOMIT**.—**V. fæculentus**. See **STERCORACEOUS VOMITING**.—**V. gravidarum**. See **VOMITING OF PREGNANCY**.—**V. gravidarum perniciosus**. A term proposed by M. Horwitz for severe cases of the vomiting of pregnancy—those which prove intractable and which affect the general health. ["Med. Times," Apr. 12, 1884, p. 506.]—**V. lacteus**. Ger., *Milchbrechen*. Vomit containing milk. [a. 34.]—**V. marinus**. See **SEASICKNESS**.—**V. matutinus**. Morning vomiting, as of drunkards. [L. 57 (a. 14).]—**V. niger**. Ger., *Black vomit*.—**V. pituitosus**. See **BLENNEMESIS**.—**V. potatorum**. See **V. crapulosus**.—**V. prasinus**. See **GREEN VOMIT**.—**V. pulmonis**. See **HÆMOPTYSIS**.—**V. purulentus**. Ger., *Eiterbrechen*. The vomiting of pus. [L. 80.]—**V. urinosus**. Vomit of matter having the odor of urine. [a. 34.]—**V. verminosus**. Vomit containing worms. [a. 34.]

**VORACIOUS**, adj.  $\text{Vo}^2\text{-a'shu}^2\text{s}$ . Lat., *vorax* (from *vorare*, to eat greedily). Fr., *vorace*. Ger., *gefährsig*. Devouring much food, eating ravenously. [a. 48.]

**VORARMBEINMUSKEL** (Ger.), n.  $\text{For'a}^2\text{rm-bin-musk-e}^2\text{l}$ . See **PECTORALIS superficialis**.—**V. des Fessel-, Kron-, und Huf-beins**. See **CUBITO-PREPHALANGÆUS**.

**VORARMSCHIENBEINMUSKEL** (Ger.), n.  $\text{For'a}^2\text{rm-schen'-bin-musk-e}^2\text{l}$ . See **EXTENSOR metacarpi obliquus**.

**VORBAUUNG** (Ger.), n.  $\text{For'ba}^2\text{-u}^2\text{-un}^2$ . See **PROPHYLAXIS**.

**VORBERG** (Ger.), n.  $\text{For'be}^2\text{rg}$ . See **PROMONTORY**.—**V. des heiligen Beins**. See **PROMONTORY of the sacrum**.

**VORBEUGEND** (Ger.), adj.  $\text{For'boig-e}^2\text{nd}$ . See **PROPHYLACTIC**.

**VORBEUGER** (Ger.), n.  $\text{For'boig-e}^2\text{r}$ . See **PROMOTOR**.

**VORBEUGUNG** (Ger.), n.  $\text{For'boig-un}^2$ . 1. A bending. 2. Prevention. [a. 14.]—**V. smittel**. A preventive or preservative remedy. [a. 14.]

**VORBINDEND** (Ger.), adj.  $\text{For'bi}^2\text{nd-e}^2\text{nd}$ . See **AGGLUTINANT** (1st def.).

**VORBLÄTTER** (Ger.), n. pl.  $\text{For'blat-te}^2\text{r}$ . 1. Bracteoles; so called because they are the first leaves borne by the new axis. 2. Primordial leaves in germination. [a. 35.]

**VORBOTE** (Ger.), n.  $\text{For'bot-e}^2$ . A premonitory symptom.

**VORCAPILLAREN** (Ger.), n. pl.  $\text{Vor-ka}^2\text{p-el-la}^2\text{r-e}^2\text{n}$ . See **CAPILLAIRES de transition**.

**VORDERANSICHT** (Ger.), n. For'de²r-a³n-zich³t. See *NORMA frontalis*.

**VORDERARM** (Ger.), n. For'de²r-a³rm. The forearm.—**V'-beuger**. See *Biceps FLEXOR cubiti*.—**V'-binde**. See *Common carpal LIGAMENT*.

**VORDERDARM** (Ger.), n. For'de²r-da³rm. The prosgaster or foregut (q. v.). As used by some, the term does not include the stomach and duodenum. [Quain (H).]

**VORDERFLÄCHE** (Ger.), n. For'de²r-flach²-e². The anterior surface or face. [L, 31; a, 35.]

**VORDERFUSS** (Ger.), n. For'de²r-fus. See *FOREFOOT*.

**VORDERHALS** (Ger.), n. For'de²r-ha³ls. The forepart of the neck.

**VORDERHAND** (Ger.), n. For'de²r-ha³nd. See *CARPUS* (1st def.).

**VORDERHAUPT** (Ger.), n. For'de²r-ha³-upt. The forepart of the head; the forehead.—**V'bein**. See *Frontal BONE*.—**V's-breite**. See *Maximum frontal DIAMETER*.

**VORDERHIRN** (Ger.), n. For'de²r-herd. See *PROSENCEPHALON*.—**Primäres V.**, **Primitives V.** The primary prosencephalon. [I, 17 (K).]—**Secundäres V.** [Mihalkovics]. The portion of the prosencephalon that is situated in front of and above the ocular vesicle. [A, 8].—**V'bläschen**. The anterior cephalic vesicle. [I, 17 (K).]

**VORDERHORN** (Ger.), n. For'de²r-ho³rn. See *Anterior HORN of the lateral ventricle and Anterior gray CORNU*.

**VORDERKOPF** (Ger.), n. For'de²r-ko³pf. See *FOREHEAD and SINCIPUT*.

**VORDERLAPPEN** (Ger.), n. For'de²r-la³p-pe²n. See *Frontal LOBE*.

**VORDERSCHTELSTELLUNG** (Ger.), n. For'de²r-shit-e²l-ste²l-lun². That form of obliquity of the foetal head, during parturition, in which the forehead is situated in the axis of the pelvic canal. [A, 15.]

**VORFALL** (Ger.), n. For'fa³l. See *PROLAPSE* and cf. *VORLAGERUNG*.

**VORFUSS** (Ger.), n. For'fus. See *FOREFOOT*.

**VORGANG** (Ger.), n. For'ga³n². See *PROCESS* (1st def.).

**VORGEBIRGE** (Ger.), n. For'ge²-berg-e². See *PROMONTORY*.

**VORGEFALLENSEIN** (Ger.), n. For'ge²-fa³l-le³n-zin. See *under VORLAGERUNG*.

**VORHANG** (Ger.), n. For'ha³n². 1. A curtain. [A, 450 (a, 17).] 2. See *CORTINA*.—**Gaumen v'**. The soft palate.

**VORHAUT** (Ger.), n. For'ha³-ut. See *PREPUCE*.—**Kitzler v'**. See *PREPUCE clitoridis*.—**V'band**, **V'bändchen**. See *FRENUM GLANDIS*.—**V'entzündung**. See *ACROBYSTITIS*.—**V'geschwulst**. See *POSTRONCUS*.—**V'schmiere**. See *SMEGMA præputiale*.—**V'sperre**. See *PHIMOSIS*.—**V'stein**. See *PREPUTIAL CALCULUS*.—**V'talg**. See *SMEGMA præputii*.—**V'verengerung**. See *PHIMOSIS*.

**VORHERSAGUNG** (Ger.), n. For-he³r'za³g-un². See *PROGNOSIS*.

**VORHOF** (Ger.), n. For'ho³f. See *ATRIUM, AURICLE* (4th def.), and *VESTIBULE*.—**Gehörv'**. The vestibule of the ear. [L, 46 (a, 21).]—**V'fenster**. See *FENESTRA ovalis*.—**V'fgang**. See *SCALA vestibuli*.—**V'shaut**. See *MEMBRANA Reissneri*.—**V'skammerfurche**. See *Auriculo-ventricular GROOVE*.—**V'streppe**. See *SCALA vestibuli*.—**V'szwiebeln**. See *BULBI vestibuli vaginae*.

**VORHÜLLE** (Ger.), n. For'hu³l-le². See *PROCHORION* (2d def.).

**VORIMPFGUNG** (Ger.), n. For'impf-un². Preliminary inoculation. [a, 14.]

**VORKAMMER** (Ger.), n. For'ka³m-me²r. An auricle of the heart. [a, 48.]

**VORKEIM** (Ger.), n. For'kim. 1. The germ epithelium of the embryo. 2. See *PROEMBRYO* (2d def.).

**VORKIEMENDECKELSTÜCK** (Ger.), n. For'kem-e²n-de²k-e²l-stu²k. See *Pre-Opercular NOSE*.

**VORKOMMEN** (Ger.), n. For'ko³m-me²n. See *HABITAT*.

**VORKOPF** (Ger.), n. For'ko³pf. See *SINCIPUT* and *CAPUT succedaneum*.

**VORLAGERUNG** (Ger.), n. For'la³g-e²r-un². 1. See *ADVANCEMENT*. 2. In obstetrics, a presentation (the state of being the presenting part). To be distinguished from *Vorfall* and *Vorgefallen*. As concerns the foetal limbs and the umbilical cord, though V. is their being situated alongside the main presenting part, while it is only to their actual prolapse (escape into the vagina in advance of the main presenting part) that the terms *Vorfall* and *Vorgefallen* are applied. [A, 61].—**Muskelv'**. See *ADVANCEMENT* (1st def.).

**VORLÄUFER** (Ger.), n. For'loif-e²r. See *PRECURSOR* and *PRO-DROME*.

**VORLÄUFIG** (Ger.), adj. For'loif-ig. *Precursory*. [a, 14.]

**VORLEBER** (Ger.), n. For'lab-e²r. See *LEDERWULST*.

**VORLIEGEN** (Ger.), n. For'leg-e²n. See *PRESENTATION*.—**V. des Nabelstranges**, **V. des Nabelschnur**. See *FUNIS PRESENTATION*.

**VORMÄGEN** (Ger.), n. For'ma³g-e²n. See *INGLUVIES* (2d def.) and *Cardiac ANTRUM*.

**VORMAUER** (Ger.), n. For'ma³-u²-e²r. See *CLAUSTRUM*.

**VORNÄHUNG** (Ger.), n. For'na-un². See *ADVANCEMENT*.

**VORNIERE** (Ger.), n. For'ner-e². See *PRONEPHROS*.

**VORNÜBERGEBEUGT** (Ger.), adj. For'nü²b-e²r-ge²-boigt. Anteflexed.

**VORKAUM** (Ger.), n. For'ra³-u²m. An atrium. [a, 14.]

**VORSAAL** (Ger.), n. For'za³l. See *VESTIBULE*.

**VORSCHRIFT** (Ger.), n. For'shri²ft. See *PRESCRIPTION*.

**VORSPRINGEND** (Ger.), adj. For'spri²n²-e²nd. See *PROMINENT*.

**VORSPRUNG** (Ger.), n. For'sprun². See *PROMINENCE* (2d def.) and *PROTUBERANCE*.—**Darwin'scher V.** See *SPINE of Darwin*.—**Höckerähnlicher V.** See *MAMILLA*.

**VORSTEHER** (Ger.), n. For'sta-e²r. See *PROSTATE*.—**V'nd-rücker**. See *COMPRESSOR prostatae*.

**VORSTELLUNG** (Ger.), n. For'ste²l-lun². Representation, perception. [a, 14].—**V'svermögen**. The power of recognition, or of forming an ideal representation.—**Wahn v'**. See *HALLUCINATION*.

**VORSTOSS** (Ger.), n. For'sto²s. See *ADAPTER* and *PROPOLIS*.

**VORTEX** (Lat.), n. m. Vo²rt(wo²rt)-e²x. Gen., *vort'icis*. From *vertere*, to turn. Fr., *tourbillon*. Ger., *Wirbel*. A whirl; a structure having the appearance of being produced by some whirling or twisting motion. [a, 48].—**Vortices lentis**. See *RADI lentis*.—**V. of the heart**. The spiral concentration of muscle fibres at the apex of the heart; its whorl.

**VORTICELLA** (Lat.), n. f. Vo²rt(wo²rt)-i²s(i²k)-e²l'la³. From *vortex*, a whirl. The typical genus of the *Vorticellidae*, or bell-animalcules, which are a family of bell-shaped infusorians. [a, 48.]

**VORTICOSUS** (Lat.), adj. Vo²rt(wo²rt)-i²k-os'u²s(u²s). Shaped like a whorl or spiral. [a, 48.]

**VORVERDAUUNG** (Ger.), n. For'fe²r-da³-u²-un². See *Oral DIGESTION*.

**VORWACHS** (Ger.), n. For'va³ch²s. See *PROPOLIS*.

**VORWÄRTSBEUGER** (Ger.), **VORWÄRTSDREHER** (Ger.), n's. For'varts-boig-e²r, -dra-e²r. See *PRONATOR*.

**VORWÄRTSNEIGUNG** (Ger.), n. For'varts-nig-un². See *AN-TEVERSION*.

**VORWÄRTSWENDER** (Ger.), n. For'varts-ve²nd-e²r. See *PRONATOR*.—**Länglicher V.**, **Runder V.** See *PRONATOR teres*.—**Viereckiger V.** See *PRONATOR quadratus*.

**VORWÄRTSZIEHER** (Ger.), n. For'varts-tse-e²r. See *ATTRAHENS*.

**VORWASSER** (Ger.), n. For'va³-se²r. That portion of the liquor amnii which lies in advance of the presenting part of the foetus during labor.

**VORWEHEN** (Ger.), n. For'va-e²n. See *DOLORES præparantes*.

**VORZEICHEN** (Ger.), n. For'tsich²-e²n. See *PROGNOSTIC*, n.

**VORZEITIG** (Ger.), adj. For'tsit-ig. See *PREMATURE*.

**VORZIEHER** (Ger.), n. For'tse-e²r. See *ATTRAHENS*.

**VORZWICKEL** (Ger.), n. For'tsvi²k-e²l. See *PRÆCUNEUS*.

**VÖSLAU** (Ger.), n. A place in Lower Austria where there is a warm gaseous and sulphurous spring. [L, 49, 57 (a, 14).]

**VOSS** (Ger.), n. Fo³s. See *APHTHA*.

**VOSSURE** (Fr.), n. Vu-su²r. The curvature of a vault or similar cavity. [L, 41 (a, 14).]—**V. de la poitrine**. Dilatation of the thorax. [L, 41 (a, 14).]—**V. précordiale**. The bulging on the left side of the thorax observed in some heart diseases. [L, 41 (a, 14).]

**VOÛTE** (Fr.), n. Vut. See *FORNIX*.—**V. à quatre piliers**, **V. à trois piliers** [Winslow]. See *FORNIX cerebri*.—**V. du crâne**. See *VACUITY of the cranium*.—**V. médullaire**. See *CORPUS callosum*.—**V. palatine**. The palate (hard and soft). [a, 18.]

**VOÛTURE** (Fr.), n. Vu-tu²r. Fracture of the cranium with elevation of the fragments. [L, 41 (a, 14).]

**VOX** (Lat.), n. f. Vo²x(wox). Gen., *voc'is*. From *vocare*, to call. See *VOICE*.—**V. abscessa**. See *APHONIA* (1st def.).—**V. clandestina**. Whispering. [K, 16].—**V. falsa**. See *FALSETTO*.—**V. instans cantus galli**. A voice (or noise) like the crowing of a cock; of Home, the peculiar cry of croup. [D, 1.]

**VRILLE** (Fr.), n. Vrel-y². A tendril. [a, 35.]

**VRILLÉE** (Fr.), n. Vrel-y². See *CONVOLVULUS arvensis*.—**Grande v.** See *CONVOLVULUS sepium*.

**VUE** (Fr.), n. Vu². See *VISION*.—**V. basse**, **V. courte**. See *MYOPIA*.—**V. diurne**. See *HEMERALOPIA* (1st def.).—**V. longue**. See *PRESEBYOPIA*.—**V. louché**. See *STRABISMUS*.—**V. nocturne**. See *NYCTALOPIA*.—**V. oblique**. See *STRABISMUS*.—**V. prochaine**. See *MYOPIA*.—**V. pyroptique**. See *PHOTOPSIA*.—**V. trouble**. See *AMBLYOPIA*.

**VUEROMETER**, n. Vu²-e²r-o²m'e²t-u²r. An instrument for determining the distance of the eyes from each other. Smee's v. consists of two narrow horizontal cylinders movable along a graduated bar. The head of the person to be examined is so placed that one eye sees a distant object through one tube, and then the other tube is pushed forward until the same object seems to the other eye to be in the centre. The distance of the cylinder-axes from each other then corresponds to the distance of the visual lines of the eyes from each other. [Graefe u. Sæmisch (F).]

**VULCANITE**, n. Vu³l'k'n-it. From *Vulcanus*, the Roman fire-god. Hard rubber.

**VULCANIZATION**, n. Vu³l'k'n-i²z-a'shu²n. Fr., *vulcanisation*. 1. The process of heating caoutchouc with sulphur under pressure. The degree of hardness of the product is determined by

the height of the temperature. 2. Loosely, the subjecting of any organic body to a high heat for the purpose of increasing its resistance to decay, etc. [L.]

**VULCANÖL** (Ger.), n. Vulk-a<sup>2</sup>n-u<sup>1</sup>l. A heavy, dark-colored petroleum. [L, 57 (a, 14).]

**VULGAGO** (Lat.), n. f. Vu<sup>3</sup>l(g)wu<sup>4</sup>l(g)-ag(a<sup>2</sup>g)/o. Gen., -ag'inis. See ASARUM europæum.

**VULGARIS** (Lat.), adj. Vu<sup>3</sup>l(wu<sup>4</sup>l)-gar(ga<sup>2</sup>r)/i<sup>2</sup>s. From *vulgus*, the common people. Common. [a, 35.]

**VULNERABILITY**, n. Vu<sup>3</sup>l-ne<sup>2</sup>r-a<sup>2</sup>b-i<sup>2</sup>l/i<sup>2</sup>t-i<sup>2</sup>. From *vulnus*, a wound. Fr., *vulnerabilité*. Ger., *Vulnerabilität*. Susceptibility to hurt or to contagion. [L, 57 (a, 14).]

**VULNERARIUS** (Lat.), n. m. Vu<sup>3</sup>l(wu<sup>4</sup>l)-ne<sup>2</sup>r-a(a<sup>2</sup>)/ri<sup>2</sup>-u<sup>2</sup>s(u<sup>4</sup>s). From *vulnus*, a wound. Anciently, a surgeon.

**VULNERARY**, adj. Vu<sup>3</sup>l/ne<sup>2</sup>r-ar-i<sup>2</sup>. Lat., *vulnerarius* (1st def.), *agglutinans* (2d def.). Fr., *vulnéraire*. Ger., *Klebmittel* (2d def.), *Wundmittel* (2d def.). Traumatic; as a n., a remedy used to promote the healing of wounds. [E; a, 17.]

**VULNUS** (Lat.), n. n. Vu<sup>3</sup>l(wu<sup>4</sup>l)/nu<sup>2</sup>s(nu<sup>4</sup>s). Gen., *vul'neris*. Gr., τραῦμα. Fr., *blesure*. Ger., *Wunde*. A wound. [L, 290.]—**V. a scopetis**, **V. scopetarium**. A gunshot wound. [E.]—**V. simplex**. An incised wound. [E.]

**VULPES** (Lat.), n. f. Vu<sup>3</sup>l(p)wu<sup>4</sup>l(p)/ez(as). Gen., *vulp'is*. See CANIS v.—**Looch de pulmone vulpis**. Fr., *looch de poumons de renard*. An old preparation consisting of 1 part each of anise, fennel, licorice juice, *Adiantum pedatum*, and foxes' lungs, and 15 parts of clarified sugar. [L, 85.]—**Pulmones vulpis siccati**. The dried lungs of *Canis v.* [a, 35.]

**VULPIC ACID, VULPIN, VULPINIC ACID, VULPINE**, n's. Vu<sup>3</sup>l(p)/i<sup>2</sup>k, -i<sup>2</sup>n, vu<sup>3</sup>l(p)-i<sup>2</sup>n/i<sup>2</sup>2k, vu<sup>3</sup>l(p)/u<sup>2</sup>l-en. Fr., *acide vulpinique* (ou *vulpinique*), *vulpine*. Ger., *Vulpinsäure*, *Vulpin*. An acid, CH<sub>3</sub>C<sub>9</sub>H<sub>17</sub>O<sub>6</sub> = C<sub>10</sub>H<sub>18</sub>O<sub>6</sub>, obtained from *Parmelia parietina*, *Cetraria vulpina*, and other lichens. [B, 93 (a, 14).]

**VULSELLA** (Lat.), n. f. Vu<sup>3</sup>l(s)wu<sup>4</sup>l(s)-e<sup>2</sup>l/la<sup>2</sup>. See VORSELLA.

**VULTUEUX** (Fr.), **VULTUÖS** (Ger.), adj's. Vu<sup>3</sup>l-tu<sup>4</sup>-u<sup>4</sup>, fult-u-u<sup>4</sup>s'. Having the capillaries of the skin unusually congested (said of the face). [K.]

**VULTUS** (Lat.), n. m. Vu<sup>3</sup>l(t)wu<sup>4</sup>l(t)/u<sup>2</sup>s(u<sup>4</sup>s). Gen., *vult'us*. See FACE.

**VULVA** (Lat.), n. f. Vu<sup>3</sup>l(wu<sup>4</sup>l)/va<sup>2</sup>(wa<sup>2</sup>). From *volvere*, to roll. Fr., *vuive*. Ger., *düssere* (oder *weibliche*) *Scham* (1st def.). 1. The external genitals of the female, except the mons Veneris. The latter and the v. together constitute the pudendum. 2. Of Palfin, see ADITUS ad infundibulum.—**V. cerebri**. See V. (2d def.).—**V. conivens**. That form of the v. in which the labia majora are plump and closely approximated. [A, 22.]—**V. hians**. That form in which the labia majora are flaccid and gaping. [A, 22.]

**VULVAR**, adj. Vu<sup>3</sup>l/va<sup>2</sup>r. Fr., *vulvaire*. Ger., v. Pertaining to the vulva.

**VULVARIA** (Lat.), n. f. Vu<sup>3</sup>l(wu<sup>4</sup>l)-va(wa<sup>2</sup>)/ri<sup>2</sup>-a<sup>2</sup>. Fr., *vulvaire*. See CHENOPodium v.

**VULVISM**, n. Vu<sup>3</sup>l/v'i<sup>2</sup>z'm. Lat., *vulvismus* (from *vulva* [q. v.]). Fr., *vulvisme*. Of Martineau, see *Vulvar VAGINISMUS*.

**VULVITE** (Fr.), n. Vu<sup>3</sup>l/v-et. See VULVITIS.

**VULVITIS** (Lat.), n. f. Vu<sup>3</sup>l(wu<sup>4</sup>l)-vi(w'e)/ti<sup>2</sup>s. Gen., -vul'idis (-idis). From *vulva* (q. v.). Inflammation of the vulva. [L, 41, 50 (a, 14).]—**Diphtheritic v.** V. with a diphtheritic or diphtheroid deposit on the mucous membrane. [a, 34.]—**Follicular v.** Inflammation of the mucous follicles of the vulva. [a, 34.]—**Gangrenous v.** See *NOMA pudendi*.—**V. crouposa**. See *Diphtheritic v.*—**V. diabetica**. V. due to the diabetic cachexia. [a, 34.]—**V. diphtherica**. See *Diphtheritic v.*

**VULVO-UTÉRIN** (Fr.), adj. Vu<sup>3</sup>l-vo-u<sup>4</sup>-ta-ra<sup>2</sup>n<sup>2</sup>. Pertaining to the vulva and the uterus. [L, 41 (a, 14).]

**VULVO-VAGINAL**, adj. Vu<sup>3</sup>l/v'o-va<sup>2</sup>j/i<sup>2</sup>-n<sup>2</sup>l. Fr., v.-v. Pertaining to the vulva and the vagina. [L, 41 (a, 14).]

**VULVOVAGINITIS** (Lat.), n. f. Vu<sup>3</sup>l(wu<sup>4</sup>l)-vo(wo<sup>3</sup>)-va<sup>2</sup>j(wa<sup>2</sup>g)-i<sup>2</sup>n(en)-(e)/ti<sup>2</sup>s. Gen., -it'idis (-idis). Fr., *vulvo-vaginite*. Ger., *Schamcheidenentzündung*. Inflammation of the vulva and of the vagina.

## W

**WABAÏN** (Ger.), n. Wa<sup>3</sup>-ba<sup>3</sup>-en'. See OUABAIN.

**WABE** (Ger.), n. Va<sup>3</sup>b'e<sup>2</sup>. Honey, honeycomb. [L, 46 (a, 21).]—**W'nartig**. See FAVEOLATE and FAVOUS.

**WABIG** (Ger.), adj. Va<sup>3</sup>b'i<sup>2</sup>g. See FAVEOLATE and FAVOUS.

**WACHHOLDER** (Ger.), n. Va<sup>3</sup>ch<sup>2</sup>'hold-e<sup>2</sup>r. See JUNIPERUS (1st def.).—**Cedernw'**. See JUNIPERUS *oxycedrus*.—**Gemeiner W.**, **Krametsw'**. See JUNIPERUS *communis*.—**Stinkender W.** See JUNIPERUS *sabina*.—**W'beeren**. See JUNIPERUS (2d def.).—**W'beeröl**. See OIL of JUNIPER.—**W'braunwein**. See GIN.—**W'harz**. See SANDARAC and cf. JUNIPERIN.—**W'mus**. See *Extractum JUNIPERI*.—**W'öl**, **W'theer**. See OIL of CADE.—**Zedernw'**. The *Juniperus oxycedrus*. [L, 80.]

**WACHIRREN** (Ger.), n. Va<sup>3</sup>ch<sup>2</sup>'er-re<sup>2</sup>n. See METAMORPHOSIA.

**WACHS** (Ger.), n. Va<sup>3</sup>ch<sup>2</sup>s. See WAX.—**Bienenw'**. See *Bees' WAX*.—**Fettw'**. See ADIPOCERE.—**Korkw'**. See CERIN (2d def.).—**Leichenw'**. See ADIPOCERE.—**Pflanzenw'**. See *Vegetable WAX*.—**W'ählich**, **W'artig**. See CERACEOUS.—**W'bildnerel**. See CEROPLASTY.—**W'haut**. See CERE.—**W'kerze**. See CEREOUS (2d def.).—**W'kropf**. See AMYLOID GOITRE.—**W'öl**. See *Oleum CERÆ*.—**W'papier**. See CHARTA *cerata*.—**W'pflaster**, **W'salbe**. See CERATUM (2d def.).—**W'schwamm**. See SPONGIA *cerata*.—**W'stock**. See BOUGIE.

**WACHSBEULE** (Ger.), n. Va<sup>3</sup>ch<sup>2</sup>'s-boil-e<sup>2</sup>. Swelling of the lymphatic glands in adolescents. [L, 30 (a, 14).]

**WACHSTHUM** (Ger.), n. Va<sup>3</sup>ch<sup>2</sup>'s-tum. See GROWTH (1st def.) and INCREMENT.—**W'skrankheit**. A disease of growth, morbid growth. [E.]

**WACHSUCHT** (Ger.), n. Va<sup>3</sup>ch<sup>2</sup>'zuch<sup>2</sup>t. See INSOMNIA.

**WADDING**, n. Wo<sup>3</sup>d'i<sup>2</sup>n<sup>2</sup>. Fr., *ouate*. Ger., *Watte*. Carded cotton in sheets. [E.]—**W.-bearer**. Ger., *Wattenträger*. Of Hassenstein, a forceps for holding a firmly rolled, lengthy pad of w. The branches are held together by a movable ring. [F, 32.]

**WADE** (Ger.), n. Va<sup>3</sup>d'e<sup>2</sup>. The calf of the leg. [a, 48.]—**W'nbauch**. See W.

**WADENBEIN** (Ger.), n. Va<sup>3</sup>d'e<sup>2</sup>n-bach. See FIBULA.—**W'-beuger**. See Biceps FLEXOR *cruris*.

**WADENBEINMUSKEL** (Ger.), n. Va<sup>3</sup>d'e<sup>2</sup>n-bin-musk-e<sup>2</sup>l. See PERONEUS, n.—**Dritter W.** See PERONEUS *tertius*.—**Erster W.** See PERONEUS *longus*.—**Kurzer W.** See PERONEUS *brevis*.—**Langer W.** See PERONEUS *longus* and PERONEUS-PRÆPHALANGUS.—**Zweiter W.** See PERONEUS *brevis*.

**WADENMUSKEL** (Ger.), n. Va<sup>3</sup>d'e<sup>2</sup>n-musk-e<sup>2</sup>l. See GASTRONEMIUS, TRICEPS *suræ*, and BIFEMORO-CALCANEUS.—**Aeusserer zweiköpfiger W.** See GASTRONEMIUS.—**Dreiköpfiger W.** See TRICEPS *suræ*.—**Dritter W.** See TIBIO-PRÆMETATARSEUS.—**Grosser W.** See SOLEUS.—**Langer W.** See PLANTARIS.—**Zweiköpfiger W.**, **Zwillingsw'**. See GASTRONEMIUS.

**WAFER**, n. Waf'u<sup>2</sup>r. Fr., *cachet*. Ger., *Oblate*. A small sheet of gelatinous material which becomes flexible when it is moistened,

in which state it is wrapped around a dose of medicine and swallowed.

**WAFFEN** (Ger.), n. pl. Va<sup>3</sup>f'/fe<sup>2</sup>n. See ARMA.

**WAGE** (Ger.), n. Va<sup>3</sup>g'e<sup>2</sup>. See BALANCE (1st def.).—**Äërostatische W.** See MANOMETER (1st def.).—**Drehw'**. See *Torsion BALANCE*.—**Kinderw'**. See BAROMACROMETER.—**Römische W.** See STEELYARD.

**WAGERECHT** (Ger.), adj. Va<sup>3</sup>g'e<sup>2</sup>-re<sup>2</sup>ch<sup>2</sup>t. Horizontal.

**WAHAHE**, n. See HARTIGHESEA *spectabilis*.

**WAHLENBERGIA** (Lat.), n. f. Va<sup>3</sup>l-e<sup>2</sup>n-be<sup>2</sup>rg/i<sup>2</sup>-a<sup>2</sup>. From *Wahlenberg*, a Swedish botanist. Fr., *wahlenbergie*. A genus of campanulaceous plants. The *Wahlenbergieæ* are a tribe of the *Campanulaceæ*. [a, 35.]—**W. graminifolia**. A South European species. The leaves and flowers have been used for epilepsy. [a, 35.]—**W. linaroides**. A South American species used for flatulence. [a, 35.]

**WÄHLEND** (Ger.), adj. Val'e<sup>2</sup>nd. See ELECTIVE.

**WAHLMITTEL** (Ger.), n. Va<sup>3</sup>l'mi<sup>2</sup>t-e<sup>2</sup>l. A remedy having an elective or specific action. [L, 57 (a, 14).]

**WAHLVERWANDTSCHAFT** (Ger.), n. Va<sup>3</sup>l'/fe<sup>2</sup>r-va<sup>2</sup>nt-sha<sup>2</sup>ft. See ELECTIVE AFFINITY.

**WAHN** (Ger.), n. Va<sup>3</sup>n. See ILLUSION and DELIRIUM.—**Fieberw'**. See *Febrile DELIRIUM*.—**Höhenw'**. *Delirium grandiosum*. [a, 34.]—**Kleinheitsw'**. *Micromania*. [a, 34.]—**W'muth**. See WAHNSINN.

**WAHNSINN** (Ger.), n. Va<sup>3</sup>n'zi<sup>2</sup>n. Insanity, frenzy, dementia; or of Snell, delusional monomania. [D, 36.] See also MONOMANIA.—**Allgemeiner W.** See *Acute MANIA*.—**Fieberhafter W.** *Febrile delirium*. [a, 34.]—**Fixer W.** *Partial mania*. [L, 80.]—**Fluchtw'**. See DRAPETOMANIA.—**Gefangenew'**. Insanity consequent upon isolation. [a, 34.]—**Gemüthsw'**. *Moral insanity*. [a, 34.]—**Grössenw'**. See *DELIRIUM grandiosum*.—**Liebesw'**. See EROTOMANIA.—**Lustiger W.** See CHERAPHROSYNE.—**Muthloser W.** See DEMENTIA.—**Querulantenw'**. See *Querulous MONOMANIA*.—**Rastloser W.** See MELANCHOLIA *errabunda*.—**Religiöser W.** See *Religious MONOMANIA*.—**Säuferw'**. See *Alcoholic MANIA*.—**Stiller W.** See PARAPHROSYNE.—**Unruhiger W.** See HYDROLEROS and MELANCHOLIA *errabunda*.—**Verbrecherw'**. See *Moral INSANITY*.—**Verbreiteter W.** Of Flemming, general insanity. [a, 34.]—**Verfolgungsw'**. See *DÉLIRE des persécutions*.—**Verlebter W.** See *AMOROUS MELANCHOLIA*.—**W. bei Kindbetterinnen**. See *Puerperal INSANITY*.—**W'ig**. Mad, insane, delirious, demented.—**Zitterw'**. See *DELIRIUM tremens*.

**WAHNSUCHT** (Ger.), n. Va<sup>3</sup>n'zuch<sup>2</sup>t. Insanity. [a, 34.]

**WAHNWITZ** (Ger.), n. Va<sup>3</sup>n'vi<sup>2</sup>ts. See DELIRIUM.

**WAHOO**, n. Wa<sup>3</sup>-hu'. See EUNYMUS *atropurpureus*.

**WAHRKNORPEL** (Ger.), n. Va<sup>3</sup>r'knorp-e<sup>2</sup>l. See *Hyaline CARTILAGE*.

**WAID** (Ger.), n. Va<sup>3</sup>i<sup>2</sup>d. See ISATIS and ISATIS *tinctoria*.—**W'farbig**. Bluish. [L, 80.]

**WAIST**, n. Wast. The narrowest portion of the trunk above the innominate bones; loosely, the trunk between the axillae and the hips. [L.]

**WAIZEN** (Ger.), n.  $Va^3/2ts-e^2n$ . See WEIZEN.

**WAKE-ROBIN**, n.  $Wak'ro^2b-i^2n$ . The *Arum maculatum*, *Arisaema atrorubens*, *Trillium cernuum*, and *Trillium grandiflorum*; also the genera *Anthurium* and *Philodendron*. [a, 35.]

**WALAI**, n. In Fiji, the *Entada scandens* used as an oxytocic. ["Glasgow Med. Jour.," Jan., 1889, p. 1 (a, 50).]

**WALDFARN** (Ger.), n.  $Va^3ld/fa^2rn$ . See ASPIDIUM filix mas.

**WALDMEISTER** (Ger.), n.  $Va^3ld/mist-e^2r$ . The genus *Asperula*. [a, 35.]—**Gemeiner W.** See ASPERULA odorata.—**Hügelw'.** See ASPERULA cynanchica.—**Wohlrriechender W.** See ASPERULA odorata.

**WALDMENSCH** (Ger.), n.  $Va^3ld/me^2nsh$ . A person affected with hypertrichosis universalis. [L, 57 (a, 50).]

**WALDREBE** (Ger.), n.  $Va^3ld/rab-e^2$ . See CLEMATIS (1st def.).—**Gemeine W.** See CLEMATIS vitalba.

**WALDSTATT** (Ger.), n.  $Va^3ld/sta^2t$ . A place in the canton of Appenzel, Switzerland, where there is an alkaline spring. [a, 14.]

**WALDSTROH** (Ger.), n.  $Va^3ld/stro$ . See GALIUM.

**WALDWOLLE** (Ger.), n.  $Va^3ld/vol-le^2$ . See FIR-WOOL.

**WALDWOLLÖL** (Ger.), n.  $Va^3ld/vol-u^6l$ . See PINE-needle oil.

**WALE**, n. Wal. See VIBEX and WHEAL.

**WALFISCH** (Ger.), n.  $Va^3l/fi^2sh$ . See BALÆNA.—**Flossw'.** See BALÆNOPTERA.—**Gemeiner W., Grönländischer W., Nordischer W.** See BALÆNA mysticetus.—**Schnabelw'.** See BALÆNOPTERA rostrata.—**Wohr.** See LAPIS manati.—**W'schnen.** Sinews of the whale; used for surgical sutures. [L, 57 (a, 14).]—**W'thran.** See OLEUM BALÆNÆ.

**WALIDA**, n. See Holarhena antidiysenterica.

**WALKERA** (Lat.), n. f.  $Wak'e^2r-a^3$ . From Walker, founder of the Botanic Garden at Cambridge. Fr., *walkère*. A genus of the *Ochnaceae*, not now recognized. [a, 35.]—**W. serrata, W. zeylonensis.** Fr., *walkère dentellée*. A tree found in tropical Asia. The roots and leaves are tonic and stomachic. [a, 35.]

**WALL**, n.  $Wa^4l$ . Ger., *reixos*. Lat., *paries*. Fr., *paroi*. Ger., *Wand*. W. An inclosing or limiting structure. [a, 17.]—**Germinal w. (of the yolk).** Ger., *Keimwall*. That portion of the formative substance of the yolk that forms a ring-like thickening around the germinal disc.—**Kelmw' (Ger.).** See the major list.—**Parietal w. (of the blastoderm).** The outer or upper composite sheet of the blastoderm, made up of the epiblast and the outer layer of the mesoblast. [A, 5.]—**Periotic w.** The w. of the otic vesicle.—**Somatic w. of the blastoderm.** See *Parietal w.*—**Splanchnic (or visceral) w. of the blastoderm.** The inner layer of the blastoderm, made up of the hypoblast and the inner layer of the mesoblast. [A, 5.]—**W. of an abscess.** Ger., *Abzesswandung*. The living tissue, infiltrated with dead leucocytes, fluid intercellular substance, living cells, and other exudation products, that forms the boundary of an abscess. [a, 34.]—**W. of the nail.** That portion of the fold of the nail which projects over the nail. [G.]

**WALLABA**, n. See EPERUA falcata.

**WALLACHEN** (Ger.), n.  $Va^3l/ach^2e^2n$ . See BISTOURNAGE.

**WALL-EYE**, n.  $Wa^4li$ . 1. Achromia of the iris. 2. Leucoma.

**WALL-EYED**, adj.  $Wa^4lid$ . Having wall-eyes. [a, 34.]

**WALLFISCH** (Ger.), n.  $Va^3l/fi^2sh$ . See BALÆNA.

**WALLFLOWER**, n.  $Wa^4l/fu^2-u^4-r$ . See CHEIRANTHUS cheiri.

**WALLNUSS** (Ger.), n.  $Va^3l/nus$ . See JUGLANS (1st def.) and JUGLANS regia. In the pl., *Wallnüsse*, the fruits of *Juglans regia*. [a, 35.]—**Grüne W'schalen.** See *Cortex nucum JUGLANS*.—**Landw'öl.** See KECUNA-OIL and cf. ALEUTITES triloba.—**W'blütter.** See *Folia JUGLANS*.—**W'öl.** See WALNUT-OIL.

**WALLRATH** (Ger.), n.  $Va^3l/ra^2t$ . See SPERMACETI.

**WALLUNG** (Ger.), n.  $Va^3l/un^2$ . 1. Ebullition, undulation. [A, 460 (a, 17).] 2. Active congestion. [D.]—**Blutw'.** See ORGASM (1st def.).—**W'sblutfülle.** Congestion due to emotional excitement (as of the ovary during the venereal orgasm).—**W'sfleck.** A spot of erythematous redness. [G.]

**WALLWORT**, n.  $Wa^4l/wu^2rt$ . See *PARIETARIA officinalis* (1st def.). *Sedum acre*, *SAMBUCUS ebulus*, and *COTYLEDON umbilicus*.

**WALNUT**, n.  $Wa^4l/nut^2$ . Ger., *Walnuss*. The *Juglans regia* (or its fruit) and other species of *Juglans*. [a, 35.]—**American w.** See *JUGLANS nigra*.—**Belgaum w.** See *ALEUTITES triloba*.—**Deoction of w. rinds.** See *Decoctum drupæ JUGLANS regia*.—**European w.** See *JUGLANS regia*.—**Indian w.** See *ALEUTITES triloba*.—**Rob of w's.** See *Rob nucum*.—**Spanish w.-oil.** See KECUNA-OIL.—**W. fruit.** The fruit of *Juglans regia*. [a, 35.]—**W.-leaves.** See *Folia JUGLANS*.—**W.-oil.** *Oleum juglandis* (see under *JUGLANS regia*).—**White w.** See *JUGLANS cinerea*.

**WALONER** (Ger.), n. pl.  $Va^3l-on^2en$ . See VALENTIA.

**WALPURGSKRAUT** (Ger.), n.  $Va^3l-purg^2ts-kra^2t-u^4t$ . See *Botrychium lunaria*.

**WALRATH** (Ger.), n.  $Va^3l/ra^2t$ . See SPERMACETI.—**W'cerat.** See *Ceratum CETACEI*.—**W'kalbe.** See *Unguentum CETACEI*.

**WÄLSCHKORN** (Ger.), n.  $Va^3sh/ko^2rn$ . See MAIZE.

**WALSURA** (Lat.), n. f.  $Wa^3ls-ur^2a^3$ . Fr., *walsure*. A genus of meliceous trees. [a, 35.]—**W. pascidia.** East Indian fish-poison plant. The bark contains a narcotic principle. [a, 35.]

**WALTHERIA** (Lat.), n. f.  $Va^3l-th^2er^2a^3$ . From Walther, a German forester. Fr., *waltherie*. Ger., *Waltherie*. A genus of

the *Malvaceæ*. [a, 35.]—**W. americana, W. arborescens.** A tropical American species having mucilaginous flowers and leaves. It is used as a febrifuge and antisyphilitic. [a, 35.]—**W. douradina.** A mucilaginous South American undershrub; used as a pectoral and vulnerary. [a, 35.]—**W. glomerata.** A Panama species. The leaves are vulnerary. [a, 35.]—**W. indica.** See *W. americana*.

**WALTHIERE** (Ger.), n.  $Va^3l/ter-e^2$ . See CETOMORPHA.

**WALZE** (Ger.), n.  $Va^3lts/e^2$ . See CYLINDER (1st def.).

**WALZENKRAUT** (Ger.), n.  $Va^3lts/e^2n-kra^2t-u^4t$ . See LOTUS corniculatus.

**WALZIG** (Ger.), adj.  $Va^3lts/i^2g$ . See CYLINDRICAL.

**WAMBLE**, n.  $Wa^4m/b^4l$ . See NAUSEA (2d def.).

**WAN**, adj.  $Wa^4n$ . Having a pale or sickly color.

**WAND** (Ger.), n.  $Va^3nd$ . See WALL.—**Scheidew'.** See the major list.

**WANDELBAR** (Ger.), adj.  $Va^3nd/e^2l-ba^2r$ . See AMBULATORY.

**WANDERKÖRPER** (Ger.), n. pl.  $Va^3nd/e^2r-ku^2rp-e^2r$ . See Wandering CELLS.

**WANDFLÄCHE** (Ger.), n.  $Va^3nd/flach^2e^2$ . The surface of a wall. [a, 14.]—**Freie W.** [Reichert]. The free surface of the ovum within the uterus. [A, 8.]

**WANDKNOCHEN** (Ger.), n.  $Va^3nd/kno^2ch^2e^2n$ . See Parietal BONE.

**WANDNAHT** (Ger.), n.  $Va^3nd/na^2t$ . See Sagittal SUTURE.

**WANDSTROM** (Ger.), n.  $Va^3nd/stro^2m$ . See Sluggish LAYER.

**WANDUNG** (Ger.), n.  $Va^3nd/un^2$ . See WALL.—**W'sstrom.** See Sluggish LAYER.

**WANGE** (Ger.), n.  $Va^3n^2/e^2$ . See CHEEK.—**W'nblutung.** See GNATHORRHAGIA.—**W'nbrand.** See Gangrenous STOMATITIS.—**W'nrentzündung.** See GNATHITIS.

**WANGENFORTSATZ** (Ger.), n.  $Va^3n^2/e^2n-fort-za^2ts$ . See Zygomatic APOPHYSIS.—**W'ntidfurche.** The lower orbito-palpebral sulcus. [K.]—**W'nscnürchen.** See TRISMUS nematorum.—**W'nstellung.** See Cheek PRESENTATION.—**W'nzug.** See GNATHOGRAMMA.

**WANGENMUSKEL** (Ger.), n.  $Va^3n^2/e^2n-musk-e^2l$ . 1. Any muscle of the cheek. [a, 32.] 2. See ALVEOLO-LABIALIS.—**Acusfer W.** See LACRIMO-LABIALIS.

**WANNE** (Ger.), n.  $Va^3n/ne^2$ . A large tub, especially a bathing tub. [a, 14.]—**Pneumatische W.** A tub inclosing the body, all but the head, the contained air being either rarefied or condensed, to facilitate respiration. [L, 57 (a, 14).] Cf. *Pneumatic CABINET*.

**WANST** (Ger.), n.  $Va^3nst$ . See RUMEN.

**WANZE** (Ger.), n.  $Va^3nts/e^2$ . See ACANTHIA 1ectularia.—**W'nkraut.** See CHENOPodium vulvaria, CIMICIFUGA (1st def.), GERANIUM robertianum, and LEDUM palustre.

**WARBLE**, n.  $Wa^4r/b^4l$ . A name given to the pimples of acne in the horse. [a, 34.]

**WARE**, n.  $Wa^4r$ . Any one of various seaweeds. [a, 35.]—**Sea-w.** See *Fucus vesiculosus*.

**WARENCE**, n.  $Wa^4r/e^2ns$ . An old name for madder. [a, 35.]

**WARMBRUNN** (Ger.), n.  $Va^3rm^2/brun$ . A place in Prussian Silesia where there are hot alkaline, saline, and sulphurous springs. [L, 30, 37, 49, 57 (a, 14).]

**WÄRME** (Ger.), n.  $Va^3rm/e^2$ . See HEAT (1st def.).—**Eigen-thümliche W.** See Specific HEAT.—**Eigenw'.** The temperature peculiar to any species of animal. It is nearly constant in warm-blooded animals, and about 1° C. higher than the surrounding medium in cold-blooded animals. [J, 54.] Cf. *Animal HEAT*.—**Gebundene W.** See Latent HEAT.—**Körperw'.** The temperature of the body.—**Lebensw'.** See Animal HEAT.—**Spezifische W.** See Specific HEAT.—**Strahlende W.** See Radiant HEAT.—**Thierische W.** See Animal HEAT.—**Verbindungsw'.** See HEAT of combination.—**Verdampfungsw'.** See Latent HEAT of vaporization.—**Wahrnehmbare W.** See Sensible HEAT.—**W'abgabe.** The giving off of heat. [K.]—**W'bildung.** See CALORIFICATION.—**W'erzeugung.** See CALORICITY.—**W'färbung.** See THERMOCOLORIS.—**W'leitung.** The conduction of heat.—**W'messer.** See CALORIMETER.—**W'starre.** Rigidity due to heat. [K.]—**W'stoff.** See CALORIC, n.

**WARM SPRINGS**, n. pl.  $Wa^4rm$ . 1. A place near Little Owen's Lake, San Bernardino County, California, where there is a hot alkaline and saline spring. 2. A place in Meriwether County, Georgia, where there are hot gaseous, alkaline, and chalybeate springs. 3. A place in Madison County, North Carolina, where there are hot gaseous, saline, and sulphurous springs. 4. A place in Bath County, Virginia, where there are hot gaseous, alkaline, chalybeate, and sulphurous springs. [Anderson (a, 14).]

**WARNAS**, n. See ACETUM philosophicum.

**WARNEMÜNDE** (Ger.), n.  $Va^3rn^2/e^2-mu^2nd-e^2$ . A sea-bathing resort in Mecklenburg-Schwerin, Germany. [L, 40, 57 (a, 14).]

**WARNER'S RANCH SPRINGS**, n.  $Wa^4rn^2/u^4r-z-ran^2ch^2$ . A place in San Diego County, California, where there are hot sulphurous and saline springs. [Anderson (a, 14).]

**WART**, n.  $Wa^4rt$ . A.-S., *warto*. Ger., *Warze*. See VERRUCA.—**Fig-w.** A condyloma, especially condyloma acuminatum. [G.] See also FICUS (1st def.).—**Neerogenie w's.** See VERRUCA neerogenica.—**Soot-w.** See Chimney-sweeper's CANCER.—**Veneraal w.** See CONDYLOMA acuminatum.

**WARTED**, adj.  $Wa^4rt^2/e^2d$ . See VERRUCOSE.

**WARTEPERSONAL** (Ger.), n.  $Va^4rt^2/e^2-pe^2r-zon-a^2l$ . The personnel of a hospital ward, including the nurses, servants, etc.

**WÄRTER** (Ger.), **WÄRTERIN** (Ger.), n's. Vart/e²r, -e²r-i²n. See **NURSE** (2d def.).

**WARTWEED, WARTWORT**, n's. Wa²rt/wed, -wu²rt. See **EUPHORBIA helioscopia**, **EUPHORBIA pepulus**, **SENEBIERA coronopus**, **CHELIDonium majus**, and **GNAPHALium uliginosum**.

**WARTY**, adj. Wa²rt/i². See **VERRUCOSE**.

**WÄRZCHEN** (Ger.), n. Varts/ch²e²n. See **VERRUCULA**.—**Fadenförmige W.** See **Filiform PAPILLE**.—**Fleischw'.** See **CARCUNCLE** (4th def.).—**Gefässw'.** A vascular papilla. [A, 521].—**Gefühlw'.** See **Tactile CORPUSCLES** (1st def.).—**Geschmackw'.** See **Gustatory PAPILLE** and **Taste-buds**.—**Hautw'.** See **PAPILLE cutis**.—**Nervenw'.** See **Nerve PAPILLE**.—**Nierenw'.** See **PAPILLE renales**.—**Scheidenklappenw'.** See **CARCUNCLE myrtiformes**.—**Schwammartige W.** See **Fungiform PAPILLE**.—**Tastw'.** See **Tactile CORPUSCLES** (1st def.) and **Nerve PAPILLE**.—**Thränenw'.** See **Lacrimal CARUNCLE** and **Lacrimal PAPILLE**.—**Umwallte Zungenw'.** **Wallförmige W.** See **Circumvallate PAPILLE**.—**W'bildung.** See **GRANULATION** (1st def.).

**WARZE** (Ger.), n. Va²rts/e². See **VERRUCA** and **NIPPLE**.—**Fleischw'.** See **CARCUNCLE** (4th def.).—**Geschmacksw'n.** See **Gustatory PAPILLE**.—**Grindw'.** See **CONDYLOMA latum**.—**Haarw'.** 1. A hairy mole. 2. A hair papilla. [a, 29].—**Hautw'.** See **VERRUCA**.—**Keimw'.** See **CARCUNCLE** (2d def.).—**Lagerw'.** See **PHYMA**.—**Molluscumw'.** See **MOLLUSCUM contagiosum**.—**Nervenw'n.** See **Nerve PAPILLE**.—**Nierenw'n.** See **PAPILLE renales**.—**Saitenw'.** See **ACROCHORDON**.—**Saugw'.** See **HAUSTORIUM**.—**Sebumw'.** 1. Of Hebra, see **VERRUCA follicularis**. 2. See **MOLLUSCUM contagiosum**.—**Thränenw'.** See **Lacrimal CARUNCLE**.—**Thymianw'.** See **Thymus GLAND**.—**W'nbreite.** See **Bimastoid DIAMETER**.—**W'ngeschwulst.** A warty growth. [E].—**W'ngewebe.** Tissue found in the various forms of papillae. [J].—**W'nhof.** See **AREOLA of the nipple**.—**W'nüttchen.** See **NIPPLE SHIELD**.—**W'nkörper.** See **CORPUS albicans** (2d def.).—**W'nkrebs.** See **CANCEROIDE**.—**W'nipil.** See **THELEPHORA** (2d def.).—**W'ntheil.** See **Mastoid PROCESS of the temporal bone**.—**W'nzelenzugang.** See **Mastoid APERTURE**.

**WARZIG** (Ger.), adj. Va²rts/i²g. Verrucose; papillary; clavate. [G.]

**WÄSCHE** (Ger.), n. Vash/e². See **LAVAGE**.

**WASCHMITTEL** (Ger.), n. Va²sh/mi²t-te²l. See **LOTION**.

**WASCHUNG** (Ger.), n. Va²sh/un². See **LAVAGE** and **LOTION**.

**WASH**, n. Wa²sh. See **LOTION**.—**Black (mercurial) w.** See **Lotio HYDRARGYRI nigra**.—**Yellow w.** See **Lotio HYDRARGYRI flava**.

**WASIUM** (Lat.), n. n. Waz(va²s/i²-u²m(u²m). Fr., w. The name given by Bahr to a supposed new metal, now known to be thorium. [B, 3.]

**WASP**, n. Wa²sp. See **VESPA**.

**WASSER** (Ger.), n. Va²s/se²r. See **WATER** and cf. **AQUA**.—**Abgezogenes W.** **Aetherisches W.** Water impregnated with a volatile oil. [B].—**Blutw'.** See **Blood SERUM**.—**Bretfelder W.** A perfume made of 300 parts of cologne, 50 of rose-water, and 1 part of tincture of ambra moschata. [Bernatzik (A, 319).]—**Conrad's Augenw'.** See **Collyrium ex HYDRARGYRO muriatico corrosivo**.—**Farbloses phagedänisches W.** See **AQUA phagedænica decolorata**.—**Fliessw'.** See **LYMPH** (1st def.).—**Fruchtw', Geburtsw'.** See **Liquor AMNII**.—**Gehirnw'.** See **Cerebro-spinal FLUID**.—**Ge-hörw'.** See **PERILYMPH**.—**Geistig-aromatisches W.** See **AQUA aromatica spiritiosa**.—**Gelbes phagedänisches W.** See **AQUA phagedænica lutea**.—**Gllederw', Gliedw'.** See **SYNOVIA**.—**Grauw'.** See **AQUA grisea**.—**Hauptw'.** Aromatic water. **WASSERBRUCH** (Ger.), n. Va²s/se²r-bruch². See **HYDROCELE**.—**Aechter W.** See **HYDROSCHEOCLE**.—**Fleischw'.** See **HYDROSARCOCELE**.—**Hodensackw'.** See **HYDROSCHEOCLE**.—**Netz w'.** See **HYDREPILOCLE**.—**Rückenmarksw'.** See **HYDRORRHACHIS**.—**W. des Halses.** See **Cystic GOITRE**.

**WÄSSERIG** (Ger.), adj. Vas/se²r-i²g. Watery, aqueous. [L, 31.]

**WASSERKOPF** (Ger.), n. Va²s/se²r-ko²pf. See **HYDROCEPHALUS** and **Chronic HYDROCEPHALUS**.—**Hitziger W.** See **Tubercular MENINGITIS**.

**WASSERSPRENGEN** (Ger.), n. Va²s/se²r-spre²n²-e²n. Rupture of the foetal envelopes.

**WASSERSTOFF** (Ger.), n. Va²s/se²r-sto²f. See **HYDROGEN**. In composition, following the name of a substance and forming one word with the same, the hydride of that substance.—**Kohlenw'.** See the major list.—**Naphitylw'.** See **NAPHTHALENE**.—**W'blau-säure.** See **HYDROCYANIC acid**.—**W'bromid.** See **HYDROBROMIC acid**.—**W'dioxyd, W'hyperoxyd, W'superoxyd.** See **HYDROGEN peroxide**.

**WASSERSUCHT** (Ger.), n. Va²s/se²r-zuch²t. See **DROPSY**.—**Aeusserer Bauchw'.** See **HYDREPIGASTRIUM**.—**Augenw'.** See **HYDROPHthALMIA**.—**Bauchw'.** See **ASCITES**.—**Eierstockw'.** See **Ovarian CYSTOMA**.—**Ellerterw'.** See **HYDROSALPINX**.—**Entzündliche Bauchfellw'.** See **HYDROPERITONITIS**.—**Entzündliche Brustfellw'.** See **HYDROPLEURITIS**.—**Entzündliche Gallenblasenw'.** See **HYDROCHOLECYSTITIS**.—**Entzündliche Herzbeutelw'.** See **HYDROPERICARDITIS**.—**Entzündliche Hirnw'.** See **HYDROENCEPHALITIS**.—**Entzündliche W.** See **Inflammatory DROPSY**.—**Gliederw', Gliedw'.** See **HYDARTHROSIS**.—**Herzw'.** See **Cardiac DROPSY**.—**Hirnhautw'.** See **HYDROMENINGX**.—**Lungenw'.** See **Pulmonary oedema**.—**Magenw'.** See **ASCITES**.—**Netz w'.** See **Omental DROPSY**.—**Offene Rückgratsw'.** See **Spina bifida**.—**Paukenhöhlenw'.** See **HYDROMYRINGA** (2d def.).—**Rippenfellw'.** See **HYDROTHORAX**.—**Rückgratsw'.** See **HYDRORRHACHIS**.—**Sackw'.** See **Falsæ dropsy**.

**WASSERSÜCHTIG** (Ger.), adj. Va²s/se²r-zu²ch²t-i²g. See **DROPSICAL**.

**WÄSSERUNG** (Ger.), n. Vas/se²r-un². Irrigation, maceration.

**WASTING**, n. Wast/i²n². A familiar term for tuberculosis in cattle. [A, 34.]

**WATER**, n. Wa²t/u²r. Gr., ὕδωρ. Lat., aqua. Fr., eau. Ger., Wasser. It., acqua. Sp., agua. 1. A transparent, colorless liquid, H₂O, devoid of odor or taste and neutral in reaction. It is found everywhere in nature, constituting, in the form of seas, rivers, lakes, and springs, about three quarters of the earth's surface, forming also one of the constant constituents of the atmosphere, in which it appears under the forms of invisible aqueous vapor, mist, clouds, rain, hail, and snow; and, lastly, constituting the important element of all animal and vegetable fluids and entering into the composition of every one of the liquid and solid animal and vegetable tissues. As occurring in nature, w. is never perfectly pure, but contains solid, liquid, or gaseous admixtures, either suspended or dissolved. Hence different varieties of w. are recognized and named according to their source or their contained constituents (river-water, sea-water, lake-water, spring-water, rain-water, hard water, soft water, mineral-water, chalybeate water, sulphurous water, etc.). Pure w. may be obtained by distillation. It freezes at 0° C. (32° F.) to form ice, and boils at 100° C. (212° F.), forming invisible aqueous vapor. Steam is aqueous vapor associated with particles of liquid water in a very fine state of subdivision. Above the temperature of 4° C. water expands on heating and contracts on cooling; below that temperature the reverse is the case. Hence water at 4° C. occupies a minimum amount of space and consequently possesses its maximum degree of density. As w. is taken as a standard of density for solids and liquids, its sp. gr. is reckoned, at the temperature of maximum density, or 4° C., as 1. W. is a poor conductor of heat. It possesses very great solvent powers, dissolving a large number of solid, liquid, and gaseous substances. Aqueous solutions of non-volatile solids are usually called simply solutions (Lat., *liquores*); solutions of liquids are designated as *dilutions*, and solutions of gases or of volatile substances are called *waters* (Lat., *aque*). Partial aqueous solutions of many substances are also employed in pharmacy, and are prepared by boiling or steeping vegetable substances in w. (*infusions, decoctions*). In certain crystalline compounds w. appears to enter into a weak chemical combination with salts (*w. of crystallization*), and its presence appears to define and maintain the crystalline form. A similar weak chemical combination perhaps takes place in the formation of an aqueous solution (see **CRYOHYDRATE**). 2. In pharmacy, a solution of a gas, a solid, or a liquid in w. [B]. See also **WATERS**. 3. A familiar term for urine.—**Aerated w.**

Ger. *Aërat.* W. containing air or other gas in solution. [B.]—**Antinephritic w. of Larnandès.** A solution of 23 parts of zinc sulphate and 2 of copper sulphate in 975 of w. [*"Med. News,"* Apr. 8, 1882 (B).]—**Black mercurial w.** See *LOTIO HYDRARGYRI NIGRA*. [a, 48.]—**Black w.** A disease of cattle, characterized by the emission of red, chocolate-colored, or black urine containing albumin and broken-down blood-corpuscles. [a, 34.]—**Camphorated w.** See *AQUA CAMPHORE*.—**Carbonated w., Carbonic-acid w.** See *AQUA ACIDI CARBONICI*.—**Carrara w.** W. containing calcium carbonate held in solution by an excess of carbonic acid. [L, 41, 77 (a, 14).]—**Chalybeate w's.** W's holding salts of iron in solution. [a, 48.]—**Chlorine w.** See *AQUA CHLORI*.—**Chloroformed w.** See *AQUA CHLOROFORMI*.—**Cologne w.** See *SPIRITUS odoratus*.—**Cosmetic w.** See *AQUA cosmetica*.—**Distilled w.** W. freed from its impurities by distillation. [B.]—**Effervescent alkaline w.** See *Liquor sodæ effervescens* and *Eau alcaline gazeuse*.—**Extemporaneous Sedlitz w.** See *AQUA sedlitzensis*.—**Eye-w.** See *COLLYRIUM*.—**Ferruginous w's.** Ger. *Eisenwässer*. See *Chalybeate w's*.—**Forge-w.** See *AQUA fabrorum*.—**Gaseous alkaline w.** See *Eau alcaline gazeuse*.—**Goulard's w.** See *Liquor PLUMBI SUBACETATIS DILUTUS*.—**Ground w.** See *Subsoil w.*—**Hard w.** W. containing in solution salts of calcium or magnesium. Such w. requires more soap than ordinary w. to make a lather, because the fatty acid of the soap forms an insoluble compound with calcium and magnesium, and the salts of these metals must first be decomposed before a permanent lather is formed. [B, 3.]—**Hell w.** See *AQUA infernalis*.—**Ice-w.** Fr. *eau de glace, eau de neige*. W. obtained wholly or in part from the melting of ice or made cold by the addition of ice.—**Javelle w.** Lat. *kali hypochlorosolum solum* [Russ. Ph.], *liquor kali chlorati*. Fr. *eau de Javelle*. Ger. *Chlorkalkflüssigkeit*. An aqueous solution of hypochlorite of potassium, used for bleaching purposes. [B.]—**Marmala w.** A perfume distilled in Ceylon from the flowers of *Eyle marmelos*; said to be alexipharmac. [a, 35.]—**Mineral w's.** Fr. *eaux minérales*. W's having a special effect upon the system in virtue of salts or similar substances contained in them to such an amount as to give them a characteristic taste. [B, 5 (a, 38).]—**Morphinated w.** A saturated (0.04-per-cent.) watery solution of morphine, by frequent and long-continued agitation. [*"Proc. of the Am. Pharm. Assoc.,"* xxv (a, 14).]—**Natural w.** W. as it occurs in nature. [B.]—**Nitrous-oxide w.** See *Searle's patent oxygenous aerated w.*—**Oxygenated w., Oxygenized w.** See *HYDROGEN peroxide*.—**Red w.** See *Black w.*—**River w.** W. obtained from rivers. [B.]—**Saline purgative w.** See *AQUA sedlitzensis*.—**Searle's patent oxygenous aerated w.** Fr. *eau azotée*. A remedy consisting of nitrogen monoxide dissolved in water. [B, 5.]—**Sea w.** The salt w. of the ocean and the great seas communicating with it. It contains from 33 to 36 parts in a thousand of solid ingredients, of which over 30 parts are made up of various chlorides (sodium chloride from 26 to 27 parts, magnesium chloride 3 parts, and potassium chloride 1 part). The sulphates form the next largest constituent, comprising 3 to 4 parts in a thousand (magnesium sulphate forming 2 parts, and calcium sulphate 1 part). [B, 3.]—**Soft w.** W. which readily forms a lather with soap. [B.]—**Spring w.** Fr. *eau de fontaine*. W. derived from springs. It is often prescribed in medicines.—**Subsoil w.** A sheet of w. found below the surface of the soil, at depths that vary with the character and situation of the ground.—**Sulphurated w.** See *Eau sulfurée*.—**Vegeto-mineral w. of Goulard.** Lat. *aqua vegeto-mineralis* [Fr. Cod.]. A preparation corresponding nearly to the *liquor plumbi subacetatis dilutus* of the U. S. Ph., but usually containing a small amount either of alcohol or of an alcoholic solution of a drug. It is sometimes designated *spirituous vegeto-mineral w.* [B, 10.]—**W-brash.** See *Pyrosis*.—**W. closet.** Fr. *garderobe, cabinet d'aisance, latrine*. Ger. *Abtritt*. A closet containing a stool for defecation, the discharges being carried off by a current of water. [a, 48.]—**W-cure.** Ger. *Wasserkur*. See *HYDROTHERAPY*.—**W. in the head.** See *HYDROCEPHALUS*.—**W-jog.** A provincial term for varicella. [G.]—**W. of carbonated soda.** See *Liquor sodæ effervescens*.—**W. of Cotunnium.** See *PERILYMPH*.—**W. of crystallization.** Fr. *eau de combination*. W. which is associated with another substance in a state of molecular combination and in definite proportions, and is essential to the preservation of the crystalline form of that substance. The proportion of w. of crystallization increases as the temperature is lowered, and is reduced as the temperature is elevated; and by exposure to a temperature of 100° C. or to a vacuum all the w. of crystallization may be removed, when the substance immediately loses its crystalline form. In chemical formulae, the w. of crystallization is designated by appending the symbol for water, (H<sub>2</sub>O), with the intervention either of a comma or a sign of addition, to the formula of the anhydrous salt. Thus, Na<sub>2</sub>SO<sub>4</sub>·10H<sub>2</sub>O, or Na<sub>2</sub>SO<sub>4</sub>·10H<sub>2</sub>O, denotes sodium sulphate containing ten molecules of w. of crystallization. [B.]—**W. of the labyrinth.** See *PERILYMPH*.—**W. on the brain.** See *HYDROCEPHALUS*.—**W. on the chest.** See *HYDROTHORAX*.—**W. pang.** W. quaim. See *Pyrosis*.—**W. pox.** Ger. *Wasserpocken*. See *VARICELLA*.—**W-stiffening.** See *WASSEINSTÄUFE*.

**WATERS,** n., pl. of water (q. v.). Wa't'urz. Fr. *eaux*. See *Liquor AMNII*.—**Bag of w.** See *AMNION* (1st def.).—**Breaking of the w.** Lat. *aquarium effractus*. Ger. *Abfluss des Fruchtwassers*. The rupture of the fetal envelopes at the time of parturition.—**False w.** Fr. *fausses eaux*. 1. The liquid sometimes found between the chorion and the amnion at an advanced stage of gestation. [A, 43.] 2. The liquid discharged from the uterus in cases of hydrothorax gravidarum. [A, 15.]

**WATER-VASCULAR,** adj. Wa't'ur-va'sk'u'ul-a's'ur. Vascular and carrying watery contents.

**WATERY,** adj. Wa't'ur-i'z. See *AQUEOUS*.

**WATT,** n. Wo't. The unit of electrical energy. [a, 48.]

**WATTE** (Ger.), n. Va't'te. See *WADDING*.—**W-nträger.** See *WADDING-bearer*.—**W-verband.** A padded bandage. [E.]

**WATTENWEILER** (Ger.), n. Va't'te-n-vil-e'r. A place in Alsace-Lorraine, where there is a gaseous, chalybeate, and sulphurous spring. [L, 30, 49 (a, 14).]

**WATTLE,** n. Wo't'tl. In Australia and California, the *Acacia decurrens* and other astringent species of *Acacia*. [a, 35.]—**Black w.** See *ACACIA decurrens* and *ACACIA mollissima*.

**WATTWILLER** (Fr.), n. Va't-vel-ya. See *WATTENWEILER*.

**WAVE,** n. Wav. Gr. *κύμα*. Lat. *unda*. Fr. *onde*. Ger. *Welle*. A ridge-like elevation (accompanied by a corresponding depression) of the surface of a fluid which advances while the particles of the fluid have little or no onward motion; hence a cycle of rhythmical alternating movement. [a, 48.]—**Contraction w.** Fr. *onde musculaire*. 1. The w.-like progression of the contraction from the point of stimulation in a muscle. The length of the w. is 200 to 350 millimetres in striated muscle, and consequently greater than the length of the fibres, so that normally a whole fibre is in contraction at once. The rapidity with which the w. travels is in a living man 10 to 13 metres a second, but is much slower in cold-blooded animals (3 to 4 metres in the frog). [J, 19, 55, 57.] 2. The graphic representation of a contracting muscle. [K.]—**Dicrotic w.** A pulse-w. showing dicrotism (q. v.), due to low tension and extensibility of the vessel-walls. It is regarded as an oscillation w. (q. v.). [K, 3.]—**Expansion-w.** See *PULSE* (1st def.).—**Fixed w. of contraction of voluntary-muscle tissue.** One or more swellings which appear on a dead muscle-fibre (as prepared for the microscope), where the remainder of the fibre is stretched, giving the idea that when the fibril contracted from one end to the other it would produce a w. of contraction. [C.]—**Negative w.** A w. of blood which moves toward the heart during the auricular systole; used as synonymous with "negative pressure," to which expression it is preferable. [K, 13.]—**Oscillation w.** A secondary pulse-w. due to inertia of the vessel-walls. [K, 3.]—**Percussion w.** A vibration produced by the act of percussing. [D.]—**Predicrotic w.** A slight rise in the pulse-w. which precedes the dicrotic rise. [K.]—**Pulse-w.** The w. of blood proceeding throughout the arterial system from the root of the aorta. The velocity is 9.24 metres a second, and it is propagated more slowly in arteries with soft, extensible walls than in arteries having resistant and thick walls. [Landois (a, 34).]—**Recoil w.** See *Dicrotic w.*—**Reflected w.** In physiological physics, a w. which travels along a closed tube, and, meeting with an obstruction, is reflected back to its origin. [K.]—**Respiratory w.** An oscillation in the blood-pressure curve, rising during inspiration and falling during expiration in consequence of the variations of intra-thoracic pressure during respiration. [a, 24.]—**Stationary flexion w's.** Oscillations of all the particles of an elastic vibrating body, so that all of them are always in the same phase of a vibrating tuning fork or plucked string. The small parts of the auditory apparatus oscillate in stationary flexion w's. [Landois (a, 34).]—**Stimulus-w.** Ger. *Reizwelle*. The contraction-w. which passes along a muscle as the result of a stimulus applied at a certain point. [Gruenhagen (K).]—**Tricrotic w.** A third w., in addition to the tidal and dicrotic w's, occurring during pulse, and giving the impression of a triple-striking pulse. [Walsh (a, 34).]—**True tidal w.** [Mahomed]. That portion of a sphygmographic tracing which is sometimes seen between its apex and its aortic notch: supposed to correspond to the onward passage of the blood resulting from the ventricular systole. [D, 68.]

**WAVED, WAVY,** adj's. Wav'd, wav'iz. Wave-like, undulate, repand. [a, 35.]

**WAX,** n. Wa'x. Gr. *κνός*. Lat. *cera*. Fr. *cire*. Ger. *Wachs*. A softish, plastic concrete substance, consisting essentially of various compounds of the higher acids of the fatty-acid series, especially myricylic and cerotic acids. [B.]—**Andaques w.** The w. of a peculiar species of bee found near the Orinoco and Amazon rivers. [B, 2.]—**Bee-w., Bees' w.** Fr. *cire d'abeille* [Fr. Cod.]. A yellowish or brownish concrete substance deposited by the honey-bee in the honeycomb. It dissolves in boiling alcohol and sparingly in ether, and melts at 63° C. It consists essentially of myricin, cerotic acid, and ceteolin. When bleached, it forms the *cera alba* of the U. S. Ph. [B.]—**Brazil w.** See *CARNAUBA-w.*—**Butter of w.** A strongly smelling, buttery substance left behind on freezing w. of its acid principle by distillation. [B, 86.]—**Carnauba-w., Ceara w.** See *CARNAUBA-w.*—**China w., Chinese (insect) w.** A hard, white, crystalline substance, consisting chiefly of ceryl cerate, used in China and Japan medicinally and for making candles. It is the purified product of an insect (*Coccus ceriferus*), which deposits it on the twigs of *Fraxinus chinensis*. It melts at 82° to 86° C. [B, 4 (a, 35).]—**Ear-w.** See *CERUMEN*.—**Earth w., Fossil w.** See *OKERITE*.—**Grave-w.** See *ADIPICERE*.—**Ibota w.** A white insect w. deposited on *Liquiritia ibota*. [a, 35.]—**Indian vegetable w.** See *GETAHLAHOE*.—**Insect w.** Any w. deposited by insects. [a, 35.]—**Japanese w., Japan w.** A hard, waxy fat, derived from the stone-fruits of several species of *Rhus*, consisting chiefly of palmitin. It occurs in commerce in hard, yellowish cakes or large, rectangular blocks covered with a fine white efflorescence, and is used like beesw'. [a, 35.]—**Mineral w.** See *CERESIN* and *CIRE minérale*.—**Myrica w., Myrtle w.** Ger. *Myrtencwachs, Myricacwachs*. Myrtle-berry w. the bayberry tallow of commerce; a hard, green, or grayish-yellow substance of resinous smell, obtained from various species of *Myrica*. It is more brittle than beesw', is somewhat bitter, and is readily saponifiable with the alkalis. It varies somewhat in composition. It is used with beesw' for candles, and by the Hottentots as food. [B, 5, 77, 185 (a, 35); B, 270 (a, 38).]—**Ocuba w.** A fatty substance (sometimes confounded with myrtle w.) obtained from the fruits of *Myristica ocuba*; used like beesw'. [a, 35.]—**Oil of w.** See *OLEUM CERÆ*.—**Ointment of w.** See *UNGUENTUM CERÆ*.—**Paraffin w.** See *PARAFFIN* (1st def.).—**Pulverulent w.** See *CERA amygdala*.—**Vegetable insect w.** See *Chinese w.*—**Vegetable w.** Lat. *phytoceasium*. Fr. *cire végétale*. Ger. *Pflanzenwachs*. A w. or waxy substance of vegetable origin,

especially myrtle w. It occurs (in the form of coherent layers, or crowded, vertical rods, or rounded or acicular grains) as excretions on the cuticularized epidermis of many plants to protect them from moisture and to check excessive evaporation, and is sometimes so abundant as to furnish a commercial product. [a, 35.]—**Wberry.** See MYRICA.—**W. plaster.** See SPARADRAP *de cire* and CERATUM (2d def.).—**W-tree.** In China and Japan, the *Ligustrum lucidum*; in Japan, also the *Rhus succedanea* and other species of *Rhus*; in Brazil, the *Vismia brasiliensis*; in Guiana, the *Vismia guianensis*; in New Granada, the *Elaeagia utilis*. [a, 35.]—**White w.** See CERA *alba*.—**Yellow w.** Lat., *cera flava*. Fr., *cire jaune* [Fr. Cod.]. Sp., *cera* [Sp. Ph.]. Beesw' as obtained from the comb without purification. [B.]

**WAXY**, adj. Wa<sup>2</sup>x<sup>12</sup>. Gr., κήρυκος. Lat., *cereus*. Fr., *cireux*. Ger., *wachsartig*. Of the nature of or having the appearance of wax. [a, 48.]

**WAY**, n. Wa. Gr., δῶς. Lat., *via*. Fr., *voie*. Ger., *Weg*. 1. A road or path. 2. A manner or method. [a, 48.]—**Dry w.** Lat., *via siccā*. Fr., *voie sèche*. In chemistry, the employment of heat for liquefaction (see also ANALYSIS in the dry w.). [B, 38 (a, 14).]—**Wet w.** Lat., *via humidā*. Fr., *voie humide*. In chemistry, the employment of liquid solvents (see also ANALYSIS in the wet w.). [B, 38 (a, 14).]

**WAYLAND SPRINGS**, n. Wa'l'nd. A place in Lawrence County, Tennessee, where there is a saline and chalybeate spring.

**WEAKNESS**, n. Wek'ne's. Gr., ἀσθένεια. Lat., *infirmitas*. Fr., *infirmité*. Ger., *Schwachheit*. A condition in which there is a lack of physical or mental force. It may be simply the result of over-exertion and fatigue, without any attendant pathological condition, or it may be an accompaniment of an acute or a chronic disease. [D.]—**Cerebro-acoustical w.** [Goltz]. The temporary loss of hearing resulting from destruction of the auditory area in the cortex cerebri. [Landois (K).]—**Cerebro-optical w.** [Goltz]. A temporary loss of vision due to lesions of the visual area in the cortex cerebri. [Landois (K).]—**Inward w.** A popular term for leucorrhœa.

**WEANING**, n. Wen'i'2n. Gr., ἀπογαλακτισμός. Lat., *ablactatio*. Fr., *sevrage*. Ger., *Entwöhnung*. The discontinuation of the supply of mother's milk to a child. [a, 48.]

**WEANLING**, n. Wen'i'2n. A child or animal newly weaned.

**WEB**, n. We'b. Gr., ιστός. Lat., *tela*. 1. A fabric produced by weaving. [a, 48.] 2. The vane of a feather on either side of the rachis. 3. The membrane connecting the toes of some animals. [L, 341 (a, 27).]—**Mucous w.** See RETE *mucosum*.—**Spider's w.** See COWEB.

**WEBBED**, adj. We'bd. Of digits, connected by a web or membrane. [a, 48.]

**WEBER**, n. Vab'e'r. See AMPÈRE.

**WEBERA** (Lat.), n. f. Vab'e'r-a. Fr., *wébère*. 1. A genus of the Rubiaceæ. 2. A genus of mosses; of some authors, a section of the genus *Bryum*.—**W. corymbosa.** An East Indian shrub. [a, 35.]—**W. tetrandra.** An East Indian shrub. The leaves and root are used as an astringent, the root also as an anthelmintic, the bark and young shoots as an antidyenteric. [a, 35.]

**WEB-EYE**, n. We'b'i. An old term for caligo and leucoma.

**WECHSEL** (Ger.), n. Ve'ch'2s'e'l. See CONVERSION and MUTATION.—**Hautöffnungsw'.** See METAPOROEIA (1st def.).—**Krankheitsw'.** 1. The crisis of a disease. 2. See METASTASIS (1st def.).—**W'jahre der Frau.** See MENOPAUSE.

**WECHSELFIEBER** (Ger.), n. Ve'ch'2s'e'l-feb-e'r. See INTERMITTENT FEVER.—**Quotidian fever.**—**Bösartiges W.** See Pernicious malarial fever.—**Doppeltes W.** See Double (intermittent) fever.—**Dreitägiges W.** See Tertian fever.—**Schwarzgallichtes W.** See Atribiliary fever.—**Viertägiges W.** See Quartan fever.

**WEDEL** (Ger.), n. Vad'e'l. See FROND (1st def.).

**WEDELIA** (Lat.), n. f. Vad'e'l'i-a. Fr., *wédellie*. A genus of the Wedeliæ, which are a division of the Helianthæ. [a, 35.]—**W. calendulacea.** An East Indian herb. The aromatic leaves, seeds, and flowers are used as a deobstruent and discutient. The juice of the plant is an ingredient in *amritakalpa rasa*. [a, 35.]

**WEDGE**, n. We'dj. Gr., σφήν, σφηνός, σφηνικός. Lat., *cuneus*. Fr., *coin*. Ger., *Keil*. 1. A solid block two of the opposite sides of which slope to a narrow edge. [a, 48.] 2. A piece of soft rubber to be inserted between two teeth to force them apart.

**WEED**, n. Wed. 1. A troublesome, useless, or unsightly plant. [a, 35.] 2. See WEID.—**Bitter-w.** See AMBROSIA *artemisiifolia*.—**Emetic w.** See LOBELIA *inflata*.—**White w.** See CHRYSANTHEMUM *leucanthemum*, ACHILLEA *ptarmica*, and ANTHRISCUS *silvestris*.—**Yellow-w.** See RESEDA *futeola*.

**WEG** (Ger.), n. Vag. 1. A way. 2. A passage, a duct. [a, 14.]—**Gallenw'e.** See Bile-ducts.—**Lymphw'.** A lymphatic channel or vessel. [a, 18.]—**W'dorn.** See RHAMNUS.—**W'weiser.** See GORGET (1st def.).

**WEGERICH** (Ger.), **WEGERIC** (Ger.), n's. Vag'e'r-i-2ch<sup>2</sup>, -i<sup>2</sup>g. See PLANTAGO.

**WEGFALLEN** (Ger.), n. Vag'fa'l-le'n. See INTERCISIO.

**WEGHUSTEN** (Ger.), v. tr. Vag'hust-e'n. To cough up. [A, 450 (a, 17).]

**WEGLEITEND** (Ger.), adj. Vag'lit-e'nd. See EFFERENT.

**WEGNAHME** (Ger.), n. Vag'na'm-e. See ABLATION (1st def.).

**WEGSCHNEIDEN** (Ger.), **WEGSCHNEIDUNG** (Ger.), n's. Vag'shnd-e'n, -un<sup>2</sup>. See ABSCISSION.

**WEGWARTE** (Ger.), n. Vag'va'rt-e. The genus *Cichorium*.

**WEH** (Ger.), n. Va. Pain, suffering; in the pl., *W'en*, labor-pains. [a, 14.] See also DOLOR.—**Abspringende W'en.** See METASTATIC LABOR.—**Blutige W'en.** See DOLORES *sanguinolenti*.—**Falsche W'en.** See FALSA PAINS.—**Gebärw'en, Geburtsw'en.** See EXPULSIVE PAINS.—**Gichtisches Halsw'.** See TRACHELAGRA.—**Hüftgelenkw', Hüftw'.** See COXALGIA.—**Knochenw'en.** See DOLORES *osteocopi*.—**Krampf'w'en.** Spasmodic labor-pains.—**Nachgeburtsw'en, Nachw'en.** See AFTER-PAINS.—**Treibw'en.** See EXPULSIVE PAINS.—**Vorhersegende W'en, Weissagende W'en.** The premonitory pains of labor.—**W'ader.** A varix due to pregnancy. [L, 135 (a, 14).]—**W'enartig.** Resembling labor-pains.—**W'ennerregend.** See OXYTOCIC.—**W'enlosigkeit.** A morbid cessation of the pains of labor after the escape of the liquor amnii; uterine inertia. It differs from *W'enpause* (2d def.) in not being due to the natural distention of the uterus by the unruptured ovum, but to some pathological cause, like exhaustion (*Erschöpfung*).—**W'enpause.** 1. The ordinary interval between labor-pains. 2. A cessation of the pains for a considerable length of time. [A, 61.] See also *W'enlosigkeit*.—**W'enschmerz.** The pain of a uterine contraction.—**W'enthätigkeit.** The character of the labor-pains as regards efficiency.—**W'enversetzung.** See METASTATIC LABOR.—**W'enverstärkung.** An increase in the force of the labor-pains.—**W'frau, W'mutter.** See MIDWIFE.—**Wilde W'en.** See FALSA PAINS.

**WEHENSCHWÄCHE** (Ger.), n. Va'e'n-shwach<sup>2</sup>e. Weakness of the labor-pains.—**Primäre W.** That form in which the weakness of the pains is observed from the first. [A, 20.]—**Secundäre W.** That form in which the inefficiency comes on after labor has progressed to some degree. [A, 20.]

**WEHNE** (Ger.), n. Van'e. See WEN.

**WEIB** (Ger.), n. Vib. A woman. [A, 521 (a, 21).]—**W'erzeit.** See MENSTRUAL PERIOD.—**W'lich.** See FEMALE, GYNÆCEOUS, and PISTILLATE.

**WEICHE** (Ger.), n. Vich<sup>2</sup>e. 1. The side, the flank, the groin. [A, 450 (a, 17).] Cf. LAPAR. 2. See LINT.—**Rippenw'.** See HYPOCHONDRIC REGION.—**W'after.** An artificial anus in the inguinal region. [L, 30 (a, 14).]—**W'band.** See GIMBERNAT'S LIGAMENT.—**W'nbruch.** See INGUINAL HERNIA.

**WEICHHAARIG** (Ger.), adj. Vich<sup>2</sup>ha'r-i<sup>2</sup>g. See PUBESCENT.

**WEICHAUT** (Ger.), n. Vich<sup>2</sup>ha<sup>2</sup>-u't. See PIA.

**WEICHLIBIGKEIT** (Ger.), n. Vich<sup>2</sup>lib-i<sup>2</sup>g-kit. Looseness of the bowels. [a, 14.]

**WEICHLICH** (Ger.), adj. Vich<sup>2</sup>li<sup>2</sup>ch. Tender, delicate, effeminate. [a, 14.]

**WEICHPARAFFIN** (Ger.), n. Vich<sup>2</sup>pa'r-a<sup>2</sup>f-fen'. See PETROLATUM.

**WEICHSELZOPF** (Ger.), n. Vich<sup>2</sup>s'e'l-tso<sup>2</sup>pf. See PLICA *polonica*.

**WEICHSPITZE** (Ger.), n. Vich<sup>2</sup>spi'ts-e. See MUCRO.

**WEICHSTACHELIG** (Ger.), adj. Vich<sup>2</sup>sta'ch<sup>2</sup>e-l-i<sup>2</sup>g. See MURICATE.

**WEICHWERDEN** (Ger.), n. Vich<sup>2</sup>ve'rd-e'n. Softening.

**WEID**, n. Wed. Written, also, *weerd*. In Scotland, acute mammary inflammation. [a, 48.]

**WEIDE** (Ger.), n. Vid'e. See SALIX (1st def.).—**Fieberw'.** See SALIX *pentandra* and SALIX *fragilis*.

**WEIDERICH** (Ger.), n. Vid'e'r-i<sup>2</sup>ch<sup>2</sup>. See EPILOBIUM and LYTHRUM.

**WEIGHT**, n. Wat. Gr., σταθμός. Lat., *pondus*. Fr., *poids*. Ger., *Gewicht*. 1. That property of matter (due to the force of gravitation) in virtue of which it tends to fall downward. 2. The amount of such tendency to downward motion. 3. A system of related units or denominations for the measurement of the w. of bodies; a table of w. [a, 48.]—**Atomic w.** The w. of an atom of an elementary substance compared with that of hydrogen as unity. [B.]—**Curve of w.** A graphic representation of the different w's of the human body at different ages. [H. P. Bowditch, "Ann. Rep. of State Bd. of Health of Mass.," 1877 (K).]—**Molecular w.** Fr., *poids moléculaire*. Ger., *Molekulargewicht*. The w. of a molecule of a substance as compared with that of an atom of hydrogen. In the case of most elementary bodies this is double the atomic w., since one elementary molecule usually contains two atoms; and, since a molecule of a gas, simple or compound, occupied two volumes, the molecular w. of the gas is double the sp. gr. of the gas referred to that of hydrogen as unity. [B.]

**WEIHRACH** (Ger.), n. Vi'tra<sup>2</sup>-u'ch<sup>2</sup>. See OLIBANUM.—**Gemeiner W.** See OLIBANUM *in sortis* and OLIBANUM *silvestre* (1st def.).—**W'baum.** The *Boswellia Carteri* and some other species of *Boswellia*. [a, 35.]—**W'rinde.** The bark of *Liquidambar orientale*. [B, 108 (a, 14).]

**WEILBACH** (Ger.), n. Vil'ba'ch<sup>2</sup>. A place in Hesse-Nassau where there are sulphurous and alkaline and also gaseous chalybeate and saline springs. [L, 30, 37, 49, 57 (a, 14).]

**WEIN** (Ger.), n. Vin. See WINE.—**Franzbranntw'.** See SPIRITUS VINI *gallici*.—**Gliederw'.** Antiarthritic wine. [L, 46 (a, 21).]—**Glühw'.** See AROMATITES, n.—**Liqueurw'e.** Wines containing 15 to 20 per cent. of alcohol. They include sherry, Malaga, Tokay, port, and the Greek, Italian, and Spanish wines in general. [B, 270 (a, 38).]—**Wähnlich, W'artig.** Vinous.—**W'auszug.** See CENOLATURE.—**W'beere.** A grape.—**W'blatter.** See ROSA-CRA.—**W'blumensäure.** See CENANTHIC acid.—**W'essig.** Wine vinegar. [B.]—**W'geist.** See ETHYL ALCOHOL.—**W'meth.** See CENOMEL.—**W'molken.** See CENOGALA.—**W'öl.** See CENALÉON.—**W'ranken.** Grape-vine tendrils (*pampini vitis*). See under VITIS *vinifera*.—**W'schweifelsäure.** Sulphovinic acid. [A, 324.]

**WEINKRAMPF** (Ger.), n. Vin'kra'mpf. A paroxysm of weeping. [D. 66.]

**WEINSAURE** (Ger.), n. Vin'zoi'r-e<sup>2</sup>. Tartaric acid. [B.]—**Brenzliche W.** Pyrotartaric acid. [A. 324.]—**Lösliches W'anhydrid.** Tartaric acid. [A. 324.]—**W.-Aethylester.** See ETHYL tartrate.—**W.-Amylester.** See AMYL tartrate.—**W'anhydrid.** Tartaric anhydride. [B.]

**WEINSTEIN** (Ger.), n. Vin'stin. See TARTAR (1st def.).—**Brenzliche W'flüssigkeit.** Pyrotartaric acid. [L. 80.]—**Geblätterte W'erde.** Normal potassium acetate. [B.]—**Kreideartiger W., Kreidesaurer W., Mephitischer W.** See POTASSIUM carbonate.—**W'geist.** See ADIAPHOROUS SPIRIT.—**W'kali, W'laugensatz.** See POTASSIUM carbonate.—**W'rahm.** See Cream of TARTAR.—**W'salz.** See POTASSIUM tartrate and ALCALI tartari.—**W'säure.** Tartaric acid. [B.]—**W'spiritus.** See LIQUOR pyrotartareus.

**WEISS** (Ger.), adj. and n. Vis. White. [a. 35.]—**Lendenmark'.** The white substance of the lumbar portion of the spinal cord. [K.]—**W'blütigkeit.** See LEUCOCYTHÆMIA.—**W'fluss.** See LEUCORRHEA.—**W'hügel.** See CORPORA albicantia.—**W'zellenblut.** See LEUCOCYTHÆMIA.

**WEISSBLECH** (Ger.), n. Vis'ble'ch<sup>2</sup>. Sheet iron coated with tin. [B.]

**WEISSENBURG** (Ger.), n. Vis'se'n-burg. 1. A place in the Canton of Bern, Switzerland, where there is a warm gaseous and sulphurous spring. 2. A place in Middle Franconia, Bavaria, where there is an alkaline spring. [L. 37, 49, 57 (a. 14).]

**WEISGLAS** (Ger.), n. Vis'gla's. Arsenic trioxide. [B. 49.]

**WEITBEINIG** (Ger.), adj. Vit'bin'i<sup>2</sup>g. See BOW-LEGGED.

**WEITSEHEND** (Ger.), **WEITSICHTIG** (Ger.), adj's. Vit'-za-e'nd, -zi'ch<sup>2</sup>t-i<sup>2</sup>g. See PRESBYOPIC and HYPERMETROPIC.

**WEIZEN** (Ger.), n. Vits'e'n. Wheat; the genus *Triticum*. [a. 35.]—**Buchw'.** See the major list.—**Gurkenw'.** See TRITICUM repens.—**Kolbenw'.** The *Triticum compactum* and other varieties of *Triticum vulgare*. [a. 35.]—**Kuhw'.** See MELAMPYRUM and LOLIUM temulentum.

**WELD**, n. See *RESEDA luteola*.

**WELKEN** (Ger.), n. Ve'l'k'e'n. See ATROPHY.

**WELL**, n. We'l. Gr., *κρήνη*. Lat., *fons*. Fr., *puit*. Ger., *Brunnen*. A fountain of water; a hole or pit containing water; any pit or cavity. [a. 48.]—**Lymph-w's.** Fr., *puits lymphatiques*. Of Ranvier, stomata in the diaphragm. [J. 26, 31.]

**WELLE** (Ger.), n. Ve'l'le<sup>2</sup>. An undulation, a wave; & a cerebral convolution; in the pl., *W'n*, fluctuic. [L. 30 (K).]

**WELLIG** (Ger.), adj. Ve'l'li<sup>2</sup>g. See UNULATE.

**WELLINGTONIA** (Lat.), n. f. We'l'i<sup>2</sup>n<sup>2</sup>-ton'i<sup>2</sup>-a<sup>2</sup>. From the Duke of Wellington. Fr., *wellingtonie*. The genus *Sequoia*.

**WELTLICH** (Ger.), adj. Ve'l'tli<sup>2</sup>ch<sup>2</sup>. See COSMIC.

**WEMDING** (Ger.), n. Ve'n'di<sup>2</sup>n<sup>2</sup>. A place in Bavaria where there is a sulphurous and saline spring. [L. 30, 37, 135 (a. 14).]

**WEN**, n. We'n. A.-S., *wenn*. Gr., *ἀθήνη* (1st def.). Lat., *lupia*. Fr., *loupe*. Ger., *Wolfschweulst*, *Balggeschwulst*. 1. See ATHEROMA (1st def.). 2. See GOITRE.

**WENDEL** (Ger.), n. Ve'n'd'e'l. See GYRUS (1st def.).

**WENDLANDIA** (Lat.), n. f. Ve'n'd-la<sup>2</sup>nd'i<sup>2</sup>-a<sup>2</sup>. From *Wendland*, a German horticulturist. Fr., *wendlandie*. A genus of the *Rubiaceæ*. [a. 35.]—**W. Lawsonie.** A Malabar tree. All parts are used in baths as an antispasmodic and the leaves in coma. [a. 35.]

**WENDESTEHEN** (Ger.), n. Ve'n'd'sta-e'n. In kinesiatrics, a standing posture with the trunk curved backward as far as possible. [L. 57 (a. 14).]

**WENDUNG** (Ger.), n. Ve'n'd'un<sup>2</sup>. See VERSION.—**W'sschlinge.** See FILLET (1st def.).

**WERBLOCKE** (Ger.), n. Ve'r'b'l'o'k-e<sup>2</sup>. See PLICA polonica.

**WERG** (Ger.), n. Ve'rg. See STIPA.

**WERGIG** (Ger.), adj. Ve'rg'i<sup>2</sup>g. See STUPOSE.

**WERK** (Ger.), n. Ve'r'k. Work, a work.—**Maschenw'.** A net-work, especially that formed by fibrin during the coagulation of blood. [K.]—**W'stätte.** See LABORATORY.

**WERKZEUG** (Ger.), n. Ve'r'k'zoig. An apparatus, instrument, or organ.—**Knochenseidew'.** See OSTEOTOME.—**Marterw'.** See ARTHREMBOLA.

**WERMUTH** (Ger.), n. Ve'r'mut'. The *Artemisia absinthium* or its flowering herb. [a. 35.]—**W'bitter.** See ABSINTH.—**W'-extract.** See EXTRACTUM ABSINTH.—**W'kraut.** Wormwood. See *ARTEMISIA absinthium*.—**W'öl.** See OLEUM ABSINTH.—**W'-säure.** See ABSINTHIC acid.—**W'tinctur.** See TINCTURA ABSINTH.—**W'wein.** See ABSINTHITES.

**WERSEN** (Ger.), n. Ve'r's'e'n. The seeds of *Rhamnus cathartica*. [a. 35.]

**WERTHIGKEIT** (Ger.), n. Ve'r't'i<sup>2</sup>g-k'it. See ATOMICITY.

**WESEN** (Ger.), n. Vaz'e'n. See ESS.—**Bäses W.** See EPILEPSY.—**Netzformiges W.** See RETE mucosum.

**WESENTLICH** (Ger.), adj. Vaz'e'nt-li<sup>2</sup>ch<sup>2</sup>. See ESSENTIAL and FUNDAMENTAL.

**WESPENBEIN** (Ger.), n. Ve'sp'e'n-bin. See SPHENOID BONE.—**W'schnabel.** The rostrum of the sphenoid bone. [L. 31.]—**W'tuten.** See SPHENOIDAL CORNUA.

**WEST BADEN SPRINGS**, n. We'st ba'd'e'n. A place in Orange County, Indiana, where there are gaseous, alkaline, saline, and sulphurous springs. [Anderson (a. 14).]

**WESTON-SUPER-MARE**, n. We'st'n-su<sup>2</sup>p-u<sup>2</sup>r-mar'e. A sea-bathing resort in Somerset, England. [L. 37 (a. 14).]

**WESTWARD HO**, n. We'st'wa'r'd-ho'. A sea-bathing resort in Devonshire, England. [L. 37 (a. 14).]

**WETHERBEE-AIL**, n. We'th<sup>2</sup>u<sup>2</sup>r-be-al. See *Progressive muscular ATROPHY*.

**WETTER** (Ger.), n. Ve't'te<sup>2</sup>r. 1. Weather. 2. Air, vapor, fumes. [A. 450 (a. 17).]—**Böses W., Schlagendes W., Tödtentes W.** See METHANE.

**WETZKRANKHEIT** (Ger.), n. Ve'ts'kra'n<sup>2</sup>k-hit. See DREH-KRANKHEIT.

**WHALE**, n. Hwal. See BALÆNA.—**Greenland w., Right w.** See *BALÆNA mysticetus*.—**Spermaceti-w., Sperm-w.** The *Physeter macrocephalus*. See also under CETACEUM and AMBRA grisea.—**W.-oil.** Ger., *Fischthran*. See OLEUM BALÆNÆ.

**WHALEBONE**, n. Hwal'bo'n. Fr., (*barbe de baleine*). Ger., *Fischbein*. An elastic horny substance slender plates of which form a fringe on the upper jaw in the *Balenidæ*. [a. 48.]

**WHEAL**, n. Hwel. From A.-S., *hwæle*, putrefaction. Gr., *πυρρός*. Lat., *pomphus, urtica*. Ger., *Quaddel, Blatter*. 1 (obsolete). A pustule. 2. An elevation of the skin, usually of transient duration, of a roundish, oval, linear, or irregular shape, pinkish in color except during the height of its development, when at the centre it becomes pale or blanched. It is attended with spastic contraction of the muscles in the skin, with circumscribed effusion of serum into the corium and rete mucosum, and causes violent itching. It may be produced by local injury, as from the stroke of a rod or whip or from the bite or sting of an insect, or it may occur as the symptom of urticaria. [G. 30.] Cf. URTICARIA and VIBEX.

**WHEAT**, n. Hwet. Gr., *τρίψος*. Lat., *tritium*. Fr., *froment*. Ger., *Weizen*. The genus *Triticum*, especially *Triticum sativum*, also its grain. [a. 35.]—**Cow-w.** See the major list.—**Oil of w.** A purgative oil contained in the embryos of w., of beans, etc. [<sup>1</sup>Therap. Gaz., Oct. 15, 1890, p. 652 (a. 50).]

**WHEEZING**, n. Hwez'i<sup>2</sup>n<sup>2</sup>. Fr., *sifflement*. Ger., *Schnaufen*. A peculiar quality of disordered respiration, which is accomplished with difficulty, often with distress, and which is expressed with a harsh rasping sound; also the act of breathing in this manner. [D.]

**WHELK**, n. Hwe'l'k. A.-S., *hwylca*. 1. A wrinkle; an inequality of the surface; a protuberance; a pustule; a pustule or other lesion of rosacea; rosacea. [G. 30.] 2. A wheel, a wale. 3. Acne.—**Chin-w.** Sycosis of the chin. [Green (a. 34).]—**Rosy w.** See ROSACEA.

**WHEY**, n. Hwa. Gr., *ὀρός γάλακτος*. Lat., *serum lactis*. Fr., *sérum de lait, petit lait* [Fr. Cod.]. Ger., *Molken, Milchflüssigkeit*. The watery part of milk remaining after the separation of the butter and casein. [K.]—**Alum w.** A preparation made by boiling 720 parts of cow's milk, adding gradually from 54 to 720 parts of powdered alum, removing the clot, and straining. [B. 119 (a. 38).]—**Ferrated w.** A preparation made by mixing 200 parts of milk with one part of iron acetate, or dissolving 3 parts of iron and ammonium citrate in 1,000 of w. [<sup>1</sup>Proc. of the Am. Pharm. Assoc., xxvii (a. 14).]—**Mustard w.** See *Serum LACTIS sinapi-num*.—**Vitriolated w.** A preparation made by adding 1 part of diluted sulphuric acid to 400 parts of milk. [<sup>1</sup>Proc. of the Am. Pharm. Assoc., xxvii (a. 14).]—**Wine w.** A mixture of 4 parts of milk and 1 part of Rhine wine. [<sup>1</sup>Proc. of the Am. Pharm. Assoc., xxvii (a. 14).]

**WHIN**, n. Hwi'n. The *Ulex europæus*. [a. 35.]—**Petty w.** 1. See *ONONIS arvensis* and *ONONIS procurrens*.—**W.-berry.** The *Vaccinium myrtillus*. [a. 35.]

**WHISKEY, WHISKY**, n's. Hwi'sk'i<sup>2</sup>. Irish, *uisquebach*. Lat., *spiritus (vinosus) frumenti*. Fr., *can-de-vie de grain*. Ger., *W., Kornbranntwein*. An alcoholic beverage obtained by the distillation of an infusion of fermented grain; a liquid of peculiar taste and odor, nearly colorless when freshly prepared, but acquiring by age a tint varying from light amber to a yellowish-brown. Sp. gr., 917 to 930. It contains from 44 to 65 per cent. by weight of alcohol. [B. 5.]—**Blue-grass w.** W. made in Kentucky, the "blue-grass State." [a. 34.]—**Bourbon w.** A corn w. originally made in Bourbon County, Kentucky. [a. 34.]—**Corn w.** Ger., *Maiskornspiritus*. W. manufactured from maize. [a. 48.]—**Irish w.** W. made in Ireland from malt and raw grain. [a. 34.]—**Pot-still w.** New w. impregnated with fusel-oil. [a. 34.]—**Rye w.** W. made from rye. [a. 34.]—**Scotch w.** W. made in Scotland from malted grain, usually barley. The smoky flavor is due to the peat and turf fires used in drying the grain. [a. 34.]—**Wheat w.** W. made from wheat. [a. 34.]

**WHISPER**, n. Hwi'sp'u<sup>2</sup>r. Lat., *susurrus*. Fr., *chuchotement, murmure*. Ger., *Gefflüster, Geisper*. A sound uttered by the voice without soant breath. [a. 48.]—**Cavernous w.** In auscultation, a sound heard with whispered words, low in pitch and blowing in quality. It indicates the existence of a cavity. [D. 26.]—**Exaggerated bronchial w.** In auscultation, the sound heard with whispered words. It is very intense, but neither so intense, nor so acute, nor so near the ear, as the sound heard in whispering bronchophony. [D. 26.]

**WHISTLE**, n. Hwi'st'l. Fr., *sifflet*. Ger., *Pfeife* (2d def.). 1. A shrill sound formed by forcing air through a small opening. 2. An instrument producing such a sound. [a. 48.] **Galton's w.** An instrument for testing the acuity of hearing with very high tones. [F.]

**WHITBY**, n. Hwi't'b'i<sup>2</sup>. A sea-bathing resort in Yorkshire, England. [L. 37 (a. 14).]

**WHITE**, adj. Hwit. Gr., *λευκός*. Lat., *albus*. Fr., *blanc*. Ger., *weiss*. Capable of reflecting light completely, of a color combining

in due proportion all the colors of the solar spectrum; as a n., a substance so characterized. [a, 48.] Cf. ALBUM and BLANC.—**Dutch w.** A mixture of one part of white lead (basic carbonate of lead) with 3 parts of barium sulphate. [B, 3.]—**Hamburg w.** A mixture of 1 part of white lead with 2 parts of barium sulphate. [B, 3.]—**Medullary w.** Of Flechsig, the white matter of the spinal cord. ["Jour. of Nerv. and Ment. Dis.," Oct., 1880, p. 573 (K).]—**Paris w.** Whiting. [B.]—**Pearl w.** See BISMUTH SUBNITRATE.—**Permanent w.** Fr., *blanc fixe*. Finely ground barium sulphate mixed with white lead; used as a white paint. [B, 3, 5.]—**Venetian w.** A mixture of equal parts of white lead and barium sulphate. [B, 3.]

**WHITES**, n. pl. Hwits. A popular term for leucorrhœa.

**WHITE SULPHUR SPRINGS**, n. Hwit su<sup>1</sup>lf'u<sup>2</sup>r. 1. A place in Napa County, California, where there are hot sulphurous springs. 2. The name of several undeveloped sulphurous springs in Inyo, Amador, Sonoma, and Tehama Counties, California. 3. A place in Hall County, Georgia, where there are hot sulphurous springs. 4. A watering place in Meriwether County, Georgia, where there are hot sulphurous springs. 5. Mineral springs situated in Catahoula Parish, Louisiana. 6. Mineral springs situated at Cairo, Greene County, New York. 7. A place in Catawba County, North Carolina, where there are sulphur springs. 8. Mineral springs situated in Delaware County, Ohio, containing a small amount of sulphur. [A, 363 (a, 21); and Anderson (a, 14).] 9. See GREENBRIER W. S. S.

**WHITE SWELLING**, n. Hwit swel<sup>1</sup>i<sup>2</sup>n<sup>2</sup>. See FUNGUS ARTHRITIS.—**Syphilitic w. s.** A form of hydrarthrosis encountered in tertiary syphilis. It appears as an infiltration of the synovial membrane and subsynovial tissue of a gummatous type, with a varying amount of effusion and a tendency to enlargement of the bones, but not especially to stiffening of the joint. [A, 520 (a, 20).]

**WHITING**, n. Hwit'i<sup>2</sup>n<sup>2</sup>. A purified calcium carbonate prepared from chalk by pulverization and decantation. [B.]

**WHITLOW**, n. Hwi<sup>2</sup>t'lo. See PARONYCHIA (1st def.).—**Melanosis w.**, **Melanotic w.** Melanotic sarcoma having the appearance of a w. with a faint border of melanotic tissue. [Hutchinson, "Am. Jour. of the Med. Sci.," 1886, p. 470 (a, 34).]—**Morvan's w.** The anæsthetic-analgesic w. forming an initial symptom in Morvan's disease. ["Brain," 1891, p. 370 (a, 34).]

**WHOOPE**, n. Hup. The peculiar crowing sound which occurs during inspiration in a paroxysm of whooping-cough. [D.]

**WHOOPIING-COUGH**, n. Hup'i<sup>2</sup>n<sup>2</sup>-ko<sup>2</sup>f. Lat., *pertussis*. Fr., *coqueluche*. Ger., *Keuchhusten*, *Stickhusten*. See PERTUSSIS.

**WHORL**, n. Hwo'r<sup>1</sup>l. See VERTICIL and VORTEX.—**W. of the heart**. See VORTEX of the heart.

**WHORLED**, adj. Hwo'r<sup>1</sup>ld. See VERTICILLATE.

**WHORTS**, n. Hwo'r<sup>1</sup>ts. 1. The *Vaccinium myrtillus*. 2. The *Vaccinium vitis-idaea*. 3. A small blackberry. [a, 35.]

**WICHTELZOPF** (Ger.), n. Vi<sup>2</sup>ch<sup>2</sup>t'e<sup>2</sup>l-tso<sup>2</sup>pf. See PLICA polionica.

**WICKE** (Ger.), n. Vi<sup>2</sup>k'e<sup>2</sup>. See OROBUS, ERVUM, and VICIA.

**WICKEL** (Ger.), n. Vi<sup>2</sup>k'e<sup>2</sup>l. See CICINUS.

**WICKELFLECHTE** (Ger.), n. Vi<sup>2</sup>k'e<sup>2</sup>l-fl'e<sup>2</sup>ch<sup>2</sup>t'e<sup>2</sup>. The *Urenea barbata* and similar lichens. [a, 35.]

**WIDERHALLFORSCHER** (Ger.), n. Ved'e<sup>2</sup>r-ha<sup>2</sup>l-forsh-e<sup>2</sup>r. See PLEXIMETER.

**WIDERRATHEND** (Ger.), adj. Ved'e<sup>2</sup>r-ra<sup>2</sup>t-e<sup>2</sup>nd. See CONTRA-INDICANT.

**WIDERIST** (Ger.), n. Ved'e<sup>2</sup>r-ri<sup>2</sup>st. See GARROT (2d def.).

**WIDERSTREBER** (Ger.), n. Ved'e<sup>2</sup>r-strab-e<sup>2</sup>r. See ANTAGONIST.

**WIDERTHON** (Ger.), n. Ved'e<sup>2</sup>r-ton. See POLYTRICHUM.

**WIDERWILLE** (Ger.), n. Ved'e<sup>2</sup>r-vi<sup>2</sup>l-le<sup>2</sup>. See ANTIPATHY and HAPSCORIA.

**WIEBELN** (Ger.), n. Veb'e<sup>2</sup>ln. See STROPHULUS, URTICARIA, ROSEOLA, and IGNIS SILVICUS.

**WIEDERAUFLEBEND** (Ger.), adj. Ved'e<sup>2</sup>r-a<sup>2</sup>3-u<sup>2</sup>f-lab-e<sup>2</sup>nd. See REVIVISCENT.

**WIEDERBELEBUNG** (Ger.), n. Ved'e<sup>2</sup>r-be<sup>2</sup>-lab-un<sup>2</sup>. See REVIVIFICATION.

**WIEDERBILDUNG** (Ger.), n. Ved'e<sup>2</sup>r-bi<sup>2</sup>ld-un<sup>2</sup>. See ANAPLASTY.

**WIEDEREINBRINGUNG** (Ger.), **WIEDEREINFÜGUNG** (Ger.), **WIEDEREINKÜNGUNG** (Ger.), **WIEDEREINSETZUNG** (Ger.), n's. Ved'e<sup>2</sup>r-in-bri<sup>2</sup>n<sup>2</sup>-un<sup>2</sup>, -fu<sup>2</sup>g-un<sup>2</sup>, -re<sup>2</sup>n<sup>2</sup>k-un<sup>2</sup>, -ze<sup>2</sup>ts-un<sup>2</sup>. See REDUCTION (1st def.).

**WIEDERERWECKUNG** (Ger.), n. Ved'e<sup>2</sup>r-e<sup>2</sup>r-ve<sup>2</sup>k-un<sup>2</sup>. See RESUSCITATION.

**WIEDERERZEUGUNG** (Ger.), n. Ved'e<sup>2</sup>r-e<sup>2</sup>r-tsoi<sup>2</sup>-un<sup>2</sup>. Regeneration. [a, 48.]

**WIEDERGEENESUNG** (Ger.), n. Ved'e<sup>2</sup>r-ge<sup>2</sup>-naz-un<sup>2</sup>. Convalescence. [L, 80.]

**WIEDERHERSTELLEND** (Ger.), adj. Ved'e<sup>2</sup>r-he<sup>2</sup>r-ste<sup>2</sup>ld-e<sup>2</sup>nd. See RESTORATIVE.

**WIEDERIMPFGUNG** (Ger.), n. Ved'e<sup>2</sup>r-i<sup>2</sup>mpf-un<sup>2</sup>. See REVACCINATION.

**WIEDERKÄUEN** (Ger.), **WIEDERKÄUUNG** (Ger.), n's. Ved'e<sup>2</sup>r-koi-e<sup>2</sup>n-un<sup>2</sup>. See RUMINATION and MERYCISM.

**WIEDERKEHREND** (Ger.), adj. Ved'e<sup>2</sup>r-kar-e<sup>2</sup>nd. Recurrent, relapsing. [A, 521 (a, 48).]

**WIEDERWACHSEN** (Ger.), n. Ved'e<sup>2</sup>r-va<sup>2</sup>ch<sup>2</sup>s-e<sup>2</sup>n. See ANAPHYSIS.

**WIEKE** (Ger.), n. Vek'e<sup>2</sup>. See TENT.

**WIESAU** (Ger.), n. Ve'za<sup>2</sup>-u<sup>2</sup>. A place in the Palatinate where there are a sulphurous spring and a chalybeate one. [a, 14.]

**WIESBADEN** (Ger.), n. Ves'ba<sup>2</sup>d-e<sup>2</sup>n. A place in Hesse-Nassau where there are numerous saline springs. [a, 14.]

**WIESENBAD** (Ger.), n. Ve'ze<sup>2</sup>n-ba<sup>2</sup>d. A place in Zwickau, Saxony, where there is a warm alkaline and sulphurous spring.

**WIESENKNOPF** (Ger.), n. Vez'e<sup>2</sup>n-kno<sup>2</sup>pf. See SANGUISORBA.

**WIESENKÖNIGIN** (Ger.), n. Ve'ze<sup>2</sup>n-ku<sup>2</sup>n-i<sup>2</sup>g-i<sup>2</sup>n. See SPREA ulmaria.

**WIESENKAUTE** (Ger.), n. Ve'ze<sup>2</sup>n-ra<sup>2</sup>-u<sup>2</sup>t-e<sup>2</sup>. The genus *Thalictrum*. [a, 35.]

**WIKSTROEMIA** (Lat.), n. f. Vi<sup>2</sup>k-stru<sup>2</sup>m'i<sup>2</sup>a<sup>2</sup>. Fr., *wikstrœmie*. A genus of the *Thymelæaceæ*. [a, 35.]—**W. canescens**. Of Misner, a Japanese species, the source of a bibulous paper, called *usego*, recommended for making wafers and capsules. ["Proc. of the Am. Pharm. Assoc.," xxxviii, xxxix (a, 14).]—**W. indica**. A tree-like shrub growing in Australia and Polynesia. In the Fiji Islands the bark and leaves are used in coughs, and the bark is applied to ulcers. [a, 35.]

**WILBRANDIA** (Lat.), n. f. Vi<sup>2</sup>l-bra<sup>2</sup>nd'i<sup>2</sup>a<sup>2</sup>. From Wilbrand, a German physician. Fr., *wilbrandie*. A genus of Brazilian curbitaceous herbs. Several species have the evacuant properties of *Ecballium elaterium*. [a, 35.]—**W. hibiscoides**. A purgative species. [a, 35.]—**W. drastica**. A species used in gout and syphilis. [a, 35.]—**W. fluminensis**, **W. Riedeli**, **W. scabra**, **W. verticillata**. A powerfully hydragogue species. [a, 35.]

**WILBUR SPRINGS**, n. Wi<sup>2</sup>lb'u<sup>2</sup>r. A place in Colusa County, California, where there are hot saline and sulphurous springs.

**WILDBAD** (Ger.), n. Vi<sup>2</sup>ld'ba<sup>2</sup>d. 1. See *Akratotherme*. 2. A place in the Black Forest district, Würtemberg, where there are warm saline and alkaline springs. 3. A place in Lower Franconia, Bavaria, where there is an earthy and saline spring. [a, 14.] 4. See GASTEN. 5. See NEUMARKT (1st def.).

**WILDECK**, **WILDEGG**, n's. Vi<sup>2</sup>ld'e<sup>2</sup>k. -e<sup>2</sup>g. A place in the canton of Aargau, Switzerland, where there is a saline spring containing iodine and bromine. [a, 14.]

**WILDFIRE**, n. Wild'fir. Ger., *Wildfeuer*. See ERYSIPELAS.

**WILDSEUCHE** (Ger.), n. Vi<sup>2</sup>ld'zoich<sup>2</sup>-e<sup>2</sup>. A disease of cattle, swine, and horses, the chief pathological lesion of which is a multiple gangrenous broncho-pneumonia. Pectoral, septicæmic (with cutaneous symptoms), and intestinal varieties are described. It is caused by a special micro-organism (see *BACILLUS* of W.). According to Hueppe, this disease is only a variety of the affection (*septicæmia hæmorrhagica*) of which other varieties constitute rabbit's septicæmia, Schweineseuche, and chicken cholera. ["Dtsch. med. Wchnschr.," No. 14, 1887 (B).]

**WILDUNGEN** (Ger.), n. Vi<sup>2</sup>ld'un<sup>2</sup>-e<sup>2</sup>n. A place in Waldeck, Germany, where there are gaseous, earthy, and chalybeate springs.

**WILHELMSBAD** (Ger.), n. Vi<sup>2</sup>l'he<sup>2</sup>lms-ba<sup>2</sup>d. 1. A place in Prussian Hesse where there is a saline and chalybeate spring. 2. A place in Prussian Silesia where there is a sulphurous spring. 3. A place near Aschersleben, Prussian Saxony, where there are saline and chalybeate ferruginous springs. [a, 14.] 4. See DRIBURG.

**WILHOIT'S SODA SPRINGS**, n. Wi<sup>2</sup>l'hoit<sup>2</sup>. A place in Clackamas County, Oregon, where there are gaseous, alkaline, and saline springs. [Anderson (a, 14).]

**WILLKÜRLICH** (Ger.), adj. Vi<sup>2</sup>l'ku<sup>2</sup>r-li<sup>2</sup>ch<sup>2</sup>. See VOLUNTARY.

**WILLOW**, n. Wi<sup>2</sup>l'o. See SALIX (1st def.).—**W.-bark**. See SALIX (2d def.).—**W.-weed**. 1. The *LYTHRUM salicaria*. 2. The *Polygonum lapathifolium* and other species of *Polygonum*. [a, 35.]

**WILLOW-HERB**, n. Wi<sup>2</sup>l'o-u<sup>2</sup>rb. The genus *Epilobium*.

**WIMMER** (Ger.), n. Vi<sup>2</sup>m'm'e<sup>2</sup>r. A pustule, a pimple.

**WIMMERN** (Ger.), n. Vi<sup>2</sup>m'm'e<sup>2</sup>r'n. See VAGITUS.

**WIMPEL** (Ger.), n. Vi<sup>2</sup>mp'e<sup>2</sup>l. See VEXILLUM.

**WIMPER** (Ger.), n. Vi<sup>2</sup>mp'e<sup>2</sup>r. An eyelash. See also CILIA (1st def.) and BARBICELS.—**Flimmerw'n**, **Schwingende W'n**. See CILIA (2d def.).—**W'wurzel**. See INTRACELLULAR FIBRES.

**WIMPERIG** (Ger.), adj. Vi<sup>2</sup>mp'e<sup>2</sup>r-i<sup>2</sup>g. See CILIATE.

**WINCH**, n. Wi<sup>2</sup>inch. The handle for turning any revolving apparatus, also the apparatus so turned. [a, 48.]—**Verona w.** A cog-wheel arrangement for tightening a ligature around a hæmorrhoid. [E.]

**WIND**, n. Wi<sup>2</sup>nd. Gr., *æueos*. Lat., *ventus*. Fr., *vent*. Ger., *W*. 1. Moving air, a current of air. [a, 48.] 2. See FLATUS.—**Electric w.** That form of current from a static electrical machine which, striking the person, causes a sensation as if a gentle breeze were blowing upon the part.

**WIND** (Ger.), n. Vi<sup>2</sup>nd. See WIND (Eng.).—**W'anhäufung**, **W'bauch**. Flatulence. [L, 80.]—**W'blattern**. See VARICELLA.—**W'bruch**. See PHYSCOLE.—**W'darm**. See COLON.—**W'dorn**. See OSTEOSPONGIOMA and ARTHROCA.—**W'drehe**. Hæmoglobinuria in horses. [L, 57 (a, 14).]—**W'geschwulst**. See PNEUMATOSIS.—**W'kropf**. See GOITRE.—**W'treibend**. See CARMINATIVE.

**WINDE** (Ger.), n. Vi<sup>2</sup>nd'e<sup>2</sup>. The genus *Convolvulus*. [a, 35.]

**WINDEL** (Ger.), n. Vi<sup>2</sup>nd'e<sup>2</sup>l. A swaddling cloth.

**WINDEN** (Ger.), n. Vi<sup>2</sup>nd'e<sup>2</sup>n. See TORSION.

**WINDEND** (Ger.), adj. Vi<sup>2</sup>nd'e<sup>2</sup>nd. See VOLUBLE.

**WIND-FLOWER**, n. Wi<sup>2</sup>nd'flu<sup>2</sup>-u<sup>2</sup>-u<sup>2</sup>r. See ANEMONE.

**WINDLASS**, n. Wind'l's. Fr., *treuil*, *cabestan*. Ger., *Winde*, *Haspel*. Any apparatus for winding on an axle a cord that is

tightened by a weight or strain. [a, 48.]—**Spanish w.** See *TOURNIQUET*.

**WINDLE-STRAW**, n. Wi<sup>2</sup>nd'l'stra<sup>4</sup>. The *Cynosurus cristatus*, *Triticum repens*, and other grasses. [a, 35.]

**WINDOW**, n. Wi<sup>2</sup>nd'o. Gr., *θύσις*, *θύσις*. Lat., *fenestra*. Fr., *fenêtre*. Ger., *Fenster*. An opening in a wall for the admission of light. [a, 48.]—**Oval w.** See *FENESTRA ovalis*.—**Round w.** See *FENESTRA rotunda*.

**WINDPIPE**, n. Wi<sup>2</sup>nd'pip. See *TRACHEA*.

**WINDPOCKEN** (Ger.), n. pl. Vi<sup>2</sup>nd'po<sup>2</sup>k-e<sup>2</sup>n. See *VARICELLÆ emphysematose*.

**WINDSUCHT** (Ger.), n. Vi<sup>2</sup>nd'zuch<sup>2</sup>t. See *EMPHYSEMA* and *TYMPANITES*.—**Gebärmutterw.** See *PHYSOMETRA*.—**Herzw.** See *PNEUMOTOCARDIA*.

**WINDUNG** (Ger.), n. Vi<sup>2</sup>nd'un<sup>2</sup>. See *CONVOLUTION* and *GYRUS*.—**Aeusserer Riechlw.** See *External olfactory convolution*.—**Aeusserer Schläfenw.** See *Subcollateral gyrus*.—**Augenw.** A frontal convolution. [A, 521 (a, 48).]—**Bleibende W.** [Kölliker]. See *Secundäre W.*—**Bogenw.** See *GYRUS fornicatus*.—**Broca'sche W.** See *Broca's convolution*.—**Centralw'en.** The convolutions around the fissure of Rolando. [I, 17 (K).]—**Darmw'en.** See *Intestinal convolutions*.—**Dritte Hinterhauptw.** See *Inferior occipital convolution*.—**Dritte Scheitelbogenw.** See *Middle occipital convolution*.—**Dritte Scheitellappenw.** See *Supramarginal convolution*.—**Dritte Schläfenw.** See *Inferior temporal convolution*.—**Dritte Stirnw.** See *Inferior frontal convolution*.—**Dritte untere Hinterhauptw.** See *Inferior occipital convolution*.—**Erste Hinterhauptw.** See *Superior occipital convolution*.—**Erste obere Hinterhauptw.** See *CUNEIFORM (2d def.)*.—**Erste obere Schläfenw.** See *Superior temporo-sphenoidal convolution*.—**Erste Scheitelbeinlappenw.** See *Superior temporo-sphenoidal convolution*.—**Erste Scheitelbogenw.** See *Supramarginal convolution*.—**Erste Scheitelw.** See *Superior parietal convolution*.—**Erste Schläfenw.** See *Superior parietal convolution* and *Inframarginal convolution*.—**Erste Stirnw.** See *Superior frontal convolution*.—**Fünfte Scheitelbogenw.** [Bischoff]. See *GYRAL ISTHUS*.—**Gehirnw.** **Grosshirnw.** A cerebral gyrus.—**Hakenw.** **Hakenzähnw.** See *Uncinate convolution*.—**Hintere Centralw.** See *Ascending parietal convolution*.—**Hintere innere Hinterhauptw.** See *Subcalcarine gyrus*.—**Hintere Orbitalw.** See *Posterior orbital convolution*.—**Hintere Scheitelbogenw.** See *Middle occipital convolution*.—**Hinterhauptsw.** See *Occipito temporal convolution*.—**Hirnw'en.** See *Cerebral convolutions*.—**Innere obere Scheitelbogenw.** See *Superior parietal convolution*.—**Innere obere Schläfenw.** See *Uncinate gyrus*.—**Innere Riechlw.** See *Internal olfactory convolution*.—**Inselw.** See *Insular convolution*.—**Klappdeckelw'en.** See *GYRI breves*.—**Kleinhirnw'en.** The gyri of the cerebellum. Angular. 2. Angular. [a, 35.]—**W'messer.** See *GONIOMETER*.—**W'ständig.** See *AXILLARY*.

**WINKING**, n. Wi<sup>2</sup>nd'k'i<sup>2</sup>nd. Gr., *σκαρδαμυμός*. Lat., *nictatio*. See *NICTATION*.

**WINTERA** (Lat.), n. f. Wi<sup>2</sup>nt'e<sup>2</sup>a-a<sup>2</sup>. 1. The genus *Drimys*. The *Winteraceæ* are the *Illiciæ*; the *Winteræ* (Fr., *winterées*; Ger., *Winterreen*) of R. Brown are an order of plants, consisting of *Tasmania*, *Illicium*, and *Wintera*; of Reichenbach, a section of the *Illiciæ*, consisting of *Drimys* and *Tamus*; of Bentham and Hooker, a tribe of the *Magnoliaceæ*, comprising *Drimys* and *Illicium*. 2. Of the U. S. Ph., 1850, Winter's bark. [a, 35.]—**W. aromatica.** The *Drimys Winteri*. [a, 35.]—**W. cortex** [Belg. Ph.]. Fr., *winter (écorce)* [Fr. Cod.]. Sp., *corteza winterana* [Sp. Ph.]. The bark of *Drimys Winteri* (var. *granatensis* [Fr. Cod.]). [B, 95 (a, 38).]

**WINTERANA** (Lat.), n. f. Wi<sup>2</sup>nt-u<sup>2</sup>r-an(a<sup>2</sup>n)/a<sup>2</sup>. The genus *Canella*. The *Winteranæ* are the *Winteræ* (1st def.). [a, 35.]—**W. canella.** See *CANELLA alba*.

**WINTERBERRY**, n. Wi<sup>2</sup>nt'u<sup>2</sup>r-be<sup>2</sup>r-ri<sup>2</sup>. See *PRINOS* and *ILEX verticillata*.

**WINTERBEULE** (Ger.), n. Vi<sup>2</sup>nt'e<sup>2</sup>r-boll-e<sup>2</sup>. See *CHILBLAIN*.

**WINTERCOURT** (Ger.), n. Vi<sup>2</sup>nt'e<sup>2</sup>r-kur-ort. A climatic health resort for the cold season. [L, 57 (a, 14).]

**WINTERGREEN**, n. Wi<sup>2</sup>nt'u<sup>2</sup>r-gren. Ger., *Wintergrün*. 1. The genus *Pyrola* (including *Chimaphila*). 2. The *Gaultheria procumbens*. 3. The genus *Vina*. [a, 35.]—**Common w.** The *Pyrola minor*. [a, 35.]—**Oil of w.** Lat., *oleum gaultheria* [U. S. Ph.]. Fr., *essence de w.* [Fr. Cod.]. Ger., *Wintergrünöl*. Oil of gaultheria (or tea-berry), essence of w.; a sweetish, very fragrant oil obtained from *Gaultheria procumbens*, also from other species of *Gaultheria*, from *Betula alba*, etc. It is nearly colorless when freshly prepared, has the sp. gr. of 1.173, dissolves readily in alcohol, and boils at 211° C. When pure it consists of 90 per cent. of methyl salicylate and 10 per cent. of gaultherione. It resembles salicylic acid in physiological action. An artificial oil is prepared having the sp. gr. of 1.176 and boiling at 202° C. It contains apparently a small proportion of methyl ether. [a, 35.]

**WINTERSRINDE** (Ger.), n. Vi<sup>2</sup>nt'e<sup>2</sup>r-sri<sup>2</sup>nd-e<sup>2</sup>. See *Winter's BARK*.—**Falsche W.** See *Cortex winteranus spiruiss*.

**WINZIG** (Ger.), adj. Vi<sup>2</sup>nts/i<sup>2</sup>g. Diminutive, small, dwarfed. [a, 35.]

**WIPFEL** (Ger.), n. Vi<sup>2</sup>pf/e<sup>2</sup>l. See CACUMEN.—**W'blatt** [Burdach]. See FOLIUM *caucuminis*.

**WIPFELD** (Ger.), n. Vi<sup>2</sup>pf/e<sup>2</sup>ld. A place in Lower Franconia where there are springs containing calcium sulphate. [a, 14.]

**WIPPE** (Ger.), n. Vi<sup>2</sup>p/pe<sup>2</sup>. See ARCHET (2d def.).

**WIRBEL** (Ger.), n. Verb'e<sup>2</sup>l. See VERTEBRA and VORTEX.—**Bauchw'**. See LUMBAR VERTEBRÆ.—**Beugew'**. The lowermost five of the cervical vertebrae. [L, 31.]—**Brustw'**. See DORSAL VERTEBRÆ.—**Falsche W.** See FALSE VERTEBRÆ.—**Halsw'**. A cervical vertebra. [L.]—**Herzw'**. See VORTEX of the heart.—**Hinterhauptw'**. See OCCIPITAL VERTEBRÆ.—**Knorpelw'**. **WISPELN** (Ger.), n. Vi<sup>2</sup>sp/e<sup>2</sup>ln. See BLÆSITAS.

**WISSMUT** (Ger.), n's. Vi<sup>2</sup>s/mut. See BISMUTH.

**WISTARIA** (Lat.), **WISTERIA** (Lat.), n's f. Wi<sup>2</sup>st-ar(a<sup>2</sup>r)/i<sup>2</sup>-a<sup>2</sup>-er(ar)/i<sup>2</sup>-a<sup>2</sup>. From *Wistar*, an American anatomist. Fr., *wistérie*. A genus of leguminous shrubs of the *Galegeæ*. The *Wisterieæ* are (Endlicher) a subtribe of the *Phaseoleæ*, or (Reichenbach) a section of the *Glycyneæ*. [a, 35.]—**W. chinensis.** **W. sinensis.** The figi; a Chinese species. The flowers are probably distilled for their perfume. The bark contains wistarin and a resin which appears to be toxic.

**WISTARIN**, n. Wi<sup>2</sup>st/a<sup>2</sup>r-i<sup>2</sup>n. A poisonous crystallizable glucoside obtained from the bark of *Wistaria chinensis*. ["Proc. of the Am. Pharm. Assoc.," xxxv (a, 14).]

**WITCH-WOOD**, n. Wi<sup>2</sup>ch'w'u<sup>2</sup>d. See ETOXIMUS *europæus*, *Pyrus aucuparia*, and *ULMUS montana*.

**WITHANIA** (Lat.), n. f. Wi<sup>2</sup>th-an(a<sup>2</sup>n)/i<sup>2</sup>-a<sup>2</sup>. Fr., *withanie*. A genus of solanaceous shrubs. [a, 35.]—**W. coagulans.** Vegetable rennet; a shrub common in Afghanistan and northern India. The dried berries, the *puneerbund* (cheese-maker) of the Afghans, con-

tain a ferment closely resembling animal rennet, and are used for coagulating milk. The active principle may be extracted from the seeds. The fruits, when fresh, are emetic, and, dried, are used for dyspepsia and flatulent colic, either alone or combined with the tonic leaves and twigs of *Rhazya stricta*. The bitter leaves are antelmintic. The plant is also used in veterinary medicine. [a, 35.]—**W. frutescens.** A species referred by some authors to *Physalis*. In Spain the seeds are used as beads. [a, 35.]—**W. somnifera.** The winter-cherry of India, probably the *σπύρχον ἰνδικόν* of Dioscorides. The root and bitter leaves are powerfully narcotic and have been used as a hypnotic in alcoholism and emphysematous dyspnea. In India the leaves are used as an anthelmintic and as an application to carbuncles; the root is used as a deobstruent, diuretic, and alexipharmac; and as an application in obstinate ulcers and rheumatic swellings. The fruits are used as a diuretic and to coagulate milk. [a, 85.]

**WITHE**, n. Wi<sup>2</sup>th. A flexible branch or twig used for binding.

**WITHERS**, n. pl. Wi<sup>2</sup>th<sup>2</sup>/u<sup>2</sup>r<sup>2</sup>z. The ridge on a horse's back extending from the root of the neck to between the shoulder blades; formed by the prominent spinous processes of the first eight or ten dorsal vertebrae. [L; a, 34.]

**WITHER-WRUNG**, adj. Wi<sup>2</sup>th<sup>2</sup>/u<sup>2</sup>r-ru<sup>2</sup>n<sup>2</sup>. Of the veterinarians, injured in the withers. [a, 34.]

**WITHY**, n. Wi<sup>2</sup>th/i<sup>2</sup>. The *Salix viminalis* and other species of *Salix*. [a, 35.]

**WITLOOF**, n. Wi<sup>2</sup>t/luf. A large-rooted variety of *Cichorium intybus*. [a, 35.]

**WITTEKIND** (Ger.), n. Vi<sup>2</sup>t/te<sup>2</sup>-ki<sup>2</sup>nd. A place in Prussian Saxony where there is a saline spring containing bromine and iodine. [L, 49, 57, 135 (a, 14).]

**WITTER'S MINERAL SPRINGS**, n. Wi<sup>2</sup>t/u<sup>2</sup>r<sup>2</sup>z. A place in Lake County, California, where there are gaseous alkaline, chalybeate, and sulphurous springs. [Anderson (a, 14).]

**WITTWENKIND** (Ger.), n. Vi<sup>2</sup>t/ve<sup>2</sup>n-ki<sup>2</sup>nd. A posthumous child. [a, 48.]

**WOAD**, n. Wod. The *Isatis tinctoria*; also the *Reseda luteola* and *Genista tinctoria*. [a, 35.]—**Wild w.** The *Reseda luteola*. [a, 35.]—**W.-waxen.** See *GENISTA tinctoria*.

**WOCHENABGANG** (Ger.), n. Voch<sup>2</sup>/e<sup>2</sup>n-a<sup>2</sup>b-ga<sup>2</sup>n<sup>2</sup>. See LOCHIA.

**WOCHENBETT** (Ger.), n. Voch<sup>2</sup>/e<sup>2</sup>n-be<sup>2</sup>t. The puerperium.—**W'reinigung.** See LOCHIA.

**WOCHENFIEBER** (Ger.), n. Voch<sup>2</sup>/e<sup>2</sup>n-feb-e<sup>2</sup>r. See PUERPERAL FEVER.

**WOCHENFLUSS** (Ger.), **WOCHENREINIGUNG** (Ger.), n's. Voch<sup>2</sup>/e<sup>2</sup>n-flus, -rin-i<sup>2</sup>g-un<sup>2</sup>. See LOCHIA.

**WOCHENTULPEL** (Ger.), n. Voch<sup>2</sup>/e<sup>2</sup>n-tu<sup>2</sup>lp-e<sup>2</sup>l. See MUMPS.

**WÖCHNERIN** (Ger.), n. Vu<sup>2</sup>ch<sup>2</sup>/ne<sup>2</sup>r-i<sup>2</sup>n. A lying-in woman.—**Abgang der W'en.** See LOCHIA.

**WOHLBELEIBTHEIT** (Ger.), n. Vol<sup>2</sup>/be<sup>2</sup>-libt-hit. See CORPULENCE.

**WOHLGEMUTH** (Ger.), n. Vol<sup>2</sup>/ge<sup>2</sup>-mut. The *Origanum vulgare*. [a, 35.]

**WOHLVERLEI** (Ger.), **WOHLVERLEIH** (Ger.), n's. Vol<sup>2</sup>/fe<sup>2</sup>r-i<sup>2</sup>. See ARNICA.—**Berg-W.** See ARNICA *montana*.

**WÖLBUNG** (Ger.), n. Vu<sup>2</sup>lb/un<sup>2</sup>. See VAULT.—**W'smesser.** See CYRTOMETER.

**WOLD**, n. Wo<sup>2</sup>ld. Written also *wolds* and *woulds*. The *Reseda luteola*. [a, 35.] Cf. WOAD.

**WOLF**, n. Wu<sup>2</sup>lf. Gr., *λύκος*. Lat., *lupus*. Fr., *loup*. Ger., *W.* See CANIS *lupus*.—**W's-jaw.** See CLEFT PALATE.

**WOLF** (Ger.), n. Vo<sup>2</sup>lf. See ECHTHIMA and PARATRIMMA.—**W'geschwulst.** See ATHEROMA (1st def.).

**WOLFACH** (Ger.), n. Vo<sup>2</sup>l/fa<sup>2</sup>ch<sup>2</sup>. A place in Baden, Germany, where there is a chalybeate spring. [L, 49, 135 (a, 14).]

**WOLFIAN**, adj. Wu<sup>2</sup>lf/i<sup>2</sup>-n. Investigated by or named from K. F. Wolff, a German anatomist. [a, 48.]

**WOLFRAM** (Ger.), n. Vo<sup>2</sup>l/fa<sup>2</sup>m. See TUNGSTEN.

**WOLFSBANE**, n. Wu<sup>2</sup>lfz/ban. 1. The genus *Aconitum*, especially *Aconitum lycoctonum* and *Aconitum napellus*. 2. The *Arnica montana*. 3. The *Veratrum viride*. [a, 35.]

**WOLFSBAST** (Ger.), n. Vo<sup>2</sup>lfs/ba<sup>2</sup>st. See DAPHNE *mezereum*.

**WOLFSBOHNE** (Ger.), n. Vo<sup>2</sup>lfs/bon-e<sup>2</sup>. See LUPINUS (2d def.).

**WOLFSFUSS** (Ger.), n. Vo<sup>2</sup>lfs/fus. The genus *Lycopus*.

**WOLFSKIRSCH** (Ger.), n. Vo<sup>2</sup>lfs/ker<sup>2</sup>sch-e<sup>2</sup>. The *Atropa belladonna*. [a, 35.]

**WOLFSKRAUT** (Ger.), n. Vo<sup>2</sup>lfs/kra<sup>2</sup>-u<sup>2</sup>t. 1. The *Delphinium staphisagria*. 2. The genus *Aconitum*. [a, 14, 35.]

**WOLFSMILCH** (Ger.), n. Vo<sup>2</sup>lfs/mi<sup>2</sup>lch<sup>2</sup>. The genus *Euphorbia*. [a, 35.]

**WOLFSRACHEN** (Ger.), n. Vo<sup>2</sup>lfs/ra<sup>2</sup>ch<sup>2</sup>-e<sup>2</sup>n. See CLEFT PALATE.

**WOLFSTODSTURMHUT** (Ger.), n. Vo<sup>2</sup>lfs/tod-sturm-hut. See ACONITUM *lycoctonum*.

**WOLFSTRAPP** (Ger.), n. Vo<sup>2</sup>lfs/tra<sup>2</sup>p. See LEONURUS.

**WOLFSWURZEL** (Ger.), n. Vo<sup>2</sup>lfs/wur<sup>2</sup>ts-e<sup>2</sup>l. 1. The *Actæa spicata*. [a, 35.] 2. The genus *Aconitum*. [a, 35.]

**WÖLKCHEN** (Ger.), n. Vu<sup>2</sup>lk<sup>2</sup>/ch<sup>2</sup>-e<sup>2</sup>n. See MACULA *corneæ* and ENECOREMA.—**Hornhautw'**. See MACULA *corneæ*.

**WOLKE** (Ger.), n. Vo<sup>3</sup>lk'e<sup>2</sup>. See NEBULA (1st def.).

**WOLKENSTEIN** (Ger.), n. Vo<sup>3</sup>lk'e<sup>2</sup>n-stin. 1. A place in Zwitter, Saxony, where there are hot sulphurous springs. 2. A place in Styria, Austria, where there are sulphurous springs. [a, 14.]

**WOLKIG** (Ger.), adj. Vo<sup>3</sup>lk'ig. See NEBULOSE.

**WOLLBAUM** (Ger.), n. Vo<sup>3</sup>l'ba<sup>3</sup>u<sup>3</sup>m. See ERIODENDRON and BOMBAX (2d def.).

**WOLLE** (Ger.), n. Vo<sup>3</sup>l'e<sup>2</sup>. See WOOL.—**Haarw'**. See DOWN (1st def.).—**Holz w'**. See FIR-WOOL.—**Hundsw'**. See APOCYNUM.—**Schiesbaumw'**. See PYROXYLIN.—**Seebaumw'**. See ADENOS.

**WOLLFETT** (Ger.), n. Vo<sup>3</sup>l'fe<sup>2</sup>t. See CESYPM and SUINT, and cf. LANOLIN.

**WOLLGRAS** (Ger.), n. Vo<sup>3</sup>l'gra<sup>3</sup>s. The genus *Eriophorum*. [a, 35.]

**WOLLIG** (Ger.), adj. Vo<sup>3</sup>l'li<sup>2</sup>g. See LANATE and LANEUS (1st def.).

**WOLLKRAUT** (Ger.), n. Vo<sup>3</sup>l'kra<sup>3</sup>u<sup>3</sup>t. The genus *Verbascum*. [a, 35.]

**WOLLUST** (Ger.), n. Vo<sup>3</sup>l'lust. Sensuality, lust, voluptuousness. [a, 14.]—**W'euuche**. Epidemic syphilis. [a, 34.]

**WOLRAM** (Ger.), n. Vo<sup>3</sup>l'ra<sup>3</sup>m. Spermaceti. [a, 35.]

**WOMB**, n. Wum. See UTERUS.—**W-passage**. See VAGINA.—**W-stono**. See UTERINE CALCULUS.

**WOOPA**, n. In the Orient, a sort of diarrhoea. [L, 41 (a, 14).]

**WOOD**, n. Wu<sup>4</sup>d. See LIGNUM.—**Amboyna w.** Ger., *Amboinalholz*. The w. of a sort of palm growing in Amboyna. [B, 49.]—**Anacahuite w.** Lat., *lignum anacahuite* [Gr. Ph.]. Ger., *Anacahuiteholz*. A Mexican wood derived from *Cordia Boissieri*, formerly used in pulmonary phthisis. [a, 35.]—**Bitter-w.** See the major list and SIMARUBA.—**Bukkum w.** See under CÆSALPINIA *sappan*.—**Heart-w.** Lat., *duramen*. Ger., *Herzholz*. The older, harder, central portion of an exogenous stem, taking no important part in the vital processes of the plant. It differs usually from sap-w. in color. The term *duramen* is applied by some authors only to heart-w. which has become very dense from peculiar infiltrations. [a, 35.]—**Mountain w.** See LIGNIFORM ASBESTOS.—**Nicaragua-w.** See BRAZIL-w.—**Nephritic w.** See LIGNUM NEPHRITICUM.—**Peach w.**, **Pernambuco w.** See BRAZIL-w.—**Sap-w.** The exterior zone of uncolored active cells forming the newer and softer w. of an exogenous stem. [a, 35.]—**W. alcohol**, **W. naphtha**, **W. spirit**. See METHYL ALCOHOL.

**WOODBIND**, **WOODBINE**, n's. Wu<sup>4</sup>d'bind, -bin. The *Lonicera periclymenum* and other species of *Lonicera*.—**American w.** See LONICERA *grata* and AMPELOPSIS *quinquefolia*.

**WOODHALL SPA**, n. Wu<sup>4</sup>d'ha<sup>4</sup>l. A place in Yorkshire, England, where there is a saline spring. [L, 49, 57 (a, 14).]

**WOOD-LILY**, n. Wu<sup>4</sup>d'li<sup>2</sup>l<sup>2</sup>. The *Pyrola minor*. [a, 35.]—**American w.-l.** The genus *Trillium*. [a, 35.]

**WOODRUFF**, n. Wu<sup>4</sup>d'ru<sup>3</sup>f. The *Asperula odorata* and other species of *Asperula*. [a, 35.]

**WOODRUSH**, n. Wu<sup>4</sup>d'ru<sup>3</sup>sh. The genus *Luzula*. [a, 35.]

**WOOL**, n. Wu<sup>4</sup>l. Gr., *ῥυον*. Lat., *lana*. Ger., *Wolle*. The peculiar outgrowth from the skin of the sheep, corresponding to the hair of other animals. [a, 48.] Used for vaginal tampons and for other means of making pressure.—**Antiseptic w.** Cleaned w. that is impregnated with some antiseptic substance. [a, 34.]—**Holmgren's w's.** Small skeins of w., of all colors, for testing the color-sense. Three of them are selected as special tests: (1) pure green mixed with white, (2) a pale shade of purple, and (3) a bright red. The confusion colors in the heap of worsteds are of all shades and colors. [F.]—**Inhalation of fir-w.-oil**. See *Vapor olei pini silvestris*.—**Pelt-w.** See LAINE *moiraine*.—**Wood-w.** Finely ground wood; a delicately fibred, soft substance used as an absorbent dressing for wounds. [E.]—**W.-fat**. See CESYPM and LANOLIN.

**WOORALI**, **WOORARA**, **WOORARI**, n's. Wu-ra<sup>3</sup>'le, -ra<sup>3</sup>, -re. See CURARE.

**WORM**, n. Wu<sup>4</sup>rm. Gr., *ἄλμυς*. Lat., *vermis*. Fr., *vers*. Ger., *Wurm*. 1. A small, limbless, creeping animal, such as an annelid or helminth. [a, 48.] 2. The median portion of the cerebellum, as distinguished from its hemispheres. [A, 5.]—**Bladder-w.** See CYSTICERCUS.—**Bot-w.** See OXYURIS *vermicularis*.—**Earthw'**. See the major list.—**Flesh-w.** See COMEDO.—**Gourd-w.** An old term for a distoma. [L.]—**Guinea-w.** See FILARIA *medicinalis*.—**Hair-headed w.** See TRICHOCEPHALUS.—**Hooked-w's.** See ACANTHOCEPHALA.—**Long round w.** See ASCARIS *lumbricoides*.—**Long thread-w.** See TRICHOCEPHALUS *dispar*.—**Pallsade w.** See STRONGYLUS *armatus*, *Eustrongylus gigas*, and DOCHYMIS *dendralis*.—**Pin-w.** See OXYURIS *vermicularis*.—**Round w.** See ASCARIS *lumbricoides*.—**Thread-w.** Any w. of thread-like appearance, especially *Oxyuris vermicularis*. [a, 48.]—**Wheat-w.** See LEPTUS *autumnalis* and SARCOPTES *scabiei*.

**WORMIAN**, adj. Wu<sup>4</sup>rm'i<sup>2</sup>n. Named from O. Wurm, a Danish physician (see W. DONES). [a, 48.]

**WORMSEED**, n. Wu<sup>4</sup>rm'sed. 1. Santonica or one of the plants yielding it. 2. The *Chenopodium anthelminticum* or its seed. 3. *Erysimum cheiranthoides*. [a, 35.]—**Aleppo w.**, **Alexandria w.** See under ARTEMISIA *maritima*.—**American w.** See W. (2d def.).—**Barbary w.** A variety of santonica lighter than the official sort and covered with a whitish down, said to be derived from *Artemisia judaica* or from *Artemisia Sieberi* and *Artemisia ramosa*. It consists of calices, either attached to or separate from their peduncles, and of small globular flower-buds. [a, 35.]—**Levant w.** See under ARTEMISIA *maritima*.—**Oil of w.** The

essential oil of santonica. It consists chiefly of cineol and cinene. [a, 35.]—**Spanish w.** The flower-spikelets and tops of *Anabasis tamariscifolia*; used as an anthelmintic in Spain under the name of *chouan*. It resembles santonica, but the parts are larger, without odor, and of a salty taste. [a, 35.]

**WORMWOOD**, n. Wu<sup>4</sup>rm'wu<sup>4</sup>d. 1. The *Artemisia absinthium* and other species of *Artemisia*. 2. Of the U. S. Fl., the leaves and tops of *Artemisia absinthium*. [a, 35.]—**Bastard w.** The genus *Ambrosia*. [a, 35.]—**Compound tincture of w.** See TINCTURA ABSINTHII *composita*.—**Roman w.** 1. The *Artemisia pontica*. 2. The *Ambrosia artemisiifolia*. [a, 35.]—**Salt of w.** See SAL ABSINTHII.—**Tincture of w.** See TINCTURA ARTEMISIE *absinthii*.

**WORT**, n. Wu<sup>4</sup>rt. A.-S., *wurt*, or *wyrt*, a plant. 1. A plant, especially an herb. 2. Formerly, an extract of herbs, now restricted to the liquid infusion of malt. [a, 35.]—**Sweet w.** The clear liquor left after a mash of malt and water has been allowed to clarify.

**WÖRTH** (Ger.), n. Vu<sup>4</sup>rt. A place in Bavaria where there is a saline and chalybeate spring. [L, 135 (a, 14).]

**WORTKLANGSBILD** (Ger.), n. Wo<sup>4</sup>rt'kla<sup>3</sup>n<sup>2</sup>s-bi<sup>2</sup>ld. An auditory word-impression. [“Brain,” xxviii, 1885, p. 443 (K).]

**WORTTAUBHEIT** (Ger.), n. Vo<sup>4</sup>rt'ta<sup>3</sup>u<sup>3</sup>b-hit. See WORD-DEAFNESS.

**WOUND**, n. Wund. Gr., *τραύμα*. Lat., *vulnus*, *plaga*, *læsio*. Fr., *blessure*, *plaie*. Ger., *Wunde*. It., *ferita*. Sp., *herida*. A division of the soft parts of the body by a mechanical force applied externally. [E.]—**Complicated w.** A w. accompanied by great hæmorrhage, pain, or the presence of a foreign body. [E.]—**Contused w.** Fr., *plaie par écrasement*. A w. produced by contusion. [a, 34.]—**Flesh-w.** A w. involving only skin and superficial muscular layer. [a, 34.]—**Gunshot w.** Lat., *scelopetoplogia*. Fr., *plaie d'armes à feu*. A w. inflicted by fire-arms. [E.]—**Incised w.** Ger., *Schnittwunde*. A cut produced by a sharp-edged instrument. [E.]—**Lacerated w.** Fr., *plaie par arrachement*. Ger., *Risswunde*. A w. by tearing.—**Open w.** A w. that has free external communication. [a, 34.] Cf. *Subcutaneous w.*—**Poisoned w.** See PLAIE *envenimée*.—**Punctured w.** *Stichverletzung*, *Stichwunde*. A more or less deep w. with but little laceration of the skin; produced by a thrust with a sharp instrument, an animal's horn or tooth, etc. [a, 34.]—**Simple w.** A w. in which the parts are only divided, as distinguished from a complicated w. [E.]—**Subcutaneous w.** A w. in which the external opening is very small. [E.]—**Uterine w.** Fr., *plaie utérine*. A term sometimes employed to denote the condition of that portion of the inner surface of the uterus from which the placenta has been recently cast off.

**WOUNDWORT**, n. Wund'wu<sup>4</sup>rt. One of the various species of *Stachys*; also *Anthyllis vulneraria*, *Solidago virga aurea*, *Symphitum officinale*, etc. [a, 35.]—**Clown's w.** The *Stachys palustris*. [a, 35.]—**Hercules's w.** The *Heracleum panaces*. [a, 35.]—**Knight's water-w.** The *Stratiotes aloides*. [a, 35.]

**WOORALI**, **WOORARA**, n's. Wu-ra<sup>3</sup>'le, -ra<sup>3</sup>. See CURARE.

**WRACK**, n. Ra<sup>3</sup>k. Sea-weed, especially that used for kelp. [a, 35.]—**Grass-w.**, **Sea-w.** The *Zostera marina*. [a, 35.]

**WRAPPER**, n. Ra<sup>3</sup>p'u<sup>3</sup>r. See VOLVA (1st def.).

**WREATH**, n. Reth. See KRANZform.

**WRENCH**, n. Re<sup>2</sup>n<sup>2</sup>ch. 1. See SPRAIN. 2. An instrument used for turning or twisting. [a, 48.]—**Thomas's w.** A w. for holding and twisting club-foot, consisting of a monkey-w. with two arms bent to conform to the dorsum and sole of the foot and secured at right angles to each of the jaws of the w. [A, 520 (a, 29).]

**WRIGHTIA** (Lat.), n. f. Rit'i<sup>2</sup>a<sup>3</sup>. From W. Wright, a Jamaica botanist. Fr., *wrightie*. A genus of shrubs or small trees. The *Wrightea* and *Wrightiea* are tribes of the *Apocynaceæ*. [a, 35.]—**W. antidiysenterica**. See HOLLARRHENA *antidiysenterica*.—**W. tinctoria**. A small tree of southern India. The pungent leaves are chewed for toothache, and yield Pala indigo. The bark is substituted for conessal-bark, though destitute of its properties. [a, 35.]—**W. tomentosa**. A species which yields a yellow dye. The bark is used for scorpion bites. [a, 35.]

**WRIGHTINE**, n. Rit'en. See CONESSINE.

**WRINKLE**, n. Ri<sup>2</sup>n<sup>2</sup>k'l. Gr., *ρύση*. Lat., *ruga*. Fr., *ride*, *pli*. Ger., *Rünzel*, *Falte*. A linear depression in a surface, sometimes also a corresponding elevation. [a, 48.]

**WRIST**, n. Ri<sup>2</sup>st. See CARPUS.

**WRY-NECK**, n. Ri<sup>2</sup>ne<sup>2</sup>k. Lat., *torticollis*, *caput obtusum*. Fr., *cou tortu*. Ger., *Halbschiefheit*. See TORTICOLLIS. Rotatory w.-n. A variety in which movements of lateral flexion and rotation of the head take place, commonly spasmodic. [A, 77.]

**WUCHERBLUME** (Ger.), n. Vu<sup>4</sup>ch<sup>2</sup>e<sup>2</sup>r-blum-e<sup>2</sup>. See CHRYS-ANTHEMUM.

**WUCHERND** (Ger.), adj. Vu<sup>4</sup>ch<sup>2</sup>e<sup>2</sup>rnd. See LUXURIANT.

**WUCHERUNG** (Ger.), n. Vu<sup>4</sup>ch<sup>2</sup>e<sup>2</sup>r-un<sup>2</sup>. See PROLIFERATION.—**Hautw'**. See HYPERDERMATOSIS.

**WULST** (Ger.), n. Vulet. 1. A swelling, eminence, convolution, or tuberosity. 2. See VOLVA.—**Allantoisw'**. See ALLANTOISW'.—**Aufgesetzte W.** See SPLENIUM (3d def.).—**Bogenw'**. See GYRUS *fornicatus*.—**Centralw'**. Lit., central convolution; one of the convolutions around the fissure of Rolando. [I, 6 (K).]—**Gerollte W.** See HIPPOCAMPUS *major*.—**Grenzw' des Gehirns**. The germinal wall.—**Grosse Hirnw'**. A cerebral hemisphere. [I, 3 (K).]—**Grosshirnrandw'**, **Hauptw' (des Gehirns)**. A cerebral convolution. [K.]—**Hinfere W.** See HIPPOCAMPUS *minor*.—**Idiomuskuläre W.** Lit., idio-muscular swelling; a swelling or contraction of a muscle at the negative pole on passing a strong galvanic current through it. [Gruenhagen (K).]—**Kohldeckelw'**. See TUBERCULUM *epiglottidis*.—**Klappenw'**. See VERMIS *inferior posterior*.—**Kleine W.** See HIPPOCAMPUS *minor*.—**Lange Insel-**

**w'**. The lower edge of the insula. [I. 6 (K).]—**Leberw'**. The portion of the mesoderm from which the liver is developed. [L.]—**Markw'**. A cerebral convolution. [K.]—**Medullarwülste**. See *Medullary RIDGES*.—**Nabelw'**. See *CARUNCLE* (3d def.).—**Rindenw'**. A cerebral convolution. [I. 17 (K).]—**Rückenwülste**. See *Medullary CENTRE and DORSAL RIDGES*.—**Scheidenwülste**. See *COLUMNS of the vagina*.—**Spindelw'**. See *Subcollateral CYRUS*.—**W. des Balkens**. See *SPLENIUM* (3d def.).—**Zungenw'**. See *Subcalcarine GYRUS*.—**Zwingenw'**. See *GYRUS fornicatus*.

**WULSTIG** (Ger.), adj. *Vulst'ig*. Inflated, puffy, tumefied, volvate. [a. 35.]

**WULSTUNG** (Ger.), n. *Vulst'un*<sup>2</sup>. Swelling, puffiness. [A. 521.]

**WUNDARZNEI** (Ger.), n. *Vund'ar'tst-e-n-i*. Surgery. [a. 14.]

**WUNDARZT** (Ger.), n. *Vund'ar'tst*. See *SURGEON*.

**WUNDÄRZTLICH** (Ger.), adj. *Vund'ar'tst-li<sup>2</sup>ch<sup>2</sup>*. See *SURGICAL*.

**WUNDBRAND** (Ger.), n. *Vund'bra<sup>2</sup>nd*. See *DIPHTHERIA of wounds*.

**WUNDE** (Ger.), n. *Vund'e*<sup>2</sup>. See *WOUND*.—**Bissw'**. A bite. [a. 34.]—**Durchdringende W.** A penetrating wound. [L. 80.]—**Geschlagene W.** See *Contused WOUND*.—**Geschossene W.**, **Gewehrsschussw'**. See *Gunshot WOUND*.—**Hieb<sup>2</sup>w'**. A gash. [a. 34.]—**Moxabrandw'**. See *BRADYCAUMA*.—**Quetschw'**. See *Contused WOUND*.—**Rissw'**. See *Lacerated WOUND*.—**Schnittw'**. See *Incised WOUND*.—**Schussw'**. See *Gunshot WOUND*.—**Stichw'**. See *Punctured WOUND*.

**WUNDEISEN** (Ger.), n. *Vund'iz-e<sup>2</sup>n*. See *PROBE and SOUND*.

**WUNDERBAUM** (Ger.), n. *Vund'e<sup>2</sup>r-ba<sup>2</sup>u<sup>2</sup>m*. See *RICINUS*.

**WUNDERBLUME** (Ger.), n. *Vund'e<sup>2</sup>r-blum-e<sup>2</sup>*. See *MIRABILIS*.

**WUNDERBLUT** (Ger.), n. *Vund'e<sup>2</sup>r-blut*. See *BACILLUS prodigiosus*.

**WUNDERGEBURT** (Ger.), n. *Vund'e<sup>2</sup>r-ge<sup>2</sup>-burt*. See *MONSTROSITY*.

**WUNDERNETZ** (Ger.), n. *Vund'e<sup>2</sup>r-ne<sup>2</sup>ts*. See *CHORIOID PLEXUS and RETE mirabile*.

**WUNDFÄDEN** (Ger.), n. *Vund'fad-e<sup>2</sup>n*. See *CHARPIE*.

**WUNDFÄULNISS** (Ger.), n. *Vund'foil-ni<sup>2</sup>s*. See *HOSPITAL GANGRENE*.

**WUNDHOLZBAUM** (Ger.), n. *Vund'ho<sup>2</sup>lts ba<sup>2</sup>u<sup>2</sup>m*. The *Fraxinus excelsior*. [a. 35.]

**WUNDKLEMMER** (Ger.), n. *Vund'kle<sup>2</sup>m-me<sup>2</sup>*. See *SERRE-FINE*.

**WUNDKRAUT** (Ger.), n. *Vund'kra<sup>2</sup>u<sup>2</sup>t*. The *Sedum anacampseros*, *Veronica officinalis*, *Anthyllis vulneraria*, and *Senecio sarracenicus*; in the pl., *Wundkräuter*, see *SPECIES vulnerariae*. [B. 48 (a. 14); a. 35.] Cf. *WUNDWORT*.—**Heiliges W.**, **Indianisches W.**, **Peruvianisches W.** Tobacco-leaves. [a. 35.]

**WUNDMITTEL** (Ger.), n. *Vund'mi<sup>2</sup>t-te<sup>2</sup>l*. A vulnerary.

**WUNDNARBIG** (Ger.), adj. *Vund'na<sup>2</sup>rb-i<sup>2</sup>g*. See *CICATRICIAL*.

**WUNDPLASTER** (Ger.), n. *Vund'pfa<sup>2</sup>st-e<sup>2</sup>r*. See *EMPLASTRUM RESINÆ*.

**WUNDSCHRECK** (Ger.), n. *Vund'shre<sup>2</sup>k*. See *SHOCK* (1st def.).

**WUNDSEIN** (Ger.), n. *Vond'zin*. See *INTERTRIGO*.

**WUNDSTUPOR** (Ger.), n. *Vund'stup-or*. See *SHOCK* (1st def.).

**WUNDWERDEN** (Ger.), n. *Vund've<sup>2</sup>rd-e<sup>2</sup>n*. See *INTERTRIGO*.

**WURALL**, n. *Wu-ra<sup>2</sup>le*. See *CURARE*.

**WÜFEL** (Ger.), n. *Vu<sup>2</sup>rf'e<sup>2</sup>l*. A cube.—**W'förmig**. See *CUBOID*.—**W'ig**. Tessellated. [a. 35.]

**WÜRGEN** (Ger.), n. *Vu<sup>2</sup>rg'e<sup>2</sup>n*. See *STRANGULATION*.

**WURM** (Ger.), n. *Vurm*. 1. A worm. 2. Actinomycosis. 3. See *FARCY*. 4. Paronychia. [G.] 5. The inferior vermiform process. [a. 18.]—**Affenw'**. See *DERMATOBIA nozialis*.—**Bandw'**. See the major list.—**Beinw'**. See *FILARIA medinensis*.—**Blasenstachelw'**, **Blasenw'**. See *ECCHINOCOCCUS*.—**Bunter Malw'**. See *MELØE variegatus*.—**Gehirnblasenw'**. **WYH**, n. A place in the Lower Engadine, Switzerland, where there are saline purgative springs. [A. 363 (a. 21).]

**WYK**, n. A sea-bathing resort on the island of Föhr, Schleswig-Holstein. [L. 30, 37, 57 (a. 14).]

## X

**XALAPA, XALAPPA**, n's. Ger., *Xalapa*. See **JALAPA**.—**X-Winde** (Ger.). See **IPOMEA jalapa** (1st def.).

**XANG**, n. A name for several species of *Pluchea* cultivated in Cochinchina for their medicinal properties. The leaves are vulnerary and sudorific and are used in tonic and emollient baths. The juice is saltish, and is used in aphthæ, being both swallowed and applied to the mucous membrane after the latter has been cleaned with the oil of a certain fish. [a, 35.]

**XANTHAMIDE**, n.  $Za^{2n}n^{th}a^{2m}i^{2d}$ . Fr., *xanthogénamide*. Ger., *Xanthogenamid*. A substance,  $CS \begin{smallmatrix} NH_2 \\ | \\ O.C_2H_5 \end{smallmatrix}$ , forming pyramidal crystals. [B.]

**XANTHEIN**, n.  $Za^{2n}n^{th}e^{2i}i^{2n}$ . From *ξανθός*, yellow. Fr., *xanthéine*. Of Filhol, a yellow substance obtained by treating dahlia flowers with alcohol. [B, 270 (a, 38).] Cf. **ANTHOKXANTHEIN**.

**XANTHELASMA** (Lat.), n. n.  $Za^{2n}n^{th}(za^{2n}n^{th})e^{2i}a^{2z}(a^{2s})^{ma^2}$ . Gen., *-as/matos (-atis)*. From *ξανθός*, yellow, and *ελασμα*, a lamina. Fr., *Xanthelasma*. See **XANTHOMA**.—**X. multiplex**. See **XANTHOMA multiplex**.—**X. palpebrarum**. X. of the skin of the eyelids. [F.]—**X. vitiligoides**. See **XANTHOMA**.

**XANTHELASMA** (Fr.), n.  $Gsa^{2n}n^{2}ta^{2}la^{2}s^{ma^2}$ . See **XANTHOMA planum**.—**X. en tumeurs**. A very rare pathological variety of xanthoma in which there are developed first nodosities and afterward tumors varying in size from that of an almond to that of a hen's egg, and generally lobulated. [L, 88 (a, 14).]—**X. généralisé**. See **XANTHOMA multiplex**.—**X. tuberculeux**. Xanthoma combined with general tuberculosis. [L, 87 (a, 14).]—**X. tubéreux**. See **XANTHOMA tuberosum**.

**XANTHELASMOIDEA** (Lat.), n. f.  $Za^{2n}n^{th}(za^{2n}n^{th})e^{2i}a^{2z}(a^{2s})^{mo(mo^{2})i^{2d}(ed)^{e2}a^2}$ . From *ξανθός*, yellow, *ελασμα*, a lamina, and *είδος*, resemblance. Of Fox, see **URTICARIA pigmentosa**.

**XANTHENE**, n.  $Za^{2n}n^{th}en$ . Fr., *xanthène*. Ger., *Xanthan*. A yellow substance (probably a mixture of different substances) obtained by heating persulphocyanic acid. [a, 14.]

**XANTHIC**, adj.  $Za^{2n}n^{th}i^{2k}$ . From *ξανθός*, yellow. Fr., *xanthique*. 1. Yellow. 2. Derived from xanthin. [B.]—**X. oxide** [Marcet]. See **XANTHIN**.

**XANTHIC ACID**, n.  $Za^{2n}n^{th}i^{2k}$ . Fr., *acide xanthique*. Ger., *Xanthogensäure*. A monobasic acid,  $CS \begin{smallmatrix} O.C_2H_5 \\ | \\ S \end{smallmatrix} = C_3S_2OH_2$ , a colorless, oily liquid, having a penetrating, sulphurous odor and a sharp, astringent taste. [B.]

**XANTHIN**, n.  $Za^{2n}n^{th}i^{2n}$ . From *ξανθός*, yellow. Fr., *xanthine*. Ger., X., *Krappgelb*. 1. A substance,  $C_5H_4N_4O_2$ , occurring in minute quantities in the urine (especially after the use of sulphur baths), in the serum of the blood, in muscular tissue, in the liver, spleen, thymus gland, pancreas, and brain, and pathologically as a constituent of xanthic calculi. It occurs as a white or pale-yellow amorphous powder, or, if deposited from a slowly evaporating solution, as small scales. It acts as a base, forming crystalline compounds with acids and alkalis. [B, 3, 12, 13, 49.] 2. See **PHOSPHINE** (3d def.). 3. See **ANTHOKXANTHEIN**.—**X<sup>2</sup>stein** (Ger.). See *Xanthic CALCULUS*.

**XANTHINURIA** (Lat.), n. f.  $Za^{2n}n^{th}(za^{2n}n^{th})i^{2n}u^{2r}(ur)^{i2}a^2$ . From *ξανθός*, yellow, and *ούρον*, urine. See **XANTHURIA**.

**XANTHIUM** (Lat.), n. n.  $Za^{2n}n^{th}(za^{2n}n^{th})i^{2n}u^{2m}(u^{2m})$ . Ger., *ξανθιον* (from *ξανθός*, yellow). Fr., *lampourde*. Ger., *Spitzklette*. Cockle- (or clot-) bur, clot-weed; a genus of coarse herbs variously placed in the *Anabrace* and in the *Helianthoides*. The *Xanthie* are a division of the *Compositæ*. [a, 35.]—**X. catharticum**. Fr., *lampourde cathartique*. Ger., *Purgirspitzklette*. A Peruvian purgative species. [a, 35.]—**X. indicum**, **X. italicum**, **X. macracarpum**, **X. orientale**. A widely dispersed species used like *X. strumarium*. The fruit is demulcent and the involucre is applied to the ear in cephalalgia. [a, 35.]—**X. spinosum**. Fr., *glouteron*. Bathurst bur, spiny clot-bur; perhaps a native of Chile. It is tonic and febrifuge, and was formerly prescribed for rabies. [a, 35.]—**X. strumarium**, **X. vulgare**. Fr., *lampourde commune*, *glouteron*, *petit glouteron*, *herbe aux écornelles*. (Ger., *gemeine Spitzklette*, *Knupfklette*. Small burdock, ditch- (or louse-) bur, the *ξανθιον* of the ancients; a widely dispersed species containing a yellow dye. The root has been used as a diaphoretic and in China its extract is applied to ulcers. The herb and fruit, formerly official as *herba et semen xanthii* (see *burdane* [see *lappæ minoris*]), have been used as a laxative, diuretic, vesicant, styptic, etc. [a, 35.]

**XANTHURIA** (Lat.), n. f.  $Za^{2n}n^{th}(za^{2n}n^{th})i^{2n}u^{2r}(ur)^{i2}a^2$ . From *ξανθός*, yellow, and *ούρον*, urine. A condition of urine in which xanthic oxide is deposited. [a, 34.]

**XANTHOCHROIA** (Lat.), n. f.  $Za^{2n}n^{th}(za^{2n}n^{th})o(o^{2})kro(ch^{2}ro^{2})i^{2}a^2$ . From *ξανθός*, yellow, and *χρoιά*, the skin. See **XANTHODERMA**.

**XANTHOCYHMUS** (Lat.), n. m.  $Za^{2n}n^{th}(za^{2n}n^{th})o(o^{2})kim(ch^{2}n^{2m}u^{2s}ur^{2s})$ . From *ξανθός*, yellow, and *χυμός*, juice. Fr., *xanthochyme*. Ger., *Ghorkebaum*. A genus of guttiferous trees differing but little from *Garcinia*. [a, 35.]—**X. dulcis**. An edible-fruited tree of the Moluccas and East Indies. [a, 35.]—**X. ovalifolius**. A Ceylon species. Its juice was formerly regarded as the source of gamboge. [a, 35.]—**X. pictorius**, **X. tinctorius**. An East Indian tree. The fruits, which are eaten ripe, yield, when nearly matured, an acid yellow gamboge gum used as a water-color. [a, 35.]

**XANTHOCREATININE**, n.  $Za^{2n}n^{th}o-kre-a^{2t}i^{2n}en$ . Fr., *xanthocréatine*. Ger., *Xanthokreatinin*. A poisonous alkaloid,  $C_{21}H_{19}N_3O$ , obtained as yellow crystals from fresh beef by extracting with water and a little oxalic acid, exhausting with alcohol, precipitating with ether, and partially evaporating. It produces lassitude, sleepiness, vomiting, and purgation. [B, 270 (a, 38); D. Ferguson, "N. Y. Med. Jour.," Aug. 4, 1888.]

**XANTHOCYANOPIA** (Lat.), n. f.  $Za^{2n}n^{th}(za^{2n}n^{th})o(o^{2})si(ku^{2})a^{2n}(a^{2n})op(o^{2})p^{i2}a^2$ . From *ξανθός*, yellow, *κύανος*, blue, and *ὥψις*, appearance. Of Mauthner, red-green blindness, blue and yellow being the colors that are perceived. [a, 34.]

**XANTHOCYSTINE**, n.  $Za^{2n}n^{th}o-si^{2st}en$ . From *ξανθός*, yellow, and *κύστις*, the bladder. A nitrogenous substance of doubtful composition, intermediate between cystine and xanthine, found in the whitish tubercles developed in the digestive mucous membranes, liver, pericardium, and hepatic tissue of a corpse that had been buried for two months. [B, 93 (a, 14).]

**XANTHODERMA** (Lat.), n. n.  $Za^{2n}n^{th}(za^{2n}n^{th})o(o^{2})du^{2rm}(de^{2rm})a^2$ . Gen., *-dermatos (-atis)*. From *ξανθός*, yellow, and *δέρμα*, the skin. Fr., *xanthodermie*. Yellowness of the skin. [G.]

**XANTHOGEN**, n.  $Za^{2n}n^{th}o-je^{2n}$ . From *ξανθός*, yellow, and *γεννᾶν*, to engender. Fr., *xanthogène*. Ger., X. 1. The radicle,  $CS.O.C_2H_5$ , of xanthic acid. [B.] 2. See **XANTHEIN**.—**X. amide**. See **XANTHAMIDE**.

**XANTHOGLOBULIN**, n.  $Za^{2n}n^{th}o-glo^{2b}u^{2l}i^{2n}$ . From *ξανθός*, yellow, and *globulus*, a globule. Fr., *xanthoglobuline*. A substance found by Scherer in the liver and pancreas; now known to be identical with hypoxanthine. [B, 3.]

**XANTHOKYANOPY**, n.  $Za^{2n}n^{th}o-si-a^{2n}o^{2}p^{i2}$ . See **XANTHOCYANOPIA**.

**XANTHOLINE**, n.  $Za^{2n}n^{th}o-len$ . See **XANTHOMA**.

**XANTHOMA** (Lat.), n. n.  $Za^{2n}n^{th}(za^{2n}n^{th})om^{2}a^2$ . From *ξανθός*, yellow. Fr., *xanthome*. Ger., *Xanthom*. A neoplastic disease of the skin, occurring most commonly, though not always, near the inner or outer canthus of the eye and usually symmetrically, in the form of soft elevations or flat patches of a light- or dark-yellow color, due to new formation of connective tissue together with a deposit of fat in the corium and subcutaneous areolar tissue. [G, 2.]—**X. diabetorum**, **X. diabeticum**. An eruption of dull-red, discrete or confluent papules, firm to the touch, that have well-defined margins, are roundish or obtusely conical, and may have a solid yellow or yellowish white head, occurring on the forearms first, then on other parts of the body of persons affected with diabetes mellitus. [Crocker (a, 34).]—**X. multiplex**. X. in the form of multiple tumors disseminated over the body. [G.] Cf. **XANTHOMATOSIS**.—**X. planum**. A variety of x. that appears in the form of yellowish-white or lemon-yellow patches but slightly elevated above the surface, situated most commonly near the angles of the eyes or on the lids, usually appearing symmetrically on both eyes. It also occasionally occurs on other parts of the face or on certain of the mucous membranes. [G.]—**X. tuberculatum**, **X. tuberculosum**, **X. tuberosum**. X. characterized by milium-like yellowish-white nodules or tubercular elevations occurring either singly or in groups, and situated usually on the face (though rarely on the eyelids) and on various regions of the trunk and extremities, especially about the joints. They also occur as flattened elevations on the palms or soles. [G.]

**XANTHOMATOSIS** (Lat.), n. f.  $Za^{2n}n^{th}(za^{2n}n^{th})om-a^{2t}(a^{2t})os^{i2}a^2$ . Gen., *-os/eos (-ia)*. From *xanthoma* (q. v.). Fr., *xanthomatose*. A cutaneous disease in which xanthoma tubercles or patches are disseminated over the body so as to imply a special diathesis. [G.] Cf. **XANTHOMA multiplex**.

**XANTHOPATHIA** (Lat.), n. f.  $Za^{2n}n^{th}(za^{2n}n^{th})o(o^{2})pa^{2th}(pa^{2th})i^{2e}a^2$ . From *ξανθός*, yellow, and *πάθος*, disease. See **XANTHOMA** and **XANTHOMATOSIS**.

**XANTHOPHANE**, n.  $Za^{2n}n^{th}o-fan$ . From *ξανθός*, yellow, and *φαίνω*, to show. A yellowish fat obtained from the cones of the retina. [K.]

**XANTHOPHTHALMUM** (Lat.), n. n.  $Za^{2n}n^{th}(za^{2n}n^{th})o(o^{2})tha^{2l}(tha^{2l})mu^{2m}(mu^{2m})$ . From *ξανθός*, yellow, and *ὀφθαλμός*, the eye. Fr., *xanthophthalmie*. The genus *Chrysanthemum*. [a, 35.]

**XANTHOPHYLL**, n.  $Za^{2n}n^{th}o-phi$ . From *ξανθός*, yellow, and *φύλλον*, a leaf. Fr., *xanthophylle*. 1. The yellow coloring matter of plants. [a, 35.] Cf. **ERIOLIN**.

**XANTHOPICRINE, XANTHOPICRITE**, n's.  $Za^{2n}n^{th}o-pi^{2k}ren$ , -rit. Lat., *xanthopierium* (from *ξανθός*, yellow, and *πικρός*, pungent). Ger., *Xanthopierit*. 1. See **BEAUMIERIS**. 2. The aromatic principle in the bark of *Xanthoxylum caribbæum*. [B, 5, 93, 270 (a, 38).] 3. A bitter astringent crystalline substance in the root of *Xanthoxylon ternatum*. [a, 35.]

**XANTHOPROTEIC ACIDS**, n. pl.  $Za^{2n}n^{th}o-prot-e^{i2}k$ . Fr., *acides xanthoprotéiques*. Ger., *Xanthoproteinsäuren*. The nitro-compounds produced by the action of strong nitric acid on a solution containing albumin or albuminoids. [B, 4, 270 (a, 38).]

**XANTHOPSIA** (Lat.), n. f.  $Za^{2n}n^{th}(za^{2n}n^{th})o(o^{2})ps^{i2}a^2$ . From *ξανθός*, yellow, and *ὥψις*, appearance. Fr., *xanthopsie*. Ger., *Gelbsehen*, *Xanthopsie*, *Xanthopsie*. A disturbance of the function of vision in which objects appear yellow.

**XANTHOPSYDRACIA** (Lat.), n. f.  $Za^{2n}n^{th}(za^{2n}n^{th})o(o^{2})ps^{i2}d$ . ( $u^{2h}lrasra^{2k}i^{2}a^2$ ). From *ξανθός*, yellow, and *ψύδραξ*, a blister.

Ger., gelbe Wasserkrätze. Yellowish eczema impetiginosum. [L, 50 (a, 14).]

**XANTHOPUCCINE**, n.  $Za^{2}nth-o-pu^{3}k'sen$ . An alkaloid obtained from the rhizome of *Hydrastis canadensis*. According to Lloyd, it is only impure berberine; but Maisch considers it distinct. [B, 270 (a, 38); "Proc. of the Am. Pharm. Assoc.," xxxii (a, 14).]

**XANTHOPURPURIN**, n.  $Za^{2}nth-o-pu^{3}r-pu^{3}r-i^{2}n$ . From *favōs*, yellow, and *purpura*, purple. Fr., *xanthopurpurine*. Ger., *X*. A yellow coloring matter,  $C_{14}H_{10}O_4$ , obtained from *Rubia tinctorum*. It occurs as yellowish-red acicular crystals. [B, 5 (a, 38); B, 46, 93 (a, 14).]

**XANTHORRHAMNIN**, n.  $Za^{2}nth-or-ra^{2}m'ni^{2}n$ . Fr., *xanthorrhannine*. A substance identical with the rhamnin of Stein and the  $\alpha$ -rhamnegin of Schützenberger, but Liebermann and Hörmann give it the formula  $C_{48}H_{88}O_{29}$ . [B, 5, 270 (a, 38).]

**XANTHORRHIZA** (Lat.), n. f.  $Za^{2}nth(za^{2}nth)-o^{2}r-riz(rez)'a^{2}$ . From *favōs*, yellow, and *ρίζα*, a root. Fr., *xanthorrhize*. Ger., *Gelbwurz*. A genus of the *Ranunculaceae*. [a, 35].—*X. apiifolia*, *X. simplicissima*, *X. tinctoria*. Ger., *sellerieblättrige Gelbwurz*, *Gelbwurzel*. North American yellow-root-(shrub). The root, formerly in the secondary list of the U. S. Ph., may be used as a simple tonic. The bark of the stem has the same properties. The wood is used as a yellow dye. [a, 35.]

**XANTHORRHEA** (Lat.), n. f.  $Za^{2}nth(za^{2}nth)-o^{2}r-re'(ro^{2}e^{2})-a^{2}$ . From *favōs*, yellow, and *ποια*, a flowing. Fr., *xanthorrhée*. Ger., *Gelbharzbaum*. A genus of liliaceous plants. [a, 35].—*X. arborea*, *X. australis*, *X. bracteata*, *X. hastilis*, *X. media*, *X. minor*, *X. pumilio*, *X. quadrangularis*. Species indigenous to Australia. They yield acaroid resin or similar products. [a, 35.] Cf. *Red acaroid resin*.

**XANTHOS** (Fr.), n.  $Gza^{2}n^{2}toz$ . 1. See **XANTHOSIS**. 2. A yellow pigment found in cancers, usually forming a fatty or opalescent infiltration without any trace of a preceding extravasation of blood. [Lebert, "Path. Anat.," i, p. 275 (a, 18).]

**XANTHOSIS** (Lat.), n. f.  $Za^{2}nth(za^{2}nth)-os'i^{2}s$ . Gen., *-os'eos* (-is). From *favōs*, yellow. Fr., *xanthose*. The formation or a deposit of yellow pigment in the skin or mucous membrane. [a, 34].—*X. of the nasal mucosa*. Of Zuckerkandl, an affection in which abundant and repeated hemorrhages from the mucous membrane of the nose, followed by a degenerative transformation of the blood, result in a persistent infiltration of the mucous membrane with an amorphous matter, giving it a dirty-yellow color. This lesion occurs in patches in all parts of the nose, especially on the septum. ["Ann. des mal. de l'oreille," xix, Feb., 1893, p. 153 (a, 50).]

**XANTHOSOMA** (Lat.), n. n.  $Za^{2}nth(za^{2}nth)-o(o^{2})-som'a^{2}$ . Gen., *-som'atos* (-atis). From *favōs*, yellow, and *σώμα*, a body. Fr., *xanthosome*. A genus of tropical American *Araceae*. [a, 35].—*X. edule*. Ger., *Gelbehnurz*. A Guiana species, perhaps identical with *X. sagittifolium*. The root-stock is eaten. [B; a, 35].—*X. sagittifolium*, *X. utile*, *X. xanthorrhizon*. Fr., *chou caraïbe*. Arrow-leaved spoon-flower of tropical America; used for snakebites. The young shoots (Caraïbe cabbage) and the starchy root-stock are eaten. [B; a, 35.]

**XANTHOXYLENE**, n.  $Za^{2}nth-o^{2}x'i^{2}l-en$ . Fr., *xanthoxylène*. A colorless, volatile oil,  $C_{10}H_{16}$ , of very pleasant smell, obtained from the fruit of *Xanthoxylum alatum*. [a, 14, 38.]

**XANTHOXYLIN**, n.  $Za^{2}nth-o^{2}x'i^{2}l-i^{2}n$ . Fr., *xanthoxyline*. Ger., *X*. 1. A slightly aromatic crystalline substance,  $C_{20}H_{22}O_8$ , obtained from the fruit of *Xanthoxylum alatum*. 2. A preparation made in North America from *Xanthoxylum fraxineum* or *Xanthoxylum carolinianum*. [B, 5, 270 (a, 38).]

**XANTHOXYLON** (Lat.), **XANTHOXYLUM** (Lat.), n's n.  $Za^{2}nth(za^{2}nth)-o^{2}x'i^{2}(u^{2}l)-o^{2}n$ ,  $-u^{2}m(u^{2}m)$ . From *favōs*, yellow, and *ξύλον*, wood. Fr., *xanthoxyle* (1st def.). Ger., *Gelbholz* (1st def.), *Zahnwehholz* (1st def.). 1. The typical genus of a tribe or suborder (the *Xanthoxylaceae* or *Xanthoxyleae*) of the *Rutaceae*, by some authors made an order. Most of the plants of the division are aromatic and pungent. [a, 35.] 2. Of the U. S. Ph., the bark of *X. fraxineum* and *X. carolinianum*. [B, 95 (a, 38).]—**Extractum xanthoxyli fluidum** [U. S. Ph.]. A preparation made by moistening 100 grammes of x. in No. 40 powder with 25 of alcohol, exhausting in a percolator with more alcohol, reserving 90 c. c. of percolate, evaporating the residue to a soft extract, mixing the two, and bringing up to 100 c. c. with alcohol. [B, 95 (a, 38).]—**X. alatum**. Ger., *gelbigeltes Gelbholz*. Japan pepper; a species found in Japan, China, and southern Asia, having a peculiar aromatic pungency. The fruits are used as a condiment and stimulant. [a, 35].—**X. americanum**. See *X. fraxineum*.—**X. aromaticum**. A species found in the Bahamas. The bark of the root, stem, and branches is used as an antiperiodic, and in blennorrhœa, syphilis, and odontalgia. [a, 35].—**X. Avicennæ**. A stimulant Chinese species used as an alexipharmac. [a, 35].—**X. budrunga**. A tree of Assam and India. The fruits, which have the odor of lemon-peel and are used medicinally, contain in their outer coat a fragrant balsam and in their warm, spicy seeds an aromatic oil. The aromatic root is sudorific, emmenagogue, and febrifuge. [a, 35].—**X. capense**. Wild cardamom; an aromatic South African species. [a, 35].—**X. caribbeum**. Fr., *xanthoxyle à gros aiguillons, bois épineux blanc, frêne épineux*. Ger., *carabisches Zahnwehholz*. 1. Satinwood tree of tropical America. The wood (*bois piquant*) is said to contain a poisonous alkaloid. [a, 35.] 2. See *X. clava*.—**X. carolinianum**. 1. Of Gärtner, see *X. clava*. 2. A species found in the Southern States. The bark has properties like those of *X. fraxineum*. [a, 35].—**X. cauliflorum**. Fr., *xanthoxyle (ou clavier) à feuilles de frêne*. A North American species. The inner bark is sialagogue and sudorific. The peppery seeds are used in odontalgia. [a, 35].—**X. clava** (*Herculis*). **X. clavatum**. Fr., *massue d'Hercule* (1st def.), *bois épineux jaune (ou blanc)* (2d def.). Ger., *Zahnwehholz* (1st def.), *carabisches Gelbholz* (1st def.). 1. *Herculis*'s

club, southern prickly ash, West Indian (or prickly) yellow-wood. The aromatic and astringent bark contains berberine and is used like that of *X. aromaticum*. [a, 35.] 2. See *X. fraxineum*.—**X. elegans**. A South American species, locally called *jaborandi*. [a, 35, 39.] Cf. *JABORANDI* of Riedel.—**X. emarginatum**. Ger., *ausgerandetes Gelbholz*. An aromatic tree the wood of which is known in Jamaica as *lignum rotum*. The leaves and the bark of the branches are used in stimulant baths and fomentations. [a, 35].—**X. floridanum**. See *X. clava* (1st def.).—**X. fraxineum**. Fr., *xanthoxyle (ou frêne) épineux*. Ger., *Zahnwehholz*. Tooth-ache tree, prickly ash, angelica tree; a North American species. The

XANTHOXYLON FRAXINEUM. [A, 327.]

capsules and leaves smell like oil of lemon. The bark, which with that of *X. carolinianum* constitutes the x. of the U. S. Ph., occurs in light, brittle, nearly inodorous, dark-gray quills covered with whitish patches and small black dots. It has at first a sweetish, somewhat aromatic taste, but becomes bitter and acid if chewed. It is diuretic, diaphoretic, and stimulant. The powder is also used topically as an irritant. The bark is chewed for odontalgia, and has been recommended in paralysis of the tongue. [a, 35].—**X. fraxinifolium**. See *X. cauliflorum* and *X. fraxineum*.—**X. hermaphroditum**. Ger., *zwitterblütiges Gelbholz*. A Guiana and West Indian tree yielding a yellow balsamic resin used for plasters. The pungent, aromatic capsules are used like pepper. [a, 35].—**X. hiemale**. A Brazilian shrub. The bark is used in odontalgia. [a, 35].—**X. naranjillo**. A species used as a sudorific and diuretic in the Argentine Republic. ["Am. Jour. of Pharm.," Apr., 1890, p. 177 (a, 50).]—**X. nitidum**. A China shrub. The aromatic leaves are used as a spice, and the aromatic root and bark as a sudorific, emmenagogue, and febrifuge. [a, 35].—**X. peckoltianum**. A Brazilian species. The juice of the fresh leaves is an active emmenagogue, and is used as an abortifacient. ["Proc. of the Am. Pharm. Assoc.," xxiv (a, 14).]—**X. pentanome**. Sp., *palo mulato de México* [Mex. Ph.]. A species found in Mexico; used as a tonic, stimulant, and antisyphilitic. [J. M. Maisch, "Am. Jour. of Pharm.," Feb., 1886, p. 72.]—**X. piperitum**. Fr., *xanthoxyle poivré, poivrier du Japon*. Ger., *pefferartiges Gelbholz*, *Pfefferlimone*. Chinese (or Japanese) pepper; an aromatic and pungent shrub. The fruits and the bark are used as a condiment. The leaves, which are also eaten, are applied as a stimulant. The root has been known to European commerce as *peppel mool*. [a, 35].—**X. rhetsa**. Ger., *sichelblättriges Gelbholz*. A prickly tree found in the East Indian Islands. The aromatic bark, the unripe capsules (which taste like fresh orange-peel), and the pungent seeds are used as spices and medicinally as stimulant tonics. The root is purgative. ["Proc. of the Am. Pharm. Assoc.," xxv (a, 14); a, 35].—**X. senegalense**. A tree found on the west coast of Africa. The astringent bark is used externally in rheumatism. Its leaves being sometimes found with artar-root, some regard it as the source of that drug. [a, 35].—**X. ternatum**. Ger., *dreiblättriges Gelbholz*, *Zahnwehholz*. A West Indian shrub. The root is used in odontalgia. The fruits are mildly pungent. [a, 35].—**X. triphyllum**. A resin-yielding tree of the Western Ghats. The capsules have the aromatic properties of those of *X. rhetsa*. In Amboyna a cosmetic is prepared from the bark. [Rumphius (a, 35).]

**XANTHURIA** (Lat.), n. f.  $Za^{2}nth(za^{2}nth)-u^{2}r(ur)'i^{2}-a^{2}$ . From *favōs*, yellow, and *οὐρον*, urine. An excess of xanthic oxide in the urine. [K.]

**X-BEIN** (Ger.), n.  $P^{2}x'bin$ . See **GENU valgum**.

**XENEMBOLE** (Lat.), **XENENTHESIS** (Lat.), n's f.  $Ze^{2}n-e^{2}mb'o^{2}l-e(a)$ ,  $-e^{2}nth'e^{2}s-i^{2}s$ . Gen., *-em'boles*, *-thes'eos* (-en'thesis). From *ξένος*, foreign, and *ἐμβολή*, a hurling, or *ἐνθεσις*, a putting in. Fr., *xénembole*. The introduction of foreign bodies (into the system). [L, 50 (a, 14).]

**XENODOCHUM** (Lat.), **XENODOCIUM** (Lat.), n's n.  $Zen-(ze^{2}n)-o(o^{2})-do^{2}k(do^{2}ch^{2})-i(e)u^{2}m(u^{2}m)$ ,  $-do^{2}k-i(e)u^{2}m(u^{2}m)$ . Gr., *ξενδοχείον* (from *ξένος*, a stranger, and *δεχέσθαι*, to receive). Fr., *xénodogue*. Ger., *Wirthshaus* (1st def.). 1. Originally, a public house or hotel. 2. A hospital. [L, 41, 50, 57 (a, 14).]

**XENO GAMY**, n.  $Ze^{2}n-o^{2}g'a^{2}m-i^{2}$ . From *ξένος*, a stranger, and *γάμειν*, to marry. Fertilization by pollen from a flower on another plant of the same species; a form of cross-fertilization. [a, 35.]

**XÉNOL** (Fr.), n. Ksa-nol. See **XYLENOL**.

**XENOMENIA** (Lat.), n. f.  $\text{Ze}^2\text{n-o}(\text{o}^2)\text{-men}(\text{man})/\text{i}^2\text{-a}^3$ . From  $\xi\eta\text{nos}$ , a stranger, and  $\mu\eta\eta$ , a month. Fr., *xénoménie*. Of Beauchamp, *menoxenia* (q. v.). [a, 34.]

**XENONOMIA** (Lat.), n. f.  $\text{Ze}^2\text{n-o}(\text{o}^2)\text{-nom}(\text{no}^2\text{m})/\text{i}^2\text{-a}^3$ . From  $\xi\eta\text{nos}$ , a stranger, and  $\nu\omicron\mu\omicron\varsigma$ , a law. See **HETERONOMY**.

**XEROPHTHALMIA** (Lat.), n. f.  $\text{Ze}^2\text{n-o}^2\text{-tha}^2/(\text{tha}^3)/\text{mi}^2\text{-a}^3$ . From  $\xi\eta\text{nos}$ , a stranger, and  $\theta\acute{o}\theta\alpha\lambda\mu\acute{o}\varsigma$ , the eye. Fr., *xérophthalmie*. Traumatic conjunctivitis. [a, 34.]

**XEROPNEUMYPOSTASIS** (Lat.), n. f.  $\text{Ze}^2\text{n-o}^2\text{-p-nu}^2\text{-m-o}^2\text{-n-ip}(\text{u}^2\text{p})\text{-o}^2\text{st/a}^2\text{s}(\text{a}^2\text{s})/\text{i}^2\text{-a}^3$ . Gen., *-as'eos* (*-ost/asis*). From  $\xi\eta\text{nos}$ , foreign,  $\pi\pi\epsilon\upsilon\mu\omega\nu$ , the lung, and  $\pi\acute{o}\sigma\tau\alpha\sigma\iota\varsigma$ , subsidence. Fr., *xéropneumyopostasis*. The settling of foreign bodies to the lower part of the lungs. [L, 50 (a, 14).]

**XENOSITE**, n.  $\text{Ze}^2\text{n-o}^2\text{-s-it}$ . From  $\xi\eta\text{nos}$ , a stranger, and  $\sigma\iota\tau\omicron\varsigma$ , food. A parasite when in its intermediate host or lodged in an organ other than that in which it will eventually breed. [L; "Am. Nat.," v, p. 434 (a, 32).]

**XENYL**, n.  $\text{Ze}^2\text{n}^2/\text{i}^2$ . Fr., *xényle*. The compound  $\text{C}_{10}\text{H}_{18}$ . [B, 46, 93 (a, 14).]

**XENYLENEDIAMINE**, n.  $\text{Ze}^2\text{n}^2/\text{i}^2\text{-en-di/a}^2\text{m-en}$ . See **BENZIDINE**.

**XERAMPHELINUS** (Lat.), adj.  $\text{Ze}^2\text{r}(\text{zar})\text{-a}^2\text{mp}(\text{a}^2\text{mp})\text{-e}^2/\text{i}^2\text{-n-u}^2\text{s}(\text{u}^2\text{s})$ . From  $\xi\eta\text{p}\acute{o}\varsigma$ , dry, and  $\acute{\alpha}\mu\pi\epsilon\lambda\omicron\varsigma$ , a vine. Fr., *xérampeline*. Of a dull reddish-brown color. [a, 35.]

**XERANTHEMUM** (Lat.), n. n.  $\text{Ze}^2\text{r}(\text{zar})\text{-a}^2\text{nth}(\text{a}^2\text{nth})/\text{e}^2\text{m-u}^2\text{s}(\text{u}^2\text{s})$ . From  $\xi\eta\text{p}\acute{o}\varsigma$ , dry, and  $\acute{\alpha}\nu\theta\epsilon\mu\omicron\nu$ , a flower. Fr., *immortelle*, *xéranthème*. Ger., *Strohblume*. Immortelle; a genus of composite herbs. The *Xeranthema* are a section of the *Compositae* including *X. Serratula*, *Santolina*, etc. The *Xeranthemae* are a section of the *Carlineae*. [a, 35.]

**XERANTIC**, adj.  $\text{Ze}^2\text{r-a}^2\text{nt/i}^2\text{-k}$ . Gr.,  $\xi\eta\alpha\upsilon\tau\iota\kappa\acute{o}\varsigma$ . Lat., *xeranticus*. Of a drying nature. [A, 311 (a, 21).]

**XERAPHION** (Lat.), **XERAPHIUM** (Lat.), n's n.  $\text{Ze}^2\text{r}(\text{zar})\text{-a}^2\text{f/i}^2\text{-o}^2\text{n}$ ,  $\text{-u}^2\text{m}(\text{u}^2\text{m})$ . Gr.,  $\xi\eta\text{ραφ\acute{i}\omicron}\nu$  (from  $\xi\eta\text{p}\acute{o}\varsigma$ , dry). 1. A medicament to be swallowed dry. 2. A remedy for checking a discharge. [L, 50 (a, 14).]

**XERASIA** (Lat.), n. f.  $\text{Ze}^2\text{r}(\text{zar})\text{-az}(\text{a}^2\text{s})/\text{i}^2\text{-a}^3$ . Gr.,  $\xi\eta\alpha\sigma\iota\alpha$  (from  $\xi\eta\text{p}\acute{o}\varsigma$ , dry). Fr., *xérasie*. 1. Of the older writers, a disease of the hair in which it became dry, ceased to grow, and came to resemble down covered with dust. [G, 16.] 2. See **ALOPECIA pityrodes**. 3. See **ICHTHYOSIS simplex**.

**XEROCLYSTER** (Lat.), n. m.  $\text{Ze}^2\text{r}(\text{zar})\text{-o}(\text{o}^2)\text{-kli}^2\text{st}(\text{klu}^2\text{st})/\text{u}^2\text{r}(\text{ar})$ . Gen., *-clyster'os* (*-is*). From  $\xi\eta\text{p}\acute{o}\varsigma$ , dry, and  $\kappa\lambda\upsilon\sigma\tau\eta\rho$ , a clyster. Fr., *xéroclystère*. A dry suppository. [L, 50 (a, 14).]

**XEROCOLLYRIUM** (Lat.), n. n.  $\text{Ze}^2\text{r}(\text{zar})\text{-o}(\text{o}^2)\text{-ko}^2/\text{i}^2\text{-li}^2\text{r}(\text{lu}^2\text{r})/\text{i}^2\text{-u}^2\text{m}(\text{u}^2\text{m})$ . Gr.,  $\xi\eta\text{ροκολλο\acute{\upsilon}\rho\iota\omicron}\nu$  (from  $\xi\eta\text{p}\acute{o}\varsigma$ , dry, and  $\kappa\omicron\lambda\lambda\omicron\upsilon\sigma\iota\omicron\rho\iota\alpha$ , a collyrium). An old term for a solid (dry) collyrium. [Albini, "Giorn. internaz. delle sci. med.," 1885, i, p. 1.]

**XERODERMA** (Lat.), n. n.  $\text{Ze}^2\text{r}(\text{zar})\text{-o}(\text{o}^2)\text{-du}^2\text{r}(\text{de}^2\text{r})/\text{m}^2/\text{a}^2\text{s}$ . Gen., *-derm'atos* (*-atis*). See **XERODERMIA**.—**X. ichthyoides**. See **ICHTHYOSIS**.—**X. of Kaposi**. Lat., *angioma pigmentosum et atrophicum*. Ger., *Pergamenthaut*. An idiopathic diffuse atrophy of the skin which occurs in two types, x. pigmentosum and chronic x., the latter affecting usually the legs, sometimes also the forearms. The skin becomes atrophic without pigmented spots or telangelectases, and is thin, white, and wrinkled. [G, 47.]—**X. pigmentosum**. A congenital form of Kaposi's x. in which the skin over a greater or less extent is dry and parchment-like, the epidermis becoming thin and wrinkled, with mottled pigmentation and numerous disseminated, punctate, or larger telangelectases. White atrophic spots afterward appear, and the epidermis sometimes becomes fissured and scaly, with the production later on of superficial ulcerations with warty outgrowths. [G, 47.]

**XERODERMIA** (Lat.), n. f.  $\text{Ze}^2\text{r}(\text{zar})\text{-o}(\text{o}^2)\text{-du}^2\text{r}(\text{de}^2\text{r})/\text{m}^2/\text{i}^2\text{-a}^3$ . From  $\xi\eta\text{p}\acute{o}\varsigma$ , dry, and  $\delta\epsilon\rho\mu\alpha$ , the skin. Fr., *xérodémie*. Ger., *Xerodermie*. 1. A cutaneous affection characterized by dryness of the skin. [G.] 2. Of Wilson, see **ICHTHYOSIS simplex**. 3. See **XERODERMA of Kaposi**.—**X. acquista**. A rough, dry condition of the skin, not congenital and probably not true ichthyosis. It is often the sequel to other forms of disease. [G.]—**X. congenita**, **X. ichthyoides**. See **ICHTHYOSIS simplex**.

**XEROMA** (Lat.), n. n.  $\text{Ze}^2\text{r}(\text{zar})\text{-om}^2/\text{a}^2\text{s}$ . Gen., *-om'atos* (*-atis*). From  $\xi\eta\text{p}\acute{o}\varsigma$ , dry. Fr., *xérome*. See **XEROPHTHALMIA**.

**XEROMYCTERIA** (Lat.), n. f.  $\text{Ze}^2\text{r}(\text{zar})\text{-o}(\text{o}^2)\text{-mi}^2\text{kt}(\text{mu}^2\text{kt})/\text{er}(\text{ar})/\text{i}^2\text{-a}^3$ . From  $\xi\eta\text{p}\acute{o}\varsigma$ , dry, and  $\mu\kappa\upsilon\kappa\tau\eta\rho$ , the nose. Fr., *xéromyctérie*. Morbid dryness of the nasal passages. [L, 50 (a, 14).]

**XERONIC ACID**, n.  $\text{Ze}^2\text{r-o}^2\text{n}^2/\text{i}^2\text{-k}$ . Fr., *acide xéronique*. Ger., *Xeronsäure*. An acid,  $\text{C}_6\text{H}_{12}\text{O}_6$ , known only in the form of its anhydride, as a liquid which has a peculiar odor and a taste at first sweet and then bitter. [B, 3 (a, 38).]

**XERONOSOS** (Lat.), **XERONOSUS** (Lat.), n's f.  $\text{Ze}^2\text{r}(\text{zar})\text{-o}^2\text{n}^2\text{-os}^2\text{s}$ ,  $\text{-u}^2\text{s}(\text{u}^2\text{s})$ . From  $\xi\eta\text{p}\acute{o}\varsigma$ , dry, and  $\nu\omicron\sigma\omicron\varsigma$ , a disease. A morbid state characterized by abnormal dryness of the surface. [L, 50 (a, 14).]

**XEROPHAGIA** (Lat.), n. f.  $\text{Ze}^2\text{r}(\text{zar})\text{-o}(\text{o}^2)\text{-fa}^2/(\text{a}^2\text{g})/\text{i}^2\text{-a}^3$ . From  $\xi\eta\text{p}\acute{o}\varsigma$ , dry, and  $\phi\alpha\gamma\iota\nu$ , to eat. Fr., *xérophagie*. The use of dry diet. [a, 34.]

**XEROPHILOUS**, adj.  $\text{Ze}^2\text{r-o}^2\text{f/i}^2\text{-u}^2\text{s}$ . Lat., *xerophilus* (from  $\xi\eta\text{p}\acute{o}\varsigma$ , dry, and  $\phi\iota\lambda\epsilon\iota\nu$ , to love). Fr., *xérophile*. Adapted especially to dry climates (said of plants). [a, 35.]

**XEROPHTHALMIA** (Lat.), **XEROPHTHALMUS** (Lat.), n's f.  $\text{Ze}^2\text{r}(\text{zar})\text{-o}^2\text{f-tha}^2/(\text{tha}^3)/\text{mi}^2\text{-a}^3$ ,  $\text{-mu}^2\text{s}(\text{u}^2\text{s})$ . From  $\xi\eta\text{p}\acute{o}\varsigma$ , dry, and  $\theta\acute{o}\theta\alpha\lambda\mu\acute{o}\varsigma$ , the eye. Fr., *xérophthalmie*. Ger., *Augenröthe*, *Augentrockenheit*, *Xerophthalmie*. Xerosis of the con-

junctiva, which is rough, thickened, dry, and cuticular, and assumes a dirty, grayish-white appearance; due to atrophy of the conjunctiva, the subconjunctival tissue, and even the tarsus, with destruction of the glandular apparatus. It follows long-continued and severe conjunctivitis. [F.]

**XEROPLASTA** (Lat.), n. n. pl.  $\text{Ze}^2\text{r}(\text{zar})\text{-o}(\text{o}^2)\text{-pla}^2\text{st}(\text{pla}^2\text{st})/\text{a}^2\text{s}$ . From  $\xi\eta\text{p}\acute{o}\varsigma$ , dry, and  $\pi\acute{\alpha}\delta\sigma\sigma\epsilon\iota\nu$ , to mold. Of Schultz, morbid states characterized by suppressed or defective secretion, including atrophy, sterility, agalactia, anuria, marasmus, etc. [L, 50 (a, 14).]

**XEROSIS** (Lat.), n. f.  $\text{Ze}^2\text{r}(\text{zar})\text{-os}^2/\text{i}^2\text{-a}^3$ . Gen., *-os'eos* (*-is*). From  $\xi\eta\text{p}\acute{o}\varsigma$ , dry. Fr., *xérosis*. 1. A dry, fish-skin-like appearance of a portion of skin or mucous membrane. 2. See **XEROPHTHALMIA**.—**X. conjunctivæ**. See **XEROPHTHALMIA**.—**X. conjunctivæ epithelialis**. See **X. conjunctivæ superficialis**.—**X. conjunctivæ parenchymatosa** (seu *profunda*). A disease of the conjunctiva in which the mucous membrane, throughout a greater or less extent, is changed into a dense membrane which consists of cicatricial tissue. This may extend throughout the whole of the conjunctiva, ocular and palpebral. [F.]—**X. conjunctivæ squamosa**. An old term for the scaly total variety of x. of the conjunctiva. [F.]—**X. conjunctivæ superficialis**. A disease of the conjunctiva, at first limited to the epithelial layer, which undergoes an epidermoid transformation by the collecting or massing of dried, superficial epithelial scales. This may subsequently extend to the deeper layers. [F.]—**X. glabra conjunctivæ**. A smooth form of xerophthalmia. [F.]

**XEROSTOMIA** (Lat.), n. f.  $\text{Ze}^2\text{r}(\text{zar})\text{-o}(\text{o}^2)\text{-stom}(\text{sto}^2\text{m})/\text{i}^2\text{-a}^3$ . From  $\xi\eta\text{p}\acute{o}\varsigma$ , dry, and  $\sigma\tau\omicron\mu\alpha$ , the mouth. Fr., *xérostomie*. Dryness of the mouth, as in aphtalia.

**XEROTRIPSIS** (Lat.), n. f.  $\text{Ze}^2\text{r}(\text{zar})\text{-o}(\text{o}^2)\text{-tri}^2\text{ps}(\text{treps})/\text{i}^2\text{-a}^3$ . Gen., *-trip'seos* (*-is*). From  $\xi\eta\text{p}\acute{o}\varsigma$ , dry, and  $\tau\text{ριψ\acute{i}\varsigma}$ , a rubbing. Fr., *xérotribie*. Of Galen, a rubbing. [L, 41, 50 (a, 14).]

**XEROTROPISM**, n.  $\text{Ze}^2\text{r-o}^2\text{t-ro}^2\text{p-i}^2\text{-z-m}$ . From  $\xi\eta\text{p}\acute{o}\varsigma$ , dry, and  $\tau\text{ροπή}$ , a turning. Fr., *xérotropisme*. Movements produced in living plants by dryness. [a, 35.]

**XILODIA** (Lat.), n. f.  $\text{Zi}^2\text{l}(\text{zel})\text{-od/i}^2\text{-a}^3$ . Fr., *xilodie*. A fruit resembling a galls, but supported by a fleshy receptacle. [a, 35.]

**XIMENTA** (Lat.), n. f. Hem-an/i<sup>2</sup>-a<sup>3</sup>. From F. *Ximenes*, a Spanish naturalist. Fr., *ximénie*. A genus of the *Olacineæ*. The *Ximenesia* are a family of the *Hesperideæ*. [a, 35.]—**X. americana**. Fr., *ximénie épineuse*, *prunier épineux*. False sandalwood of tropical America, Asia, and Africa. The aromatic fruits are edible. The odoriferous wood is used in place of sandalwood. The root, bark, and leaves are purgative. [a, 35.]—**X. ferox**. See **BALANITES ægyptiaca**.—**X. multiflora**, **X. russelliana**. See **X. americana**.

**XIPHISTERNUM** (Lat.), n. n.  $\text{Zi}^2\text{f-i}^2\text{st-er}^2\text{nu}^2(\text{ste}^2\text{rnu})/\text{u}^2\text{s}(\text{u}^2\text{m})$ . From  $\xi\eta\text{p}\acute{o}\varsigma$ , a sword, and  $\sigma\tau\epsilon\rho\iota\nu$ , the sternum. See **ENSIFORM CARTILAGE**.

**XIPHODES** (Lat.), adj.  $\text{Zi}^2\text{f-od}^2/\text{e}^2\text{z}(\text{as})$ . Gr.,  $\xi\iota\phi\acute{o}\delta\eta\varsigma$  (from  $\xi\eta\text{p}\acute{o}\varsigma$ , a sword, and  $\epsilon\lambda\delta\omicron\varsigma$ , resemblance). Sword-shaped. [a, 48.]

**XIPHODIDYMUS** (Lat.), **XIPHODYMUS** (Lat.), n's m.  $\text{Zi}^2\text{f-o}(\text{o}^2)\text{-di}^2\text{d}^2/\text{i}^2\text{mu}^2\text{s}(\text{u}^2\text{s})$ ,  $\text{Zi}^2\text{f-o}^2\text{d}^2/\text{i}^2\text{mu}^2\text{s}(\text{u}^2\text{s})$ . From  $\xi\eta\text{p}\acute{o}\varsigma$ , a sword, and  $\delta\iota\delta\upsilon\mu\omicron\varsigma$ , double. Fr., *xiphodyme*. A double monster having the body single below, but double from the xiphoid cartilage upward. [L, 49 (a, 14).]

**XIPHOID**, adj.  $\text{Zi}^2\text{f-oid}$ . From  $\xi\eta\text{p}\acute{o}\varsigma$ , a sword, and  $\epsilon\lambda\delta\omicron\varsigma$ , resemblance. Lat., *xiphoides*. Fr., *xiphôide*. Ger., *xiphoidisch*. Sword-shaped, ensiform.

**XIPHODIAN**, adj.  $\text{Zi}^2\text{f-oid}^2/\text{i}^2\text{-n}$ . Lat., *xiphodianus* (from  $\xi\eta\text{p}\acute{o}\varsigma$ , a sword, and  $\epsilon\lambda\delta\omicron\varsigma$ , resemblance). Fr., *xiphoidien*. Pertaining to the ensiform cartilage.

**XIPHOPAGUS** (Lat.), n. m.  $\text{Zi}^2\text{f-o}^2\text{p-a}^2\text{g}(\text{a}^2\text{g})/\text{u}^2\text{s}(\text{u}^2\text{s})$ . From  $\xi\eta\text{p}\acute{o}\varsigma$ , a sword, and  $\pi\alpha\gamma\iota\upsilon\alpha\iota$ , to make fast. Fr., *xiphopage*. A double monster with the individuals united from the umbilicus to the xiphoid cartilage. [Hirst and Piersol (a, 84).]

**XIPHOPHYLLOUS**, adj.  $\text{Zi}^2\text{f-o}^2\text{f-i}^2/\text{u}^2\text{s}$ . From  $\xi\eta\text{p}\acute{o}\varsigma$ , a sword, and  $\phi\acute{\upsilon}\lambda\lambda\omicron\nu$ , a leaf. Fr., *xiphophylle*. Having ensiform leaves. [a, 35.]

**XOCHICOPAL**, n. In Mexico, the resin of *Amyrus tinctorius*. [B.]

**XYLALES**, n.  $\text{Zi}^2\text{l-a}^2/\text{o}^2$ . See **ALDERS WOOD** (1st def.).

**XYLAMIDE**, n.  $\text{Zi}^2\text{l-a}^2\text{m-i}^2\text{d-id}$ . Fr., x. The compound  $\text{C}_6\text{H}_{11}\text{NO} = \text{C}_6\text{H}_5\text{CH}_2\text{CO.NH}_2$ . [B, 3 (a, 38).]

**XYLEM**, n.  $\text{Zi}^2\text{l'em}$ . From  $\xi\chi\lambda\omicron\nu$ , wood. Fr., *xylème*. Ger., X. Of Nägeli, that portion of a fibro-vascular bundle which contains tracheæ. [a, 35.] Cf. **PHLOEM**.

**XYLENE**, n.  $\text{Zi}^2\text{l'en}$ . From  $\xi\chi\lambda\omicron\nu$ , wood. Fr., *xylène*. Ger., *Xylen*, *Xylol*. A substance,  $\text{C}_6\text{H}_{10} = \text{C}_6\text{H}_4(\text{CH}_3)_2$ , known in three isomeric liquid forms: *Orthox*,  $\text{C}_6(\text{CH}_3)_2\text{CH}_2\text{H.H.H.H.}$ ; *metax*,  $\text{C}_6(\text{CH}_3)_2\text{H.H.CH}_2\text{H.H.H.}$ ; and *parax*,  $\text{C}_6(\text{CH}_3)_2\text{H.H.CH}_2\text{H.H.H.}$ . *Metax* and *parax* occur in certain coal tars and petroleum. [B, 4; B, 3, 270 (a, 38).]—**X'sulphonic acid**. An acid,  $\text{C}_6\text{H}_4\text{SO}_3 = \text{C}_6\text{H}_3(\text{CH}_3)_2\text{SO}_3\text{H}$ , known in four isomeric forms, of which *orthosulphonic acid*, *paraxsulphonic acid*, and *metaxsulphonic acid* all form tabular or prismatic crystals containing two molecules of water, while *metaxsulphonic acid* has not yet been obtained pure. [B, 3 (a, 38).]

**XYLENOL**, n.  $\text{Zi}^2\text{l'e}^2\text{n-o}^2\text{l}$ . Fr., *xylénol*, *xénol*. Ger., X. A substance,  $\text{C}_6\text{H}_9\text{O}$ , known in six isomeric forms: *A-orthox*,  $\text{C}_6(\text{CH}_3)_2\text{CH}_2\text{H.OH.H.H.}$ ; acicular or pyramidal crystals; *o-orthox*,  $\text{C}_6(\text{CH}_3)_2\text{CH}_2\text{OH.H.H.H.}$ ; white acicular crystals; *o-metax*,  $\text{C}_6(\text{CH}_3)_2\text{H.CH}_2\text{OH.H.H.}$ ; white acicular crystals; *o-parax*,  $\text{C}_6(\text{CH}_3)_2\text{H.OH.CH}_2\text{H.H.}$ ; tabular or acicular crystals; *o-metax*,  $\text{C}_6(\text{CH}_3)_2\text{H.OH.H.OH.H.}$ ; white acicular crystals; and *parax*,  $\text{C}_6(\text{CH}_3)_2\text{OH.H.CH}_2\text{H.H.}$ ; flat acicular crystals. [B, 4; B, 3 (a, 38).]

**XYLIC ACID**, n. Zil<sup>12</sup>k. An acid,  $C_6H_{10}O_2 = C_6H_5(CH_2)_2CO.OH$ , isomeric with mesitylenic acid, and known in four forms: *Ordinary x. a.*,  $C_6[CH_2.H.CH_2.CO.OH.H.H.]$ , transparent prismatic crystals; *parax' a.*,  $C_6[CH_2.CH_2.H.CO.OH.H.H.]$ , groups of prismatic crystals; *isox' a.*,  $C_6[CH_2.CO.OH.H.CH_2.H.H.]$ , star-shaped groups of large acicular crystals; and *v-x' a.*,  $C_6[CH_2.CO.OH.CH_2.H.H.H.]$ , long acicular crystals. [B, 3 (a, 38).]

**XYLIDIC ACID**, n. Zil<sup>12</sup>k. Fr., *acide xylidique*. Ger., *Xylidinsäure*. An acid,  $C_6H_4O_4 = C_6H_3(CH_2)(CO.OH)_2$ , isomeric with uvitic acid, and known in two forms—*a. x. a.*,  $C_6[CO.OH.CH_2.H.CO.OH.H.H.]$ , crystalline masses or semi-crystalline flocks, and *β. x. a.*,  $C_6[CH_2.CO.OH.H.CO.OH.H.H.]$ , microscopic acicular crystals. The *isox' a.* of Senhofer is probably the same as the latter. [B, 3 (a, 38).]

**XYLIDINE**, n. Zil<sup>12</sup>d-en. Fr., *x. Ger.*, *Xylidin*. A substance,  $C_6H_7N = C_6H_5(CH_2)_2NH_2$ , known in six isomeric forms, all of which are liquids except one (*α-orthox*), which forms crystals. Commercial *x.* is a mixture of five of the forms. [B, 4; B, 3, 270 (a, 38).]—**X. red.** Fr., *rouge de x.* A red dye made by mixing aniline and *x.* It closely resembles rosaniline. [B, 93 (a, 14).]

**XYLOBALSAMUM** (Lat.), n. n. Zil(zu<sup>1</sup>)-o(o<sup>3</sup>)-ba<sup>2</sup>l(ba<sup>2</sup>)/sa<sup>2</sup>m-(sa<sup>2</sup>m)-u<sup>4</sup>m(u<sup>4</sup>m). From *ξύλον*, wood, and *βάλσαμον*, balsam. See under *BALSAMODENDRON gileadense*.

**XYLOCARACTA** (Lat.), n. n. pl. Zil(zu<sup>1</sup>)-o(o<sup>3</sup>)-ka<sup>2</sup>r(ka<sup>2</sup>r)-a<sup>2</sup>kt(a<sup>2</sup>kt/a<sup>2</sup>). See *CAROB-beans*.

**XYLOCARP**, n. Zil'o-ka<sup>2</sup>rp. From *ξύλον*, wood, and *καρπός*, fruit. A hard, woody fruit. [a, 35.]

**XYLOCASSIA** (Lat.), n. f. Zil(zu<sup>1</sup>)-o(o<sup>3</sup>)-ka<sup>2</sup>s(ka<sup>2</sup>s)/si<sup>2</sup>a<sup>2</sup>. Fr., *xylocasse*. See *CASSIA lignea*.

**XYLOCHINON** (Ger.), n. Ksu<sup>1</sup>o-ken-on'. See *XYLOQUINONE*.

**XYLOGENE**, n. Zil'o-jen. From *ξύλον*, wood, and *γεννάν*, to engender. Fr., *xylogène*. A complex woody substance contained in the walls of vegetable cells, and causing their rigidity when lignified. [B, 93 (a, 14).]

**XYLOIDIN**, n. Zil'o<sup>12</sup>d-i<sup>2</sup>n. Fr., *xyloïdine, fécule azotique*. Ger., *Xylidin*. A substance,  $C_6H_5(NO_2)_3O_5$ , probably dinitroxy-amyllum, or  $C_{12}H_{13}O_9NO_5$ , obtained by the action of nitric acid on starch. *Ordinary or insoluble x.* (Fr., *amidou monoazoté insoluble* [Béchamp]) is a white pulverulent substance, without taste or odor. It explodes on percussion like gun-cotton, but with less violence. *Soluble x.*, *isoxylidin* (Fr., *amidou monoazoté soluble* [Béchamp]), formed by the action of an excess of strong nitric acid on starch, has the same composition as insoluble *x.* and similar properties. [B, 2, 4, 92, 270.]

**XYLOL** (Ger.), n. Ksu<sup>1</sup>o'v<sup>2</sup>l. See *XYLENE*.

**XYLOMARATHURUM** (Lat.), n. n. Zil(zu<sup>1</sup>)-o(o<sup>3</sup>)-ma<sup>2</sup>r(ma<sup>2</sup>r)-a<sup>2</sup>th(a<sup>2</sup>th)/ru<sup>3</sup>m(ru<sup>3</sup>m). From *ξύλον*, wood, and *μάραθρον*, marathrum. See *SASSAFRAS-root*.

**XYLON** (Lat.), n. n. Zil(zu<sup>1</sup>)/o<sup>2</sup>n. Gr., *ξύλον*. 1. Wood. 2. The genus *Gossypium*. [a, 35.] 3. Of Berzelius, a substance,  $C_{12}H_{22}O_{11}$ , identical with wood cellulose and the shell tissue of fruit-stones. [B, 93 (a, 14).]

**XYLOPIA** (Lat.), n. f. Zil(zu<sup>1</sup>)-op(o<sup>3</sup>p)/i<sup>2</sup>a<sup>2</sup>. From *ξύλον*, wood, and *πικρός*, bitter. Fr., *xylopie, xylope*. Ger., *Bitterholz*. A genus of aromatic trees or shrubs forming, with *Anona*, *Habzelia*, etc., a tribe (*Xylopieae*) of the *Anonaceae*. [a, 35.]—**X. aethiopica**, **X. aromatica**. See *HABZELIA aethiopica*.—**X. frutescens**. Fr., *xylopie arbrisseau*. Ger., *strauchiges Bitterholz*. (Shrubby) bitter-wood of Guiana. The pungent bark and the fruit are used as aromatic tonics, and the seeds as a spice. [a, 35.]—**X. grandiflora**. A Brazilian species with pimenta-like fruits, which are used as a condiment and as a carminative and febrifuge. [a, 35.]—**X. longifolia**. A species growing on the Orinoco, where the febrifuge fruits are used as a bitter tonic. [a, 35.]—**X. sericea**. A Brazilian species; the pepper-like berries are like those of *X. grandiflora*. [a, 35.]—**X. setosa**. See *X. frutescens*.

**XYLOPICRUM** (Lat.), n. n. Zil(zu<sup>1</sup>)-o(o<sup>3</sup>)-pi<sup>2</sup>k(ru<sup>3</sup>m(ru<sup>4</sup>m)). From *ξύλον*, wood, and *πικρός*, bitter. See *XANTHOXYLUM clava*.

**XYLOQUINOL**, n. Zil'o-kwi<sup>2</sup>n-o<sup>2</sup>l. A substance,  $C_6H_5(OH)_2 = C_6H_2(CH_2)_2(OH)_2$ , isomeric with xylorcinol, and known in three forms—*orthox'*,  $C_6[CH_2.CH_2.OH.H.H.OH.]$ , crystalline crusts; *metax'*,  $C_6[CH_2.OH.CH_2.H.OH.H.]$ , acicular crystals; and *parax'*, or *hydrophlorone*, pearly tabular crystals. [B, 3 (a, 38).]

**XYLOQUINONE**, n. Zil'o-kwi<sup>2</sup>n-on. Ger., *Xylochinon*. A substance,  $C_6H_2(CH_2)_2O_2$ , known in three isomeric forms, all occurring as yellow acicular crystals. [B, 3 (a, 38).]

**XYLORCINOL**, n. Zil'o<sup>2</sup>rs/i<sup>2</sup>n-o<sup>2</sup>l. Fr., *xylorcinol*. A substance,  $C_6H_2(CH_2)_2(OH)_2$ , isomeric with xyloquinol, and known in two forms—*metax'*,  $C_6[CH_2.H.CH_2.OH.H.OH.]$ , white tabular crystals, and *parax'*, or *homorcinol*,  $C_6[CH_2.OH.H.CH_2.H.OH.]$ , quadrate crystals. [B, 3 (a, 38).]

**XYLORRHETINE**, n. Zil'o<sup>2</sup>r-ret'en. From *ξύλον*, wood, and *ρητήν*, resin. See *HARTINE*.

**XYLOSE**, n. Zil'os. Fr., *x.* A kind of sugar,  $C_5H_{10}O_5$ , obtained from the wood of the beech, and also found in jute. [B, 270 (a, 38).]

**XYLOSTEIN**, n. Zil'o<sup>2</sup>st'e<sup>2</sup>i<sup>2</sup>n. Fr., *xylostéine*. Ger., *Xylostein*. A bitter principle obtained from the poisonous berries of *Lonicera xylosteum*, occurring as long colorless crystals. [B, 270 (a, 38).]

**XYLOSTEUM** (Lat.), n. n. Zil(zu<sup>1</sup>)-o<sup>2</sup>st'e<sup>2</sup>-u<sup>4</sup>m(u<sup>4</sup>m). From *ξύλον*, wood, and *στόν*, a bone. Fr., *xylostéon*. 1. See *LONICERA x.* 2. A section of the genus *Lonicera*. [a, 35.]

**XYLOSTYPTIC**, adj. Zil'o<sup>2</sup>sti<sup>2</sup>pt/i<sup>2</sup>k. From *ξύλον*, wood, and *στυπτικός*, astringent. Styptic and derived from wood or woody fibre (cellulose). [B.]

**XYLOTHERAPY**, n. Zil'o-the<sup>2</sup>r'a<sup>2</sup>p-i<sup>2</sup>. From *ξύλον*, wood, and *θεραπεία*, medical treatment. Fr., *xylothérapie*. Of Dujardin-Beaumont, medical treatment in which certain aesthesiogenous phenomena, similar to those of metalloscopy, are produced by applications of particular woods, such as thuja, rosewood, pitch-pine, mahogany, walnut, maple, apple, and especially cinchona. Other woods, such as ebony, ash, poplar, and sycamore, are said to produce no phenomena. ["Bull. de thérap.," xcix, p. 97 (a, 34).]

**XYLUM** [Fr. Cod.] (Lat.), n. n. Zil(zu<sup>1</sup>)/u<sup>4</sup>m(u<sup>4</sup>m). Gr., *ξύλον*. See *COTTON*.—**X. iodatum** [Fr. Cod.]. See *Iodized cotton*.

**XYLYL**, n. Zil'i<sup>2</sup>l. Fr., *xylyle*. Ger., *X.* The radicle of xylene,  $C_6H_3(CH_3)_2$ . [B.]—**X. alcohol**. A substance,  $CH_3.C_6H_4.CH_2.OH = C_8H_{10}O$ , known in three isomeric forms—*orthox' alcohol*, acicular crystals; *metax' alcohol*, a liquid; and *parax' alcohol*, or *tobuyl alcohol*, white acicular crystals. [B, 3 (a, 38).]

**XYLYLACETAMIDE**, n. Zil-i<sup>2</sup>l-a<sup>2</sup>s-e<sup>2</sup>t'a<sup>2</sup>m-i<sup>2</sup>d(id). The substance  $C_8H_9.NH.C_2H_3O$  (or  $C_6H_5(CH_2)_2.NH.C_2H_3O$ ). [B, 2.]

**XYLYLENE ALCOHOL**, n. Zil'i<sup>2</sup>l-en. A substance,  $C_8H_4(CH_2.OH)_2$ , known in three isomeric forms—*orthox' a.*, or *phthal-alcohol*, forming tabular crystals; *metax' a.*, microscopic crystals; and *parax' a.*, or *tolylene glycol*, shining acicular crystals. [B, 3 (a, 38).]

**XYRIDAL**, adj. Zi<sup>2</sup>r'i<sup>2</sup>d-l. Lat., *xyridalis*. Pertaining to the *Xyridales*, which are Lindley's x. alliance (Lat., *nixus xyridalis*) of the *Endogeneae*, including the *Xyridaceae*, *Commelynaceae*, etc.

**XYRIS** (Lat.), n. f. Zi<sup>2</sup>r(zu<sup>1</sup>r)/i<sup>2</sup>s. Gen., *xyridos* (*-idis*). Gr., *ξύρις* (1st def.) (from *ξύρον*, a razor). Ger., *Degenkraut* (2d def.). 1. An old term for the *Iris foetidissima*. 2. A genus of sedge-like herbs forming, with *Aboloboda*, a small order (the *Xyridaceae*, or *Xyridae*, or *xyrids*) of hypogynous monocotyledons. [a, 35.] 3. A scraper, a curette. [L, 50 (a, 14).]—**X. americana**. A South American species of *X.* (2d def.). The juice is used in chronic skin eruptions. [a, 35.]—**X. indica**. An East Indian and Chinese species of *X.* (2d def.). The juice of the leaves, mixed with vinegar, is used in skin diseases, and the root and leaves, boiled in oil, are used in leprosy. In Bengal the herb is considered a certain cure for ringworm. [a, 35.]—**X. vaginata**. A Brazilian species of *X.* (2d def.) used in chronic skin diseases. [a, 35.]

**XYSIS** (Lat.), **XYSMA** (Lat.), **XYSMIE** (Lat.), n's f., n., and f. Zi<sup>2</sup>s(zu<sup>1</sup>s)/i<sup>2</sup>s, Zi<sup>2</sup>s(zu<sup>1</sup>s)/ma<sup>2</sup>, -me(ma). Gen., *xyseos* (*-is*), *xyseos* (*-atis*), *xyseos*. Gr., *ξύσις*, *ξύσμα*, *ξύσμα* (from *ξύειν*, to scrape). 1. The process of scraping or polishing. 2. Lint. [L, 50 (a, 14).]

**XYSMALOBUM** (Lat.), n. n. Zi<sup>2</sup>s(zu<sup>1</sup>s)-ma<sup>2</sup>-lob(la<sup>2</sup>b)/i<sup>2</sup>-u<sup>4</sup>m(u<sup>4</sup>m). A genus of asclepiadaceous herbs. [a, 35.]—**X. undulatum**. A Cape-of-Good-Hope species. The root is used in colic and as a diuretic. [a, 35.]

**XYSTER** (Lat.), n. m. Zi<sup>2</sup>st(zu<sup>1</sup>st)/u<sup>4</sup>r(ar). Gen., *-er'os* (*-is*), *-er'ii*. Gr., *ξύστηρ*, *ξύστηρον* (from *ξύειν*, to scrape). Fr., *xystre*. See *RASPATORY*.—**X. ophthalmicus**. See *BLEPHAROXYSTON*.

**XYSTERIUM** (Lat.), n. n. Zi<sup>2</sup>st(zu<sup>1</sup>st)-er(ar)/i<sup>2</sup>-u<sup>4</sup>m(u<sup>4</sup>m). See *XYSTER*.

**XYSTOS** (Fr.), n. Ksest-os. Of Bégin, scraped lint. [L, 41 (a, 14).]

**XYSTRA** (Lat.), **XYSTRUM** (Lat.), n's f. and n. Zi<sup>2</sup>st(zu<sup>1</sup>st)/-ra<sup>2</sup>, -ru<sup>3</sup>s(ru<sup>4</sup>m). Gr., *ξύστρα*, *ξύστρον*. See *RASPATORY*.

Y

**YABINE**, n. Ya<sup>3</sup>b'en. An alkaloid obtained from yaba (the bark of *Andira excelsa*); a yellowish-white, amorphous, bitter powder. ["Proc. of the Am. Pharm. Assoc.," xxviii (a, 14).]

**YAM**, n. Ya<sup>3</sup>m. Any one of various species of *Dioscorea*, especially *Dioscorea alata* and *Dioscorea sativa*. Their roots, known also as y's, contain a large amount of starch, and in the West Indies are used as a source of arrow-root. They often contain an acid principle, which is dissipated in cooking. [a, 35.]—**American wild y.** See *Dioscorea villosa*.—**Chinese y.** See *Dioscorea batatas*. **Common y.** See *Dioscorea sativa*.—**Negro y.**, **Red y.** See *Dioscorea alata*.—**Tivoli y.** See *Dioscorea nummularia*.—**White y.** See *Dioscorea alata*.—**Y'swurzel** (Ger.). See *Dioscorea*.

**YAMADOU**, n. In Brazil, the *Myristica sebifera*, or the oil expressed from its seeds. [a, 35.]

**YANCONA**, **YANGONA**, n's. See *PIPER methysticum*.

**YANUCORINDE** (Ger.), n. Ya<sup>3</sup>n-uk'o-ri<sup>2</sup>nd-e<sup>2</sup>. See *Huanuco BARK*.

**YÁ PIEN** (Chin.), n. See *OPIMUM*.

**YARMOUTH**, n. Ya<sup>3</sup>r'mu<sup>4</sup>th. A sea-bathing resort in Norfolk, England. [L, 80, 37, 49 (a, 14).]

**YARR**, n. Ya<sup>3</sup>r. In Scotland, the *Spergula arvensis*. [a, 35.]

**YARROW**, n. Ya<sup>3</sup>r'o. The genus *Achillea*, especially *Achillea millefolium*. [a, 35.]

**YAUPON**, n. See *Ilex cassena* (1st def.).

**YAVA SKIN**, n. See *ELEPHANTIASIS Arabum*.

**YAWNING**, n. *Ya'n* Gr., *χάσμεν*. Lat., *oscedo, oscitatio*. Fr., *bâillement*. Ger., *Gähnen*. A long, full inspiration followed by a similar expiration in which the air passes through the widely and peculiarly opened mouth. [J.]

**YAW-ROOT**, n. *Ya'ru't*. See *STILLINGIA siliatica*.

**YAWS**, n. *Ya'z*. An African term, meaning literally a raspberry, for frambesia (q. v., 2d def.); in the sing., *yaw*, a single efflorescence of the disease. "Daddy," "fadee," "grandy," "mama," "master," "moder," and "mother" y. are the large tubercles occurring in the course of the eruption, often at the seat of inoculation. Guinea-corn y. are those resembling a grain of maize; ringworm y. are the circular lesions; and watery y. are the oedematous tubercles occurring in cachectic patients. [G. 69.]

**YDES** (Fr.), n. Ed. A place in the department of Cantal, France, where there is a saline, alkaline, and chalybeate spring. [a. 14.]

**YEAST**, n. *Yest*. Gr., *ζύμα*. Lat., *fermentum*. Fr., *levûre*. Ger., *Hefe*. A semi-fluid, viscid, flocculent scum forming on the surface of a saccharine juice when it is in a state of vinous fermentation. Y. is composed chiefly of *Saccharomyces*. Ordinary y. is beer y. [a. 35.]—**Beer y.** Lat., *fermentum* [U. S. Ph., 1870], *cerevisia fermentum* [Br. Ph.]. Fr., *levûre (de bière)*. Ger., *Bierhefe*. The ferment (see *SACCHAROMYCES cerevisia*) obtained in brewing beer. It is insoluble in water or alcohol, has a dirty-yellowish color, a bitter taste, and a sourish odor. Its ultimate composition, according to Schlossberger, is carbon 49.9 per cent., hydrogen 6.6 per cent., nitrogen 12.1 per cent., and oxygen 31.4 per cent. If separated from its nitrogenous principle, it becomes inert as a ferment. It has been used as an external stimulating poultice, and internally in typhoid and similar fevers, and against successive eruptions of boils. [a. 35.]—**Bottom y.** The y. that settles when fermentation is restrained by cold. [a. 35.]—**German y.** Ger., *Presshefe, Pfundhefe*. Y., such as that produced for baking purposes, containing a minimum amount of alcohol. The fluid in which the y. forms is drained away and the y. mixed with dry starch. It is free from the bitterness of hops. [a. 35.]—**Top-y.** The y. formed on the surface of fermenting liquids. [a. 35.]—**Y. cakes.** Cakes made by pressing and drying y. that has been put into sacks and washed with water. [a. 35.]—**Y. plant.** The genus *Saccharomyces*, especially the *Saccharomyces cerevisia*. [a. 35.]—**Y. poultice.** See *Cataplasma FERMENTI*.

**YEBLE** (Fr.), n. *E-e'* bl'. The *Sambucus ebulus*. [a. 35.]

**YELK**, n. *Ye'lk*. See *VITELLUS*.

**YELLOW**, adj. *Ye'l'o*. Gr., *χλωρός*. Lat., *flavus*, Fr., *jaune*. Ger., *gelb*. Of a color resembling that of gold; as a n., in the pl., *y's*, (1) jaundice, more particularly in horses, cattle, and sheep, and, (2) popularly, leucorrhœa in which the discharge is yellowish.—**Cassell's y.** A lead oxychloride obtained by fusing together ammonium chloride and an oxide or carbonate of lead. [B. 3.]—**Chrome y.** Lead chromate. [B.]—**Cologne y.** A light-yellow pigment, made up of a mixture of lead chromate and lead sulphate. [B. 3.]—**Indian y.** Fr., *jaune indien*. A y. pigment prepared in Tibet, but exported from India and China. Its mode of preparation is not known, but it is thought by some to be derived from the fruit of *Garcinia mangostana*, by others to be prepared by macerating certain plants in fermented urine, since much hippuric acid is found in it. [B. 46 (a. 39).]—**King's y.** See *ORPIMENT*.—**Martius y.** A dinitro- $\alpha$ -naphthalate of sodium, sometimes used as a dye for food-stuffs. [a. 34.]—**Naples y.** Fr., *jaune brillant*. Ger., *Neapelgelb*. A y. pigment made up of a salt of antimony, with lead, dried alum, and ammonium chloride. [B. 5.]—**Patent y.** **Turner's y.** A lead oxychloride obtained by heating lead oxide and a solution of common salt. [B. 3.]—**Uranium y.** Ger., *Uran-geib*. 1. Sodium uranate. 2. Ammonium uranate. [B.]—**Victoria y.** Aniline orange; a pigment consisting of a salt of a dinitroresorcinol, crystallizing from hot aqueous solution as yellowish acicular crystals. [B. 3 (a. 38).]—**Visual y.** See *XANTHOPHANE*.

**YELLOW-ROOT**, n. *Ye'l'o-ru't*. The *Hydrastis canadensis*, *Xanthorrhiza apiifolia*, *Coptis trifolia*, and *Jeffersonia Bartonis*. [a. 35.]

**YELLOW SPRINGS**, n. *Ye'l'o*. A place in Greene County, Ohio, where there are alkaline and sulphurous springs. [Anderson (a. 14).]

**YELLOWSTONE PARK**, n. *Ye'l'o-sto'n*. A place in Wyoming Territory, set apart as a national park, where there are numerous hot and cold mineral springs. [a. 14.]

**YELLOW SULPHUR SPRINGS**, n. *Ye'l'o su'l'f'u'r*. A place in Montgomery County, Virginia, where there are gaseous mineral springs. [L. 37, 57; Anderson (a. 14).]

**YELLOW-WEED**, n. *Ye'l'o-wed*. The *Reseda luteola*, *Senecio jacobæa*, and *Brassica napus*. [a. 35.]

**YELLOW-WOOD**, n. *Ye'l'o-wu'd*. The name of various plants, such as *Avatia spinosa*, the genera *Tobinia* and *Xanthoxylum*, the *Virgilia lutea* (in America), the *Podocarpus Thunbergii* (in southern Africa), the *Ochroxylon punctatum* (in Brazil), the *Chloroxylon swietenia* (in India), the *Ochrosia borbonica* (in the Isle of Bourbon), etc. [a. 35.]

**YELLOWS**, n. *Ye'l'oz*. 1. See under *YELLOW*. 2. The *Reseda luteola*, *Genista tinctoria*, *Brassica campestris*, and *Ranunculus acris*. [a. 35.]

**YELLOW-WORT**, n. *Ye'l'o-wu't*. 1. See *CHLORA perfoliata*. 2. The *Xanthorrhiza apiifolia*. [a. 35.]

**YERBA** (Sp.), n. *Ye'r'b'a'*. An herb; in Buenos Ayres, maté (see under *Ilex paraguayensis*). [a. 35.]—**Y. buena.** See *MICROMERIA barbata*.—**Y. buena piperita** [Mex. Ph.]. See *MENTHA pi-*

*piperita*.—**Y. de gato.** See *VALERIAN*.—**Y. de la cucaracha** [Mex. Ph.]. A species of *Echites* found in Cuernavaca, Mexico, where the powdered leaves and stem, mixed with sugar, are used to kill cockroaches. [J. M. Maisch, "Am. Jour. of Pharm.," Apr., 1886, p. 168.]—**Y. de la doncella** [Mex. Ph.]. See *BEGONIA bulbilifera* and *BEGONIA gracilis*.—**Y. de la golondrina**. 1. Of the Mex. Ph., see *EUPHORBIA maculata*. 2. In the western United States, any one of various species of *Euphorbia*, used in rattlesnake bites. [B.]—**Y. del alacrán** [Mex. Ph.]. See *PLUMBAGO scandens*.—**Y. de la mula** [Mex. Ph.]. See *MONSINA Ocampi*.—**Y. del ángel** [Mex. Ph.]. See *EUPATORIUM collinum*.—**Y. de la Puebla** [Mex. Ph.]. See *SENECIO canicida*.—**Y. de las ánimas**, A Mexican name for the *Helenium autumnale* and *Ipomœa orizabensis*. [J. M. Maisch, "Am. Jour. of Pharm.," Apr., 1886, p. 168; B. 121 (a. 35).]—**Y. de la víbora** [Mex. Ph.]. See *MYRIADENUS tetraphyllus*.—**Y. de la Virgen** [Mex. Ph.]. See *CANTUA coccinea*.—**Y. del cáncer (de México)**. The *Lythrum alatum* and other species of *Lythrum*, also the *Gomphrena procumbens*. [a. 35.]—**Y. del carbonero.** See *BACCHARIS multiflora*.—**Y. del clavo.** See *JULIANA caryophyllata*.—**Y. del cura** [Mex. Ph.]. See *TERNSTROMIA altamirana*.—**Y. del golpe** [Mex. Ph.]. See *CENOTHEA pumila*.—**Y. del indio** [Mex. Ph.]. See *ARISTOLOCHIA fetida*.—**Y. del negro** [Mex. Ph.]. See *MALVA angustifolia*.—**Y. del pollo** [Mex. Ph.]. See *COMMELYNA tuberosa*.—**Y. del porrazo** [Mex. Ph.]. See *CENOTHEA pumila*.—**Y. del sapo** [Mex. Ph.]. A name for various Mexican species of *Eryngium*. [J. M. Maisch, "Am. Jour. of Pharm.," Apr., 1886, p. 168.]—**Y. del tabardillo** [Mex. Ph.]. See *PIGUEIRA trinervia*.—**Y. del zorrillo.** See *CROTON dioicus*.—**Y. de Santa María de México** [Mex. Ph.]. See *CHRYSANTHEMUM parthenium*.—**Y. de Santa María de tierra adentro** [Mex. Ph.]. See *TAGETES lucida*.—**Y. doncella.** See *VINCA major*.—**Y. dulce** [Mex. Ph.]. See *LIPPIA graveolens* and *LIPPIA dulcis*.—**Y. maté.** Maté. [a. 35.]—**Y. mora** [Mex. Ph.]. See *SOLANUM nigrum*.—**Y. santa.** 1. The *Eriodictyon californicum* and *Eriodictyon tomentosum*. [a. 35.] 2. See *PIPER sanctum*.—**Y. viperina** [Mex. Ph.]. See *MYRIADENUS tetraphyllus*.

**YERBINE**, n. *Ye'r'b'en*. The caffeine obtained from *Ilex paraguayensis*. ["Proc. of the Am. Pharm. Assoc.," xxxiv (a. 14).]

**YERVA** (Lat.), n. f. *Ye'r'v'a'*. See *YERBA* and *CONTRAYERVA*.—**Radix yervæ.** See *Rhizoma CONTRAYERVÆ*.

**YESCA** (Sp.), n. *Ye's'ka'*. Amadou. [a. 14.]

**YESGOS**, n. In Mexico, the *Urtica mexicana*. [a. 35.]

**YEUSE** (Fr.), n. *E-u'z*. The *Quercus ilex*. [a. 35.]

**YEW**, n. *U'*. The genus *Taxus*, especially *Taxus baccata*. [a. 35.]

**YODURETUM** (Lat.), n. n. *Yod-u'r(ur)-et(at)u'm(u'm)*. See *IODIDE*.

**YOH**, n. In Japanese pharmacy, leaves. ["Proc. of the Am. Pharm. Assoc.," xxviii (a. 14).]

**YOLK**, n. *Yo'lk*. See *VITELLUS*.—**Accessory y.** **Food y.** See *NUTRITIVE VITELLUS*.—**Formative y.** **Germinal y.** See *FORMATIVE VITELLUS*.—**Nutritive y.** See *NUTRITIVE VITELLUS*.—**Principal y.** See *FORMATIVE VITELLUS*.—**Subordinate y.** **Supplemental y.** See *NUTRITIVE VITELLUS*.—**White y.** See *WHITE VITELLUS*.—**Yellow y.** See *YELLOW VITELLUS*.—**Y. cleavage.** **Y. division.** See *GERM SEGMENTATION*.—**Y. of egg.** See *VITELLUS* (2d def.).—**Y. rest.** In embryology, the residual internal mass of segmentation spheres. [A. 5.]—**Y. spherules.** See *VITELLINE GRANULES*.—**Y. stalk.** That portion of the y.-sack that connects the latter with the embryo. [a. 34.]

**YONÉ**, n. Of Calderón, the *Petiveria tetandra*; said to be a part of curare. [a. 35.]

**YORK SULPHUR SPRINGS**, n. *Yo'r'k su'l'f'u'r*. A place in Adams County, Pennsylvania, where there are sulphurous springs. ["Lipp. Gaz.," (a. 14).]

**YOUNG'S GAS WELL**, n. *Yu'n's ga'z*. A place in Lake County, California, where there is a spouting alkaline and sulphurous spring. [Anderson (a. 14).]

**YOUNG**, n. See *Ilex cassena* (1st def.).

**YPRÉAU** (Fr.), n. *E-pra-o*. The *Populus alba*. [a. 35.]

**YPSILOGLOSSUS** (Lat.), n. m. *I'ps(u'ps) I'pl-o(o's)-glo's(glos)'-su's(su's)*. An incorrect form of *hypsiloglossus* (q. v.).

**YSOP** (Ger.), n. *U'z'op*. See *HYSSOPUS*.—**Feldy'.** See *HELIANTHEMUM vulgare*.—**Gebäu'chlicher Y.** See *HYSSOPUS officinalis*.—**Hecken'y.** See *GRATIOLA officinalis*.—**Kalb's'kraut.** **Wilder Y.** The *Satureia hibernica*. [a. 35.]—**Y'öl.** See *OIL OF HYSSOP*.—**Y'wein.** See *HYSSOPITES*.

**YTTERAN**, n. A place in the province of Jämtland, Sweden, where there is a chalybeate spring. [L. 57 (a. 14).]

**YTTERBIA** (Lat.), n. f. *I't-te'r'b'i'a'*. See *YTTERBIUM oxide*.

**YTTERBIUM** (Lat.), n. n. *I't-te'r'b'i'u'm(u'm)*. From *Ytterby*, in Sweden. A new metal (not yet isolated) said to have been discovered by Marignac. Symbol, Yb; atomic weight, 173.01. ["Proc. of the Am. Pharm. Assoc.," xxvii, xxix (a. 14).]—**Y. oxide.** A perfectly white earth,  $Yb_2O_3$ . ["Proc. of the Am. Pharm. Assoc.," xxvii, xxix (a. 14).]

**YTTRIA** (Lat.), n. f. *I't'ri'a'*. Ger., *Yttererde*. *Yttrium oxide*. [B. 93 (a. 14).]

**YTTRIUM** (Lat.), n. n. *I't'ri'u'm(u'm)*. Fr., y. Ger., Y. A metallic element discovered in the beginning of the nineteenth century at Ytterby, in Sweden, whence it derives its name. It occurs in very minute quantities, and its physical properties have not been thoroughly examined. In compounds it acts as a trivalent radicle. Symbol, Y; atomic weight, 92.5. [B. 3.]—**Y. acetate.** The compound  $(C_2H_5O_2)_3Y + 2H_2O$ . [B.]—**Y. oxide.** The compound  $Y_2O_3$ . [B. 93 (a. 14).]

**YUCCA** (Lat.), n. f. Yu<sup>3</sup>k(yu<sup>4</sup>k)'ka<sup>3</sup>. Ger., *Adamsnadel*. Adam's needle, bears' grass, Spanish daggers (or bayonet); a genus of liliaceous plants. The *Yucca* of Reichenbach are a section of the *Dracaenae*. [a, 35.]—**Y. aloefolia**. Adam's needle, Spanish daggers; a shrubby palm-like plant growing in Arizona and from the Carolinas to Florida. The leaves yield a fibre which is made into paper. [a, 35.]—**Y. angustifolia**. A species growing in Arizona and Utah, yielding the finest fibre of any of the species. The young flowering stems are used by the Indians like asparagus, the root like that of *Y. filamentosa*. [Proc. of the Am. Pharm. Assoc., xxvii (a, 14).]—**Y. filamentosa**. Adam's-needle-and-thread, bear's-thread, Carolina silk-grass, thready Adam's needle; a stemless species found in the Southern States yielding a fibre of great

strength. The subterranean stem yields a lather with water, and is used in washing. [a, 35.]—**Y. gloriosa**. Common Adam's needle of American sandy sea-coasts. The pulp of the fleshy capsule is used as a mild purgative, and a variety of starch is obtained from the macerated stems. [a, 35.]

**YUK-KIN** (Chinese), n. A peculiar sort of turmeric, not entirely without a yellow coloring matter, consisting of the dried tubers of an undetermined species of *Curcuma*. [a, 35.]

**YULAN**, n. The *Magnolia y.* [a, 35.]

**YVERDON** (Fr.), **YVERDUN** (Fr.), n's. E-ve<sup>2</sup>r-do<sup>2</sup>n<sup>2</sup>, -du<sup>2</sup>n<sup>2</sup>. A place in the canton of Vaud, Switzerland, where there are alkaline and sulphurous springs. [L, 49, 57, 87, 135 (a, 14).]

## Z

**ZÁBILA** [Mex. Ph.] (Sp.), n. Tha<sup>3</sup>be-la<sup>3</sup>. See *Aloe variegata*.  
**ZACATLASCALÉ**, n. In Mexico, the *Cuscuta americana*. [a, 35.]

**ZACCHARUM** (Lat.), n. n. Za<sup>2</sup>k(za<sup>3</sup>k)'ka<sup>2</sup>r(ch<sup>2</sup>a<sup>3</sup>r)-u<sup>2</sup>m(u<sup>4</sup>m). See SACCHARUM.

**ZACHUM** (Ar.), **ZACHUN** (Ar.), n's. The seed of *Balanites aegyptiaca*, or the vulnerary oil (Ger., *Zöl*) expressed from it. [a, 35.]

**ZACINTHA** (Lat.), n. f. Za<sup>2</sup>s(za<sup>3</sup>k)-i<sup>2</sup>nth'a<sup>3</sup>. From *Zákynthos* (Lat., *Zacynthus*), the island of Zante. A genus of the *Compositæ*. [a, 35.]—**Z. verrucosa**. An annual of the Mediterranean regions. The leaves, *herba zacynthæ* (seu *cichorei verrucarii*), and sometimes the fruits, were formerly used for skin diseases and warts. [a, 35.]

**ZACKE** (Ger.), n. Tsa<sup>3</sup>k'e<sup>2</sup>. A tooth, prong, or digitation. [L, 31.]—**Blinde Z.** See *Blind hæmorrhoid*.—**Nasenz'.** See *Pyramidalis nasi*.—**Z'nform.** See *Crenation*.

**ZACKIG** (Ger.), adj. Tsa<sup>3</sup>k'ig. Serrated, notched, having an indented border. [K.]—**Z'werden.** Serration. [K.]

**ZACYNTHA** (Lat.), n. f. Za<sup>2</sup>s(za<sup>3</sup>k)-i<sup>2</sup>nth(u<sup>2</sup>nth'a<sup>3</sup>). See *ZacINTHA*.

**ZACYNTHIUS** (Lat.), n. m. Za<sup>2</sup>s(za<sup>3</sup>k)-i<sup>2</sup>nth(u<sup>2</sup>nth'a<sup>3</sup>)-i<sup>2</sup>-u<sup>2</sup>s(u<sup>4</sup>s). From *Zákynthos* (Lat., *Zacynthus*), the island of Zante. Of Galen, liquid bitumen. [A, 325 (a, 48).]

**ZADE** (Ger.), n. Tsa<sup>3</sup>d'e<sup>2</sup>. See *NEPHRITE*.

**ZADIRACH** (Ger.), n. Tsa<sup>3</sup>d-er'a<sup>3</sup>ch<sup>2</sup>. The *Azadirachta indica*. [a, 35.]

**ZAFFER**, n. Za<sup>2</sup>f'u<sup>2</sup>r. An impure cobalt arsenate used to give a blue color to glass, enamels, etc. [a, 35.]

**ZAFFRAN, ZAFRAN**, n's. Za<sup>2</sup>f'r'u<sup>2</sup>n. See *SAFFRON*.

**ZAHLBESTIMMUNG** (Ger.), n. Tsa<sup>3</sup>be<sup>2</sup>-sti<sup>2</sup>m-mun<sup>2</sup>. The process of estimating a number (e. g., the number of corpuscles in the blood). [K.]

**ZÄHMUNG** (Ger.), n. Tsam'un<sup>2</sup>. See *DOMESTICATION*.

**ZAHN** (Ger.), n. Tsa<sup>3</sup>n. See *TOOTH*.—**Bleibende Zähne.** See *Second TEETH*.—**Eckzähne.** See *Canine TEETH*.—**Ersatzzähne.** See *Second TEETH*.—**Gaumenzähne.** See *Palatine TEETH*.—**Gehörzähne.** See *Auditory TEETH*.—**Gespaltene Zähne.** See *Bicuspid TEETH*.—**Giftzähne.** See *Poison-FANGS*.—**Hakenzähne.** **Hundzähne.** See *Canine TEETH*.—**Kauz'.** See *Molar TOOTH*.—**Kieferzähne.** Teeth inserted in either of the maxillæ. [L.]—**Kinderzähne.** See *Milk TEETH*.—**Kinnbackenz'.** See *Molar TOOTH*.—**Kronzähne.** See *Canine TEETH*.—**Lachz'.** An incisor tooth. [L.]—**Mahlz'.** See *Molar TOOTH*.—**Milchbackz'.** A deciduous molar tooth. [L.]—**Milchprämolärer Backenz'.** A deciduous premolar tooth. [L.]—**Milchschneidez'.** A deciduous incisor tooth. [L.]—**Milchzähne.** See *Milk TEETH*.—**Molarz'.** See *Molar TOOTH*.—**Nagez'.** An incisor tooth. [L.]—**Oberkieferz'.** A tooth inserted into the superior maxilla. [L.]—**Saugzähne.** **Schieberzähne.** See *Milk TEETH*.—**Schlundzähne.** Teeth attached to the pharyngeal bones. [L.]—**Schneidezähne.** See *Incisor TEETH*.—**Seepferdizähne.** See *Dentes HIPPOPOTAMI*.—**Spitzzähne.** See *Canine TEETH*.—**Stockz'.** See *Molarz'.—**Unterz'.** A tooth inserted into the inferior maxilla. [L.]—**Wangenz'.** See *Molar TOOTH*.—**Weisheitszähne.** See *Wisdom TEETH*.—**Winkelzähne.** See *Canine TEETH*.—**Wolfz'.** In horses, a tooth which has failed to cut through the gum. [L.]—**Z'arzneykunde.** See *DENTISTRY*.—**Z'arzt.** See *DENTIST*.—**Z'ausbruch.** The eruption of teeth. [L.]—**Z'ausschlagen.** See *STROPULUS*.—**Z'ausschieber.** See *DENTIST*.—**Z'band.** See *ODONTODESMON*.—**Z'bein.** See *DENTIN*.—**Z'bildung.** See *DENTITION* and *ODONTOGENY*.—**Z'bogen.** See *Dental ARCH* (2d def.).—**Z'brand.** Caries of the teeth. [L, 135 (a, 14).]—**Z'brecheisen.** See *TOOTH KEY*.—**Z'bresche.** The gap left by the loss of a tooth. [L, 349.]—**Z'bruch.** See *ODONTOCLASIS*.—**Z'canilchen.** See *Dental CANALS*.—**Z'cement.** See *CEMENT* (2d def.).—**Z. des Epistropheus.** See *Odontoid PROCESS*.—**Z'durchbruch.** The eruption of teeth. [L.]—**Z'durchfall.** See *ODONTODIARRHÆA*.—**Z'eindruck.** An impression or pit on the tongue made by a tooth.—**Z'einsetzung.** The insertion of the teeth. **ZAHNKRAUT** (Ger.), n. Tsa<sup>3</sup>n'kra<sup>2</sup>-u<sup>4</sup>t. See *DENTARIA*, *LATHRÆA squamaria*, *VALERIANA phu*, and *PLUMBAGO europæa*.

**ZAHNLILIE** (Ger.), n. Tsa<sup>3</sup>n'le-le. The genus *Erythronium*. [a, 35.]—**Amerikanische Z.** See *ERYTHRIONUM americanum*.—**Gemeine Z.** See *ERYTHRIONUM dens canis*.

**ZAHNTROPFEN** (Ger.), n. Tsa<sup>3</sup>n'tro<sup>2</sup>pf'e<sup>2</sup>n. Tooth-drops. [L, 57 (a, 50).]—**Hoffmann's Z.** A preparation consisting of 4 parts of tincture of catechu and 1 part of oil of cloves. [B, 270 (a, 38).]

**ZAHNUNG** (Ger.), n. Tsa<sup>3</sup>n'un<sup>2</sup>. Teething. [L.]

**ZAHNWEHRINDE** (Ger.), n. Tsa<sup>3</sup>n'va-ri<sup>2</sup>nd'e<sup>2</sup>. See *XANTHOXYLUM* (2d def.).—**Flüssiges Z'extrakt.** See *Extractum XANTHOXYLI fluidum*.

**ZAHNWURZ** (Ger.), n. Tsa<sup>3</sup>n'wur<sup>2</sup>s. 1. See *DENTARIA*. 2. The *Plumbago europæa*. [a, 35.]—**Kleine Z.** The root of *Dentaria bulbifera*. [a, 35.]

**ZAHNWURZEL** (Ger.), n. Tsa<sup>3</sup>n'wur<sup>2</sup>s-e<sup>2</sup>n. 1. The root of a tooth. [L, 2.] The genus *Dentaria*. 3. The root of *Anaclypus officinarum*. 4. The *Lathræa squamaria*. 5. The root of *Plumbago europæa*. [a, 35.]—**Z'entzündung.** See *PERIODONTITIS*.—**Z'höhle.** See *ALVEOLUS* (1st def.).

**ZAIBAC**, n. Written also *zaibach* and *zaibar*, and Latinized into *zibatum*. Of the alchemists, mercury. [B, 52.]

**ZAISENHAUSEN** (Ger.), n. Tsa<sup>3</sup>i<sup>2</sup>s-e<sup>2</sup>n-ha<sup>2</sup>-u<sup>4</sup>z'e<sup>2</sup>n. A place in Baden, Germany, where there are saline, alkaline, and sulphurous springs. [L, 30, 49, 135 (a, 14).]

**ZAIZON**, n. A place in Kronstadt, Transylvania, where there are saline springs. [L, 30, 49, 57 (a, 14).]

**ZALDIVAR, ZALDUA**, n's. A place in Biscay, Spain, where there is a sulphurous spring. [L. 49 (a, 14).]

**ZALICO** (Hind.), n. Of Adanson, the *Rhizophora cylindrica*. [a, 35.]

**ZALIL** (Afghan), n. A species of *Delphinium* having yellow flowers which are used as a tonic and as a dye. [a, 35.]

**ZAMIA** (Lat.), n. f. *Zam(zam)'ia-a'*. Fr., *zámie*. A genus of sago-yielding *Cycadaceae*, forming, with *Encephalartos*, etc., a family of the *Anagopterides* or a section of the *Cycadeae*. The *Zamia* are a class of plants, including the *Cycadaceae*. The *Zamia* are: Of Unger, the *Zamia*; of Eichler and others, a tribe of the *Cycadaceae*, corresponding to the *Encephalartea*; of Bentham and Hooker, a subtribe of the *Encephalartea*. [a, 35.]—**Z. caffra**, **Z. cycadifolia**, **Z. cycadis**. Fr., z. (ou arbre a pain) des Cafres. A species identical with *Cycas caffra* and *Encephalartos caffra*. [a, 35.]—**Z. integrifolia**. A species found in the Bahamas and tropical America. The pith yields z. arrow-root. [a, 35.]—**Z. lanuginosa**. A tropical American species yielding an inferior sago. [a, 35.]—**Z. villosa**. See *Z. caffra*.

**ZANALOID**, n. *Za'n-a-l'oid*. An active principle, probably  $C_{14}H_{18}O_7$ , extracted from Zanzibar aloes; said to be identical with barbaloin. It forms a number of substitution compounds (see ACETYLANALOID, BROMOZANALOID, and CHLORZANALOID). [B, 2.]

**ZANDÍA** (Sp.), n. *Tha'nd-e-a'*. Watermelon.

**ZÄNGCHEN** (Ger.), n. *Tsan'ch'e'n*. See *VOLSELLA*.

**ZANGE** (Ger.), n. *Tsa'n'z'e'*. See *FORCEPS*.—**Abortusz'**. See *OVUM-FORCEPS*.—**Axentractio'nz'**. See *Axis-traction FORCEPS*.—**Blasensteinz'**. See *Lithotomy FORCEPS*.—**Charpiez'**. See *Dressing FORCEPS*.—**Geburtz'**. See *OBSTETRICAL FORCEPS*.—**Grüttenz'**. See *ACANTHOBOLUS* (1st def.).—**Grössere Z.** See *FORCEPS major corporis callosi*.—**Grosse Z.** See *Long FORCEPS* and *FORCEPS major corporis callosi*.—**Haarz'**. See *Depilating FORCEPS*.—**Haken-z'**. See *Hook-FORCEPS*.—**Halsz'**. See *Cusco's throat FORCEPS* and *Burge's throat FORCEPS*.—**Hintere Z.** See *FORCEPS major corporis callosi*.—**Hohlmeisselz'**. See *Gouge FORCEPS*.—**Keihkopfz'**. A laryngeal forceps. [a, 34.]—**Kleiner Z.** See *FORCEPS minor corporis callosi*.—**Kleine Z.** See *Short FORCEPS* and *FORCEPS minor corporis callosi*.—**Klemmz'**. A clamp forceps. [a, 34.]—**Klotz'**. A dental-stump forceps. [a, 34.]—**Knochensplitterz'**. A bone-cutting forceps. [a, 34.]—**Knochenz'**. See *Bone FORCEPS* and *Craniotomy FORCEPS*.—**Kopfz'**. See *OBSTETRICAL FORCEPS*.—**Kornz'**. See *FORCEPS crenata*.—**Krücken-z'**. A crutch-shaped forceps. [E.]—**Kugelz'**. See *Bullet FORCEPS*.—**Luxationsz'**. See *Dislocation FORCEPS*.—**Mutterküchenz'**. See *Placenta FORCEPS*.—**Ohrenz'**. See *Eur FORCEPS*.—**Polypenz'**. See *Polypus FORCEPS*.—**Rupfz'**. See *VOLSELLA*.—**Schlundz'**. See *ESOPHAGEAL FORCEPS*.—**Schneidez'**. See *CONE body*.—**Z'kürner**. See *CONE granules*.—**Z'meissel**. A conical plectet. [A. 521 (a, 48).]—**Z'schnitt**. See *STAPHYLOTHY*.—**Z'stäbchen**. See *CONE rod*.—**Z'theil des Grundbeins**. The basilar portion of the occipital bone. [L.]

**ZÄPFLEIN** (Ger.), n. *Tsapf'lin*. See *ZÄPFCHEN*.—**Keltz'**. See *UVULA*.

**ZAPIS**, n. Ger., *Erdcautschuk*. A variety of rubber found in the earth in the vicinity of the Orinoco, identical with or similar to dapicho. [a, 35.]

**ZAPPELSUCHT** (Ger.), n. *Tsa'p'pe'l-zuch't*. See *CHOREA*.

**ZARATHAN** (Ar.), n. *Za'r'a'ath-a'n*. Scirrhus induration of the mamma. [A. 322, 325 (a, 48).]

**ZARNICH**, n. Of the alchemists, orpiment. [A. 325 (a, 48).]

**ZARZAPARRILLA** (Sp.), n. *Tha'r-tha'p-a'r-re'l'ya'*. See *SARSAPARRILLA* and *SMILAX medica*.

**ZASER** (Ger.), n. *Tsa'ze'r*. See *FIBRE* and *FIBRIL*.—**Z'blume**. See *MESEMBRYANTHEMUM*.—**Z'gewächs**. See *POLYPUS*.

**ZASMIDIUM** (Lat.), n. n. *Za's(zas)-mi'd'i'z-u'm(u'm)*. A genus of the *Perisporiaceae*. [a, 35.]—**Z. cellare**. Wine-cellar fungus; a species covering the walls of cellars, casks, bottles, etc., with a felt-like coating. It sometimes penetrates the corks in wine-bottles, but does not apparently injure the wine. [a, 35.]

**ZAUBERSTRAUCH** (Ger.), n. *Tsa'u'b-e'r-str'a-u'ch'*. See *HAMAMELIS* (1st def.).

**ZAUKE** (Ger.), n. *Tsa'u'k-e'*. The genus *Convallaria*. [a, 35.]

**ZAUM** (Ger.), n. *Tsa'u'm*. See *FRENUM* and *HABENA*.—**Z'binde**. See *HABENA* (1st def.).

**ZAUNREIS** (Ger.), n. *Tsa'u'n-ris*. See *GALUM aparine*.

**ZAUNRÜBE** (Ger.), n. *Tsa'u'n-rü'b-e'*. The genus *BRYONIA*. [a, 35.]—**Z'nbitter**. See *BRYONIN*.

**ZEÄ** (Lat.), n. f. *Ze(ze)'a'*. Gr., *ζέα* (1st def.), *ζεία*. Fr., *maïs*, *zèa*. Ger., *Mais*, *Mays*. 1. Of the ancients, probably spelt. 2. A genus of grasses. The *Zeaceae* (of Reichenbach, a division of the *Gramineae*) consists of this single genus. [a, 35.]—**Z. japonica**. Japanese maize; a variety of *Z. maïs*. [a, 35.]—**Z. maïs**, **Z. maiz**, **Z. mays**. Fr., *zèa maïs*, *blé de Barbarie* (ou d'Espagne, ou de Guinée, ou d'Inde, ou d'Italie, ou de Turquie), *froment* (ou graine de Turquie, *maiz*, *troquet*. Ger., *gemeiner Mais*, *Mays*, *türkischer Weizen*, *Wälschkorn*. Indian corn, maize, Guinea (or Turkey) wheat; probably indigenous to tropical America but now cultivated throughout warm and temperate climates for its grain, which yields various food products and is used in the manufacture of oil, glucose, starch (see *CORN STARCH*), alcohol, whisky, etc. It is said to contain from 8 to 10 per cent. of oil and to be richer in albuminoids than any other cereal. The stalks are used in making sugar and molasses. The grain is used (in Mexico) in inflammatory complaints like barley or rice, and the meal as a dry poultice. The male flowers (tassel) were formerly used in diseases of the urinary organs. [a, 35.]

**ZEBA-WOOD**, n. *Zeb'ra'-wu'd*. The *Connarus africanus* (in Guinea), *Guetarda speciosa* (in India), *Eugenia fragrans* (in Jamaica), etc. [a, 35.]

**ZECKE** (Ger.), n. *Tse'k'e'*. See *IKODES ricinus*.

**ZEDER** (Ger.), n. *Tsad'e'r*. See *CRDAR*.

**ZEDERACH** (Ger.), n. *Tsad'e'r-a'ch'*. See *MELIA* (2d def.).

**ZÉDOAIRE** (Fr.), n. *Za-do-a'*. 1. See *ZEDOARY*. 2. The genus *Kämpferia*. [a, 35.]—**Graines de z.** See *SANTONICA*.—**Poudre de z.** [Fr. Cod.] Zeduary dried at 40° C., powdered in an iron mortar, and sifted through a No. 120 silk sieve. [B. 95 (a, 88).]—**Z. longue** (rhizome) [Fr. Cod.]. See *Long ZEDOARY*.—**Z. ronde** (rhizome) [Fr. Cod.]. See *Round ZEDOARY*.

**ZEDOARIA** (Lat.), n. f. *Ze'd(zad)-o-a'r'i'a'*. See *ZEDOARY*.—**Radix zedoariae longe**, **Rhizoma zedoariae**. See *Long ZEDOARY*.—**Rhizoma zedoariae rotunda**. See *Round ZEDOARY*.—**Semen zedoariae**. See *SANTONICA*.—**Tinctura zedoariae composita**. A preparation made by extracting with alcohol or spirit of lemon a mixture of zeduary and various aromatic substances, and adding ether (or a little nitric acid). A typical variety consisted of 120 parts of zeduary, 60 each of sweet-flag and galangal, 30 each of chamomile, anise, and caraway, 22 each of laurel-berries and cloves, 15 each of orange-peel and mace, 720 each of alcohol and peppermint water, and 120 of hydrochloric ether. [B. 119 (a, 38).]—**Zedoariae radix**. See *Long ZEDOARY*.—**Z. germanica**. See *ACORUS calamus*.—**Z. longa**. See *Long ZEDOARY*.—**Z. lutea**. The *Zingiber cassumunar*. [a, 35.]—**Z. rotunda**. See *Round ZEDOARY*.

**ZEDOARY**, n. *Ze'd'o-a-r'i'a'*. Lat., *zedoaria*. Fr., *zédoaire*. Ger., *Zithervurzel*, *Zedoarwurzel*. Long z. and round z., also the plants yielding them. [a, 35.]—**Long z.** Lat., *rhizoma zedoariae* (Ger. Ph., Belg. Ph., Russ. Ph.), *radix zedoariae longe*. Fr., *zédoaire longue* (rhizome) [Fr. Cod.]. Ger., *lange Zithervurzel*. The aromatic rhizome of *Curcuma zerrumbet*. It is grayish-white externally and yellowish-brown within, and occurs in small slices about half an inch thick and two inches in circumference, showing remnants of radicles. It is bitter, pungent, and somewhat emporaceous in taste, and is used as a tonic and carminative. [a, 35.]—**Round z.** Lat., *radix zedoariae rotunda*. Fr., *zédoaire ronde* (rhizome) [Fr. Cod.]. Ger., *runde Zithervurzel*. A rhizome resembling long z., but occurring usually in small sections having a heart-shaped outline. It is the product of *Curcuma aromatica*, or, according to some, of *Kämpferia rotunda*. It is said to be less spicy than long z. [a, 35.]

**ZEDRACH** (Ger.), n. *Tsad'ra'ch'*. See *MELIA* (2d def.).—**Gemeiner Z.** See *MELIA azederach*.—**Indischer Z.** See *AZADRACHTA indica*.—**Z'rinde**. The bark of *Adzadrachta indica*, also the root-bark of *Melia azederach*. [a, 35.]

**ZEHE** (Ger.), n. *Tsa'e'*. 1. See *TOE*. 2. One of the secondary convolutions of the hippocampus major. [L. 17 (K).]—**Glanzz'n**. Toes affected with glossy skin (q. r.).—**Gronnz'n**. The great toe. [L.]—**Kleinz'n**. The little toe. [L.]—**Z'nglieder**. The phalanges of the foot. [L.]—**Z'n Rücken**. See *ACRODACTYLUM*.—**Z'nseite**. See *PARADACTYLE*.

**ZEHNTELNORMALLAUGE** (Ger.), n. Tsan'te<sup>2</sup>l-norm-a<sup>2</sup>l-a<sup>2</sup>-u<sup>2</sup>g-e<sup>2</sup>. A decinormal alkaline solution used in acidimetry. [B, 108 (a, 14).]

**ZEHNTELNORMALSÄURE** (Ger.), n. Tsan'te<sup>2</sup>l-norm-a<sup>2</sup>l-zoir-e<sup>2</sup>. A decinormal acid solution. [B, 108 (a, 14).]

**ZEHRUNG** (Ger.), n. Tsar'un<sup>2</sup>. See CONSUMPTION and PHTHISIS.

**ZEHRWURZEL** (Ger.), n. Tsar'vurt<sup>2</sup>s-e<sup>2</sup>l. The root of *Arum maculatum* and of *Acorus calamus*. [a, 35.]

**ZEHRUCHT** (Ger.), n. Tsar'zuch<sup>2</sup>t. Pulmonary phthisis.

**ZEICHEN** (Ger.), n. Tsch<sup>2</sup>h'e<sup>2</sup>n. See SIGN and SYMPTOM.—**Hauptz'**. A diagnostic sign. [L, 80].—**Malz'**. See NÆVUS.—**Z'lehre**. See SYMPTOMATOLOGY.

**ZEICHNUNG** (Ger.), n. Tsch<sup>2</sup>h'un<sup>2</sup>. A drawing, a delineation. [L, 46 (a, 21).]—**Kolbenzellenz'**. Of Krause, the peculiar cell-like appearance produced by the transverse markings of the core of a tactile corpuscle. ["Arch. f. mikr. Anat.," 1881, p. 111 (J).]

**ZEIN**, n. Ze'i<sup>2</sup>n. Fr. *zéine*. Ger., *Zein*, *Maiskleber*. 1. Of Gorcham, the gluten of maize. 2. Of Stöpf, a white solid obtained from the alcoholic extract of maize-meal: perhaps merely a mixture of vegetable gelatin and casein. [B, 93 (a, 14); "Pharm. Jour. and Trans.," Apr. 30, 1892, p. 898.]

**ZEISMUS** (Lat.), n. m. Ze(ze<sup>2</sup>)(i<sup>2</sup>s-mu<sup>2</sup>s(mu<sup>2</sup>s). From *Zea*, maize. Fr., *zéisme*. Pellagra regarded as due to a maize diet. [L, 41 (a, 14).]

**ZEIT** (Ger.), n. Tsit. Time; a period. [a, 14].—**Lebez'**. The duration of life. [L, 80].—**Menstruationsz'**. See Menstrual PERIOD.—**Wochenbettz'**. See Puerperal PERIOD.—**Z'raum**, **Z'umlauf**. A period or stage. [L, 80].

**ZEITIGUNG** (Ger.), n. Tsit'i<sup>2</sup>g-un<sup>2</sup>. See MATURATION.

**ZEITLOSE** (Ger.), n. Tsit'los-e<sup>2</sup>. The genus *Colchicum*. [a, 35].—**Flüssiges Z'nknochenextrakt**. See *Extractum colchici radicis fluidum*.—**Flüssiges Z'nsamenextrakt**. See *Extractum colchici seminis fluidum*.—**Fremde Z'nwurzel**. See *HERMODACTYL*.—**Gefleckte Z.**, **Gescheckte Z.** See *COLCHICUM variegatum*.—**Herbznwurzel**. **ZELLERNEUERUNG** (Ger.), n. Tse<sup>2</sup>l'e<sup>2</sup>r-nol-e<sup>2</sup>r-un<sup>2</sup>. See **CELL-rejuvenescence**.

**ZELLFADEN** (Ger.), n. Tse<sup>2</sup>l'fa<sup>2</sup>d-e<sup>2</sup>n. See **CELL-chain**; in the pl., **Zellfäden**, see **Achromatic FIBRILS**.

**ZELLFLÄCHE** (Ger.), n. Tse<sup>2</sup>l'flach<sup>2</sup>-e<sup>2</sup>. See **CELL-surface**.

**ZELLGEWEBARTIG** (Ger.), adj. Tse<sup>2</sup>l'ge<sup>2</sup>-vab-a<sup>2</sup>rt-l<sup>2</sup>g. See **CELLULAR**.

**ZELLGEWEBSENTZÜNDUNG** (Ger.), n. Tse<sup>2</sup>l'ge<sup>2</sup>-vabs-e<sup>2</sup>nt-sü<sup>2</sup>nd-un<sup>2</sup>. See **CELLULITIS**.

**ZELLGEWEBSGESCHWULST** (Ger.), n. Tse<sup>2</sup>l'ge<sup>2</sup>-vabz-ge<sup>2</sup>-shvulst. See **FIBROMA**.

**ZELLHAUT** (Ger.), n. Tse<sup>2</sup>l'ha<sup>2</sup>-u<sup>2</sup>t. See **CELL-membrane** and **Cellular COAT**.—**Z'los**. Destitute of an envelope (said of cells). [L.]

**ZELLICHT** (Ger.), adj. Tse<sup>2</sup>l'li<sup>2</sup>ch<sup>2</sup>t. See **CELLULAR**.

**ZELLIG** (Ger.), adj. Tse<sup>2</sup>l'li<sup>2</sup>g. 1. See **AREOLAR, CELLULAR**, and **FAVULOUS**.

**ZELLINHALT** (Ger.), **ZELLINNERE** (Ger.), n's. Tse<sup>2</sup>l'-i<sup>2</sup>n-ha<sup>2</sup>lt, -i<sup>2</sup>n-ne<sup>2</sup>r-e<sup>2</sup>. See **CELL contents**.

**ZELLKETTE** (Ger.), n. Tse<sup>2</sup>l'ke<sup>2</sup>t-te<sup>2</sup>. See **CELL-chain**.

**ZELLKNOSPUNG** (Ger.), n. Tse<sup>2</sup>l'kno<sup>2</sup>-sp-un<sup>2</sup>. See **GERMINATION**.

**ZELLKÖRPER** (Ger.), n. Tse<sup>2</sup>l'ku<sup>2</sup>rp-e<sup>2</sup>r. 1. See **CELL-body**. 2. See **CELL-mass**. 3. **Cavernous tissue**. [L.]—**Z. der Ruthe**. The corpora cavernosa of the penis. [L.]

**ZELLEBEEN** (Ger.), n. Tse<sup>2</sup>l'ab-e<sup>2</sup>n. See **Cell-LIFE**.

**ZELLEHRE** (Ger.), n. Tse<sup>2</sup>l'lar-e<sup>2</sup>. See **Cell-theory**.

**ZELLEIB** (Ger.), n. Tse<sup>2</sup>l'lib. See **CELL-body**.

**ZELLINIE** (Ger.), n. Tse<sup>2</sup>l'li<sup>2</sup>n-e. See **CELL-chain**.

**ZELLPLASMA** (Ger.), n. Tse<sup>2</sup>l'pla<sup>2</sup>-s-ma<sup>2</sup>. See **CYTOPLASMA**.

**ZELLPLATTE** (Ger.), n. Tse<sup>2</sup>l'pla<sup>2</sup>-t-te<sup>2</sup>. See **CELL-plate** (2d def.).

**ZELLPROTOPLASMA** (Ger.), n. Tse<sup>2</sup>l'prot-o-pla<sup>2</sup>-s-ma<sup>2</sup>. Cellular protoplasm (see under **CELL** [2d def.]).

**ZELLRAUM** (Ger.), n. Tse<sup>2</sup>l'ra<sup>2</sup>-u<sup>2</sup>m. See **CELL-space**.

**ZELLROHR** (Ger.), n. Tse<sup>2</sup>l'ror. See **Cellular COAT**.

**ZELLSAFT** (Ger.), n. Tse<sup>2</sup>l'za<sup>2</sup>-ft. See **CELL-fluid** and **NUCLEO-CHYME**.

**ZELLSAUM** (Ger.), n. Tse<sup>2</sup>l'za<sup>2</sup>-u<sup>2</sup>m. See **Cuticular LAYER**.

**ZELLSTOFF** (Ger.), n. Tse<sup>2</sup>l'sto<sup>2</sup>-f. See **CELLULOSE**.

**ZELLSTRANG** (Ger.), n. Tse<sup>2</sup>l'stra<sup>2</sup>-n<sup>2</sup>. See **CELL-chain**.

**ZELLTHÄTIGKEIT** (Ger.), n. Tse<sup>2</sup>l'tat-l<sup>2</sup>g-kit. See **CELL-LOSTY**.

**ZELLTHEILUNG** (Ger.), n. Tse<sup>2</sup>l'til-un<sup>2</sup>. See **CELL-division**.—**Freie Z.** See **Free SEGMENTATION**.

**ZELLULOSE** (Ger.), n. Tse<sup>2</sup>l'lul-o-s-e<sup>2</sup>. See **CELLULOSE**.

**ZELLVERJÜNGERUNG** (Ger.), n. Tse<sup>2</sup>l'fe<sup>2</sup>r-yu<sup>2</sup>-n<sup>2</sup>-ar-un<sup>2</sup>. See **CELL-rejuvenescence**.

**ZELLVERMEHRUNG** (Ger.), n. Tse<sup>2</sup>l'fe<sup>2</sup>r-mar-un<sup>2</sup>. See **CELL-multiplication**.

**ZELLVERSCHMELZUNG** (Ger.), n. Tse<sup>2</sup>l'fe<sup>2</sup>r-shme<sup>2</sup>lts-un<sup>2</sup>. See **CELL-union**.

**ZELLWAND** (Ger.), n. Tse<sup>2</sup>l'va<sup>2</sup>-nd. See **CELL-wall**.—**Primäre Z.** See **Primary CELL-wall**.

**ZELOTYPIA** (Lat.), n. f. Zelo<sup>2</sup>(zal)-o(o)-ti<sup>2</sup>p(tu)<sup>2</sup>/i<sup>2</sup>-a<sup>2</sup>. Gr., ζήλοτυπία from ζῆλος, zeal, and τυπώω, to strike. Fr., zélotypie. Morbid jealousy or zeal. [L. 41, 50 (a, 14).]

**ZELT** (Ger.), n. Tse<sup>2</sup>lt. 1. See **FISTIGIUM** (1st def.). 2. Of Reil, the roof of the fourth ventricle. [L. 6 (K.).]—**Dreieckiges Z.** [Reil]. See **Z.** (3d def.).—**Hirnz'**. See the major list.—**Kleines Z.** See **Z.** (2d def.).—**Kleinhirnz'**. See **TENTORIUM CEREBELLI** and **VALVE of Vieussens**.

**ZELTCHEN** (Ger.), n. Tse<sup>2</sup>lt'ch<sup>2</sup>-e<sup>2</sup>n. See **LOZENGE**.

**ZEMA** (Lat.), n. n. Zem<sup>2</sup>(ze)n/a<sup>2</sup>. Gen., zematō (-atis). Gr., ζέμα (from ζέω, to boil). See **DECOCTION** (2d def.).

**ZEMENT** (Ger.), n. Tsam-e<sup>2</sup>nt'. See **CEMENT** (2d def.).

**ZEM-ZEM**, n. Ze<sup>2</sup>m/ze<sup>2</sup>m. A place in Lake County, California, where there are saline and chalybeate springs. [Anderson (a, 14).]

**ZENKERISM**, n. Tse<sup>2</sup>n<sup>2</sup>k'es<sup>2</sup>-i<sup>2</sup>z'm. A peculiar form of degeneration, allied to colloid, described by Zenker as occurring in the voluntary muscles in typhoid fever. [E, 25.]

**ZEOLITE**, n. Ze<sup>2</sup>-o<sup>2</sup>l-ite. From ζέω, to boil, and λίθος, a stone. Fr., zéolithe. Ger., Zeolith. A hydrated silicate. [B, 3.]

**ZEORA** (Lat.), n. f. Ze<sup>2</sup>-o<sup>2</sup>-ra<sup>2</sup>. Fr., zéore. Of Fries, a subdivision of the genus *Parmelia*. [B, 38, 48 (a, 14).]

**ZEORIN**, n. Ze<sup>2</sup>-o<sup>2</sup>r-i<sup>2</sup>n. Fr., zéorine. A neutral substance, C<sub>12</sub>H<sub>22</sub>O, obtained from *Zeora sordida*. [B, 270 (a, 38).]

**ZEOSCOPE**, n. Ze<sup>2</sup>-o<sup>2</sup>-skop. From ζέω, to boil, and σκοπέω, to examine. Fr., zéoscope. An apparatus provided with a dial plate or a graduated stem, for determining from its boiling point the alcoholic strength of a liquid, zero marking the boiling point of pure water and 100 that of absolute alcohol. [L, 49 (a, 14).]

**ZEPHYRANTHES** (Lat.), **ZEPHYRANTHUS** (Lat.), n's m. Ze<sup>2</sup>f-i<sup>2</sup>pu<sup>2</sup>-a<sup>2</sup>ntha<sup>2</sup>(a<sup>2</sup>nth)<sup>2</sup>/ez-as, -u<sup>2</sup>-s-us. From ζέφυρος, the west wind, and ἄνθος, a flower. Zephyr-flower; a genus of the *Amaryllidaceae*, sometimes referred to *Amaryllis*. [a. 35.]—**Z. atamasco**. Atamasco lily, stagger-grass; a bulbous plant found from Virginia to Florida. [a. 35.]

**ZEPHERWURZEL** (Ger.), n. Tse<sup>2</sup>pt'e<sup>2</sup>r-vürts-e<sup>2</sup>l. Zedoary (root). [a. 35.]

**ZERÄSTELUNG** (Ger.), n. Tse<sup>2</sup>ra<sup>2</sup>-st'e<sup>2</sup>l-un<sup>2</sup>. See **RAMIFICATION**.

**ZERBORESTEN** (Ger.), adj. Tse<sup>2</sup>ra<sup>2</sup>-borst'e<sup>2</sup>n. See **DIFFRACT**.

**ZERBRÉCHLICH** (Ger.), adj. Tse<sup>2</sup>ra<sup>2</sup>-bre<sup>2</sup>ch<sup>2</sup>/li<sup>2</sup>ch<sup>2</sup>. See **FRAGILE**.

**ZERBRECHUNG** (Ger.), n. Tse<sup>2</sup>ra<sup>2</sup>-bre<sup>2</sup>ch<sup>2</sup>-un<sup>2</sup>. A fracturing, a fracture.

**ZERBRÜCKELT** (Ger.), adj. Tse<sup>2</sup>ra<sup>2</sup>-brü<sup>2</sup>k'e<sup>2</sup>lt. See **FRUSTULOSE**.

**ZERBST** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>bst. A place in Anhalt, Germany, where there is a gaseous and chalybeate spring. [L, 49 (a, 14).]  
**ZERFALL** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-fa<sup>2</sup>l'. See DISINTEGRATION.  
**ZERFASERUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-fa<sup>2</sup>z'e<sup>2</sup>r-un<sup>2</sup>. See FIBRILLATION.  
**ZERFLIESSBAR** (Ger.), adj. Tse<sup>2</sup>r<sup>2</sup>-fles'ba<sup>2</sup>r. See DELIQUESCENCE.  
**ZERFLIESSEN** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-fles'se<sup>2</sup>n. See COLLIQUATION.  
**ZERFLIESSUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-fles'sun<sup>2</sup>. See DELIQUESCENCE.  
**ZERFRESEN** (Ger.), **ZERFRESSUNG** (Ger.), n's. Tse<sup>2</sup>r<sup>2</sup>-fre<sup>2</sup>s'se<sup>2</sup>n, -sun<sup>2</sup>. Cauterization, corrosion, erosion, ulceration.—**Z. des Magens**. See *Perforating ulcer of the stomach*.  
**ZERGLIEDERUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-gled'e<sup>2</sup>r-un<sup>2</sup>. See DISSECTION.—**Menschenz'**. See *Human anatomy*.—**Muskelz'**. See *Myotomy*.—**Vollkommene Z.** See *Holotomy*.—**Z. der Lymphgefäße**. See *Hydrangiotomy*.—**Z'skunde**. See *ANATOMY* (4th def.).—**Z'skunst**. See *DISSECTION* (1st def.).  
**ZERKAUEN** (Ger.), **ZERKAUUNG** (Ger.), n's. Tse<sup>2</sup>r<sup>2</sup>-ka<sup>2</sup>z'u<sup>2</sup>e<sup>2</sup>n, -un<sup>2</sup>. See *Mastication*.  
**ZERKLEINERT** (Ger.), adj. Tse<sup>2</sup>r<sup>2</sup>-klin'e<sup>2</sup>rt. See *COMMINUTED*.  
**ZERKLÜFTUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-klü'ft'un<sup>2</sup>. A splitting or segmentation; dissociation, disintegration. [a, 50.]  
**ZERLEGEND** (Ger.), adj. Tse<sup>2</sup>r<sup>2</sup>-lag'e<sup>2</sup>nd. See *ANALYTIC*.  
**ZERLEGUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-lag'un<sup>2</sup>. Analysis, dissection.—**Lungenz'**. See *PNEUMOTOMY*.—**Muskelz'**. See *MYOTOMY*.  
**ZERMALMEND** (Ger.), adj. Tse<sup>2</sup>r<sup>2</sup>-ma<sup>2</sup>lm'e<sup>2</sup>nd. See *CATALOTIC*.  
**ZERMALMUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-ma<sup>2</sup>lm'un<sup>2</sup>. See *ATTRITION* (1st def.) and *CONTUSION*.  
**ZERNAGEND** (Ger.), adj. Tse<sup>2</sup>r<sup>2</sup>-na<sup>2</sup>g'e<sup>2</sup>nd. See *CORROSIVE*.  
**ZERNAGUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-na<sup>2</sup>g'un<sup>2</sup>. Corrosion. [A, 450 (a, 17).]  
**ZERPULVERUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-pul'f'e<sup>2</sup>r-un<sup>2</sup>. See *PULVERIZATION*.  
**ZERQUETSCHER** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-kwe<sup>2</sup>tsh'e<sup>2</sup>r. See *ÉCRASEUR* and *LITHOTRITE*.  
**ZERQUETSCHUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-kwe<sup>2</sup>tsh'un<sup>2</sup>. See *CONTUSION* and *ÉCRASEMENT*.  
**ZERREIBLICH** (Ger.), adj. Tse<sup>2</sup>r<sup>2</sup>-rib'l'i<sup>2</sup>ch<sup>2</sup>. See *FRIABLE*.  
**ZERREIBUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-rib'un<sup>2</sup>. Trituration, levigation, comminution.  
**ZERREISSUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-ris'sun<sup>2</sup>. Laceration, disruption, division, rupture.—**Bauchfellz'**. See *HYPOGASTRORRHEXIS*.—**Magenz'**. See *GASTRORRHEXIS*.—**Z. der Harnblase**. See *CYSTORRHEXIS*.—**Z. der Hornhaut**. See *KERATORRHEXIS*.—**Z. der Mutterscheide**. See *COLPORRHEXIS*.—**Z. der Nabelschnur**. See *OMPHALOTOMY* (2d def.).—**Z. des Herzens**. See *CARDIORRHOIS*.  
**ZERRGEBURT** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-ge<sup>2</sup>z-burt. See *MONSTER* (1st def.).  
**ZERRIEBEN** (Ger.), adj. Tse<sup>2</sup>r<sup>2</sup>-reb'e<sup>2</sup>n. See *CONTRITUS*.  
**ZERRISSEN** (Ger.), adj. Tse<sup>2</sup>r<sup>2</sup>-ri<sup>2</sup>ts'se<sup>2</sup>n. See *LACERATE*.  
**ZERRUPPEN** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-rup'f'e<sup>2</sup>n. See *TEASING*.  
**ZERRÜTTUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-ru<sup>2</sup>t'tun<sup>2</sup>. Derangement, disorder, confusion. [A, 450 (a, 17).]  
**ZERSCHLITZ** (Ger.), adj. Tse<sup>2</sup>r<sup>2</sup>-shli<sup>2</sup>tst'. See *LACINATE*.  
**ZERSCHMELZUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-shme<sup>2</sup>lts'un<sup>2</sup>. See *COLLIQUATION*.  
**ZERSCHMETTERT** (Ger.), adj. Tse<sup>2</sup>r<sup>2</sup>-shme<sup>2</sup>t'te<sup>2</sup>rt. See *COMMINUTED*.  
**ZERSCHMETTERUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-shme<sup>2</sup>t'te<sup>2</sup>r-un<sup>2</sup>. Comminution. [A, 521 (a, 48).]—**Z'sbruch**. A comminuted fracture.  
**ZERSCHNEIDEN** (Ger.), **ZERSCHNEIDUNG** (Ger.), n's. Tse<sup>2</sup>r<sup>2</sup>-shni<sup>2</sup>d'e<sup>2</sup>n, -un<sup>2</sup>. A cutting apart or into pieces. See *DISSECTION* and *DIAPYCN*.  
**ZERSCHNITTEN** (Ger.), adj. Tse<sup>2</sup>r<sup>2</sup>-shni<sup>2</sup>t'te<sup>2</sup>n. See *DISSECTED*.  
**ZERSETZUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-ze<sup>2</sup>ts'un<sup>2</sup>. See *DECOMPOSITION*.—**Fäulnissz'**. Putrefaction.—**Gährungs z'**. Fermentative decomposition. [K, 16.]—**Teilweise Z.** See *MERODIALYSIS*.  
**ZERSPALTUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-spa<sup>2</sup>lt'un<sup>2</sup>. Splitting, fissure.  
**ZERSPLITTERUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-spli<sup>2</sup>t'te<sup>2</sup>r-un<sup>2</sup>. A breaking into splinters. [A, 450 (a, 17).]  
**ZERSPRINGEND** (Ger.), adj. Tse<sup>2</sup>r<sup>2</sup>-spri<sup>2</sup>n<sup>2</sup>t'e<sup>2</sup>nd. See *DIHISENT*.  
**ZERSTÄUBER** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-stoib'e<sup>2</sup>r. See *ATOMIZER*.  
**ZERSTÄUBT** (Ger.), adj. Tse<sup>2</sup>r<sup>2</sup>-stoib't'. Pulverized, atomized.  
**ZERSTÖRUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-stu<sup>2</sup>r'un<sup>2</sup>. Destruction, disorganization.  
**ZERSTOSSUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-sto<sup>2</sup>s'un<sup>2</sup>. A bruising; in pharmacy, see *CONCASSATION* and *TRITURATION*.  
**ZERSTREUT** (Ger.), adj. Tse<sup>2</sup>r<sup>2</sup>-stroit'. 1. Scattered, sparse, disseminated. [a, 35.] 2. Absent-minded. [A, 521 (a, 48).]  
**ZERSTREUTHEIT** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-stroit'hit. Absent-mindedness. [A, 521.]  
**ZERSTREUUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-stroit'un<sup>2</sup>. See *DISPERSION* and *DISSEMINATION*.—**Z'sbild**. An image produced by a dispersing lens or mirror. [B.]—**Z'sglas**. A dispersing lens.—**Z'skreise**. See *Circles of DISPERSION*.—**Z'spiegel**. A convex mirror. [B.]

**ZERSTÜCKELUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-stu<sup>2</sup>k'e<sup>2</sup>l-un<sup>2</sup>. Dismemberment, comminution, fragmentation.—**Z. des Kindes**. See *EMBRYOTOMY* (2d def.).  
**ZERTHEILEND** (Ger.), adj. Tse<sup>2</sup>r<sup>2</sup>-til'e<sup>2</sup>nd. See *RESOLVENT* and *DISCUTIENT*.  
**ZERTHEILUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-til'un<sup>2</sup>. Division, separation, distribution. [A, 450 (a, 17).]—**Z'smittel**. A discutient.  
**ZERTRENNUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-tre<sup>2</sup>n'un<sup>2</sup>. Separation, disunion, dissolution. [A, 450 (a, 17).]  
**ZERTRÜMMERUNG** (Ger.), n. Tse<sup>2</sup>r<sup>2</sup>-tru<sup>2</sup>m'm'e<sup>2</sup>r-un<sup>2</sup>. Destruction.—**Z'sbrand**. See *Acute inflammatory GANGRENE*.  
**ZERUMBET** (Lat.), n. n. indecl. Ze<sup>2</sup>r-u<sup>2</sup>mb(u<sup>2</sup>mb'e<sup>2</sup>t. Fr., *zérumbet*. Ger., *Z.* 1. The *Zingiber* z., or its root-stock (z.-root). 2. A section of the genus *Zingiber*. 3. The genus *Curcuma*, especially the *Curcuma* z. 4. The genus *Alpinia*. [a, 35.]—**Z.-root**. Lat., *radix* z., *radix zerumbeti*. 1. See under *Z.* (1st def.). 2. The tubers of *Zingiber cassumunar*. [a, 35.]  
**ZERUMBETUM** (Lat.), n. n. Ze<sup>2</sup>r-u<sup>2</sup>mb-et(at)<sup>2</sup>u<sup>2</sup>m(u<sup>2</sup>m). See *ZERUMBET* (1st def.).—**Radix zerumbeti**. See *ZERUMBET*.  
**ZERUPFEN** (Ger.), v. tr. Tse<sup>2</sup>r<sup>2</sup>-tsup'f'e<sup>2</sup>n. To tease a microscopic preparation. [B.]  
**ZESIS** (Lat.), n. f. Ze<sup>2</sup>(ze<sup>2</sup>)si<sup>2</sup>s. Gen., *zes'eos* (-is). Gr., *ζέσις* (from *ζειν*, to boil). Fr., *zèse*. Ebullition. [L, 50 (a, 14).]  
**ZEST**, n. Ze<sup>2</sup>st. Fr., *zeste*. See *LIMONIS cortex*.  
**ZESTOLUSIA** (Lat.), n. f. Ze<sup>2</sup>st-o(o<sup>2</sup>)-lu<sup>2</sup>(lu)<sup>2</sup>zi<sup>2</sup>(si<sup>2</sup>)a<sup>2</sup>. Gr., *ζεστολουσία* (from *ζεστός*, boiling hot, and *λούειν*, to wash). Fr., *zestolusie*. Washing or bathing with hot water. [A, 311, 322 (a, 48).]  
**ZEUGEND** (Ger.), adj. Tsoig'e<sup>2</sup>nd. Generative, procreating.  
**ZEUGUNG** (Ger.), n. Tsoig'un<sup>2</sup>. Generation.—**Abwechselnde Z.** See *Alternate GENERATION*.—**Beuteltierische Z.** See *Marsupial GENERATION*.—**Eierlegende Z.** See *Oviparous GENERATION*.—**Freiwillige Z.** See *Spontaneous GENERATION*.—**Geschlechtliche Z.** See *GAMOGENESIS*.—**Jungfernz'**. See *PARTHENOGENESIS*.—**Lebendige Z.** See *Viviparous GENERATION*.—**Z'sfähig**. Capable of generation. [a, 48.]—**Z'skraft**. Procreative power.—**Z'skreis**. See *CYCLUS generationis*.—**Z'sreife**. See *PUBERTY*.—**Z'sthelle**. The genitals; in botany, the organs of fructification. [a, 35.]—**Z'strieb**. Procreative impulse.—**Z'sunfähig**. See *IMPOTENT*.—**Z'svermögen**. Capability of generation. [a, 48.]  
**ZEYSUM**, n. See under *SANTOLINA fragrantissima*.  
**ZIBATUM** (Lat.), n. n. Zi<sup>2</sup>b-at(a<sup>2</sup>t)<sup>2</sup>u<sup>2</sup>m(u<sup>2</sup>m). Zaibach, the alchemical name for mercury. [B, 52.]  
**ZIBET, ZIBETH**, n's. Zi<sup>2</sup>b'e<sup>2</sup>t, -e<sup>2</sup>th. See *CIVET* (1st def.).  
**ZIBETH** (Ger.), n. Tseb-at'. Lat., *zibetha, zibethium, zibethum*. See *CIVET* (2d def.).—**Z'baum**. See *DURIO zibethinus*.—**Z'katze, Z'thier**. See *VIVERRA*.  
**ZIBEBÆ** (Lat.), n. f. pl. Zi<sup>2</sup>b'e<sup>2</sup>b-e(a<sup>2</sup>e<sup>2</sup>). Ger., *Zibeben*. See *RAISINS*.  
**ZICKZACKIG** (Ger.), adj. Tsi<sup>2</sup>k'tsa<sup>2</sup>k-i<sup>2</sup>g. See *FLEXUOSE*.  
**ZIEGE** (Ger.), n. Tseg'e<sup>2</sup>. See *GOAT*.—**Z'nauge**. See *EGLOPS* (1st def.).—**Z'nkotharzel**. See *DIACAPRAGON*.—**Z'nsäure**. See *CAPRIC acid*.—**Z'ntimiste**. See *EGOPHONY*.—**Z'ntalg**. See *SEBUM hircinum*.

**ZIMMISÄURE** (Ger.), n. Tsi<sup>2</sup>mt/zoir-e<sup>2</sup>. See CINNAMIC acid.  
—**Z-Aethylester**. See ETHYL cinnamate.—**Z-Anhydrid**. See CINNAMIC anhydride.—**Z-Benzylester**. See CINNAMEIN.—**Z'es-sigsäureanhydrid**. See ACETOCINNAMIC ANHYDRIDE.—**Z-Zinnester**. See STYRACIN.

**ZINALINE**, n. Zi<sup>2</sup>n'a<sup>2</sup>-en. A yellow coloring matter, C<sub>20</sub>H<sub>19</sub>N<sub>3</sub>O<sub>6</sub>, produced by the action of nitrous acid on aniline. [B. 2.]

**ZINC**, n. Zi<sup>2</sup>n'k. Lat., *zincum*. Fr., *z.* Ger., *Zink*. A metallic element known to the ancients under the form of its alloy with copper, but not recognized as a distinct metal till the end of the seventeenth century. It is found in nature, sometimes uncombined but usually under the form of compounds constituting various minerals. Some of these (calamine, tutty, etc.) are employed in medicine. Z. is a hard, bluish-white metal, malleable and ductile at a temperature of 100° to 150° C., but brittle when heated above 200° C. It melts at 433° C., and when cooled after fusion has a crystalline texture. It acts as a bivalent radicle. Symbol, Zn; atomic weight, 64.9; sp. gr., 6.9. [B. 3.]—**Acetated z.** Z. carbonate. [B. 91.]—**Basic z. chromate**. One of several yellow compounds, Zn<sub>2</sub>(OH)<sub>2</sub>CrO<sub>4</sub> + H<sub>2</sub>O. 3Zn<sub>2</sub>(OH)<sub>2</sub>CrO<sub>4</sub> + H<sub>2</sub>O and Zn<sub>2</sub>(OH)<sub>2</sub>CrO<sub>4</sub>. [B. 3.]—**Brown z. oxide**. See TUTTA.—**Butter of z.** See Z. chloride.—**Caustique au chlorure de z. (Fr.)**. See *Pasta zinci chlorati*.—**Cerate of carbonate of z.** See *Ceratum zinci carbonatis*.—**Collyre au sulfate de z. (Fr. Cod.) (Fr.)**. Lat., *collyrium cum sulfate zincico*. A preparation consisting of 15 centigrammes of z. sulphate dissolved in 100 grammes of rose-water. [B.] Cf. *Collyrium cum sulfate zincico ex Sanchez*.—**Éthylure de z. (Fr.)**. See Z'ethyl.—**Flowers of z.** Fr., *fleurs de z.* oxyde de z. par voie sèche [Fr. Cod.]. Ger., *Zinkblumen*. Z. oxide prepared by subjecting pure metallic z. to a bright red heat with access to the air. [B.]—**Glycerite of oxide of z.** Lat., *glycerinum cum oxydo zincico* [Netherl. Ph.]. Fr., *glycér d'oxyde de z.* [Fr. Cod.]. Sp., *glicerolado de óxido zincico* [Sp. Ph.]. A preparation made by mixing 1 part of z. oxide (prepared by calcination) with 2 parts of glycerite of starch [Fr. Cod.]; or 1 part of z. oxide (prepared in the wet way) with 8 [Netherl. Ph.] (10 [Sp. Ph.]) parts of glycerite of starch. [B.; B. 95 (a. 38).]—**Granulated z.** [Br. Ph.]. Z. obtained in granulated masses by pouring the fused metal into cold water. [B. 5.]—**Hydrolé de sulfate de z. composé (Fr.)**. A preparation made by macerating for two days 6 parts of z. sulphate with 540 each of rose-water and water of plantain and 11 of powdered iris, and straining. [B. 119 (a. 38).]—**Hydrolotif de sulfate de z. (Fr.)**. See *Lotion astringente*.—**Injection de sulfate de z. (Fr.)**. A solution of z. sulphate in 500 times as much water. [B. 119 (a. 38).]—**Jaune de z. (Fr.)**. See Z. yellow.—**Memphitic z.** Z. carbonate. [B. 96.]—**Muriatic z.** Z. chloride. [B. 96.]—**Ointment of oxide of z. (U. S. Ph.)**. See *Unguentum zinci oxidis*.—**Oleate of z.** See Z. oleate.—**Oxide of z. by the dry way**. Fr., *oxyde de z. par voie sèche*. See *Flowers of z.*—**Oxide of z. by the wet way**. Fr., *oxyde de z. par voie humide* [Fr. Cod.]. The zinc oxidum of the U. S. Ph. (see under Z. oxide).—**Phosphure de z. (Fr.)**. See Z. phosphide.—**Pomade d'oxyde de z. (Fr.)**. See *Unguentum zinci oxidis*.—**Precipitated z. carbonate**. Lat., *zinci carbonas* [Br. Ph.] (*precipitatus* [U. S. Ph.]), *zincum carbonicum* [Swiss Ph.]. Fr., *souscarbonate de z. hydraté* [Fr. Cod.]. A basic z. carbonate prepared by precipitation from a solution of z. sulphate by the action of sodium carbonate. It varies in composition according to the degree of concentration of the solutions and the temperature at which precipitation occurs. As prepared by the U. S. process it has the constitution (ZnCO<sub>3</sub>)<sub>3</sub>.3Zn(OH)<sub>2</sub>; by the British formula, ZnCO<sub>3</sub>.2ZnO + 3H<sub>2</sub>O; and by the process of the Fr. Cod., (ZnCO<sub>3</sub>)<sub>3</sub>.5Zn(OH)<sub>2</sub> + H<sub>2</sub>O. It is a very fine white powder, devoid of taste and odor, and insoluble in alcohol and in water. [B.]—**Sea-salt of z.** Z. chloride. [B. 91.]—**Solution of z. chloride**. See *Liquor zinci chloridi*.—**Solution of z. hypochlorite**. An aqueous solution of an extemporaneously formed z. hypochlorite; prepared by mixing an aqueous solution of 24 oz. of z. sulphate with water in which 12 oz. of chlorinated lime have been thoroughly triturated, and making the product measure 1½ pints. [B. 5.]—**Souscarbonate de z. hydraté (Fr.)**. See under *Precipitated z. carbonate*.—**Sulfate de z. du commerce (Fr.)**. See *Zincum sulphuricum crudum*.—**Sulfate de z. officinal (Fr. Cod.) (ou pur) (Fr.)**. Purified z. sulphate. [B.] See Z. sulphate.—**Test z.** Metallic z. melted and allowed to run in a thin stream into water, thus forming small sticks or thin discs or fragments free from arsenic. [B. 5 (a. 38).]—**Z. acetate**. Lat., *acetas zinci* [Belg. Ph.] (see *zincicus* [Dan. Ph., Netherl. Ph.]), *zinci acetas* [U. S. Ph., Br. Ph.], *zincum aceticum* [Ger. Ph., Austr. Ph., Hung. Ph. (2d ed.)], Russ. Ph., Swiss Ph.], Fr., *acétate de z.* [Fr. Cod.]. Sp., *acetato zincico* [Sp. Ph.]. A white crystalline substance, Zn(C<sub>2</sub>H<sub>3</sub>O<sub>2</sub>)<sub>2</sub> + H<sub>2</sub>O. [B. 3.]—**Z. acrylate**. The compound C<sub>3</sub>H<sub>5</sub>O<sub>2</sub>.Zn. [B. 2; B. 3 (a. 38).]—**Z. aluminate**. The compound Al<sub>2</sub>ZnO<sub>4</sub>. [B. 2.]—**Z. amide**. Ger., *Zinkamid*. A white amorphous substance, ZnNH<sub>2</sub>. [B. 3.]—**Z. amyl**. See Z. diisooxymyl.—**Z. and creatinine chloride**. A body, (C<sub>4</sub>H<sub>7</sub>N<sub>3</sub>O<sub>2</sub>)<sub>2</sub>ZnCl<sub>2</sub>, forming acicular crystals. [B. 3, 158 (a. 24).]—**Z. and mercury cyanide**. See MERCURY and Z. cyanide.—**Z. and potassium cyanide**. A substance, K<sub>2</sub>Zn(CN)<sub>4</sub> = Zn<sup>2+</sup>(CN)<sub>4</sub><sup>2-</sup>, crystallizing into octahedra; formed by the evaporation of a solution of z. cyanide in a solution of an excess of potassium cyanide. [B.]—**Z. antimonate**. The compound ZnSbO<sub>3</sub>. [B. 2.]—**Z. antimonide**. An alloy of z. and antimony. [B.]—**Z. arsenate**. A substance, Zn<sub>3</sub>(AsO<sub>4</sub>)<sub>2</sub> + 8H<sub>2</sub>O, occurring native as a mineral. [B. 2.]—**Z. bromide**. Lat., *zinci bromidum* [U. S. Ph.]. Ger., *Bromzink*, *Zinkbromür*. A white, granular deliquescent powder, ZnBr<sub>2</sub>, of saline, metallic taste. [B.]—**Z. carbonate**. Normal z. carbonate, ZnCO<sub>3</sub>, occurs native in the impure form as calamine. It may also be prepared artificially. What is usually called z. carbonate is the precipitated z. carbonate (q. v.). [B.]—**Z. chloride**. Lat., *chlorureum zincum* [Dan. Ph., Finn. Ph., Netherl. Ph., Norw. Ph., Swed. Ph.], *chlorureum zinci* [Belg. Ph.], *zinci chloridum* [U. S. Ph., Br. Ph.], *zincum chloratum* [Ger. Ph., Austr. Ph., Hung. Ph. (2d ed.)],

Russ. Ph., Swiss Ph.] (see *chloretum* [Gr. Ph.]). Fr., *chlorure de z.* [Fr. Cod.]. Sp., *cloruro zincico* [Sp. Ph.]. Butter of z.: a white, deliquescent crystalline substance, ZnCl<sub>2</sub>, of caustic, metallic taste, acid reaction, and marked caustic properties. It is readily soluble in water and in alcohol. [B.]—**Z. chromate**. See *Basic z. chromate*.—**Z. chromite**. A dark-green crystalline body, ZnCr<sub>2</sub>O<sub>4</sub>. [B. 3.]—**Z. colloid**. See Z. COLLOID.—**Z. cyanide**. Fr., *cyanure de z.* [Fr. Cod.]. Ger., *Cyanzink*. Sp., *cianuro zincico* [Sp. Ph.]. A white insoluble powder, Zn(CN)<sub>2</sub> = Zn(CN)<sub>2</sub>, formed by the action of hydrocyanic acid on z. acetate or of potassium cyanide on other salts of z. [B.]—**Z. diamine**. See Z'amide.—**Z. diethyl**. See Z'ethyl (2d def.).—**Z. diethylate**. Ger., *Zinkäthylat*. A white powder, Zn(OC<sub>2</sub>H<sub>5</sub>)<sub>2</sub>. [B. 3.]—**Z. diethoxyacetate**. A substance, (C<sub>2</sub>H<sub>5</sub>)<sub>2</sub>O.Zn, occurring as acicular or laminar crystals and forming the most characteristic salt known of diethoxyacetic acid. [B. 3 (a. 38).]—**Z. diisooxymyl**. A liquid, Zn(C<sub>2</sub>H<sub>5</sub>)<sub>2</sub>. [B. 3.]—**Z. diisobutyl**. A liquid, Zn(C<sub>2</sub>H<sub>5</sub>)<sub>2</sub>. [B. 3.]—**Z. dust**. Ger., *Zinkstaub*. Metallic z. obtained as a fine powder in the process of z. manufacture; used as a reducing agent. [B. 3.]—**Z. ethide**. See Z'ethyl (2d def.).—**Z. ethoxide**. See Z. diethylate.—**Z'ethyl**. Fr., *z'éthyle*. Ger., *Zinkäthyl*. 1. A univalent radicle, Zn(C<sub>2</sub>H<sub>5</sub>)<sup>+</sup>. 2. The compound Zn(C<sub>2</sub>H<sub>5</sub>)<sub>2</sub> (more properly called z'diethyl or z. ethide), a mobile liquid having a peculiar odor and taking fire spontaneously on exposure to the air. [B. 3.]—**Z. ferriocyanide**. A yellow powder, Zn<sub>2</sub>Fe(C<sub>5</sub>N<sub>3</sub>)<sub>6</sub>. [B.]—**Z. ferrocyanide**. Lat., *zincum ferrocyanatum* [Ger. Ph. (1st ed.)], Russ. Ph., Swiss Ph.], *cyanatum zincicoferrosum* [Neth. Ph.]. An amorphous white powder, Zn<sub>2</sub>Fe(C<sub>5</sub>N<sub>3</sub>)<sub>6</sub> + 3H<sub>2</sub>O. [B.]—**Z. fulminate**. A body, C<sub>2</sub>Zn(NO<sub>2</sub>)<sub>2</sub>.CN = Zn<sub>2</sub>C<sub>2</sub>N<sub>3</sub>O<sub>2</sub>, that detonates violently when struck or when heated to 162° C. [B. 4.]—**Z. gallate**. A white precipitate, C<sub>2</sub>H<sub>3</sub>O<sub>2</sub>.Zn<sub>2</sub> + H<sub>2</sub>O, obtained by boiling z. acetate with gallic acid. [B. 46 (a. 14).]—**Z. hydrocarbonate**. See *Precipitated z. carbonate*.—**Z. iodide**. Lat., *zinci iodidum* [U. S. Ph.]. Ger., *Jodzink*, *Zinkjodür*. The compound ZnI<sub>2</sub>, forming acicular or octahedral crystals. [B. 3.]—**Z. lactate**. Lat., *lactas zinci* [Belg. Ph.] (see *zincicus* [Netherl. Ph., Swed. Ph.]), *zincum lacticum* [Ger. Ph. (1st ed.)], Russ. Ph.], *lactate de z.* [Fr. Cod.]. The compound Zn(C<sub>2</sub>H<sub>3</sub>O<sub>2</sub>)<sub>2</sub> + 3H<sub>2</sub>O, forming small white crystals. [B. 3, 95 (a. 38); B. 4.]—**Z'methyl**. Fr., *Z'méthyle*. Ger., *Zinkmethyl*. 1. A univalent radicle, Zn(CH<sub>3</sub>)<sup>+</sup>. 2. Z'dimethyl, Zn(CH<sub>3</sub>)<sub>2</sub>; a colorless, spontaneously inflammable liquid of very powerful and disagreeable odor the vapor of which produces a sense of constriction of the throat and dyspnoea and is said to be poisonous. [B. 3.]—**Z. nitrate**. The compound Zn(NO<sub>3</sub>)<sub>2</sub> + 6H<sub>2</sub>O, forming deliquescent prismatic crystals. [B. 3.]—**Z. nitride**. A green powder, Zn<sub>3</sub>N<sub>2</sub>. [B. 3.]—**Z. nitroacetoneitrile**. See Z. fulminate.—**Z. ointment**. See *Unguentum zinci oxidis*.—**Z. oleate**. Lat., *zincum oleicum*. 1. A preparation made by dissolving 1 part of z. oxide in 8 parts of oleic acid, forming a soft, talc-like white powder. It is used in hyperidrosis and various skin diseases. 2. Z. oleate (1st def.) diluted with any ointment base to form a soft, tallowy solid. [Proc. of the Am. Pharm. Assoc., xxvii, p. 480, xxxiv, p. 570 (a. 14).] Cf. *Oleatum zinci*.—**Z. orthophosphate**. Lat., *zinci phosphas*. Normal z. orthophosphate, Zn<sub>3</sub>(PO<sub>4</sub>)<sub>2</sub> + 2H<sub>2</sub>O, usually termed z. phosphate, is a white powder, used as a nerve. [B. 5.]—**Z. oxide**. Lat., *oxidum* (see *oxydum* [Dan. Ph., Netherl. Ph., Norw. Ph.]), *zincicum* [Finn. Ph., Swed. Ph.], *oxydum zinci*, *oxydum zinci precipitatum* [Belg. Ph.], *zinci oxidum* [U. S. Ph., Br. Ph.], *zincum oxydatum* [Ger. Ph., Austr. Ph., Hung. Ph., Gr. Ph., Russ. Ph., Swiss Ph.], Fr., *oxyde de z.* par voie humide et par voie sèche [Fr. Cod.]. Sp., *óxido zincico* [Sp. Ph.]. A soft, white or yellowish-white, amorphous powder, ZnO, devoid of taste and odor, and insoluble in water and in alcohol. It may be prepared either by calcining the precipitated z. carbonate at a low red heat, forming then the *zinci oxidum* of the U. S. Ph. and Br. Ph., the *zincum oxydatum* of the Ger. Ph., and the *oxyde de z. par voie humide* of the Fr. Cod., or by direct oxidation of the metal (by calcining), when it is called *flowers of z.*, *lana philosophica*, *pompholix*, *nix alba*, or *nihilum album*, and is the *oxyde de z. par voie sèche* of the Fr. Cod. As it occurs in its purest form in commerce, it is the commercial z. oxide (Lat., *oxidum zincicum crudum* [Finn. Ph.] [see *venale* [Swed. Ph.]), *oxydum zinci* [Belg. Ph.], *oxydum zincicum venale* [Dan. Ph.], or *zincum oxydatum crudum* [Ger. Ph.]). A commercial z. oxide produced in the smelting of lead ores is called *cadmia* or *tutty*. [B.; B. 95 (a. 38).]—**Z. oxychloride**. A crystalline substance, ZnCl<sub>2</sub>.3ZnO + 4H<sub>2</sub>O, obtained by the action of a strong solution of z. chloride on z. oxide. [B. 16.]—**Z. pentasulphide**. A white amorphous substance, ZnS<sub>5</sub>. [B. 3.]—**Z. permanganate**. The compound ZnMn<sub>2</sub>O<sub>4</sub>, occurring as dark-red tabular crystals. [B. 270 (a. 38).]—**Z. phosphate**. See Z. orthophosphate.—**Z. phosphide**. Lat., *zinci phosphidum* [U. S. Ph.]. Fr., *phosphure de z.* [Fr. Cod.]. Ger., *Phosphorzink*. The compound Zn<sub>2</sub>P<sub>2</sub>, forming either crystalline fragments or a dark-grayish powder, having a faint taste of phosphorus. [B.]—**Z. pur** [Fr. Cod.] (Fr.). Lat., *zincum* [U. S. Ph., Br. Ph., Gr. Ph., Russ. Ph.] (*purissimum*). Sp., *z.* [Sp. Ph.]. Metallic z. freed from impurities and suitable for pharmaceutical purposes. [B.]—**Z. salicylate**. Lat., *zincum salicylicum* [Russ. Ph.]. A dibasic substance, Zn(C<sub>2</sub>H<sub>3</sub>O<sub>2</sub>)<sub>2</sub> + 2H<sub>2</sub>O, forming colorless crystals of metallic taste. [B. 10; B. 95 (a. 38).]—**Z. sarcosylate**. Ger., *Leischmilchsäures Zink*. A crystalline body, Zn(C<sub>2</sub>H<sub>3</sub>O<sub>2</sub>)<sub>2</sub> + 2H<sub>2</sub>O, isomeric with z. lactate and occurring as lavoatory acicular crystals. [B. 3 (a. 38); B. 4.]—**Z. spar**. Ger., *Zinkspath*. See CALAMINE (1st def.).—**Z. sulphate**. Lat., *sulfas* (see *sulphas* [Dan. Ph., Netherl. Ph., Norw. Ph., Swed. Ph.]), *zincicus* [Finn. Ph.], *sulphas zinci* [Belg. Ph.], *zinci sulphas* [U. S. Ph., Br. Ph.], *zincum sulphuricum* [Ger. Ph., Austr. Ph., Hung. Ph., Russ. Ph., Swiss Ph.] (see *sulphuricum purum* [Gr. Ph.]), Fr., *sulfate de z. officinal* [Fr. Cod.]. Sp., *sulfato zincico* [Sp. Ph.]. White vitriol (or white copper), ZnSO<sub>4</sub> + 7H<sub>2</sub>O, forming small colorless prismatic or acicular crystals having a saline metallic taste and acid reaction, soluble in about half its weight of water. It is used as an emetic and typically as an astringent. [B.]—**Z. sulphide**. A substance, ZnS, occurring in nature as the crystalline z. blende

and wurtzite, and also obtained artificially in the amorphous state. [B, 3.] See also *Z. pentasulphide*.—*Z. sulphocarbonate*. Lat., *zinci sulphocarbonas* [Br. Ph.], *zincum sulfocarbonicum* [Ger. Ph., Russ. Ph., Swiss Ph.], Fr., *sulfopentate de z. Ger.*, *Zinksulfophenylat*. *Z. paraphenolsulphonate*,  $\text{Zn}(\text{C}_6\text{H}_4\text{SO}_3)_2 + 8\text{H}_2\text{O}$ , forming efflorescent, rhombic prismatic crystals. It is odorless and has a metallic taste and an acid reaction. [Giglit, "Ann. d. chim. appl. alla farm. ed. alla med." June, 1884, p. 321 (B).]—*Z. thioarsenite*. A lemon-yellow substance,  $\text{Zn}_2\text{As}_2\text{S}_5$ . [B, 2.]—*Z. valerianate*. Lat., *valeras zinci* [Belg. Ph.], *valerianas zincicus* [Finn. Ph., Neth. Ph., Norw. Ph., Swed. Ph.], *zinci valerianas* [U. S. Ph., Br. Ph.], *zincum valerianicum* [Ger. Ph. (1st ed.)], Gr. Ph., Hung. Ph. (2d ed.), Russ. Ph., Swiss Ph.], Fr., *valerianate de z.* [Fr. Cod.]. Sp., *valerianato zincico* [Sp. Ph.]. The compound  $\text{Zn}(\text{C}_5\text{H}_7\text{O}_2)_2$ , forming white scaly crystals which have a faint odor of valerianic acid and a sweetish, metallic taste. [B, 5, 95.]—*Z. white*. Ger., *Zinkweiss*. Commercial *z. oxide*.—*Z. yellow*. Fr., *jaune de z.* Ger., *Zinkgelb*. Basic *z. chromate*. [B.]

**ZINCIBER** (Lat.), n. n.  $\text{Zi}^2\text{ns}(\text{zi}^2\text{n}^2\text{k})/\text{i}^2\text{b-u}^2\text{r}(\text{e}^2\text{r})$ . Gen., -*ib'eri*. See ZINGIBER.

**ZINCIC**, adj.  $\text{Zi}^2\text{ns}^2/\text{i}^2\text{k}$ . Lat., *zincicus*. Pertaining to or containing zinc. [B.]

**ZINCONITE**, n.  $\text{Zi}^2\text{nk}^0/\text{o}^2\text{n-it}$ . See CALAMINE (1st def.).

**ZINCUM** (Lat.), n. n.  $\text{Zi}^2\text{n}^2\text{k}/\text{u}^2\text{m}(\text{u}^2\text{m})$ . See ZINC; of the U. S., Br., Gr., and Russ. Ph's, see ZINC *pur.*—*Acetas zinci*. See ZINC acetate.—*Ether zinci*. Fr., *ether zincé*. A preparation made by treating 15 parts of zinc chloride with 61 of ether and 30 of absolute alcohol for some days and decanting. [B, 119 (a, 38).]—*Aqua ophthalmica adstringens e vitriolo zinci*. See *Collyrium adstringens zinci*.—*Aqua sulphatis zinci aluminosa*. See *Liquor ALUMINIS compositus*.—*Aqua zinci cum camphora*. Fr., *eau zincée camphrée*. A solution of 18 parts of zinc sulphate and 8 of camphor in 786 of boiling water; or of 28 parts of zinc sulphate and 8 of camphor in 786 of water. [L, 49, 87 (a, 14).]—*Butyrum zinci*. Zinc chloride. [B, 270.]—*Calx zinci*. Zinc oxide. [B, 270.]—*Carbonas zinci impurus*. See CALAMINE (1st def.).—*Ceratum carbonatis zinci impuri*. See *Ceratum CALAMINAE*.—*Ceratum zinci*. See *Unguentum zinci oxidi*.—*Ceratum zinci carbonatis* [U. S. Ph., 1870]. A mixture of 1 part of precipitated zinc carbonate with 5 parts of ointment of lard. [B.]—*Collyrium adstringens e zinco sulphurico*. See *Aqua ophthalmica aluminosa* and *Collyrium adstringens zinci*.—*Collyrium adstringens zinci*. A solution of zinc sulphate in from 95 to 320 times as much water. Sometimes rose-water or infusion of elder was used, and, according to one old formula, the yolk of a hard-boiled egg was removed, zinc sulphate put in its place, and the resulting liquid mixed with 166 grammes each of rose-water and water of plantain. [B, 119 (a, 38).]—*Collyrium zinci*. See *Collyre au sulfate de zinc*.

—*Flores zinci*. See *Flowers of ZINC*.—*Injectio sulphatis zinci compositus*. See *Liquor ALUMINIS compositus*.—*Injectio zinci chlorati*. Sp., *inyección de cloruro de zinc* [Sp. Ph.]. A solution of zinc chloride in twice as much water to which from 1 to 3 per cent. of hydrochloric acid has been added; used for embalming. It should have a sp. gr. of 1.33. [B, 95 (a, 38).]—*Lactas zinci*. Zinc lactate. [B, 95 (a, 38).]—*Liquor sulphatis zinci aluminosa*. See *Liquor ALUMINIS compositus*.—*Liquor zinci chlorati* (seu *chloridi*) [U. S. Ph., Br. Ph.]. Solution of zinc chloride; made by dissolving metallic zinc in hydrochloric acid. It contains, however, impurities in the form of iron salts. These are removed by conversion into iron chloride (by means of nitric acid [U. S. Ph.] or chlorine water [Br. Ph.]) and subsequent precipitation by the gradual addition of zinc carbonate. In the U. S. process, 240 parts of zinc are employed and the solution is brought to measure, 1,000 parts; for the Br. prep. 1 lb. av. of zinc is used to form 2 imperial pints of the solution. The sp. gr. of the former is 1.555, of the latter 1.593; and each contains about 50 per cent. of zinc chloride. The official solution forms a colorless liquid having a sweetish, styptic taste and an acid reaction. [B.]—*Liquor zinci et aluminæ sulfuriæ basicæ*. See *Solutio de sulfatè d'ALUMINE et de zinc*.—*Liquor zinci sulfurici* [Sp. Ph.]. Sp., *solución de sulfato zincico* [Sp. Ph.]. A solution of 30 centigrammes of zinc sulphate in 180 grammes of distilled water. [B, 95.]—*Oleatum zinci* [Br. Ph.]. A preparation made by triturating 1 part of zinc oxide (obtained in the wet way) with 9 parts of oleic acid, allowing to stand for two hours, and dissolving over the water bath. [B, 95 (a, 38).] Cf. *Zinc oleate*.—*Oxydum zinci* [Belg. Ph.]. A term applied apparently to the commercial zinc oxide of the best grade and also to the more carefully prepared zinc oxide of the ph's. [B, 95 (a, 38).]—*Oxydum zinci præcipitatum*. See *Zinc oxide*.—*Pasta zinci chlorati* [Gr. Ph., Russ. Ph.]. Fr., *caustique au chlorure de zinc* [Fr. Cod.]. Sp., *caustico de cloruro de zinc* [Sp. Ph.]. A paste made of 32 parts of zinc chloride dissolved in 4 of water and mixed with 8 of zinc oxide and 24 of dried wheat flour [Fr. Cod.]; of equal parts of zinc chloride and wheat flour with a little water [Sp. Ph., Russ. Ph.]; or of zinc oxide with a strong solution of zinc chloride [Gr. Ph.]. The Fr. Cod. directs that the paste be cut into thin pieces and thoroughly dried; the Gr. Ph. directs that it be colored at pleasure when used to fill teeth. The Belg. Ph. recognizes four grades of paste, containing respectively twice, three times, four times, and five times as much wheat flour as zinc chloride. [B, 95 (a, 38).]—*Solutio zinci aluminosa*. See *Liquor ALUMINIS compositus*.—*Sulphas zinci*. See *Zinc sulphate*.—*Unguentum oxydi zinci compositum* [Belg. Ph.]. An ointment of 60 parts of zinc oxide, 125 of white lead, 80 of olive oil, 275 each of yellow wax and beef marrow, and 195 of mutton suet. [B, 95 (a, 38).]—*Unguentum refrigerans zinci*. An ointment of 1 part of anhydrous lanolin, 2 of benzoated zinc ointment, and 3 of rose-water. [Am. Jour. of Pharm., July, 1890, p. 346 (a, 50).]—*Unguentum zinci*. See *Unguentum zinci oxidi*.—*Unguentum zinci oleati* [Br. Ph.]. A mixture of equal parts of zinc oleate and petroleum. [B, 95 (a, 38).]—*Unguentum zinci oxidi* [U. S. Ph.]. Fr., *pommade d'oxyde de zinc* [Fr. Cod.], *onguent gris (ou ophthalmique, ou de pompho-*

*lyx*). Sp., *pomada de óxido zincico* [Sp. Ph.]. Ointment of oxide of zinc, zinc ointment; made by rubbing up 1 part of (crude [Ger. Ph., Finn. Ph., Dan. Ph.]) zinc oxide with 9 parts of (benzoated [Fr. Cod.]) lard (simple cerate [Belg. Ph.]), simple ointment [Hung. Ph.], with 15 [Sp. Ph.], 8 [Netherl. Ph.] of lard, 4 [U. S. Ph.], 5 [Br. Ph.] of benzoated lard, or with 8 of washed lard and 1 part of yellow wax [Russ. Ph.]. The other ph's varied the proportion of lard slightly or used 7 parts of verdigris with 22 each of zinc oxide and a solution of camphor in alcohol and 60 each of lard and mutton suet, or 1 part of zinc oxide with 2 parts of olive-oil. [B; B, 95, 119 (a, 38).]—*Valeras zinci*. See *Zinc valerianate*.—*Zinci acetas*. See *Zinc acetate*.—*Zinci bromidum*. See *Zinc bromide*.—*Zinci carbonas (præcipitatus)*. See *Precipitated zinc carbonate*.—*Zinci chloridum*. See *Zinc chloride*.—*Zinci iodidum*. See *Zinc iodide*.—*Zinci oxidum*. See *Zinc oxide*.—*Zinci phosphidum*. See *Zinc phosphide*.—*Zinci præparata*. Preparations of zinc; zinc salts. [B, 95.]—*Zinci salia* [Gr. Ph.]. Zinc salts, regarded as a class of poisons. [B, 95.]—*Zinci sulphas*. See *Zinc sulphate*.—*Zinci valerianas*. See *Zinc valerianate*.—*Z. acetium* [Ger. Ph., Austr. Ph., Hung. Ph. (2d ed.)], Russ. Ph., Swiss Ph.]. See *Zinc acetate*.—*Z. carbonicum* [Swiss Ph.]. Precipitated zinc carbonate. [B, 95 (a, 38).]—*Z. chloratum*. *Z. chloratum*. See *Zinc chloride*.—*Z. ferrocyanatum*. See *Zinc ferrocyanide*.—*Z. granulatium* [Br. Ph.]. Granulated zinc. [a, 38.]—*Z. granulatium depuratum* [Hung. Ph., 1st ed.]. Granulated zinc purified. [B; B, 95 (a, 38).]—*Z. lactium*. See *Zinc lactate*.—*Z. oleinicum*. Zinc oleate. [a, 38.]—*Z. oxydatum*. See *Zinc oxide*.—*Z. oxydatum crudum*. See under *Zinc oxide*.—*Z. purissimum*. See *Zinc pur.*—*Z. salicylicum*. See *Zinc salicylate*.—*Z. sulfocarbonicum*. *Z. sulfophenylicum*. See *Zinc sulphocarbonate*.—*Z. sulfuricum*. See *Zinc sulphate*.—*Z. sulfuricum crudum* [Gr. Ph.]. Fr., *sulfate de zinc du commerce* [Fr. Cod.]. Sp., *vitriolo blanco (ó de zinc)* [Sp. Ph.]. Unpurified commercial zinc sulphate. [B, 95 (a, 38).]—*Z. sulphuricum purum*. See *Zinc sulphate*.—*Z. valerianicum*. See *Zinc valerianate*.

**ZINGAR**, n. Of the alchemists, verdigris. [B, 52.]

**ZINGIBER** (Lat.), n. n.  $\text{Zi}^2\text{n}^2(\text{zi}^2\text{n}^2\text{g})/\text{i}^2\text{b-u}^2\text{r}(\text{e}^2\text{r})$ . Gen., -*ib'eri*. Gr., *gingyberis*. Sp., *gingembre (gris et blanc, rhizome)* [Fr. Cod.], (2d def.). Ger., *Ingwer* (2d def.). Sp., *jengibre (rhizoma)* [Sp. Ph.], (2d def.). 1. A genus of plants forming, with *Costus*, *Eleteria*, *Alpinia*, *Amomum*, etc., an order (the *Gingiberaceæ*) of monocotyledons or a tribe (the *Gingibereæ*) of the *Scitamineæ*. 2. Of the U. S. Ph. and Br. Ph. (*rhizoma zingiberis*) [Ger. Ph., Belg. Ph., Dan. Ph., Finn. Ph., Norw. Ph., Russ. Ph., Swed. Ph., Swiss Ph.], *z. [rhizoma]* [Austr. Ph., Hung. Ph., 2d ed., Netherl. Ph.], *zingiberis radix* [Gr. Ph.], ginger, the rhizoma of *Z. officinale*. [a, 35.]—*Etheroleum zingiberis*. See *Oil of ginger*.—*Cerevisia cum zingibere* (seu *zingiberis*). See *GINGER-beer*.—*Essentia zingiberis*. See *Tinctura zingiberis*.—*Extractum zingiberis æthereum*. See *Oleoresina zingiberis*.—*Extractum zingiberis fluidum* [U. S. Ph.]. A preparation made by exhausting with alcohol 100 grammes of ginger in No. 40 powder, reserving 90 c. c. of percolate, evaporating the residue to a soft extract, mixing the two, and bringing up to 100 c. c. [B, 95 (a, 38).]—*Infusum zingiberis* [U. S. Ph., 1870]. A preparation made by macerating 1 Troy oz. of ginger in a pint of boiling water for two hours and straining. [B, 5 (a, 38).]—*Oleoresina zingiberis* [U. S. Ph.]. A preparation made by exhausting with ether 100 grammes of ginger in No. 60 powder (or carrying the process far enough to obtain 150 parts of percolate), and evaporating the ether off. [B, 95 (a, 38).]—*Oleum zingiberis æthereum*. See *Oil of ginger*.—*Radix zingiberis*. See *Z. (2d def.)*.—*Radix zingiberis (albi) e Jamaica*. See *White ginger*.—*Radix zingiberis silvestris*. 1. Long zedoary. 2. The tuberous root-stock of *Z. cassumunar*. 3. The root-stock of *Z. zerumbet* [Roscoe]. [a, 35.]—*Rhizoma zingiberis*. See *Z. (2d def.)*.—*Rhizoma zingiberis pulveratum*. Ginger dried at 40° C., powdered in an iron mortar, and sifted through a No. 120 silk sieve [Fr. Cod.], or powdered and sifted through a 1,600-mesh sieve [Russ. Ph.], or through a 1,000-mesh sieve till the residue forms a fibrous mass [Swed. Ph.]. [B, 95 (a, 38).]—*Syrupus zingiberis*. A preparation made by triturating 2 parts of fluid extract of ginger with 25 of powdered sugar, maintaining at a heat of not more than 60° C. till the alcohol is evaporated, dissolving the residue in 35 parts of water, filtering, washing till 60 parts are obtained, adding 40 of sugar, and straining [U. S. Ph.]; or by mixing 6 fluid drachms of stronger tincture of ginger with 19 fluid oz. of syrup [Br. Ph.]; or by macerating 1 part of ginger in 7 parts of water and 1 part of 90-per-cent. alcohol [Russ. Ph.] (in enough boiling water [Swed. Ph.]), and dissolving 120 [Russ. Ph.] (126 [Swed. Ph.]) of sugar in 70 of filtered liquid. [B, 95 (a, 38).]—*Tabellæ zingiberis*. See *Trochisci zingiberis*.—*Tinctura zingiberis*. Fr., *teinture de gingembre* [Fr. Cod.]. A tincture made of 1 part of ginger in No. 40 powder with alcohol enough to make 5 parts by percolation [U. S. Ph.] (with 5 parts of dilute alcohol [Ger. Ph., Hung. Ph., Swiss Ph.], 70-per-cent. alcohol [Russ. Ph.], or 80-per-cent. alcohol [Fr. Cod., Belg. Ph.]), or of 24 oz. of ginger with enough alcohol to make 20 fl. oz. by percolation [Br. Ph.]. [B, 95, 119 (a, 38).]—*Tinctura zingiberis anglica* [Swiss Ph.], (seu *fortior* [Br. Ph.]). A tincture made of 10 oz. of ginger with alcohol enough to make 20 fl. oz. by percolation [Br. Ph.]; or of 10 parts of ginger with alcohol enough to make 20 parts [Swiss Ph.]. [B, 95 (a, 38).]—*Trochisci zingiberis* [U. S. Ph.]. Syn.: *tabellæ zingiberis* [Belg. Ph.]. Lozenges made of 200 parts of tincture of ginger with 2,000 of sugar, 50 of tragacanth, and enough syrup of ginger [U. S. Ph.]; or with 12 of tragacanth, 1,788 of sugar, and enough water [Belg. Ph.]. [B, 95 (a, 38).]—*Z. album*. 1. Formerly the corm of *Arum maculatum*. [a, 35.] 2. See *White ginger*.—*Z. amarum*. Ger., *bitterer Ingwer*. A species found in Java and the Moluccas. The spicy, bitterish rhizome is used like that of *Z. zerumbet*. The young stems are used as a spice, and the young leaves are eaten. [a, 35.]—*Z. cassumunar*. *Z. cassumunar*. Bengal root; a native of the East Indies, Java, and the Moluccas. The tubers of the root-stock, *radix cassumunar* (seu

*casumuniar*, seu *casmonar*, seu *risagon*, seu *bengale* [*inodorum*], seu *zingiberis silvestris*, seu *zedoariae luteae*, have a spicy, bitterish taste and a strong camphoraceous smell. They have properties somewhat like those of ginger, but are not now known in commerce. The plant is used by the natives in diarrhoea and colic. [a. 35.]—*Z. citrinum*. The *Curcuma longa*. [a. 35.]—*Z. commune*. See *Black GINGER*.—*Z. dubium*. Ger., *zweifelhafter Ingwer*. A Guinea plant used as an aromatic. It is not well known, and is doubtfully referred to this genus. [a. 35.]—*Z. flavum*. The *Curcuma longa*. [a. 35.]—*Z. germanicum*. Formerly the corm of *Arum maculatum*. [a. 35.]—*Z. gramineum*. A species found in the islands of the Indian Ocean. The root-stock, which is grayish externally and white internally, is smaller than true ginger and has shorter joints. It has the medicinal properties of ginger, but is not used as a spice, on account of its unpleasant, bitterish taste. [a. 35.]—*Zingiberis radix*. See *Z.* (2d def.).—*Z. luteum*. The *Curcuma longa*. [a. 35.]—*Z. marginatum*. A species found in the East Indies, Java, and the Moluccas. The seeds and root-stock are used as a mild aromatic. [a. 35.]—*Z. mioga*. A Japanese species. The tuberous, spicy root-stock is used as a food and in medicine. [a. 35.]—*Z. nigrum*. See *Black GINGER*.—*Z. officinale*. Fr., *gingembre*, herbe au gingembre. Ger., *gebräuchlicher* (oder *gemeiner*, oder *ichter*, oder *wahrer*) *Ingwer*. A native probably of India, but not known in its wild state; a plant cultivated in the

ZINGIBER OFFICINALE. [A. 327.]

tropics for its fleshy rhizome, which constitutes ginger. Ginger contains starch, a yellow, volatile oil belonging to the terpenes, and a pungent resinous principle; it is used as a stimulant, carminative, rubefacient, etc. [a. 35.]—*Z. purpureum*. See *Z. cassumunar*.—*Z. spurium*. See *Z. zerumbet*.—*Z. vulgare*. See *Black GINGER*.—*Z. zanthorrhizon*. See *Z. cassumunar*.—*Z. zerumbet*. Fr., *amome sauvage*, *balister*. Broad-leaved ginger of Ceylon and the East Indies. The root-stock, *radix zerumbet* (seu *zerumbeth*, seu *zerumbet*, seu *zingiberis silvestris*, seu *bengale*, seu *bringalle inodorum*), is aromatic and bitter, and is used in fomentations and cataplasms. It is not now used internally. [a. 35.]

**ZINGIBERIN**, n.  $Zi^{2n}j^{2b}e^{2r}i^{2n}$ . Ger., *Z*. See *Oleo-resina zingiberis*.

**ZINK** (Ger.), n.  $Tsi^{2n}k$ . See *ZINC*.—**Antimonsaures Z.** Zinc antimonate.—**Arsensaures Z.** Zinc arsenate.—**Baldriansaures Z.** See *Zinc valerianate*.—**Bromz.** See *Zinc bromide*.—**Carbolschwefelsaures Z'oxyd.** See *Zinc sulphocarbonate*.—**Cyanz.** See *Zinc cyanide*.—**Essigsaures Z.** See *Zinc acetate*.—**Fleischmilchsäures Z.** See *Zinc sarcosylactate*.—**Jodz.** See *Zinc iodide*.—**Kohlensaures Z.** See *Zinc carbonate*.—**Phenylschwefelsaures Z.** See *Zinc sulphocarbonate*.—**Salpetersaures Z.** (oder *Z'oxyd*). **ZIRBELNUSS** (Ger.), n.  $Tserb'e^{2l}nus$ . The fruit of *Pinus cembra*. [a. 35.]—**Z'baum.** *Z'fichte.* See *PINUS cembra*.

**ZIRBUS** (Lat.), n. m.  $Zu^{2r}b(z^{2r}b)/u^{2s}(u^{2s})$ . See *OMENTUM*.

**ZIRCON**, n.  $Zu^{2r}k'o^{2n}$ . Fr., *Z*. Ger., *Zirkon*. Native zirconium silicate. [B.]

**ZIRCONATE**, n.  $Zu^{2r}k'o^{2n}at$ . A compound of zirconium oxide with the oxide of another element or radicle. [B. 3.]

**ZIRCONIA**, **ZIRCONIC ACID**, n's.  $Zu^{2r}k-on/i^{2a}$ .  $o^{2n}i^{2k}$ . Fr., *zircone*, *acide zirconique*. See *ZIRCONIUM oxide*.

**ZIRCONIUM** (Lat.), n. n.  $Zu^{2r}k(z^{2r}k)-on/i^{2a}u^{2m}(u^{2m})$ . Fr., *z*. Ger., *Zirkon*, *Zirkonium*. A metallic element discovered by Klaproth in 1789. It occurs in the mineral zircon, and other rare mineral compounds. It is obtained either in the form of an amorphous iron-gray powder, which acquires a metallic lustre on polishing, or as brittle, scale-like crystals. In composition it acts usually as a tetrad, forming compounds resembling in chemical structure those of tin. Symbol, *Zr*; atomic weight, 90. [B. 3.]—**Z. oxide.** The compound  $ZrO_2$ , obtainable both as an amorphous powder and as prismatic crystals. [B. 3.]

**ZIRCONOFLUORIDE**, n.  $Zu^{2r}k'o^{2n}o-flu^{2z}o^{2r}i^{2d}(id)$ . A double fluoride of zirconium and another metal. [B. 3.]

**ZIRKEL** (Ger.), n.  $Tserk'se^{2l}$ . See *CIRCLE* and *CIRCULUS*.—**Röhrenz.** The circulatory system. [K. 13.]

**ZIRKON** (Ger.), n.  $Tserk-on'$ . See *ZIRCON*.—**Z'erde.** See *ZIRCONIUM oxide*.

**ZIRKONIUM** (Ger.), n.  $Tserk-on'e-um$ . See *ZIRCONIUM*.

**ZIRMET** (Ger.), n.  $Tserm'e^{2t}$ . The genus *Tordylium*. [a. 35.]

**ZISCHELN** (Ger.), n.  $Tsi^{2sh}e^{2ln}$ . See *BLESITIS*.

**ZISCHEND** (Ger.), adj.  $Tsi^{2sh}e^{2nd}$ . See *SIBILANT*.

**ZISTENSAFT** (Ger.), n.  $Tsi^{2st}e^{2n}za^{2ft}$ . *Succus hypocistidis*. [a. 35.] See under *CYTINUS hypocistis*.

**ZITTER** (Ger.), n.  $Tsi^{2t}e^{2r}$ . See *TETTER*.

**ZITTERGRAS** (Ger.), n.  $Tsi^{2t}e^{2r}gra^{2s}$ . The genus *Briza*.

**ZITTERLÄHMUNG** (Ger.), n.  $Tsi^{2t}e^{2r}lam-un^{2}$ . See *PARALYSIS agitans*.

**ZITTERMAL** (Ger.), n.  $Tsi^{2t}e^{2r}ma^{2l}$ . *Tetter*; *herpes*; *serpigo*. [G.]

**ZITTERN** (Ger.), n.  $Tsi^{2t}e^{2rn}$ . See *SHIVER* and *TREMOR*.—**Bleiz.** See *MOLYBDOTROMOS*.—**Gliederz.** *Tremor of the limbs*. [a. 34.]—**Horizontales Augenz.** See *NYSTAGMUS oscillatorius*.—**Hydatidenz.** See *HYDATID THRILL*.—**Intentionz.** See *VOLITIONAL TREMOR*.—**Säufierz.** See *DELIRIUM tremens*.

**ZITTERSTAAR** (Ger.), n.  $Tsi^{2t}e^{2r}sta^{2r}$ . See *Tremulous CATARACT*.

**ZITTWER** (Ger.), n.  $Tsi^{2t}e^{2r}$ . See *ZEDOARY*.—**Z'öl.** See *OIL of WORMSEED*.—**Z'samen.** See *SANTONICA*.—**Z'wurzel.** See *ZEDOARY*.

**ZITZE** (Ger.), n.  $Tzi^{2ts}e^{2}$ . 1. See *NIPPLE*. 2. The mastoid process of the temporal bone.—**Z'nausschnitt.** See *DIAGNOSTIC FORNA*.—**Z'necke.** See *ANGULUS mastoideus*.—**Z'nförmig.** Mammary form, mastoid.

**ZIZANIA** (Lat.), n. f.  $Zi^{2n}(zez)-an(a^{2n})/i^{2a}$ . From ζιζάνιον, darnel. Fr., *zizane*, *zizanie*. Ger., *Huferreis*. A genus of aquatic grasses. [a. 35.]—**Z. aquatic.** Fr., *zizane* (ou *zizanie*) *aquatique*. Indian (or Canadian) rice, water-oat of North America. The grain is said to be more nutritious than ordinary rice. [a. 35.]

**ZIZYPHIC ACID**, n.  $Zi^{2z}i^{2f}i^{2ek}$ . Fr., *acide zizyphique*. Of Latour, a crystallizable acid contained in the aqueous extract of the wood of *Zizyphus sativa*. [B. 92, 93 (a. 14).]

**ZIZYPHUS** (Lat.), n. f.  $Zi^{2z}(zez)/i^{2f}(u^{2f})-u^{2s}(u^{2s})$ . Fr., *jujubier*. Ger., *Judendorn*. A genus of shrubs or trees typical of a tribe (*Zizyphæe*) of the *Rhamnea*; in the pl., *zizyphi*, the fruits of *Z. vulgaris*. [a. 35.]—**Baccae** (seu *Fructus*) *zizyphi*. See *JUJUBES*.—**Z. Baclei.** A Senegal species. The astringent root is used for gonorrhoea and other discharges. The fruits are considered poisonous. [a. 35.]—**Z. exserta.** A species found in the Philippines; used in syphilis and skin diseases. [a. 35.]—**Z. glabrata.** An Indian species. The leaves are used as an alterative, and the bark yields a sort of kino. [a. 35.]—**Z. joazeiro.** A Brazilian tree with a bitter, astringent, emetic, and febrifuge bark. [a. 35.]—**Z. jujuba.** *Z. laucifera*. Fr., *jujubier cotonneux*, *masson*. Ger., *stumpfblättriger Judendorn*, *ächter Jujubenbaum*. Jujube-tree of China, Cochinchina, the East Indies, etc. The fruits are used like those of *Z. vulgaris*, but are not so sweet. The leaves are used in gonorrhoea. The bitter, astringent bark, which yields a variety of kino, is used in aphthae, diarrhoea, etc., and as a tonic. The juice of the root-bark is used as a purgative and in gout and rheumatism. Lac is obtained from this tree. [a. 35.]—**Z. lotus.** Fr., *lotier des lotophages*. Ger., *Lotobaum*. A species found along the African shore of the Mediterranean, the *lotos* of Theophrastus. The fruits (see under *JUJUBES*) are used medicinally, and are supposed to have

been the fruits eaten by the lotophagi. [a. 35.]—*Z. mitis*, *Z. mucronata*. A Senegambian species with edible fruits. [a. 35.]—*Z. napeca*. Fr., *jububier napeca*. Ger., *glatter Judendorn*. An East Indian species. The seeds produce mild vertigo and diarrhoea. The root is used in flatulent colic and as a vulnerary, the bark of the branches in fevers and various painful affections, and the leaves for washing dead bodies. [a. 35.]—*Z. œnoplia*. Ger., *schieflättriger Judendorn*. A species found in Ceylon, the East Indies, Java, etc. The bark is used as a febrifuge and as a digestive tonic. The seeds have the properties of those of *Z. napeca*. [a. 35.]—*Z. ortacantha*, *Z. orthacantha*. Fr., *jububier sedoum*. An edible-fruited species found in Senegal, perhaps a variety of *Z. jububa*. The leaves are used in gonorrhoea. [a. 35.]—*Z. sinensis*. Ger., *chinesischer Judendorn*. A species probably indigenous to China, cultivated in southern Europe for its fruits, which are used like *jububes*. [a. 35.]—*Z. soporifera*. A shrub of northern China. The seeds, which are used in Chinese medicine, are calumative and hypnotic. [a. 35.]—*Z. sororia*. An East Indian species closely related to *Z. jububa*. The leaves are used as an alternative. [a. 35.]—*Z. spina Christi*. Ger., *Christdorn*, *paldstin'scher Judendorn*. Nubk-tree of Palestine, Christ's-thorn. The unripe fruits, which are astringent, are used in atonic conditions of the stomach and intestines, and the ripe fruits to make a refrigerant drink for use in fevers and inflammatory complaints. [a. 35.]—*Z. vulgaris*. Fr., *jububier cultivé*, *chichourtier*, *eroc de chien*, *épine à cerise*, *gindoulier*. Ger., *gemeiner Judendorn*, *Brustbeerenbaum*, *Jubube*. A native of the Orient, especially of Syria, cultivated in the Mediterranean regions of Europe for its fruits (see *JUBUBE*). [a. 35.]—*Z. xylopyra*, *Z. xylopyrus*. An East Indian and Ceylon species with edible kernels. [a. 35.]

**ZOAMINE** (Fr.), n. Zo-a<sup>3</sup>-men. An animal alkaloid. [Boucheron, "Union méd.," Dec. 12, 1885, p. 979.] See PTOMAINÉ.

**ZOAMYLIN**, n. Zo-a<sup>2</sup>m<sup>1</sup>i<sup>2</sup>i<sup>2</sup>n. See AMYLOID (2d and 4th def's).

**ZOANTHROPY**, n. Zo-a<sup>2</sup>nth<sup>1</sup>rop<sup>1</sup>i<sup>2</sup>. Lat., *zoanthropia* (from ζῶον, an animal, and ἀνθρωπος, a man). Ger., *Thierwahn*. A variety of insanity in which the patient imagines himself changed into some animal. [a. 34.]

**ZOETROPE**, n. Zo-e<sup>2</sup>-trop. From ζωή, life, and τροπή, a turning. A toy, known also as the "wheel of life" and called by Stricker a *stroboscope*, in which a number of pictures, closely alike, but yet varying progressively in one or more particular features, are brought into view in rapid succession by rotating a drum-like wheel in which they are laid, the effect being that the object portrayed seems to perform intrinsic movements.

**ZOIATRIA** (Lat.), **ZOIATRICA** (Lat.), n's f. Zo-i<sup>2</sup>a<sup>2</sup>t<sup>1</sup>(a<sup>2</sup>t<sup>1</sup>)-ri-(re)<sup>2</sup>a<sup>2</sup>. a<sup>2</sup>t<sup>1</sup>(a<sup>2</sup>t<sup>1</sup>)/ri<sup>2</sup>k-a<sup>2</sup>. From ζῶον, an animal, and *iatrika*, or *iatrik*, veterinary, medical treatment. Fr., *zoïatrique*. Ger., *Thierheilkunde*. Veterinary medicine.

**ZOIATRUS** (Lat.), n. m. Zo-i<sup>2</sup>a<sup>2</sup>t<sup>1</sup>(a<sup>2</sup>t<sup>1</sup>)/ru<sup>2</sup>s(ru<sup>2</sup>s). From ζῶον, an animal, and *iatrios*, a physician. Fr., *zoïatre*. Ger., *Thierarzt*. A veterinarian.

**ZOICITE** (Fr.), n. Zo-e-se-ta. See NEURICITY.

**ZOIDIN**, n. Zo/i<sup>2</sup>d-i<sup>2</sup>n. Fr., *zoidine*. See BAREGIN.

**ZOISM**, n. Zo/i<sup>2</sup>zm. Lat., *zoismus* (from ζωή, life). Fr., *zoïsme*. The aggregate of vital functions and processes. [A, 385 (a, 48).]

**ZOMIDIN**, n. Zo/m<sup>1</sup>i<sup>2</sup>d-i<sup>2</sup>n. Fr., *zomidine*. An aromatic brown substance obtained from beef extract. [A, 385 (a, 48).]

**ZOMODMON** (Lat.), n. n. Zom-o<sup>2</sup>d<sup>1</sup>/mo<sup>2</sup>n. A reddish-brown aromatic coloring matter obtained from flesh, bile, and other animal substances. [L, 50 (a, 14).]

**ZOMOS** (Lat.), n. m. Zom/o<sup>2</sup>s. Gr., ζωμός. Hot broth.

**ZONA** (Lat.), n. f. Zon/a<sup>3</sup>. See ZONE and ZOSTER.—**Ophthalmic z.** See ZOSTER *ophthalmicus*.—**Z. arcuata** (of the cochlea). The middle section of the membrana basilaris. [F, 3.]—**Z. casti-tatis** [Stephanus]. See HYMEN (2d def.).—**Z. choriacea**. The thickened margin of the membrana basilaris where it rests on the lamina spiralis ossea. [L, 31.]—**Z. denticulata** (cochlea). 1. The z. choriacea and the z. interna of the basilar membrane. 2. Of Deiters, the upper surface of the z. choriacea. [L.]—**Z. externa**. That portion of the membrana basilaris that is external to the outer rods of Corti. [L.]—**Z. fasciculata**. Of Arnold, the main portion of the cortex of the supranal capsule. It lies beneath the z. glomerulosa, and is composed of elongated and column-like anastomosing groups of cells. [C; J, 30.]—**Z. ganglionaris**. A large ganglion layer in Rosenthal's canal, lying on the periphery of the modiolus, between the fibrous bundles of the latter and the spiral lamina. [F, 3.]—**Z. gangréneux** (Fr.). A form of zoster in which grayish eschars develop about the vesicles, followed by deep ulceration; occurring usually in the aged or in persons of depraved constitution. [G, 51.]—**Z. glomerulosa**. Of Arnold, the layer of the supranal capsule next the fibrous capsule, forming the proper substance of the body of the organ and consisting of oval or rounded masses of cells that are really the ends of cells of the z. fasciculata. [J, 30.]—**Z. granulosa**. 1. See *Z. radiata* (1st def.). 2. Of von Baer, the discus proligerus.—**Z. herpetica**. See HERPES *pericetis*.—**Z. ignea**. See ZOSTER.—**Z. incerta**. Of For- rel, a layer of fine longitudinal nerve-fibres, with a few scattered ganglion-cells, immediately adjoining the reticular formation. [I, 17 (K).]—**Z. interna**, *Z. lævis*. The portion of the membrana basilaris that is internal to the outer rods of Corti. [L, 31.]—**Z. mediana**. See *Z. choriacea*.—**Z. membranacea**. See MEMBRANA *basilaris*.—**Z. mollis**. See LAMINA *spiralis membranacea*.—**Z. nervea**. See *Z. interna* and *Z. choriacea*.—**Z. orbicularis**. A thickening of the capsular ligament of the hip joint corresponding to the margin of the acetabulum. [L.]—**Z. ossea**. See LAMINA *spiralis ossea*.—**Z. pectinata** (of the cochlea). The external, finely-striated section of the lamina spiralis membranacea. [F, 32.]—**Z. pellucida**. Fr., *zone transparente*, *membrane ovulaire* (ou vitelline). Ger., *Dotterhaut*, *Dotterhülle*.

*Eihaut*, *Keimhülle*. Of von Baer, the vitelline membrane, so called on account of its appearing as a broad transparent band lying between the opaque yolk substance within and the granular cells of the discus proligerus which adhere to it externally. According to Pfäfer, however, it is an adventitious layer, external to the true vitelline membrane. It is thought by some to be a product of the membrana granulosa, but others regard it as a product or transformation of the surface of the vitellus. When moderately magnified it appears homogeneous, but under a high power it exhibits a striated appearance as if it were porous. [A, 8; J, 1, 21, 23, 30, 35.]—**Z. perforata of the cochlea**. The inner division of the lamina spiralis membranacea, which is perforated in numerous places for the passage of the fibres of the cochlear nerve. [F, 32.]—**Z. radiata**. 1. The subepithelial coat of the ovarian ovum, made up of a layer of columnar cells, belonging to the discus proligerus. 2. See *Z. pellucida*.—**Z. repens**. See ZOSTER.—**Z. reticularis**. The deepest layer of the cortex of the supranal capsule. Here the columns of cells disappear, only round groups remaining in between the septal connective tissue. [C; J.]—**Z. serpinigosa**. See ZOSTER.—**Z. striata**. See *Z. pellucida*.—**Z. tecta**. See HABENULA *tecta*.—**Z. tendinosa**. See ANNULUS *fibrosus atrioventricularis*.—**Z. traumatica paradoxa**. Fr., *z. traumatique paradoxal*. A name given by Besnier to a case of zoster following traumatism, but appearing upon the side opposite to that upon which the injury was received. ["Ann. de dermat.," "Arch. f. Derm. u. Syph.," xxii, 1890, 4, 5, p. 751 (G).]—**Z. Valsalvæ**. See LAMINA *spiralis membranacea*.—**Z. vasculosa**. Of Waldeyer, the central vascular stroma of the ovary.—**Z. volatica**. See ZOSTER.

**ZONARIA** (Lat.), n. f. Zon-ar(a<sup>2</sup>r)<sup>1</sup>i<sup>2</sup>a<sup>2</sup>. From *zonarius*, belonging to a belt. Ger., *Gürteltang*. A genus of *Algae*. The *Zonariaceæ* of Nägeli are an order of *Algae*, consisting of *Fucae*, etc. The *Zonariæ* of Gray are the *Dictyolideæ*. The *Zonariæ* are a tribe of *Algae*, consisting of *Z.* and another genus. [a. 35.]—**Z. fasciola**, *Z. pavonia*, *Z. squamaria*. Species found in the Mediterranean Sea and warm parts of the Atlantic, sometimes forming a part of helminthochorton. [a. 35.]

**ZONATE**, adj. Zon/at. Lat., *zonatus*. Ger., *gegürtelt*. Zoned, marked with concentric bands or zones. [a. 35.]

**ZONE**, n. Zon. Gr., ζώνη (from ζώννυαι, to gird). Lat., *zona*. Fr., *z.* Ger., *Z.*, *Gürtel*, *Gürtelstreifen*. A belt or girdle, a circular band differing from the surface carrying it. [a. 35.]—**Boundary z.** Fr., *z. limitante*. Ger., *Grenzschicht*. The part of the medulla of the kidney next the cortex. In it the groups of blood-vessels and uniferous tubules alternate. [J, 30, 35.]—**Cervical z. of the uterus** [Barnes]. Fr., *z. cervicale* (ou inférieure). Syn.: *official z.* [Barnes]. See figure under *Z's of the uterus*.—**Ciliary z.** Lat., *ligamentum suspensorium lentis*, *zonula zinnii*. Fr., *ligament suspenseur du cristallin*. Ger., *Zonula der Linse*, *Strahlenbändchen*, *Ciliarlamelle*. A thin, transparent membrane which begins with a serrated margin on the ciliary processes, and extends inward nearly to the equator of the lens, where it is intimately connected with the anterior capsule. It consists of a portion lying above the ciliary processes in folds, and a smooth portion covering the processes and extending to the capsule. Microscopically it consists of slight, sharply defined fibres connected by a delicate intercellular substance. [F.]—**Epileptic z.** A region of the face, stimulation of which gives rise to epileptic convulsions in animals which have sustained a severe lesion of the spinal cord upon the same side. [Landois (K).]—**Epileptogenous z.** A z. comprising certain motor tracts in the cerebral cortex artificial irritation of which gives rise to epileptoid convulsions; of Brown-Séquard, a tract including those portions of the skin of the body that produce epileptoid convulsions on being irritated, as observed in guinea-pigs after section of the spinal cord. ["Neurol. Ctrbl.," iii, 1883, p. 34 (K); a. 34.]—**Fibrous z. of the heart. See ANNULUS *fibrosus atrioventricularis*.—**Fundal z. of the uterus. Fr., *z. du fond*. See figure under *Z's of the uterus*.—**Gefässz.** (Ger.). See VASCULAR AREA.—**Granular boundary z. of dentin. See GRANULAR LAYER *of dentin*.—**Hysterogetic z's**. Hypersensitive areas in various portions of the body pressure on which produces symptoms of hysteria. [a. 34.]—**Intermediate z.** Of Guillard, the active z. of tissue immediately surrounding the central region of parenchyma in the stem of monocotyledonous plants. [a. 35.]—**Internal z. of the lenticular nucleus**. A z. adjacent to the internal capsule, with which it is connected by transverse white fibres. [I, 1 (K).]—**Kelmoz.** (Ger.). See under SPERMATOMERE (1st def.).—**Körnerz.** (Ger.). The stratum granulosum of the cerebellum. [J.]—**Kreuzungsz.** (Ger.). An area comprising certain portions of the cerebral hemispheres in which there is marked decussation of the nerve-fibres. [I, 17 (K).]—**Meridional z. of the uterus [Barnes]. Fr., *z. du méridien* (ou du milieu). See figure under *Z's of the uterus*.—**Neutral z.** In the *Characæ*, a line, produced by the absence of chlorophyll-bodies, situated on the outer non-moving portion of the protoplasm of a cell. [a. 35.]—**Official z.** [Barnes]. See *Cervical z. of the uterus*.—**Papillary z.** See *Boundary z.*—**Placental z.** Fr., *z. placentaire*. That z. of the uterus in which the placenta is attached.—**Posterior radicular z.** See *Cuneate Funiculus*.—**Spinalz.** (Ger.). The z., or tract, of nerve-fibres in the spinal cord. [I, 27 (K).]—**Striated z.** See *Zona pellucida*.—**Thickening z.** Fr., *z. génératrice*. The z. of thin-walled cells (cambium) between the wood and bark, constituting the active formative tissue of a dicotyledonous stem. [a. 35.]—**Transparent z.** See *Lateral disc*.—**Vordere gemischte Seitenstrangz.** (Ger.). The anterior mixed z. or tract in the lateral column of the spinal cord. [I, 27 (K).]—**Wachthumsz.** (Ger.). See under SPERMATOMERE (2d def.).—**Z's blanches** (Fr.). Of Vicq d'Azyr, certain arc-like folds of the membrana chazalifera that extend from the insertion of one chalaza to that of the other. [A, 4.]—**Z. dangereuse** (Fr.). In surgery, a region about the clavicle extending from 14 to 18 centimetres over the neck, the arm, and the chest, operations in which are dangerous because of the risk of opening the veins and admitting********

air into them. [A, 301 (a, 34).]—**Z. des papilles** (Fr.). See STRATUM glomerulosum and cf. *Papillary z.—Z. du méridien* (Fr.). **Z. du milieu** (Fr.). See figure under *Z's of the uterus.—Z. génératrice* (Fr.). See *Thickening z.—Z. inférieure* (Fr.). See figure under *Z's of the uterus.—Z. maniable* [Bert] (Fr.). An atmosphere, charged with a measured quantity of anæsthetic vapor, in which it is perfectly safe to leave a patient for an unlimited period without attention. [Holmes (a, 25).]—**Z. of Haller**. See *Ciliary z.—Z's of the basilar membrane*. See *ZONA externa* and *ZONA interna.—Z's of the lenticular nucleus*. Three laminae consisting of masses of gray matter separated by white bundles (medullary laminae). [I, 23 (K).]—**Z's of the uterus**. Three z's into which R. Barnes divides the inner surface of the gravid uterus, with reference to the implantation of the placenta, designated the *fundal z.*, the *meridional z.*, and the *cervical z.* [A, 40.]—**Z. of Zinn**. See *Ciliary z.—Z. transparent* (Fr.). See *ZONA pellucida*.

THE ZONES OF THE UTERUS (AFTER R. BARNES).

a, The fundal zone; b, the meridional zone; c, the cervical zone; d, the limit of spontaneous placental detachment.

40.]—**Z. of Zinn**. See *Ciliary z.—Z. transparent* (Fr.). See *ZONA pellucida*.

**ZONED**, adj. Zond. Fr. zoné. See ZONATE.

**ZONITE**, n. Zon'it. From zona, a zone. Of Packard, see SOMITE (2d def.).

**ZONOPLACENTAIRES** (Fr.), n. pl. Zo-no-pla-sa'n2-ta'r. See MESALLANTOIDS.

**ZONULA** (Lat.), n. f. Zo'n(zon)'u'l(u'l)-a2. Dim. of zona, a belt. See ZONULE.—**Z. cartilaginea**. See *LAMINA spiralis.—Z. ciliaris*. See *Ciliary zone.—Z. ossea laminae spiralis*. See *LAMINA spiralis ossea.—Z. Zinnii*. See *Ciliary zone*.

**ZONULAR**, adj. Zo'n'u'l-a'r. Fr., zonulaire. Having the form of a zone or zonule.

**ZONULE**, n. Zo'n'u'l. Lat., zonula. A small zone. [a, 48.]—**Z. of Zinn**. See *Ciliary zone*.

**ZOO-AMYLIN**, n. Zo-o-a'm'i'l-i'n. From ζῷον, an animal, and ἄμυλον, starch. See AMYLOID (2d and 4th def's).

**ZOOBIOLOGY**, n. Zo-o-bi-o'l'o'-j-i2. From ζῷον, an animal, βίος, life, and λόγος, understanding. Animal biology. [a, 48.]

**ZOOBLASTE** (Fr.), n. Zo-o-bla'st. See ANIMAL CELL.

**ZOOCAMBIUM** (Lat.), n. n. Zo-o(o2)-ka'mb(ka3mb)'i2-u3m-(u4m). From ζῷον, an animal, and cambium (q. v.). See BLASTEMA (4th def.).

**ZOOCARPUM** (Lat.), n. n. Zo-o(o2)-ka'r'p'u3m(u4m). From ζῷον, an animal, and καρπός, fruit. Fr., zoocarbe. See ZOOSPORE (1st def.).

**ZOOCHEMIA** (Lat.), n. f. Zo-o(o2)-ke3m(ch2am)-i(e)'a3. From ζῷον, an animal, and χημία, chemistry. Fr., zoochimie. Ger., Zoochemie. See BIOCHEMISTRY.

**ZOOCHIRURGIA** (Lat.), n. f. Zo-o(o2)-ki'r(ch2er)-u3r(ur)'ji2-(gi2)-a3. From ζῷον, an animal, χεῖρ, the hand, and ἔργον, work. See VETERINARY SURGERY.

**ZOODERMIES** [Piorry] (Fr.), n. pl. Zo-o-de'r-me. Cutaneous diseases caused by animal parasites. [A, 250 (a, 21).]

**ZOODYNAMIA** (Lat.), n. f. Zo-o(o2)-di3n(du3n)-a2m(a3m)'i2-a3. From ζῷον, an animal, and δύναμις, power. Fr., zoodynamie. Ger., Zoodynamie. Vital force as developed in animals. [L, 50 (a, 48).]

**ZOOGLACTINA** (Lat.), n. f. Zo-o(o2)-ga'l(ga2l)-a2kt(a'kt)-in(en)'a3. From ζῷον, an animal, and γάλα, milk. See PALMELLA.—**Z. imetropia**. See *BACILLUS prodigiosus*.

**ZOOGAMETE**, n. Zo-o-ga'm'et. See PLANO-GAMETE.

**ZOOGENE**, n. Zo'o-jen. Lat., zoogenum. Fr., zoogène. See BAREGIN.

**ZOOGENY**, n. Zo-o-j'i2'o2n-i2. Lat., zoogenia, zoogenesis (from ζῷον, an animal, and γεννᾶν, to engender). Fr., zoogénie. Ger., Thierzeugung. Animal reproduction. [L, 50 (a, 48).]

**ZOOGLÆA** (Lat.), n. f. Zo-o(o2)-gle'(glo2'e2)-a3. From ζῷον, an animal, and γλοιός, a glutinous substance. Fr., zooglée. Ger., Galletstock (1st def.). 1. A mass or colony of schizomycetous Fungi enveloped in a gelatinous matrix secreted by them in some stage (the z. stage) of development during which the cells increase rapidly by fission. 2. The genus *Palmella*. [a, 35.]

**ZOOGONIDIUM** (Lat.), n. n. Zo-o(o2)-go3n-i2d'i2-u3m(u4m). From ζῷον, an animal, and gonidium (q. v.). A motile gonidium (conidium). [a, 35.]

**ZOOGENOUS**, adj. Zo-o2g'o2n-u3s. From ζῷον, life, and γεννᾶν, generation. Fr., zoogène. See VIVIPAROUS.

**ZOOGONY**, n. Zo-o2g'o2n-i2. From ζῷον, an animal, and γεννᾶν, generation. Ger., Zoogonie. That department of embryology which relates to the origin of species of animals. [A, 8.]

**ZOOGRAPHY**, n. Zo-o2g'ra'f-i2. Lat., zoographia (from ζῷον, an animal, and γράφειν, to write). Fr., zoographie. Ger., Thierbeschreibung. Descriptive zoology.

**ZOOIÄTRIE** (Fr.), n. Zo-o-e-a3-tre. Veterinary medicine.

**ZOOID**, adj. Zo'oid. Gr., ζωοειδής (from ζῷον, an animal, and εἶδος, resemblance). Lat., zoides. Fr., zoolide. Ger., z. 1. Like an animal; 2. of the nature of an animal. 2. As a n., an organism resembling an animal, especially one of the more or less completely independent organisms produced by gemmation or fission, whether remaining attached to one another or detached and set free. [A, 12; B, 28 (a, 27).] 3. As a n., of Brücke, the nucleus and coloring

matter of a red blood-corpuscle (cf. ECHOID [1st def.]). [J, 26, 35; K.] 4. As a n. in the pl., z's, the highly specialized organs of such animals as the hydroids and other compound forms, which might be mistaken for distinct individuals. [L, 206 (a, 27).]

**ZOOLOGY**, n. Zo-o'l'o'-ji2. Lat., zoologia (from ζῷον, an animal, and λόγος, understanding). Fr., zoologie. Ger., Zoologie. The science of the structure, physiology, distribution, and classification of animals.—**Medical z.** Of Moquin-Tandon, the study of drugs of animal origin. [a, 34.]

**ZOOMAGNETISM**, n. Zo-o-ma2g'ne2t-i2z'm. Lat., zoomagnetismus (from ζῷον, an animal, and μάγνης, a magnet). Fr., zoomagnétisme. See ANIMAL MAGNETISM.

**ZOOMEPHITIS** (Lat.), n. f. Zo-o(o2)-me2f-i(e)'ti2s. Gen., -it'idis (-idis). From ζῷον, an animal, and mephitis, a pestilential exhalation. Fr., zooméphite. Mephitis originating in the decay of animal matter. [L, 50 (a, 48).]

**ZOOMYLE** (Fr.), n. Zo-o-mel. From ζῷον, an animal, and μύλη, a mole. Of I. Geoffroy Saint-Hilaire, a genus of monsters including uterine moles. [a, 34.]

**ZOON** (Lat.), n. n. Zo'o2n. Gr., ζῷον (from ζωῆ, life). See ANIMAL.

**ZOONIC**, adj. Zo-o2n'i2k. Pertaining to animals; obtained from animal substances. [L, 56.]—**Z. acid**. Fr., acide zoonique. Of Berthollet, an acid obtained from animal oil; said to be pyrogenous acid mixed with an animal substance. [B, 46 (a, 14).]

**ZOONOMY**, n. Zo-o2n'om-i2. Lat., zoonomia (from ζῷον, an animal, and νόμος, a law). Fr., zoonomie. See ANIMAL PHYSIOLOGY.

**ZOONOSIS** (Lat.), n. f. Zo-o2n'o2s-i2s. Gen., -os'eos (-is). From ζῷον, an animal, and νόσος, disease. Ger., Zoonose. A contagious disease transmitted from one individual to another of a different species, especially from an animal to man. [D, 3.]

**ZOONOSLOGY**, n. Zo-o-n-o2s-o2l'o'-ji2. From ζῷον, an animal, νόσος, disease, and λόγος, understanding. The nosology of the lower animals.

**ZOONULE** (Fr.), n. Zo-o-nu2l. See SOMITE.

**ZOOPATHOLOGY**, n. Zo-o-pa2th-o2l'o'-ji2. Lat., zoopathologia (from ζῷον, an animal, πάθος, disease, and λόγος, understanding). See ZOONOSIOLOGY.

**ZOOPELYOMETRY**, n. Zo-o-pe2l-i2-o2m'e2t-r'i2. Lat., zoopelymetria (from ζῷον, an animal, πέλus, the pelvis, and μέτρον, a measure). Fr., zoopélyométrie. Veterinary pelvimetry. [L, 50 (a, 48).]

**ZOOPEPHENOMENOLOGIA** (Lat.), n. f. Zo-o(o2)-fe2n(fa3-e2n)-o2m-e2n-o(o2)-loj(lo2g)'i2-a3. From ζωῆ, life, φαίνεσθαι, to appear, and λόγος, understanding. Fr., zoophénoménologie. The study of the morbid phenomena of life. [L, 80.]

**ZOOPHARMACOLOGY**, n. Zo-o-fa3rm-a2k-o2l'o'-ji2. From ζῷον, an animal, φάρμακον, a drug, and λόγος, understanding. Veterinary pharmacology.

**ZOOPHTHALMUS** (Lat.), n. m. Zo-o'f-tha2l(thal2)'mu3s(mu4s). From ζῷον, an animal, and ὀφθαλμός, the eye. Fr., zoophthalme. Ger., Thierauge. See BUPHTHALMOS (2d def.).

**ZOOPHYSIOLOGY**, n. Zo-o-fl2z-i2-o2l'o'-ji2. Lat., zoophysiologia (from ζῷον, an animal, φυσis, nature, and λόγος, understanding). Fr., zoophysiologie. Ger., Zoophysiologie. Animal physiology.

**ZOOPHYTE**, n. Zo'o-flt. Lat., zoophytum (from ζῷον, an animal, and φυτόν, a plant). Fr., z. Ger., Pflanzenzither, Thierpflanze. A plant-like animal, such as a sponge, a coral, etc. [B, 28 (a, 27).]

**ZOOPLASTE** (Fr.), n. Zo-o-pla'st. See SPERMATIZOID (1st def.).

**ZOOPLASTIC**, adj. Zo-o-pla'st'i2k. From ζῷον, an animal, and πλάσσειν, to mold. Fr., zooplastique. Formed from the tissue of an animal (said of grafts transplanted from some lower animal to man). [a, 34.]

**ZOOSPERM**, n. Zo'o-spu2rm. Lat., zoosperma (from ζῷον, an animal, and σπέρμα, seed). Fr., zoosperme. Ger., Samenfad. 1. See ZOOSPORE. 2. Of Bory Saint-Vincent, a spermatozoid.

**ZOOSPORANGIUM** (Lat.), n. n. Zo-o(o2)-spor(spo3r)-a2n-(a3n2)-ji2(gc2'i2)-u3m(u4m). From ζῷον, an animal, σπορά, a spore, and ἄγγειον, a cell. Fr., zoosporange. In certain Algae and in the phycomycetous Fungi, a sporangium containing motile spores (zoospores). [a, 35.]

**ZOOSPORE**, n. Zo'o-spor. From ζῷον, an animal, and σπορά, a spore. 1. A reproductive body produced by a zoosporangium; so called because it is endowed, for a while at least, with the power of locomotion. 2. A plano-gamete. [a, 35.] 3. See FLAGELLULA.

**ZOOSPOREÆ**, n. f. pl. Zo-o(o2)-spor(spo3r)'e2-e(a3-e2). From ζῷον, an animal, and σπορά, seed. Ger., Thiersporie. A division of Algae having ciliated, non-sexual reproductive bodies. In some classifications the division has a very extensive range, embracing the (Edogoniaceæ, Fuchsiaceæ, a portion of the Fucoidea, Oscillatoriæ, etc. [a, 35.]

**ZOOSTEARIC ACID**, n. Zo-o-ste-a2r'i2k. Fr., acide zootéarique. Of Landerer, a crystallizable fatty acid obtained from the bones of fossil mammals. [B, 46, 93 (a, 14).]

**ZOOTHAPSTS** (Lat.), n. f. Zo-o(o2)-tha2ps(thap3)'i2s. Gen., -thaps'eos (-is). From ζωῆ, life, and θάπτειν, to bury. Burial of a living person. [a, 48.]

**ZOOTHECA** (Lat.), n. f. Zo-o(o2)-thek(thak)'a3. From ζῷον, an animal, and θῆκη, a chest. Fr., zoothèque. Ger., Thierbehälter (1st def.). 1. A case containing animals or parts of animals preserved for purposes of exhibition or demonstration. [L, 50 (a, 48).] 2. See ANTHRIDIDIUM (1st def.).

**ZOOTHERAPY**, n. Zo-o-the'r'a-pi-iz. Lat., *zootherapia* (from ζῷον, an animal, and θεραπεία, medical treatment). Fr., *zootherapie*. Ger., *Thierheilkunde*. Veterinary therapeutics. [a, 48.]

**ZOOTOCUS** (Lat.), adj. Zo-o't'o'c-u's(u's). Gr., ζοοτόκος (from ζῷον, life, and τόκος, childbirth). See VIVIPAROUS.

**ZOOTOXÉMIES** [Piorry] (Fr.), n. pl. Zo-o-to'x-am-e. Deteriorations of the blood resulting from animal poison. [A, 250 (a, 21).]

**ZOOTOMY**, n. Zo-o't'o'm-i-iz. Lat., *zootomia* (from ζῷον, an animal, and τομή, a cutting). Fr., *zootomie*. The dissection of animals, especially of the lower animals; comparative anatomy.

**ZOFF** (Ger.), n. Tso'pf. A plait of hair. [A, 315 (a, 48).]—**Juden'z**. See *PLICA polonica*.

**ZOPHODES** (Lat.), adj. Zo'pf-od'ez(as). Gr., ζοφώδης (from ζῶφος, darkness, and εἶδος, resemblance). Fr., *zopheux, zophode*. Of Hippocrates, dark, turbid (said of urine, etc.). [L, 50 (a, 14).]

**ZOPILOTTI**, n. See *ATURA* (4th def.).

**ZOPISSA** (Lat.), n. f. Zo'p(zop)-i's-sa. Gr., ζώπισσα. See *PITCH*.

**ZORNIA** (Lat.), n. f. Zo'rn'i-iz-a. A genus of leguminous herbs. [a, 35.]—**Z. angustifolia**, **Z. diphylla**. An East Indian febrifuge species. [a, 35.]

**ZOSTER** (Lat.), n. m. Zo'st(zost)'u'r(ar). Gen., -er'os (-er'is). Gr., *ζοστήρ* (from ζώνναι, to gird). Fr., *z, zone, sangle, ceinturon, ceinture, feu persique* (ou sacré). Ger., *Rose, Gürtel, Gürtelflechte, Feuer Gürtel*. Shingles, cruels; an acute vesicular eruption, usually painful, characterized by the development of groups of herpetic (see *HERPES* [2d def.]) vesicles corresponding in situation to the cutaneous distribution of a nerve. The term arises from the fact that in a common form of the disease the eruption apparently tends to encircle the body like a girdle, though practically it hardly ever occupies more than one lateral half. [G, 16.]—**Z. aigu** (Fr.). See *Z. atypicus gangrenosus et hystericus*. See *Z. gangrenosus hystericus*.—**Z. auricularis**. A rare form of z. developed only in the structures of the ear, which attacks the parts covered by true skin and also extends to the drumhead and cavity of the middle ear. [F.]—**Z. brachialis**. Z. of the arm and forearm, corresponding to the cutaneous distribution of the internal, middle, and external cutaneous, the median, and the ulnar nerves. [G.]—**Z. capillitii et frontalis**. An awkward expression (to which *z. capillitii et frontis* would be preferable) for z. of the scalp and the upper portion of the face, occasionally involving the conjunctiva, cornea, and iris, corresponding to the distribution of the first branch of the fifth nerve. [G.]—**Z. cerebialis**. Z. of cerebral origin; characterized by its extensive distribution, sometimes occupying the whole or the greater part of one side of the body. [G.]—**Z. cervico-subclavicularis**. Z. which begins on the neck, near the edge of the hair, and descends along the side of the neck to the shoulder, thence spreading forward over the skin between the clavicle and the nipple and over a part of the neck above the clavicle. [L, 57 (a, 50).]—**Z. chronica** (Fr.). See *Z. redivivus*.—**Z. collaris**. See *Z. occipito-collaris*.—**Z. dorso-abdominalis**. Z. of the back and abdomen, corresponding to the cutaneous distribution of the eighth, ninth, tenth, eleventh, and twelfth dorsal nerves. [G.]—**Z. dorso-pectoralis**. Z. of the back and pectoral region, corresponding to the cutaneous distribution of the third, fourth, fifth, sixth, and seventh dorsal nerves.—**Z. facialis**, **Z. faciei**. Facial z., which may appear upon the face, the temporal region, the external ear, and the mucous membrane of the nose, mouth, and throat; corresponding to the superficial distribution of the trigeminal nerve. [G.]—**Z. femoralis**. See *Z. lumbofemoralis*.—**Z. gangrenosus**. Z. in which certain of the vesicles or vesicular groups become gangrenous. Usually the gangrene begins after the vesicle has formed, and can be seen in its progress, through the unbroken epidermis. At other times it occurs primarily, affecting either a single vesicle or an entire group. In the latter case the border of the gangrenous patch is seen to preserve this irregular and indented outline of a vesicular group. [G.]—**Z. gangrenosus hystericus. Of Kaposi, a form observed in patients with hysterical symptoms among which it is supposed to belong. It differs from ordinary z. in the distribution of the efflorescences, which do not follow the course of a particular nerve; also in the fact that in most of the cases described the eruption was symmetrical and in the occurrence of gangrene in certain vesicular groups of the eruption. [Arch. für Derm. u. Syph., Sept., 1889, p. 561 (G).]—**Z. hystericus**. An eruption resembling z. due to hysteria (cf. *Z. gangrenosus hystericus*). [G.]—**Z. lumbofemoralis**. Z. corresponding to the cutaneous distribution of the second, third, and fourth lumbar, the external anterior cutaneous, the genitocrural, and the crural nerves. It may appear upon the nates, the front and back of the thigh, and sometimes the calf of the leg.—**Z. lumbinguinalis**. Z. of the back and groin, corresponding to the cutaneous distribution of the twelfth intercostal and the first lumbar nerves, together with their anastomoses. [G.]—**Z. nucha**, **Z. occipito-collaris**. Z. extending from the region of the second and third vertebrae around the neck to the median line of the throat and to the chin, corresponding to the cutaneous distribution of the fourth cervical nerve. [G.]—**Z. ophthalmicus**. A disease of nervous origin, usually ushered in by more or less severe pain and tenderness in the brow or head, followed by redness and swelling of the skin, and the appearance of numerous small vesicles, usually arranged in a linear or oval groups. The eruption only extends in the course of the ophthalmic division of the fifth nerve, and is therefore confined to the forehead, and the anterior part of the scalp, the eyelids, and the side of the nose. It may affect only certain branches of the ophthalmic nerve. The individual vesicles become confluent, and their contents dry up into scabs which afterward drop off, leaving deep and characteristic scars. The eyeball does not suffer, and the oculo-nasal branch is involved, when small corneal ulcers may occur or irritation may develop. The temperature of the affected parts is decidedly increased, but the sensibility is dimin-**

ished. It is said to occur but once in the life of a patient. [F.]—**Z. pectoralis**. Z. affecting the skin of the chest.—**Z. perinealis**. Z. of the perineum, affecting the skin of the perineum, the posterior surface of the scrotum, and the penis or vulva, corresponding to the cutaneous distribution of the pudic, the posterior cutaneous, and the ischiadic nerves. [G.]—**Z. redivivus** [Alibert]. The form of z. that is followed by a chronic neuralgia. [G, 7.]—**Z. sacro-genitalis**, **Z. sacro-ischiadicus**. See *Z. perinealis*.

**ZOSTERA** (Lat.), n. f. Zo'st(zost)-er(ar)a. From *ζοστήρ*, a girdle. Fr., *zostère*. 1. Sea-wrack; a genus of maritime herbs of the *Zosteraceæ*, which are an order of monocotyledons now made a tribe (the *Zostereæ*) of the *Naiadaceæ*. [a, 35.] 2. Of Alibert, see *ZOSTER*.—**Z. marina**, **Z. maritima**. Fr., *algue marine* (ou des verriers, ou des vitriers). Ger., *gemeiner Wasserriemen, Wier, Wier, Meergras, Seegras*. Glass-wrack of Atlantic shores, grass-weed (or -wrack), glaziers' sea-weed, turtle-grass, bell-ware. The leaves are sometimes found on shores in the form of balls (see *HALCYONUM rotundum*). They contain potash and a little iodine, and have been used as an antiscorbutic. [a, 35.]—**Z. mediterranea**. A Mediterranean species having the properties of *Z. marina* and sometimes forming similar balls. It is used for various economic purposes. [a, 35.]

**ZOSTERIC**, adj. Zo'st-e'r'i'k. Lat., *zostericus*. Pertaining to zoster.

**ZÖTTCHEN** (Ger.), n. Tso't'ch'e'n. A diminutive villus.

**ZOTTE** (Ger.), n. Tso't'ze. See *VILLUS*.—**Darm'z**, **Dünndarm'z**, **Darm'z**. See *Intestinal VILLI*.—**Gefäss'z**. One of the vascular tufts of the choroid plexus. [I, 17 (K).]—**Geschwulst'z**. A villous process of a tumor. [a, 34.]—**Z'nbaumchen**. A chorionic villus.—**Z'nblume**. See *MENYANTHES*.—**Z'ncomplex**. An assemblage or system of villi, such as that of the chorion. [A, 19.]—**Z'ngeschwulst**. See *PAPILLOMA*.—**Z'nhaar**. See *VILLUS*.—**Z'nherz**. See *COR hirsutum*.—**Z'nkrebs**. See *PAPILLOMA*.—**Z'nparenchym**. The central part or core of an intestinal villus. It is usually covered by epithelium. [J.]—**Z'nscheide**. The sheath of a chorionic villus, i. e., a depression in the decidua into which the villus is received.

**ZOTTENHAUT** (Ger.), n. Tso't'te'n-ha'z-u't. See *CHORION* (1st def.).—**Primäre Z.**, **Primitive Z.** See *Primitive CHORION* (1st def.).

**ZOTTIG** (Ger.), adj. Tso't'ti'g. See *VILLOUS*.—**Klebrig-z.** Covered with viscid villi. [a, 35.]

**ZUCCARUM** (Lat.), n. n. Zu'k(zu'k)/ka'r(ka'r)-u'm(u'm). See *SACCHARUM*.

**ZÜCHTUNG** (Ger.), n. Tso'ch't'un'g. Breeding, cultivation, especially of micro-organisms. [a, 14.]—**Z'sleher**. The theory of selection in breeding. [L.]

**ZUCHTWAHL** (Ger.), n. Tso'ch't'va'z. See *SELECTION*.

**ZUCKEN** (Ger.), n. Tso'k'e'n. See *CONVULSION*.

**ZUSAMMENDRÜCKER** (Ger.), n. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>dru<sup>2</sup>k<sup>2</sup>e<sup>2</sup>r. See COMPRESSOR.—**Z. der Nase**. See COMPRESSOR naris.  
**ZUSAMMENDRÜCKUNG** (Ger.), n. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>dru<sup>2</sup>k<sup>2</sup>un<sup>2</sup>. See COMPRESSION.  
**ZUSAMMENFALLEN** (Ger.), n. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>fa<sup>2</sup>l<sup>2</sup>e<sup>2</sup>n. See COLLAPSE (1st def.).  
**ZUSAMMENFLIESSEND** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>fles<sup>2</sup>e<sup>2</sup>nd. See CONFLUENT (1st def.).  
**ZUSAMMENFLUSS** (Ger.), n. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>flus. See AFFLUX.  
**ZUSAMMENFÜGUNG** (Ger.), n. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>fu<sup>2</sup>g<sup>2</sup>un<sup>2</sup>. A joining together; a commissure. [a, 14.]  
**ZUSAMMENGEBALLT** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>ba<sup>2</sup>lt. See CONGLOBATE.  
**ZUSAMMENGEDRÄNGT** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>drant<sup>2</sup>. See CONFERTUS and CONDENSED.  
**ZUSAMMENGEDREHT** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>drat. See CONTORTED.  
**ZUSAMMENGEDRÜCKT** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>dru<sup>2</sup>kt. See COMPRESSED.  
**ZUSAMMENGEFALTET** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>fa<sup>2</sup>lt<sup>2</sup>e<sup>2</sup>t. See COMPLICATE.  
**ZUSAMMENGEFLACHT** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>flacht<sup>2</sup>. See COMPAGINATUS.  
**ZUSAMMENGEHÄUFT** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>hoft. See COAGERVATE and CONGLOMERATE.  
**ZUSAMMENGEKITTET** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>ke<sup>2</sup>tt<sup>2</sup>e<sup>2</sup>t. See CATENULATE.  
**ZUSAMMENGEKLEBT** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>kle<sup>2</sup>bt. See CONGLUTINATE.  
**ZUSAMMENGEKNÄULET** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>knol<sup>2</sup>e<sup>2</sup>lt. See CONGLOMERATE.  
**ZUSAMMENGELEGT** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>lagt. See DUPLICATE.  
**ZUSAMMENGELEIMT** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>limt. See CONGLUTINATE.  
**ZUSAMMENGELOTHET** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>lo<sup>2</sup>thet<sup>2</sup>. See CONFERRIMINATE.  
**ZUSAMMENGEROLLT** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>rol<sup>2</sup>t. See CONVOLUTE.  
**ZUSAMMENGESCHLAGEN** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>shla<sup>2</sup>g<sup>2</sup>e<sup>2</sup>n. See CONDUPLICATE.  
**ZUSAMMENGESCHNÜRT** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>shnu<sup>2</sup>rt. See CONSTRICTED.  
**ZUSAMMENGESETZT** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>zet<sup>2</sup>st. See COMPOUND.  
**ZUSAMMENGESTELLT** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>stel<sup>2</sup>lt. See COLLOCATUS.  
**ZUSAMMENGEWACHSEN** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>va<sup>2</sup>ch<sup>2</sup>s<sup>2</sup>e<sup>2</sup>n. See CONNATE, COADNATE, and CONCRETE.  
**ZUSAMMENGEWICKELT** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>vik<sup>2</sup>elt<sup>2</sup>. See CONVOLUTE.  
**ZUSAMMENGEWUNDEN** (Ger.), adj. Tsu<sup>2</sup>za<sup>2</sup>m<sup>2</sup>me<sup>2</sup>n<sup>2</sup>ge<sup>2</sup>vund<sup>2</sup>e<sup>2</sup>n. See CONGLOMERATE.

**ZUSAMMENGEZOGEN** (Ger.), adj. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-ge<sup>2</sup>-tsog-e<sup>2</sup>n. See CONTRACTED.

**ZUSAMMENHALTEN** (Ger.), n. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-ha<sup>1</sup>l<sup>2</sup>-e<sup>2</sup>n. See ADHESION.

**ZUSAMMENHANG** (Ger.), **ZUSAMMENHÄNGUNG** (Ger.), n's. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-ha<sup>2</sup>n<sup>2</sup>, -han<sup>2</sup>-un<sup>2</sup>. Connection, continuity, cohesion. [L, 31.]

**ZUSAMMENHÄNGEND** (Ger.), adj. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-han<sup>2</sup>-e<sup>2</sup>nd. See COHERENT.

**ZUSAMMENHÄUFUNG** (Ger.), n. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-hoif-un<sup>2</sup>. Aggregation, conglomeration.

**ZUSAMMENHEFTUNG** (Ger.), adj. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-he<sup>2</sup>ft-un<sup>2</sup>. See INFIBULATION.

**ZUSAMMENHEILEN** (Ger.), **ZUSAMMENHEILUNG** (Ger.), **ZUSAMMENKLEBEN** (Ger.), n's. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-hil-e<sup>2</sup>n, -un<sup>2</sup>, -klab-e<sup>2</sup>n. Agglutination, conglutination.

**ZUSAMMENKLEBEND** (Ger.), adj. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-klab-e<sup>2</sup>nd. See CONGLUTINANT.

**ZUSAMMENLAUFEND** (Ger.), adj. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-la<sup>1</sup>-u<sup>2</sup>-f-e<sup>2</sup>nd. See CONVERGENT.

**ZUSAMMENLEIMEND** (Ger.), adj. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-lim-e<sup>2</sup>nd. See AGGLUTINANT (1st def.).

**ZUSAMMENLEIMUNG** (Ger.), n. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-lim-un<sup>2</sup>. See AGGLUTINATION.

**ZUSAMMENMÜNDUNG** (Ger.), n. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-mu<sup>2</sup>-nd-un<sup>2</sup>. Anastomosis.

**ZUSAMMENSCHMELZEN** (Ger.), n. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-shme<sup>2</sup>lts-e<sup>2</sup>n. See COLLIQUATION.

**ZUSAMMENSCHNÜREN** (Ger.), n. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-shnu<sup>2</sup>-e<sup>2</sup>r. See CONSTRICTOR.

**ZUSAMMENSCHNÜRUNG** (Ger.), n. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-shnu<sup>2</sup>-r-un<sup>2</sup>. See CONSTRICTION (1st def.).

**ZUSAMMENSCHRUMPUNG** (Ger.), n. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-shrump-un<sup>2</sup>. See CORRUGATION.

**ZUSAMMENSETZUNG** (Ger.), n. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-ze<sup>2</sup>ts-un<sup>2</sup>. See COMPOSITION.

**ZUSAMMENSTOSS** (Ger.), **ZUSAMMENSTOSSUNG** (Ger.), **ZUSAMMENTREFFEN** (Ger.), n's. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-sto<sup>2</sup>s, -sun<sup>2</sup>, -tre<sup>2</sup>-fe<sup>2</sup>n. See CONTUSION.

**ZUSAMMENWACHSEN** (Ger.), **ZUSAMMENWACHSUNG** (Ger.), n's. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-wa<sup>3</sup>ch<sup>2</sup>s-un<sup>2</sup>. Coalescence. [a, 14.]

**ZUSAMMENWOHNEN** (Ger.), n. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-von-e<sup>2</sup>n. See COHABITATION.

**ZUSAMMENZUGEND** (Ger.), adj. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-tsoig-e<sup>2</sup>nd. See CONGENITAL.

**ZUSAMMENZIEHBAR** (Ger.), adj. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-tse-ba<sup>2</sup>r. See CONTRACTILE.

**ZUSAMMENZIEHEND** (Ger.), adj. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-tse-e<sup>2</sup>nd. Astringent, constrictive.

**ZUSAMMENZIEHER** (Ger.), n. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-tse-e<sup>2</sup>r. See CONSTRICTOR.

**ZUSAMMENZIEHUNG** (Ger.), n. Tsu-za<sup>3</sup>m/me<sup>2</sup>n-tse-un<sup>2</sup>. See ADSTRICTIO, CRISPATION, and CONTRACTION.—**Pulsirende Z'en**. See *Pulsatile CONTRACTIONS*.—**Sanduhrz'**. See *Hour-glass CONTRACTION*.

**ZUSATZ** (Ger.), n. Tsu/za<sup>3</sup>ts. See ADMIXTION and ADDITION.—**Z'product, Z'verbinding**. See ADDITION COMPOUND.

**ZUSCHNÜREN** (Ger.), n. Tsu/shnu<sup>2</sup>-e<sup>2</sup>r. See SPHINCTER.

**ZUSPITZEN** (Ger.), v. intr. Tsu/spi<sup>2</sup>ts-e<sup>2</sup>n. See POINT (v.).

**ZUSTRÖMEND** (Ger.), adj. Tsu/stru<sup>2</sup>-e<sup>2</sup>nd. Affluent, afferent.

**ZUTRIFF** (Ger.), n. Tsu/tri<sup>2</sup>t. See ABCESS.

**ZUVORKOMMEN** (Ger.), n. Tsu/for-ko<sup>2</sup>m/me<sup>2</sup>n. Prevention.

**ZUWACHS** (Ger.), n. Tsu/va<sup>3</sup>ch<sup>2</sup>s. See ACCREMENTITION.

**ZUZIEHER** (Ger.), n. Tsu/tse-e<sup>2</sup>r. An adductor muscle. [a, 48.]—**Grosser Z. des Oberschenkels** (oder **Schenkels**). See ADDUCTOR femoris magnus.—**Kurzer Z. des Oberschenkels**. See ADDUCTOR femoris brevis and Small adductor of the thigh.—**Langer Z. des Oberschenkels**. See ADDUCTOR femoris longus.—**Langer Z. des Schenkels**. See ADDUCTOR longus.—**Z. des Daumens**. See ADDUCTOR pollicis manus.

**ZWANG** (Ger.), n. Tsu/va<sup>3</sup>n<sup>2</sup>. 1. Compulsion, constraint. 2. Tension. [A, 521 (a, 48).]—**Kinnbackenz'**. See TRISMUS.—**Stuhlz'**. See RECTAL TENESMUS.—**Z'hüfig**. See HOOF-bound.—**Z'sjacked, Z'swamm**. See CAMISOLE.—**Z'svorstellung**. See PRIMORDIAL DELIRIUM.

**ZWEI** (Ger.), adj. Tswi. Two.—**Z'äugig**. See BINOCULAR.—**Z'basisch**. See DIBASIC.—**Z'bäuchig**. See DIGASTRIC.—**Z'blättrig**. Of the involucre and perigon, diphyllous: of the flower, dipetalous; of the calyx, disepalous. [a, 35.]—**Z'fach**. See DUPLICATE.—**Z'fächerig**. See BINOCULAR.—**Z'farbigkeit**. See DICHROISM.—**Z'fügelnuss**. See DIPTEROCARPUS.—**Z'gelenkig**. Having two joints; of muscles, having two articulations between the origin and insertion. [L, 31.]—**Z'hügel**. See CORPORA quadrigemina.—**Z'keimblättrig**. See DICOTYLEDONOUS.—**Z'köpfig**. See DICEPHALOUS.—**Z'malklopfend**. See DICROTAL.—**Z'samenlappig**. See DICOTYLEDONOUS.—**Z'schwänzig**. See BICAUDAL.—**Z'theilung**. See DICHOTOMY and FISSION.—**Z'werthig**. See BIVALENT.

**ZWEIG** (Ger.), n. Tswig. See BRANCH.—**Hantz'**. A cutaneous filament. [L, 31.]—**Z'chen, Z'elchen, Z'lein**. A small twig, as of a blood-vessel.

**ZWEITGEBÄRENDE** (Ger.), n. Tswit/ge<sup>2</sup>-bar-e<sup>2</sup>nd-e<sup>2</sup>. See SECUNDIPARA.

**ZWEIWUCHS** (Ger.), n. Tswi/vuch<sup>2</sup>s. See RHACHITIS.

**ZWERCHFELL** (Ger.), n. Tswērch<sup>2</sup>/fe<sup>2</sup>l. See DIAPHRAGM (1st def.).—**Z'eiterung**. See DIAPHRAGMATIC EMPYEMA.—**Z'entzündung**. See DIAPHRAGMATITIS.—**Z'geschwür**. See DIAPHRAGMATICOLOSIS.—**Z'schlauch der Uterine** (Kölcker). An arch-like fold of the peritoneum extending from the pronephros to the diaphragm in the embryo. [A, 8.]—**Z'schmerz**. See DIAPHRAGMALGIA.

**ZWERG** (Ger.), n. Tswērg. See DWARF.—**Z'rumpf**. See NANOSOMIA.

**ZWERGFEHLE** (Ger.), n. Tswērg<sup>2</sup>/fe<sup>2</sup>l. See DIAPHRAGM (1st def.).

**ZWICKAU** (Ger.), n. Tswi<sup>2</sup>k<sup>2</sup>-a<sup>2</sup>-u<sup>2</sup>. A place in Saxony where there is a gaseous and saline spring. [L, 49, 87, 105 (a, 14).]

**ZWICKEL** (Ger.), n. Tswi<sup>2</sup>k<sup>2</sup>-e<sup>2</sup>l. See CUNEUS (2d def.).

**ZWIEBACK** (Ger.), n. Tswēba<sup>3</sup>lk. A sweetish kind of bread cut into large pieces and browned in the oven.—**Fleischz'**. See MEAT BISCUITS.

**ZWIEBEL** (Ger.), n. Tswēb<sup>2</sup>-e<sup>2</sup>l. See BULB and ALLIUM CEPA.—**Brutz'**. See BULBULUS.—**Ewig Z.** See ALLIUM fistulosum.—**Gemeine Z.** See ALLIUM CEPA.—**Geschmacksz'n**. See Taste buds.—**Harnröhrenz'**. See BULB of the urethra.—**Häutige Z.** See Tunicated BULB.—**Knollenz'**. See CORM (2d def.).—**Knospenz'**. See BULBIL.—**Markz'**. 1. See MEDULLA oblongata. 2. In the pl., **Markz'n**, see CORPORA albicania.—**Vorhofsz'n**. See BULBI vestibuli vagina.—**Winterz'**. See ALLIUM fistulosum.—**Z'haut**. The integument of a bulb. [a, 35.]—**Z'ig**. See BULBULUS.—**Z'knollen**. See CORM (2d def.).—**Z'knospe**. See BULBIL.—**Z'tragend**. See BULBIFEROUS.

**ZWIEWUCHS** (Ger.), n. Tswēvuch<sup>2</sup>s. See RHACHITIS.

**ZWILLING** (Ger.), n. Tswi<sup>2</sup>l<sup>2</sup>l<sup>2</sup>n<sup>2</sup>. See TWIN.—**Eineige Z'e**. See UNIOVULAR TWINS.—**Z'sbinde**. See FORNIX cerebri.—**Z'städen**. See Cleft nuclear FILAMENTS.—**Z'sfrucht**. A twin.—**Z'sämskel**. See BIFEMORO - CALCANEUS.—**Z'sschwangerschaft**. Twin pregnancy.

**ZWINGE** (Ger.), n. Tswi<sup>2</sup>n<sup>2</sup>-e<sup>2</sup>. See FORNIX cerebri.

**ZWISCHENBALKEN** (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-ba<sup>3</sup>lk-e<sup>2</sup>n. See DIAEPGMA.

**ZWISCHENBAND** (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-ba<sup>3</sup>nd. See LIGAMENTUM teres (1st def.).

**ZWISCHENEINTRETEND** (Ger.), adj. Tswi<sup>2</sup>sh'e<sup>2</sup>n-in<sup>2</sup>-tre<sup>2</sup>-e<sup>2</sup>nd. See SUBINTRANT.

**ZWISCHENFALLEND** (Ger.), adj. Tswi<sup>2</sup>sh'e<sup>2</sup>n-fa<sup>3</sup>l<sup>2</sup>-e<sup>2</sup>nd. See INTERCALAR.

**ZWISCHENFELLNERV** (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-fe<sup>2</sup>l<sup>2</sup>-ne<sup>2</sup>rf. See PHRENIC NERVE.

**ZWISCHENGELENKIG** (Ger.), adj. Tswi<sup>2</sup>sh'e<sup>2</sup>n-ge<sup>2</sup>-l<sup>2</sup>e<sup>2</sup>n<sup>2</sup>-k<sup>2</sup>-ig. See INTERARTICULAR.

**ZWISCHENGELENKKNORPEL** (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-ge<sup>2</sup>-l<sup>2</sup>e<sup>2</sup>n<sup>2</sup>-k<sup>2</sup>-kno<sup>2</sup>-rp-e<sup>2</sup>l. See INTERARTICULAR CARTILAGE.

**ZWISCHENGESTELLT** (Ger.), adj. Tswi<sup>2</sup>sh'e<sup>2</sup>n-ge<sup>2</sup>-ste<sup>2</sup>lt. See INTERPOSED.

**ZWISCHENGeweBE** (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-ge<sup>2</sup>-vab-e<sup>2</sup>. See AREOLAR TISSUE, TISSU annexiel, and GROUND-SUBSTANCE.

**ZWISCHENGLED** (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-gled. See INTERMEDIATE SEGMENT of a cilium.

**ZWISCHENHIRN** (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-hern. See MESENCEPHALON and THALAMENCEPHALON.—**Z'bilschen**. The primary vesicle of the mesencephalon. [I, 17 (K).]—**Z'boden**. The anterior region of the brain, including the structures just behind the optic chiasm. [I, 17 (K).]—**Z'dach**. The roof of the third ventricle. [I, 17 (K).]

**ZWISCHENKIEFER** (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-kef-e<sup>2</sup>r. See INTERMAXILLARY BONE.—**Lateraler Z.** See MESOGNATHION.—**Z'knochen**. See Z.

**ZWISCHENKIEMEYENDECKELSTÜCK** (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-kem-e<sup>2</sup>n-de<sup>2</sup>k-e<sup>2</sup>l-stu<sup>2</sup>k. See INTERPERICULAR BONE.

**ZWISCHENKNOCHEN** (Ger.), adj. (in comp.). Tswi<sup>2</sup>sh'e<sup>2</sup>n-kno<sup>2</sup>ch<sup>2</sup>-e<sup>2</sup>n. See INTEROSSEOUS.—**Z'muskel**. An interosseous muscle. [L, 304.]—**Ersterer äusserer Z'muskel des Fusses**. See ABDUCTOR indicis pedis.

**ZWISCHENKNOTEN** (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-kno<sup>2</sup>t-e<sup>2</sup>n. See INTERNODE.

**ZWISCHENKÖRNERSCHEIT** (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-ku<sup>2</sup>rn-e<sup>2</sup>r-shi<sup>2</sup>ch<sup>2</sup>t. See SPERMATUM granulosum.—**Äussere kahle Z.** (Meynert). The sixth layer in the cerebral cortex, consisting of large pyramidal cells. [I, 17 (K).]—**Innere kahle Z.** (Meynert). A layer of large pyramidal cells (the fourth) in the cortex cerebri in the neighborhood of the calcarine fissure. [I, 17 (K).]—**Kahle Z'en** (Meynert). A term for two layers of the cortex cerebri which are poor in nerve-cells. [I, 11 (K).]

**ZWISCHENLAGERUNG** (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-la<sup>3</sup>g-e<sup>2</sup>-r-un<sup>2</sup>. An interstitial deposition. [A, 521 (a, 48).]

**ZWISCHENLAUFEND** (Ger.), adj. Tswi<sup>2</sup>sh'e<sup>2</sup>n-la<sup>3</sup>-u<sup>2</sup>-f-e<sup>2</sup>nd. See INTERCURRENT.

**ZWISCHENPLATTE** (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-pla<sup>3</sup>t<sup>2</sup>-te<sup>2</sup>. See LAMINA intergerina.

**ZWISCHENQUERMUSKEL** (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-kwe<sup>2</sup>r-musk-e<sup>2</sup>l. See INTERTRANSVERSARIUS; in the pl., **Z'n**, see INTERTRANSVERSALIS.

**ZWISCHENRAUM** (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-ra<sup>2</sup>-u<sup>4</sup>m. An inter-space. [L, 31.] See also *Interduncular* SPACE.

**ZWISCHENRIPPEN-** (Ger.), adj. (in comp.). Tswi<sup>2</sup>sh'e<sup>2</sup>n-ri<sup>2</sup>p-pe<sup>2</sup>n. See *INTERCOSTAL*.

**ZWISCHENSCHIETELHORN** [Huscke] (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-shit-e<sup>2</sup>l-hern. See *Occipital* LOBE.

**ZWISCHENSCHENKEL-** (Ger.), adj. (in comp.). Tswi<sup>2</sup>sh'e<sup>2</sup>n-she<sup>2</sup>n<sup>2</sup>k-e<sup>2</sup>l. See *INTERCURAL*.—**Z'dreieck**. See *Interduncular* SPACE.

**ZWISCHENSCHICHT** (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-shi<sup>2</sup>ch<sup>2</sup>t. An intermediary layer of nerve-fibres in the cerebral cortex, especially the external molecular stratum. [K.]

**ZWISCHENSCHLAG** (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-shla<sup>2</sup>g. See *INTERCADCENCE*.

**ZWISCHENSTAND** (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-sta<sup>2</sup>nd. See *INTERSTICE*.

**ZWISCHENSTÄNDIG** (Ger.), adj. Tswi<sup>2</sup>sh'e<sup>2</sup>n-stand-i<sup>2</sup>g. See *INTERMEDIARY*.

**ZWISCHENSTRANG** [His] (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-stra<sup>2</sup>n<sup>2</sup>. A longitudinal dorsal projection of the epiblast at its junction with the medullary tube of the embryo. [A, 8.]

**ZWISCHENVORKOMMEN** (Ger.), adj. Tswi<sup>2</sup>sh'e<sup>2</sup>n-fo<sup>2</sup>r-ko<sup>2</sup>m-me<sup>2</sup>nd. See *INTERCURRENT*.

**ZWISCHENWAND-** (Ger.), adj. (in comp.). Tswi<sup>2</sup>sh'e<sup>2</sup>n-va<sup>2</sup>nd. See *INTERPARIETAL*.

**ZWISCHENWIRBEL-** (Ger.), adj. (in comp.). Tswi<sup>2</sup>sh'e<sup>2</sup>n-verb'e<sup>2</sup>l. See *INTERVERTEBRAL*.

**ZWISCHENWIRTH** (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-vert. An intermediary host. [A, 521 (a, 48).]

**ZWISCHENZEIT** (Ger.), n. Tswi<sup>2</sup>sh'e<sup>2</sup>n-tsit. See *INTERMISSION* (1st and 2d def's).

**ZWITTER** (Ger.), n. Tswi<sup>2</sup>t/te<sup>2</sup>r. See *HERMAPHRODITE*.—**Z'-bildung**, *Z'gestaltung*. See *HERMAPHRODITISM*.—**Z'-haft**. Bisexual; hermaphroditic.—**Z'-heit**, *Z'thum*. See *HERMAPHRODITISM*.

**ZWITTERWESEN** (Ger.), n. Tswi<sup>2</sup>t/te<sup>2</sup>r-vaz-e<sup>2</sup>n. 1. An hermaphrodite or hybrid. 2. The condition of being an hermaphrodite or a hybrid. [A, 315 (a, 48).]

**ZYGADENUS** (Lat.), n. m. Zi<sup>2</sup>g(zu<sup>2</sup>g)-a<sup>2</sup>d(a<sup>2</sup>d)/e<sup>2</sup>n-u<sup>2</sup>s(u<sup>2</sup>s). From *zygón*, a yoke, and *adēn*, a gland. A genus of the *Melanthaceae*. [B, 48 (a, 14).]—**Z. elegans**. A Kansas species. The herb is said to cause fatal cerebral disturbance in sheep. [Proc. of the Am. Pharm. Assoc., xxxviii (a, 14).]—**Z. frigidus**. A Mexican species. Its seeds have properties similar to those of *cevadilla*. [B, 48 (a, 14).]—**Z. Nuttallii**. A poisonous Californian species. The tuber has properties similar to those of *Z. venenosus*. [Proc. of the Am. Pharm. Assoc., xxxvi (a, 14).]—**Z. venenosus**. Hogspotted, death-cannous; a Californian species having a very poisonous tuber. [Proc. of the Am. Pharm. Assoc., xxxvi, xxxvii (a, 14).]

**ZYGAPOPHYSIS** (Lat.), n. f. Zi<sup>2</sup>g(zu<sup>2</sup>g)-a<sup>2</sup>p(a<sup>2</sup>p)-o<sup>2</sup>t'i<sup>2</sup>(u<sup>2</sup>)-si<sup>2</sup>s. Gen., *zygapsens, -oph'ysis*. From *zygón*, a yoke, and *apóphysis*, a process. Fr., *zygapophyse*. An articular process of a vertebra.

**ZYGODACTYLE**, adj. Zig-o-da<sup>2</sup>kt'i<sup>2</sup>l. Lat., *zygodactylus* (from *zygón*, a yoke, and *dáctulos*, a digit). Fr., *zygodactyle*. (Ger., *jochfingerig*. Yoke-toed; having the toes in pairs. [L, 341 (a, 27).]

**ZYGOLABIALIS** [Coeus] (Lat.), n. m. Zi<sup>2</sup>g(zu<sup>2</sup>g)-o(o<sup>2</sup>)-lab-(la<sup>2</sup>b)-i<sup>2</sup>-al(a<sup>2</sup>l)/i<sup>2</sup>a. From *zygón*, a yoke, and *labium*, a lip. See *ZYGOMATICS minor*.

**ZYGOMA** (Lat.), n. n. Zi<sup>2</sup>g(zu<sup>2</sup>g)-om'a<sup>2</sup>. Gen., *-om'atos (-atis)*. Gr., *ζυγωμα*. Fr., *zygôme*. Ger., *Jochbrin*. See *ZYGOMATIC ARCH*.

**ZYGOMATIC**, adj. Zi<sup>2</sup>g-o<sup>2</sup>m-a<sup>2</sup>t'i<sup>2</sup>l. Lat., *zygomatikus*. Fr., *zygomatique*. Ger., *zygomatisch*. Pertaining to the zygoma. [L, 313.]

**ZYGOMATICO-LABIALIS** (Lat.), n. m. Zi<sup>2</sup>g(zu<sup>2</sup>g)-o<sup>2</sup>m(om)-a<sup>2</sup>t(a<sup>2</sup>t'i<sup>2</sup>l)-i<sup>2</sup>l(a<sup>2</sup>l)-o(o<sup>2</sup>)-lab-(la<sup>2</sup>b)-i<sup>2</sup>-al(a<sup>2</sup>l)/i<sup>2</sup>a. Fr., *zygomatiko-labial*. The analogue of the zygomatic major of man found in most of the lower mammals. [L, 131.]

**ZYGOMATICO-MAXILLARIS** (Lat.), n. m. Zi<sup>2</sup>g(zu<sup>2</sup>g)-o<sup>2</sup>m(om)-a<sup>2</sup>t(a<sup>2</sup>t'i<sup>2</sup>l)-i<sup>2</sup>l(a<sup>2</sup>l)-o(o<sup>2</sup>)-ma<sup>2</sup>x(a<sup>2</sup>m-a<sup>2</sup>x)-i<sup>2</sup>l-lar-la<sup>2</sup>r/i<sup>2</sup>a. Fr., *zygomatiko-maxillaire*. See *MASSETER*.

**ZYGOMATICUM** (Lat.), n. n. Zi<sup>2</sup>g(zu<sup>2</sup>g)-o<sup>2</sup>m(om)-a<sup>2</sup>t(a<sup>2</sup>t'i<sup>2</sup>l)-i<sup>2</sup>l(a<sup>2</sup>l)-u<sup>2</sup>m(u<sup>2</sup>m). See *MALAR BONE*.—**Z. postorius**, *Z. posticum*. See *Quadrato-fugal* BONE (1st def.).

**ZYGOMATICUS** (Lat.), adj. Zig(zu<sup>2</sup>g)-o<sup>2</sup>m(om)-a<sup>2</sup>t(a<sup>2</sup>t'i<sup>2</sup>l)-i<sup>2</sup>l(a<sup>2</sup>l)-u<sup>2</sup>m(u<sup>2</sup>m). Fr., *zygomatikus*. Pertaining to or connected with the zygoma; as a n. m. (Ger., *Jochmuskel*), a muscle so connected, especially the z. major. [a, 48.]—**Z. major**. Ger., *grosser Jochmuskel*. A muscle having its origin in the malar bone near the zygomatic suture and running to the angle of the mouth to be attached to the skin and to be continuous with the orbicularis and depressor anguli oris. [C.]—**Z. minor**. Ger., *kleiner Jochmuskel*. A small muscle which has its origin in the anterior and inferior part of the malar bone and terminates by combining with the outer margin of the levator labii superioris. [C.]

**ZYGOMATIQUE** (Fr.), adj. Ze-go-ma<sup>2</sup>-te<sup>2</sup>k. See *ZYGOMATIC*; as a n. see *ZYGOMATICS*.—**Grand z.** See *ZYGOMATICUS major*.—**Petit z.** See *ZYGOMATICUS minor*.

**ZYGOMATO-AURICULARIS** (Lat.), n. m. Zi<sup>2</sup>g(zu<sup>2</sup>g)-o<sup>2</sup>m(om)-a<sup>2</sup>t(a<sup>2</sup>t'i<sup>2</sup>l)-i<sup>2</sup>l(a<sup>2</sup>l)-o(o<sup>2</sup>)-a<sup>2</sup>r(a<sup>2</sup>n-a<sup>2</sup>r)-i<sup>2</sup>l-k-a<sup>2</sup>l(a<sup>2</sup>l)-i<sup>2</sup>l(a<sup>2</sup>l)-u<sup>2</sup>m(u<sup>2</sup>m). Fr., *zygomato-auriculaire*. 1. See *ATTRAHENS aurem* (in Supplement). 2. A muscle of the lower animals arising from the zygomatic process of the temporal bone and attached to the outside of the base of the concha of the ear. It draws the ear forward. [L.]

**ZYGOMATO-LABIAL** (Fr.), adj. and n. Ze-go-ma<sup>2</sup>-to-la<sup>2</sup>-be-a<sup>2</sup>l. See *ZYGOMATICUS*.

**ZYGOMATO-MAXILLARE** (Fr.), n. Ze-go-ma<sup>2</sup>-to-ma<sup>2</sup>-x-e-la<sup>2</sup>r. See *MASSETER*.

**ZYGOMAXILLARY**, adj. Zig'o-o-ma<sup>2</sup>-x'i<sup>2</sup>-al-i<sup>2</sup>. See *JUGOMAXILLARY*.

**ZYGOMORPHOUS**, adj. Zig-o-mo<sup>2</sup>-rf'u<sup>2</sup>s. Lat., *zygomorphus* (from *zygón*, a yoke, and *μορφή*, form). Of a structure (a flower especially), divisible in only one plane into similar halves. The term is extended by Sachs to cases in which the structure may be bisected in two planes at right angles, the halves of either section being similar to each other but different from those of the other. [a, 35.]

**ZYGOMYCETES** (Lat.), n. m. pl. Zi<sup>2</sup>g(zu<sup>2</sup>g)-o(o<sup>2</sup>)-mi(mu<sup>2</sup>)-set-(kat)/ez(e<sup>2</sup>s). From *zygón*, a yoke, and *μύκης*, a mushroom. Ger., *Jochpilze*. The conjugating *Fungi*; so called because they reproduce sexually by zygospores. In Vine's classification they are a subdivision of the *Phycomycetes*, including the *Chytridiaceae*, *Mucorini*, *Entomophthorae*, and *Ustilaginæ*. [a, 35.]

**ZYGO-OOSPORE**, n. Zig-o-o<sup>2</sup>-o-spor. From *zygón*, a yoke, *óov*, an egg, and *σπορά*, a spore. Of T. J. Parker, a motile zygote formed by the fusion of two similar gametes. [Jour. of the Roy. Micr. Soc., 1890, p. 19 (a, 35).] Cf. *ZYGOSPORE*.

**ZYGO-ORBITAL**, adj. Zig-o-o<sup>2</sup>-rb'i<sup>2</sup>-t'l. Pertaining to the zygoma and the orbit. [a, 48.]

**ZYGOPHYCEÆ** (Lat.), n. f. pl. Zi<sup>2</sup>g(zu<sup>2</sup>g)-o(o<sup>2</sup>)-fi<sup>2</sup>s(fu<sup>2</sup>k)/e<sup>2</sup>-e-(a<sup>2</sup>-e<sup>2</sup>). From *zygón*, a yoke, and *φύκος*, seaweed. A division of the *Chlorophyllophyceæ* consisting of the *Desmidiæ* and *Zygnemæ*. They are unicellular or unbranching filaments, reproducing by zygospores. [a, 35.] Cf. *CONJUGATÆ*.

**ZYGOPHYLLUM** (Lat.), n. n. Zi<sup>2</sup>g(zu<sup>2</sup>g)-o(o<sup>2</sup>)-fi<sup>2</sup>l(fu<sup>2</sup>l)/lu<sup>2</sup>m-(lu<sup>2</sup>m). From *zygón*, a yoke, and *φύλλον*, a leaf. Fr., *zygophylle*, *fabagelle*. Ger., *Doppelblatt*. The typical genus of an order of polypetalous dicotyledons (the *Zygophyllaceæ*, or *Zygophylleæ*) considered by Baillon a series of the *Rutaceæ*. [a, 35.]—**Z. coccineum**, *Z. desertorum*. Fr., *fabagelle écarlate*. A species the aromatic seeds of which are used by the Arabs in place of pepper. [a, 35.]—**Z. fabago**. Fr., *fabagelle officinale* (ou commune), *faux câprier*. Ger., *gemeines Doppelblatt*, *Kochenkapper*. Sp., *gubernadora de México* [Mex. Ph.]. Syrian bean-caper; a native of Asia Minor and northern Africa, having an unpleasant odor and used as an anthelmintic and antisyphilitic. The flower-buds are substituted for capers. The leaves are used externally in rheumatism. [a, 35.]—**Z. portulacoides**, *Z. simplex*. A very foetid species. The leaves are used in ophthalmia and to remove freckles, and the entire plant as an anthelmintic. [a, 35.]

**ZYGOPHYTES**, n. pl. Zig'o-flts. From *zygón*, a yoke, and *φύτον*, a plant. See *ZYGOSPOREÆ*.

**ZYGOSIS** (Lat.), n. f. Zi<sup>2</sup>g(zu<sup>2</sup>g)-os'i<sup>2</sup>a. Gen., *-os'eos (-is)*. From *ζύγωσις*, a balancing. In botany, see *CONJUGATION*.

**ZYGOSPORE**, n. Zig'o-spor. Lat., *zygospóra* (from *zygón*, a yoke, and *σπορά*, a spore. Ger., *Jochspore*. 1. A compound spore formed by the fusion of the protoplasm of two similar cells (gametes). It germinates after a long period of rest. [a, 35.] 2. A fertilized egg-cell. [L, 121.]

**ZYGOSPOREÆ** (Lat.), n. f. pl. Zi<sup>2</sup>g(zu<sup>2</sup>g)-o(o<sup>2</sup>)-spor(spo<sup>2</sup>r)/e<sup>2</sup>-e(a<sup>2</sup>-e<sup>2</sup>). From *zygón*, a yoke, and *σπόρος*, seed. Ger., *Jochsporen*. The zygophytes; of Sachs, *Alga (Zooporeæ, Conjugatæ, and, according to some authors, Falcocineæ) and Fungi (Mycomycetes and Zygomycetes)* reproducing sexually by the confluence of the protoplasmic contents of cells (gametes). The conjugating cells are either free wandering spores, as in the *Zooporeæ* and *Mycomycetes*, or fixed cells, as in the *Conjugatæ* and *Zygomycetes*. [a, 35.]

**ZYGOTE**, n. Zig'ot. From *ζύγωσις*, yoked. 1. In botany, the product of the union of any two reproductive cells (gametes); of some authors, a spore formed by the union of two zoospores. [a, 35.] 2. See *ZYGOSPORE* (2d def.).

**ZYGOZOOSPORE**, n. Zig-o-zo<sup>2</sup>-o-spor. From *zygón*, a yoke, *óov*, an egg, and *σπορά*, a spore. A motile zygospore. [B, 279.]

**ZYLONITE**, n. Zil'o<sup>2</sup>n-it. More properly written *xyloinite* (from *ξύλον*, wood). An American filtering paper prepared from nitrated cellulose with camphor and alcohol; recommended for quantitative analysis. [B, 270 (a, 38).]

**ZYMA** (Lat.), n. f. Zim(zu<sup>2</sup>m)/a<sup>2</sup>. Gr., *ζύμη*. See *FERMENT*.

**ZYMIAD**, n. Zim'a<sup>2</sup>d. Of Farr, the morbid germ of a zymotic disease.

**ZYMASE** (Fr.), n. Ze-ma<sup>2</sup>z. Of Réchamp, a soluble ferment. Diastase in this nomenclature is hordeozymase, trypsin is pancreazymase, and pepsin is gastrozymase.

**ZYME** (Lat.), n. f. Zim(zu<sup>2</sup>m)/e<sup>2</sup>a. Gen., *zym'es*. Gr., *ζύμη* (from *ζέω*, to boil). See *FERMENT*.

**ZYMIC**, adj. Zim'i<sup>2</sup>q. Fr., *zymique*. Ger., *gährungsartig*. Pertaining to fermentation. [B, 78 (a, 14).]—**Z. acid**. Fr., *acide zymique* (ou zymique; ou mancoïque). Ger., *Gährstoffsäure*. Of Plouquet, an acid formed in the fermentation of amylaceous substances, probably a mixture of lactic and butyric acids. [B, 46, 78, 93 (a, 14).]

**ZYMOGEN**, n. Zim'o<sup>2</sup>g-en. From *ζύμη*, a ferment, and *γενέω*, to engender. Ger., *Z.* A ferment extracted from the pancreas. [K, 3.]—**Labz'** (Ger.). A product secreted by the glands of the stomach during digestion and converted into lactic ferment by the action of free acids. [Rev. des sci. méd., Oct. 15, 1888, p. 434 (a, 181).]

**ZYMOGENIC**, adj. Zim-o-je<sup>2</sup>n'i<sup>2</sup>k. Producing fermentation.

**ZYMOLOGY**, n. Zim-o<sup>2</sup>l'o-jî<sup>2</sup>. Lat., *zymologia* (from ζύμη, a ferment, and λόγος, understanding). Fr., *zymologie*. Ger., *Gährungslehre*. The physiology of fermentation. [B, 38, 78, 93 (a, 14).]

**ZYMOMA** (Lat.), n. n. Zi<sup>2</sup>m(zu<sup>4</sup>m)-om'a<sup>3</sup>. Gen., -om'atos (-atis). Gr., ζύμομα. Fr., *zymome*. 1. Leaven, a ferment. 2. An old term for gluten washed with water and alcohol. [L, 41 (a, 14).]

**ZYMOPHYTES**, n. pl. Zim'o-fits. From ζύμη, a ferment, and φυτόν, a plant. Plants that produce fermentation. [a, 35.] Cf. MICROZYMES.

**ZYMOSE**, n. Zim'os. See ZYMASE.

**ZYMOSIS** (Lat.), n. f. Zi<sup>2</sup>m(zu<sup>4</sup>m)-os'i<sup>2</sup>s. Gen., -os'eos (-is). Gr., ζύμωσις (from ζύμη, a ferment). 1. See FERMENTATION. 2. A zymotic disease. [K.]

**ZYMOTECHNY**, n. Zim'o-te<sup>2</sup>k-nî<sup>2</sup>. Lat., *zymotechnia* (from ζύμη, a ferment, τέχνη, art). Fr., *zymotechnie*. Ger., *Gährkunst*, *Braukunst*. The employment of fermentation-processes; the manufacture of products of fermentation (beer, spirit, yeast, etc.).

**ZYMOTHERMÆ** (Lat.), n. f. pl. Zi<sup>2</sup>m(zu<sup>4</sup>m)-o(o<sup>3</sup>)-thu<sup>2</sup>rm- (the<sup>2</sup>rm)/e(a<sup>3</sup>-e<sup>2</sup>). From ζύμη, a ferment, and θερμαι, hot springs. Baths of a warm fermenting fluid. [L, 50 (a, 14).]

**ZYMOTIC**, adj. Zim-o<sup>2</sup>t'i<sup>2</sup>k. Lat., *zymoticus* (from ζύμωσις, fermentation). Fr., *zymotique*. Ger., *gährend*, *zymotisch*. Of diseases, produced by a micro-organism supposed to act as a ferment.

**ZYRBUS** (Lat.), n. m. Zu<sup>2</sup>rb(zu<sup>4</sup>rb)'u<sup>3</sup>s(u<sup>4</sup>s). Written also *zirbi*. See OMENTUM.

**ZYTHOGALA** (Lat.), **ZYTHOGALUM** (Lat.), n's n. Zi<sup>2</sup>th-(zu<sup>4</sup>th)-o<sup>2</sup>g'a<sup>2</sup>l(a<sup>3</sup>l)-a<sup>3</sup>, -u<sup>3</sup>m(u<sup>4</sup>m). Gen., -galac'tos (-tis), -thog'ali. From ζῦθος, beer, and γάλα, milk. Fr., *zythogale*. Ger., *Biermolken*, *Biermilch*. A mixture of beer and boiled milk. [L, 41, 49, 50 (a, 14).]

**ZYTHUM** (Lat.), **ZYTHUS** (Lat.), n's n. and m. Zith(zu<sup>4</sup>th)'/-u<sup>3</sup>m(u<sup>4</sup>m), -u<sup>3</sup>s(u<sup>4</sup>s). Gr., ζῦθος. Of the ancients, a beer prepared from barley and lupines. [a, 35.]

A, ape; A<sup>2</sup>, at; A<sup>3</sup>, ah; A<sup>4</sup>, all; Ch, chin; Ch<sup>2</sup>, loch (Scottish); E, he; E<sup>2</sup>, ell; G, go; I, die; I<sup>2</sup> in; N, in; N<sup>2</sup>, tank;

# SUPPLEMENT.

## AALÄHNLICH ACHILLODYNIA

**AALÄHNLICH** (Ger.), **AALKÖRPERIG** (Ger.), adj's. See ENCHELYSOMUS.

**AALRAUPE** (Ger.), n. See *LOTA vulgaris*.

**ABAISSUR**.—**A. long de la queue**. See *SACROCOCYGEUS inferior*.

**ABASIA** (Lat.), n. f.  $A^2b(a^2b)-a(a^3/si^2-a^3$ . From *a priv* and *baivew*, to walk. Loss or impairment of the power of walking. See *ASTASIA-A.* (in Supplement).—**Paroxysmal trepidant a.** *As-tasia-a.* in which walking is hindered by contradictory movements that stiffen the legs and consist of a sort of trepidation resembling that of spastic paraplegia. [P. C. Knapp, "Jour. of Nerv. and Ment. Dis.," xviii, p. 673 (a, 34).]

**ABAXIAL**, adj.  $A^2b-a^2x/i^2-l$ . See *ABAXILE*.

**ABCÈS**.—**A. ostéopathique**. An abscess due to diseased bone. [a, 18].—**A. spirillaire** [Verneuil]. An abscess containing spirilla from the saliva. ["Sem. méd.," Feb. 13, 1889, p. 51 (a, 18).]

**ABDUCTOR**.—**A. linguae**. See *STYLOGLOSSUS*.—**A. pollicis bicornis**. See *EXTENSOR ossis metacarpi pollicis*.—**A. pollicis brevis alter**, **A. pollicis internus**. The deep head of the flexor brevis pollicis. [L.]

**ABFEGEND**.—For *A'o Mittel* substitute *A'es Mittel*.

**ABFÜHREND**.—For *A'e Mittel* substitute *A'es Mittel*.

**ABGAS**, n. A mediæval Arabo-Latin name for the amnion. [F. B. Stephenson, "N. Y. Med. Jour.," July 24, 1886, p. 92.]

**ABGEDREHT** (Ger.), adj.  $A^2b/ge^2-drat$ . See *INTORTUS*.

**ABGEFLACHT** (Ger.), adj.  $A^2b/ge^2-flach^2t$ . See *DEPLANATE*.

**ABGESCHÄLT** (Ger.), adj.  $A^2b/ge^2-shalt$ . See *DECORTICATED* (1st def.).

**ABGEZOGEN** (Ger.), adj.  $A^2b/ge^2-tsog-e^n$ . See *DISTILLED*.

**ABGHAS** (Ar.), n. See *ABGAS* (in Supplement).

**ABIES**.—**A. pendula**. See *LARIX americana*.—**A. pinus**. See *A. excelsa*.—**A. webbiana**. A species the dried leaves of which (the talispatra of India) are reputed carminative, expectorant, stomachic, tonic, and astringent. [P. L. Simmonds, "Am. Jour. of Pharm.," Sept., 1890, p. 471].—**Cerevisia abietis**. See *SERUCE beer*.—**Gemmæ abietis**. The young sprouts of *Picea vulgaris*. [B. 190 (a, 24)].—**Hydrolatum gemmarum abietis**. See *Eau distillée de bourgeon de PIN*.—**Lacrimæ turionum abietis**. Resin from the scales of fir-cones. ["Proc. of the Am. Pharm. Assoc.," xxix (a, 39).]

**ABJUNCTION**, n.  $A^2b-ju^n2k/shu^n$ . From *abjungere*, to un-yoke. Separation by a joint, as that of spores from a growing hypha in some *Fungi*. [a, 35.]

**ABLENKUNG** (Ger.), n.  $A^2b/le^n2k-un^2$ . See *DEFLECTION*.

**ABORTION**.—**Tubal a.** The escape of a fertilized ovum from the oviduct through its ostium abdominale into the peritoneal cavity. [A, 542.]

**ABRICOTIER** (Fr.), n.  $A^2-bre-ko-te-a$ . See *PRUNUS armeniaca*.

**ABRIN**, n.  $A^2b/ri^2n$ . A glucoside obtained from *Abrus precatorius*; supposed to be its poisonous principle. [B.]

**ABRUS**.—**Radix abri**. Fr., *réglisse d'Amérique*. The long woody root of *A. precatorius*. It has a peculiar unpleasant odor and a bitterish, acrid taste; used as a substitute for licorice, and in the Indian bazaars found mixed with the latter. [B, 18 (a, 35).]

**ABSATZ** (Ger.), n.  $A^2b/za^2ts$ . See *APOTHEME*.

**ABSCÈS**.—**Gas-a.** See *Tympanitic a.*—**Gelenka'** (Ger.). See *ARTHRALPOSTEMA*.—**Senkunga's'** (Ger.). 1. A wandering a. 2. A burrowing a.

**ABSCUSSUS**.—**A. carniformis**. Of Severinus, a hard and compact species of sarcoma affecting joints. [L, 50 (a, 34).]

**ABSCHNITT** (Ger.), n.  $A^2b/shni^2t$ . See *SEGMENT*.

**ABSTEHEND** (Ger.), adj.  $A^2b/sta-e^2nd$ . See *PATENT* (1st def.).

**ABSTERGENT**.—For *abstergirende* substitute *abstergirendes*.

**ABWASCHUNG** (Ger.), n.  $A^2b/va^2sh-un^2$ . See *ELUTRIATION*.

**ABZIEHER** (Ger.), n.  $A^2b/tse-e^2r$ . An abductor.

**ACACIA**.—**A. acapulcensis** [Kunth]. Sp., *tepeguaje* [Mex. Ph.]. A Mexican species. The bark is rich in tannin, and a gum that exudes from it is used like gum arabic. [J. M. Maisch, "Am. Jour. of Pharm.," Mar., 1886, p. 122].—**A. cavenia**. The *cavenia* of the Chilians: the cavan-tree; a species with fragrant flowers and nauseous seeds. The stem and branches yield a gum. [a, 35].—**A. glutaphylla**. A species found on the Somali coast, yielding gum arabic. [a, 35].—**A. grandiflora**. See *ANNESLEA grandiflora*.

**ACALYPHA**.—**A. prunifolia**. Sp., *yerba del pastor* [Mex. Ph.]. A Mexican species, used in decoction as a vulnerary. [J. M. Maisch, "Am. Jour. of Pharm.," Apr., 1886, p. 168.]

**ACANTHUS**.—**A. germanicus**. See *CENTAUREA benedicta*.

**ACARUS**.—**A. eruditus**. See *CHEYLETUS eruditus*.—**A. nidu-lans**. A species parasitic on small birds, sometimes found on man. [L, 15].—**A. reduvius**. See *IXODES reticulatus*.

**ACCESSIFLEXOR** [Coues] (Lat.), n. m.  $A^2k(a^2k)-se^2s(ke^2s)-si^2-fla^2x/o^2r$ . Gen., *-or'is*. A muscle that is accessory to a flexor muscle. The lumbricales, ancillary to the tendons of the flexor perforans, are divided into the a. indicis, the a. medii, the a. annularis, and the a. minimi. The flexor digitorum accessorius becomes the a. digitorum, and the pedal lumbricales become the a. secundi, the a. tertii, the a. quarti, and the a. quinti. ["Med. Rec.," 1887, vol. xxxii, p. 126 (a, 34).]

**ACCESSISPINAL**, n.  $A^2k-se^2s/si^2-spi^n'l$ . Of Coues, a muscle that is accessory to a spinal muscle. [a, 34.]

**ACCESSORIUS**.—**A. tragi**. See *PYRAMIDALIS auriculæ*.

**ACCOUCHEMENT**.—**A. de crâne**. See *Vertex DELIVERY*.—**A. de face**. See *Face DELIVERY*.—**A. de tête**. See *Head DELIVERY*.—**A. par le siège**. See *Breech LABOR*.

**ACER**.—**A. campestre**. Fr., *érable champêtre* (ou commun), *auzeraule*, *petit érable*, *bois chaud*. Ger., *Feldahorn*, *Massholder*. Common European (or field-) maple, dog-oak, maser-tree of Europe and central Asia. The wood furnishes the best charcoal. The bark was formerly used medicinally like elm-bark. [a, 35].—**A. dasy-carpum**. Fr., *érable blanc* (ou à fruit) *cotonneux*. Silver (or soft, or white) maple of North America. The sap yields sugar, but in smaller proportions than the other sugar-maples. [a, 35].—**A. ne-gundo**. See *NEGUNDO aceroides*.—**A. platanoides**. Fr., *érable à feuilles de platane*, *faux sycomore*, *érable plane*. Ger., *Lehne*. Norway (or platanus-leaved) maple. Its properties are like those of *A. pseudo-platanus*. [a, 35].—**A. pseudo-platanus**. Fr., *syco-more*, *grand érable*, *érable blanc*. Ger., *Bergahorn*, *weisser Ahorn*. Greater maple, common sycamore of Europe, plane of Scotland. The sap, which yields in early spring some sugar and in Scotland is sometimes made into wine, was formerly used as an antiscorbutic and in diseases of the skin and urinary organs. [a, 35].—**A. tar-taricum**. A bushy shrub or tree of southeastern Europe and central Asia. The fruits have been used, under the name of *samaræ aceris tartarici*, in intermittent fever. [a, 35.]

**ACESIMUS** (Lat.), adj.  $A^2s(a^2k)-e^2s/i^2m-u^2s(u^2s)$ . Gr., *ἀκέσιμος*. Wholesome, curative. [A, 311.]

**ACETAS**.—**Unguentum acetatis plumbici compositum** [Dan. Ph., Norw. Ph.]. An ointment of 2 parts of saffron, 4 of camphor, 8 of oil of hyoscyamus, and 36 of ointment of lead acetate. [B, 95 (a, 38).]

**ACETOPHENETIDINE**, n.  $A^2s'e^2t-o-fe^2n-e^2t/i^2d-en$ . Fr., *acétophénétidine*. See *PHENACETINE*.

**ACETOPHENONE**, n.  $A^2s-e^2t-o-fe^2n/on$ . Fr., *acétophénone*. See *HYPNOSE* and *PHENYLMETHYL ketone*.

**ACETOSELLA**.—**Kali acetosella**. See *POTASSIUM binox-alate*.

**ACETOXIME**, n.  $A^2s-e^2t-o^2x'em$ . Fr., *acétorime*. An oxime substitution product of an acetone. [Paschisch, Obermayer, "Mutsch. f. Chem.," xiii, p. 451; "Rev. des sci. méd.," Jan., 1893, p. 92.]

**ACETPHENETIDINE**, n.  $A^2s'e^2t-fe^2n-e^2t/i^2d-en$ . See *PHEN-ACETINE*.

**ACETYLPHENYLHYDRAZINE**, n.  $A^2s'e^2t-i^2l-fe^2n-i^2l-hid'-ra^2z-en$ . See *HYDRACETIN*.

**ACHATINA** (Lat.), n. f.  $A^2k(a^2ch^2)-a^2t(a^2t)-i(e)/na^2$ . See *AGA-TINE*.

**ACHETA** (Lat.), n. m.  $A^2k(a^2ch^2)/e^2t-a^2$ . Gr., *ἀχέτα, ἡχέτης*. Ger., *Heimchen*. The typical genus of a family (*Achetidae*; Ger., *Achetiden*) of saltatory orthopterous insects (crickets) having very long slender legs, and wings and wing-covers which fold horizontally. [a, 35].—**A. campestris** [Fabr.]. Ger., *Feldheimchen*, *Feldgrille*. The field-cricket, used like *A. domesticus*. [a, 35].—**A. domesticus**. Ger., *Hausgrille*, *Hausheimchen*. The house-cricket; formerly used as a laxative and recently recommended (the expressed juice) in darkening or discoloration of the cornea. [a, 35.]

**ACHILLODYNIA** (Lat.), n. f.  $A^2k(a^2ch^2)-i^2l'/o(lo)^2-d'i^2n-(du^2n)/i^2-a^2$ . From *Ἀχιλλεύς* (see *TENDO Achillis*), and *δύσιν*, pain. Fr., *achillodynie*. Ger., *Achillodynie*. A morbid state characterized by great pain at the point of insertion of the tendo Achillis on walking or standing, together with thickening of the tendon at that point. [Albert, "Wien. med. Presse," 1892, p. 41; "Gaz. hebd. de méd. et de chir.," Jan. 28, 1893, p. 47.]

**ACHONDROPLASIA** (Lat.), n. f.  $A^2k(a^2ch^2)-o^2n^{\circ}/dro(dro^2)-pla^2/zi^2(si^2)-a^2$ . From a priv.,  $\chi\acute{o}\nu\delta\acute{o}\varsigma$ , cartilage, and  $\pi\acute{\lambda}\alpha\sigma\sigma\epsilon\upsilon\nu$ , to mold. Micromelic rickets; fetal rachitis with disturbances of endochondrial ossification. ["Edinb. Med. Jour.," Dec., 1891, p. 579 (a, 34).]

**ACHROMATURIA** (Lat.), n. f.  $A^2k(a^2ch^2)-rom-a^2t(a^2t)-u^2$ . ( $u^1$ ) $ri^2-a^2$ . From a priv.,  $\chi\acute{\rho}\acute{o}\mu\alpha$ , color, and  $\acute{o}\upsilon\rho\omicron\nu$ , urine. Colorlessness of the urine. [A, 34.]

**ACHROMOPHOUS**, adj.  $A^2k-rom-o^2f/i^2-u^2s$ . From a priv.,  $\chi\acute{\rho}\acute{o}\mu\alpha$ , color, and  $\phi\acute{\iota}\lambda\epsilon\iota\nu$ , to love. Ger., *achromophil*. See **ACHROMATIC** (2d def.).

**ACHYRANTHES**.—**A. calea**. Of Ibañez, a Mexican species with ovoid-lanceolate leaves, and small hermaphrodite flowers arranged in woolly glomerules. [B, 224 (a, 14).]—**A. prostrata**. The *Pupalia prostrata*. [a, 35.]

**ACID**.—**Sozolic a.** See **ASEPTOL**.

**ACIDE**.—**A. anilidé**. An acid compounded with aniline in the same way that an amido-acid is with ammonia. [B, 46.]

**ACIDE NITRIQUE** (Fr.), n.  $A^2$ -sed ne-trek. Nitric acid.—**Liparolé d'a. n.** See **ADEPS oxygenatus**.

**ACNE**.—**A. of the throat**. See **FOLLICULAR PHARYNGITIS** and **FOLLICULAR ANGINA**.

**ACNÉ**.—**A. chéloïdienne**. See **DERMATITIS papillaris capilliti**.—**A. des cachectiques**. See **ACNE cachecticorum**.

**ACNEMIA**.—**2. Fr.**, *aknémie*. Absence of the lower limbs. [L, 49.]

**ACNISTUS** (Lat.), n. m.  $A^2k(a^2k)-ni^2st/u^2s(u^4s)$ . From a priv. and  $\kappa\acute{\nu}\iota\varsigma\epsilon\nu$ , to irritate. Fr., *acniste*. A genus of tropical American solanaceous shrubs or trees. [a, 35.]—**A. aggregatus**. **A. arborescens**. Very poisonous West Indian species, by some authors considered identical. The second, known as deadly dwale, is not to be confounded with *Atropa belladonna*. [B, 114; a, 35.]—**A. Plumieri**. A species growing in the Island of Martinique; a small shrub with oblong-lanceolate leaves and clusters of white flowers. [a, 35.]

**ACONINE**, n.  $A^2k/o^2n-en$ . A base,  $C_{26}H_{41}NO_3$ , obtained when aconitine undergoes hydrolysis; hygroscopic, brittle, and uncrystallizable. Its physiological action is unknown. ["Am. Jour. of Pharm.," Apr., 1892, p. 209 (a, 34).]

**ACONITE**.—**Country a.**, **Wild a.** The *Gloriosa superba* or its root. [a, 35.]

**ACONITUM**.—**A. cæruleum**. The *A. napellus* or other blue-flowered species of *A.* [a, 35.]—**A. cammarum**. 1. Of Jacquin, the *A. bernhardianum*. The tuberous roots, formerly official in the Paris Codex, are less virulent than those of *A. napellus*. 2. Of Linnaeus, *A. stoerkianum*. [a, 35.]—**A. salutariferum**. 1. See *A. anthora*. 2. The *Paris quadrifolia*. [a, 35.]—**A. tragacetonum**. The *A. lycoctonum*. [a, 35.]

**ACONOUS** (Grenacher), adj.  $A^2k-on/u^2s$ . From a priv., and  $\kappa\acute{o}\nu\omicron\varsigma$ , a cone. Of a compound eye, having the cells which usually give rise to the crystalline cones remaining uncoalesced. [L.]

**ACONURESIS** (Lat.), n. f.  $A^2k(a^2k)-o^2n(om)-u^2r(ur)-es(as)/i^2s$ . Gen.,  $-es^2eos(-is)$ . From  $\acute{\alpha}\kappa\omega\nu$ , involuntary, and  $\acute{o}\upsilon\rho\eta\sigma\iota\varsigma$ , urination. Of Gouley, involuntary urination. [a, 34.]

**ACROMEGALY**, n.  $A^2k-ro-me^2g/a^2l-i^2$ . Lat., *acromegalia* (from  $\acute{\alpha}\kappa\rho\omicron\nu$ , an extremity, and  $\mu\acute{\epsilon}\gamma\alpha\varsigma$ , great). Fr., *acromégalie*. Ger., *Akromegalie*. Lit., hypertrophy of the extremities (face, hands, and feet); a disease characterized, especially in its early stages, by enlargement of one or more of those parts, with mental dullness, fatigue, and severe neuralgic pains in the head and extremities. [a, 34.]

**ACROMICRIA** (Lat.), n. f.  $A^2k(a^2k)-ro(ro^2)-mi^2k/ri^2-a^2$ . From  $\acute{\alpha}\kappa\rho\omicron\nu$ , an extremity, and  $\mu\acute{\iota}\kappa\rho\acute{o}\varsigma$ , small. Abnormal smallness of one or more of the extremities. [a, 34.]

**ACROPARÆSTHESIA** (Lat.), n. f.  $A^2k(a^2k)-ro(ro^2)-pa^2r-(pa^2r)-e^2s(a^2t-e^2s)-thez(thas)/i^2-a^2$ . From  $\acute{\alpha}\kappa\rho\omicron\nu$ , an extremity (see also **PARÆSTHESIA**). Of Laquer, paræsthesia affecting the extremities. [a, 34.]

**ACROSTICHUM**.—**A. radiatum**. See *A. dichotomum*.

**ACTE**.—**Grana actes**. The berries of *Sambucus nigra*. [a, 35.]

**ACUMEN**.—**A. ossis sacri**. See **COCCYX**.

**ACUS**.—**A. ossea**. The styloid process of the temporal bone. [L, 349.]

**ADDUCTEUR**.—**A. oblique du quatrième os du métacarpe**. See **OPPONENS minimi digiti**.

**ADDUCTOR**.—**A. hallucis, caput obliquum** [Ger. Anat. Soc.]. See *A. hallucis obliquus*.—**A. hallucis, caput transversum** [Ger. Anat. Soc.]. See *A. hallucis transversalis*.

**ADELPHOTAXY**, n.  $A^2d-e^2l/f^2o-ta^2x-i^2$ . From  $\acute{\alpha}\delta\epsilon\lambda\phi\acute{o}\varsigma$ , a brother, and  $\tau\acute{\alpha}\xi\iota\varsigma$ , arrangement. The tendency of motile cells to assume definite positions. [L.]

**ADENITIS**.—**A. calculeosa**. Calcareous degeneration and inflammation of a lymph node. [a, 34.]

**ADENOMA**.—**A. gelatinosum**. Ger., *Gallertkropf*. See **COLLOID GOITRE**.

**ADENOPHORE**, n.  $A^2d/e^2n-o-for$ . From  $\acute{\alpha}\delta\eta\nu$ , a gland, and  $\phi\acute{o}\rho\acute{o}\varsigma$ , bearing. A stalk bearing a nectar gland. [B, 229 (a, 35).]

**ADENOSARCORRHABDOMYOMA** (Lat.), n. n. Gen.,  $-om^2atos(-atis)$ . From  $\acute{\alpha}\delta\eta\nu$ , a gland,  $\sigma\acute{\alpha}\rho\acute{x}$ , flesh,  $\rho\acute{\alpha}\beta\delta\acute{o}\varsigma$ , a rod, and  $\mu\acute{\upsilon}\varsigma$ , a muscle. A neoplasm containing the elements of adenoma, sarcoma, and rhabdomyoma. [a, 34.]

**ADEF**.—**A'kuchen**. See **PLACENTA**.—**Hohla'**. See the major list.—**Kegela'**. See **BRACHIAL ARTERY**.—**Königs'**. See **BASIC VEIN**.—**Kopfarma'**. See **INNOMINATE VEIN**.—**Leberpforta'**. See

**Portal vein**.—**Lufta'**. See **TRACHEA**.—**Milcha'**. See **LACTEAL (n.)**.—**Milchbrusta'**. See **THORACIC DUCT**.—**Zorna'**. The frontal vein.

**ADESMOSIS**.—**Adesmoses of the skin**. Ger., *Adesmosen der Haut*. Of Auspitz, an order of skin diseases of the class of *Chorioblastoses*, comprising those characterized by atrophy or defective development of the connective tissue of the skin. They include *Liodermia essentialis* and *Striae atrophice cutis*. [G, 4.]

**ADLEMMORRHYSIS** (Lat.), n. f.  $A^2d(a^2d)-i(i^2)-e^2m(a^2-e^2m)-o^2r/ri^2(ru^2)-si^2s$ . Gen.,  $-rhy^2eos(-or^2rhy^2sis)$ . From a priv.,  $\acute{\alpha}\delta\acute{\alpha}$ , through,  $\acute{\alpha}\lambda\mu\alpha$ , blood, and  $\pi\acute{\upsilon}\rho\iota\varsigma$ , a flowing. A failure of the blood to circulate through the vessels in consequence of intrinsic or extrinsic obstruction. [a, 34.]

**ADIN**, n. See **BUBO**.

**ADIPOSIS**.—**A. dolorosa**. Of F. X. Dercum, an obscure disease in which there are fatty swellings occurring in different regions, with pain. [a, 34.]

**ADJUNCTION**, n.  $A^2d-ju^2n^2k/shu^2n$ . Lat., *adjunctio* (from *adjungere*, to add). The act of joining or state of being joined [a, 34.]

**ADULESCENS**. For **ADOLESCENS** substitute **ADOLESCENT**.

**ADULESCENTIA**. For **ADOLESCENTIA** substitute **ADOLESCENCE**.

**ADVANCEMENT**.—**A. of Tenon's capsule**. See **Capsular a.**

**ADZUKE** (Jap.), n. A small, red laxative and diuretic bean, used (alone or mixed with rice) by the Japanese as a remedy for beri-beri. [D. B. Simmons (a, 35).]

**ÆDEOMANIA** (Lat.), n. f.  $E^2d(a^2-e^2d)-e^2(o^2-e^2)-o(o^2)-ma(ma^2)/ni^2-a^2$ . From *aidōia*, the genitals, and *mania*, madness. See **EROTOMANIA**.

**ÆGITHOGNATHISM**, n.  $E^2j-i^2-tho^2g/na^2th-i^2zm$ . From  $\acute{\alpha}\gamma\theta\acute{o}\varsigma$ , the hedge-sparrow, and  $\gamma\acute{\nu}\alpha\theta\acute{o}\varsigma$ , the jaw. The condition of the *Ægithognathæ*; having a broad vomer truncated in front, its cleft posterior extremity including the sphenoidal rostrum. [a, 34.]

**ÆR**.—**A. hepaticus**. Hydrogen sulphide. [B.]—**A. phlogisticatus**. Nitrogen. [B.]

**ÆROPLETHYSMOGRAPH**, n.  $A^2/e^2r(ar)-o(o^2)-ple^2th-(plath)-i^2z-mo-gra^2f$ . From  $\acute{\alpha}\eta\rho$ , air,  $\pi\lambda\eta\theta\upsilon\sigma\mu\acute{o}\varsigma$ , increase, and  $\gamma\acute{\alpha}\rho\phi\epsilon\nu$ , to write. Ger., *A.* A pneumograph, consisting of a large air chamber connected by a tube to an animal's trachea, and suitable connections by which simultaneous tracings of the movements of the inspired and expired air are obtained on a revolving cylinder. [J, 53.]

**ÆTAS**.—**Æ. florens**. Adolescence.

**ÆTHYLATUS** (Lat.), adj.  $E^2th(a^2-e^2th)-i^2l(u^1l)-at(a^2t)/u^2s(u^4s)$ . Combined with or containing ethyl. [B.]

**AFFECTIVE**, adj. Pertaining to the affections or to mental emotions. [a, 34.]

**AFFECTUS**.—**A. epidemicus liedensis**. Of Sylvius, see **Intermittent fever**.

**AFTER**.—**Rusconi'scher A.** See **BLASTOPORE**.

**AGARICUS**.—**A. aggregatus** [Bulliard]. Fr., *chair de Bavière*. A species used as a food in Germany. [B, 88.]—**A. albo-rufus**. Fr., *aloumère*, *agaric du sureau*, *jahuguère*. An edible species found in southern France. [a, 35.]

**AGATHIN**, n.  $A^2g/a^2th-i^2n$ . From  $\acute{\alpha}\gamma\alpha\theta\acute{o}\varsigma$ , good. A proprietary name for salicylmethylphenylhydrazine, used in neuralgia. [a, 34.]

**AGENOUILLE** (Fr.), adj.  $A^2-zhe^2-nu-el-ya$ . See **GENICULATE**.

**AGGLUTINATIO**.—**A. squamæformis**. See **False suture**.

**AGNINE**, n.  $A^2g^2-nen$ . From *agnus*, a lamb. A proprietary name for a fat prepared from sheep's wool. [a, 34.]

**AGRAPHIA**.—**A. amnemonica**. A. in which letters or words can be written but, in consequence of loss of memory, are not expressive. [A, 540 (a, 34).]—**A. atactica**. A. in which the power of writing the separate letters is lost, in consequence of loss of muscular co-ordination. [A, 540 (a, 34).]

**AGRYPNIC**, adj.  $A^2g-ri^2p/i^2n^2k$ . From  $\acute{\alpha}\gamma\rho\epsilon\iota\nu$ , to search for, and  $\acute{\upsilon}\nu\eta\omicron\varsigma$ , sleep. Pertaining to or affected with insomnia. [a, 34.]

**AICHMOPHOBIA** (Lat.), n. f.  $A^2/i^2k(i^2ch^2)-mo(mo^2)-fob(fo^2b)/i^2-a^2$ . From  $\acute{\alpha}\chi\mu\eta$ , the point of a spear, and  $\phi\acute{o}\beta\acute{o}\varsigma$ , fear. Of Magnar, morbid fear of being touched. [a, 34.]

**AIGRETTE**.—**A. simple**. See **HAPLOPAPPUS** (1st def.).

**AIL**.—**Horn-a**. An anæmic disease of horned cattle; so-called on account of the horns being abnormally cold. [L.]

**AKAMPSIE** (Ger.), n. For this and similar words, see **ACAMP-SIA**, etc.

**AKATAMATHESIA** (Lat.), n. f.  $A^2(a^2)-ka^2t(ka^2t)-a^2-ma^2th-(ma^2th)-ez(as)/i^2-a^2$ . From a priv., and  $\kappa\alpha\tau\alpha\mu\alpha\nu\theta\acute{\alpha}\nu\epsilon\upsilon\nu$ , to understand. Inability to understand ordinary conversation; observed in some forms of insanity. [A, 540 (a, 34).]

**ALA**.—**Alæ atlantis**. Ger., *Flügel des Atlas*. The transverse processes of the atlas. [L, 44.]—**A. lobus centralis**. A lateral part of the lobus centralis cerebelli. [a, 18.]

**ALABASTRINE**, n.  $A^2l-a^2-ba^2st^2ren$ . A proprietary name for naphthalene. [a, 34.]

**ALAGAO**.—Omit 2d def.

**ALBICATUS** (Lat.), adj.  $A^2lb(a^2lb)-i^2k-at(a^2t)/u^2s(u^4s)$ . From *albicare*, to make white. See **ETIOLATED**.

**ALBOLINE**, **ALBOLIN**, n's.  $A^2lb/o^2l-en,-i^2n$ . From *albus*, white, and *oleum*, oil. A purified, nearly colorless ointment base, supposed to be purified vaseline.

**ALBUMIN.**—Storage a. A. stored in the tissues. [L.]

**ALBUMINURIA.**—A. *acetonica*. See *NEPHRITIS acetonica*.—A. *renalis*. Nephrogenous a. [L.]—**Hepatic a.** A. due to a retrograde metamorphosis of albuminoids in the processes of digestion and assimilation, to liver disease, or to a consumption of albuminoids in excess of the capabilities of the liver. [a, 34.]

**ALCAROME**, n. A<sup>21</sup>/ka<sup>2</sup>r-om. An aromatic liquor, recommended by R. Rother as a base for elixirs, prepared by removing the shells from 3 drachms of cardamoms, triturating the grains to a fine powder, mixing with 4 drachms each of finely powdered coriander and magnesium carbonate, and 10 drops of oil of cassia, digesting for several days with a mixture of 2 pints of alcohol and 4 pints of water, shaking occasionally, filtering, and adding enough alcohol to produce 6 pints. [“Proc. of the Am. Pharm. Assoc.,” xxxv (a, 14).]

**ALCEDO** (Lat.), n. f. A<sup>21</sup>/(a<sup>21</sup>)-sed(kad)<sup>o</sup>. Gen., -ced<sup>o</sup>/inis. Ger., *Eisvogel*, *Königfischer*. The typical genus of the *Alcedinidae* (the *Halconidae*). [a, 35.]—A. *ispida*. Ger., *gemeiner Eisvogel* (oder *Königfischer*). The kingfisher, the halcyon (*Alcyon*) of the ancients. Its dried heart (*cor alcedinis*) was formerly worn by children, not only to prevent but to cure epilepsy. [a, 35.]

**ALCOHOL.**—**Perfumers' a.** A very high grade of a. (ethyl a.) in the manufacture of which fusel oil and other foreign substances have been destroyed by the use of manganic acid or potassium (or sodium) permanganate. [a, 35.]

**ALEXIN**, n. A<sup>21</sup>-e<sup>2</sup>x/i<sup>2</sup>n. From *ἀλέξιν*, to defend. Of H. Buchner, an unstable albuminous body, of complicated structure, that may be isolated from a cultivation of a specific micro-organism and when injected into the body produces an acquired immunity to the disease produced by that organism. [a, 34.]

**ALEXOCYTE**, n. A<sup>21</sup>-e<sup>2</sup>x-o-sit. Of Hankin, an eosinophilous leucocyte. [a, 34.]

**ALGOGENIC**, adj. A<sup>21</sup>-go-je<sup>2</sup>n/i<sup>2</sup>k. From *ἄλγος*, pain (1st def.), or *algere*, to be cold (2d def.), and *γεννᾶν*, to engender. Fr., *allogène*. 1. Giving rise to neuralgic pain (said by E. C. Seguin of certain areas on the head and face that often become hyperæsthetic as a case of trigeminal neuralgia approaches cure, and, if irritated, cause a momentary return of the neuralgia in greater or lesser severity). [“N. Y. Med. Jour.,” Apr. 26, 1890, p. 449.] 2. Causing reduction of the bodily temperature below the normal. [a, 18.]

**ALGOGÉNINE** (Fr.), n. A<sup>21</sup>-go-zha-nen. A substance extracted from fermented animal matter that produces, when administered to animals, a decided fall of temperature. [a, 34.]

**ALINJECTION**, n. A<sup>21</sup>-i<sup>2</sup>n-je<sup>2</sup>k/shu<sup>2</sup>n. From *alcohol* and *injection*. Of B. G. Wilder, a process of repeatedly injecting anatomical specimens with alcohol.

**ALKADERMIC**, adj. A<sup>21</sup>-ka<sup>2</sup>-de<sup>2</sup>rm/i<sup>2</sup>k. From *alkali* (q. v.), and *δέρμα*, skin. Containing an alkaloid for hypodermic medication. [a, 34.]

**ALKALESCENCE.**—A. of the humors. Fr., *alkalescence des humeurs*. A peculiar disposition of the system, characterized by a tendency to putrid or alkaline fermentation. [B, 38.]

**ALKALOID.**—*Leichena'* (Ger.). See *PROMAINE*.

**ALKAMETRIC**, adj. A<sup>21</sup>-ka<sup>2</sup>-me<sup>2</sup>t/r*i*<sup>2</sup>k. Containing a metric dose of an alkaloid. [a, 34.]

**ALKANET.**—A. *paper*. A test paper prepared by soaking in an ethereal tincture of a. [L.]

**ALKATRIT**, n. A<sup>21</sup>/ka<sup>2</sup>-tri<sup>2</sup>t. From *alkali* (q. v.), and *terere*, to rub. A triturate containing an alkaloid. [a, 34.]

**ALLOGAMY**, n. A<sup>21</sup>-lo<sup>2</sup>g/a<sup>2</sup>m-i<sup>2</sup>. From *ἄλλος*, other, and *γάμος*, marriage. Lat., *allogamia*. In botany, cross-fertilization. [a, 35.]

**ALOCASIA.**—A. *indica*. A species growing in Borneo with a large underground tuber from which springs a cluster of leaves 1 foot or more in length and of a metallic bronze color on their upper surface. [a, 35.]—A. *macrorrhiza*. Roasting cocoa; a species found in the East Indies and Molucca Islands. The root-stock is eaten cooked. [a, 35.]—A. *odora* (*odorata*). A species found in Pegu with a powerfully acrid juice. The lower surface of the leaf secretes a waxy substance. [a, 35.]

**ALOËS.**—*Pilules d'a. et de galbanum*. See *PILULÆ gummo-lacativæ*.—*Pilules d'a. et d'opium*. See *PILULÆ anglycæ*.

**ALOPÉCIE.**—A. *innominée*. See *FOLLICULITIS decalvans*.

**ALUMNOL**, n. A<sup>21</sup>/u<sup>2</sup>n-no<sup>2</sup>l. A salt containing about fifteen per cent. of silver and five per cent. of aluminium; a fine white powder, soluble in water, in glycerin, and in alcohol; used as a topical antiseptic. [a, 34.]

**AMARYLLISME** (Fr.), n. A<sup>2</sup>-ma<sup>2</sup>-re-lezm. Yellow fever. [a, 18.]

**AMAXOPHOBIA** (Lat.), n. f. A<sup>2</sup>m(a<sup>2</sup>m)-a<sup>2</sup>x(a<sup>2</sup>x)-o(a<sup>2</sup>)-fob-(fob)<sup>o</sup>/i<sup>2</sup>a<sup>2</sup>. From *ἄμαξα*, wagon, and *φόβος*, fear. A morbid fear of being in a wagon or cart. [A, 510 (a, 34).]

**AMEBA.**—A. *malariae*. See *PLASMODIUM malariae*.

**AMOMUM.**—A. *medium*. A species the aromatic stimulant fruits of which are known as *evold China cardamoms*. [a, 35.]

**AMORPHOPHALLUS.**—A. *lyratus*. A species growing in the Circar Mountains. The roots are acrid but are eaten boiled. [a, 35.]

**AMPHOPHILE**, adj. A<sup>2</sup>m/fo-fi<sup>2</sup>l. From *ἄμφο*, both, and *φιλεῖν*, to love. Having an affinity both for acid eosin and for basic methyl blue. [a, 34.]

**AMPULLA.**—A. of *Lorenzini*. Fr., *ampoule de Lorenzini*. The dilated internal extremity of the tubes of *Lorenzini*. [L, 158.]

**AMYLOGENIC**, adj. A<sup>2</sup>m-i<sup>2</sup>l-o-je<sup>2</sup>n/i<sup>2</sup>k. Producing starch. [a, 35.]

**AMYLOPLASTS**, n. A<sup>2</sup>m/i<sup>2</sup>l-o-pla<sup>2</sup>sts. From *ἄμυλον*, starch, and *πλασσειν*, to form. Leucoplastids. [B, 291 (a, 35).]

**ANABOLIC**, adj. A<sup>2</sup>n-a<sup>2</sup>-bo<sup>2</sup>i/i<sup>2</sup>k. Pertaining or relating to anabolism. [a, 33.]

**ANABOLISM**, n. A<sup>2</sup>n-a<sup>2</sup>-b*o*<sup>2</sup>i-i<sup>2</sup>zm. From *ἀναβάλλειν*, to throw up. That form of metabolism in which a substance is transformed into one more complex or more highly organized. [a, 35.]

**ANACAMPTOMETER**, n. A<sup>2</sup>n-a<sup>2</sup>-ka<sup>2</sup>mp-to<sup>2</sup>m/e<sup>2</sup>t-u<sup>2</sup>r. From *ἀνακάμπτειν*, to bend back, and *μέτρον*, a measure. Of Duprat, an instrument for measuring reflexes. [“Compt. rend. soc. d. biol.,” 1886, iii, p. 151 (a, 34).]

**ANÆMIA.**—**Fæcal a.** A. due to self-intoxication caused by deficient intestinal action; stercoræmia. [a, 34.]

**ANÆSTHESIA.**—**Genital a.** Absence of the special sensation accompanying coition. [a, 34.]

**ANALGENE**, n. A<sup>2</sup>n-a<sup>2</sup>l/jen. Orthooxyethylanamonoacetyl-amidoquinoline, a white crystalline powder derived from oxyquinoline. Used as an antirheumatic. [a, 34.]

**ANALGÉSINE** (Fr.), n. A<sup>2</sup>-na<sup>2</sup>-l-zha-zen. A name proposed for antipyrine manufactured in France, to evade the copyright of the name antipyrine.

**ANANTOCHASMUS** (Lat.), adj. A<sup>2</sup>n(a<sup>2</sup>n)-a<sup>2</sup>nt(a<sup>2</sup>nt)-o(o<sup>2</sup>)-ka<sup>2</sup>z(ch<sup>2</sup>a<sup>2</sup>s)/mu<sup>2</sup>s(mu<sup>2</sup>s). From *ἀναπτα*, up-hill, and *χάσμα*, a chasm. Having the line connecting the punctum spinæ nasalis posterioris and the punctum foraminis magni anterius making an angle of from -14° to -1° with the radius fixus. [Lissauer (a, 48).] Cf. figure under CATANTOSTOMUS.

**ANANTOPYLUS** (Lat.), adj. A<sup>2</sup>n(a<sup>2</sup>n)-a<sup>2</sup>nt(a<sup>2</sup>nt)-p*yl*<sup>2</sup>/i<sup>2</sup>(u<sup>2</sup>l)-u<sup>2</sup>s(u<sup>2</sup>s). From *ἀναπτα*, up-hill, and *πύλη*, a gate. Having the line connecting the punctum foraminis magni anterius and the punctum foraminis magni posterius making an angle of from 0° to -75° with the radius fixus. [Lissauer (a, 48).]

**ANANTURANISCUS** (Lat.), adj. A<sup>2</sup>n(a<sup>2</sup>n)-a<sup>2</sup>nt(a<sup>2</sup>nt)-u<sup>2</sup>r-(u<sup>2</sup>r)/a<sup>2</sup>n(a<sup>2</sup>n)-i<sup>2</sup>sk/u<sup>2</sup>s(u<sup>2</sup>s). From *ἀναπτα*, up-hill, and *ὀσφρανισκος*, the palate. Having the line connecting the punctum præmaxillare and the punctum foraminis incisivi making an angle of from -18° to 0° with the radius fixus. [Lissauer (a, 48).]

**ANANTURANUS** (Lat.), adj. A<sup>2</sup>n(a<sup>2</sup>n)-a<sup>2</sup>nt(a<sup>2</sup>nt)-u<sup>2</sup>r(u<sup>2</sup>r)/a<sup>2</sup>n(a<sup>2</sup>n)-u<sup>2</sup>s(u<sup>2</sup>s). From *ἀναπτα*, up-hill, and *ὀσφρανός*, the palate. Having the line connecting the punctum præmaxillare and the punctum spinæ nasalis posterioris making an angle of from -12° to 0° with the radius fixus. [Lissauer (a, 48).]

**ANAPLASTS**, n. A<sup>2</sup>n/a<sup>2</sup>-pla<sup>2</sup>sts. Of Meyer, leucoplastids. [a, 35.]

**ANASTOMOSE.**—A. *elliptique* (Fr.). Anastomosis between neighboring nerve-trunks in which the connecting fibres describe part of an ellipse. [a, 18.]—A. *par canal collatérale* (Fr.). Anastomosis by an artery which rejoins its trunk. [L.]—**Enterostoma**. See *A. intestinale*.

**ANASTOMOSIS.**—*Intestinal a.* See *ANASTOMOSE intestinale*.

**ANCONÆUS.**—A. *lateralis*. See *A. externus*.—A. *medialis*. See *A. internus* (1st def.) and *A. longus*.

**ANCYLOBLEPHARON** (Lat.), n. n. A<sup>2</sup>n(a<sup>2</sup>n)-si<sup>2</sup>l(ku<sup>2</sup>l)-o(o<sup>2</sup>)-ble<sup>2</sup>f(a<sup>2</sup>r(a<sup>2</sup>r)-o<sup>2</sup>n. See *ANCYLOBLEPHARON*.

**ANCYRA** (Lat.), n. f. A<sup>2</sup>n(a<sup>2</sup>n)-sir(ku<sup>2</sup>r)/a<sup>2</sup>. Gr., *ἄγκυρα*. A hook. [a, 34.]

**ANDROLOGY**, n. A<sup>2</sup>n-dro<sup>2</sup>/o-j*i*<sup>2</sup>. From *ἀνθρωπ*, a man, and *λόγος*, understanding. An absurd term for the pathology, etc., of the male genito-urinary organs.

**ANDROMEDOTOXIN, ANDROMETOXIN**, n's. A<sup>2</sup>n-dro<sup>2</sup>m/e<sup>2</sup>d-o-to<sup>2</sup>x/i<sup>2</sup>n, -dro<sup>2</sup>m-e<sup>2</sup>-to<sup>2</sup>x/i<sup>2</sup>n. Fr., *andromédotoxine*. An anodyne poisonous principle obtained from *Monotropa uniflora*, *Andromeda japonica*, *Rhododendron maximum*, and other ericaceous plants. [B, 5 (a, 35).]

**ANDROPHYLL**, n. A<sup>2</sup>n/dro-fi<sup>2</sup>l. Lat., *androphyllum* (from *ἀνθρωπ*, a man, and *φύλλον*, a leaf). A stamen. [a, 35.]

**ANÉMIE.**—A. *globulaire essentielle* [Jaccoud]. See *CHLOROSIS*.—A. *vraie*. Syn.: a. *posthémorrhagique*. Anæmia caused by hemorrhage, so that all the elements of the blood are diminished in equal proportion. [a, 18.]

**ANGLE.**—**Rolandic a.** The a. formed by the meeting of the upper end of the fissure of Rolando with the mesial plane. [a, 29.]—**Sylvian a.** The a. formed by the posterior horizontal limb of the Sylvian fissure with a line drawn at right a's to the longest antero-posterior diameter of the hemisphere. [a, 29.]—**Temporal a. of the eye.** The external canthus. [L.]

**ANGST.**—*Herza'*. See *ANXIETAS cardiaca*.—*Platza'*. See *AGORAPHOBIA*.

**ANGULARIS.**—A. *oris superior*. See *LEVATOR anguli oris*.

**ANGULILABIALIS** [Cooes] (Lat.), n. m. A<sup>2</sup>n(a<sup>2</sup>n)/i<sup>2</sup>ku<sup>2</sup>l-(gu<sup>2</sup>l)-le-a<sup>2</sup>l(ba<sup>2</sup>l)-i<sup>2</sup>a(a<sup>2</sup>l)/i<sup>2</sup>s. See *DEPRESSOR anguli oris*.

**ANI-LEVATOR** [Cooes] (Lat.), n. m. An(a<sup>2</sup>n)/i<sup>2</sup>le<sup>2</sup>-vat-(wa<sup>2</sup>t)/o<sup>2</sup>r. See *LEVATOR ani*.

**ANISOCORIA** (Lat.), n. f. A<sup>2</sup>n(a<sup>2</sup>n)-i<sup>2</sup>s-a(o<sup>2</sup>a)-ko<sup>2</sup>riko<sup>2</sup>r/i<sup>2</sup>a<sup>2</sup>. From a priv., *ἴσος*, equal, and *κόρη*, the pupil. Inequality of the pupils.

**ANISOTHECTUS** (Lat.), adj. A<sup>2</sup>n(a<sup>2</sup>n)-i<sup>2</sup>s-a(o<sup>2</sup>a)-thek(thak)/u<sup>2</sup>a-(u<sup>2</sup>a)s. From a priv., *ἴσος*, equal, and *θῆκη*, a case. Fr., *anisothèque*. Of an ovary or anther, having the two cells unequal or differing in contents. [a, 35.]

**ANISPHINCTER** [Cooes] (Lat.), n. m. An(a<sup>2</sup>n)-i<sup>2</sup>-sf*i*<sup>2</sup>n*st*<sup>2</sup>k<sup>2</sup>-tn<sup>2</sup>(tar). See *SPHINCTER ani externus*.

**ANLAUFEND** (Ger.), adj. A<sup>3</sup>n/la<sup>3</sup>-u<sup>4</sup>f-e<sup>2</sup>nd. See INCUBOUS.

**ANNIDALINE**, n. A<sup>2</sup>n-ni<sup>2</sup>d/a<sup>2</sup>l-en. A proprietary name for iodothymol. [a, 34.]

**ANNULUS**.—**A. inguinalis abdominalis** [Ger. Anat. Soc.]. See *Internal abdominal ring*.—**A. inguinalis cutaneus** [Ger. Anat. Soc.]. The external abdominal ring. [A, 5.]—**A. inguinalis cutaneus, crus inferius** [Ger. Anat. Soc.]. The lower pillar of the external abdominal ring. [A, 5.]—**A. inguinalis cutaneus, crus superius** [Ger. Anat. Soc.]. The upper pillar of the external abdominal ring. [A, 5.]—**A. vulvæ**. See *Ostium vaginae*.

**ANOGEISSUS** (Lat.), n. m. or f. A<sup>2</sup>n(a<sup>2</sup>n)-o(o<sup>2</sup>)-jis'(ge<sup>2</sup>-i<sup>2</sup>s')-su<sup>2</sup>s-(su<sup>2</sup>s). A genus of the *Combretaceæ*. Baillon considers it a section of *Terminalia*. [a, 35.]—**A. latifolia** (seu *latifolius*). An East Indian tree yielding a gum (see *DHAURA*). The ashes, which contain a large proportion of pure potassium carbonate, are used as food by certain tribes of the Neilgherries. [a, 35.]

**ANOPYLUS** (Lat.), adj. A<sup>2</sup>n(a<sup>2</sup>n)-o<sup>2</sup>p(op)/i<sup>2</sup>l(u<sup>1</sup>)-u<sup>2</sup>s(u<sup>4</sup>s). From *ἄνω*, up, and *πύλη*, a gate. Having the line connecting the punctum foraminis magni anterioris and the punctum foraminis magni posterioris making an angle of from -7°5' to -15°5' with the radius fixus. [Lissauer (a, 48).]

**ANORHINUS** (Lat.), n. m. A<sup>2</sup>n(a<sup>2</sup>n)-o<sup>2</sup>r(or)-rin(ren)/u<sup>2</sup>s(u<sup>4</sup>s). From *ἄνω*, up, and *ῥίς*, the nose. Having the line connecting the punctum spine nasalis anterioris and the punctum alæ vomeris making an angle of from -18°5' to 0° with the radius fixus. [Lissauer (a, 48).]

**ANOSTOMUS** (Lat.), adj. A<sup>2</sup>n(a<sup>2</sup>n)-o<sup>2</sup>s(os)/to(to<sup>2</sup>)-mu<sup>2</sup>s(mu<sup>4</sup>s). From *ἄνω*, up, and *στόμα*, the mouth. Having the line connecting the punctum præmaxillare and the punctum alæ vomeris making an angle of from -7° to +9° with the radius fixus. [Lissauer (a, 48).]

**ANTEPPOSITION**, n. A<sup>2</sup>n-te<sup>2</sup>-po-si<sup>2</sup>zh'u<sup>2</sup>n. In botany, superposition. [a, 35.]

**ANTECALENUS** [Coes] (Lat.), n. m. A<sup>2</sup>n(a<sup>2</sup>n)-te(ta)-ska<sup>2</sup>l-(ska<sup>2</sup>l)-en(an)/u<sup>2</sup>s(u<sup>4</sup>s). See *SCALENUS anticus*.

**ANTHOS**.—**Herba a. silvestris**. For *Sedum* substitute *Ledum*.

**ANTHRAROBIN**, n. A<sup>2</sup>n-thra<sup>2</sup>r-ob'i<sup>2</sup>n. Fr., *anthrarobine*. A name given by Liebermann to several compounds, analogous in composition to chrysarobin, obtained by the reduction of alizarin and purpurin. The commercial article, prepared from commercial alizarin, is said to have been used with success in psoriasis. [B, 5 (a, 38).]

**ANTIBACTERIDE**, n. A<sup>2</sup>n-ti<sup>2</sup>-ba<sup>2</sup>k'te'r-i<sup>2</sup>d'id. Fr., *a. Ger.*, *Antibacterid*. Of C. Aschmann, an antiseptic, C<sub>6</sub>H<sub>12</sub>O<sub>6</sub>Na<sub>2</sub>B<sub>4</sub>O<sub>7</sub>·3H<sub>2</sub>BO<sub>3</sub>, used for preserving provisions; prepared by fusing 388 parts of borax and 198 of glucose with a little water, adding (and constantly stirring till dissolved) 124 of boric acid, and evaporating at a gentle heat to a soft translucent mass. [B, 5, 270 (a, 35).]

**ANTICOBACHIALIS** [Coes] (Lat.), n. m. A<sup>2</sup>n(a<sup>2</sup>n)-ti(te)-ko(ko<sup>2</sup>)-bra<sup>2</sup>k(bra<sup>2</sup>ch<sup>2</sup>)-i<sup>2</sup>a(a<sup>2</sup>)/i<sup>2</sup>is. See *BRACHIALIS anticus*.

**ANTIDOTUS**.—**A. hepatica arabica**. An old preparation of cassia-leaves, white pepper, myrrh, and costus. [A, 316 (a, 14).]

**ANTIKAMNIA** (Lat.), n. f. A<sup>2</sup>n(a<sup>2</sup>n)-ti<sup>2</sup>-ka<sup>2</sup>m(ka<sup>2</sup>m)/ni<sup>2</sup>a<sup>2</sup>. From *ἀντί*, against, and *κάμνιν*, to work. A proprietary compound containing acetanilide, caffeine, and sodium bicarbonate. [a, 34.]

**ANTISEPSIN**, n. A<sup>2</sup>n-ti<sup>2</sup>-se<sup>2</sup>p/si<sup>2</sup>n. From *ἀντί*, against, and *σῆψιν*, putrefaction. A paramonobromacetanilide, or bromated acetanilide, occurring in the form of tasteless and odorless crystals; used as an analgesic and antipyretic and as a local application to ulcers. [a, 34.]

**ANTISEPTOL**, n. A<sup>2</sup>n-ti<sup>2</sup>-se<sup>2</sup>pt/o<sup>2</sup>l. From *ἀντί*, against, and *σπῆρτός*, putrid. A proprietary name for cinchonine sulphiodate. [a, 34.]

**ANTITHERMIN**, n. A<sup>2</sup>n-ti<sup>2</sup>-thu<sup>2</sup>rm/i<sup>2</sup>n. From *ἀντί*, against, and *θερμόν*, heat. The trade name for phenylhydrazinelevulinic acid. [a, 35.]

**ANTITOXIN**, n. A<sup>2</sup>n-ti<sup>2</sup>-to<sup>2</sup>x/i<sup>2</sup>n. A substance, formed in the body of an animal rendered proof against a specific disease, that neutralizes the toxic products of the specific pathogenic microorganism of that disease. [a, 34.]—**Tizzoni-Cattani tetanus a**. An a. that neutralizes the toxine of tetanus. [a, 34.]

**APHASIE**.—**A. de la main**. A figurative expression attributed to Charcot, meaning *agraphia*. [a, 18.]

**APHTHONGIA**.—**A. laryngea spastica**. See *DYSPHONIA spastica*.

**APIOLINE**, n. A<sup>2</sup>p/i<sup>2</sup>-o<sup>2</sup>l-en. From *apium*, parsley. The emmenagogue principle of apiol. [a, 34.]

**APIS**.—**A. nigra mellifica**. An Australian species secreting a peculiar dark orange-colored honey (black or eucalyptus honey) which is said to be slightly hypnotic, and to reduce the pulse-rate and respiration. It has been recommended in bronchial catarrhs, in inflammations of the genito-urinary tract, and as a substitute for digitalis. [a, 35.]

**APOCHROMATIC**, adj. A<sup>2</sup>p-o-krom-a<sup>2</sup>t/i<sup>2</sup>k. From *ἀπό*, away from, and *χρώμα*, color. Free from chromatic aberration. [a, 34.]

**APOGEOTROPISM** [Darwin]. n. A<sup>2</sup>p-o-je-o<sup>2</sup>t/ro<sup>2</sup>p-i<sup>2</sup>zm. From *ἀπό*, away from, *γῆ*, the earth, and *τροπή*, a turning. Negative geotropism. [a, 35.]

**APONEUROSIS**.—**Pharyngeal a.** Lat., *a. pharyngis*. The fibrous tissue forming the wall of the pharynx. [a, 34.]

**APPLE**.—**Golden a.** See *SPONDIAS lutea*.

**APPLIQUÉ** (Fr.), adj. A<sup>2</sup>p-ple-ka. See *APPRESSED*.

**APROSEXIA** (Lat.), n. f. A<sup>2</sup>p(a<sup>2</sup>p)-ro(ro<sup>2</sup>)-se<sup>2</sup>x/i<sup>2</sup>a<sup>2</sup>. From *a priv.* and *πρόσῆξις*, attention. Fr., *aproxésie*. Ger., *Aproxésie*. Of Guye, a form of cerebral disturbance characterized by inability to fix the attention on a given subject; attributed to defective respiration consequent on adenoid growths in the nasal passages. [a, 18.]

**AQUA**.—**A. cardiaca**. See *A. cordialis frigida* and *A. cordialis temperata*.—**A. sulphureo-acida**. A preparation, official in several of the old pharmacopœias, made by mixing 2 parts each of calcium sulphide and tartaric acid with 128 of water, shaking well in a stoppered bottle, pouring off the clear liquid when settled, and adding from 1 part to 12 parts of tartaric acid. [B, 87 (a, 14).]

**AQUOZONE**, n. A<sup>2</sup>k'w-o<sup>2</sup>zon. A proprietary 2·5-per-cent. (by volume) solution of ozone in distilled water.

**ARBACIADÆ**.—(After *Arbacia*, a genus.) A division of searuchins (*Endocyclica*) characterized by smooth imperforate tubercles, four large anal plates, and closed auriculæ. [a, 35.]

**ARBEITSSTELLER** (Ger.), n. A<sup>2</sup>r'bits-ste<sup>2</sup>l-le<sup>2</sup>r. See *ERGO-STAT*.

**ARCH**.—**Intranidal fibre a.** [Spitzka]. An a. of fibres from the most ectal and mesal rootlets of the third pair of nerves, the a. resting on the main nucleus and then passing into various irregular columns and groups. It separates the main nidus of the oculomotor nidus from Westphal's nidus. [a, 34.]—**Parieto-hæmal a.** For *Styloid a.* substitute *Hyoid a.*

**ARCUS**. For *A. unguis* substitute *A. unguis*.—**A. vasculosi renales**. See *FORNICES vasculosi renum*.

**ARECOLINE**, n. A<sup>2</sup>r-e<sup>2</sup>k'o<sup>2</sup>l-en. A liquid alkaloid contained in *Areca catechu*. It forms a white crystalline hydrobromide. Given internally, it causes vomiting and diarrhoea. [a, 34.]

**ARENARIA**.—**A. peploides**. For *Honkeneya* substitute *Honkenya*.—**Radix arenaria**. For *root* substitute *rhizome*.

**ARGAMBYLOPIA** (Lat.), n. f. A<sup>2</sup>rg-a<sup>2</sup>m(a<sup>2</sup>m)-bli<sup>2</sup>(blu<sup>2</sup>)-op-(o<sup>2</sup>p)/i<sup>2</sup>-a<sup>2</sup>. From *ἀργός*, not working, and *ἀμβλωπία*, amblyopia. Of G. M. Gould, amblyopia due to disuse of the eye.

**ARISTOL**, n. A<sup>2</sup>r-i<sup>2</sup>st-o<sup>2</sup>l. Dithymol iodide; a reddish-brown powder obtained by mixing a watery solution of iodine containing iodide of potassium with an alkaline thymol solution. Used as an antiseptic and in skin diseases. [a, 34.]

**ARITHMOMANIE** (Fr.), n. A<sup>2</sup>-ret-mo-ma<sup>2</sup>-ne. A morbid desire for counting or making calculations. [a, 34.]

**ARM**.—**Milk a.** Of M. Gunn, phlegmasia alba dolens affecting the upper limb. [a, 34.]—**Vierhügela'** (Ger.). See *Anterior BRACHIUM* and *Posterior BRACHIUM*.

**ARRHIZOBLAST**, n. A<sup>2</sup>r-ri<sup>2</sup>z'o-bla<sup>2</sup>st. Lat., *arrhizoblastus* (from *a priv.*, *ρίζα*, a root, and *βλαστός*, a sprout). Fr., *arrhizoblaste*. Of Willdenow, a geoblast without a root. [a, 35.]

**ARSENOPHAGIA** (Lat.), n. f. A<sup>2</sup>rs'e<sup>2</sup>n-o(o<sup>2</sup>)-fa<sup>2</sup>j(fa<sup>2</sup>g)/i<sup>2</sup>a<sup>2</sup>. From *ἀρσενικόν*, yellow orpiment, and *φαγεῖν*, to eat. The practice of eating arsenic.

**ART**.—**Haupta'**. The primary or typical species of a genus. [a, 35.]

**ARTERIA**.—**A. dorsalis medialis pollicis**. See *Dorsal ARTERY of the thumb*.—**A. interrenalis**. Ger., *Zwischenrieniervenenarterie*. An anomalous artery extending between the kidneys, and anastomosing with the renal arteries of each side. [L.]

**ARTERIE**.—**Gehirna'**. See *Internal carotid ARTERY*.—**Lebera'**. The hepatic artery.

**ARTERY**.—**Inferior tympanic a.** A branch of the internal maxillary artery which passes upward behind the articulation of the lower jaw, enters the tympanum through the Glaserian fissure, supplies the laxator tympani muscle, and ramifies upon the membrana tympani. [F, 2.]—**Superior tympanic a.** A branch of the internal carotid which enters the tympanic cavity through a minute foramen in the carotid canal and anastomoses with the tympanic branch of the internal maxillary. [F, 31.]

**ARTHRODESIS** (Lat.), n. f. A<sup>2</sup>rth-ro<sup>2</sup>d'e<sup>2</sup>s-i<sup>2</sup>s. Gen., *-des'es (-eis)*, *-od'esie*. From *ἄρθρον*, a joint, and *δέσις*, a binding together. The artificial establishment of ankylosis of a joint as by partial resection. [E. Cotterell, "Lancet," May 13, 1893, p. 1129.]

**ARTHROSPOREI**. For *Homiscinei* substitute *Hormiscinei*.

**ARTICULAIRE**.—**A. du genou**. See *SUBCRUREUS*.

**ARTICULATION**.—**A. par implantation**. See *GOMPHOSIS* (1st def.).

**ARTIFACT**, n. A<sup>2</sup>rt/i<sup>2</sup>-fa<sup>2</sup>kt. See *ARTEFACT*.

**ARZT**.—**Gerichts'a'**. A physician appointed by or attached to the courts charged with the duty of inquiring into causes of death in suspicious cases and with other medico-legal investigations. [a, 14.]—**Hausa'**. A family physician, the attending as distinguished from the consulting physician.—**Kreiswunda'**. A district surgeon.—**Kura'**. The resident physician of a watering place.

**ASAPROL**, n. A<sup>2</sup>-sa<sup>2</sup>p'ro<sup>2</sup>l. From *a priv.* and *σάπρος*, putrid. The β-naphthol compound (C<sub>10</sub>H<sub>6</sub>.OH.SO<sub>2</sub>)<sub>2</sub>Ca; recommended by Stackler and Dubief in rheumatism, arthritis, and various infectious diseases. [B, 108 (a, 14).]

**ASBOLIN**, n. A<sup>2</sup>z'bo<sup>2</sup>l-i<sup>2</sup>n. From *ἄσβολος*, soot. An alcoholic distillate of pine-soot, recommended by Braconnot in tuberculosis. [B, 108 (a, 14).]

**ASCOCARP**, n. A<sup>2</sup>s-k'o-kar<sup>2</sup>p. From *ἀσκός*, a bag, and *καρπός*, fruit. In *Ascomycetes*, the ascus; in lichens, the apothecium. [B, 291 (a, 35).]

**ASEBOTOXIN**, n. A<sup>2</sup>s-e<sup>2</sup>b-o-to<sup>2</sup>x/i<sup>2</sup>n. From *a priv.*, *sebum*, fat, and *τοξικόν*, poison. A poisonous glucoside found in *Andromeda japonica*. [B, 5 (a, 35).]

**ASELLINE**, n.  $A^2s\text{-}e^2l\text{'en}$ . From *asellus*, the cod. An alkaloid,  $C_{25}H_{35}N_4$ , found in cod-liver oil. [B.]

**ASH**.—**Bitter**. For the 2d def., substitute The *Picraena excelsa*. [a, 35].—**Field-a**. The *Pyrus aucuparia*. [A, 505 (a, 21)].—**Ground-a**. 1. The *Egopodium podagraria*. 2. The *Angelica silvestris*. [A, 505 (a, 21)].—**Spanish a**. The *Syringa vulgaris*. [A, 505 (a, 21)].—**Wafer-a**. See *Ptelea trifoliata*.

**ASPHYXIA**.—**A. solaris**. See *INSOLATION*.

**ASSONANCE**, n.  $A^2s\text{'so}n\text{'ns}$ . From *assonare*, to respond to. A morbid propensity to employ alliteration.

**ASTASIA-ABASIA** (Lat.), n. f.  $A^2s(a^2s)\text{-}taz(ta^2s)\text{'i}^2\text{-}a\text{-}a^2b\text{'}$  ( $a^2b$ )- $az(a^2s)\text{'i}^2\text{-}a^2$ . From *astasia*, unsteadiness, a priv., and *basia*, a stepping. Fr., *astatie-abasie*. A nervous disorder in which the sufferer suddenly falls to the ground when walking, and when sitting suddenly bends forward, his head dropping on his chest and his body seeming to lose its power of support. There is no loss of consciousness. [a, 34.]

**ÄSTIG** (Ger.), adj. See *RAMOSE*.

**ASTRAGALECTOMY**, n.  $A^2s\text{-}tra^2g\text{'a}\text{-}e^2k\text{'to}^2m\text{'i}^2$ . From *αστραγάλος*, the astragalus and *ἐκτομή*, excision. Fr., *astragalectomie*. Of Ollier, excision of the astragalus. [a, 34.]

**ASTROCARYUM**.—**A. ayri**. For *Tophophenix* substitute *Tozophenix*.

**ATROPHODERMA** (Lat.), n. n.  $A^2t(a^2t)\text{-}ro^2f\text{'o}(\text{'o}^3)\text{-}du^2rm\text{'}$  ( $de^2rm$ )/ $a^2$ . Gen., *-derm'atos (-atis)*. From *ἀτροφος*, ill-fed, and *δέρμα*, the skin. Of Crocker, atrophy of the skin in which there may be either simply diminution in the number or size of its component elements or a degenerative alteration in those elements in which the skin from the middle of the thigh to the sole, more rarely from the upper arm to the palm, exhibits white patches, is stretched, and glistens, the epidermis being thin and peeling off in shining flakes. There is hyperæsthesia. [a, 34].—**A. idiopathi-**  
**cum**. A quantitative or degenerative atrophy of the skin not due to any other disease. [a, 34].—**A. neuriticum**. See *Glossy SKIN*.—**A. pigmentosum**. Xeroderma pigmentosum. [a, 34].—**A. striatum et maculatum**. Linear atrophy of the skin. [a, 34].—**A. symptomaticum**. A symptomatic of some other disease of the skin or of the trophic nerves. [a, 34].—**Senile a**. Atrophy of the skin and its appendages in senile degeneration. [a, 34.]

**ATROPHODERMATOSIS** (Lat.), n. f. pl.  $A^2t(a^2t)\text{'ro}^2f\text{'o}(\text{'o}^3)\text{-}du^2rm\text{'}$  ( $de^2rm$ )- $a^2t(a^2t)\text{'o}^3\text{'e}^2z\text{'as}$ . From *ἀτροφία*, atrophy, and *δέρμα*, skin. An order of skin diseases in which there is atrophy of the cutaneous tissues. [a, 34.]

**ATROPINA**.—**Lamellæ atropinæ**. Discs of atropine;  $\frac{1}{100}$  grain gelatin discs containing each  $\frac{1}{1000}$  of a grain of atropine sulphate. [a, 35.]

**ATROPINE**.—**Discs of a**. See *Lamellæ ATROPINÆ* (in Supplement).

**ATTIC OF THE TYMPANUM**. For *atticus tympanicus* substitute *cœnaculum*.

**ATTITUDE**.—**A. of the fœtus**. The position of the fœtal ovoid as regards the relation of its parts to the mother.

**ATTRAHENS**.—**A. aurem**. A thin fan-shaped muscle having pale indistinct fibres that arise from the lateral edge of the aponeurosis of the occipito-frontalis and converge to be inserted into a projection on the front of the helix. [a, 34.]

**ATTRITA** (Lat.), n. f.  $A^2t(a^2t)\text{'tri}t\text{'(ret)}\text{'a}^2$ . From *atterere*, to rub against. See *CHAFING*.

**AUFREGEND** (Ger.), adj.  $A^2u^2f\text{'rag-e}^2nd$ . See *IRRITABLE*.

**AUFRICTBAR** (Ger.), adj.  $A^2u^2f\text{'ri}^2ch^2t\text{'ba}^2r$ . See *ERECTILE*.

**AUFSPRINGEND** (Ger.), adj.  $A^2u^2f\text{'spr}i^2n^2\text{'e}^2nd$ . See *DEHISCENT*.

**AUFWÄRTSGEKRÜMMT** (Ger.), adj.  $A^2u^2f\text{'vart-s}ge^2\text{'kru}^2mt$ . See *INCURVED*.

**AUSGEDRÜCKT** (Ger.), adj.  $A^2u^2s\text{'ge}^2\text{'dru}^2kt$ . See *EXPRESSED*.

**AUSHAUCHUNG** (Ger.), n.  $A^2u^2s\text{'ha}^2\text{'u}^2ch\text{'un}^2$ . See *EXOSMOSE*.

**AUSMELKEND** (Ger.), adj.  $A^2u^2s\text{'me}^2lk\text{'e}^2nd$ . See *EMULGENT*.

**AUSREINSUNG** (Ger.), n.  $A^2u^2s\text{'ris-sun}^2$ . See *EVULSION*.

**AUSSATZ**.—**Gelenka'**. See *ARTHOLEPROSIS*.—**Kiefera'**. See *SYCOOSIS*.—**Kinna'**. Mentagra. [L, 80].—**Knotena'**. Tubercular leprosy.—**Löwena'**. See *LEONTIASIS*.—**Schlangena'**. Tyriasis. [L, 80.]

**AUSSCHLAG**.—**A'artig**. See *EXANTHEMATOUS*.—**Früh-jahrsa'**. Lichen. [L, 80].—**Impfa'**. An eruption following vaccination. [a, 14].—**Kiefera'**. See *PTYRIASIS*.—**Kopfia'**. Thea capitis. [L, 80].—**Pustulöser Darma'**. See *ENTERODIETHENIA*.—**Schuppena'**. A scaly eruption; psoriasis. [G.]

**AUSSCHNITT**.—**Hüfta'**. See *VENTER of the ilium*.

**AUSSPÜLUNG** (Ger.), **AUSWASCHUNG** (Ger.), n's.  $A^2u^2s\text{'pu}^2l\text{'un}^2$ ,  $va^2sh\text{'un}^2$ . The process of washing out.

**AUTOTOMY**, n.  $A^2t\text{'o}^2t\text{'o}^2m\text{'i}^2$ . From *αὐτός*, self, and *τέμνω*, to cut. Self-amputation; the voluntary shedding of a limb by a crustacean. [L.]

**AVENA**.—**Decoctum avenæ Loevri**. A decoction made by boiling 40 parts of a. excoctienta and 5 of lignum santali with enough water to make 500, and dissolving in this 3 of potassium nitrate and 12 of sugar. [B, 270 (a, 36)].—**Grutum avenæ**. See *A. excoctienta*.

**AXILEMMA** [Kühne] (Lat.), n. n.  $A^2x(a^2x)\text{'i}^2\text{'le}^2m\text{'ma}^2$ . Gen., *-lem'matos (-atis)*. From *αξίς* (q. v.), and *λέμμα*, a husk. The sheath of an axis-cylinder. [L, 351.]

**AXIS**.—**Moment-a. of a couple**. The line which represents in direction the direction of the couple, and by its length the moment. [a, 49.]

**AXOLEMMA** (Lat.), n. n.  $A^2x(a^2x)\text{'o}(\text{'o}^3)\text{'le}^2m\text{'ma}^2$ . See *AXILEMMA* (in Supplement).

**AZOMURIA** (Lat.), n. f.  $A^2z(a^2z)\text{'o-mu}^2r\text{'i}^2\text{'a}^2$ . For deriv., see *AZOTE* and *MURIATIC*. The hypothetical radicle or base contained in nitrohydrochloric acid. [Kerr (B, 91).]

**BACILLEMIA** (Lat.), n. f.  $Ba^2s(ba^2k)\text{'i}^2\text{'lem}\text{'(la}^2\text{'e}^2m)\text{'i}^2\text{'a}^2$ . From *bacillus* (q. v.), and *αἷμα*, blood. The presence of bacilli, including their products, in the blood. [a, 34.]

**BACILLUS**.—**B. aluminis**. The *B. putrificus coli*. [a, 35].—**B. bizzozzerianus**. The *Leptothrix epidemidis*. [a, 35].—**B. cæruleus**. A species observed by A. J. Smith in flowing water (Schuykill River); rods  $2\mu$  to  $2.5\mu$  long and  $0.5\mu$  thick, often connected in long filaments. It quickly liquefies gelatin, and on potatoes forms colonies which are at first of a bluish, and finally of a deep dark-blue color. [a, 35].—**B. Chauvæi**. The b. of symptomatic charbon. [a, 35].—**B. coli communis**. The *Bacterium coli commune*. [a, 35].—**B. coli cholærogenus**. Of Gilbert and Grode, a virulent variety of *B. typhi abdominalis*. [a, 34].—**B. der gelben Milch**. See *BACTERIUM synanthrum*.—**B. epidemidis**. The *Leptothrix epidemidis*. [a, 35].—**B. Escherichii**. Of Saccardo, the *Bacterium coli commune*. [a, 35].—**B. mesentericus rubiginosus**. The *Leptothrix epidemidis*. [a, 35].—**B. of acne contagiosa**. An aerobic, non-liquefying b. found by Driekerhoff and Grawitz in the pus and scales of horses affected with the disease. [a, 34].—**B. of Afanassiew**. An aerobic, non-liquefying, motile spore-forming b., from  $0.6\mu$  to  $2.2\mu$  long, occurring solitary, in pairs, or in short chains in the mucus coughed up in pertussis. [a, 34].—**B. of Babes and Oprescu**. An aerobic and facultative anaerobic, non-liquefying, actively motile b., from  $0.4\mu$  to  $0.5\mu$  thick, united in pairs and sometimes growing like the figure 8, obtained from a case of hæmorrhagic septicæmia. [a, 34].—**B. putidus**. The *B. fluorescens putidus*. [a, 35].—**B. septicus putridus**. A small, mobile, oval b., having a diameter of from  $0.6\mu$  to  $1\mu$ , and developing easily in all culture media; it rapidly liquefies gelatin, slowly coagulates milk, and produces an odor of trimethylamine, especially marked on potato-cultures. It produces septicæmia with no apparent lesions in man and in animals. [a, 34].—**B. tussis convulsivæ**. See *B. of Afanassiew*.

**BACK-KNEE**, n.  $Ba^2k\text{'ne}$ . A deformity resulting from a sharp backward bend of the knee near the upper end of the tibia. It is due to a deficiency in growth at the fore part of the epiphyseal line. [a, 34.]

**BACTERIUM**.—**B. alii**. Of A. B. Griffins, a b. found in putrefying onions,  $5\mu$  to  $7\mu$  in length,  $2.5\mu$  broad, and producing a peculiar green pigment; when cultivated in peptonized agar-agar, it develops, at the expense of the proteids of the latter, a ptomaine,  $C_{15}H_{17}N$ , a white, crystalline, deliquescent, monacid base, perhaps identical in composition with hydrocodine. [B.]—**B. Bontrouxii**. A species sometimes confounded with *B. oblongum*. It is found in alcoholic infusions. It converts glucose into gluconic acid, and the latter eventually into oxygluconic acid. [a, 35].—**B. gliscrochromum**. See *GLISCHROBACTERIUM*.—**B. oblongum**. Syn.: *Micrococcus oblongus*. A species found in vinegar. It has the characters of *B. aceti*, but with a diameter from twice to three times as large. By oxidation it transforms glucose into gluconic acid. [a, 35].—**B. phosphorescens**. A species occurring in the form of thin rods rounded at their apices, in the seas of northern Europe, rendering the water phosphorescent. It grows best on gelatin without liquefying it, but does not develop on potatoes. [a, 35].—**Peach-colored b.** Of Lankester, the *Beggiatoa roseo-perisicina*. [a, 35.]

**BALEN**.—**B. plates**. For *PLATE* substitute *WHALEBONE*.

**BASAD**, adv.  $Ba^2s\text{'a}^2d$ . Toward the basal aspect. [L.]

**BASOPHOBIA** (Lat.), n. f.  $Ba^2s(ba^2s)\text{'o}(\text{'o}^3)\text{'fob}(\text{'o}^3b)\text{'i}^2\text{'a}^2$ . From *βαῖναι*, to walk, and *φῶβος*, fear. Morbid distrust of one's power of walking. [a, 34].—**Staso-b**. Inability to walk or stand erect due to emotional causes, the strength of the muscles concerned not being appreciably diminished. [a, 34.]

**BATH**.—**Olive-lees b**. See *OLIVE-LEES b*.

**BATTERY**.—**Fluid-cell b**. A b. in which the electrolyte is a liquid. [a, 34].—**Immersion b**. A b. in which one of the elements must be immersed in the b. fluid before the current can be generated. [a, 34.]

**BDELLATOMY**. For this title and the pronunciation substitute *BDELLOTOMY*, n.  $De^2l\text{'o}^2t\text{'o}^2m\text{'i}^2$ .

**BECHER**.—**B'chen**. See *SCYPHULUS*.—**Gehörb'**. See *INFUNDIBULUM cochleæ*.—**Geschmacksb'**. See *TASTE-BUDS*.

**BEFRUCHTUNG**.—**B'smasse**. See *SPERM* (2d def.).—**Selbst-b'**. See *CLOSE FERTILIZATION and SELF FERTILIZATION*.

**BEGGIATOA**.—For *B. multisepta* substitute *B. multiseptata*.

**BEIN**.—**Bogenb'e**. See *Parietal BONE*.—**Fusswurzelb'e**. The tarsal bones. [L.]—**Gabelb'**. See *FURCULA*.—**Gedankenb'**. The parietal bone. [L, 46 (a, 21)].—**Gesäßb'**. See *ISCHIUM*.—**Gewerbb'e**. Vertebrae. [L, 80].—**Gleichb'e**. See *SCAMMOID BONES*.—**Griffelb'**. See *STYLOID PROCESS*.—**Gurgelb'**. See *CLAVICLE*.—**Halsb'**. Of Meckel, the body of the hyoid bone. [L, 34 (a, 29)].—**Handwurzelb'e**. The carpal bones. [L.]—**Hangb'**. In locomotion, the swinging leg. [a, 14].—**Herzb'**. The sternum. [L, 80].—**Hinterb' des Armes**. The radius. [L, 80].—**Hüftenwirbelb'e**. The lumbar vertebrae. [L.]—**Kinnbackenb'**. The maxillary bone.—**Kranzb'**. The frontal bone. [L.]—**Kronb'**. The coronary bone. [A, 315 (a, 45)].—**Kropfb'**. See *HYOID BONE*.

**Linsenb'**. See *Lenticular PROCESS of the incus*.—**Nervemb'**. The occipital bone. [L, 80 (a, 43).]—**Rachenb'**. See *Inferior MAXILLA*.—**Ringb'**. See *RING-BONE*.—**Säbelb'**. See *GENU varum*.—**Stulzb'**. In locomotion, the supporting leg. [a, 14.]—**Tribasilarb'**. The basilar bone (1st def.).—**Urschlüsselb'**. See *Precoracoid BONE*.—**Vernunftb'**. The parietal bones.

**BEINCHEN** (Ger.), n. Bin'ch'e'n. See *OSSICLE*.—**Gelenkb'**. Sesamoid bones. [L, 43, 80.]

**BENZOL**.—**B. guaiacol**. Benzozol. [L.]

**BENZONAPHTHOL**, n. Be'nz'/'o-na'f'tho'l. See *BENZOYL-NAPHTHOL* (in Supplement).

**BENZOPHENOID**, n. Be'nz'/'o-fe'n'oid. Tetramethyldiapsidobenzophenoid, obtained by the decomposition of an aniline dye; used locally as a germicide. [a, 34.]

**BENZOSOL**, n. Benz'o'sol. A compound of benzoic acid and guaiacol; used instead of creasote in phthisis. [a, 34.]

**BENZOYLNAPHTHOL**, n. Be'nz'/'o-'l-na'f'tho'l. A product obtained by treating 250 grammes of  $\beta$ -naphthol and 270 of very pure benzoyl chloride, and purifying the product by crystallization; used as an intestinal antiseptic. [a, 34.]

**BERIBERI**.—**Dropsical b.** Ankylostomiasis.—**Web b.** In countries in which b. is endemic, anemia and dropsy without paralysis. It is not related to true b. [a, 34.]

**BERUFSSCHÄDLICHKEITEN** (Ger.), n. pl. Be'2-rufs'shad'/. li'ch'2-kit-e'n. Unhygienic conditions due to the occupation or profession of a person, such as inhalation of dust, etc. [a, 18.]

**BESTREBUNG** (Ger.), n. Be's'trab'un'2. See *MOLIMEN*.

**BEULE**.—**Feuerb'**. See *Contagious ANTHRAX*.—**Flugb'n**. See *ZOSTER*.—**Knotenb'**. See *SICCHRUS*.—**Kohlenb'**. See *ANTHRAX*.—**Leistenb'**. See *BUBO*.—**Milzbrandb'**. See *ANTHRAX*.—**Speckb'**. See *LIPOMA*.

**BEUTEL**.—**Netzb'**. See *BURSA omentalis*.—**Zungenschleimb'**. See *BURSA mucosa sublingualis*.

**BIAURICULAR**, adj. Bi-a'r-'i'k-'u'l-a'r. Extending between the two auricular points. [L.]

**BIFOCAL**, adj. Bi-'fo'k'l. Having two foci; said of lenses. [L.]

**BIGLENOID**, adj. Bi-gle'n'oid. Extending between the glenoid fossae of the two temporal bones. [L.]

**BIMALAR**, adj. Bi-mal'a'r. Extending between the malar points. [L.]

**BIMASTOID**, adj. Bi-ma'st'oid. Extending between the two mastoid processes. [L.]

**BIMAXILLARY**, adj. Bi-ma'x'/'i'l-a-ri'2. Pertaining to opposite sides of a maxilla. [L.]

**BINAURICULAR**, adj. Bi'n-a'r-'i'k-'u'l-a'r. See *BINAURAL* and *BIAURICULAR* (in Supplement).

**BINOTIC**, adj. Bi'n-'o't'/'i'k. See *BINAURAL*.

**BIOPHAGISM**, n. Bi-'o'f'a'2-'i'2zm. From *bios*, life, and *phagō*, to devour. The capacity of absorbing and digesting living bodies (i. e., micro-organisms). [*ftschr. d. Med.*, July 1, 1889 (a, 50).]

**BIOPSIE** (Fr.), n. Be-op-se. Examination (microscopical, etc.) of a portion of a body during life; the excision and examination of a lesion or a portion of a lesion from a living body. [a, 18.]

**BIPHOROUS**, adj. Bi-'p'o'r-'u's. See *BIFOROUS*.

**BISFERIENS** (Lat.), adj. Bi's-fe'r'i'2-e'n'2(ans). Gen., -ent'is. From *bis*, twice, and *ferire*, to strike. See *DICROTAL* and *DICROTIC*.

**BITEMPORAL**, adj. Bi-te'mp'o'r'l. Extending from one temporal bone or region to the other. [L.]

**BIZYGOMATIC**, adj. Bi-zi-go-ma't'/'i'2k. Extending between the two zygomatic arches. [L.]

**BLADDER**.—**Germ b.** See *GASTRULA*.

**BLASTIDULES**, n. Bla'st'/'i'd-'u'l'2. A term proposed by W. R. McNab for special reproductive bodies in non-sexual generation (conidia, propagula, buds, etc.) not included under the head of sporogenesis. [a, 35.]

**BLATTER**.—**Milchb'n**. See *COW-POX*.

**BLEU**.—**B. d'urine**. See *CYANURIN*.

**BLINDHEIT**.—**Halbb'**. See *HEMIAMAUROSIS*.—**Hühnerb'**. See *HEMERALLOPIA*.

**BLINDNESS**.—**Hen-b.** A b. natural to hens. A vulgarism synonymous with hemeralopia, or night-b. [F.]—**Sand-b.** An old term for a variety of metamorphopsia in which small particles like sand seemed to fly before the eye. [F.] Cf. *MUSCÆVOLITANTES*.—**Violet-b.** Color-b. in which purple is confounded with red and orange. [L, 57 (a, 14).]—**Word-b.** Inability to understand anything that is written, though ability to write and speak exists; due to the unilateral destruction of the nervous center of sight. [A, 540 (a, 34).]

**BLOOD**.—**B. clyster**. Ger., *Blutklyster*. An enema made of the blood of cattle or swine; used in acute anemia. [L, 57 (a, 21).]

**BLOODLETTING**.—**Spoliative b.** B. to diminish the number of corpuscles. [L.]

**BODY**.—**Chromatin bodies**. Bodies variously described as spherules and as tube-shaped discs found in the network of a cell undergoing carycinesis. [a, 34.]—**Crystalline b.** See *Crystalline LENS*.—**External accessory olivary b.** The external mass of gray matter in the accessory olivary nucleus. [a, 34.]—**Geniculate b.** See *External geniculate b.* and *Internal geniculate b.*—**Innominate b.** of Giralde's. See *PARADIDYMS*.—**Intercarotic b.** See *Intercarotid GLAND*.—**Internal accessory olivary b.** The internal mass of gray matter in the accessory olivary nucleus.

[a, 34.]—**Internal olivary b.** [Meynert]. See *Internal olivary NUCLEUS*.—**Opto-striate b.** The conjoined thalamus opticus and corpus striatum. [a, 34.]—**Spongy b.** See *CORPUS SPONGIOSUM*.

**BOHRER**.—**Hauptb'**. See *TREPINE*.

**BOLLINGERA** (Ger.), n. f. Bo'l-li'n'2-'e'r-a'2. After *Bollinger*, the discoverer of these organisms. A genus of *Schizomycetes* (*Micrococci*), including, among other species, the *Botryomyces* (*Micrococcus botryogenes* or *B. equi*). [a, 35.]—**B. equi**. See *Micrococcus botryogenes*.

**BOLUS**.—**Hysterical b.** See *GLOBUS HYSTERICUS*.

**BONE**.—**Anterior otocranial b.** See *PRO-OTIC b.*—**Cavalry b.** See *RIDER'S b.*—**Crazy b.**, **Funny-b.** Colloquial terms for the internal condyle of the humerus where the ulnar nerve passes over it. [a, 34.]—**Furcular b.** See *CORACOID b.* (1st def.).—**Hamate b.** See *UNCIFORM b.*—**Hammer b.** See *MALLEUS*.—**Heart b.** See *OS cordis*.—**Internasal b's.** See *OSSA PRÆNASALIA*.—**Lepidoid b.** The squamous portion of the temporal b.—**Lunate b.** See *SEMI-LUNAR b.*—**Manual-exercise b.** See *EXERCISE b.*—**Pastern b.** Ger., *Fesselbein*. One of the proximal phalanges of a horse's foot. [a, 34.]—**Posterior otocranial b.** See *OPISTHOTIC b.*—**Superior otocranial b.** See *EPITOTIC b.*

**BORKE**.—**Milchb'**. See *CRUSTA lactea*.

**BOROGLYCERIN**, n. Bo-ro-gli's'e'r-'i'2n. Lat., *boroglycerinum*. See *BOROGLYCERIDE*.

**BOROPHENOL**, n. Bo-ro-fe'n'2-'o'l. A combination of borax and carbolic acid, used as a disinfectant. It has an agreeable smell and dissolves completely in water. [B, 5 (a, 35).]

**BOROSALICYLIC ACID**, n. Bo-ro-sa'l-'i'2-si'l'/'i'2k. The compound B(OH)(OC<sub>6</sub>H<sub>4</sub>.CO<sub>2</sub>H)<sub>2</sub>, known only in a sodium and a barium salt. [B, 270 (a, 14).]

**BOSS**.—**Parietal b.** Ger., *Scheitelhöcker*. See *PARIETAL EMINENCE*.—**Pott's b.** The characteristic projection of the spinous processes in the region of the diseased vertebrae of a spinal column affected with spondylitis (q. v.) (Pott's disease). [a, 25.]

**BOTE**, n. Bot. An Indian term for one who practices suction and lingual friction of the penis. [a, 34.]

**BOUFFE** (Fr.), n. Buf. Erection. [L.]

**BOURGEON**.—**B. caudal**. In embryology, the enlargement of the posterior extremity of the primitive line. [a, 18.]

**BOUVRAGE** (Fr.), n. Bu-vra'zh. Tamponing.

**BRACHIORADIALIS**.—**B. brevis**, **B. minor**. See *SUPINATOR longus accessorius*.

**BRACHYKERKIC**, adj. Bra'k-'i'2-ku'rk'/'i'2k. From *βραχύς*, short, and *κερκis*, a shuttle. Having the fore-arm relatively short as compared with the upper arm. [L.] Cf. *DOLICHOKERKIC* and *MESATIKERKIC* (in Supplement).

**BRACHYKNEMIC**, adj. Bra'k-'i'2-ke'n'2m'/'i'2k. From *βραχύς*, short, and *κνήμη*, the leg. Of Sir W. Turner, having the leg proportionally shorter than the thigh. [a, 34.]

**BRADYCARDIA** (Lat.), n. f. Bra'd-'i'2-ka'r'd'/'i'2-a'2. From *βραδύς*, slow, and *καρδία*, the heart. A physiological or pathological slowing of the heart's action, the pulsations being fewer than sixty a minute. [a, 34.]

**BREAD**.—**Indian b.** The fruit of the *Artocarpus integrifolia*. [a, 35.]—**Indian b.-plant**. The *Artocarpus integrifolia*. [a, 35.]

—**Little man's b.** An underground *Fungus*, of the genus *Mylitta*, perhaps identical with the so-called native bread of Tasmania. It is found at high elevations in the Neighlheries, and receives its name in allusion to the tradition that the Neighlheries were once peopled by a race of dwarfs. [Cooke (a, 35).]—**St. John's b.** The *Ceratonia siliqua*. [a, 35.]

**BROMAMIDE**, n. Brom'a'm-'i'2d'id. A bromine compound, C<sub>2</sub>H<sub>5</sub>Br<sub>2</sub>NH.HBr, of the amide group; used as an antipyretic, antineuralgic, and antirheumatic. [a, 34.]

**BROMOL**, n. Brom'o'l. A proprietary name for tribromophenol; a caustic and disinfectant. [a, 34.]

**BROMOMANIA** (Lat.), n. f. Brom-'o'2-man(ma'n)'/'i'2-a'2. For deriv., see *BROMINE* and *MANIA*. A maniacal condition caused by the prolonged administration of the bromides. [a, 34.]

**BRONCHARCTIA** (Lat.), n. f. Bro'n'2k(bro'n'2ch'2)'a'2rk'shi'2-(t'i'2)-a'2. From *βρόγχος*, a bronchus, and *arcere*, to shut up. See *BRONCHIOSTENOSIS* (in Supplement).

**BRONCHIOSTENOSIS** (Lat.), n. f. Gen., -os'eos'(-is). From *βρόγχια*, the bronchial tubes, and *στενωσις*, stenosis. Stenosis of a bronchial tube.

**BRONCHIOLITIS**.—**Asthmatic b.** Of Strümpell, b. exsudativa. [a, 34.]

**BRONCHITIS**.—**Convulsive b.** Whooping-cough.—**Summer b.** Hay fever.

**CÆCECTOMY**, n. Ses-e'2k'to'm-'i'2. From *cæcum* (q. v.), and *ἐκτομή*, excision. Excision of a portion of the cæcum. [a, 34.]

**CÆCOCELE** (Lat.), n. f. Sek(ka'2-e'2k)-o(o'2)-sel(kal)'e(a); in Eng., sek'o-sel. Gen., -cel'es. From *cæcum* (q. v.), and *κύηλη*, a tumor. See *TYPHLOCELE*.

**CALCO-SUBPHALANGÆUS MINIMI DIGITI** (Lat.), n. m. Ka'l'k(ka'2'k)'/'o(o'2)-su'b(su'4'b)-fa'l'i(fa'l')-a'2n(a'n'2)'je'2(ge'2)-u's(u's). See *CALCANEO-SUB-PHALANGIEN*.

**CALCO-SUBPHALANGÆUS POLLICIS** (Lat.), n. m. See *ABDUCTOR hallucis*.

**CAMPHOR**.—**C. naphthol**. A brownish transparent liquid, prepared by mixing one part of beta-naphthol and two parts of camphor; used as an antiseptic.

**CANAL.**—C. of His. See *Ductus thyroglossus*.—Gum-c. Ger., *Gummikanal*, *Gummigang*. An intercellular passage in vegetable tissues containing gum. [B, 75].—**Vestibular c.** See *Urogenital sinus*.

**CANALIS.**—C. tubarius cæcus [Highmore]. See *Oviduct*.

**CANNABI-TETANINE**, n. Ka<sup>2</sup>n'a<sup>2</sup>b-i<sup>2</sup>-te<sup>2</sup>t'u<sup>2</sup>/a<sup>2</sup>n-en. A highly convulsant alkaloid contained in *Cannabis indica*. [a, 34.]

**CANTHARIS.**—C. marginata. The *Lytta marginata*. [a, 35].—C. ruficeps. The *Lytta ruficeps*. [a, 35].—C. vittata. The potato-bug, *Lytta vittata*. [a, 35.]

**CAP.**—Enamel-c. The enamel-organ after it has become concave and covers the top of the growing tooth papilla. [J, 32.]

**CARDINE**, n. Ka<sup>2</sup>r'd'en. A clear, transparent, straw-colored, filtered glycerin extract of the ox's heart. It has been recommended as a cardiac tonic. [a, 34.]

**CARPAINE**, n. Ka<sup>2</sup>r'p'a<sup>2</sup>en. Fr., *carpaine*, Ger., *Carpain*. An alkaloid found by Greshoff in the leaves of *Carica papaya*, acting as a cardiac poison. [B, 108 (a, 14).]

**CARTILAGE.**—Hyaloid c. See *Hyaline c.*—**Hypo-hyal c.** The cartilaginous rudiment of the basi-hyal bone (1st def.) or the permanent c. representing it. [L.]—**Luschka's c's.** Sesamoid c's in the vocal bands. [L.]—**Periotic c.** The cartilaginous rudiment of the petro-mastoid portion of the temporal bone. [L.]—**Precursor c.** See *Temporary c.*—**Y c.** A Y-shaped c. uniting the acetabular margins of the ilium, the ischium, and the pubic bone. [L, 172.]

**CARUNCLE.**—Hymenal c's. See *CARUNCLE myrtiformes*.

**CATALEPSY.**—C. of the will. The enfeeblement of the intellectual centres observed in neurasthenia. ["Brain," part II, iii, p. 330 (a, 34).]

**CATAPHASIA** (Lat.), n. f. Ka<sup>2</sup>t'(ka<sup>2</sup>t')-a<sup>2</sup>-faz(fa<sup>2</sup>s)/i<sup>2</sup>-a<sup>2</sup>. From *κατάφασις*, affirmation. An affection of speech in which the patient repeats the same word several times, either spontaneously or responsively; a symptom of extensive cerebral disease. [A, 540 (a, 34).]

**CATHETER.**—Lobster-tail c. A metallic c. having three articulating segments or joints, like a lobster's tail, at the cystic extremity. [a, 34].—**Tympanic (cavity) c.** An elastic tube 1½ to 14 mm. in diameter, made of spun silk and covered with rubber varnish. It is funnel-shaped at its outer extremity, and is from 3 to 4 mm. longer than a Eustachian c. [a, 34.]

**CENTRE.**—C. of moments. The intersection of the axis and the plane of rotation of a set of forces. [a, 49.]

**CENTRUM.**—*Gefässnervenc'* (Ger.). A vaso-motor centre.—*Harnruhr'* (Ger.). See *Diabetic centre*.

**CHLORALAMIDE**, n. Klor-a<sup>2</sup>l'a<sup>2</sup>m-i<sup>2</sup>d(id). A combination, CCl<sub>3</sub>CH.OH.CONH<sub>2</sub>, of alcohol and formamide, occurring as shining colorless crystals having a slightly bitter taste. It is a hypnotic. [a, 34.]

**CHLORALANTIPYRINE**, n. Klor'/'l-a<sup>2</sup>n-ti<sup>2</sup>p'i<sup>2</sup>r-en. A combination of chloral and antipyrine containing either one molecule of each (monochloralantipyrine) or two molecules of chloral and one molecule of antipyrine (bichloralantipyrine). Each form is used as a hypnotic. [a, 34.]

**CHLORALCARBAMIDE**, n. Klor'/'l-ka<sup>2</sup>rb'a<sup>2</sup>m-i<sup>2</sup>d(id). An oily liquid made by mixing 165 parts of hydrate of trichloraldehyde with 60 parts of carbamide; a feeble hypnotic. [a, 34.]

**CHLORALFORMAMIDE**, n. Klor'/'l-f'o<sup>2</sup>rm'a<sup>2</sup>m-i<sup>2</sup>d(id). See *CHLORALAMIDE* (in Supplement).

**CHLORALOSE**, n. Klor'a<sup>2</sup>l-os. A crystalline body formed by the reaction of anhydrous chloral and glycose; a hypnotic. [a, 34.]

**CHROMATODERMATOSES** (Lat.), n. f. pl. Krom(ch<sup>2</sup>rom)'/'-a<sup>2</sup>t'(a<sup>2</sup>t')-o(o<sup>2</sup>)-du<sup>2</sup>rm'(de<sup>2</sup>rm)-a<sup>2</sup>t'(a<sup>2</sup>t')-os(e<sup>2</sup>as). From *χρῶμα*, color, and *derma*, the skin. Of Tommasoli, an order of skin diseases characterized by pigment formation. [a, 34.]

**CHRYSANTHEMUM.**—C. suaveolens. See *C. balsamita*.

**CHRYSOPOGON** (Lat.), n. m. Kri<sup>2</sup>s(ch<sup>2</sup>r'u<sup>2</sup>s)-o(o<sup>2</sup>)-pog'o<sup>2</sup>n(on). Gen., -on'a<sup>2</sup> (-is). From *χρυσός*, gold, and *πώγων*, the beard. A genus of grasses. [a, 35.]

**CHRYSOPSIS** (Lat.), n. f. Kri<sup>2</sup>s(ch<sup>2</sup>r'u<sup>2</sup>s)-o<sup>2</sup>ps'i<sup>2</sup>s. Gen., -ops'e<sup>2</sup>os (-is). From *χρυσός*, gold, and *ὄψις*, appearance. A genus of North American composite herbs. [a, 35].—C. *graminifolia*. Fevergrass, a caespitose herb common in pine woods; used in the southern United States as a poultice in sprains. [a, 14; a, 35.]

**CHYLANGEIOMA** (Lat.), n. n. Kil(ch<sup>2</sup>n'g)-a<sup>2</sup>n(a<sup>2</sup>n<sup>2</sup>)-ji<sup>2</sup>go<sup>2</sup>-i<sup>2</sup>. om'a<sup>2</sup>. Gen., -om'a<sup>2</sup>tos (-alis). From *χυλός*, chyle, and *αγγεῖον*, a vessel. A lymphangioma. [a, 34.]

**CINEOL**, n. Si<sup>2</sup>n'a<sup>2</sup>o<sup>2</sup>l. A liquid, C<sub>10</sub>H<sub>18</sub>O, constituting the greater portion of the essential oil of wormseed, and contained also in oil of lemons and oil of rosemary; apparently identical with cajuputol. [a, 35.]

**CLASMATOCYTE**, n. Kla<sup>2</sup>s-ma<sup>2</sup>t'o-sit. From *κλάσμα*, a fragment, and *κύτος*, a cell. Of Ranvier, a large cell derived from a connective-tissue corpuscle, that is possibly the source of the small round cells in inflammation. [a, 34.]

**CLATHROCYSTIS** (Lat.), n. f. Kla<sup>2</sup>th(kla<sup>2</sup>th)-ro<sup>2</sup>cr'i<sup>2</sup>s-i<sup>2</sup>st. (ci<sup>2</sup>st)'/'s. Gen., -cyst'e<sup>2</sup>os (-ia). From *κλῆθρα*, a lattice, and *κύστις*, a bag. A name given to that arrangement (by some authors made a genus) in the zoogloea formation of *Micrococci* in which the gelatinous masses, by the dissolution of their interior, are reduced to thin layers surrounding a fluid. [a, 35].—C. *roseo-persicina*. See under *BEHRIATOA roseo-persicina*.

**CLEISTOCARP**, n. Klist'o-ka<sup>2</sup>rp. From *κλειστός*, that can be closed, and *καρπός*, fruit. An ascus completely inclosing its spores, which are set free by a rupture of its walls. [a, 35.]

**CLUPEA.**—C. *sprattus*. Fr., *cradeau*. Ger., *Spratt*, *Sprotte*. The sprat, the garvie of Scotland, an important food species resembling a young herring and having probably the same properties as the anchovy. It is found in large shoals along the European coasts. [a, 35.]

**COCILLANA** (Sp.), n. Kok-thel-ya<sup>2</sup>n'ya<sup>2</sup>. See *Cocillana* (in Supplement).

**COCOBACILLUS** (Lat.), n. m. Ko<sup>2</sup>k-ko(ko<sup>2</sup>)-ba<sup>2</sup>s(ba<sup>2</sup>k)-i<sup>2</sup>l'-lu<sup>2</sup>s(lu<sup>2</sup>s). From *κόκος*, a grain, and *bacillus*, a rod. A microorganism that is rod-shaped and has slightly rounded ends resembling a micrococcus. [a, 34.]

**COCILLAÑA** (Sp.), n. Ko-thel-ya<sup>2</sup>n'ya<sup>2</sup>. A drug prepared from the *Sycacarpus Rusbyi*, analogous to ipecacuanha in properties. It is used as an emetic and expectorant and in chronic bronchitis. [a, 35.]

**COITOPHOBIA** (Lat.), n. f. Ko(ko<sup>2</sup>)-i<sup>2</sup>t-o(o<sup>2</sup>)-fob(fo<sup>2</sup>b)/i<sup>2</sup>-a<sup>2</sup>. From *coitus* (q. v.), and *φόβος*, fear. Of Auvard, dread of coitus on account of instinctive disgust or of dyspareunia. [a, 34.]

**COLOPEXIA** (Lat.), n. f. Kol-o(o<sup>2</sup>)-pe<sup>2</sup>x(pax)/i<sup>2</sup>-a<sup>2</sup>. From *κῶλον*, the colon, and *πῆξις*, a fixing. Suture of the sigmoid flexure to the abdominal wall for rectal prolapse. [a, 34.]

**COLOPEXOTOMIA** (Lat.), n. f. Kol'/'o(o<sup>2</sup>)-pe<sup>2</sup>x(pax)-o(o<sup>2</sup>)-tom(to<sup>2</sup>m)/i<sup>2</sup>-a<sup>2</sup>. From *κῶλον*, the colon, *πῆξις*, fixation, and *τομή*, a cutting. Of Verneuil, fixation of the colon after incision; as in inguinal or lumbar colotomy. [a, 34.]

**COLPOCRICOS** (Lat.), n. m. Ko<sup>2</sup>lp-o<sup>2</sup>k'ri<sup>2</sup>k-o<sup>2</sup>s. From *κόλπος*, the vagina, and *κρίκος*, a ring. See *Ostium vaginae*.

**CORNU.**—After "Indecl. in the sing." insert *except for a gen. form in -us*.

**CORONANTHUS** (Lat.), adj. Ko<sup>2</sup>r-o<sup>2</sup>n(on)-a<sup>2</sup>n(a<sup>2</sup>n)/thu<sup>2</sup>-s(thu<sup>2</sup>s). From *κόρωνη*, a crown, and *άνθος*, a flower. Ger., *kronenblumig*. Having the flowers coronate. [a, 35.]

**CRADINA** (Lat.), n. f. Kra<sup>2</sup>d(kra<sup>2</sup>d)-i(e)'na<sup>2</sup>. Of Mussi, a ferment obtained from young shoots, leaf-stalks, and unripe fruits of *Ficus carica*; it occurs as a dark, amorphous precipitate, and is soluble in water only with the addition of a trace of acid or alkali, by which quality it differs from papayotin, which is soluble in water. [B, 108 (a, 14).]

**CRESALOL**, n. Kre<sup>2</sup>s'a<sup>2</sup>l-o<sup>2</sup>l. A salicylate of cresol having three isomeric forms: *orthocresalol*, *metacresalol*, and *paracresalol*. These forms occur as a white, crystalline powder, insoluble in water, but soluble in alcohol and ether. Used as a local antiseptic. [a, 34.]

**CRESOL.**—C. *iodide*. An antiseptic compound of iodine with the mixed isomeric c's, of rather indefinite composition; a light-yellow powder. [a, 34.]

**CRURITIS** (Lat.), n. f. Krur-it(et)'/'i<sup>2</sup>a. Gen., -i<sup>2</sup>'idos (-idis). From *crus*, the leg. Of Hosack, phlegmasia dolens. [a, 34.]

**CTENOMERE**, n. Te<sup>2</sup>n'o-o-mer. From *κτένις*, a comb, and *μέρος*, a part. The segment included between two adjacent ctenophores. [L.]

**CUCUMIS.**—C. *myriocarpus*. An African species. The pulp of the fruit, a small gourd called *cacur* by the Kaffirs (who use it in its unripe state as an emetic), contains a bitter resinous substance, myriocarpin. [a, 35.]

**CUR.**—*Terraine'*. Of Oertel, a method of treating certain cardiac and nervous diseases by graduated exercise in climbing hills or mountains. [a, 34.]

**CURE.**—Pine c. A system of treating rheumatism and other diseases by baths and inhalations of pine-needle oil. [a, 34.]

**CURETTE.**—Aural c. Fr., *cure-oreille*. A small oval or semi-oval c. used in operations in the deeper parts of the auditory canal. [a, 34.]

**CUVETTE** (Fr.), n. Ku<sup>2</sup>-ve<sup>2</sup>t<sup>2</sup>. 1. A large shallow vessel. 2. The cup of a pessary. 3. In physics, the short branch of a siphon barometer. [L, 41 (a, 14).]

**CYCLAMEN.**—C. *persicum*. A species indigenous to Greece, formerly used medicinally. It was one of the plants known to Dioscorides as *κυκλαμίν*. [B, 180 (a, 35).]

**CYNOPHOBIA** (Lat.), n. f. Si<sup>2</sup>n(ku<sup>2</sup>n)-o(o<sup>2</sup>)-fob(fo<sup>2</sup>b)/i<sup>2</sup>-a<sup>2</sup>. From *κύων*, a dog, and *φόβος*, fear. The hysterical state produced in a nervous person by the bite of a healthy dog. [A, 540 (a, 34).]

**CYST.**—*Degeneration-c.* A c. formed by softening and degeneration of tissue. [a, 35].—*Inclusion-c.* A c. resulting from an inclusion of a portion of the epiblast within the mesoblast during development, or the inclusion of a blighted foetus within the body of another foetus. [a, 33.]

**CYASTER** (Lat.), n. m. Si<sup>2</sup>t(ku<sup>2</sup>t)-a<sup>2</sup>st(a<sup>2</sup>st)/u<sup>2</sup>r(ar). From *κύτος*, a cell, and *αστήρ*, a star. A polar aster. [L.]

**CYTHEROMANIA** (Lat.), n. f. Si<sup>2</sup>th(ku<sup>2</sup>th)-e<sup>2</sup>r(ar)-o(o<sup>2</sup>)-ma-(ma<sup>2</sup>)/ni<sup>2</sup>-a<sup>2</sup>. For deriv., see *CYTHEREAN* and *MANIA*. See *NYMPHOMANIA*.

**DACTYLOMYLEISIS** (Lat.), n. f. Da<sup>2</sup>k(da<sup>2</sup>k)'/'i<sup>2</sup>l(tu<sup>2</sup>l)-o(o<sup>2</sup>)-mi<sup>2</sup>l(mu<sup>2</sup>l)-i<sup>2</sup>s'i<sup>2</sup>o<sup>2</sup>i<sup>2</sup>s-i<sup>2</sup>s. Gen., -e<sup>2</sup>i<sup>2</sup>cos (-is). From *δάκτυλος*, a finger, and *μύλεω*, to grind. Of Bayer, erosion of fungous or polypoid growths with the finger nail. [a, 34.]

**DAPICHO**, n. Fr., *dapiché*. Ger., *Erdkautschuk*. A species of caoutchouc found in the earth on the head waters of the Orinoco and Rio Negro, said to be the sap of the roots of *Hevea guianensis*, and of another tree which the Indians call *curvata*. [a, 35.]

**DARÜBERGESTELLT** (Ger.), adj. Da<sup>3</sup>r-u<sup>6</sup>b'e<sup>2</sup>r-ge<sup>2</sup>-ste<sup>1</sup>lt. See SUPERPOSED.

**DEAFNESS.—Speech-d.** A condition differing from word-d. in that the faculty of repeating and writing after dictation is preserved. [a, 34.]

**DEFINATION.** n. De-fe<sup>2</sup>m-i<sup>2</sup>n-a'shu<sup>2</sup>n. From *de* priv. and *femina*, a woman. Of Krafft-Ebing, sexual perversion in which a woman undergoes such a change of character that her feelings and inclinations become those of a man. [a, 34.]

**DENDROCALAMUS** (Lat.), n. m. De<sup>2</sup>nd-ro(ro<sup>3</sup>)-ka<sup>2</sup>l(ka<sup>3</sup>)'a<sup>2</sup>-mu's(mu's). From *déndron*, a tree, and *kálamos*, a reed. A genus of the *Bambuseæ*. [a, 35.]-**D. strictus.** Syn.: *Bambusa stricta*. Male bamboo, the *sadanapavedroo* of the Teloogeois, indigenous to the East Indies, Cochinchina, and the Molucca Islands. Its properties are similar to those of *Bambusa arundinacea*. [a, 35.]

**DERMATOL.** n. Du<sup>6</sup>m'a<sup>2</sup>t-o<sup>2</sup>l. Basic bismuth gallate, C<sub>4</sub>H<sub>2</sub>(OH)<sub>2</sub>CO<sub>2</sub>Bi(OH)<sub>3</sub>, occurring as an odorless powder, not affected by light or air; used as an antiseptic. [B, 108 (a, 14).]

**DIABOLEPTIC.** n. Di-a<sup>2</sup>b-o-le<sup>2</sup>p'ti<sup>2</sup>k. From *διάβολος*, the devil, and *λήψις*, a seizure. Of Maudsley, an ecstatic who professes to have supernatural communications. [A, 540 (a, 34).]

**DIAPHTERIN.** n. Di-a<sup>2</sup>f'te<sup>2</sup>r-i<sup>2</sup>n. A compound of sozolic acid and quinoline. [a, 34.]

**DIBROMTOLUENE.** n. Di-brom-to<sup>2</sup>l-u<sup>2</sup>'en. The compound C<sub>6</sub>H<sub>4</sub>Br<sub>2</sub>CH<sub>3</sub>, obtained from monobromtoluidine by the replacement of the amido-group by bromine. [B, 3 (a, 14).]

**DICHLOROXETHYL.** n. Di-klor-o<sup>2</sup>x-e<sup>2</sup>th'i<sup>2</sup>l. See DICHLOR-ETHER.

**DICHLOROPROPYLENE.** n. Di-klor-pro'pi<sup>2</sup>l-en. The chemical group C<sub>2</sub>H<sub>4</sub>Cl<sub>2</sub>. [a, 38.]

**DICHLORQUINHYDRONE.** n. Di-klor-kwi<sup>2</sup>n-hid'ron. A substance, C<sub>12</sub>H<sub>8</sub>Cl<sub>2</sub>O<sub>4</sub>, obtained as the first product of the action of hydrochloric acid on quinone. [B, 3 (a, 14).]

**DICHLORSALIGENIN.** n. A substance, C<sub>7</sub>H<sub>6</sub>Cl<sub>2</sub>O<sub>2</sub>, that seems to be obtained when dichlorosalicin is saponified with emulsin.

**DI-iodoform.** n. Di-i-o<sup>2</sup>d-o'fo<sup>2</sup>rm. An iodide of carbon containing 4.62 parts of carbon and 95.38 of iodine. It is insoluble in water, sparingly soluble in alcohol and in ether, but freely soluble in chloroform, in carbon bisulphide, in benzene, and in hot toluene. It has a slight odor and is used as an antiseptic. [a, 34.]

**DIPHOTHERIN.** n. Di<sup>2</sup>p'the<sup>2</sup>r-i<sup>2</sup>n. Of A. Wilson, the poison evolved by the diphtherococci. [a, 34.]

**DIPSOPATHY.** n. Di<sup>2</sup>ps-o<sup>2</sup>p'a<sup>2</sup>th-i<sup>2</sup>. From *δίψος*, thirst, and *πάθος*, disease. Of H. C. Wood, that variety of neuropathy in which dipsomania is the essential feature. [a, 34.]

**DISEASE.—Beigel's d.** See *TRICHORRHEXIS nodosa*.—**Bell's d.** See *Acute delirious mania*.—**Buhl's d.** Acute fatty degeneration occurring in the new-born. [a, 34.]-**Concato's d.** See *POLYORRHOENITIS*.—**Darier's d.** A cutaneous psoriasis, appearing as an acne cornea, in which coccidia-like bodies are found in the proliferating epithelial cells of the mouths of the glands. [a, 34.]-**Grancher's d.** Spleno-pneumonia. [a, 34.]-**Hip-joint d.** See *MORBUS coxarius*.—**Hutchinson's d.** Ophthalmitis with degeneration of that portion of the retina surrounding the macula lutea; it occurs in old age. [a, 34.]-**Krisshaber's d.** A neurosis characterized by sensory illusions, vertigo, and hyperesthesia associated with cardiac irritability. [a, 34.]-**Lacemaker's d.** Lead poisoning occurring in lacemakers. [a, 34.]-**Marie's d.** See *ACROMEGALY* (in Supplement).—**Pott's d. of the spine.** See *ANGULAR CURVATURE of the spine*.—**Van Buren's d. of the penis.** An idiopathic chronic circumscribed inflammation of the corpora cavernosa. [a, 34.]-**Whyyt's d.** Hydrocephalus. [a, 34.]

**DIURETIN.** n. Di-u<sup>2</sup>r-et'i<sup>2</sup>n. A proprietary name for salicylate of theobromine and sodium; a powerful diuretic. [a, 34.]

**DOLICHOMERIC.** adj. Do<sup>2</sup>l'i<sup>2</sup>k-o-hi'e<sup>2</sup>r-i<sup>2</sup>k. From *δολιχός*, long, and *ἐπός*, sacred (see *SACRUM*). Having the sacrum longer than it is broad. [a, 34.]

**DOLICHOKNIC.** adj. Do<sup>2</sup>l'i<sup>2</sup>k-o<sup>2</sup>k-ne<sup>2</sup>m'i<sup>2</sup>k. From *δολιχός*, long, and *κνήμη*, the leg. Having the leg nearly as long as the thigh. [a, 34.]

**DOLICHOPELIC.** adj. Do<sup>2</sup>l'i<sup>2</sup>k-o-pe<sup>2</sup>l'i<sup>2</sup>k. From *δολιχός*, long, and *πέλλις*, a drinking-cup. Having the conjugate diameter of the pelvic brim longer than or equal to the transverse diameter. [a, 34.]

**DRACO.—D. volans.** See *MERCURY bichloride*.

**DRÜSE.—Vernunftd'.** See *GNOMADEN*.—**Zwischenwandd'n.** See *INTERCELLULAR GLANDS*.

**DUCT.—Thyreoglossal d.** See *DUCTUS thyreoglossus*.

**DYSMORPHOBIA** (Lat.), n. f. Di<sup>2</sup>s(du's)-mo<sup>2</sup>r'f'o(o<sup>2</sup>), fob(fob)<sup>2</sup>i<sup>2</sup>a<sup>2</sup>. From *δυσμορφος*, deformed, and *φόβος*, fear. Of Morselli, morbid fear of becoming deformed. [a, 34.]

**DYSTHYMIA.—D. algetica.** Of Emminghaus, mental perversion due to any peripheral-nerve irritation. [A, 540 (a, 34).]

**EBULUS.—Spiritus ebulli** [Würt. Ph., 1798]. Fr., *alcoolat* (ou *esprit*) *d'hibble*. A preparation made by allowing the bruised fruits of the dwarf elder to ferment, and, when they have acquired a vinous odor, distilling and if necessary rectifying. [B, 97 (a, 14).]

**ECHITIDEÆ** (Lat.), n. pl. E<sup>2</sup>k(e<sup>2</sup>ch<sup>2</sup>)-i<sup>2</sup>t(et)-i<sup>2</sup>d'e<sup>2</sup>-e(a<sup>2</sup>-e<sup>2</sup>). Of Bentham and Hooker, a tribe of the *Apocynaceæ*, consisting of *Echites*, *Ichnocarpus*, *Malonetia*, *Nerium*, *Urechites*, *Wrightia*, *Apocynum*, *Strophanthus*, and numerous other genera. [a, 35.]

**ECHOPATHIES**, n. pl. E<sup>2</sup>k-o<sup>2</sup>p'a<sup>2</sup>th-i<sup>2</sup>z. From *ἠχώ*, an echo, and *πάθος*, disease. Those forms of abnormal nervous action in which the patient spasmodically and quite involuntarily repeats words heard or actions seen by him. [A, 540 (a, 34).]

**ECMNESIA** (Lat.), n. f. E<sup>2</sup>k-mnez(mnas)<sup>2</sup>i<sup>2</sup>a<sup>2</sup>. From *ἐκ*, out of, and *μνήσις*, remembrance. A variety of amnesia in which the patient remembers occurrences prior to a certain date, with loss of memory of what happened for a certain time after that date. [A, 540 (a, 34).]

**ECTOSYLVIAN.** adj. E<sup>2</sup>k-to-si<sup>2</sup>l'i<sup>2</sup>a<sup>2</sup>-n. From *ἐκτός*, outside of, and *Sylvius* (see *SYLVIAN*). Situated externally to the fissure of Sylvius. [L, 14.]

**ECTOTORIAL.** adj. E<sup>2</sup>k-to-te<sup>2</sup>nt-o<sup>2</sup>r'i<sup>2</sup>-l. From *ἐκτός*, outside of, and *tentorium* (q. v.). Situated externally to the tentorial fissure or convolution. [L, 14.]

**EJULATION.** n. E<sup>2</sup>j-u<sup>2</sup>l-a'shu<sup>2</sup>n. Lat., *ejulatio* (from *ejulare*, to wail). Of Laycock, a rhythmic sighing or utterance of the same syllable, observed in hysterical cases. [a, 34.]

**ELIXIR.—Hoffmann's visceral e.** See *E. AURANTIUM compositum*.

**ELYTROPEXIA** (Lat.), n. f. E<sup>2</sup>l'i<sup>2</sup>t(u<sup>2</sup>t)-ro(ro<sup>3</sup>)-pe<sup>2</sup>x(pax)<sup>2</sup>-i<sup>2</sup>a<sup>2</sup>. From *ἐλντρον*, a sheath, and *πῆξις*, a fixing. See *VAGINOFIXATION*.

**ENANTHESIS** (Lat.), n. f. E<sup>2</sup>n-a<sup>2</sup>n(a<sup>2</sup>n)-thes(thas)<sup>2</sup>i<sup>2</sup>s. Gen., -thes'eos(-is). See *ENANTHEMA*.

**ENDOCARDITIS.—E. mycotica.** E. of bacterial origin. [a, 34.]

**ENDOCYSTOMATITIS** (Lat.), n. f. E<sup>2</sup>nd'o(o<sup>2</sup>)-si<sup>2</sup>st(ku<sup>2</sup>st)-o<sup>2</sup>m-a<sup>2</sup>nt(a<sup>2</sup>t)-i(e)-ti<sup>2</sup>s. Gen., -it'id(os)-idis). From *ἐνδον*, within, and *κύστις*, a sac. Inflammation of the inner layer of the wall of a cystoma. [a, 34.]

**ENOSOMANIA** (Lat.), n. f. E<sup>2</sup>n-o<sup>2</sup>s-o(o<sup>2</sup>)-ma(ma<sup>2</sup>)'ni<sup>2</sup>a<sup>2</sup>. From *ένοςις*, agitation, and *μανία*, madness. A variety of insanity in which the subject believes that he has committed unpardonable crimes. [A, 540 (a, 34).]

**ENTACOUSIC.** adj. E<sup>2</sup>nt-a<sup>2</sup>k-ust'i<sup>2</sup>k. From *έντός*, within, and *ἀκούειν*, to hear. Of auditory sensations, subjective and originating within or in the neighborhood of the ear.

**ENTEROTOMY.—Nélaton's e.** An operation for the relief of intestinal obstruction in which an incision is made in the right iliac or inguinal region and the small intestine is sutured to the wound and opened. [a, 34.]

**EPEIRA** (Lat.), n. f. E<sup>2</sup>p-ir'(e<sup>2</sup>i<sup>2</sup>r)-a<sup>2</sup>. A genus of *Arachnida* giving name to a family (*Epeiridae*) of true spiders. [a, 35.]-**E. diadema.** Ger., *Kreuzspinne*, *Kreuzkanker*, *Diademspinne*, *Kugelspinne*. A European species. The web, which is said to contain a substance soluble in water, a resinous substance, and a sweetish-bitter substance, is used like *tea aranea*. [a, 35.]

**EPIGASTER** (Lat.), n. f. E<sup>2</sup>p-i<sup>2</sup>-ga<sup>2</sup>st(ga<sup>2</sup>st)<sup>2</sup>u<sup>2</sup>r(ar). Gen., -er'os(-is). From *ἐπί*, upon, and *γαστήρ*, the belly. See *Hind gut*.

**EPINEPHRIDUM** (Lat.), n. n. E<sup>2</sup>p-i<sup>2</sup>-ne<sup>2</sup>f-r'i<sup>2</sup>d'i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). From *ἐπί*, upon, and *νεφρός*, the kidney. The fat situated upon the kidney. [a, 34.]

**EROGENOUS.** adj. E<sup>2</sup>r-o<sup>2</sup>i'g(u<sup>2</sup>n)-u<sup>2</sup>s. From *έρως*, lust, and *γεννάν*, to engender. Giving rise to erotic sensations when stimulated. [a, 34.]

**ÉRYSIPELE.—E. salutare.** Erysipelas recovery from which cures or favorably influences some other disease, e. g., erysipelas designedly induced by inoculations of pure cultivations of the *Streptococcus erysipelatos*, or an accidental attack, in a patient suffering from a malignant tumor, such as sarcoma. [a, 35.]

**ERYTHROCYTOSIS** (Lat.), n. f. E<sup>2</sup>r'i<sup>2</sup>(u<sup>2</sup>o<sup>2</sup>)-thro(thro<sup>3</sup>)-sit(ku<sup>2</sup>t)-os'i<sup>2</sup>s. Gen., -os'eos(-is). From *έρυθρός*, red, and *κύτος*, a cell. A condition in which there is an excess of red blood-corpuscles. [B.]

**ESSENTIA.—E. arthritica Hoffmanni sine opio.** Fr., *essence anti-arthritique d'Hoffmann*. A preparation made by treating 90 parts of earth-worms with 60 of liquid potassium carbonate for twenty-four hours, adding 7 parts of castoreum, 4 of saffron, and 360 of alcohol, and filtering in three days. [B, 119 (a, 38).]

**EUPHORIN.** n. U<sup>2</sup>fo<sup>2</sup>r-i<sup>2</sup>n. A carbonate of ethyl and phenyl or phenyl-ethyl urethane; a white slightly aromatic powder soluble in alcohol, slightly soluble in water; antipyretic, anodyne, and antiseptic. [a, 34.]

**EUPHORY.** n. U<sup>2</sup>fo<sup>2</sup>r-i<sup>2</sup>. The normal state of health. [a, 34.]

**EUPHREN.** n. U<sup>2</sup>ro-fe<sup>2</sup>n. An iododisobutylorthocresol containing 21.8 per cent. of iodine; a yellow powder soluble in alcohol, in ether, in chloroform, and in oils; used as an antisyphilitic. [a, 34.]

**EVIL.—Joint e.** In the West Indies, mutilating leprosy. [G.]

**EXCLUSION.—E. of the pupil.** That condition in which the entire sphincter margin is adherent to the capsule of the lens, owing to repeated attacks of iritis. The iris neither dilates nor contracts in response to any stimulus. [F.]

**EXCRESCENCE.—Fungating e. of the umbilicus.** Of Simpson, an elevated fungus-like e. that sometimes forms at the bottom of the umbilical depression in new-born infants after the remnant of the umbilical cord has separated. [A, 69.]

**EXTIMA** (Lat.), n. f. E<sup>2</sup>x'ti<sup>2</sup>m-a<sup>2</sup>. Fem. of adj. *extimus* (superl. of *exter*), outermost (*tunica* understood). The outermost coat, as of an artery.

**EYE.—Cylindrical e.** That defective refraction of one or more meridians of the e. which requires correction by cylindrical lenses. [F.]—**Luminous e.** That condition which is occasionally observed in the e's of some of the lower animals and more rarely

in human beings, notably the negro, in which the e's are seen to glow in the dark; supposed to be due to the arrangement of the pigment cells of the tapetum. In this condition all the rays of light which enter the pupil are apparently reflected, giving out a reddish or yellowish-red reflection. [F.]—**Pineal e.** Fr., *œil pinéal*. A third e. produced as a secondary differentiation of the distal part of the pineal gland. It was present in the extinct *Amphibia* and *Reptilia*, but is found among living forms only in *Lacertilia*. [a, 29.]—**Tabetic e.** An e. in which pathological changes have occurred which are symptomatic of tabes dorsalis. [a, 29.]—**Tea-leaf e.** An e. in a morbid state caused by the application of a poultice made of tea-leaves. [a, 29.]

**FACULTATIVE**, adj. Fa<sup>2</sup>k'u<sup>1</sup>-tat-i<sup>2</sup>v. Of hypermetropia, characterized by objects infinitely remote being distinctly seen both with and without convex glasses, i. e., with the assistance of the accommodation. [F.]

**FALLSÜCHTIG** (Ger.), adj. Fa<sup>1</sup>l'zu<sup>2</sup>ch<sup>2</sup>t-i<sup>2</sup>g. See EPILEPTIC.

**FARADIMETER**, n. Fa<sup>2</sup>r-a<sup>2</sup>d-i<sup>2</sup>m-e<sup>2</sup>t-u<sup>2</sup>r. From *Faraday*, a proper name, and μέτρον, a measure. An instrument for determining the intensity of a faradaic current. [a, 34.]

**FARADO-PUNCTURE**, n. Fa<sup>2</sup>r-a<sup>2</sup>d-o-pu<sup>2</sup>n<sup>2</sup>k'-tu<sup>2</sup>r. The introduction of needle electrodes into a part for the purpose of applying the faradaic current. [a, 29.]

**FASCIA**.—**Cephalo-pharyngeal f.** F. cephalopharyngea. A strong fibro-elastic submucous membrane lining the pharynx. [a, 29.]—**F. coli propria.** See *Deep cervical f.*—**Fasciae multiplices.** See *Many-tailed bandage.*—**F. ocularis duplex.** See *BINGULUS*.—**Fasciae of the orbit.** Condensed layers of the connective tissue within the orbit, constituting the true orbital f., the periorbita, Tenon's capsule, and a number of unnamed slips connected with the extrinsic muscles, etc. [L.]—**Orbital f.** 1. A fibrous layer covering in part the eyeball and reflected at the junction of the cornea and the sclera to the margin of the orbit. 2. The orbital f. (1st def.) and the periorbita. [L.]—**Semilunar f. of the biceps flexor cubiti muscle.** An aponeurosis which passes down from the inner side of the muscle to the deep f. of the forearm. [E.]—**Suprascapular f.** An offshoot from the brachial f. running to the suprascapular region. [L, 332.]

**FASER**.—**Gallertf.** A non-medullated nerve-fibre. [L.]—**Gürtelfn.** See *Arctiform fibres*.

**FASERLAPPIG** (Ger.), adj. Fa<sup>2</sup>'ze<sup>2</sup>r-la<sup>3</sup>p-pi<sup>2</sup>g. See *PANNOSÉ*.

**FAT**.—**Physiological f.** Of Virchow, the proceeds of the fatty liquefaction of superfluous tissues, as in post-partum involution. [a, 34.]

**FEBRIS**.—**F. aleppensis.** See *Aleppo BOIL*.—**F. hydrodes.** See *HYDRODEOPYRA*.—**F. vasculosa.** See *ANGIELOPYRA*.

**FERRAMENTUM**.—**F. gammatum.** See *GAMMOÏDE*.

**FERRUM**.—**Citras quininae et ferri.** See *IRON and quinine citrate*.—**Ferri cyanidum.** See *IRON cyanide*.—**Ferri et potassii sulphas.** See *IRON and potassium sulphate*.—**Ferri hypophosphis.** See *IRON hypophosphite*.—**Ferri murias.** See *IRON chloride* (2d def.).—**Ferri oxidum humidum.** See *IRON hydroxide*.—**Ferri tersulphas.** See *IRON sulphate* (2d var.).—**Gelatina ferri oxidi.** Of E. Dieterich, a preparation made by dissolving 3 parts of the best white gelatin in 30 of water with the aid of heat, adding a mixture of 12 parts of solution of oxychloride of iron (Ger. Ph.). 20 of syrup of orange-flowers, and 20 of distilled water, and incorporating the whole afterward with a mixture of 0.5 part each of water of ammonia and solution of soda (Ger. Ph.); on cooling, a reddish-brown transparent jelly results which has an alkaline reaction and a pleasant taste. [Proc. of the Am. Pharm. Assoc., XXXVI (a, 14).]—**Globuli tartaratis ferri et lixivie.** See *Mertiol BALLS*.—**Hydrochloras ammoniacus cum sesquichlorato ferri.** See *IRON and ammonium chloride*.—**Lac ferri.** See *Lac ferratum*.—**Oxydum ferricum igne paratum.** See *IRON sesquioxide*.

**FERULA**.—**F. maxillarum.** See *GNATHOPLASTIX*.

**FEUER**.—**Höllisches F.** Erysipelas. [E.]—**Lebensf.** Vital force.

**FEUILLET**.—**F. séreux.** See *EPIBLAST*.—**F. végétatif.** See *Vegetative layer of the blastoderm*.

**FEVER**.—**Bubble f.** See *PEMPHIGUS*.

**FIEBER**.—**Niesef.** See *Hay FEVER*.—**Polkauf.** See *DENGUE*.—**Zinkf.** Fever associated with zinc poisoning. [a, 34.]

**FIEDER**.—**F'lappig.** See *PINNATILOBATE*.—**F'spaltig.** See *PINNATIFID*.

**FILARIA**.—**F. sanguinis hominis diurna.** Of Manson, an African form, probably the free embryo of *F. sanguinis*, that is found in the blood during the day. [a, 34.]—**F. sanguinis hominis perstans.** An African form constantly present in the blood. There is some evidence that connects it with the sleeping sickness. [a, 34.]

**FILIXOLIN**, n. Fil<sup>1</sup>i-i<sup>2</sup>x'o<sup>2</sup>l-i<sup>2</sup>n. A glyceride constituting the greater portion of the green liquid remaining after the separation of bilic acid from the ethereal extract of the rhizome of *Aspidium filix mas*. [B, 18-a, 35.]

**FILUM**.—**Fila olfactorii.** See *PROCESSUS bulbi olfactorii*.

**FISSURE**.—**Anterior cerebral f.** See *Preaglyrian f.*—**Anterior median f. of the medulla oblongata.** For the first clause of the def. substitute The continuation of the anterior median f. of the spinal cord upward on the anterior surface of the medulla.—**Great longitudinal f.** See *Great longitudinal f. of the brain*.—**Posterior cerebral f.** See *Occipital f.*—**Posterior median f. of the medulla oblongata.** Ger., *hintere Mittelspalte des ver-*

*längerten Marks*. The prolongation of the posterior longitudinal f. of the spinal cord upward on the posterior surface of the medulla. [L.]—**Posterior transverse f. (of the brain).** See *Inferior transverse f.*—**Tympanico-mastoid f.** See *MISSURA tympanico-mastoides*.—**Umbilical f.** See *Interlobar NOTCH of the liver*.

**FLAUMIG** (Ger.), adj. Fla<sup>2</sup>'u<sup>2</sup>m-i<sup>2</sup>g. See *PUBESCENT*.

**FLOCCULUS**.—**Flocculi retinae.** See *Ciliary PROCESSES of the retina*.

**FLOS**.—**F. sanguineus.** Fr., *fleur de sang, fleur sanguine*. Of Monardus, the *Tropaeolum majus*. [B, 121 (a, 35).]

**FOLLICLE**.—**Lenticular f's.** Of some authors, isolated or agminate lymphatic f's in the mucous membrane of the stomach resembling those of the intestine. [a, 45.]—**Meibomian f's.** See *MEIBOMIAN GLANDS*.

**FOOD**.—**F. of the gods.** 1. Cibus deorum, asafetida. 2. Chocolate. [a, 35.]

**FORAMEN**.—**Neural foramina.** 1. See *Intervertebral foramina*. 2. In the sing., see *Vertebral f.*—**Oesophageal f.** See *F. oesophageum*.—**Orbital foramina.** Small holes or canals in the walls of the orbit, which give entrance or exit to small vessels and nerves. [E.]

**FORCEPS**.—**Lithotritry f.** A f. having scoop-shaped extremities for seizing and crushing fragments of calculi in lithotritry. [a, 34.]

**FORMALIN**, n. Fo<sup>2</sup>r'm'a<sup>2</sup>l-i<sup>2</sup>n. An antiseptic consisting of a 40-per-cent. aqueous solution of formic aldehyde. [B, 108 (a, 14).]

**FORMOL**, n. Fo<sup>2</sup>r'm'o<sup>2</sup>l. A proprietary name for formic aldehyde; antiseptic and germicide. [a, 34.]

**FORMULA**.—**Dental f.** For canine,  $\frac{2-2}{1-1}$  substitute canine,  $\frac{2-2}{1-1}$ .

**FORTSATZ**.—**Krähenschnabelf.** The coronary process of the inferior maxilla. [a, 45.]

**FOSSA**.—**Anterior ileo-cæcal f.** See *F. ileo-cæcalis anterior*.—**Cæcal f.** See *F. cæcalis*.—**Orbital f.** The portion of the orbit formed by the frontal bone. [L.]—**Peritoneal fossæ.** The pouches or recesses lined with the peritoneum, e. g., the *recto-vesical f.* [L.]

**FOTUS**.—**F. nitricus.** See *FOMENTUM nitricum*.

**FRENJAK**, n. A Scandinavian name for epidemic syphilis. [a, 34.]

**FUCHS**.—**Greiff.** See *GRYPALOPLEX*.

**FUCHSINOPHILE**, n. Fuch<sup>2</sup>s'i<sup>2</sup>n-o<sup>2</sup>-fi<sup>2</sup>l. A cell or organism that is fuchsinophilous. [a, 34.]

**FUCHSINPHILOUS**, adj. Fuch<sup>2</sup>s-i<sup>2</sup>n-o<sup>2</sup>-fi<sup>2</sup>l-u<sup>2</sup>s. Readily stained with fuchsin.

**FURCHE**.—**Hautfn.** The creases or wrinkles in the skin over the joints or the shallow furrows extending between the hairs. [L, 31, 332.]—**Urethralf.** The groove upon the inner surface of the corpus cavernosum into which the corpus spongiosum fits. [L, 332.]

**FUSS**.—**Hackenf.** See *CALCANEUS*.

**GALLACETOPHENONE**, n. Ga<sup>2</sup>l'a<sup>2</sup>s-e<sup>2</sup>t-o<sup>2</sup>f'e<sup>2</sup>n-on. A derivative of pyrogallol in which an atom of hydrogen has been replaced by the acetyl group. It occurs as a yellowish brown powder; used externally in dermatopathies. [a, 34.]

**GALLANOL**, n. Ga<sup>2</sup>l'a<sup>2</sup>n-o<sup>2</sup>l. A white crystalline powder prepared by heating tannin with aniline; used topically in psoriasis and chronic eczema.

**GAMETOID**, n. Ga<sup>2</sup>m'e<sup>2</sup>t-oid. For deriv., see *GAMETE* and *-oid*.<sup>\*</sup> An apocytal structure that unites like a gamete. [a, 21.]

**GANGLION**.—**Maxillary g.** Meckel's lesser g. See *Submaxillary g.*—**Olfactory g.** See *Olfactory BULB*.

**GANGRENE**.—**Syphilitic g.** G. caused by the arterial degeneration due to syphilis. [a, 34.]

**GASTRITIS**.—**Chronic interstitial g.** See *Chronic sclerosis g.*

**GASTRODIAPHANE**, n. Ga<sup>2</sup>st'ro-di'a<sup>2</sup>-fan. From γαστήρ, the belly, and διαφανής, transparent. A soft-rubber tube at the end of which is fastened an electric lamp connected by wires with a battery. It is introduced into the stomach to render the wall of that organ translucent and the overlying parts semi-transparent for purposes of diagnosis. [a, 34.]

**GASTROHYSTEROPEXIA** (Lat.), n. f. Ga<sup>2</sup>st'ig'no<sup>2</sup>st'ro(ro<sup>2</sup>)-hi<sup>2</sup>st(hu<sup>2</sup>st'-e<sup>2</sup>r-o<sup>2</sup>)-pe<sup>2</sup>x'i<sup>2</sup>a<sup>2</sup>. From γαστήρ, the belly, ὑστέρη, the womb, and πῆξω, a fixing. Of Pozzi, hysteropexia. [a, 34.]

**GASTROHYSTERORRHAPHY**, **GASTROHYSTERO-SYNAPHY**, n's. Ga<sup>2</sup>st'ro-hi<sup>2</sup>st-e<sup>2</sup>r-o<sup>2</sup>-p<sup>2</sup>a<sup>2</sup>r'ra<sup>2</sup>-f'i<sup>2</sup>, -o-si<sup>2</sup>n'a<sup>2</sup>-f'i<sup>2</sup>. From γαστήρ, the belly, ὑστέρη, the womb, and ράφω, a suture, or συναφῆ, union. Of Sönger, hysteropexia. [a, 34.]

**GEMMULA**.—**G. embryonalis.** Ger., *Keimknöschen*. Gemmule (1st def.). [B, 123 (a, 35).]

**GENERATION**.—**Viviparous g.** At end of def. add free and alive.

**GENOCATACHRESIA** (Lat.), n. f. Je<sup>2</sup>n'o<sup>2</sup>(ge<sup>2</sup>n)'o(o<sup>2</sup>)-ka<sup>2</sup>t-(ka<sup>2</sup>t)-a<sup>2</sup>-kro<sup>2</sup>ch<sup>2</sup>as'i<sup>2</sup>a<sup>2</sup>. From γένος, sex, and κατὰχρησις, misuse. Of C. E. Warren, masturbation. [a, 34.]

**GENTIANA**.—**G. nana.** An Alpine European species with branching stem, distinct from *G. campestris*. [a, 35.]

**GENU**.—**G. of the internal capsule.** See *G. capsule interna*.

**GENU-CUBITAL**, adj. Je<sup>n</sup>u''u<sup>3</sup>-ku<sup>2</sup>/bi<sup>2</sup>-t'l. From *genu*, the knee, and *cubitus*, the forearm. Of a posture, characterized by the subjects resting on the elbows and knees.

**GENUFLEXURA** (Lat.), n. f. Je<sup>n</sup>(ge<sup>n</sup>)-u<sup>2</sup>(u<sup>4</sup>) fle<sup>2</sup>x-u<sup>2</sup>(ur)/-a<sup>3</sup>. From *genu*, the knee, and *flexura*, a bending. Ger., *Kniebeugung*. In botany, the bending of a part at an angle, also the angle itself. [B, 123 (a, 35).]

**GEÖHRT**.—Kleing'. See AURICULATE.

**GICTI** (Lat.), n. n., indecl. Ji<sup>2</sup>k(gi<sup>2</sup>k'/ti(ite)). See Grr (in Supplement).

**GINGIVITIS**.—G. blennorrhoea. Of Federn, Fauchard's disease. [a, 34.]

**GIT** (Lat.), **GITH** (Lat.), n's n., indecl. Ji<sup>2</sup>t(gi<sup>2</sup>t), ji<sup>2</sup>th(gi<sup>2</sup>th). Of the ancients, the *Nigella sativa*. [a, 35.]

**GLABRESCENT**, adj. Gla<sup>2</sup>b-re<sup>2</sup>s''nt. From *glabrescere*, to grow smooth. Lat., *glabrescens*. Ger., *kahlwerdend*. In botany, glabrate. [B, 123 (a, 35).]

**GLAND**.—Inframaxillary g's. See Submaxillary g's.—Innominate g. See GLANDULA innominata Galeni.—Orbital g. See Lacrymal g.

**GLANDE**.—G. muqueuse. An old term for the pituitary gland because it was supposed to secrete the nasal mucus. [a, 34.]

**GLISCHRURIA** (Lat.), n. f. Gli<sup>2</sup>sk(gli<sup>2</sup>sch<sup>2</sup>)-ru<sup>2</sup>r(rur)/i<sup>2</sup>-a<sup>3</sup>. From *γλίσχρος*, glutinous, and *οὐρον*, urine. See MUCINURIA.

**GLOBO-CELLULAR**, adj. Glob''o-se<sup>2</sup>l'u<sup>2</sup>l-a<sup>3</sup>r. Formed of round cells. [a, 34.]

**GLOBULICIDAL**, adj. Glo<sup>2</sup>b-u<sup>2</sup>l-i<sup>2</sup>-si'd'l. Capable of destroying red and white blood-corpuscles. [a, 34.]

**GLOSSOCOMIUM** (Lat.), n. n. Glo<sup>2</sup>s(glos)-so(so<sup>2</sup>)-kom(ko<sup>2</sup>m)/i<sup>2</sup>-u<sup>2</sup>m(u'm). See GLOSSOMION.

**GORGET**.—In 1st def., for *Stinerarium* substitute *Itinerarium*.

**GRAIN**.—In the 2d def., for "sixteenth" substitute "sixtieth."

**GROOVE**.—Intermediate g. See Intermediate fissure.

**GYNÆCOPHOBIA** (Lat.), n. f. Ji<sup>2</sup>n(gu<sup>2</sup>n)-e<sup>2</sup>k(a<sup>3</sup>-e<sup>2</sup>k)/o(o<sup>2</sup>)-fob(fo<sup>2</sup>b)/i<sup>2</sup>-a<sup>3</sup>. From *γυνή*, a woman, and *φόβος*, fear. Of Müller, a form of monomania characterized by exaggerated fear of women. [a, 34.]

**HÆMARUMASCOPE**, n. He<sup>2</sup>m-a<sup>3</sup>-ru<sup>2</sup>m/a<sup>3</sup>-skop. From *αἷμα*, the blood, *ρῦμα*, a stream, and *σκοπεῖν*, to examine. A graduated glass tube of fine calibre free at both extremities and bent symmetrically upon itself; one extremity has a bell-shaped expansion to facilitate application over a blood-vessel, and the tube contains a solution of frosaniline. It is used as a manometer. [a, 34.]

**HAHNENKAMM**.—Siebbehnh'. See CRISTA galli (1st def.).

**HAIR**.—Root-h's. See Radical h's.

**HAKEN**.—Scharfer H. See DECAPITATOR.—Tyrrell'scher H. See Tyrrell's hook.—Vertebrah'k. See Vertebral hook.

**HALBSTRAUCHIG** (Ger.), adj. Ha<sup>3</sup>lb'stra<sup>3</sup>-u<sup>2</sup>ch<sup>2</sup>-i<sup>2</sup>g. See SUFFRUTESCENS.

**HAPHALGESIA** (Lat.), n. f. Ha<sup>2</sup>ph(ha<sup>2</sup>f)-a<sup>2</sup>l(a<sup>2</sup>l)-jez(gas)/i<sup>2</sup>-a<sup>3</sup>. From *ἀφή*, touch, and *ἀλγος*, a sense of pain. Of Fitres, paræsthesia characterized by the production of an intense painful sensation by applying to the skin certain substances that, under normal conditions, only provoke an ordinary sensation of contact. [a, 34.]

**HELLEBORUS**.—H. americanus. The *Veratrum viride*. [a, 35].—*Tinctura hellebori viridis* [Ger. Ph. (1st ed.), Russ. Ph.]. See *Extractum hellebori viridis*.

**HEPATOPEXIA** (Lat.), n. f. He<sup>2</sup>p(hap)''a<sup>2</sup>t(a<sup>2</sup>b)/o(o<sup>2</sup>)-pe<sup>2</sup>x-(pax)/i<sup>2</sup>-a<sup>3</sup>. From *hēpar*, the liver, and *πῆξις*, a fixing. Of Faure, fixation of a displaced or floating liver by suturing the organ to the costal perichondrium. [a, 34.]

**HEPATORRHAPHY**, n. He<sup>2</sup>p-a<sup>2</sup>t-o<sup>2</sup>r-ra<sup>2</sup>f-i<sup>2</sup>. From *hēpar*, the liver, and *ρᾶψή*, a seam. An operation combining laparotomy and suture of the liver. [a, 34.]

**HEXAHYDROPHthalic ACID**, n. He<sup>2</sup>x''a<sup>3</sup>-hid-ro<sup>2</sup>f-tha<sup>2</sup>l/i<sup>2</sup>k. A dibasic crystalline acid, C<sub>6</sub>H<sub>10</sub>(CO.OH)<sub>2</sub>, occurring as small prisms or plates melting at about 205° C. [B, 3 (a, 38).]

**HILUM**.—In 1st line omit the word "form."

**HONEYSTONE**, n. Hu<sup>2</sup>n/i<sup>2</sup>-sto<sup>2</sup>n. See MELLITE.

**HORMION** (Lat.), n. n. Ho<sup>2</sup>r'm/i<sup>2</sup>-o<sup>2</sup>n. See PUNCTUM alæ vomeris.

**HYDRODERMIA** (Lat.), n. f. Hid(hu<sup>2</sup>d)-ro(ro<sup>2</sup>)-du<sup>2</sup>r'm(de<sup>2</sup>r'm)/i<sup>2</sup>-a<sup>3</sup>. From *ὕδωρ*, water, and *δέρμα*, the skin. Excessive activity of the sweat glands. [a, 34.]

**HYDROFERROCYANOUS**, adj. Hid''ro-fe<sup>2</sup>r-o-si/a<sup>2</sup>n-u<sup>2</sup>s. From *ὕδωρ*, water, *ferrum*, iron, and *κύανος*, a dark-blue substance. See FERROSO-HYDROCYANUS.

**HYDROPS**.—H. vaginæ tendinis. Serosus effusion within the sheath of a tendon.

**HYDROXYPYROCITRIC ACID**, n. Hid-ro<sup>2</sup>x''i<sup>2</sup>-pir-o-si<sup>2</sup>t'-ri<sup>2</sup>k. An acid of the constitution C<sub>5</sub>H<sub>6</sub>O<sub>5</sub> = C<sub>5</sub>H<sub>6</sub>O<sub>4</sub> + O. [B, 2.]

**HYGRODERMIA** (Lat.), n. f. Hig(hu<sup>2</sup>g)-ro(ro<sup>2</sup>)-du<sup>2</sup>r'm(de<sup>2</sup>r'm)/i<sup>2</sup>-a<sup>3</sup>. From *ὕγρως*, wet, and *δέρμα*, the skin. A non-inflammatory skin disease characterized by increased moisture. [a, 34.]

**HYOSCYAMUS**.—Cigarette hyoscyami. Cigarettes made of the dried leaves of h. wrapped in paper impregnated with an aqueous solution of h. extract. [B, 92 (a, 14).]

**HYPERICUM**.—Oleum hyperici. Oil of h., red oil; used as a popular remedy for bruises. [a, 35].—*Tinctura hyperici vul-*

*neraria*. Sp., *tintura alcohólica de hipérico vulneraria* [Sp. Ph.]. A preparation made by macerating 15 parts each of the flowering tops of *H. perforatum* and the rhizome of *Acorus calamus* for 8 days in 1,000 parts of diluted alcohol, adding 140 of crushed benzoin, 60 of Tolu balsam, and 15 of myrrh, macerating for 8 days more, expressing, and filtering through paper. [B, 95 (a, 14).]

**HYPERLEUCOCYTOSIS** (Lat.), n. f. Hip(hu<sup>2</sup>p)''u<sup>2</sup>r(e<sup>2</sup>r)-lu<sup>2</sup>k-o(o<sup>2</sup>)-sit(ku<sup>2</sup>t)-os/i<sup>2</sup>s. Gen., -os'eos (-is). From *ὑπέρ*, in excess, *λευκός*, white, and *κύτος*, a cell. An increase in the normal number of leucocytes in the blood. [a, 34.]

**HYPNOTO-THERAPEUTICAL**, adj. Hi<sup>2</sup>p''no<sup>2</sup>t-o-the<sup>2</sup>r-a<sup>2</sup>-pu<sup>2</sup>t/i<sup>2</sup>-k'l. Pertaining to the therapeutic use of hypnotism. [a, 34.]

**HYPOLEUCOCYTOSIS** (Lat.), n. f. Hip(hu<sup>2</sup>p)''o(o<sup>2</sup>)-lu<sup>2</sup>k-o(o<sup>2</sup>)-sit(ku<sup>2</sup>t)-os/i<sup>2</sup>s. Gen., -os'eos (-is). From *ὑπό*, under, *λευκός*, white, and *κύτος*, a cell. A diminution in the normal number of leucocytes in the blood. [a, 34.]

**HYPOSTENOCEPHALIA** (Lat.), n. f. Hi<sup>2</sup>ps(hu<sup>2</sup>ps)''o(o<sup>2</sup>)-ste<sup>2</sup>n-o(o<sup>2</sup>)-se<sup>2</sup>f(ke<sup>2</sup>f)-a<sup>2</sup>l(a<sup>2</sup>l)/i<sup>2</sup>-a<sup>3</sup>. From *ὑπό*, under, *στενός*, narrow, and *κεφαλή*, the head. Concurrent hypsocephaly and stenoccephaly. [a, 34.]

**HYSTERECTOMOPEXIA** (Lat.), n. f. Hi<sup>2</sup>st(hu<sup>2</sup>st)-e<sup>2</sup>r-e<sup>2</sup>k''-to<sup>2</sup>m-o(o<sup>2</sup>)-pe<sup>2</sup>x-(pax)/i<sup>2</sup>-a<sup>3</sup>. From *ὑστέρα*, the uterus, *ἐκτομή*, excision, and *πῆξις*, a fixing. Fixation of the body of the uterus after excision of a portion of the organ. [a, 34.]

**HYSTEROCAUTOMY**, n. Hi<sup>2</sup>st''e<sup>2</sup>r-o-ka<sup>2</sup>t/o<sup>2</sup>m-i<sup>2</sup>. From *ὑστέρα*, the uterus, *καίειν*, to burn, and *τομή*, a cutting. Amputation of the cervix uteri with a thermo-cautery. [a, 34.]

**HYSTEROGASTORRHAPHY**, n. Hi<sup>2</sup>st''e<sup>2</sup>r-o-ga<sup>2</sup>-st-ro<sup>2</sup>r''-a<sup>2</sup>f-i<sup>2</sup>. From *ὑστέρα*, the uterus, *γαστήρ*, the belly, and *ρᾶψή*, a suture. Of Candela, dilatation of the cavity of the uterus and suture of the fundus to the abdominal wall by means of a long needle introduced by the uterine canal. [a, 34.]

**HYSTEROPEXIA**.—False h. Morbid fixation of the body of the uterus. [a, 34.]

**ICHTHYOCOLLA**.—Emplastrum ichthyocollæ. See COURT PLASTER.—*Gelatina ichthyocollæ* [Swed. Ph., 1817]. A preparation made by boiling 12 parts of isinglass for 2 hours in 168 parts of water, and adding 4 parts of sugar and 1 part each of Rhine wine and lemon-juice. [B, 97 (a, 14).]

**ICTERUS**.—I. verus. See JAUNDICE.

**ILIACUS**.—I. magnus. See I. internus.

**ILICIUM**.—Oleum illicii anisati. Fr., *huile volatile de badiane* [Fr. Cod.], *essence de badiane*. Ger., *Sternanisöl*. Syn.: *oleum badiant*. Oil of star-anise, consisting chiefly of solid anethol (anise camphor) and liquid anethol, distilled from the fruit of *I. anisatum*. It congeals at about 2° C., but otherwise has nearly the same properties as oil of anise (see *Oleum ANISI*), and furnishes most of the latter found in commerce. [B, 5 (a, 35).]

**IMPRESSION**.—For Material i. substitute Maternal i.

**INCUDO-ORBITULAR**, adj. I<sup>2</sup>n<sup>2</sup>''ku<sup>2</sup>d-o-o<sup>2</sup>rb-i<sup>2</sup>k''u<sup>2</sup>l-a<sup>3</sup>r. See INCO-ORBITULAR.

**INJECTIO**.—I. euprata. An old preparation made by adding 48 drops of a 6-per-cent. solution of copper ammoniosulphate in 1 pint of water; used in blennorrhagia and menorrhagia. [B, 97 (a, 14).]

**INSANITY**.—Arthritic i. I. supposed to be caused by rheumatism or gout. [a, 34].—Egressing i. I. growing out of a former disease of which it is an exaggeration. [A, 540 (a, 34)].—Protopathic i. 1. Idiopathic i. 2. I. caused by disorder of or developmental changes in the encephalon. [A, 540 (a, 34).]

**INTERMITTENS**.—I. larvata. For "Marked ague" substitute Masked ague.

**INTERTRIGO**.—I. scrotalis. I. affecting the scrotum. [G.]

**IODOPYRINE**, n. I-o<sup>2</sup>d-o<sup>2</sup>p/i<sup>2</sup>r-on. A one-atom iodine substitution compound of antipyrine; white, colorless, silky needles, tasteless and odorless; used as an antipyretic. [a, 34.]

**ODOZONE**, n. I-o<sup>2</sup>d-o-zon. A liquid formed by a combination of iodine and ozone; used as an antiseptic. [a, 34.]

**IODUM**.—Potio resolvens ex iodo. See Solution d'iodeure de POTASSIUM.

**ISATIS**.—I. tinctoria. For dyer's wood, substitute dyer's wood.

**ISOLATED**, adj. I<sup>2</sup>s/o<sup>2</sup>l-at-e<sup>2</sup>d. Fr., *isolé*. Ger., *isolirt*. Of a patient, kept apart for the purpose of preventing the spread of his disease to other persons.

**ISONITROSOANTIPYRINE**, n. I<sup>2</sup>s''/o-ni-tros''o-a<sup>2</sup>n-ti<sup>2</sup>p/i<sup>2</sup>r-en. A compound of nitric acid and antipyrine, C<sub>11</sub>H<sub>11</sub>H<sub>3</sub>O<sub>3</sub>, occurring in small bluish-green crystals. It is used as a diaphoretic, diuretic, and febrifuge. [a, 34.]

**ISTHMUS**.—I. of the external auditory meatus. The line of union of the middle and inner thirds of the osseous portion of the meatus, at which point the calibre of the canal is the narrowest. [F, 32.]

**JALAPA**.—Massa pilularum resinæ jalapæ [Dan. Ph., Norw. Ph.]. See SAPO jalapinus.

**JATRORRHIZA** (Lat.), n. f. Ja<sup>2</sup>t(ya<sup>2</sup>t)-ro<sup>2</sup>r-ri(i<sup>2</sup>)/i<sup>2</sup>-a<sup>3</sup>. A genus of the *Menispermaceæ*. [a, 35].—J. calumbia. J. palmata. The sources of calumbia. They are now regarded as forms of the same species (see *Cocculus palmatus*), a climbing plant indigenous to the forests of eastern Africa. [a, 35.]

**JODIRT** (Ger.), adj. Yod-ert'. See IODIZED.  
**JOINT**.—**Saddle-j.** Ger., *Sattelgelenk*. See ARTICULATION *par emboîtement réciproque*.  
**JUGLANS**.—**Extractum juglandis corticis**. See *Extractum juglandis fructuum immaturorum*.  
**JUICE**.—**Testicular j.** See under *Brown-Séquard's* ELIXIR.  
**JUJUBE**.—Italian jujubes. See under J.  
**JUNIPERUS**.—**Ætheroleum juniperi**. See Oil of JUNIPER.  
**J. chinensis**. A Chinese species with decurrent, umbricated closely packed leaves. [B, 71 (a, 14).]

**KALI**.—**Syrupus k. sulphurati**. Fr., *sirop béchique de Wilis*. A syrup consisting of 15 parts of liver of sulphur, 135 each of water and fennel-water, and 480 of sugar. [B, 119 (a, 38).]

**KATABOLIN**, n.  $Ka^2t-a^2b/o^2l-i^2n$ . Any substance produced by katabolism. [a, 34.]

**KELORRHAPHY**, n.  $Kel-o^2r-ra^2f-i^2$ . From *κῆλη*, a tumor, and *ράφῃ*, a suture. See ORCHIDORRHAPHY.

**KENOPHOBIA** (Lat.), n. f.  $Ke^2n-o(o^2)-fob(fo^2b)/i^2-a^2$ . From *κενός*, empty, and *φόβος*, fear. See AGORAPHOBIA.

**KERAUNONEUROSIS** (Lat.), n. f.  $Ke^2r-a^2n''(a^2)/u^4-no(no^2)-nu^2r-os/i^2a$ . Gen., *-os/eos (-is)*. From *κεραυνός*, a thunderbolt, and *νεῦρον*, a nerve. Any neurosis resulting from a stroke of lightning. [a, 20.]

**KINESIOTHERAPY**, n.  $Ki^2n-e^2s/i^2o-the^2r/a^2-pi^2$ . See CIN-ESTHERAPY.

**KNESMOS** (Lat.), n. m.  $Ne^2s(knas)/mo^2s$ . Gr., *κνησμός*. See CNESMUS.

**KNIFE**.—**Concealed k.** Fr., *lancette cachée*. A k. in which the blade is concealed in the handle or in a cannula. [a, 34.]

**KNOCHEN**.—**Schläfenk'**. See Temporal BONE (1st def.).—**Schlussek'**. See Wormian BONES.—**Secundäre Handwurzelk'**. See *Ossa carpi accessoria*.—**Spitzenk'**. See *Oss interparietale* (2d def.).—**Urethralrk'**. A bony deposit around the male urethra. [L, 57 (a, 14).]

**KNOPF**.—**Markk'**. See MEDULLA oblongata.

**KNORPEL**.—**Grössere Nasenflügelk'**. See Alar CARTILAGES.—**Hintere Nasenflügelk'**, **Kleinere Nasenflügelk'**. See Epactal CARTILAGES.—**Seitenwandk'**. See Upper lateral CARTILAGES of the nose.—**Seitliche Nasenk'**. See Alar CARTILAGES.—**Symphysenk'**. The interarticular cartilage of a symphysis.—**Untere Nasenk'**, **Untere Seitenk'**, **Vordere Nasenflügelk'**. See Alar CARTILAGES.

**KNOT**.—**Life k.** See Respiratory CENTRE.—**Milk k.** Ger., *Milchnoten*. A nodule in an inflamed breast, due to stasis of milk in the lactiferous ducts.—**Vital k.** See Respiratory CENTRE.

**KOROSCOPY**, n.  $Kor-o^2s/ko^2p-i^2$ . From *κόρη*, the pupil, and *σκοπεῖν*, to examine. See SKIASCOPY and KERATOSCOPY.

**KÖRPER**.—**Muschelbeink'**. The portion of the inferior turbinate bone from which its processes spring. [L.]

**KURZGESTIELT** (Ger.), adj.  $Kur^2s/ge^2-stelt$ . See PEDICULATE.

**KÜSTENBEWOHNEND** (Ger.), adj.  $Ku^2st/e^2n-be^2-von-e^2nd$ . See LITTORAL.

**LACRYMEFORM**, adj.  $La^2k/ri^2m-e^2-fōrm$ . Lat., *lacrimae-formis* (from *lacrima*, a tear, and *forma*, form). Fr., *larmaire*. Ger., *thränenförmig*. Tear-shaped (said of certain seeds). [a, 35.]

**LACTOGLOBIN**, n.  $La^2k-to-glob/i^2n$ . From *lac*, milk, and *globus*, a ball. A globulin present in colostrum; the report that it was also present in milk has not been confirmed. [a, 34.]

**LAMINA**.—**Lamine medullares nuclel lenticularis**. See Medullary laminae of the lenticular nucleus.—**L. medullaris des Thalamus** (Ger.). See Inner medullary l.

**LAPATHUM**.—**Infusum lapathi**. Fr., *infusion de patience* [Fr. Cod., 1837]. A preparation made by infusing 32 parts of the root of *Rumex aquaticus* and 12 of licorice-root for 4 hours in 1,000 of boiling water and straining. [B, 119 (a, 14).]

**LAPIS**.—**Morochtus l.** A white earth found in Egypt; supposed to be a species of fuller's earth or an earth containing magnesia. [L, 50, 105 (a, 46).]

**LAUROTETANINE**, n.  $La^2r''o-te^2t/a^2n-en$ . An alkaloid obtained from various plants of the *Laurineae* that produces strong tetanic symptoms. [a, 34.]

**LAW**.—**Gudden's l.** The l. that lesions of the cerebral cortex do not produce lesions of the peripheral nerves. [a, 34.]

**LENTISCUS**.—**Lignum lentisci**. The wood of *Pistacia l.* [a, 35.]

**LEPROSY**.—**L. of South America**. L. occurring in South America. [a, 34].—**L. of the Antilles**. L. occurring in the Antilles. [a, 34.]

**LETHEMANIA** (Lat.), n. f.  $Le^2th(lath)-e^2(a)-o(o^2)-man(ma^2n)/i^2-a^2$ . From *λήθη*, forgetfulness, and *mania*, madness. An insane longing for narcotics or anesthetics. [a, 34.]

**LICHEN**.—**Inflammatory l. pilaris**. Change the reference to See ICHTHYOSIS follicularis.

**LIGAMENT**.—**L. de dent**. See ODONTODESMION.—**Superficial transverse l. of the fingers**. A band of fibrous tissue which stretches across the roots of the four fingers. [C.]—**Vaginal l's of the hand**. Strong bands which bind the flexor tendons down to the fingers. [C.]

**LIMBUS**.—**L. laminae spiralis**. See ZONA choriacea.

**LINEA**.—**Lineae Douglassii** [Ger. Anat. Soc.]. See Recto-uterine FOLDS.

**LIQUOR**.—**L. stibiatum cum aconito**. A preparation consisting of 16 parts of extract of aconite, 28 of powdered guaiac resin, 5 of golden sulphur of antimony, 120 of glycerinated honey, and 840 of water. [B, 119 (a, 38).]

**LITHARGYRUM**.—**Unguentum lithargyri**. See Unguentum acetatis PLUMBI.

**LITCHI** (Chin.), n. Written also *lichti*. The fruit of the *Nephelium l.* (the l. tree). [a, 35.]

**LITHOTRITLAPAXY**, n.  $Li^2th-o-tri^2t/la^2p-a^2x-i^2$ . From *λίθος*, a stone, *terere*, to rub, and *λάπάσσειν*, to empty. Of Keith, perineal or urethral lithotripsy and removal of the fragments of the calculi by syringing out the bladder. [a, 34.]

**LOBULE**.—**Postero-parietal l. of the cerebrum**. See PRÆCUNEUS.

**LOBULUS**.—**L. cerebri frontalis inferior**. See Subfrontal GYRUS.—**L. cerebri frontalis superior**. See Superfrontal GYRUS.

**LORETINE**, n.  $Lo^2r-et/en$ . A variety of quinoline, a yellow crystalline powder, inodorous and but slightly soluble; used as a local antiseptic. [a, 34.]

**LOSOPHAN**, n.  $Lo^2s'o-fa^2n$ . A colorless crystalline substance containing nearly 80 per cent. of iodine; used topically in skin diseases. [a, 34.]

**LUMBODYNIA** (Lat.), n. f.  $Lu^2m(lu^4m)-bo(bo^2)-di^2n(du^2n)/i^2-a^2$ . From *lumbus*, the loin, and *δύσνη*, pain. See LUMBAGO.

**LUSTRAL**, n.  $Lu^2s'tr'l$ . From *lustrare*, to purify. A material for surgical dressings made from flax; it is more absorbent than cotton. [a, 34.]

**LYMPHANGIOFIBROMA** (Lat.), n. n.  $Li^2mf(lu^4mf)-a^2n-(a^2n^2)-ji^2/(ge^2/i^2)-o(o^2)-fi(fe)-bro^2ma^2$ . From *lymphā*, lymph, *αγγειον*, a vessel, and *fibra*, a fibre. A neoplasm containing the structural elements of a lymphangioma and a fibroma. [a, 34.]

**MACRENCEPHALIC**, adj.  $Ma^2k-re^2n-se^2f-a^2/i^2k$ . From *μακρός*, large, and *ἐγκέφαλος*, the brain. Having a large brain. [a, 34.]

**MACRURA** (Lat.), n. n. pl.  $Ma^2k(ma^2k)-rur/a^2$ . From *μακρός*, long, and *οὐρά*, the tail. The long-tailed decapods (*Decapoda m.*), a section of the *Anomura*, including the lobster, prawn, etc. [a, 35.]

**MACULA**.—**M. acustica of the utricle**. A yellow, thickened, and opaque spot upon the median wall of the utricle about 2 mm. in diameter, caused by the deposition of otoconia. [F.]—**Maculae cribrosae of the vestibule**. Certain spots or regions on the crista vestibuli, as well as on the floor of the two vestibular recesses, which contain a number of foramina intended for the passage of the fibres of the vestibular nerve. [F.]—**M. cutanea**. Any pigmentary spot on the skin, especially if congenital. [a, 14.]

**MAGNESIA**.—**Magnesia hypocarbonas** (seu subcarbonas). See MAGNESIUM subcarbonate.—**M. salicylica**. See MAGNESIUM salicylate.—**M. silicea**. See MAGNESIUM silicate.—**M. valerianica**. See MAGNESIUM valerianate.

**MAIDISMUS** (Lat.), n. m.  $Ma(ma^2)-i^2d-i^2s/mu^2s(mu^4s)$ . From *mais*, maize. See PELLAGRA.

**MALACINE**, n.  $Ma^2l/a^2s-en$ . From *μαλακός*, soft. A salicylic derivative of phenacetine, insoluble in water, but moderately soluble in alcohol; used in rheumatism. [a, 34.]

**MALLEOLUS**.—**External m.** and **Internal m.** Forcheville substitute *cheville*.

**MATTOID**, n.  $Ma^2t/o'id$ . Of Lombroso, an individual whose mind is the product of culture and a high degree of civilization, but who is a monomaniac or "crank." [a, 34.]

**MEDIA** (Lat.), n., f. of adj. *medius*, middle (*tunica* understood). The middle coat (as of an artery).

**MEDICINE**.—**Conservative m.** A method of treatment that aims to preserve and support the vital forces. [a, 34.]

**MELANCHOLIA**.—**M. misanthropica**. Of Guislain, a form of active m. in which the patient seeks solitude and avoids contact with mankind. [a, 34.]

**MELANOMA**.—**M. iridis**. M. affecting a portion of the iris. [a, 34.]

**MENTULATUS**, adj.  $Me^2nt-u^2l(u^4l)-at(a^2)/u^2s(u^4s)$ . From *mentula*, the penis. Having a large penis. [a, 34.]

**MEROCYTES**, n. pl.  $Me^2r'o-sits$ . From *μέρος*, a part, and *κύτος*, a cell. Ger., *Merozyten*. Of Lang, the nucleated masses of protoplasm in meroblastic ova which finally form the blastoderm and use the nutritive yolk for food. [J, 215.]

**MESATIKERKIC**, adj.  $Me^2s-a^2t-i^2-ku^2rk/i^2k$ . From *μέσartos*, midmost, and *κερκis*, the radius. Intermediate between dolichokerkic and brachykerkic. [L.]

**MESATIPELLIC**, adj.  $Me^2s-a^2t-i^2-pe^2l/i^2k$ . From *μέσartos*, midmost, and *πέλαα*, a bowl. Having a pelvis in which the transverse exceeds the conjugate diameter, though not so much as in the platypellie pelvis. [a, 34.]

**MESOPLAST**, n.  $Me^2s'o-pla^2st$ . From *μέσος*, middle, and *πάσσειν*, to mold. The material of the nucleus of a cell. [a, 34.]

**MESSER**.—**Ritzm'**. See LANCET and SCARIFICATOR.

**METABOLIN**, n.  $Me^2t-a^2b/o^2l-i^2n$ . From *μεταβολή*, a change. See METABOLITE.

**METAPSYCHOSIS** (Lat.), n. f.  $\text{Me}^2\text{t-a}^3\text{-si}^2\text{k}(\text{psu}^2\text{ch}^2)\text{-os}^2\text{i}^2\text{s}$ . Gen., *-chos'eos (-is)*. From *μετα*, over, and *ψύχσις*, a giving of life. Transmigration of the soul. [a, 34.]

**METHYLARSEN**, n.  $\text{Me}^2\text{th-i}^2\text{l-a}^3\text{rs}^2\text{e}^2\text{n}$ . See ARSEN METHYL.

**METHYL CHLORIDE**, n.  $\text{Me}^2\text{th-i}^2\text{l klor}^2\text{i}^2\text{d}(\text{id})$ . A mobile, etherlike smelling liquid,  $\text{CH}_3\text{Cl}$ , discovered by Dumas and Peligot, slightly soluble in water, but dissolving readily in alcohol; used to produce local anesthesia. [B, 3 (a, 14); a, 34.]

**METOPISM**, n.  $\text{Me}^2\text{t-op-i}^2\text{zm}$ . From *μέτωπον*, the forehead. A condition of the human skull in which the midfrontal suture persists. [a, 34.]

**METROCYTE**, n.  $\text{Me}^2\text{t-ro-sit}$ . From *μήτηρ*, a mother, and *κύτος*, a cell. A cell that gives origin to daughter cells. [a, 34.]

**MICROBICIDE**, n.  $\text{Mi}^2\text{k-rob-i}^2\text{-sid}$ . A substance that is toxic to micro-organisms. [a, 34.]

**MICROCIDINE**, n.  $\text{Mi}^2\text{k-ro-sid}^2\text{en}$ . From *μικρός*, small, and *cadere*, to kill. A whitish powder obtained by fusing β-naphthol with caustic soda; non-poisonous and powerfully antiseptic. [a, 34.]

**MICRONECROSIS** (Lat.), n. f.  $\text{Mi}^2\text{k}^2\text{'ro(ro)}^2\text{-ne}^2\text{k-ro}^2\text{-s}^2\text{i}^2\text{s}$ . Gen., *-ros'eos (-is)*. From *μικρός*, small, and *νεκρωσις*, necrosis. Necrosis of histological elements, as in inflammation. [a, 34.]

**MICROPHONE**, n.  $\text{Mi}^2\text{k-ro-fon}$ . From *μικρός*, small, and *φωνή*, a sound. An electrical instrument that renders very slight sounds audible. [a, 34.]

**MICROPHONOPHOBIA** (Lat.), n. f.  $\text{Mi}^2\text{k}^2\text{'ro(ro)}^2\text{-fon}^2\text{'o}^2\text{(o)}^2\text{-fob(fob)}^2\text{i}^2\text{-a}^3$ . From *μικρός*, small, *φωνή*, a sound, and *φόβος*, fear. Of Juhel-Renoy, a morbid dread of slight sounds. [a, 34.]

**MICROPHOTOGRAPH**, n.  $\text{Mi}^2\text{k-ro-fot-o-gra}^2\text{f}$ . From *μικρός*, small, *φώς*, light, and *γράφειν*, to write. A minute photograph of a large object. [a, 34.] Cf. PHOTOMICROGRAPH (in Supplement).

**MICROSTHENIC**, adj.  $\text{Mi}^2\text{k-ro}^2\text{-s-then}^2\text{'ik}$ . From *μικρός*, small, and *σθένος*, strength. Having slight muscular power. [a, 34.]

**MICROTRICHIA** (Lat.), n. f.  $\text{Mi}^2\text{k(mek)-ro(ro)}^2\text{-tri}^2\text{k(tri)}^2\text{ch}^2\text{y}^2\text{-i}^2\text{-a}^3$ . From *μικρός*, small, and *τριξ*, a hair. A condition in which the hair is extremely fine. [a, 34.]

**MISOLOGIA** (Lat.), n. f.  $\text{Mi}^2\text{s(mes)-o(o)}^2\text{-loj(lo}^2\text{g)}^2\text{-i}^2\text{-a}^3$ . From *μῖσος*, hatred, and *λόγος*, understanding. An unreasoning hatred of historical matters. [a, 540 (a, 34).]

**MISOMANIA** (Lat.), n. f.  $\text{Mi}^2\text{s(mes)-o(o)}^2\text{-ma(ma)}^2\text{'ni}^2\text{-a}^3$ . From *μῖσος*, hatred, and *μανία*, madness. See DÉLIRE des persécutions.

**MERISMOPEDIA** (Lat.), n. f.  $\text{Me}^2\text{r(mo}^2\text{-e}^2\text{r)}^2\text{-i}^2\text{s-mo(mo)}^2\text{-ped(pe}^2\text{d)}^2\text{i}^2\text{-a}^3$ . See SARCINA.

**MONOBROMTOLUENE**, n.  $\text{Mo}^2\text{n-o-brom-to}^2\text{l-u}^2\text{-e}^2\text{n}$ . A bromine substitution product,  $\text{C}_6\text{H}_4\text{Br}^2\text{CH}_3$ , of toluene, known in three isomeric varieties. [B, 3 (a, 14).]

**MONONITROBENZOIC ACID**, n.  $\text{Mo}^2\text{n-o-nit-ro-be}^2\text{nz-o}^2\text{'i}^2\text{k}$ . The compound  $\text{C}_6\text{H}_4(\text{NO}_2)\text{CO}_2\text{OH}$ , known in three isomeric varieties. [B, 3 (a, 38).]

**MONOPSYCHOSIS** (Lat.), n. f.  $\text{Mo}^2\text{n-o(o)}^2\text{-si}^2\text{k}(\text{psu}^2\text{ch}^2)\text{-os}^2\text{i}^2\text{s}$ . Gen., *-chos'eos (-is)*. From *μόνος*, alone, and *ψύχσις*, psychosis. See MONOMANIA.

**MTURABOAH**, n. An antipyretic recently introduced from Liberia, said to be derived from the *Melanthera Brownii*. [B, 270 (a, 14).]

**MUSCLE**.—**M. de Treitz** (Fr.). See SUSPENSEUR du duodénum. —**Oesophageal m.** The transverse muscular fibres surrounding the upper end of the oesophagus. [a, 34.] —**Omo-hyoid m.** A m. arising from the upper border of the scapula, and occasionally from the transverse ligament that crosses the suprascapular notch. It has two bellies, the posterior of which forms a flat fasciculus that inclines forward across the lower part of the neck, behind the sterno-mastoid, where it becomes tendinous; it then changes its direction, forming an obtuse angle, and the anterior belly ascends almost vertically upward, close to the outer border of the sterno-hyoid, to be inserted into the lower border of the body of the hyoid bone. [a, 34.] —**Orbital m.** A set of fibres of the orbicularis palpebrarum m. lying beneath the tendon of the levator palpebræ. [a, 34.] —**Pterygo-maxillary m's.** The pterygoid m. [a, 34.] —**Pterygo-palatine m.** A fasciculus of the levator palati that extends from the hamular process to the palate. [a, 34.] —**Pyloric m.** The sphincter fibres of the pylorus. [a, 34.] —**Rouget's m.** The circular fibres of the ciliary m. [a, 34.] —**Ruysch's uterine m.** A bundle of fibres at the fundus uteri. [a, 34.]

**MUSICOMANIA** (Lat.), n. f.  $\text{Mu}^2\text{z(mus)}^2\text{'i}^2\text{k-o(o)}^2\text{-ma(ma)}^2\text{'ni}^2\text{-a}^3$ . From *μουσική*, music, and *μανία*, madness. Also written *monomania*. A monomania caused by excessive devotion to music. [A, 540 (a, 34).]

**MUSICOTHERAPY**, n.  $\text{Mu}^2\text{z}^2\text{'i}^2\text{k-o-the}^2\text{r-a}^2\text{p-i}^2$ . From *μουσική*, music, and *θεραπεία*, medical attendance. The therapeutic use of music. [a, 34.]

**MYGALE**.—Omit the 2d def.

**MYRRH**.—**Balsam of m.** Fr., *baume de myrrhe*. See M. (1st def.).

**NAPHTHALENE**.—**N. yellow.** A brilliant yellow dye-stuff obtained by treating an acid solution of n. with calcium, potassium, or ammonium nitrate; it forms yellow needles soluble in water and in alcohol. [a, 14.]

**NAPHTHOPYRINE**, n.  $\text{Na}^2\text{f-tho}^2\text{p-i}^2\text{r-en}$ . A compound of antipyrine with naphthol; used as an intestinal antiseptic. [a, 34.]

**NATRIUM**.—**N-nitroferri cyanid.** For See SODIUM ferricyanide, substitute See SODIUM nitroferri cyanide (in Supplement).

**NEIGEUX**.  $\text{Ne}^2\text{-zhu}^2$ . See GLACIAL.

**NEMATHECIUM** (Lat.), n. n.  $\text{Ne}^2\text{m(nam)-a}^2\text{-thes(thak)}^2\text{'i}^2\text{-u}^2\text{s(mu)}^2\text{m}$ . From *νήμα*, a thread, and *θήκη*, a case. Ger., *Fädengehäuse*. A wart-like formation on the thallus of certain *Algae*; said to consist of moniliform crowded threads and to produce tetraspores. [a, 35.]

**NEMOBLAST**, n.  $\text{Ne}^2\text{m'o-bla}^2\text{st}$ . From *νήμα*, a thread, and *βλαστός*, a sprout. Fr., *némoblaste*. In botany, a filiform embryo. [B, 38 (a, 14).]

**NEONATUS** (Lat.), n. m.  $\text{Ne}^2\text{(ne}^2\text{)-o(o)}^2\text{-nat(na}^2\text{'t-u}^2\text{s(u)s)}$ . From *neos*, young, and *nasci*, to be born. Fr., *nouveau-né*. Ger., *Neugeborener*. A new-born infant. [L, 50 (a, 14).]

**NERVE**.—**Andersch's n.** See Jacobson's n. —**Antagonistic n's.** N's which antagonize the action of each other. [L.] —**Bell's n.** See Posterior thoracic n's. —**Compound n's.** Motor-sensory n's. N's containing motor and sensory fibres. [L.] —**Respiratory n's of the face.** See Facial n's. —**Trachelo-diaphragmatic n.** Fr., *nerf trachelodiaphragmatique*. Ger., *Halszwerchfellnerv*. Of Chassier, the fourth cervical n. [L, 41, 50 (a, 14).]

**NERVUS**.—**N. abdomino-genitalis superior.** See Nio-hypogastric NERVE. —**N. Anderschii.** See Jacobson's NERVE. —**N. auricularis vagi.** Auricular branch of the pneumogastric nerve. [L.] —**N. cardiacus anticus.** See Superior cardiac NERVE. —**N. cardiacus internus.** See Middle cardiac NERVE. —**N. cardiacus minor.** See Inferior cardiac NERVE. —**Nervi entobanontes.** See ENTOBANONTES. —**N. intercostalis Willisii.** See Sympathetic NERVE. —**N. quinti recurrens.** See Vidian NERVE. —**N. recurrens nervi trigemini.** See Vidian NERVE. —**N. splanchnicus secundus.** See Small splanchnic NERVE. —**N. splanchnicus supremus.** See Great splanchnic NERVE. —**N. trisplanchnicus.** See Sympathetic NERVE. —**N. tympanico-lingualis.** See CHORDA tympani. —**N. vocalis.** See Pneumogastric NERVE.

**NEURALGIA**.—**Trigeminal n.** N. affecting the trigeminal nerve. [a, 34.]

**NEURITIS**.—**Centripetal n.** Of W. Gerstang, a preferable term to "peripheral n.," as the malady usually ascends and affects the nerve trunks. [a, 34.]

**NEURODERMATOSIS** (Lat.), n. f. pl.  $\text{Nu}^2\text{r}^2\text{'o(o)}^2\text{-du}^2\text{r-m}^2\text{(de}^2\text{r-m)-a}^2\text{t(a}^2\text{t)-os}^2\text{i}^2\text{s}$ . See DERMATONEUROSIS.

**NEUROPYRA** (Lat.), n. f.  $\text{Nu}^2\text{r-o}^2\text{p-i}^2\text{r(u}^2\text{r)-a}^3$ . From *νεύρον*, a nerve, and *πύρ*, fever. See Nervous FEVER.

**NIDUS**.—**N. cochlearis.** See Accessory auditory NUCLEUS.

**NIERE**.—**Schwangerschaft'n.** The inflamed kidney of pregnancy. [a, 34.] —**Stamm'n.** See ARCHINEPHRON.

**NITRACROL**, n.  $\text{Nit-ra}^2\text{k-ro}^2\text{l}$ . Fr., n., *cholacrol*. A substance of the doubtful formula  $\text{C}_6\text{H}_4(\text{NO}_2)\text{O}_2$ , obtained by the action of nitric acid on choleic acid. [B, 93 (a, 14).]

**NODOSITY**.—**Bouchard's nodosities.** Nodosities of the fingers associated with dilatation of the stomach. [L.]

**NOTCH**.—**Sciatic n.** See Great sciatic n.

**OBLIQUUS**.—**O. ascendens.** See O. abdominis internus. —**O. descendens.** O. descendens externus. See O. abdominis externus. —**O. oculi longus.** See O. oculi superior.

**ODAXESMUS**.—Add 2. Of M. Hall, biting of the tongue, cheek, or lip in an epileptic fit. [A, 540 (a, 34).]

**ODOR**, n.  $\text{Od}^2\text{o}^2\text{r}$ . Lat., o. Fr., *odeur*. Ger., *Geruch*. See SMELL.

**OIOCALYMMMA** (Lat.), n. n.  $\text{O}^2\text{'i}^2\text{-o(o)}^2\text{-ka}^2\text{'l(ka}^2\text{)-i}^2\text{m(u}^2\text{e}^2\text{m)-ma}^2$ . Geh., *-ym'atos (-atis)*. From *ώον*, an egg, and *κάλυμμα*, a hood. Lat., *membrana ovuli corticalis*. Ger., *äussere Eihülle* (oder *Schalenhaut*). The outer cortical membrane of the ovum. [L, 50 (a, 14).]

**OLDFIELDIA**, n. f.  $\text{Old-feld}^2\text{i}^2\text{-a}^3$ . A genus of the *Euphorbiaceæ* (according to some, of the *Sapindaceæ*). [a, 35.] —**O. africana.** African oak (or teak). [a, 35.]

**OLEARIA** (Lat.), n. f.  $\text{Ol}^2\text{-e}^2\text{-a(a)}^2\text{'ri}^2\text{-a}^3$ . From *Olearius*, a proper name. Fr., *oléaire*. A genus of the *Asteroidææ*. [a, 14.] —**O. argophylla.** Muskwood, silver-leaved musk-tree; a Tasmanian plant. The leaves emit the odor of musk. [B, 19, 275 (a, 35).]

**ÖLIGT** (Ger.), **ÖLIG** (Ger.), adj's.  $\text{U}^2\text{l}^2\text{'i}^2\text{ch}^2\text{t}^2\text{-i}^2\text{g}$ . See ONLY and OLEAGINOUS.

**ONTOMANIA** (Lat.), n. f.  $\text{On}^2\text{'i}^2\text{-o(o)}^2\text{-ma(ma)}^2\text{'ni}^2\text{-a}^3$ . From *όντος*, to be bought, and *μανία*, madness. Of Magnan, a mania for spending money for all kinds of articles. [a, 34.]

**OPERATION**.—**Knapp's o. for symblepharon.** 6. The lid is carefully dissected up from its adhesions to the cornea and sclera for some distance beyond the insertion of the inferior rectus muscle. Then from this detached portion all useless cicatricial and granulation tissue is to be cut away. In order to cover up this loss of substance, the ocular conjunctiva is dissected upon both sides from the corneal margin from 7 to 9 mm upward by making two vertical incisions and then dissecting out two quadrangular flaps upward, one on the temporal side and one on the nasal side. These are then transplanted into the vacant space below and carefully united in place by numerous fine sutures. [F.] —**Sigaultian o.** See Public Symphyotomomy.

**OPERCULIFORM**, adj.  $\text{Op}^2\text{-e}^2\text{r-kn}^2\text{i}^2\text{f-o}^2\text{'i}^2\text{-a}^3$ . Lat., *operculiformis* (from *operculum*, a lid, and *forma*, form). Fr., *operculoforme*. Ger., *deckelförmig*. Resembling an operculum. [a, 35.]

**OPHELIA** (Lat.), n. f.  $\text{Op}^2\text{'e}^2\text{-l(i}^2\text{e)-a}^3$ . From *ὀφείλειν*, help. See SWERTIA.

**OPHRYS**.—**O. fucifera.** Drone-orchis. The tubers have been used as salep. [a, 35.]

**OPORANTHUS LUTEUS** (Lat.), n. m.  $\text{Op}^2\text{p-o}^2\text{r-a}^2\text{nth(a}^2\text{nth)-u}^2\text{s(u)s}$ . See STERNBERGIA lutea.

**ORANGE.**—*O.* of Portugal. The fruit of *Citrus aurantium* *olysipponense*, a variety of the sweet o. grown in Portugal. [a, 35.]

**ORDER.** n. *O*rd'nd'r. Gr., τάξις. Lat., *ordo*. Fr., *ordre*. Ger., *Ordnung*. A group between class and genus. It bears the same relation to genus as the latter does to species, comprising genera which have in common certain important and constant particulars. In botany it is equivalent to family, but in zoology is the next higher grade. [a, 35.]

**OSAZONE.** n. *O*s'a'z-on. Fr., o. Ger., *Osazon*. Of E. Fischer, a substance formed by the combination of two molecules of phenylhydrazine with the various kinds of sugar. By the different melting points of the product obtained it serves as a test for what kind of sugar is present in the body to be tested. They are arabinosazone, galactosazone, glucosazone, lactosazone, maltosazone, rhamnosazone, sorbinosazone, and xylosazone. [B, 270 (a, 14).]

**OTITIS.**—*Acute migratory o. media.* Of Szencs, a form of acute o. media that attacks first one ear and then the other.

**OTOCONIA.**—*O.* of the utricle. A deposit of fine, crystalline, calcareous concretions upon the median wall of the utricle of the ear. [F.]

**OTONECROTECTOMY, OTOSCLERONECTOMY.** n's. *O*t'o-n'ek-ro'nek't'ek't'o'm-i'2. *s*kle'r'ek-on-ek't'o'm-i'2. From *o*us, the ear, νεκρός, dead, or σκληρός, hard, and εκτομή, excision. See *Section's* OPERATION.

**OVARIOTOMY.**—*Normal o.* See *OOPHORECTOMY*.

**OVOTOMIE** (Fr.), n. *O*-vo-to-me. A cutting operation involving the ovum.—*O. abdominale.* See *Cæsarean OPERATION*.

**OXYCOCCLUS.**—*O. macrocarpus.* The *Vaccinium macrocarpum*. [a, 35.]—*O. palustris.* See *VACCINIUM o.*

**OXYDUM.**—*Unguentum oxydi zincici et ferri* [Dan. Ph.]. An ointment of 6 parts of crude zinc oxide, 2 of hæmatite crystals, 12 of yellow wax, and 30 of olive-oil. [B, 95 (a, 38).]

**PAINTED,** adj. *Pant'e'd.* Coated with paint; of animals, brightly colored. [a, 48.]

**PALEMON** (Lat.), n. m. *Pa*l'(pa'l)-e/(a'3'e'2)-mo'n(mon). Gen., -on/os (-is). Gr., Παλαίμων. A genus of macruran decapods. [a, 35.]—*P. serratus, P. squilla.* The prawn. [a, 35.]

**PANNUS.**—*Synovial p.* (Ger.). A morbid, opaque concretion of the synovia. [L, 57 (a, 14).]

**PARADROSIS** (Lat.), n. f. *Pa*r'a(pa'r)-a'3-dros'i'2s. See *PARIDROSIS.*—*P. oleosa.* See *SERBORRŒA*.

**PARALYSIS.**—*P. spastica spinalis.* Ger., *spastische Spinalparalyse.* A gradually developing paresis, sometimes amounting to p., spreading slowly upward and accompanied by muscular tension, reflex contractions and contractures, conspicuously increased tendon reflexes, and complete absence of sensory and trophic disturbances, with weakness of the bladder and genital organs, and general cerebral disturbances. [A, 326 (a, 21).]

**PASTEREN,** n. *Pa*st'u'ern. Fr., *paturon*. Ger., *Fessel*. That part of a horse's leg between the fetlock-joint and the hoof. [a, 14.]

**PENTAL,** adj. *Pe*n't'l. From *πέντε*, five. Trimethylethylene, a colorless liquid of a penetrating mustard-like odor, very volatile and inflammable; used like chloroform. [a, 34.]

**PERIMETRIC,** adj. *Pe*r-i'2-me't'r'i'2k. Pertaining to the perimetrium. [a, 14.]

**PES.**—*P. anserinus nervi mediani.* The digital branch of the median nerve. [a, 34.]

**PEST.**—*Siberian p.* See *CHARBON*.

**PFANNE.**—*Rippenp'.* The articular fossa of a vertebra for the head of a rib. [L, 31.]

**PHENETOL,** n. *Fe*n'e't'-ol. Commercial name for a red dye, also wrongly called *coccin*, obtained from β-naphtholsulphonic acid; it is soluble in water. [B, 270 (a, 14).]

**PHENOMENON.**—*Trousseau p.* In tetany, the spasm produced by pressure upon certain points of the affected limbs. [a, 34.]

**PHLORETIC ACID,** n. *Flor'e't'-ik.* Fr., *acide phlorétique*. The compound  $C_8H_4(OH)(C_2H_4)CO_2H$ . [B, 3 (a, 14).]

**PHONAUSTHENIA** (Lat.), n. f. *Fon*a't'-(a'3'u't)-o(-o'3)-sthe'n'i'e(-a'3). From *φωνή*, a sound, *αὐτός*, self, and *σθένος*, strength. Of P. Diday, the stimulation of thought in a speaker by the excitement of speaking. [a, 34.]

**PHOTOMICROGRAPH,** n. *Pho*-to-mi'2k'ro-gra'ph. From *φῶς*, light, *μικρός*, small, and *γράφειν*, to write. A large photograph of a microscopic object. [a, 34.]

**PHRAGMIDIUM** (Lat.), n. n. *Phra*g'mi'di'2-mi'di'u'm(u'm). From *φράγμα*, a fence. A genus of *Uredineæ* found on the leaves of rosaceous plants. [a, 35.]

**PHYSALLIZATION,** n. *Fl*2's-a'l-i'2-z'a'shu'2n. From *φυσάλλει*, a bubble. The property that certain organic liquids, especially albuminous ones, possess of yielding a more or less permanent froth when agitated with a gas. [a, 34.]

**PIPERAZIDINE, PIPERAZINE,** n's. *Pi*2p-e'r-a'2-z'i'di-on, -e'r-a'2-z'en. The compound  $(C_4H_8N_2)(NH_2)$ , formed by the decomposition of ethylenediamine hydrochloride by heat; a powerful solvent of uric acid. [a, 34.]

**PLASODERMATOSES** (Lat.), n. f. pl. *Pla*2's(pla'2's)-o(-o'3)-du'r'm(de'r'm)-a't'i'2(-a'3)-e'2(as). From *πλάσσειν*, to mold, and *δέρμα*, the skin. Of Tommasoli, an order of skin diseases characterized by new formations. [a, 34.]

**PLATE.**—*Horizontal p. of the ethmoid bone.* Its cribriform p. [a, 34.]

**PLATTE.**—*Tastp'.* See *Tactile DISC*.

**PLOCAMIIUM** (Lat.), n. n. *Pl*o'2k-am(a'm)/i'2-u'm(u'm). From *πλόκαμος*, a lock of hair. A genus of rose-spored *Algae*. [a, 35.]—*P. coccineum, P. vulgare.* Ger., *knorpeliger Seetang*. A species common on the sea-coasts of Europe and rare on those of America. In Kamchatka it is mixed with fish-oil and used as a cosmetic. [a, 35.]

**PLUMULACEOUS,** adj. *Plu*m'u-l'a'shu'2s. From *plumula*, a little down, feather. Having downy feathers; not pennaceous. [a, 34.]

**PNEUMOBACILLINE,** n. *Nu*2'm'o-ba's-i'l'en. From *πνεύμων*, the lung, and *bacillus* (q. v.). Of Arloing, a concentrated extract of an organic substance obtained from bouillon cultures of the bacillus of bovine pneumonia. [a, 34.]

**POCKE.**—*Menschenp'n.* See *SMALL-POX*.

**POLIOMYELITIS.**—*Anterior p.* See *Acute anterior p.—Chronic anterior p.* See *P. anterior chronica*.

**POMEGRANATE.**—*P. root-bark.* See *GRANATUM* (2d def.).

**POPLAR.**—*P. buds.* The buds of various species of *Populus*, official as *gemmæ populi*. [a, 35.]

**PORTION.**—*Cavernous p. of the urethra.* The posterior, dilated part of the spongy p. of the urethra constituting the urethral bulb. [a, 34.]—*Nasal p. of the frontal bone.* The p. that lies between the two internal angular processes of the supra-orbital arches. [a, 34.]

**POWDER.**—*Ague p.* Lat., *pulvis febrifugus pauperum*. Ger., *Fiebertpulver*. A p. official in the Disp. Fuld. of 1791, made by mixing 1 part of ammonium chloride with 5 parts of powdered root of *Geum urbanum*. [B, 97 (a, 14).]

**PRÆMOSE.**—*Substitute præmorse.* and for the Lat. *præmorsus*.

**PSYCHONEUROSIS.**—*P. maidica.* Pellagra. [a, 34.]

**PULP.**—*Tooth-p.* Lat., *pulpa dentis*. Ger., *Zahnpulpa*. A jelly-like connective tissue within the cavity of a tooth containing a large number of blood-vessels, nerves, and odontoblasts. [L.]

**PULSELLUM** (Lat.), n. n. *Pu*l's(pu'l's)-e'l'l'u'm(lu'm). From *pellere*, to drive. A form of flagellum which propels a cell or animal in front of it (e. g., the tail of a spermatozoid). [L.]

**PULSOGRAPH,** n. *Pu*l's'o-gra'ff. From *pulsus*, the pulse, and *γράφειν*, to write. Of Ozanam, a sphygmograph. [a, 34.]

**PULVIS.**—*P. ad lumbricos.* A powder of 1 part of calomel with 1, 2, 3, or 6 parts of jalap. [B, 119 (a, 38).]—*P. confortativus.* Fr., *poudre confortant*. A powder of 5 parts of Oriental pearls, 8 of white coral, 10 of hart's-horn prepared without heat, and 300 of barley sugar. [B, 119 (a, 38).]—*P. erysipelatodes.* A powder of 6 parts of farina, 2 each of æs ustum and Armenian bole, and 1 part each of mastic, oilibannum, and white lead. [B, 119 (a, 38).]—*P. Halyabbatis.* A powder differing but slightly from p. anonymous and used for the same purposes. [L, 85.]—*P. viennensis diaphoreticus* (seu virginicus). An old preparation made by calcining 1 part of mica and 2 parts of gypsum together, porphyriizing, washing, and reducing to a fine powder. It was said to allay thirst and abate fever. [B, 119.]

**PUTORIUS** (Lat.), adj. From *putor*, a foul smell. Fr., *putois*. Ger., *Ittis*. A subgenus of *Mustela*. [L, 30 (a, 14).]—*P. furo.* Fr., *furet*. Ger., *Frett*. The ferret. The musk-like secretion of a gland situated beneath its tail was formerly official. [L, 30 (a, 14).]

**QUADRICEPS.**—*Q. extensor cruris.* See *EXTENSOR CRURIS q.*

**RANUNCULUS.**—*R. silvaticus.* Fr., *renoncule des bois*. A variety of *R. acris*. [B, 173 (a, 35).]

**RAPHIA** (Lat.), n. f. *Ra*2'f'a'f'i'2-a'2. A genus of palms. [a, 35.]—*R. vinifera.* Ger., *weingebende Sagopalme*. Bamboo palm, wine palm of the west coast of Africa. A good sago is prepared from its pith, and in Guinea a strong brandy is distilled from the seed. The undeveloped leaves are eaten like cabbage. [a, 35.]

**RECESSUS.**—*R. hemiellipticus of the vestibule.* The posterior of the two depressions on the median and inferior walls of the vestibule, for the reception of the utricle. [F.]—*R. hemisphericus of the vestibule.* The anterior of the two depressions on the median and inferior walls of the vestibule, for the reception of the sacculus. [F.]

**RHEUM.**—*Pulvis rhei tartarizatus.* Fr., *poudre digestive de Klein*. A preparation official in several of the old pharmacopœias, made by mixing equal parts of potassium tartrate, rhubarb, and orange-peel, all well powdered. [B, 97, 119 (a, 14).]

**ROSOLIC ACID,** n. *Roz*-o'l'i'2k. Fr., *acide rosolique*. Ger., *Rosolsäure*. The compound  $C_{26}H_{18}O_8$ . [B, 93, 270 (a, 14).]

**RÜCKWÄRTSBEUGUNG** (Ger.), n. *Ru*2'k'varts-boig-un'2. See *RETROVERSION*.

**SAC.**—*Conjunctival s.* The s. formed by the reflection of the palpebral conjunctiva.

**SADISM,** n. *Sa*2'd'i'2m. Lat., *sadismus*. The association of active cruelty and violence with lust: so named from the novelist de Sade. The lustful emotion awakens the impulse to cruelty, and acts done in obedience to the impulse cause sexual gratification. [a, 34.]

**SÆPTUM.**—*S. valvulare Lieutaudii.* The internal segment of the trienspid valve. [L, 332.]

**SAGE.**—*Oil of s.* See *Volatile oil of s.*

**SÄGEZÄHNIG** (Ger.), adj. Zag'e²-tsan-i²g. See **SERRATE**.  
**SALACETOL**, n. Sa²l-a²s'e²t-o²l. Acetyl carbinol, a synthetic compound of salicylic acid; used like salol. [a, 34.]

**SALIPHEN**, n. Sa²l'i²-fe²n. A salicyl-phenetidine. A combination, C₆H₅·OC₂H₅ (OH)CO, of phenetidine and salicylic acid; used as an antipyretic. [a, 34.]

**SALOCOLL**, n. Sa²l'o-ko²l. The salicylic-acid salt of phenocoll; used as an antipyretic and antirheumatic. [a, 34.]

**SALT**.—**Wall s.** Exudation from moist walls, consisting chiefly of sodium carbonate contained in the stones employed. [B, 48 (a, 14).]

**SAPROL**, n. Sa²p-ro²l. From *sapros*, putrid. A dark-brown oily compound containing phenol, creasol, and other coal-tar products; used as a disinfectant. [a, 34.]

**SAURIDON** (Lat.), n. n. Sa²r'i²d-o²n. From *σαῦρα*, a lizard. A disinfectant preparation said to consist of the granular residuum of the distillation of a kind of Blackstone shale containing semi-fossilized animal and vegetable remains. [a, 35.]

**SAVON**.—**Lavement de s.** A preparation made by dissolving 8 parts of Castile soap in 500 of hot water, to be used tepid. [B, 92, 119 (a, 14).]—**S. médicinal** (Fr. Cod.). A preparation made by melting together 10 parts of veal tallow and 30 of distilled water, saponifying with 5 of soapmaker's lye, adding afterward 2 of sodium chloride with continual agitation, melting the supernatant soap with moderate heat, and casting in molds. [B, 213 (a, 14).]

**SCHUPPE**.—For the 2d def. substitute See **SQUAMOUS PORTION** of the temporal bone and **TABULAR PORTION** of the occipital bone.

**SCILLOCEPHALUS** (Lat.), n. m. Si²l(ski²l)-lo(lo²)-se²f(ke²f)-a²l(a²l)-u²s(u²s). From *σκόλλα*, the squill, and *κεφαλή*, the head. A person with a large and long skull, shaped like a squill. [L, 50 (a, 14).]

**SECHSWERTHIG** (Ger.), adj. Ze²ch²s've²rt-i²g. See **SEXV-LENT**.

**SECRETODERMATOSIS** (Lat.), n. f. Se²k(sak)-ret(rat)'o(o²)-du²rm(de²rm)-a²t(a²t)-os'i²s. Gen., -os'e²s(-is). From *secrevere*, to secrete, and *δέρμα*, the skin. Any disease of the secretory glands of the skin. [a, 34.]

**SHARK**.—**S.-oil**. A train oil derived from *Squalus maximus* and allied species. [a, 35.]

**SHEATH**.—**Axillary s.** A process of the prevertebral fascia covering the initial portion of the axillary artery and vein. [L.]—**Carotid s.** A process of the deep cervical fascia surrounding the carotid artery, pneumogastric nerve, and internal jugular vein, the last two separated from the first by a septum. [L.]—**Crural s.** **Femoral s.** Lat., *vagina vasorum cruralium*. A funnel-shaped fascial investment of the femoral vessels. It is continuous above with the transversalis and iliac fasciæ, and is divided by septa into three compartments: the outer, for the femoral artery; the middle, for the femoral vein; and the inner, known as the femoral canal (q. v.). [L.]—**Mucilaginous s.** A mass of parenchyma cells which have become mucilaginous, surrounding a fibro-vascular bundle. [a, 35.]—**S. of the rectus abdominis**. The s. formed by the division of the aponeurosis of the obliquus abdominis externus at the outer border of the rectus and their union in the linea alba. [L.]

**SIVENS**, n. Si²v'e²nz. See **SIBENS**.

**SKATOPHAGY**, n. Ska²t-o²f'a²j-i². From *σκατοφαγείν*, to eat dirt. See **COPROPHAGY**.

**SMALT**, n. Sma²lt. The azure used in painting, decorating porcelain, etc.; obtained by powdering the blue glass which results from heating sand, potash, and impure cobalt oxide together. [a, 35.]

**SODIUM**.—**S. nitroferri cyanide**, **S. nitroprusside**. Ger., *Natriumnitroferri cyanidum*, *Natriumnitroprussid*, *Nitroprussidnatrium*. The compound Na₄Fe₃Cy₁₆(NO)₉·4H₂O, occurring in large, red, rhombic prisms. [B, 270 (a, 14).]—**S. pyroantimonate**. The compound (NH₄)₃Sb₂O₇, only known in solution and obtained by treating acid s. metantimonate with ammonia. [B, 3 (a, 14).]

**SONNENKÄFER** (Ger.), n. Zo²n'ne²n-kaf-e²r. See **COCCINELLA**.

**SORE**.—**Bay s.** See **ULCÈRE de la baie**.

**SPACE**.—**Anterior mediastinal s.** A s. directed obliquely from above downward and to the left of the median line. It is bounded in front by the sternum, on each side by the pleura, and behind by the pericardium. [a, 34.]—**Posterior mediastinal s.** An irregular triangular s., running parallel with the vertebral column; bounded in front by the pericardium and the roots of the lungs, behind by the vertebral column, and on either side by the pleura. [a, 34.]

**SPHINCTERPLASTY**, n. Sf²n²t'u²r-pla²st-i². From *σφιγκτήρ*, a sphincter, and *πλάσσειν*, to mold. 1. Of Gersung, the formation of a sphincter after rectal resection by rotating the rectum on its long axis and then suturing the bowel to the skin. 2. The formation of a sphincter ani by transplanting portions of the abdominal or gluteal muscles. [a, 34.]

**SPUTICOLUS** (Lat.), adj. Spu²t(sput)-i²k'o²l-u²s(u²s). From *sputum* (q. v.), and *colere*, to inhabit. The specific name of a *Schizomyces* living in sputum, occurring in the secretions of the air-passages. [a, 35.]

**STACHYS**.—**S. betonica**. Ger., *braune* (oder *Wiesen-)* *Betonie*. Wood betony, bishop's-wort; a European species, mildly aromatic and astringent. [a, 35.]

**STAPHYLOCOCCÆMIA** (Lat.), n. f. Sta²f(sta²f)'i²l(u²l)-o(o²)-ko²k-sem'(ka²'e²m)-i²-a². From *σταφύλη*, a bunch of grapes, *κόκκος*, a kernel, and *αἷμα*, blood. The presence of staphylococci in the blood. [a, 34.]

**STEARODERMIA** (Lat.), n. f. Ste²r(e²s)-a²r(a²r)-o(o²)-du²rm(de²rm)-i²-a². From *στάειν*, fat, and *δέρμα*, the skin. A skin disease affecting the sebaceous glands. [a, 34.]

**STERESOL**, n. Ste²r'e²s-o²l. An antiseptic varnish originated by Perlioz, consisting of 270 grammes of purified shellac, 10 each of purified benzoin and balsam of Tolu, 100 of crystallized carbolic acid, 6 each of Chinese essence of canella and of saccharin, and alcohol enough to make 1,000. [a, 34.]

**STIELLOS** (Ger.), adj. Stel'los. See **SESSILE**.

**STOMATITIS**.—**Septic s.** See *S. septica*.

**STREPTOCOCCÆMIA** (Lat.), n. f. Stre²p-to(tō²)-ko²k-sem'(ka²'e²m)-i²-a². From *στρεπτός*, twisted, *κόκκος*, a kernel, and *αἷμα*, blood. The presence of streptococci in the blood. [a, 34.]

**STRICTUROTOME**, n. Stri²k'tu²r-o-tom. From *strictura*, a stricture, and *τέμνειν*, to cut. An instrument for cutting a stricture.

**STROBILIFORM**, adj. Stro-bi²l'i²-fo²rm. Lat., *strobiliformis* (from *στροβίλος*, anything twisted, and *forma*, form). Ger., *zapfenförmig*. Resembling a strobile. [a, 35.]

**STYLUS** (Lat.), n. m. Stil(stu²l)'u²s(u²s). Gr., *στύλος*. See **SOUND** (the instrument).

**SUÇOIR** (Fr.), n. Su²-swa²r. See **HAUSTORIUM**.

**SULCUS**.—**S. longitudinalis anterior**. See **Anterior median fissure of the spinal cord**.

**SULPHONAPHTHALENE**, n. Su²lf'o-na²f'tha²l-en. Fr., *sulfonaphtide*, *sulfonaphtaline*. A substance, SO₂(C₁₀H₇)₂, obtained by the action of sulphuric anhydride on naphthalene; it occurs in inodorous masses, melting at 70° C. [B, 98 (a, 14).]

**SULPHUR**.—**Balsamum sulphuris succinatum** [Ed. Ph., 1826, Sard. Ph., 1773, Tur. Ph., 1833]. A preparation made by digesting in a sand-bath 1 part of flowers of sulphur with 4 parts [Ed. Ph. and Tur. Ph.] or 6 [Sard. Ph.] of rectified oil of amber. [B, 119 (a, 14).]—**Flores sulphuris compositi** [Brunsw. Ph., 1791, Hannov. Ph., 1819, Würt. Ph., 1798]. A powder of 2 parts of saffron, 86 of flowers of sulphur, and 24 each of myrrh and aloes. [B, 119 (a, 14).]

**SUSPENSION**.—**S. of the uterus**. See **HYSTEROPEXIA**.

**SYN-CEREBRUM** (Lat.), n. n. Si²n(su²n)-se²r(ke²r)'e²-bru²m(bru²m). From *σύν*, with, and *cerebrum*, the brain. A brain consisting of a number of parts. [Lankester (L).]

**TEST**.—**Beccaria's t.** An intense, pulsating pain in the occipital region, supposed to be a sign of pregnancy. [a, 34.]

**THERMIFUGIN**, n. Thu²rm-i²f'u²j-i²n. From *θερμὸν*, heat, and *fugere*, to flee. A commercial name for the antipyretic sodium salt of methyltri-hydroxyquinolinecarboxylic acid. [B, 270 (a, 14).]

**THILANIN**, n. Thi²l'a²n-i²n. A yellowish, unctuous substance consisting of lanolin with 3 per cent. of sulphur. [a, 34.]

**THIONIC**, adj. Thi-o²n'i²k. From *θειόν*, sulphur. Having one or more atoms of sulphur for 2 of hydrogen and 6 of oxygen; there are *monothionic*, *dithionic*, *trithionic*, *tetrathionic*, and *pentathionic* acids. [B, 93, 270 (a, 14).]

**THIORESORCIN**, n. Thi'o-re²z-o²rs'i²n. A yellowish-white, inodorous, non-poisonous powder formed by a combination of resorcin and sulphur; used as a local antiseptic. [a, 34.]

**TOLYPYRINE**, n. To²l-pi²r-en. A colorless, crystalline substance of bitter taste, slightly soluble in water; used as an antipyretic. [a, 34.]

**TOLYSAL**, n. To²l'i²s-l. Tolypyrine salicylate. [a, 34.]

**TONNERET** (Fr.), n. Ton-ne²r-a. A gaseous and ferruginous spring near Absie, department of the Deux-Sèvres, France. [a, 14.)]

**TRAJET**.—**T's intramusculaires**. Venous canals in the tissue of the heart uniting the smaller cardiac veins near their openings into the cavity of the heart. [L, 31.]

**TUNICA**.—**T. vasculosa**. A vascular network. [a, 34.]

**URIN**.—**U-verhaltung**. For See **Retention of urine** substitute **Retention of urine**.

**VAGINA**.—**V. recti**. See **SHEATH of the rectus abdominis** (in Supplement).—**V. vasorum cruralium**. See **Crural SHEATH** (in Supplement).

**VAGO-GLOSSOPHARYNGEAL**, adj. Vag'o-glo²s''so-fa²r-i²n'je²'l. Pertaining or relating to the vagus and glossopharyngeal nerves, whose root-fibres arise from a common nucleus. [a, 34.]

**VASO-HYPOTONIC**, adj. Vas'o-hip-o-to²n'i²k. Pertaining to or causing subnormal vascular tension. [a, 34.]

A, ape; A², at; A³, ah; A⁴, all; Ch, chin; Ch², loch (Scottish); E, he; E², ell; G, go; I, die; I², in; N, in; N³, tank; O, no; O², not; O³, whole; Th, thin; Th², the; U, like oo in too; U², blue; U³, lull; U⁴, full; U⁵, urn; U⁶, like ü (German).

# LIST OF THE CHIEF INITIAL AND TERMINAL PARTS OF COMPOUND WORDS.

**A-**. 1. A privative (*av-* before a vowel), an inseparable particle, used only as a prefix, with a negative force, like English *un-*. Latin *in-*. It is prefixed to noun, adjective, and verb stems, with which it generally forms adjectives. 2. *a* intensive, increasing the force. 3. *a* euphonic, in a few words, used merely for phonetic purposes. [a, 21.]

**Ab-**. 1. Default, failure, as in the word *abortion*. 2. Extending or drawing away from some point, as in *abductor*.

**Ad-** (occurring also as *Ac-*, *Af-*, *Ag-*, *Al-*, *An-*, *Ap-*, *Ar-*, *As-*, and *At-*). Toward, as in *adduction*.

**After-**. Subsequent, behind (also, in German, similar, pretended, pseudo-).

**Allotrio-**. From *ἀλλότριος*. Belonging to another, foreign.

**Amphi-**. Gr., *ἀμφί*. About, on both sides, on all sides, as in *amphiarthrosis*.

**An-**. 1. See *A-*. 2. See *Ana-*.

**Ana-**. Gr., *ἀνά*. 1. Upward, as in *anaspadias* (sometimes abbreviated, as in *anode*). 2. Communication, as in *anastomosis*.

**-ane**. A termination common to the paraffins or series of saturated hydrocarbons. [B.]

**Ante-**. 1. Before, forward, as in *anteversion*. 2. Previously, as in *antenatal*.

**Anti-**. Gr., *ἀντί*. Against.

**-ate**. Ger., *-at*. Fr., *-ate*. 1. A suffix indicative of a salt derived from that one of two related acids which contains the more oxygen, and whose distinctive title according to modern nomenclature ends in *-ic*. [B.] 2. Indicative of a material resulting from a particular process, as in *exudate* and *distillate*.

**Auto-**. From *αὐτός*, self. 1. Of itself, natural, not made artificially, not proceeding from without. 2. Reflexive.

**Azo-**. A prefix used in designating certain chemical compounds (especially those of the aromatic series) in which nitrogen replaces hydrogen; more particularly employed to denote a member of a special class of compounds (azo-compounds), of which 2 nitrogen atoms form a nucleus. [B.]

**Cac-, Caco-**. From *κακός*, evil. Indicative of unfavorableness, severity, or malignancy.

**Cata-**. Gr., *κατά*. 1. Downward. 2. In accordance with. 3. Against.

**-cele**. Gr., *κῆλη*. Indicative originally of hernia, made subsequently to apply to other swellings occurring in the parts usually occupied by hernia, and finally applied to some tumors and to certain swellings (such as *hematocele*) that are not true tumors.

**Con-** (occurring also as *Co-*, *Col-*, *Com-*, and *Cor-*). Lat., *cum*. Together.

**Dia-**. Gr., *διά*. 1. Through. 2. Made of (as in *diachylon*).

**Dis-** (occurring also as *Di-* and *Dif-*). A prefix having (1) a separative or disjunctive force, asunder, apart, in different directions; (2) a privative or negative force, like the English *un-*, reversing or negating the primitive. [a, 21.]

**Dys-**. Gr., *δυσ*. "Equivalent to our *un-* or *mis-*, always with the notion of hard, bad, unlucky, etc." [A, 311.]

**Ecto-**. From *ἐκτός*, outside. A prepositional particle indicative of exterior situation or direction. [a, 48.]

**End-, Endo-**. From *ἐντός*, within. A prepositional particle indicating that which is situated or takes place within anything. [a, 21.]

**-ene**. A termination characteristic of the bivalent series of hydrocarbons or alkylidenes. [B.] Cf. *-idene*.

**Ento-**. From *ἐντός*, within. A prepositional particle indicating interior situation.

**-enyl**. Designative of the trivalent hydrocarbons (compounded of *-ene*, the termination appropriated to the bivalent series, and *-yl*).

**Eur-**. Gr., *εὖ*. 1. Indicative of a favorable or agreeable character, as in *euthanasia*; the opposite of *Caco-*. 2. Before the name of a subgenus or other subdivision, indicative of the section containing the typical or genuine species. [a, 21.]

**Ex-** (occurring also as *E-* and *Ef-*). Gr., *ἐξ*. Out of, from. [a, 21.]

**Extra-**. Without, outside. [a, 48.]

**Gamo-**. From *γάμος*, marriage. Union, junction. [a, 24.]

**-genesis**. From *γεννᾶν*, to engender. Denoting origin, source, productive, cause, generation. [a, 21.]

**-graphy**. From *γράφειν*, to write. A termination signifying writing, description, discourse, science. [a, 21.] Cf. *-logy*.

**Haplo-**. From *ἁπλός*, single. Simple or single.

**Hemi-**. Gr., *ἡμι*. Lat., *semi*. Fr., *demi*. Ger., *halb*. Half or halved, as in *hemicarpous*. [a, 24.]

**Hetero-**. From *ἕτερος*, the other. Anomalous, diverse, variable. [a, 24.]

**Homœo-**. From *ὁμοιος*. Similar, like, equal. [a, 24.]

**Hypo-**. See *Hypo-*.

**Hyper-**. Gr., *ὑπέρ*. Above, beyond, excessive.

**Hypo-**. Gr., *ὑπό*. 1. Under. 2. When followed by the name of an acid or a salt, indicative of its containing a smaller proportion of oxygen than the one denoted by the name without the prefix. 3. Diminution in quantity or degree. [B.]

**-iasis**. Gr., *-ιασις*. Indicative of a process or of its result, (as in *psoriasis*, *lithiasis*, etc.). Cf. *-osis*.

**-ic**. Lat., *-icus*. Fr., *-ique*. A suffix appended to the name of a chemical which combines in more than one proportion with another body, to indicate the compound that contains the greater proportion of the other body; in the names of acids, indicative of the one containing the greater amount of oxygen. [a, 48.]

**-ide**. Fr., *-ide*, *-ide*. Ger., *-yd*, *-id*. Affixed to the name of an element, indicative of the fact that the element is united directly with another element or radicle. [B.]

**-idene**. Designating the bivalent series of hydrocarbons of the general formula  $C_nH_{2n+2}CH$  = (aldehyde radicles), while the termination *-ene* designates the isomeric hydrocarbons of the general formula  $-CH_2-(C_n-1H_{2n-1})-CH_2-$ . Thus, ethylidene is  $CH_3-CH$ , while ethylene is  $CH_2=CH_2$ . [B.]

**-ides, -ideus**. From *ἴδος*, resemblance. See *-oid*.

**-imide**. Indicative of a monamide in which one bivalent acid radicle takes the place of two atoms of hydrogen in a molecule of ammonia. [B.]

**In-** (occurring also as *Il-*, *Im-*, and *I-*). 1. In, within. 2. In contact with. 3. An inseparable particle that negatives the word with which it is joined. [a, 21.]

**-in-**. Indicative of compounds containing the radicle  $(C_3H_5)'''$  of glyceryl; e. g., *monobromhydrin*, a body having the composition of glyceryl dihydrate bromide =  $C_3H_5(OH)_2Br$ , *ethylen*, a body having the composition  $C_2H_4(OH)_2$ ,  $C_2H_4$ . [B.]

**-ine**. A termination used in forming (1) adjectives, such as *saccharine*; (2) the names of the elements *bromine*, *chlorine*, *fluorine*, and *iodine*; (3) all bodies whose chemical formula may be regarded as that of a basic derivative of ammonia and all the alkaloïds, or as a basic derivative analogous to an amine in its method of formation. [B.]

**Infra-**. Below, under. [a, 21.]

**Inter-**. Between.

**Intra-**. 1. Within, as in *intracranial*. 2. Into. 3. During, as in *intra-partum*.

**-inus**. Similarity or augmentation. [a, 24.]

**-inyl**. Appropriated to the quinquivalent hydrocarbons. [B.]

**-ise**. See *-ize*.

**-ismus**. A condition or process.

**Iso-**. From *ἴσος*. Equal.

**-ite**. Indicative of a salt derived from that one of two related acids which contains the less oxygen and whose name according to modern nomenclature ends in *-ous*. [B.]

**-ites**. Gr., *-ίτης*, a masculine adjective termination. In *ascites* and *lymphangitis* the masculine noun *ᾠδραψ*, dropsy, is understood.

**-itis**. Gr., *-ίτις*, a feminine adjective termination now conventionally appended to the name of a part to signify inflammation of that part, although it really has no such meaning. In such expressions the feminine noun *νόσος*, disease, is understood, and *νόσος πνευμονίτις* simply meant the *pneumonia* (or *side's disease*).

**-ize**. Gr., *-ίζειν*. Fr., *-iser*. Also written *-ise*. A suffix derived from the Greek which, when added to a noun or an adjective, forms verbs meaning to do or to be the thing expressed by the noun or adjective. [a, 21.]

**Leuco-**. From λευκός, white. White. [a, 35.]

**-logy**. From λόγος, understanding. A termination meaning the science of whatever is indicated by the preceding part of the word. [a, 21.]

**Macro-**. Gr., μακρός. Indicative of extent or magnitude.

**Mal-**. From malus, bad. See *Caco-*.

**Mega-, Megalo-**. From μέγας, large. Indicative of magnitude.

**Meio-**. Gr., μείων (irreg. comparative of μικρός, small). Indicative of diminution. [a, 35.]

**Mela-, Melan-**. From μέλας, black. Indicative of blackness.

**Meta-**. Gr., μετά. Among, with, after, beyond. [a, 48.]

**-meter**. From μέτρον, a measure. Denoting an instrument for measuring. [a, 21.]

**Micro-**. Gr., μικρός. Indicative of minuteness.

**Mis-**. Abno. nal, disordered, as in *mismenstruation*.

**Mono-**. From μόνος, alone, single. Indicative of singleness or of primacy.

**Ob-** (occurring also as *Oc-, Of-, Og-, and Op-*). A prefix meaning to, toward, about, before, in front of, over, on account of, inversely, etc., but often merely intensive. [a, 21.]

**-odes**. See *-oid*.

**-odynia**. From ὀδύνη, pain. Indicative of a painful affection. [a, 21.]

**-oid**. Gr., -ώδης, -οειδής (from εἶδος, resemblance). Lat., *-oides*, *-oideus*. Indicative of resemblance. [a, 21.]

**-ol**. 1. A suffix appropriated to alcohol and bodies of analogous composition (*carbinol*, *phenol*, *glycol*, etc.). 2. Indicative of an oily body.

**-oma**. Gr., -ωμα. Indicative of the material result of a process denoted by a cognate word ending in *-osis*; of late years applied almost exclusively to tumors.

**-one**. A suffix appropriated to the ketones (e. g., *acetone*). [B.]

**-onyl**. Designative of the septivalent hydrocarbons. Cf. *-yl*.

**Opistho-**. From ὀπισθεν, behind. Indicative of posterior direction. [a, 21.]

**Ortho-**. From ὀρθός, straight. Straight, upright; in chemistry, normal.

**-osis**. Gr., -ωσις. Properly implying a morbid process, but generally applied indiscriminately to that and to its results.

**-ous**. Lat., *-osus*. Fr., *-eux*. A suffix appended to the name of an element which combines in more than one proportion with another body, to indicate the compound that contains the smaller proportion of the other body. In the names of acids it designates the one which has the smaller amount of oxygen.

**Oxy-**. From ὄξύς, sharp. A prefix meaning sharp, acute; in chemistry, containing oxygen. [B; a, 21.]

**Para-**. Gr., παρά. 1. Alongside of, beside (e. g., *parametritis*, inflammation by the side of the uterus). 2. To, to the side of. 3. To one side of, by, past (e. g., *paraphimosis*). 4. Amiss, wrong (e. g., *paramenia*, abnormal menstruation). 5. Signifying alteration or change (e. g., *paralbumin*).

**-pathy**. From πάθος, a condition. Indicative of a condition, especially a morbid condition.

**Per-**. Indicative of intensity; used with the name of an element which combines with another radicle in several proportions, it indicates the compound which contains the higher proportion of the other radicle. When followed by the name of an acid or salt, it designates an acid or salt which contains more oxygen than the one in the name of which it occurs. [B.]

**Peri-**. Gr., περί. In Greek derivatives, around, enveloping. [a, 35.]

**Pluri-**. From plus, comp. of multus, much. See *Poly-*.

**Poly-**. Gr., πολυ-. Indicative of multiplicity.

**Pro-**. Lat., *præ*. Indicative of situation before, in front of, or of occurrence in advance of. [a, 21.]

**Proto-**. From πρῶτος, first. Indicative of originality; before the name of a salt, it indicates that the latter is the first in a series of similar compounds, and usually designates the compound which contains one atom of the element to which it is prefixed. [B.]

**Pseudo-**. From ψευδής, false. False, spurious.

**Pyro-**. From πῦρ, fire. Indicative of preparation by means of heat.

**Retro-**. Indicative of backward situation or tendency.

**-rrhagia**. From ῥηγνίσθαι, to burst forth. Indicative of an escape, especially of blood.

**-rrhoea**. Gr., ῥοία, a flow. Indicative of a morbid flux.

**-scopy**. From σκοπεῖν, to examine. Indicative of examination.

**Semi-**. Half or apparently half (e. g., *semi-amplexicaul*, half-clasping, etc.). [a, 35.]

**Sesqui-**. A prefix indicating that the element or radicle to whose name it is prefixed is contained in a compound in the proportion of three parts to two of the other constituent of the compound. [B.]

**Sub-** (occurring also as *Suc-, Suf-, Sug-, Sum-, Sup-, Sur-, and Sus-*). See *Hypo-*.

**Super-, Supra-**. See *Hyper-*.

**Syn-** (occurring also as *Syl-, Sym-, and Sys-*). Gr., συν-. Indicative of association.

**Thi-, thio-**. From θείον, brimstone. Indicative of the presence of sulphur.

**-tune**. Designative of the octivalent hydrocarbons. [B.]

**Uni-**. From unus, one. Indicative of singleness.

**-unyl**. Designative of the nonivalent hydrocarbons.

**-uret**. Denoting a combination of simple inflammable bodies with each other or with metals.

**-yl**. From ὕλη, matter. Indicative of a substance supposed to be the source of another or the primitive form of which other substances are modifications; hence applied to designate many compound radicles in chemistry (e. g., *carboxyl*). The termination *-yl* alone generally designates a univalent radicle, while among the hydrocarbons, the affixes *-enyl*, *-inyl*, *-onyl*, and *-unyl* are employed to denote respectively trivalent, quinquivalent, septivalent, and nonivalent radicles. [B.]

**-ylene**. A termination applied to certain quadrivalent hydrocarbons derived from corresponding trivalent hydrocarbons with names ending in *-yl* (e. g., *allylene*). [B.]

## LIST OF ABBREVIATIONS.

**A.**, usually **aa** or (more correctly) **sa**. For *ana* (Gr. *ἀνά*), contracted *aa*. Of each (used of ingredients in prescriptions).  
**Abdom.** *Abdomen*. The abdomen.  
**Abs. febr.** *Absente febre*. In the absence of fever.  
**Ad., Add.** *Adde, seu Addatur*. Add, let there be added.  
**Ad def. an., Ad deliq.** *Ad defectionem animi, Ad deliquium*. To fainting (used in directions for venesection).  
**Adhib.** *Adhibendus*. To be administered.  
**Ad lib.** *Ad libitum*. At pleasure.  
**Admov.** *Admove, seu Admoveatur, seu Admoveantur*. Apply, let there (or let it, or let them) be applied.  
**Ad pond. om.** *Ad pondus omnium*. To the weight of the whole (used in indicating the proportion of a particular ingredient).  
**Adst. febro.** *Adstante febre*. Fever being present.  
**Æg.** *Æger, seu Ægra*. The sick person, the patient.  
**Ag.** Symbol for silver (*argentum*).  
**Ah.** Simple hypermetropic astigmatism.  
**Ahm.** Mixed astigmatism with predominant hypermetropia.  
**Altern. dieb.** *Alternis diebus*. On alternate days, every second day.  
**Altern. hor.** *Alternis horis*. Once every two hours.  
**Alv. adst.** *Alvo adstricta*. The bowels being constipated.  
**Am.** Simple myopic astigmatism.  
**Amh.** Mixed astigmatism with predominant myopia.  
**An.** Anode.  
**AnCl.** Anodal closure.  
**AnClC.** Anodal-closure clonus.  
**AnD.** Anodal duration.  
**AnO.** Anodal opening.  
**AnOCl.** Anodal-opening clonus.  
**Aq.** *Aqua*. Water.  
**Aq. astr.** *Aqua astricta*. Frozen water.  
**Aq. bull.** *Aqua bulliens*. Boiling water.  
**Aq. com.** *Aqua communis*. Ordinary water.  
**Aq. destil.** *Aqua destillata*. Distilled water.  
**Aq. ferv.** *Aqua fervens*. Boiling water, hot water.  
**Aq. fluv.** *Aqua fluvialis*. River water.  
**Aq. font.** *Aqua fontana, seu Aqua fontis*. Spring water.  
**Aq. marin.** *Aqua marinus*. Sea water.  
**Aq. niv.** *Aqua nivosa*. Snow water.  
**Aq. pluv.** *Aqua pluvialis*. Rain water.  
**Aq. pur.** *Aqua pura*. Pure water.  
**Arg.** *Argentum*. Silver.  
**As.** Astigmatism.

**B. a.** *Balneum arenæ*. A sandbath.  
**Bals.** *Balsamum*. A balsam.  
**Bb.**, **Bbds.** *Barbadosis*. Of Barbadoes.  
**B. Ch.** *Baccularius chirurgiæ*. Bachelor of surgery.  
**Bib.** *Bibe*. Drink.  
**Bis ind.** *Bis indices*. Twice a day.  
**B. M.** *Baccularius medicinæ*. Bachelor of medicine.  
**B. M. 1.** *Balneum Mariæ*. See *Water-bath* (2d def.). 2. *Balneum marinum*. *Balneum maris*. A sea bath.  
**Bol.** *Bolus*. A bolus.  
**B. S.** Bachelor of surgery.  
**Bull.** *Bulliat, seu Bulliant*. Let it (or them) boil.  
**But.** *Butyrum*. Butter.  
**B. v.** *Balneum vaporis*. A vapor bath.

**C.** *Congius*. A gallon.  
**C.** Centigrade scale of temperature.  
**Ca.** Cathode.  
**CaCl.** Cathodal closure.  
**CaClC.** Cathodal-closure clonus.  
**CaClTe.** *CaCTe*. Cathodal-closure tetanus.  
**CaD.** Cathodal duration.  
**Cal.** *Calomelas*. Calomel.  
**Calcf.** *Calcfactus*. Warmed.  
**CaO.** Cathodal opening.  
**CaOC.** Cathodal-opening clonus.  
**CaOTe.** Cathodal-opening tetanus.  
**Cap.** *Cape, seu Capiat*. Take, let the patient take.  
**Cath.** *Catharticus*. Cathartic.  
**C. c.** *Cornei cervi*. Hartshorn.  
**C. c.** *Cucurbitula cruenta*. A wet cup.  
**C. c.** Cubic centimetre.  
**C. c. u.** *Cornei cervi natum*. Burnt hartshorn.  
**Cent.** Centigrade scale of temperature.  
**Cgm.** Centigramme.  
**C. G. S.** Centimetre-gramme-second (designating a system of physical units).  
**Ch.**, **Chart.** *Charta*. 1. Paper. 2. A powder.  
**Ch. c.** *Charta cerata*. Wax paper.  
**Cl.** Closure of an electrical circuit.

**C. M.** *Chirurgiæ magister*. Master in surgery.  
**Cm.** Centimetre.  
**C. m.** *Cras mane*. To-morrow morning.  
**C. m. s.** *Cras mane sumendus*. To be taken to-morrow morning.  
**C. n.** *Cras nocte*. To-morrow night.  
**Co.** *Compositus*. Compound.  
**Coch.**, **Cochl.** *Cochleare*. A spoon, a spoonful.  
**Cochl. ampl.** *Cochleare amplum*. A tablespoonful.  
**Cochleat.** *Cochleatim*. By spoonfuls.  
**Cochl. infant.** *Cochleare infantis*. A teaspoonful.  
**Cochl. mag.** *Cochleare magnum*. A tablespoonful.  
**Cochl. med., Cochl. mod.** *Cochleare medium, Cochleare modicum*. A dessertspoonful.  
**Cochl. parv.** *Cochleare parvum*. A teaspoonful.  
**Coct.** *Coctio*. A boiling.  
**Col.** *Cola*. Strain.  
**Col., Colatur.** *Colaturæ*. To the liquor strained.  
**Collut.** *Collutorium*. A mouth-wash.  
**Collyr.** *Collyrium*. An eye-wash.  
**Color.** *Coloretur, seu Colorentur*. Let it (or them) be colored.  
**Comp.** *Compositus*. Compound.  
**Concis.** *Concisus*. Cut.  
**Conf.** *Confectio*. A confection.  
**Cong.** *Congius*. A gallon.  
**Cons.** *Conserva*. A conserve.  
**Cons.** *Conserva, seu Conservetur*. Keep, let it be kept.  
**Cont., Contin.** *Continuetur, seu Continuentur*. Let it (or them) be continued.  
**Cont. rem.** *Continuetur remedium*. Let the remedy be continued.  
**Contus.** *Contusus*. Bruised.  
**Coq.** *Coque, seu coquantur, seu coquantur*. Boil, let it (or them) be boiled.  
**Coq. ad. med. consump.** *Coque ad medietatis consumptionem*. Boil down to one half.  
**Coq. in s. a.** *Coque in sufficiente aqua*. Boil in a sufficient quantity of water.  
**Coq. s. a.** *Coque secundum artem*. Boil properly.  
**Cort.** *Cortex*. Bark.  
**Cox.** *Coxa*. The hip.  
**Cras., Crast.** *Crastinus*. For to-morrow.  
**Cuj.** *Cujus*. Of which.  
**Cujst.** *Cujstibet*. Of any.  
**C. v., C. vesp.** *Cras vespere*. To-morrow evening.  
**Cyath.** *Cyathus*. A glassful, a cupful.  
**Cyath. theæ.** *Cyathus theæ*. A teacupful.  
**Cyath. vin.** *Cyathus vinarius*. A wineglassful.

**D.** *Dosis*. A dose.  
**D.** Dioptre.  
**D. D. M.** Doctor of dental medicine.  
**D. D. S.** Doctor of dental surgery.  
**Dearg. pil.** *Deargententur pilule*. Let the pills be silvered.  
**Deaur. pil.** *Deaurantur pilule*. Let the pills be gilded.  
**Deb. spiss.** *Debita spissitudine*. Of the proper consistence.  
**Dec.** *Decanta*. Pour off.  
**Dec., Decoct.** *Decoctum*. A decoction.  
**Decub.** *Decubitu*. On lying down (i. e., at bedtime).  
**De d. in d.** *De die in diem*. From day to day.  
**Deglut.** *Deglutiatur*. Let it be swallowed.  
**Dej. alv.** *Dejectiones alvinæ*. Stools.  
**Dep.** *Depuratus*. Purified.  
**Dest.** *Destilla*. Distill.  
**Det.** *Detur*. Let there (or let it) be given.  
**Det. in dup., Det. in 2plo.** *Detur in duplo*. Let twice as much be given.  
**D. et s.** *Detur et signetur*. Let it be given and labeled.  
**Dieb. alt.** *Diebus alternis*. Every second day.  
**Dieb. tert.** *Diebus tertiis*. Every third day.  
**Dig.** *Digeratur*. Let it be digested.  
**Dil. 1.** *Diluat*. Let it be diluted. 2. *Dilutus*. Diluted.  
**Diluc.** *Dilucido*. At daybreak.  
**Dim.** *Dimidium*. A half.  
**D. in p. æq.** *Divide in partes æquales*. Divide into equal parts.  
**Dir. prop.** *Directione propria*. With a proper direction.  
**Div.** *Divide, seu dividatur*. Divide, let it be divided.  
**D. M. D.** Doctor of dental medicine.  
**Donec alv. sol. ft.** *Donec alvus soluta fuerit*. Till the bowels are opened.  
**D. p.** *Directione propria*. With a proper direction.  
**Dr.** *Doctor*. Doctor.  
**Dr., Drach.** *Drachm.* A drachm.  
**Dur. dolor.** *Durante dolore*. While the pain continues.  
**Ead.** *Eadem* (plur. of *idem*). The same substances.  
**Eburn.** *Eburneus*. Of ivory.

**Ejusd.** *Ejusdem.* Of the same.  
**Elect.** *Electuarium.* An electuary.  
**Emp.** *Emplastrum.* A plaster.  
**Emp. vesic.** *Emplastrum vesicatorium.* A blister.  
**En., Enem.** *Enema.* An enema.  
**Exhib.** *Exhibeatur, seu Exhibeantur.* Let it (or them) be administered.  
**Ext.** *Extende.* Spread.  
**Extr.** *Extractum.* An extract.  
**Ext. sup. alut. moll.** *Extende super alutam mollem.* Spread on soft leather.

**F.** *Fac, seu fiat, seu fiant.* Make, let there be made.  
**F., Fahr.** *Fahrenheit.* scale of temperature.  
**Fasc.** *Fasciculus.* A bundle.  
**F. C. S.** Fellow of the Chemical Society.  
**Feb. dur.** *Febre durante.* While the fever continues.  
**Febr.** *Febris.* Fever.  
**Fem. intern.** *Femoribus internis.* Toward the inner side of the thighs.  
**F. F. P. S.** Fellow of the Faculty of Physicians and Surgeons (of Glasgow).  
**F. h.** *Fiat haustus.* Let a draught be made.  
**Fict.** *Fictilis.* Of earthenware.  
**Filt.** *Filtrum.* A filter.  
**Fist. arm.** *Fistula armata.* A clyster apparatus fitted up for use.  
**F. K. Q. C. P.** Fellow of the King and Queen's College of Physicians (in Ireland).  
**Fl.** *Fluidus.* Fluid.  
**F. l. a.** *Fiat lege artis.* Let it be made (or done) properly.  
**Flor.** *Flores.* Flowers.  
**F. L. S.** Fellow of the Linnean Society.  
**F. m.** *Fiat mistura.* Let a mixture be made.  
**Fol.** *Folia.* Leaves.  
**Form.** *Formula.* A formula or prescription.  
**F. p.** *Fiat potio.* Let a potion be made.  
**F. pil., F. pil. xij.** *Fiat pilula, fiant pilule duodecim.* Let a pill (or 12 pills) be made.  
**F. R. C. P.** Fellow of the Royal College of Physicians.  
**F. R. C. S.** Fellow of the Royal College of Surgeons.  
**F. R. M. S.** Fellow of the Royal Microscopical Society.  
**Frust.** *Frustillatim.* In small pieces.  
**F. s. a.** *Fiat secundum artem.* Let it be made (or done) skillfully.  
**Ft.** *Foot.*  
**Ft. fiat, seu fiant.** Let there be made.  
**Ft. emp.** *Fiat emplastrum.* Let a plaster be made.  
**Ft. mas. div. in pil. xij.** *Fiat massa dividenda in pilulas duodecim.* Make a pill-mass, and divide it into 12 pills.  
**Ft. pulv.** *Fiat pulvis.* Let a powder be made.  
**F. venæs., F. vs.** *Fiat venæsectio.* Let the patient be bled.  
**F. Z. S.** Fellow of the Zoological Society.

**Garg.** *Gargarisma.* A gargle.  
**Gel. quav.** *Gelatina quavis.* In any kind of jelly.  
**G. g. g.** *Gummi guttæ gambæ.* Gamboge.  
**Gr.** *Granum.* A grain.  
**Gm.** *Gramme.*  
**Grad.** *Gradatim.* By degrees.  
**Grat.** *Gratus.* Pleasant.  
**Gt., Gtt.** *Gutta.* A drop.  
**Gum.** *Gummi.* Gum.  
**Gutt.** *Gutta, seu guttæ.* A drop, or drops.  
**Guttat.** *Guttatim.* By drops.  
**Gutt. quibusd.** *Guttis quibusdam.* With a few drops.

**Har.** *Harum.* Of these.  
**Har. pil. sum. ij.** *Harum pilularum sumantur duæ.* Let two of these pills be taken.  
**Haust.** *Haustus.* A draught.  
**Haust. purg.** *Haustus purgans.* A purgative draught.  
**H. d., H. decub.** *Hora decubitus.* At bedtime.  
**H. D. L. W.** In otology, hearing distance, left ear, for a watch.  
**H. D. R. W.** In otology, hearing distance, right ear, for a watch.  
**H + Hm.** Compound hypermetropic astigmatism.  
**Hor. decub.** *Hora decubitus.* At bedtime.  
**Hor. interm.** *Horis intermediis.* At the intermediate hours.  
**Hor. som.** *Hora somni.* At bedtime.  
**Hor. un. spat.** *Hore unius spatio.* After the interval of an hour.  
**H. p. n.** *Haustus purgans noster.* Our (i. e., the practitioner's own special) purging draught.  
**H. s.** *Hora somni.* At bedtime.

**Id.** *Idem.* The same.  
**Idon.** *Idoneus.* Proper.  
**III-pa.** *A tertipara.*  
**II-pa.** *A secundipara.*  
**In.** *Inch.*  
**Ind.** *Indies.* Daily.  
**Inf., Infund.** *Infunde.* Infuse.  
**Infus.** *Infusum.* An infusion.  
**Inj., Inject.** *Injectio.* An injection.  
**Inj. enem.** *Injectiatur enema.* Let an enema be injected.  
**In pulm.** *In pulmento.* In gruel.  
**I-pa.** *A primipara.*  
**IV-pa.** *A quartipara.*

**Jul.** *Julepum* or *Julapium.* A julep.  
**Juscul.** *Jusculum.* A broth.

**Ka.** *Cathode* (used especially in German works).  
**Kal. ppt.** *Kali præparatum.* Potassium carbonate.  
**Kg., Kilo.** *Kilogramme.*

**Lag.** *Lagena.* A flask.  
**L. A. H.** *Licentiate of the Apothecaries' Hall* (of Ireland).  
**Lat. dol.** *Lateri dolenti.* To the painful side.  
**Lb.** *Libra.* A pound.  
**L. Ch.** *Licentiatu chirurgiæ.* Licentiate in surgery.  
**L. D. S.** *Licentiate in dental surgery.*  
**Lect.** *Lectus.* A bed.  
**L. F. P. S.** *Licentiate of the Faculty of Physicians and Surgeons* (of Glasgow).  
**Lic. Med.** *Licentiatu medicinæ.* Licentiate in medicine.  
**Lin., Linim.** *Linimentum.* A liniment.  
**Liq.** *Liquor.* A liquor or solution.  
**L. K. Q. C. P.** *Licentiate of the King and Queen's College of Physicians* (in Ireland).  
**L. M.** *Licentiate in midwifery.*  
**L. M. A.** Of the position of the foetus, left mento-anterior.  
**L. O. A.** Of the position of the foetus, left occipito-anterior.  
**Lot.** *Lotio.* A lotion.  
**L. R. C. P.** *Licentiate of the Royal College of Physicians.*  
**L. R. C. S.** *Licentiate of the Royal College of Surgeons.*  
**L. S. A.** *Licentiatu Societatis Apothecariorum.* Licentiate of the Apothecaries' Society.

**M.** *Misce.* Mix.  
**M.** *Manipulus.* A handful.  
**M., m.** *Minimum.* A minim.  
**µ.** A micron.  
**Mac.** *Macerata.* Macerate.  
**M + Am.** Compound myopic astigmatism.  
**Man.** *Manipulus.* A handful.  
**Man. pr.** *Mane primo.* In the early morning.  
**M. A. O.** Master of the art of obstetrics.  
**Mass. pil.** *Massa pilularum.* A pill-mass.  
**Matut.** *Matutinus.* In (or for) the morning.  
**M. B.** *Medicinæ baccularius.* Bachelor of medicine.  
**M. Ch.** *Magister chirurgiæ.* Master in surgery.  
**M. D.** *Medicinæ doctor.* Doctor of medicine.  
**Md.** *Medius.* Middle.  
**Mgm.** *Milligramme.*  
**Mic. pan.** *Mica panis.* Bread-crumbs.  
**Min.** *Minimum.* A minim.  
**Mist.** *Mistura.* A mixture.  
**Mit.** *Mitte, seu mittatur, seu mittantur.* Send, let it (or them) be sent.  
**Mitt. sang.** *Mitte sanguinem, seu Mittatur sanguis.* Bleed, let blood be drawn.  
**M. K. Q. C. P.** Member of the King and Queen's College of Physicians (in Ireland).  
**M. l.** *Macula lutea.* The yellow spot in the retina.  
**M. L. A.** *Mento-læva anterior.* Of the position of the foetus, left mento-anterior.  
**M. L. P.** *Mento-læva posterior.* Of the position of the foetus, left mento-posterior.  
**Mm.** *Millimetre.*  
**Mod. præ., Mor. dict.** *Modo præscripto, More dicto.* In the manner directed.  
**Mor. sol.** *More solito.* In the usual manner.  
**M. R. C. P.** Member of the Royal College of Physicians.  
**M. R. C. S.** Member of the Royal College of Surgeons.  
**M. S.** Master in surgery.  
**M. S. A.** Member of the Apothecaries' Society.  
**Muc.** *Mucilago.* Mucilage.

**Necn.** *Necnon.* Also.  
**Ne tr. s. num.** *Ne tradas sine nummo.* Do not deliver without the money. A private direction given by an apothecary to his assistant.  
**N. m.** *Nux moschata.* Nutmeg.  
**No.** *Numero.* In number; hence, loosely, number.  
**Noc., Noct.** *Nocte.* At night, by night.  
**Noct. maneq.** *Nocte maneq.* At night and in the morning.

**O.** *Octarius.* A pint.  
**O. D.** *Oculus dexter.* The right eye. 2. Optic disc.  
**O. D. A.** *Occipito-dextra anterior.* Of the position of the foetus, right occipito-anterior.  
**O. D. P., O. I. D. P.** *Occipito-dextra posterior, Occipito-iliacque droite postérieure* (Fr.). Of the position of the foetus, right occipito-posterior.  
**Ol.** *Oleum.* Oil.  
**O. L. A.** *Occipito-læva anterior.* Of the position of the foetus, left occipito-anterior.  
**Ol. lini s. l.** *Oleum lini sine igne.* Cold-drawn linseed-oil.  
**Ol. oliv.** *Oleum olivæ.* Olive-oil.  
**O. L. P.** *Occipito-læva posterior.* Of the position of the foetus, left occipito-posterior.  
**Ol. res.** *Oleoresina.* An oleoresin.  
**O. m.** *Omni mane.* Every morning.  
**Omn. bid.** *Omni biduo.* Every two days.  
**Omn. bih.** *Omni bishorio.* Every two hours.  
**Omn. hor.** *Omni hora.* Every hour.  
**Omn. man.** *Omni mane.* Every morning.  
**Omn. noct.** *Omni nocte.* Every night.  
**Omn. quad. hor.** *Omni quadrante horæ.* Every quarter of an hour.  
**O. n.** *Omni nocte.* Every night.  
**O. o. o.** *Oleum olivæ optimum.* Best olive-oil.  
**O. S.** *Oculus sinister.* Left eye.

**Ov.** *Ovum*. An egg.

**Ox.** Oxymel.

**Oz.** An ounce. The z here is not the letter z, but an adaptation of 3, a mediæval mark of abbreviation. The prescription symbol ʒ, the ounce, and its derivative 3, the drachm, appear to be derived from the oz.

**P.** *Pondere*. By weight.

**P. æ., Par. æq.** *Partes æquales*. Equal parts.

**Par. aff.** *Pars affecta*. The part affected.

**Par. dol.** *Pars dolens*. The part in pain.

**Part. vic.** *Partitis vicibus*. In divided doses.

**Past., Pastill.** *Pastillus*. A pastille.

**Per. op. emet.** *Peracta operatione emetici*. When the action of the emetic has ceased.

**Ph.** A pharmacopœia.

**Pil.** *Pilula*. A pill.

**Pil., Pill.** *Pillule*. Pills.

**Pocill.** *Pocillum*. A small cup.

**Pocul.** *Poculum*. A cup.

**Pond.** *Pondere*. By weight.

**Post sing. sed. liq.** *Post singulas sedes liquidas*. After every loose stool.

**Pot.** *Potio*. A potion.

**Pp.** A precipitate.

**P. p.** *Punctum proximum*. The near point.

**P. p. a.** *Phiala prius agitata*. The bottle having been first shaken.

**Ppt.** *Præparatus*. Prepared.

**P. r.** *Punctum remotum*. The far point.

**P. rat. æt.** *Pro ratione ætatis*. In due proportion to the age of the patient.

**P. r. n.** *Pro re nata*. For the particular occasion; as the occasion may require.

**Pt.** Pint.

**Pug., Pugil.** *Pugillus*. A pugil; as much as can be lifted between the fingers and the thumb.

**Pulm.** *Pulmentum*. Gruel.

**Pulv.** *Pulvis*, seu *pulveres*. A powder, or powders.

**P. U. S.** The United States Pharmacopœia.

**Q. lib., Q. p.** *Quantum libet* (seu *libet*), *Quantum placet* (seu *placeat*). As much as is (or may be) thought fit.

**Qq. 1.** *Quisque*. Every. 2. *Quoque*. Also.

**Qq. hor.** *Quaque hora*. Every hour.

**Q. s.** *Quantum sufficit* (seu *sufficiat*). A sufficient amount.

**Quor.** *Quorum*. Of which.

**Quotid.** *Quotidie*. Daily.

**Q. v., Q. vol.** *Quantum vis*, *Quantum volueris*. As much as you will.

**R., R.** *Recipe*. Take. In the form R, constantly written as the superscription in prescriptions, we appear to have a survival of the old practice of invoking the favoring aid of a divinity—the bar across the tail of the R being explained as a remnant of the symbol of Jupiter (2f).

**R.** Réaumur scale of temperature.

**Rad.** *Radix*. Root.

**Ras.** *Rasura*. Shavings.

**Rect.** *Rectificatus*. Rectified.

**Redig. in pulv.** *Redigatur in pulverem*. Let it be reduced to powder.

**Red. in pulv.** *Redactus in pulverem*. Reduced to powder.

**Reg. umb.** *Regio umbilici*. The region of the navel.

**Rep., Repet., Rept.** *Repetatur*, seu *Repetantur*. Let it (or them) be repeated.

**R. M. A.** Of the position of the fœtus, right mento-anterior.

**R. O. A.** Of the position of the fœtus, right occipito-anterior.

**R. O. P.** Of the position of the fœtus, right occipito-posterior.

**S.** *Signa*. Label; write directions.

**σ.** The thousandth part of a second.

**S. A.** *Secundum artem*. According to art, properly, skillfully.

**Sat.** *Saturatus*. Saturated.

**Scat.** *Scatula*. A box.

**Sc. D. A.** *Scapulo-dextra anterior*. Of the position of the fœtus, right scapulo-anterior.

**Sc. D. P.** *Scapulo-dextra posterior*. Of the position of the fœtus, right scapulo-posterior.

**Sc. L. A.** *Scapulo-læva anterior*. Of the position of the fœtus, left scapulo-anterior.

**S. D. A.** *Sacro-dextra anterior*. Of the position of the fœtus, right sacro-anterior.

**S. D. P.** *Sacro-dextra posterior*. Of the position of the fœtus, right sacro-posterior.

**Sed.** *Sedes*. A stool.

**Sem.** *Semen*. Seed.

**Semidr.** *Semidrachma*. Half a drachm.

**Semih.** *Semihora*. Half an hour.

**Serv.** *Serva*. Keep, preserve.

**Sesquih.** An hour and a half.

**Sig.** *Signetur*. Let it be labeled.

**Sig. n. pr.** *Signa nomine proprio*. Label with its proper name (not a popular name or trade name).

**Sing.** *Singulorum*. Of each.

**Si n. val.** *Si non valeat*. If it does not answer.

**Si op. sit.** *Si opus sit*. If there is need, if necessary.

**Si vir. perm.** *Si vires permittant*. If the patient's strength will permit.

**S. L. A.** *Sacro-læva anterior*. Of the position of the fœtus, left sacro-anterior.

**S. L. P.** *Sacro-læva posterior*. Of the position of the fœtus, left sacro-posterior.

**S. n.** *Secundum naturam*. According to nature.

**Solut.** *Solutus*. Dissolved.

**Solv.** *Solve*. Dissolve.

**Sp., Spt.** *Spiritus*. Spirit.

**Spt. vin. rect.** *Spiritus vini rectificatus*. Rectified spirit of wine.

**Ss.** *Semis*. A half.

**S. s. s.** *Stratum super stratum*. Layer upon layer.

**St.** *Stet*, seu *Stent*. Let it (or them) remain unchanged.

**Sub fin. coct.** *Sub finem coctionis*. Toward the end of the boiling.

**Sum.** *Sumat*, seu *Sumendum*. Let the patient take, to be taken.

**Summ., Summit.** *Summitates*. The flowering tops.

**Sum. tal.** *Sumat talem*. Let the patient take something like this.

**Sup. bib. haust.** *Superbibendo hausto*. This draught being drank over and above.

**S. v. r.** *Spiritus vini rectificatus*. Rectified spirit of wine.

**Syr.** *Syrupus*. A syrup.

**Tab.** *Tabella*. A tablet.

**T. d.** *Ter in die*. Three times a day.

**Te.** Tetanic contraction.

**Temp. dext.** *Tempori dextro*. To the right temple.

**Temp. sinist.** *Tempori sinistro*. To the left temple.

**Tinct.** *Tinctura*. A tincture.

**Tn.** Tension.

**T. o.** *Tinctura opii*. Tincture of opium.

**T. o. c.** *Tinctura opii camphorata*. Camphorated tincture of opium.

**Tr., Tra.** *Tinctura*. A tincture.

**Trit.** *Tritura*. Triturate.

**Troch.** *Trochiscus*, seu *Trochisci*. A troche, or troches.

**Tus.** *Tussis*. A cough.

**Ult. præsc.** *Ultimum præscriptus*. Last prescribed.

**Umb.** *Umbilicus*. The navel.

**Unc.** *Uncia*. An ounce.

**Ung.** *Unguentum*. An ointment.

**Ut dict.** *Ut dictum*. As directed.

**Utend.** *Utendus*. To be used.

**Vehic.** *Vehiculum*. A vehicle.

**Ves.** *Vesica*. The bladder.

**Vesic.** *Vesicatorium*. A blister.

**V. f.** The visual field.

**Vitel.** *Vitellus*. Yolk.

**Vit. ov.** *Vitellum ovi*. Yolk of egg.

**Vit. ov. sol.** *Vitello ovi solutus*. Dissolved in yolk of egg.

**Vitr.** *Vitrum*. Glass.

**V. o. s.** *Vitello ovi solutus*. Dissolved in yolk of egg.

**Vs.** *Venesectio*. Venesection.

**Y. s.** The yellow spot (*macula lutea*). [a, 48.]

## WEIGHTS AND MEASURES.

The metric system of measurement (see under *Metric system*) has been legalized in Great Britain since 1864, and in the United States since 1866, but has not been adopted in either country to the extent that its superiority over the current system indicates as eminently desirable.

The customary weights and measures now (1894) authorized for use in the United States are based on the metric system, being all derived theoretically from the "national prototype standards" of the metre and the kilogramme, made of platinum-iridium, deposited in the office of Standard Weights and Measures at Washington. The United States *yard* is defined as equal to  $\frac{3600}{3937}$  metre (the length of the yard being 36 and that of the metre  $39\frac{370}{1000}$  inches); the commercial *pound*, or pound avoirdupois, as  $\frac{7000}{15432.35639}$  kilogramme (the pound being 7,000 and the kilogramme 15432.35639 grains); and the *gallon* as 3785.434 grammes of distilled water at its maximum density, weighed *in vacuo*.

The United States inch and grain are practically identical with the British inch and grain, although the United States standards of length and weight, based on the inch and the grain, theoretically depend, through the metric system, on the dimensions of the earth, while the British standards depend on the length of the day. A pendulum vibrating once in a second *in vacuo*, at sea-level, in the latitude of London is  $39\frac{13929}{1000}$  inches in length, and the British standard *yard* is defined as 36 of such inches. A cubic inch of distilled water at the temperature of 62° Fahr. weighs 252.458 grains, and the British standard *pound troy* is defined as 5,760 of such grains. There is, however, considerable difference between the values of the units of measurement of volume, the United States *gallon* corresponding to that of the old British wine measure, with a capacity of 231 cubic inches, while the British standard *gallon*, or imperial gallon, is defined as the space occupied by 10 pounds avoirdupois (70,000 grains) of distilled water at 62° Fahr., with a capacity of 277.274 inches.

It is to be remembered that, in the convenient decimal notation of the metric system, the *decimetre* (or *dekametre*), *hectometre*, and *kilometre* (having Greek prefixes) are respectively 10, 100, and 1,000 metres, and the *decimetre*, *centimetre*, and *millimetre* (having Latin prefixes) are  $\frac{1}{10}$ ,  $\frac{1}{100}$ , and  $\frac{1}{1000}$  metre, and that the same prefixes used with *gramme* and *litre* indicate the same multiples and fractions of those units.

### MEASURES OF LENGTH.

Yard.	Feet.	Inches.	Lines.	Metric equivalent.
1 yd. = 3	= 36	= 432	= 9144	metres.
1 ft. = 12	= 144	= 30480	= 25400	centimetres.
1 in. = 12	= 2540			"
		1 = 2.54		millimetres.

1 kilometre = 1093.6 yards (a little under  $\frac{1}{8}$  mile [1 mile = 1,760 yards]); 1 metre = 1.0936 yard (a little over  $\frac{3}{4}$  foot); 1 centimetre = .3937 inch (a little under  $\frac{1}{2}$  inch); 1 millimetre = a little under  $\frac{1}{16}$  inch.

### WEIGHTS.

The tables of weight in customary pharmaceutical use are modifications of the avoirdupois and troy weights. The apothecary buys his medicines by avoirdupois, but in the United States (as formerly in Great Britain) they are prescribed, compounded, and dispensed by apothecaries' weight, which is substantially troy weight. The latter has, in addition to the *pound*, the *ounce*, and the *grain*, a *pennyweight* (dwt.) of 24 grains, and avoirdupois has a *dram* (dr.), the sixteenth part of an ounce (about 27½ grains), while the *grain*, imported into avoirdupois in the British Pharmacopœia, really belongs to troy weight. Particular care must be taken to avoid confounding the troy ounce of 480 grains with the avoirdupois ounce of 437½ grains. When apothecaries' weight is used in prescriptions, Roman numerals are used, written after the denomination sign, the letter i when alone or final being ordinarily written j: thus, ʒj (= 1 ounce), ʒiij (= 8 drachms), ʒiiss (= 2½ scruples). For metric and British (avoirdupois) weights Arabic numerals are used, written after the denomination.

### Avoirdupois Weight (including Grains).

[Used in the British Pharmacopœia.]

Pound.	Ounces.	Grains.	Metric equiv.
1 lb. = 16	= 7,000	= 453.59 grammes.	
1 oz. = 437½	= 28.35	"	
	1 gr. = 6.48	centigrammes.	

1 kilogramme = 2.20462 pounds (a little over 2½ lb.). The pound is a little over  $\frac{7}{8}$  or  $\frac{3}{4}$  kilogramme.

Compared with imperial measure (British), 1 lb. of distilled water corresponds to  $\frac{1}{16}$  gallon, 1 oz. to 1 fl. oz., and 1 gr. to 1.09714 minim.

### Apothecaries' Weight.

Pound.	Ounces.	Drachms.	Scruples.	Grains.	Metric equiv.
1 troy lb. = 12	= 96	= 288	= 5,760	= 373.24 gms.	
1 (ʒj) = 8	= 24	= 480	= 31.10	"	
1 (ʒij) = 3	= 60	= 3.89	"		
1 (ʒj) = 20	= 1.29	"			
	1 (gr. j) = 6.48	cgms.			

1 gramme = 15.43235 grains (a little under 15½ grs.); 1 centigramme = .15432 grain (a little under  $\frac{1}{6}$  gr.); 1 milligramme = .01543 grain (a little over  $\frac{1}{64}$  gr.).

Compared with apothecaries' fluid measure (United States), 1 pound troy of distilled water corresponds to 12.6207 fl. ʒ., 1 ounce troy to 1.0517 fl. ʒ., 1 drachm to 1.0517 fl. ʒ., and 1 grain to 1.0517 fl. ʒ. As a cubic centimetre of pure water weighs a gramme, the cubic centimetres contained in the pound, ounce, etc., of water correspond to the grammes as given above.

### Equivalents of Milligrammes, Centigrammes, and Grammes in Grains.

Mgms.	Grs.	Cgms.	Grs.	Cgms.	Grs.	Gms.	Grs.
1 = .015	1 = .15	15 = 2.31	65 = 10.03	1 = 15.43			
2 = .031	2 = .31	20 = 3.08	70 = 10.80	2 = 30.86			
3 = .046	3 = .46	25 = 3.86	75 = 11.57	3 = 46.30			
4 = .062	4 = .62	30 = 4.63	80 = 12.35	4 = 61.73			
5 = .077	5 = .77	35 = 5.40	85 = 13.12	5 = 77.16			
6 = .092	6 = .92	40 = 6.17	90 = 13.89	6 = 92.60			
7 = .108	7 = 1.08	45 = 6.94	95 = 14.66	7 = 108.03			
8 = .123	8 = 1.23	50 = 7.72	100 = 15.43	8 = 123.46			
9 = .139	9 = 1.39	55 = 8.49	125 = 19.29	9 = 138.90			
10 = .154	10 = 1.54	60 = 9.26	175 = 27.01	10 = 154.32			

### MEASURES OF CAPACITY.

The relation of the units is identical in the United States and British measures of capacity, except that the pint is 16 fluidounces in the former and 20 in the latter. This makes the corresponding lower denominations much more nearly equal than the higher, for, whereas the British gallon and pint are greater than those of the United States by about one fifth, the United States fluidounce, fluidrachm, and minim are greater than the British by about one twenty-fourth.

### Apothecaries' Fluid Measure [United States Measure].

Gal.	Pints.	Fluidounces.	Fluidrachms.	Minims.	Cubic inches.	Met. equiv.
1 C. = 8	= 128	= 1,024	= 61,440	= 231	= 3.78543 litres.	
1 pt. = 16	= 128	= 7,680	= 28,875	= 473.179	c. cms.	
1 (f ʒj) = 8	= 480	= 1,804.7	= 29,574	"		
1 (f ʒj) = 8	= 60	= 0.2256	= 3.697	"		
1 (fl. j) = 0.0038	= 0.06161	"				

1 litre = 33.814 fl. ʒ. (a little over 2½ pints); 1 cubic centimetre (= 1 millilitre) = 16.231 fl. ʒ.

1 United States gallon = .8331 (a little under  $\frac{1}{2}$ ) imperial gallon; 1 United States minim = 1.0414 (a little under  $\frac{1}{10}$ ) imperial minim. The weight of 1 United States gallon of distilled water is 8.3454 lb. avoird., that of 1 fluidounce is 1.043 oz. avoird. (= .3508 troy ounce), and that of 1 minim is .9508 grain.

### Imperial Measure of Capacity [British Measure].

Gal.	Pints.	Fluid ounces.	Fluid drachms.	Minims.	Cubic inches.	Met. equiv.
1 C. = 8	= 160	= 1,280	= 76,800	= 277.274	= 4.54346 litres.	
1 pt. = 20	= 160	= 9,600	= 34,659	= 567.932	c. cms.	
1 fl. oz. = 8	= 480	= 1.733	= 28.397	"		
1 fl. dr. = 60	= 217	= 3.550	"			
1 min. = .004	= .05916	"				

1 litre = 35.2154 fl. oz. (a little over 1½ pint); 1 cubic centimetre (= 1 millilitre) = 16.9034 min.

1 imperial gallon = 1.2003 (a little over  $\frac{1}{2}$ ) United States gallon; 1 imperial minim = .9601 (a little over  $\frac{1}{10}$ ) United States minim. The weight of 1 imperial gallon of distilled water is 10 lb. avoird., that of 1 fluid ounce is 1 oz. avoird., and that of 1 minim is .91146 grains.

### THERMOMETRIC SCALES.

Comparison of the Centigrade and Fahrenheit Scales for Temperatures ranging from 32° to 56° C.

C.	F.	C.	F.	C.	F.	C.	F.
32° = 89.6°	36.7° = 98°	41.1° = 106°	46° = 114.8°				
32.2 = 90	37 = 98.6	41.7 = 107	46.1 = 115				
32.8 = 91	37.2 = 99	42 = 107.6	46.7 = 116				
33 = 91.4	37.8 = 100	42.2 = 108	47 = 116.6				
33.3 = 92	38 = 100.4	42.8 = 109	47.2 = 117				
33.9 = 93	38.3 = 101	43 = 109.4	47.8 = 118				
34 = 93.2	38.9 = 102	43.3 = 110	48 = 118.4				
34.4 = 94	39 = 102.2	43.9 = 111	48.3 = 119				
35 = 95	39.4 = 103	44 = 111.2	48.9 = 120				
35.6 = 96	40 = 104	44.4 = 112	49 = 120.2				
36 = 96.8	40.6 = 105	45 = 113	49.4 = 121				
36.1 = 97	41 = 105.8	45.6 = 114	50 = 122				

For all temperatures, to convert C. degrees to F. degrees, multiply by 9, divide by 5, and add 32; to convert F. degrees to C. degrees, subtract 32, multiply by 5, and divide by 9. [a, 48.]

## SUPPLEMENTARY LIST OF COLLABORATORS,

BEING THE NAMES OF PERSONS, IN ADDITION TO THOSE GIVEN ON THE TITLE-PAGE, WHO  
HAVE TAKEN PART IN THE WORK, OR FROM WHOM INFORMATION HAS BEEN OBTAINED.

- a. 1. D. Bryson Delavan, M. D.
- a. 2. Frederick M. Maas.
- a. 3. Edward L. Keyes, M. D.
- a. 4. Thomas T. Sabine, M. D.
- a. 5. Juan García Purón, M. D.
- a. 6. O. Abruzzo, M. D.
